HERITAGE U.S. COIN AUCTION

FEBRUARY 22-23 & 25-26, 2018 | LONG BEACH

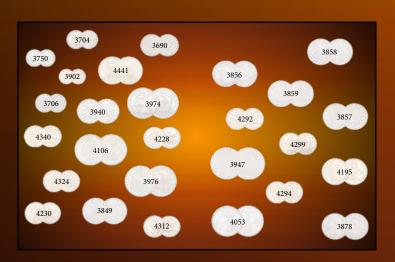

Heritage Signature® Auction #1272 | Long Beach Coin Expo

U.S. Coins

Featuring: The Admiral Collection • The Bayside Collection • The Merrill Collection • The Property of a Lady • The XSurgeon Set of Morgans NGC Registry #1 • The Loma Linda Collection, Part II • The jwb1040 Collection • The Sea Cliff Collection • The Jamestown Collection, Part II • The E.B. Strickland Collection, Part II • The Douglas Knight Collection, Part II

February 22-23 & 25-26, 2018 | Long Beach

Signature® Floor Sessions 1-5

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Long Beach Convention Center • Room 103A 300 E. Ocean Avenue • Long Beach, CA 90802

Session 1

Thursday, February 22 • 11:00 AM PT • Lots 3001-3683

Session 2 - PREMIER

Thursday, February 22 • 4:00 PM PT • Lots 3684-4483

Session 3

Friday, February 23 • 9:00 AM PT • Lots 4484-4981

Session 4

Friday, February 23 • 1:00 PM PT • Lots 4982-5610

Session 5

Friday, February 23 • 6:00 PM PT • Lots 5611-6128

Signature® Internet Session 6-7

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 6

Sunday, February 25 • 2:00 PM CT • Lots 7001-8482

Session 7

Monday, February 26 • 2:00 PM CT • Lots 8483-9727

LOT SETTLEMENT AND PICK-UP

Friday, February 23 • 10:00 AM – 1:00 PM PT Saturday, February 24 • 9:00 AM – 12:00 PM PT

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 20% (minimum \$19) per lot.

Dear Bidder,

Our cross-country trip to sunny California for the February Long Beach Expo looks brighter than ever in 2018. The recent FUN Show demonstrated how a number of specialized, high-quality collections add up to a memorable offering. Our U.S. Coins portion of the FUN event brought nearly \$41 million, while the associated currency and World Coins auctions added another \$30 million to the month's total of more than \$71 million in prices realized. It was a powerful start to the year!

The current Long Beach Expo is poised to follow a similar trajectory. This year, we have quite a few Featured Collections. Combined with important coins from more than 200 individual consignors, our Long Beach plate is full – in fact, the large number of high-value coins expands our Premier floor session by two hours to accommodate 800 lots.

This is our most robust February Long Beach auction in recent years. The following Featured Collections form the backbone of the event:

The Admiral Collection

Quite simply, The Admiral Collection is one of the finest early eagle and Liberty Head ten collections ever assembled, ranking among the all-time great eagle collections including Eliasberg, Warren Miller, Harry W. Bass, and Dallas Bank. Often, the caliber of a fine ten dollar gold set is measured by the quality of a few key dates – if they are outstanding, it is almost certain the balance of the coins will be remarkable as well.

Such is the case with The Admiral Collection. Among early eagles, it offers splendid examples of the rare 1795 varieties, as well as rare 1796 and 1797 Small Eagle issues. A key-date 1804 Crosslet 4 grades MS60 NGC and is itself a profound rarity in Mint State. Not to be outdone, the Liberty Head tens are equally distinguished by rare dates in high grades, including 1858, 1860-S, 1862-S, 1864-S, 1873-CC, and the 1875 through 1877 Philadelphia issues.

This spectacular collection of Draped Bust and Liberty Head eagles contains rarity after rarity, proving once and for all that, although this is the most challenging denomination to collect in American numismatics, even today a superb collection is possible. The set is complete for all *Guide Book* varieties excluding the rare 1798/7 variety with seven stars left, six star right and the extremely rare 1804 restrike proof novodel Plain 4 (just four pieces known). It certainly ranks among the finest specialized sets ever put together for these two series. Many coins from this important consignment derive from populations of 75 coins or fewer. Some pieces represent the absolute finest examples extant or the highest-graded coins ever offered at public auction. A vast majority of the coins grade in Mint State or About Uncirculated.

Expect spirited competition and record-breaking prices for these outstanding offerings. Many coins are unseen in decades and represent once-in-a-generation opportunities.

The Bayside Collection

Since childhood, the originator of The Bayside Collection was interested in American history and he collected coins that shed light on the country's storied past. He would avidly scour all sources in search of interesting coins, including Colonials, classic U.S. type coins, and early American gold and silver coinage. In addition to his numismatic passions, he was a DJ on his college's radio station and had a life-long love of many genres of music. A financier and a man who held his family close to his heart, he had a great passion for numismatics as well as for his family. Bidders today will appreciate his focus on history and quality when these coins go to new, appreciative homes.

The Merrill Collection

We are grateful that Chris Merrill provides the following background information about the scope of The Merrill Collection. Many of the coins described below will appear in the present Long Beach auction. The balance of the collection is scheduled for Heritage's Central States event, June Long Beach, and upcoming Internet auctions:

The Merrill Collection of U.S. half dollars was assembled over the last 25 years by noted Bust half enthusiast Chris Merrill and his son Jacob. Their PCGS Registry Set of Everyman Early Half Dollars (1794 - 1839) received recognition by PCGS in 2015 as a Platinum Award Winning Set after five years as the finest known. The collection included all but five of the total 450 Bust Half die varieties by Overton number. Several of the rarest and most-prized examples are represented in the current Long Beach offering, including the rare and indemand 1817/4 Overton 102, 1806 O-108 Knob 6 No Stem, 1794 O-110, 1796 (both 15 and 16 Star varieties), 1797 O-102, and 1839 Small Letters Reverse. The set also includes the finest-known R-7 varieties of 1806 O-126 and 1807 O-115, both of which appear as plate coins in Overton/Parsley's classic book, *U.S. Early Half Dollar Die Varieties* (1794 - 1836). Many of the Merrill coins are referenced in Steve Tompkin's recent book, *Early United States Half Dollars* 1794 – 1807.

Among Seated Liberty half dollars, The Merrill Collection includes some of the most sought-after examples of the series, including the rare and popular 1878-S, the 1844-O Doubled Date, a nice 1846 over horizontal 6, an 1847/6, 1855/54, 1861-O Confederate issues, 1873 No Arrows Open 3, and 1870 through 1878 Carson City mintages. The set also includes numerous rare die varieties by WB number, as referenced in the works of Randy Wiley and Bill Bugert. Merrill's Complete Variety Set of Circulating Liberty Seated Half Dollars (1839 - 1891) is currently the most complete PCGS Registry set, lacking only the prohibitively rare 18 53-O No Arrows variety. The set includes a half dozen of the finest PCGS-graded examples by variety.

The Merrill U.S. half dollar set from 1794 to 2017 is also the most complete PCGS Registry Set in that challenging category. Many of Merrill's half dollars were collected and certified by PCGS back in the 1990s, with hundreds of coins still housed in their original PCGS old green label holders.

The Property of a Lady

The Property of a Lady is a stunning collection formed in the 1960s. It is primarily a type collection focused on silver issues in both circulation strike and proof, although some beautiful copper pieces are included (including several remarkable proof half cents). Gold is represented by key commemorative issues, including a resplendent five-piece Panama-Pacific set -- with original box -- that will be sold as separate lots during the Premier Session. The two fifty-dollar Pan-Pac gold pieces (round and octagonal) each grade MS64 PCGS. Silver coinage is the focus for much of the collection, with early halves, early dollars, Bust, Seated, and Barber coinage, as well as Morgan dollars at the forefront. Most of the coins are wonderfully toned and original, and all have been absent from the market for 50+ years. Proofs are included in the later series, including some dazzling Seated halves and Seated dollars, as well as Morgan dollar proofs. Among the circulation strikes, we note a Choice Fine 1796 half (Ex: George Walton) and an elusive high-grade 1921-S Walking Liberty half certified MS65 PCGS. Bidders will do well to click on The Property of a Lady pedigree included on the auction home page, which will automatically show the entire collection (350+ lots strong) spread throughout all floor sessions and two important online sessions.

The XSurgeon Set of Morgans NGC Registry #1

We are extremely pleased to present NGC's #1 Registry Set of Morgan Dollars, 1878-1921, Circulation Issue (NGC coins) as part of the Long Beach Expo. The set ranks #2 when both NGC and PCGS coins are included, and it is presented in its entirety with lots in both the floor and online sessions. As expected with such a highly rated set, the XSurgeon dollars dominate the Premier Session Morgan dollar selections. Many finest-knowns and coins that are tied for finest headline the collection. Virtually every coin is extraordinary, but of special note is a spectacular 1892-S certified MS65 PCGS, the first Gem-level example we have offered in eight years, and a particularly amazing run of high-grade Carson City issues.

The Loma Linda Collection, Part II

We offered Part I of The Loma Linda Collection as part of our FUN auction in January, where the fine collection caused quite a stir with Bust half and early copper specialists. We are pleased to present more of the same here at Long Beach, with many better-variety half cents, large cents, and early half dollars. Among the halves, we note a 1795 O-121, Y punched over a star, graded AU55 PCGS, Ex: Buddy Ebsen Collection. An 1818 half is the very scarce O-115 variety certified XF40 PCGS. Half cents include a PR63 Brown PCGS from the Eliasberg Collection, a Large Berries Original Proof, and 1796 half cents representing both the With Pole and Without Pole types. A number of important 1793 and 1794 large cents in desirable collector grades join a pair of rare Select proof issues, an 1848 N-19 and an 1850 N-11 Ex: Norweb proof large cents.

The jwb1040 Collection

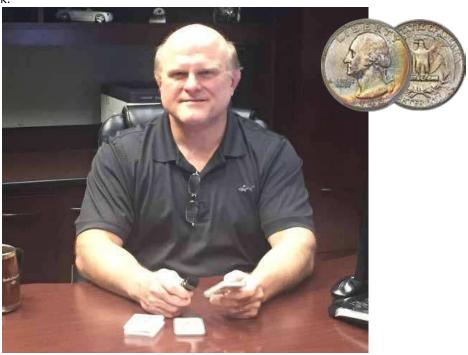

John W. Borst, our consignor, wrote a wonderful summary of his history with numismatics, excerpted here:

"I was destined to have a passion for numismatics. When I was 3 years old, my mom told me to go down to the water to rinse off after a day at the beach. On my way back, I somehow misplaced my family. Entrusted to two lifeguards, the only thing that would stop my sobbing was a bribe. One of the lifeguards offered me a nickel. I took the coin and remained silent until my mom finally came to my rescue. The die was cast.

"I found my first Flying Eagle cent one day. Yes, it was a "beach find." Even though it was corroded and dateless, I was thrilled with my find, wishing it was an 1856.

"Collecting, selling, collecting, and selling again continued for many years, but really took off with the advent of the internet and eBay. Coins I could only dream of seeing, let alone acquiring, were at my fingertips. Then, I discovered Heritage's online site. Decades of pent-up demand were unleashed in a passionate pursuit of numerous 19th and 20th century series. One of the joys of collecting coins is that you are never really finished. Once you complete a series, you can always upgrade. Ultimately, you never "own" coins, but merely safeguard them for the next generation of young numismatists."

John's Long Beach consignment encompasses a number of highly collectible Bust halves, but its main attraction is the amazing set of Washington quarters. 100% complete, it ranks as the all-time finest PCGS Registry Set in the Washington Quarters with Major Varieties, Circulation Strikes (1932-Present), and in many other Registry Set categories as well. We expect a record number of interested bidders when this fantastic quarter collection crosses the block.

The Sea Cliff Collection

This is a nice collection of copper and silver U.S. type coins and proofs, with representatives in every floor session and the Signature® Internet sessions, too. A sharp 1879 Shield nickel grades MS66 PCGS, while an 1853 Arrows half dime is Superb, grading MS67 PCGS with splendid old-time toning. An 1807 Capped Bust half grades AU58 NGC, a slightly scarcer Overton variety O-114. Most of the coins in The Sea Cliff Collection were purchased raw in the 1970s and 1980s, offered here after decades off the market.

The Jamestown Collection, Part II

A variety of U.S. type coins supplement the larger part of this collection, which was offered at Tampa FUN. A number of interesting colonials appear in the Premier session, including two Washington Funeral Urn medals struck in silver, a 1779 Rhode Island Ship token (AU58 NGC) No Wreath, struck in brass, and a 1783 Chalmers Shilling Short Worm.

The E.B. Strickland Collection, Part II

The E.B. Strickland Collection drew considerable interest and active bidding at FUN. Additional selections for Long Beach include a number of early and Seated quarters, including an 1804 quarter struck from an early die state with attractive color and smooth surfaces. An 1822 quarter is the B-2, 25 over 50C variety. An 1870-CC quarter grades Good 6 PCGS, a popular collector grade for this rare first-year issue from the Carson City Mint.

The Douglas Knight Collection, Part II

A 1910 quarter eagle certified PR66 PCGS ranks behind just two other coins at that service. Other select gold and silver make up a small group of additional selections from the main collection that was part of our FUN Signature auction.

Some of the most important lots in the auction come from individual consignors, including these:

- 1794 Flowing Hair dollar, the Mougey Specimen, VF35 PCGS, lot 3947
- Kellogg & Humbert Gold Ingot, 52.37 ounces, Ex: S.S. Central America, lot 4472
- 1861 Confederate States of America cent, gold Haseltine Restrike, NGC Details, XF, lot 3902
- 1916-D Mercury Diime, MS66 Full Bands PCGS, lot 3781
- Circa 1831 C. Bechtler Five Dollar Gold, AU55 PCGS, K-15, 20 Carats Second Series, lot 4455

Bidding is simple before the auction and instantaneous during the sale, wherever you are in the world. Prior to the auction, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!® (our proprietary, award-winning online platform). If you are attending Long Beach in person we encourage you to stop by our booth on the bourse, view the lots on-site, and enjoy participating "live" from the auction floor.

Heritage wishes you the best of luck with your bids. Remember ... the Long Beach Expo never disappoints!

Sincerely,

Greg Rohan

President

Todd Imhof

SESSION ONE

COLONIALS

- 3001 1652 Pine Tree Shilling, Small Planchet, Fine 12 PCGS. Noe-29, W-930, Salmon 11-F, R.3. 66.82 gn. A charming dove-gray Massachusetts silver type coin. No detractions are evident, and wear is even aside from a few faint peripheral letters. Listed on page 41 of the 2018 *Guide Book*.
 - From The Bayside Collection. NGC ID# 2ARZ, PCGS# 24
- 3002 1652 Pine Tree Shilling, Small Planchet Cleaned PCGS Genuine. VF Details. Noe-16, W-835, Salmon 2-B, R.2. 54.3 grs. This impressive specimen is sharply detailed and lightly worn, but about half the lower obverse legend is off the planchet. From a middle state of the dies, this coin shows a dramatic die break in the lower branches. The surfaces are lightly abraded but show signs of a light cleaning in the past. Listed on page 41 of the 2018 Guide Book. from The Julian Kaufman Collection.

1652 Pine Tree Shilling, Choice VF Small Planchet, Noe-16

- 3003 1652 Pine Tree Shilling, Small Planchet, VF35 PCGS. Noe-16, W-835, Salmon 2-B, R.2. The scarce late die state with large breaks on the lower left tree branches and the lower right obverse. The reverse has spindly cracks near D AN. The steel-gray surfaces are devoid of detractions, though we note a slightly glossy area beneath the denomination. Listed on page 41 of the 2018 *Guide Book*. NGC ID# 2ARZ, PCGS# 24
- 3004 (1670-75) St. Patrick Farthing VF25 PCGS. Breen-212, W-11500. Breen's "Masonic punctuation" variety with three periods after REX. The brass splasher is west of the crown. The walnut-brown surfaces are generally attractive. We note only minor obverse flan flaws and a small edge imperfection on the reverse at 6 o'clock. Listed on page 43 of the 2018 Guide Book.
 - From The Jamestown Collection, Part II. NGC ID# AUAR, PCGS# 42
- 3005 (1670-75) St. Patrick Farthing VF35 PCGS. Breen-218, W-11500. Breen's "martlet below king" variety. The martlet is a legless heraldic bird that represents the pursuit of learning. A richly detailed medium brown example with evenly granular surfaces. The brass splasher is off-center southwest relative to the crown. Listed on page 43 of the 2018 *Guide Book*. NGC ID# AUAR, PCGS# 42

1723 Hibernia Halfpenny, MS64 Red Unabraded Surfaces, Martin 4.68-Gb.9

- 3006 1723 Hibernia Halfpenny MS64 PCGS Secure Red NGC. M. 4.68-Gb.9, W-13120, R.4. Orange-red luster illuminates this coruscating and crisply struck Choice Red halfpenny. Steel-gray is mostly confined to the high points and the 3 in the date. Perusal beneath a lens fails to locate any signs of contact. A middle die state with crumbling obvious on the upper reverse rim and several letters in the obverse legend. Listed on page 45 of the 2018 Guide Book. NGC ID# 2ATD. PCGS# 182
- 3007 1724 Hibernia Halfpenny AU58 PCGS. M. 4.67-K.3, W-13690, R.2. Stop after date, 11 harpstrings. Medium brown overall with many areas of lighter golden-brown toning. An exemplary example despite a hint of wear on the knees of Hibernia. Listed on page 47 of the 2018 *Guide Book*. Population: 5 in 58, 8 finer (1/18). NGC ID# 2ATH, PCGS# 190
- 3008 1760 Hibernia-Voce Populi Halfpenny, P Before Face AU53 NGC. N. 12, Z. 15-N, W-13950, R.2. The Voce Populi tokens were struck in Dublin, Ireland, and some were exported to Colonial America. This is a nicely centered representative with minimal wear and unmarked medium brown surfaces. The texture of the planchet is intermittently retained, and an edge flaw is east of the date. Listed on page 51 of the 2018 *Guide Book*. NGC ID# 2AUE, PCGS# 271

1766 Pitt Halfpenny, AU53 Betts-519, W-8350

- 3009 1766 Pitt Halfpenny AU53 PCGS. Betts-519, W-8350, R.3. These tokens, listed in the Betts reference, are almost certainly of English origin. They celebrate the statesman William Pitt and his repeal of the Stamp Act in 1766. This is a minimally circulated reddish-brown example with gunmetal accents and a couple of obverse planchet flaws. A trace of rub occurs over the high points of the portrait and ship. The reverse is slightly rotated. Listed on page 52 of the 2018 *Guide Book*.
 - From The Bayside Collection. NGC ID# 2AUH, PCGS# 236
- 3010 1773 Virginia Halfpenny, Period MS64 Red and Brown PCGS. N. 26-Y, W-1680, R.2. Orange-red color dominates the design recesses, while the centers and open fields are toned medium-brown. This semiprooflike near-Gem is void of contact, and provides exceptional eye appeal for an 18th-century copper coin. Listed on page 47 of the 2018 Guide Book.

Ex: Central States Signature (Heritage, 4/2011), lot 3922; FUN Signature (Heritage, 7/2012), lot 3006, which realized \$1,437.50. From The Bayside Collection. NGC ID# 2ATK, PCGS# 241

- 3011 1773 Virginia Halfpenny, Period, MS64 Red and Brown PCGS. N. 27-J, W-1585, R.2. Seven Harpstrings. Breen (1988) speculates that most Uncirculated Virginia halfpennies originate in "a keg found in Richmond before the Civil War" and acquired by Col. Mendes I. Cohen. Newman 27-J is identified by repunching on the A in VIRGINIA. This is a splendid late die state near-Gem with substantial peach-red on both sides. Listed on page 47 of the 2018 Guide Book. NGC ID# 2ATK, PCGS# 241
- 3012 1773 Virginia Halfpenny, Period, MS64 Red and Brown PCGS. CAC. N. 27-J, W-1585, R.2. Seven harpstrings. A principally peach-red near-Gem that has mellowed to gunmetal-gray over the high points of the devices. Unabraded and attractive with an interesting strike-through on the hair above the ribbon. Listed on page 47 of the 2018 Guide Book.

Ex: Dallas Signature (Heritage, 10/2012), lot 3016, which realized

From The Bayside Collection. NGC ID# 2ATK, PCGS# 241

1773 Virginia Halfpenny, No Period MS65 Red and Brown, N. 4-G

- 3013 1773 Virginia Halfpenny, No Period, MS65 Red and Brown PCGS. N. 4-G, W-1460, R.3. The legends and shield elements are orange-gold, though the open fields and high points are light chocolate-brown. The crown is convex but nonetheless fully defined. A desirable Gem of this late Colonial issue. Obverse die rust allows ready attribution of this collectible Virginia variety. Listed on page 47 of the 2018 *Guide Book*. Population: 3 in 65 Red and Brown, 1 finer (1/18). NGC ID# 2ATL, PCGS# 244
- 3014 1787 Massachusetts Half Cent AU53 PCGS. Ryder 4-C, W-5940, R.2. A smooth chocolate-brown commonwealth copper. The eagle's shield and the Indian's clothing display wear, but there are no flan or strike deficiencies. Listed on page 61 of the 2018 Guide Book. NGC ID# 2B22, PCGS# 296

1786 Connecticut Copper, AU55 Mailed Bust Left, Miller 5.5-M

5.5-M. Die alignment: 195°. A Choice AU 1786 Connecticut copper is always remarkable, and the present coin seems certain to rank high among its few peers. Light tan coloration with copper undertones mellows to darker brown in a few areas mostly on the obverse. While the centers are a bit weakly struck, the peripheries are rather strong, with a bold date and legends. There are few surface marks — indeed, the original envelope accompanying this piece calls it uncirculated. Superior to any of the Ford, Taylor, or Perkins pieces. The reverse is a somewhat early die state, for while the crack extending clockwise from INDE is visible, the die failure at Liberty's shins is just becoming apparent. Listed on page 63 of the 2018 Guide Book. NGC ID# 2B2G, PCGS# 331

1787 Connecticut Copper, VF20 Draped Bust Left, Rare Miller 24-FF

3016 1787 Connecticut Copper, Draped Bust Left, VF20 NGC. M. 24-FF, W-3080, Low R.7. A rare die marriage absent from both the Taylor and Ford collections. The variety is also distinctive, due to its plus sign and dashes punctuation on both sides. The present medium-brown example is among the finest known for the variety (an uncertified example graded VF25 appeared in a January 2012 Stack's Bowers auction). The surfaces are essentially unmarked and show only minor flan flaws. The centering is nearly ideal, with all legends complete except for the bottom half of the date digits. Listed on page 64 of the 2018 Guide Book.

From The Carlyle A. Luer Collection. NGC ID# 2B33, PCGS# 370

1787 Connecticut Copper, AU55 Miller 18-g.1, Draped Bust Left Rare Die Variety

3017 1787 Connecticut Copper, Draped Bust Left, AU55 NGC. M. 18-g.1, W-3045, R.6. A remarkable representative of this rare die marriage. An early die state without buckling on the left obverse field. Well-centered and nicely struck with only minimal flan imperfections. A trace of granularity near the 87 in the date, and the obverse shows a few pinpoint pits, but nonetheless exceptional. Undoubtedly within the Condition Census for the variety. Listed on page 64 of the 2018 Guide Book. NGC ID# 2B33, PCGS# 370

1787 Immunis Columbia Copper, VF25 W-5680, Eagle Reverse

3018 1787 Immunis Columbia, Eagle Reverse, VF25 PCGS. W-5680, High R.4. CAC. The strike is well-centered, with most of the date and other border legends at least legible, even if a trifle off the flan. Wear is even and leaves moderate detail in the devices. Under a loupe, portions of the surfaces are microgranular, although no detracting imperfections are noted. Deep olive-brown patina blankets each side. This is the only readily collectible variety in the Immunis Columbia copper series. Listed on page 57 of the 2018 Guide Book.

From The Bayside Collection. NGC ID# BFJL, PCGS# 841

3019 No lot.

3020 1787 Nova Eborac Copper, Seated Left AU50 PCGS. Breen-986, W-5755, R.3. A chocolate-brown example with minimally abraded and problem-free surfaces. Misaligned toward 8 o'clock relative to the obverse and 11 o'clock relative to the reverse, affecting the left side legends and the top of the seated figure's head. Listed on page 70 of the 2018 *Guide Book*.

Ex: Long Beach Signature (Heritage, 10/2001), lot 5063; Long Beach Signature (Heritage, 6/2002), lot 5007; Dallas Signature (Heritage, 11/2003), lot 5016; Dallas Signature (Heritage, 10/2012), lot 3023, which realized \$1,539.25.

From The Bayside Collection. NGC ID# 2B4A, PCGS# 478

3021 1787 Nova Eborac Copper, Seated Left AU50 PCGS. Breen-986, W-5755, R.3. A glossy walnut-brown representative of this scarce New York state issue. The devices are richly detailed. The fields show subtle signs of smoothing near the rims. Listed on page 70 of the 2018 *Guide Book*.

Ex: Oak Collection of American Colonial Coinage (Heritage, 9/2005), lot 335, which realized \$2,070.

From The Bayside Collection. NGC ID# 2B4A, PCGS# 478

3022 1787 Nova Eborac Copper, Seated Left AU58 PCGS. Breen-986, W-5755, R.3. A pleasing chocolate-brown example. Marks are absent, and flan flaws are inconsequential. Struck off center toward 8 o'clock, with the left-side legends partly off the flan. Listed on page 70 of the 2018 *Guide Book*.

Ex: Bowers and Merena, 5/1994; Jim Jones Collection (Stack's Bowers, 3/2012), lot 1060, which realized \$2,185.

From The Bayside Collection. NGC ID# 2B4A, PCGS# 478

3023 1787 New Jersey Copper, Hidden WM in Sprig, AU50 PCGS. M. 62-q, W-5350, R.3. A medium brown state copper whose sole defect is a minor rim nick on the reverse at 2:30. The centers were incompletely struck up, as usual for the popular die pairing. Listed on page 72 of the 2018 Guide Book. NGC ID# AUL8, PCGS# 506

1787 New Jersey Copper, Choice VF Elusive PLURIBS Variety, Maris 60-p

- 3024 1787 New Jersey Copper, PLURIBS VF35 PCGS. Maris 60-p, W-5340, R.4. The second U in PLURIBUS was inadvertently omitted on only one reverse die of New Jersey coppers. It was paired with two different obverses to create the scarce Maris 60-p and the very scarce Maris 61-p. The present medium brown example is well-defined. A moderate rim knock is noted at 1 o'clock on the reverse. Listed on page 71 of the 2018 Guide Book. NGC ID# 2B4R, PCGS# 512
- 3025 1783 Nova Constellation Copper, Pointed Rays, Small US, AU53 PCGS. Crosby 2-B, W-1865, R.2. A lightly circulated example with considerable semiprooflikeness on each side. The deep brown surfaces are evenly struck, and are smooth aside from two minor rim marks beneath the date. Listed on page 56 of the 2018 Guide Book. NGC ID# 2AYX, PCGS# 801
- 3026 1785 Nova Constellatio Copper, Pointed Rays, Large Date AU58 PCGS. Crosby 3-B, W-1895, R.2. A lovely chocolate-brown example of this classic pre-Federal type. Evenly struck on a quality planchet. The late die state with advanced crumbling, especially on the lower obverse. Listed on page 56 of the 2018 Guide Book. NGC ID# 2AZ3, PCGS# 813

1785 Nova Constellatio Copper, MS63 Brown Pointed Rays, Large Date, Crosby 3-B

- 3027 1785 Nova Constellatio Copper, Pointed Rays, Large Date MS63 Brown PCGS. Crosby 3-B, W-1895, R.2. These non-denominated tokens were struck in England and modeled after the famous 1783 patterns designed by Benjamin Dudley for Gouverneur Morris and his coinage system. This is a late die state example with extensive crumbling on the obverse. Partial glossy luster remains over deep brown surfaces. The devices are bold. Exceedingly rare so well-preserved. Listed on page 56 of the 2018 *Guide Book*. NGC ID# 2AZ3, PCGS# 813
- 3028 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, AU55 PCGS. N. 13-X, W-6855, R.2. A charming double-clashed example. Predominantly chocolate-brown, although there are glimpses on the obverse of mahogany. Each side has a few minor flan flaws, but no marks are present. Listed on page 89 of the 2018 *Guide Book*.

Ex: Long Beach Signature (Heritage, 9/2012), lot 3346, which realized \$1,762.50.

From The Bayside Collection. NGC ID# AX5E, PCGS# 883

- 3029 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, AU58 PCGS. N. 13-X, W-6855, R.2. An evenly struck golden-brown Fugio copper. Unmarked and attractive despite minor flan imperfections, as made. Clashed rings near the obverse legends, and a vertical die crack at 6 o'clock, are both characteristic of a Bank of New York pedigree. Listed on page 89 of the 2018 Guide Book. From The Bayside Collection. NGC ID# AX5E, PCGS# 883
- 3030 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS60 Brown PCGS. N. 8-X, W-6750, R.3. A sating medium-brown example with a sharp strike and unmarked surfaces. A late die state with a large obverse die break at 6 o'clock. Struck a few degrees off center toward 3 o'clock, although all legends are intact. Mint-made flan roughness is seen on the O in ONE and a small portion of the sundial. Listed on page 89 of the 2018 Guide Book. Ex: Central States Signature (Heritage, 4/2011), lot 3930, which realized \$2,415.

From The Bayside Collection. NGC ID# AX5E, PCGS# 883

3031 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS62 Brown PCGS. N. 13-X, W-6855, R.2. Deep golden-brown with olive high points. An unabraded, original, and splendid example that is ripe for the cherrypicker. Well struck in the centers, although portions of the borders lack a full impression. Clashed dies with the familiar horizontal crack at 6 o'clock on the reverse. Listed on page 89 of the 2018 Guide Book. Ex: Chicago Signature (Heritage, 8/2011), lot 3013, which realized

\$2,300

From The Bayside Collection. NGC ID# AX5E, PCGS# 883

3032 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS62 Brown NGC. N. 13-X, W-6855, R.2. A medium brown example with smooth semiprooflike surfaces. A lens reveals a couple of unimportant planchet imperfections on the reverse. The strike is crisp except near 9 o'clock. Listed on page 89 of the 2018 Guide Book.

From The Bayside Collection. NGC ID# AX5E, PCGS# 883

1787 Newman 8-B Fugio Cent MS63 Red and Brown

3033 1787 Fugio Cent, UNITED STATES, Cinquefoils MS63 Red and Brown PCGS. N. 8-B, W-6740, R.3. The original faded orange coloration and remaining luster compensate the minor planchet cracks and weak strike along the right side, the latter adding a certain measure of charm to this lovely piece. The reverse is heavily clashed. Listed on page 89 of the 2018 Guide Book. Ex: FUN Signature (Heritage, 1/2012), lot 4007 From The Bayside Collection. NGC ID# 2B8F, PCGS# 890

3034 1787 Fugio Cent, STATES UNITED, Raised Rim VF25 PCGS. CAC. N. 19-Z, W-6975, R.5. The very scarce variety with raised rims on the reverse label. Likely one of the first reverse dies made, following the extremely rare American Congress reverse. A die break obscures the central reverse legends. Minor edge knocks are noted on the reverse near 6 and 9 o'clock. Listed on page 90 of the 2018 Guide Book.

Ex: Long Beach Signature (Heritage, 2/2012), lot 3024, which realized

From The Bayside Collection. NGC ID# 2B8F, PCGS# 895

- 3035 1787 Fugio Cent, New Haven Restrike, Copper, MS65 Red and Brown PCGS. N. 104-FF, W-17560. Breen called the New Haven Restrike the "guinea pig" of numismatics, since it wasn't made in New Haven, nor was it a restrike. The issue was struck in Waterbury from copy dies circa-1859. Nonetheless, it has always been popular with collectors. A lustrous, well struck, and unmarked orange-gold and steel-gray example. Listed on page 90 of the 2018 Guide Book. NGC ID# 2B8S, PCGS# 917
- 3036 1789 Mott Token, Thin Planchet, Engrailed Edge MS61 PCGS. Breen-1025, Rulau-E-NY-612. A lovely medium brown early American storecard. Smooth aside from one thin mark on the arrows and fletchings. The late die state with a large break from the northwest clock corner and an indistinct impression on portions of the eagle. Listed on page 76 of the 2018 Guide Book. Ex: Dallas Signature (Heritage, 10/2009), lot 35; New York Signature (Heritage, 12/2011), lot 3006, which realized \$2,076.

From The Bayside Collection. NGC ID# 2B5M, PCGS# 607

(1790) Albany Church Penny No D Above CHURCH, W-8500

3037 (1790) Albany Church Penny, No D, Uncertified. Breen-1170, W-8500, R.7. 103.4 grains, 28.1 mm. The very rare Albany Church pennies were struck in 1790, "following the coppers panic of 1789," per the Whitman Colonial Encyclopedia. Two varieties were issued, both uniface, and this is the variety without a letter D above CHURCH. The present chocolate-brown example has VF to XF sharpness but the obverse is intermittently granular. The second H in CHURCH is strike doubled. The reverse exhibits a long thin mark that may have been on the planchet prior to the strike. A Classic Head large cent was twice lightly impressed into the reverse, perhaps in an attempt to pass the token as a large cent during the early 19th century. Listed on page 77 of the 2018 Guide Book. from The Julian Kaufman Collection.

1795 Talbot, Allum, & Lee Cent MS64+ Brown PCGS. Fuld-1, W-8620, R.1. This 18th century storecard has a sharp strike and mark-free medium brown surfaces. Hints of mint Red linger within the legends. One subtle spot noted above the top sail. Listed on page 78 of the 2018 Guide Book.

From The Jamestown Collection, Part II. NGC ID# 2B63, PCGS# 640

Undated Baker-267 Washington Success Medal Small Size, Reeded Edge, MS63

3039 Washington Success Medal, Small Size, Reeded Edge, MS63 NGC. Baker-267, DeWitt-GW-1792-3, W-10875, Musante GW-44. This piece is tied for second finest certified reeded edge small size Washington Success medal, bested only by a single PCGS coin. Light golden-brown and dove-gray toning drapes the nicely struck surfaces. Thin marks on the reverse border near SUCCESS TO THE emerge beneath a loupe. Listed on page 86 of the 2018 Guide Book.

Ex: Long Beach Signature (Heritage, 2/2010), lot 54. NGC ID# 2VZB, PCGS# 783

HALF CENTS

- 3040 1793 C-3, B-3, R.3 Environmental Damage PCGS Genuine. Fine Details. There is a small planchet lamination at the obverse rim about 9 o'clock. The central devices show bold definition for the Fine grade level, although heavy granularity across both sides and deep burgundy-brown color prevent a numeric designation from PCGS. Our EAC grade Good 4.
- 3041 1793 C-4, B-4, Low R.3 Environmental Damage PCGS Genuine. VG Details. Manley Die State 2.0. The reverse is perfectly upright after a coin turn. This first-year half cent type coin displays relatively good definition of the devices despite heavy corrosion on each side that cuts into the planchet in a woodgrain pattern. The coloration is a pleasing medium brown, and the date, fraction, and LIBERTY are clear. Our EAC grade AG3.

1795 C-6a Half Cent, VG8 No Pole, Plain Edge Flipover Double Strike

1795 Plain Edge, No Pole, Thin Planchet, C-6a, B-6a, R.2 — Flipover Double Strike in Collar — VG8 PCGS. No date is present, but the die marriage is confirmed by the absence of a pole and the presence of a leaf tip below the final A in AMERICA. The first strike was off center, with the fraction denominator and the U in UNITED nearly against the rim, as seen at 9 o'clock relative to the second strike. From the first strike, a majority of AMERICA and LIBERTY are also apparent, the latter near UNITED from the second strike. The second strike was properly centered. Despite the double strike, a letter O from the Talbot, Allum & Lee undertype is apparent near the O in OF. The medium brown surfaces are lightly granular, and a few faint thin marks are noted on the upper reverse, along with a small pit above the C in AMERICA (from the first strike). Our EAC grade Good 5.

1797 C-2 Half Cent, VF30 Plain Edge, Pleasing Surfaces

3043 1797 Plain Edge, C-2, B-2, R.3, VF30 PCGS. A deep olive-brown representative. Pleasing overall despite a tick on the forehead and a couple of thin marks above CA and below the cap. The ICA in AMERICA is faint, as reported by Cohen "sometimes," due to die buckling in the vicinity. The obverse is slightly misaligned toward 10 o'clock, though only denticle width is impacted. Our EAC grade Fine 12.

From The Bayside Collection. NGC ID# 2228, PCGS# 35104 Base PCGS# 1036

3044 1802/0 Reverse of 1802, C-2, B-2, R.3, VG10 PCGS. Manley Die State 4.0. An attractive medium brown example with only one mentionable mark, a hair-thin line near the profile. Lightly granular near UNITED. The dies appear slightly out of parallel, with the Y in LIBERTY, the T in CENT, and the tops of ERICA softly brought up. Our EAC grade Good 6.

From The Loma Linda Collection, Part II. NGC ID# 222D, PCGS# 35125 Base PCGS# 1057

3045 1804 Plain 4, Stems, C-11, B-12, High R.3, XF40 PCGS. Manley Die State 1.0. Cohen-11 is the sole Plain 4, Stems die marriage, and as a scarce *Guide Book* variety, it commands a significant premium relative to its No Stems C-13 cousin. This medium to deep brown example has minor laminations near the CE in CENT and a strike-through on the rim near the N in UNITED,

all as made. Our EAC grade VF20.

From The E.B. Strickland Collection, Part II. NGC ID# 222F, PCGS# 35170 Base PCGS# 1066

1804 Half Cent, MS63 Red and Brown C-13, Plain 4, No Stems

3046 1804 Plain 4, No Stems, C-13, B-10, R.1, MS63 Red and Brown PCGS. Manley Die State 3.0, with a minor rim cud or two near the MER in AMERICA. Mint orange-red fills portions of the legends and outlines the portrait, but shades of sea-green are predominant. The obverse field displays a few inconspicuous abrasions and the neck has a thin vertical mark. Our EAC grade MS62.

Ex: FUN Signature (Heritage, 1/2014), lot 3292. NGC ID# 222F, PCGS# 35177 Base PCGS# 1064

3047 1806 Small 6, No Stems, C-1, B-3, R.1, MS62 Brown PCGS. An evenly struck and satiny Draped Bust type coin. The surfaces are about evenly divided between golden-brown and medium brown, with minor spots noted above the hair ribbon and near the fraction. Our EAC grade XF40. NGC ID# 222J, PCGS# 35191 Base PCGS# 1093

3048 1806 Small 6, No Stems, C-1, B-3, R.1, MS62 Brown NGC. The sole stemless Cohen variety for the date, and also the last appearance of the stemless reverse, which earlier appeared on 1804 and 1805 half cents. This olive-brown example has pleasing sharpness, and is smooth aside from a hair-thin line on Liberty's head. Our EAC grade XF45. NGC ID# 222J, PCGS# 35191 Base PCGS# 1093

1809 C-3, B-4 Half Cent, MS64+ Brown The Early Die State

3049 1809 C-3, B-4, R.1, MS64+ Brown NGC. Manley Die State 1.0, as usual, with strong obverse border dentils. This piece exhibits a sharp wreath and portrait but is weak on the right-hand border stars. Olive-brown and green-gold hues appear over satiny luster on each side, and no distracting abrasions are seen. The reverse is rotated slightly counterclockwise, as always for this variety. Our EAC grade MS60. NGC ID# 222P, PCGS# 35224 Base PCGS# 1123

3050 1809/6 9 Over Inverted 9, C-5, B-5, R.1, MS62 Brown PCGS. Manley Die State 3.0, "scarce." Dentilation is nearly absent on this late die state example. A splendid deep chocolate-brown half cent with glimpses of lighter tan-gold toning in protected regions. The motifs are well-struck, though several stars are softly impressed. Our EAC grade AU55.

From The Bayside Collection. NGC ID# CZEZ, PCGS# 35233 Base PCGS# 1126

3051 1826 C-1, B-1, R.1, MS64 Brown PCGS. Manley Die State 4. The crisscrossing die lines in the field right of the 6 are still plain on this die state. The near-Gem offered here is sharp at the centers but weak on the border stars. Reddish-brown surfaces are satiny and offer pleasing eye appeal. Our EAC grade AU50. NGC ID# 222U, PCGS# 35252 Base PCGS# 1144

3052 1853 C-1, B-1, R.1, MS66 Brown PCGS. The pleasing light brown surfaces of this impressive Premium Gem are impeccably preserved and retain much of their original mint luster under the patina. The design elements are sharply detailed throughout. Our EAC grade MS60. NGC ID# 26YX, PCGS# 35327 Base PCGS# 1227

PROOF HALF CENTS

3053 1841 Original, B-1, R.5, PR40 PCGS. The 1841 is a proof-only date rarely encountered with moderate wear from circulation. This is an original striking with large berries. The chocolate-brown surfaces display minor marks near star 9 and the E in CENT. Our EAC grade VF30.

From The Lona Linda Collection, Part II. NGC ID# 26Z6, PCGS# 1254

1855 C-1, B-1 Half Cent, PR64 Red and Brown From the Missouri Cabinet

3054 1855 C-1, B-1, R.5 (as a Proof) PR64 Red and Brown PCGS. Ex: Missouri Cabinet Collection. Faded mint red with rich steel-blue toning in the left obverse field and over much of the reverse on this highly appealing proof half cent. All of the details are bold and the fields exhibit mild reflectivity. A lint mark is noted below Star 4 and two lightly abraded spots are evident at stars 7 and 8. This is unquestionably a proof strike, one of about 30 such pieces that survive today. There are similarities to the plate in the 1975 Stack's catalog, but a match is inconclusive, in our opinion. Our EAC grade PR63. Population: 3 in 64 Red and Brown, 1 in 64 Red, 6 numerically finer (12/17).

Ex: R. Tettenhorst; Eric P. Newman Numismatic Education Society; Missouri Cabinet (Goldberg Coins, 1/2014), lot 217. Said to be from the James B. Wilson Sale (Thomas L. Elder, 10/1908), lot 1138; Hillyer Ryder; Wayte Raymond (MBS, 11/1945), lot 62; Joseph H. Stray Collection (Stack's, 4/1975), lot 13.

From The Bayside Collection. NGC ID# 26ZW, PCGS# 35418 Base PCGS# 1327

LARGE CENTS

3055 1793 Wreath, Vine and Bars Edge, S-5, B-6, R.4 — Tooled — PCGS Genuine. Fine Details. The definition on the Liberty portrait and the wreath is substantial for the Fine grade level, although granularity on each side and tool marks on the lower-right quadrant of the obverse prevent a numeric designation. An old, vertical groove runs from the ER in LIBERTY past the tip of Liberty's bust. Our EAC grade Fair 2.

From The Loma Linda Collection, Part II.

3056 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3 — Environmental Damage — PCGS Genuine. VG Details. All border legends, including the date, are clear on this piece, and Liberty's face retains moderate detail. There are some old scratches in the obverse fields, but otherwise the surfaces are uniformly granular with deep brown color. There is an old rim nick below the 1 in the date. Our EAC grade AG3.

From The Loma Linda Collection, Part II.

3057 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, AG3 PCGS. Wear is extensive but even on this well-circulated Sheldon-8 coin, leaving the central devices boldly outlined despite an absence of discernible rims. LIBERTY and the date are mostly readable, and the 1 in the fraction is visible. The surfaces are a deep chocolate-brown color and are fairly smooth around the borders and on the central relief elements, while granularity appears in the fields. Our EAC grade Fair 2.

From The Loma Linda Collection, Part II. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

3058 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — Repaired — PCGS Genuine. Fine Details. Relatively well-defined central devices are a pleasing attribute of this affordable Sheldon-9 Wreath cent. This coin was at one point heavily corroded, as the reverse still shows; the obverse is extensively tooled to smooth out the granular surfaces. Both sides have deep bluish-brown color. Our EAC grade AG3.

From The Loma Linda Collection, Part II.

3059 1793 Wreath, Lettered Edge, S-11b, B-16b, R.4 — Devices Engraved — PCGS Genuine. Fine Details. Two leaves follow DOLLAR on the edge lettering, identifying Sheldon-11b. This piece displays glossy walnut-brown surfaces but shows evidence of reengraving on Liberty's hair and the date. Scattered abrasions are present elsewhere. The fraction is faint. Our EAC grade AG3. From The Loma Linda Collection, Part II.

3060 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3 — Graffiti — PCGS Genuine. Fine Details. Noyes Die State c/a. For the most part, this is a well-detailed Wreath cent with pleasing chocolate-brown surfaces and smooth patina. However, the 3 in the date is mostly effaced by a scratch, and the date 1793 is hand-scratched into the right obverse field. On the reverse, several planchet pits are visible along the left-hand border. Our EAC grade Good 4. From The Loma Linda Collection, Part II.

1793 S-13, B-20 Cent, Good Details Popular Liberty Cap Variety

3061 1793 Liberty Cap, S-13, B-20, Low R.4 — Environmental Damage — PCGS Genuine. Good Details. The Sheldon-13 is the most frequently encountered 1793 Liberty Cap variety, and the obvious choice for date and major variety collectors. Moderate corrosion appears on both sides of this olive-brown example that has a visible date and complete lettering. Our EAC grade Fair 2. From The Loma Linda Collection, Part II.

1793 S-13, B-20 Liberty Cap Cent, VG Details Popular *Guide Book* Variety

3062 1793 Liberty Cap, S-13, B-20, Low R.4 — Corrosion — NGC Details. VG Details. Ex: Carlyle Luer Collection. The actual sharpness of this piece is close to VF20, in our opinion, with light corrosion on the steel-brown obverse, and light granularity across the reverse. The date, LIBERTY, legends, and borders are full and complete, with considerable detail in Liberty's lower hair. Our EAC grade VG8.

From The Carlyle A. Luer Collection.

1793 S-13, B-20 Cent, VG Details Important Liberty Cap Type

3063 1793 Liberty Cap, S-13, B-20, Low R.4 — Environmental Damage — NGC Details. VG. Ex: Carlyle Luer Collection. It is our opinion that the NGC description of this piece is extremely conservative. In our opinion, the sharpness is Fine 12 or possibly Fine 15 based on standards of Early American Coppers members. The olive and steel-brown surfaces have faint granularity that does not constitute environmental damage as described on the holder. Although not glossy nor perfectly smooth, this is an extremely attractive piece that shows only two small obverse rim nicks. Our EAC grade VG10.

From The Carlyle A. Luer Collection.

1793 S-14, B-17 Liberty Cap Cent, Good 4 The Bisecting Crack

3064 1793 Liberty Cap, S-14, B-17, Low R.5, Good 4 NGC. Ex: Carlyle Luer Collection. Clearly finer than the NGC grade, in our opinion. This piece has scattered grade-consistent circulation marks on light to medium brown surfaces. The bisecting crack, always present on this variety, is visible above Liberty's head and from the neck to the lower border. The date and LIBERTY are clearly visible, and most of the legend is complete. Our EAC grade Good 6.

From The Carlyle A. Luer Collection. NGC ID# 223L, PCGS# 35492 Base PCGS# 1359

1794 S-18b, B-2b Cent, VF Details Nicely Defined Head of 1793

3065 1794 Head of 1793, S-18b, B-2b, R.4 — Environmental Damage — PCGS Genuine. VF Details. This Head of 1793 cent has above average detail for the variety and type, with steel and chestnut-brown patina over lightly granular surfaces. The obverse border shows slight smoothing at 10 o'clock. Our EAC grade VG8.

3066 1794 Head of 1793, S-19a, B-3a, High R.5 — Environmental Damage — PCGS Genuine. Fine Details. This Head of '93 example displays uniform granularity across medium brown surfaces with bold detail on the Liberty portrait. The date and fraction are clear, but the upper reverse is lightly struck. A small pit appears on the obverse border to the left of the date. Our EAC grade VG8. From The Loma Linda Collection, Part II.

3067 1794 Head of 1793, S-19b, B-3b, R.4 — Environmental Damage — PCGS Genuine. VF Details. The major design elements are bold, and the level of definition on the Liberty portrait is strong for the VF grade level. Nonetheless, moderate granularity and localized areas of pitting over each side, as well as faintly visible tool marks in the fields, prevent a numeric grade. There is a small rim bump near the Y in LIBERTY. Our EAC grade AG3. From The Loma Linda Collection, Part II.

1794 S-36, B-23 Cent, VF Details Second 'Single Berry' Reverse

3068 1794 Head of 1794, S-36, B-23, R.5 — Burnished — NGC Details. VF. Ex: Carlyle Luer Collection. This important variety was once considered close to R.7, and remains solidly in the R.5 category today. There are 38 distinctive examples in Del Bland's Condition Census at www.1794largecents.com, and those pieces grade from AU55 down to AG3. There may be another half dozen unrecorded examples. Mahogany, chestnut, olive, and steel-brown surfaces have a short scratch on Liberty's neck and another below the CE of CENT. The obverse has been burnished to remove corrosion, and the reverse retains light granularity. Del Bland records a grade of VG10 and tied for 17th finest. However, our EAC grade places this piece in a ninth place tie in his Condition Census. Our EAC grade Fine 12.

Ex: Henry C. Colvin; Allan D. Colvin; Rensselaer Polytechnic Institute (French's, 80th Sale, 10/1962), lot 36.

From The Carlyle A. Luer Collection.

1794 S-55 Cent, XF40 Head of 1794, Well-Defined

3069 1794 Head of 1794, S-55, B-47, R.2, XF40 PCGS. Breen Die State II. A well-defined medium brown cent with generally pleasing surfaces. Tiny marks are scattered but none merit mention. Granularity is minor and mostly relegated to the margins. Among the more amateurishly engraved reverses from the early Philadelphia Mint. The E in ONE leans right, the A in STATES is entered high and tilted left, and the letters throughout are unevenly spaced. Our EAC grade VF25.

Ex: Dallas ANA Signature (Heritage, 3/2016), lot 4719. NGC ID# 223P, PCGS# 35627 Base PCGS# 901374

- 3070 1796 Liberty Cap, S-84, B-5, R.3, VF20 NGC. A deep steel-gray cent from the waning weeks of the Liberty Cap type. The only remotely noticeable marks are minor obverse rim nicks at 3 and 5 o'clock. Evenly defined and also evenly microgranular. Our EAC grade Fine 12. NGC ID# 223V, PCGS# 35759 Base PCGS# 1392
- 3071 1797 Reverse of 1797, Stems, S-134, B-4, R.4, VF25 PCGS. Breen Die State IV. The large die chip on the field near the throat is diagnostic for Sheldon-134, reminiscent of the 1794 Marred Field varieties. A medium to deep brown cent with attractive surfaces despite a field tick below the chin and a minor obverse rim nick at 9 o'clock. The dies were out of parallel, causing softness of strike on the left-side borders. Our EAC grade Fine 12. NGC ID# 2242, PCGS# 35933 Base PCGS# 1422

1798 S-165, B-31 Cent, XF40 Second Hair Style, Large 8

- 3072 1798 Second Hair Style, S-165, B-31, R.4, XF40 NGC. Breen Die State I. The Large 8 in the date and recutting on the left foot of the second T in STATES are diagnostic. Smooth surfaces display medium brown patina with olive and steel-blue accents. Dentilation is present from 11 o'clock to 5 o'clock on the obverse and from about 3 o'clock to 9 o'clock on the reverse. Strongly detailed on the curls, wreath, and legends despite an even layer of friction. Our EAC grade VF25. NGC ID# 2244, PCGS# 36065 Base PCGS# 1434
- 3073 1800/79 Style Two Hair, S-192, B-6, R.4, VF25 PCGS. Breen Die State II. The rising die crack through the fraction helps attribute the variety. A medium to deep brown example with lightly and evenly granular surfaces. Relatively unabraded. Certified in an old green label holder. Our EAC grade Fine 15. Ex: S. Benton Emery and Walter P. Nichols Collections (Bowers and Merena, 11/1984), lot 29. NGC ID# 2U57, PCGS# 36155 Base PCGS# 1455
- 3074 1802 S-232, B-12, R.1, AU50 PCGS. Breen Die State III. A lightly circulated medium brown representative that boasts exemplary surfaces. The T over Y in LIBERTY variety, paired with a reverse that shows prominent clash marks near AMERICA. Liberty's profile is strike doubled. Our EAC grade VF35. NGC ID# 224E, PCGS# 36305 Base PCGS# 1470
- 3075 1802 S-237, B-10, R.2, AU53 PCGS. Breen Die State II. S-237 is confirmed by a narrow extension to the right from the fraction bar. A relatively early die state, without a crack through the N in UNITED. A well-defined chocolate-brown representative that retains glimmers of luster within Liberty's curls. Our EAC grade VF30. NGC ID# 224E, PCGS# 36320 Base PCGS# 1470
- 3076 1803 No Stems, S-243, B-1, R.2, XF45 PCGS. Ex: Dan Holmes Collection. Breen Die State III. A blundered reverse die that lacks stems but does have a double fraction bar and a widely repunched second S in STATES. The chocolate-brown surfaces are pleasing despite minor marks near the chin. The late Dan Holmes assembled the most complete collection of large cents by die variety, disbursed at auction between 2009 and 2011. Our EAC grade VF35. Ex: Roger S. Cohen, Jr. Collection (Superior 2/1992), lot 971; March Wells Collection (Ira & Larry Goldberg, 2/2009), lot 604; Dan Holmes Collection (Ira & Larry Goldberg, 9/2009), lot 477. NGC ID# 224G, PCGS# 36419 Base PCGS# 921501

3077 1804 S-266c, B-1, R.2 — Tooled — PCGS Genuine. VG Details. Breen Die State IV, with heavy rim cuds above RTY in LIBERTY and MERIC in AMERICA. The coin is uniformly chocolate-brown with mild granularity over each side. Under a loupe, some old scratches are visible in the left obverse field. All legends are clear except for STATES, which blends into the field along the outer edge. Our EAC grade Good 4.

1804 S-266c, B-1 Cent, VG8 Late Die State

- 3078 1804 S-266c, B-1, R.2, VG8 PCGS. CAC. This is the late die state that is often cataloged as S-266c, exhibiting prominent rim breaks over RTY on the obverse and on MERIC on the reverse. Despite myriad handling marks and minor reverse verdigris, this light olive cent is attractive, more so than most survivors of the limited mintage. Our EAC grade Good 6. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504
- 3079 1804 Restrike MS64 Brown PCGS. Breen Die State II, showing heavy die lapping in addition to the substantial rust on each side. ONE CENT is weak. Small tinges of copper-red appear at the outer peripheries, but most of each side has light auburn toning. No significant abrasions are noticed. Our EAC grade MS60. NGC ID# 224J, PCGS# 45344
- 3080 1806 S-270, B-1, R.1, VF35 PCGS. Breen Die State II. The sole die marriage for the date. A well-defined cent with attractive gunmetal-gray and mahogany-brown surfaces. One small mark is noted below the second S in STATES. Certified in an old green label holder. Our EAC grade VF20.

 Ex: S. Benton Emery and Walter P. Nichols Collections (Bowers and

Ex: S. Benton Emery and Walter P. Nichols Collections (Bowers and Merena, 11/1984), lot 37. NGC ID# 224L, PCGS# 36436 Base PCGS# 1513

1807/6 S-272, B-2 Cent, VF Details Small 7 Over 6 Cent

- 3081 1807/6 Small 7, Blunt 1, S-272, B-2, High R.4 Tooled NGC Details. VF. Ex: Mervis Collection. Both sides of this olive, maroon, and steel cent show extensive tooling to remove porosity, while traces of verdigris remain visible. However, to the naked eye this cent is hardly unattractive, and will certainly be a nice addition to a specialized large cent collection. Our EAC grade VG7. Ex: Jack Beymer; Adam Mervis (Heritage, 1/2014), lot 2835. From The E.B. Strickland Collection, Part II. NGC ID# 224N, PCGS# 36439 Base PCGS# 1525
- 3082 1809 S-280, B-1, R.2 Altered Surfaces PCGS Genuine. AU Details. Breen Die State V. Only a single die marriage is known for this scarce Classic Head date. The walnut-brown fields exhibit an orange-peel texture consistent with the fairly late die state. Although designated as Altered Surfaces, many collectors could not detect any problems with the present well-defined example. Our EAC grade VF30.

3083 1811 S-287, B-1, R.2, VF35 PCGS. A medium to deep brown example with pleasing surfaces despite minor contact at 6 and 12 o'clock on the reverse. Wear is minor, mostly apparent on Liberty's eyebrow and the curl below the B in LIBERTY. One of only two die marriages for the date, the other is the 1811/0 overdate. Encapsulated in an old green label holder. Our EAC grade VF20. NGC ID# 224U, PCGS# 36496 Base PCGS# 1555

1812 S-290, B-2 Cent, AU50 Small Date

- 3084 1812 Small Date, S-290, B-2, R.1, AU50 PCGS. CAC. An important example that illustrates the late die state. A glass reveals microscopic granularity and verdigris on the surfaces of this sharply defined olive and chestnut-brown cent that is housed in a green-label PCGS holder. Our EAC grade VF30. NGC ID# 224W, PCGS# 36499 Base PCGS# 1561
- 3085 1814 Crosslet 4, S-294, B-1, R.1, XF40 PCGS. The penultimate Sheldon variety, immediately attributable by its Crosslet 4. This example has a strike-doubled chin, smooth mahogany-brown surfaces, and light high-point wear. We note a narrow linear streak on the cheek and a small flaw on the obverse rim near star 11. Our EAC grade VF25. NGC ID# 224Y, PCGS# 36520 Base PCGS# 1573
- 3086 1816 N-2, R.1, MS64 Brown PCGS. The late die state with two prominent rim cuds along the right obverse border. Pockets of mint Red accompany letters, stars, and other design elements. The open areas and high points are medium brown. A subtle spot is noted on the second 1 in the date, along with a thin strike-through near star 3. Our EAC grade MS62. NGC ID# 224Z, PCGS# 36526 Base PCGS# 1591

Undated Large Cent, VG Details Mirrored Brockage on the Obverse 1817 N-4 or N-14

3087 Undated (1817) — Mirrored Brockage On Obverse, Scratches — NGC Details. VG. This early U.S. Mint error occurred when a cent stuck to the obverse die. Another cent was fed between the dies, and was struck between the reverse die and the reverse of the previously struck cent. Although the coin does not have a date, arduous elimination of possibilities confirms it was struck by the reverse die of 1817 N-4, N-5, and N-14. Key to the attribution is the recut left base of the N in ONE. N-5 has mushy lower reverse dentils and the present coin does not. The coin is thus either N-4 or N-14, with the latter more likely. This medium brown cent has a few thin test marks on the central reverse, made by a curious finder. The reverse also has a couple of minor rim nicks. Nonetheless, an impressive mint error for the early copper specialist to ponder. Our EAC grade Good 4.

From The Jamestown Collection, Part II.

3088 1820 Large Date, N-13, R.1, MS64 Brown PCGS. A beautiful sea-green and golden-brown near-Gem. Uncommonly void of marks or spots, though a very narrow toning streak extends from the rim down to Liberty's nose. The usual Randall Hoard die state with cracks across the entire obverse periphery. Our EAC grade MS60. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

1821 N-1 Cent, AU58 Scarce Middle to Late Die State

- 3089 1821 N-1, R.1, AU58 NGC. Ex: Mervis Collection. The scarce late-middle die state with a die crack through star 2, but without the late state crack from star 3 to the border. The reverse has a fine die crack from the border between the S and O to the wreath, N in ONE, E in CENT, and the ribbon. This lovely cent shows splashes of green and steel toning over light tan surfaces, that show a few scattered marks on each side. Our EAC grade AU50. Ex: 2008 ANA Convention; Adam Mervis Large Cent Collection (Heritage, 1/2014), lot 2074, which realized \$3,818.75. NGC ID# 2258, PCGS# 36706 Base PCGS# 1621
- 3090 1827 N-8, R.3, MS63 Brown PCGS. A fairly late die state with cracks through several stars. A splendid chocolate-brown cent that boasts semiprooflike fields, a good strike, and an absence of abrasions. The grade is limited solely by moderate granularity near AMERICA. Our EAC grade AU55. NGC ID# 225H, PCGS# 36859 Base PCGS# 1651
- 3091 1828 Large Narrow Date, N-3, R.2, MS62 Brown PCGS. The tops of 82 almost touch, and the second A in AMERICA is slightly further away from the C. Both sides are well-centered and evenly struck, showing strong stars, portrait, and wreath detail. Rich mahogany-brown surfaces display few obvious abrasions and scattered complementary accents of steel-blue. Our EAC grade AU50. NGC ID# 225], PCGS# 36880 Base PCGS# 1654
- 3092 1830 Large Letters, N-9, R.6, AG3 PCGS. The location of the 0 relative to the curl, and the second S in STATES relative to the leaf tip, combine to attribute N-9, the rarest 1830 die marriage. This medium brown example has a clear date. The stars can easily be counted but several points are weak. We note a mark on the lips and moderate contact on the 3 in the date. Our EAC grade AG3. From The Loma Linda Collection, Part II. PCGS# 36958 Base PCGS# 1672
- 3093 1841 N-3, R.2, MS64 Brown PCGS. Grellman Die State d with extensive obverse and reverse die cracks. This lustrous 1841 cent exhibits an attractive blend of walnut and chocolate-brown with faint bluish overtones on each side. This piece presents good overall eye appeal with a sharp strike. Our EAC grade MS60. NGC ID# 2267, PCGS# 405800 Base PCGS# 1832
- 3094 1844/81 N-2, R.2, AU55 PCGS. The inverted date variety, most apparent near the 44 in the date. This briefly circulated chocolate-brown representative displays a few tiny obverse ticks but will please the veteran specialist. As usual for N-2, the strike is incomplete on the stars and coronet tip. Our EAC grade VF35. From The Loma Linda Collection, Part II. NGC ID# 226A, PCGS# 397722 Base PCGS# 1859

- 3095 1847 N-32, R.4, MS66 Red and Brown NGC. Grellman Die State a. This coin shows a die line from the left base of R in LIBERTY to the hair below and two die lines from the dentils to R in AMERICA, identifying the N-32 variety. The impeccably preserved surfaces have mellowed to light brown in some areas, but this sharply detailed Premium Gem retains much of its original red luster. From an early state of the dies, without reverse cracks. The N-32 is very rare in MS66, with red and brown surfaces. Our EAC grade MS63. PCGS# 37344 Base PCGS# 1878
- 3096 1852 N-22, N-9, R.1, MS66 Red and Brown PCGS. CAC. Grellman Die State d, the late die state (N-9) of N-22. Orangered fills design recesses, while the open fields and high points are brown. Lustrous and virtually unabraded with pleasing carbon-free surfaces. Our EAC grade MS64. PCGS# 147285 Base PCGS# 1899
- 3097 1854 N-11, R.2, MS66 Red and Brown PCGS. CAC. Grellman Die State b. Vertical die lines below the earlobe are the pick-up point for Newcomb-11. Fire-red outlines design elements, though the portrait and open fields have mellowed toward brown. A few stars lack a bold impression, but the motifs are bold. Our EAC grade MS63. PCGS# 406092 Base PCGS# 1905

1855 Cent, MS65 Red Upright 55, Newcomb-4

3098 1855 Upright 55, N-4, R.1, MS65 Red PCGS. A lustrous peachgold Gem. The strike is sharp except on a few upper stars. Marks are essentially absent, and carbon requires a loupe to locate. The central reverse field has mellowed slightly to lilac. N-4 is a familiar sight for specialists; readily attributed by four tiny die lumps on Liberty's portrait. Our EAC grade MS65. NGC ID# 226M, PCGS# 406155 Base PCGS# 1909

FLYING EAGLE CENTS

- 3099 1857 MS64 PCGS. Snow-21. A minor doubled die obverse variety, strongest on the AT in STATES. A lustrous and minimally marked wheat-gold Choice cent. The strike is crisp except on the right-side cotton leaves. Certified in a green label holder. NGC ID# 226P, PCGS# 2016
- 3100 1857 MS64 PCGS. CAC. Chestnut toning accents portions of the tan-gold surfaces of this Choice 1857 Flying Eagle cent. The eagle's tailfeathers show the usual strike softness, but the coin is well-preserved and otherwise pleasing. The CAC endorsement heightens its type coin appeal. NGC ID# 226P, PCGS# 2016
- 3101 1857 Doubled Die Obverse, Snow-4, FS-101, MS64 PCGS. Obverse design elements are nicely die doubled, including the eagle's eye and the CA in AMERICA. FS-101 and FS-105 are similar, but the faint wingtip of FS-101 distinguishes the two varieties. A sharply struck, olive-brown near-Gem with exemplary surfaces. The quality is superior for the MS64 level. Population: 8 in 64, 3 finer (1/18). NGC ID# 2276, PCGS# 37378 Base PCGS# 2016
- 3102 1858 Small Letters MS64 PCGS. CAC. The bases of the AM in AMERICA are separated on the Small Letters type. The Small Letters variant was introduced in 1858, as the Large Letters type was employed for the 1856 and 1857 Flying Eagle cent issues. This CAC-approved Choice example displays sharp definition throughout the eagle's tailfeathers and the wreath, although a few light contact marks prevent a finer grade. Under magnification, a couple of thin die cracks connect the eagle's beak and wing to the left obverse rim. NGC ID# 2279, PCGS# 2020

INDIAN CENTS

1860 Cent, Pinpoint-Sharp MS66 First Year of This Subtype

- 3103 1860 MS66 PCGS. Sharpness of strike is the first attribute that stands out. Indeed, the motifs are fully impressed on each side of this tan-gold cent. The Premium Gem assessment reflects a lack of abrasions visible to the unaided eye. There is a single tick on the neck that probably prevents an even higher grade. An exceptional example from the first year of issue of the Oak Wreath and Shield type. PCGS shows 11 finer submissions (1/18). NGC ID# 227F, PCGS# 2058
- 3104 1861 MS65+ PCGS. This Plus-graded Gem exhibits razor-sharp definition on all design elements and the well-preserved surfaces radiate vibrant red mint luster on both sides. From a mintage of 10.1 million pieces, the 1861 copper-nickel Indian cent is a popular type issue today. NGC ID# 227G, PCGS# 2061
- 3105 1862 MS66 PCGS. CAC. This delightful Premium Gem exhibits sharply detailed design elements throughout and the copper-red surfaces radiate vibrant mint luster on both sides. No mentionable distractions are evident. Population: 96 in 66 (9 in 66+), 14 finer. CAC: 25 in 66, 2 finer (1/18). NGC ID# 227H, PCGS# 2064
- 3106 1868 MS65 Red and Brown PCGS. CAC. Much closer to Red than Brown, since both sides are predominantly rose-red, orange-gold, and lime-green. The obverse is devoid of carbon. Unabraded and desirable. Encased in a green label holder. NGC ID# 227S, PCGS# 2092
- 3107 1868 MS64 Red PCGS. The design elements of this attractive Choice Indian cent are sharply detailed, with fine definition on the feather points. The original red surfaces are lustrous and well-preserved. Population: 60 in 64 (2 in 64+) Red, 52 finer (1/18). NGC ID# 227S, PCGS# 2093
- 3108 1869 MS65 Red and Brown PCGS. CAC. Snow-2, Repunched Date. All four date numerals are widely repunched, although the secondary digits are only visible under a loupe below the flag of the 1 and on the loops of the 869. Faint misplaced digits are also visible in the dentils below the date. Rick Snow writes that this variety "seems to be quite scarce." This Gem example is sharply struck and lustrous, showing carbon-free satin surfaces with tinges of burgundy toning atop copper-red luster. NGC ID# 227T, PCGS# 2005
- 3109 1871 MS64 Red and Brown PCGS. CAC. Indian Head cents from the 1870s have a reputation for being moderately difficult to locate in pleasing Mint State condition, particularly with CAC endorsement. This near-Gem displays sharp detail and has satiny mint luster of well-blended olive-brown and golden-red color. There is no obvious carbon spotting. NGC ID# 227V, PCGS# 2101

1871 Cent, MS64 Red Challenging Semikey Date

- 3110 1871 MS64 Red PCGS. Bold N in ONE. A Choice example of this popular semikey date. The strike is intricate and the slightly dusky apricot-gold surfaces are free from marks. A loupe reveals minuscule flecks, mostly on the reverse. Population: 26 in 64 (1 in 64+) Red, 21 finer (12/17). NGC ID# 227V, PCGS# 2102
- 3111 1872 MS64 Brown NGC. Bold N in ONE. A semikey Choice cent with attractive apple-green, lilac, and orange-gold surfaces. Smooth aside from a thin mark near the chin. The strike is slightly soft on the date and upper shield. Certified in a former generation holder. NGC ID# 227W, PCGS# 2103
- 3112 1873 Closed 3 MS64 Red and Brown NGC. This better date cent approaches full Red though the high points have mellowed slightly to lilac. Carbon is inconsequential, and contact is confined to a small mark on the cheek near the mouth. Housed in a prior generation holder. NGC ID# 227X, PCGS# 2110
- 3113 1873 Closed 3 MS65 Red and Brown PCGS. CAC. A spectacular Gem Indian cent, with well-preserved original red surfaces that have mellowed to light brown and crimson in many areas. The design elements are sharply detailed and eye appeal is quite strong. Population: 46 in 65 (2 in 65+) Red and Brown, 4 finer. CAC: 14 in 65, 2 finer (1/18). NGC ID# 227X, PCGS# 2110

1873 Doubled LIBERTY Cent, XF40 FS-101, Key Guide Book Variety

3114 1873 Doubled LIBERTY, Snow-1, FS-101, XF40 PCGS. LIBERTY is strongly die doubled northeast. The spines of five headdress feathers are also doubled. Among *Guide Book* die varieties, only the 1888/7 is more desirable. This medium-brown example shows the expected degree of wear and is devoid of consequential contact. NGC ID# 227X, PCGS# 37504 Base PCGS# 2115

1877 Cent, Choice AU Undisputed Key Date

- 3115 1877 AU55 NGC. No other issue in the Indian Head cent series enjoys the same cachet as the 1877 the undisputed key date across all grades. This piece saw modest circulation but was plucked from the channels of commerce early on. Minor blending occurs over the devices. Still, bold detail remains. Deep steel-brown tones color each side. NGC ID# 2284, PCGS# 2127
- 3116 1885 MS65 Red PCGS. A sharply detailed Gem, with fine detail on the feather points and well-preserved original red surfaces that radiate vibrant mint luster throughout. Population: 70 in 65 (1 in 65+) Red, 20 finer (1/18). NGC ID# 228C, PCGS# 2153
- 3117 1886 Type Two MS64 Red and Brown NGC. The glossy original surfaces of this attractive Choice example have mellowed to medium brown in many areas, but no mentionable distractions are evident and the design elements are sharply detailed throughout. The lowest headdress feather points to the space between C and A in AMERICA. NGC ID# 228E, PCGS# 92155
- 3118 1894 MS66 Red NGC. A spectacular Premium Gem , with sharply detailed design elements and well-preserved original red surfaces that shoe just a few microscopic specks of carbon below the date. Vibrant mint luster adds to the outstanding eye appeal. Census: 13 in 66 (1 in 66+) Red, 1 finer (1/18). NGC ID# 228N, PCGS# 2189
- 3119 1898 MS66 Red PCGS. An outstanding olive-green and rosered Premium Gem. Potent luster sweeps virtually unabraded surfaces. A lens is required to locate a few pinpoint obverse flecks. Encapsulated in an old green label holder. Population: 58 in 66 (2 in 66+) Red, 12 finer (1/18). NGC ID# 228T, PCGS# 2201
- 3120 1906 MS66 Red PCGS. A delightful Premium Gem Indian cent, with well-detailed design elements and well-preserved original red surfaces that radiate vibrant mint luster on both sides. Overall eye appeal is terrific. Population: 37 in 66 (2 in 66+) Red, 3 finer (1/18). NGC ID# 2293, PCGS# 2225
- 3121 1907 MS66 Red PCGS. This radiant Premium Gem Indian cent exhibits sharply detailed design elements and virtually pristine original red surfaces that display vibrant mint luster on both sides. Eye appeal is terrific. Population: 42 in 66 (3 in 66+) Red, 5 finer (1/18). NGC ID# 2294, PCGS# 2228
- 3122 1907 MS66 Red PCGS. CAC. Razor-sharp definition is evident on all design elements of this spectacular Premium Gem and the impeccably preserved original red surfaces are bursting with vibrant mint luster. Population: 42 in 66 (3 in 66+) Red, 5 finer. CAC: 5 in 66, 1 finer (1/18). NGC ID# 2294, PCGS# 2228
- 3123 1908 MS66 Red PCGS. Liberty's portrait, including the feathertips, the shield, and oak leaves are fully defined. Fiery copperorange surfaces show a single carbon speck before the eye, and two horizontal marks above 08 are the only imperfections preventing a higher assessment. There are just two finer representatives at PCGS (1/18). NGC ID# 2295, PCGS# 2231
- 3124 1909 MS66+ Red PCGS. A Plus-graded Premium Gem from the final year of the Indian design, this coin offers sharply detailed design elements and lustrous copper red surfaces with no mentionable distractions. PCGS has graded 16 numerically finer examples (1/18). NGC ID# 22AZ, PCGS# 2237

- 3125 1909 MS66+ Red PCGS Secure. This high-end Premium Gem is fully struck and almost entirely free of carbon, showing frosty copper-orange luster and unabraded surfaces. The 1909 Philadelphia issue is moderately plentiful in this grade, but PCGS has seen only 16 finer Red submissions (1/18). NGC ID# 22AZ, PCGS# 2237
- 3126 1909 MS66 Red PCGS. CAC. A delightful Premium Gem Indian cent from the final year of the design, this coin exhibits well-detailed design elements and well-preserved copper-red surfaces that emit vibrant mint luster on both sides. PCGS has graded 16 numerically finer examples (1/18). NGC ID# 22AZ, PCGS# 2237
- 3127 1909-S MS64 Red and Brown NGC. CAC. This luminous near-Gem displays lovely copper-orange luster amid moderate olive- and burgundy-brown toning. Localized strike weakness on the wreath bow and the upper three headdress feathers is normal for this key San Francisco issue. The CAC endorsement is seen on a limited number of high-end Red and Brown coins. NGC ID# 2298, PCGS# 2739
- 3128 1909-S MS64 Red and Brown PCGS. CAC. Various walnut and chestnut-brown toning appears over otherwise golden mint luster on this near-Gem Red and Brown 1909-S Indian cent. The top three headdress feathers show better definition than usual. A few tiny specks do not detract. NGC ID# 2298, PCGS# 2239
- 3129 1909-S MS64 Red PCGS. Rose-gold and coppery hues dominate most of this near-Gem, with a few greenish accents on the high points of the Liberty portrait. Luster is softly frosted and vibrant. The top three headdress feathers exhibit the usual strike softness. Coming from a mintage of only 309,000 pieces, the 1909-S Indian cent is a key issue in all grades and a challenging acquisition in the upper Red levels. Housed in a first generation holder. NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

1861 Indian Cent, PR64 One-Sided Cameo

- 3130 1861 PR64 PCGS. CAC. This is a fully struck proof and quite eye-appealing for the grade, as the CAC green label affirms. The obverse alone would qualify for a Cameo designation, although contrast is less pronounced on the reverse. A small fleck appears at the base of the 1 in the date. The availability of this issue declines significantly in finer grades. NGC ID# 229B, PCGS# 2256
- 3131 1864 Copper-Nickel PR64 PCGS. Lavender and gold tints accent the tan-gold surfaces of this near-Gem copper-nickel proof. Moderate contrast is apparent on each side, nearly strong enough for a Cameo designation. This type coin is sharp and free of distractions. From The Bayside Collection. NGC ID# 229E, PCGS# 2265
- 3132 1864 Bronze No L PR64 Red and Brown PCGS. An impressive Choice proof, from the first year of the bronze composition, this coin exhibits well-preserved surfaces that show a mix of crimson, light brown, and original red patina. The devices are sharply detailed and the fields are deeply reflective. Population: 39 in 64 Red and Brown, 55 finer (1/18). NGC ID# 229F, PCGS# 2277
- 3133 1870 PR66 Brown PCGS. Shallow N in ONE. Exceptional cobalt-blue and cherry-red toning consumes both sides of this pristine proof cent. Although many collectors flock to Red examples, experienced numismatists often prefer colorful originally toned examples. NGC ID# 229N, PCGS# 2297

- 3134 1876 PR65+ Red PCGS Secure. This is a razor-sharp copperred Gem proof with frosty devices and attractive mirroring in the fields. Modest cameo contrast is apparent on each side, although the effect is not quite strong enough for a Cameo designation from PCGS. Seldom offered this fine. Population: 20 in 65 (1 in 65+) Red, 24 finer (1/18). NGC ID# 229V, PCGS# 2317
- 3135 1878 PR66 Red and Brown NGC. A glistening golden-orange example that, aside from delicate blushes of violet patina in the obverse fields and a few insignificant carbon flecks on the reverse, appears almost exactly as they did 140 years ago. The strike is needle sharp in all areas.

 Ex: Long Beach Signature (Heritage, 9/2003), lot 5533. NGC ID# 229X, PCGS# 2322
- 3136 1878 PR65 Red Cameo NGC. The proof 1878 Indian cent had a moderate mintage of 2,350 coins and is proportionately available today; full Red representatives exhibiting cameo contrast, however, are decidedly rare. This coppery-red Gem boasts fully defined design elements, with ample mirroring in the fields and beautifully preserved surfaces. A couple of faint carbon specks are noted below Liberty's ear. Census: 11 in 65 Cameo (1 in 65 ★), 4 finer (1/18). Ex: ANA Signature (Heritage, 8/2014), lot 3127. NGC ID# 4YVB, PCGS# 82323
- 3137 1879 PR66 Cameo NGC. Snow-PR1. From a larger mintage of 3,200 proofs, this Superb Gem shows the 8 and 9 in the date widely repunched, visible inside the loops of each digit. The 1 also shows a defective punch. Blazing copper-orange surfaces show attractive lilac accents on the obverse. Well struck throughout. Census: 1 in 66 Cameo, 0 finer (1/18).

 Ex: Chicago ANA Signature (Heritage, 8/2014), lot 3128, which realized \$2,115. NGC ID# 229Y, PCGS# 82326
- 3138 1881 PR67 Brown PCGS. CAC. The impeccably preserved surfaces of this delightful Superb Gem show a mix of violet, light brown, and original red patina, with deeply mirrored fields underneath. The design elements are razor-sharp and eye appeal is tremendous. Population: 2 in 67 Brown, 0 finer. CAC: 2 in 67, 0 finer (1/18). NGC ID# 22A2, PCGS# 2330
- 3139 1886 Type One PR66 Brown PCGS. CAC. Eagle Eye Photo Seal, card not included. A razor-sharp representative with deep aquamarine surfaces save for a cherry-red peripheral obverse legend. Examination beneath a loupe fails to locate any imperfections. NGC ID# 22A7, PCGS# 2345
- 3140 1886 Type One PR66 Red and Brown PCGS. CAC. The Type One hub shows the lowest headdress feather pointing between the IC in AMERICA, whereas the Type Two shows the feather pointing between the CA. This semireflective proof displays blended copper-red and amber-brown coloration with sharp design elements. A few tiny specks on the obverse do not detract. From The Bayside Collection. NGC ID# 22A7, PCGS# 2346
- 3141 1886 Type One PR66+ Red and Brown PCGS. CAC. The lowest headdress feather points between the IC in AMERICA on the Type One hub type. This reflective proof displays copperorange, gold, and olive hues that offer a well-balanced red-and-brown look. The strike is full. Population: 45 in 66 (4 in 66+) Red and Brown, 17 finer. CAC: 11 in 66, 4 finer (1/18). NGC ID# 22A7, PCGS# 2346
- 3142 1894 PR66 Red and Brown PCGS. This is a sharp Premium Gem proof with glimmering fields and satiny devices. Both sides are uniformly amber-gold and coppery-orange, showing additional tinges of olive-green. No distractions are noticed. Population: 13 in 66 (1 in 66+) Red and Brown, 13 finer (1/18). NGC ID# 22AG, PCGS# 2370
- 3143 1901 PR66 Red and Brown PCGS. The well-preserved surfaces of this delightful Premium Gem are predominantly red, but a few areas have mellowed to light brown and crimson. The design elements are sharply detailed and the fields are deeply reflective. Population: 53 in 66 (3 in 66+) Red and Brown, 13 finer (1/18). NGC ID# 22AP, PCGS# 2391

3144 1901 PR66 Red NGC. Snow-PR2. The base of the second 1 in the date is repunched. A high-grade apple-green and rose-red representative. Neither side shows contact, and mentionable carbon is confined to a fleck northwest of Liberty's ribbon. Certified in a circa-2000 holder. NGC ID# 22AP, PCGS# 2392

1901 Indian Cent, PR67 Red None Finer at PCGS

- 3145 1901 PR67 Red PCGS. From a limited proof mintage of 1,985 pieces, this magnificent Superb Gem exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces retain all of their original red color. The flawless fields are deeply reflective, but field/device contrast is minimal. Population: 8 in 67 Red, 0 finer (1/18). NGC ID# 22AP, PCGS# 2392
- 3146 1907 PR66 Red and Brown PCGS. CAC. Copper-orange, gold, and cherry-red hues visit olive tints on this CAC-endorsed Premium Gem. The coloration leans heavily toward the Red spectrum. This glimmering proof is sharp and reflective, showing no mentionable imperfections. Population: 27 in 66 Red and Brown, 28 finer. CAC: 7 in 66, 1 finer (1/18). NGC ID# 22AW, PCGS# 2409

LINCOLN CENTS

3147 1909 VDB Doubled Die Obverse, FS-1101, MS65 Red PCGS. Die doubling is prominent on the 190 in the date and the RTY in LIBERTY. A lustrous VDB Lincoln cent with splendid peach-red and apple-green surfaces. A few pinpoint flecks and trivial field grazes are all that preclude perfection. NGC ID# 4JR9, PCGS# 37633 Base PCGS# 82425

1909 VDB Lincoln Cent, MS66 Red Doubled Die Obverse, FS-1101

- 3148 1909 VDB Doubled Die Obverse, FS-1101, MS66 Red PCGS. Cherrypickers' lists two doubled die obverse varieties for the 1909 VDB Lincoln cent, of which FS-1101 is the more dramatic. Doubling is evident on the date and LIBERTY under low-power magnification. This Premium Gem example displays a sharp strike and luminous copper-orange mint luster. No distractions abrasions or carbon spots are seen. NGC ID# 4JR9, PCGS# 37633 Base PCGS# 82425
- 3149 1909-S VDB MS62 Brown NGC. An impressive MS62 example of this celebrated series key, with lightly marked olive-brown surfaces and well-detailed design elements. The all-important designer's initials are bold and the overall presentation is attractive. NGC ID# BYKW, PCGS# 2426

3150 1909-S VDB MS65 Brown PCGS. CAC. Luminous golden surfaces feature olive-tinted chestnut-brown toning that earns this piece its Brown color designation despite a rich cartwheel effect. The strike is sharp, and no distracting abrasions or spots are seen. CAC: 34 in 65, 4 finer (1/18). NGC ID# BYKW, PCGS# 2426

1909-S VDB Cent, MS65 Brown Original Surfaces

- 3151 1909-S VDB MS65 Brown PCGS. CAC. Medium chocolate-brown surfaces yield lighter accents of gold, mainly around the borders but also within the reverse design recesses. The legends are boldly rendered on each side, including the designer's initials, and incompleteness is confined to the very highest points of Lincoln's portrait. An identifying spot appears just inside the tip of the left wheat stalk. There are only 12 finer submissions in the Brown category at PCGS (1/18). NGC ID# BYKW, PCGS# 2426
- 3152 1909-S VDB MS63 Red and Brown NGC. In the past, this key date was ardently sought in circulation with limited success. Today, attractive Mint State coins are heavily collected by Lincoln cent specialists and key date seekers alike. This piece is bright and satiny with a fresh appearance. It is well struck and free of severe abrasions scattered flyspecks are all that disallow a higher grade. Ex: ANA Signature (Heritage, 3/2008), lot 213. NGC ID# 22B2, PCGS# 2427
- 3153 1909-S VDB MS63 Red and Brown PCGS. Glimpses of firered accompany the legends and outline the devices. The obverse is virtually void of contact, and the reverse has only a couple of unimportant ticks. Minor spotting near the O in ONE and the T in CENT. Housed in a green label holder. NGC ID# 22B2, PCGS# 2427
- 3154 1909-S VDB MS64 Red and Brown PCGS. The well-preserved surfaces of this Choice Lincoln cent show a mix of original red and light brown patina, with slightly subdued mint luster. The design elements are sharply detailed and the designer's initials are bold. Altogether, a most attractive specimen of this first-year series key. NGC ID# 22B2, PCGS# 2427
- 3155 1909-S VDB MS64 Red NGC. A sharp example with the usual mattelike luster, showing bright golden luster and minimally marked surfaces. The mintmark and designer's initials are sharp. Other than a few rare die varieties, no Lincoln cent issue rivals the 1909-S VDB in terms of appeal and intrigue. This is one of the most famous issues in all of 20th century U.S. coinage. NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS65 Red Low-Mintage Cornerstone Issue

- 3156 1909-S VDB MS65 Red PCGS. This first-year issue with the designer's initials at the lower reverse was subject to widespread fanfare and hoarding with the idea that the coins would be confiscated. Gems are scarce but obtainable with Red surfaces, as here. Definition is crisp on Lincoln's portrait, the wheat sheaves, and the lettering on both sides. This lustrous key date shows a handful of trivial ticks. NGC ID# 22B2, PCGS# 2428
- 3157 1909-S MS66 Red NGC. This luminous Premium Gem showcases exceptionally clean, frosty surfaces with lovely orange-gold, peach-yellow, and golden-green hues forming concentric bands on each side. The strike is sharp, and only a couple of small flecks are seen on the reverse. Census: 64 in 66 (1 in 66★) Red, 6 finer (1/18). NGC ID# 22B4, PCGS# 2434
- 3158 1911-D MS66 Red PCGS. A spectacular Premium Gem representative of this early series branch mint issue, with sharply detailed design elements and well-preserved original red surfaces that radiate vibrant mint luster on both sides. Population: 66 in 66 (7 in 66+) Red, 1 finer (1/18). NGC ID# 22B8, PCGS# 2446
- 3159 1911-D MS66 Red PCGS. The first Denver Mint cent issue, the 1911-D is conditionally rare with unblemished full Red surfaces. This lustrous orange-gold example is nicely struck and unabraded. One unobtrusive spot is northwest of the right wheat ear. Population: 66 in 66 (7 in 66+) Red, 1 finer (1/18). NGC ID# 22B8, PCGS# 2446
- 3160 1912-D MS65 Red PCGS. CAC. The well-preserved surfaces of this impressive Gem retain their original red color on both sides, aside from a single streak of brown on the lower reverse. Sharply detailed design elements and vibrant mint luster complete the attractive package. PCGS has graded 30 numerically finer examples (1/18). NGC ID# 22BB, PCGS# 2455
- 3161 1913-S MS65 Brown PCGS. The obverse displays auburn-brown toning over satiny mint luster, while the reverse is copper-orange with hints of chestnut color. The strike is sharp, and eye appeal is generous. A lone mark appears in the left obverse field near the rim, and there is a small carbon spot near the M in AMERICA. The 1913-S is seldom offered in this grade. Population: 13 in 65 Brown, 1 finer (1/18). NGC ID# 84BR, PCGS# 2465
- 3162 1913-S MS65 Brown PCGS. CAC. Relatively few 1913-S cents with Brown surfaces are graded as fine as MS65, and this piece is one of the two finest with a CAC endorsement (1/18). Numerous Red, and Red and Brown, coins are reported in this grade but command a steeper price. This piece is well-struck and satiny with mattelike reverse fields. Undertones of copper-orange emerge from beneath chestnut-brown toning on each side. NGC ID# 84BR, PCGS# 2465
- 3163 1914-D AU58 NGC. CAC. An attractive near-Mint example of this popular series key. The slightest trace of wear shows on the high points of the sharply detailed design elements and the chocolate-brown surfaces are free of all but the most insignificant flaws. NGC ID# 84BX, PCGS# 2471

- 3164 1914-D PCGS Genuine. Unc. Details. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an Uncirculated specimen that has environmental damage. The present lustrous orange-red key date cent would be a show-stopper, were it not for spots on the truncation of Lincoln's suit. The reverse has a less obtrusive spot near the ICA in AMERICA.
- 3165 1915-D MS66 Red and Brown PCGS. The well-preserved surfaces of this spectacular Premium Gem show a mix of original red and light brown patina, with sharply detailed design elements and vibrant mint luster underneath. Population: 4 in 66 (1 in 66+) Red and Brown, 1 finer (1/18). NGC ID# 22BL, PCGS# 2481
- 3166 1915-D MS66 Red PCGS. A delightful Premium Gem representative of this early series issue, with razor-sharp definition on all design elements. The impeccably preserved surfaces radiate original red luster on both sides. Population: 40 in 66 (4 in 66+) Red, 1 finer (1/18). NGC ID# 22BL, PCGS# 2482

1915-D Cent, Fully Struck MS66 Red Textured Pumpkin-Gold Surfaces

- 3167 1915-D MS66 Red PCGS. CAC. The 1915-D is much more available than the 1914-D that preceded it, but it becomes conditionally rare in MS66 Red. Light pumpkin-gold coloration, textured fields, satin luster, and a full strike contribute to the appeal of this fantastic representative. Both side are essentially flawless. A small alloy spot appears in the lower part of the right wheat sheaf. Population: 40 in 66 (4 in 66+) Red, 1 finer. CAC: 14 in 66, 0 finer (1/18). NGC ID# 22BL, PCGS# 2482
- 3168 1915-S MS65 Red and Brown PCGS. Gem 1915-S cents are scarce regardless of color designation. This Red and Brown piece displays sharp detail and luminous satin surfaces. Mottled chestnutbrown toning is dusted over each side, accenting brass-gold luster. NGC ID# 22BM, PCGS# 2484

1918-S Cent, MS64+ Red CAC-Approved, Very Rare Any Finer

- 3169 1918-S MS64+ Red PCGS. CAC. Examples of this San Francisco cent are seldom found with original Red surfaces, though a mintage of 34.6 million coins might lead one to believe otherwise. Die wear accounts for the usual softness on each side. Coppery-gold surfaces glimmer with soft mint luster. Few ticks or carbon specks are seen. The PCGS Population Report shows 18 higher-graded submissions. CAC: 9 in 64, 3 finer (1/18). NGC ID# 22BX, PCGS# 2512
- 3170 1920-S MS64 Red PCGS. This attractive Choice specimen offers sharply detailed design elements and vibrant mint luster throughout. The lightly marked original red surfaces show a few microscopic specks of carbon on both sides. Population: 94 in 64 Red, 15 finer (1/18). NGC ID# 22C5, PCGS# 2530

- 3171 1922 No D, Strong Reverse, FS-401, XF40 PCGS. Die Pair 2. The reverse is sharp, and the second 2 in the date is crisper than the first. IN GOD WE TRUST is fuzzy from die wear. This lightly circulated No D cent displays pleasing chocolate-brown surfaces and no distracting abrasions. Eye appeal is pleasing.

 From The Jamestown Collection, Part II. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285
- 3172 1922 No D, Strong Reverse, FS-401, XF40 PCGS. CAC. Die Pair 2. The famous variety without any evidence of a Denver mintmark. Philadelphia did not strike cents in 1922, due to large-scale silver dollar production. A deep mahogany-brown and sea-green example. Reverse design crevices exhibit build-up, particularly near the rim at 9:30. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285
- 3173 1923-S MS63 Red PCGS. The 1923-S Lincoln cent is a better date in high grade. This impressive Select specimen offers well-detailed design elements and lightly marked original red surfaces throughout. The portrait is lightly shadowed on the reverse. Population: 26 in 63 Red, 85 finer (1/18). NGC ID# 22CB, PCGS# 2548
- 3174 1924 MS66 Red PCGS. CAC. A spectacular Premium Gem specimen, with well-detailed design elements and virtually pristine original red surfaces that radiate vibrant mint luster on both sides. Overall eye appeal is terrific. Population: 89 in 66 (11 in 66+) Red, 11 finer. CAC: 22 in 66, 1 finer (1/18). NGC ID# 22CC, PCGS# 2551

1924 Cent, MS66+ Red Exceptional Luster and Preservation

- 3175 1924 MS66+ Red PCGS. CAC. This sharp copper-orange Premium Gem displays blazing mint luster that is appropriately recognized by CAC. Under a loupe, a few microscopic pepper specks are seen but hardly detract. The 1924 Lincoln cent is scarce in this grade and rarely offered finer. Population: 89 in 66 (11 in 66+) Red, 11 finer. CAC: 22 in 66, 1 finer (1/18). NGC ID# 22CC, PCGS# 2551
- 3176 1924-D MS65 Red and Brown PCGS. CAC. The well-preserved surfaces of this attractive Gem show a mix of original red, light brown, and crimson patina, with red predominating on the obverse. The design elements are well-detailed and vibrant mint luster adds to the outstanding eye appeal. Population: 40 in 65 Red and Brown, 1 finer. CAC: 7 in 65, 0 finer (1/18). NGC ID# 22CD, PCGS# 2553
- 3177 1924-D MS64 Red PCGS Secure. Frosty original luster includes shades of gold, copper-orange, and lilac, with occasional carbon flecks also seen under a loupe. The O in ONE and first A in AMERICA show moderate strike softness, as often is the case on this Denver issue. Finer pieces are scarce. NGC ID# 22CD, PCGS# 2554
- 3178 1924-D MS64 Red PCGS. CAC. This luminous copper-red near-Gem displays original color and almost no significant abrasions. The design sharpness is lacking throughout due to die erosion, which leaves most of the border legends and the wheat ears indistinct. Finer Red 1924-D cents are scarce. CAC: 6 in 64, 4 finer (1/18). NGC ID# 22CD, PCGS# 2554
- 3179 1927 MS67 Red PCGS. A magnificent Superb Gem specimen, with razor-sharp definition on all design elements and virtually flawless original red surfaces that radiate vibrant mint luster on both sides. Population: 58 in 67 (5 in 67+) Red, 0 finer (1/18). NGC ID# 22CM, PCGS# 2578

- 3180 1927-D MS65 Red PCGS. This popular branch mint issue is seldom encountered in grades above the MS65 level. This sharply detailed Gem exhibits well-preserved original red surfaces with vibrant mint luster and strong eye appeal. Population: 59 in 65 (2 in 65+) Red, 2 finer (1/18). NGC ID# 22CN, PCGS# 2581
- 3181 1928-S MS65 Red and Brown PCGS. CAC. Small S. San Francisco issues from the 1920s are difficult to locate in full Red, but the present well-struck and unblemished Gem comes close. Both sides are mostly orange-gold, with slight mellowing to tan on the high points and the central reverse field. CAC: 2 in 65, 0 finer (1/18). NGC ID# 22CT, PCGS# 2592
- 3182 1929-D MS66 Red PCGS. A delightful Premium Gem Lincoln cent, with sharply detailed design elements and well-preserved original red surfaces that radiate vibrant mint luster on both sides. Eye appeal is terrific. Population: 34 in 66 (2 in 66+) Red, 0 finer (1/18). NGC ID# 22CV, PCGS# 2599
- 3183 1929-S MS66 Red PCGS. This sharply detailed Premium Gem Lincoln cent exhibits blazing red original surfaces with minimal signs of contact. The 1929-S claims a substantial mintage of more than 50 million pieces, but survivors are seldom seen in higher grades. Population: 57 in 66 (2 in 66+) Red, 0 finer (1/18). NGC ID# 22CW, PCGS# 2602
- 3184 1929-S/S FS-501 MS66 Red PCGS. Fivaz and Stanton describe this rare variety as "tough to locate in any grade." The secondary S mintmark is visible north of the primary impression. We offered an MS65 Red example in our August 2012 Philadelphia Signature sale, which realized \$2,585.00. This Premium Gem is clearly finer. Well-preserved copper-gold surfaces are brightly lustrous and strongly defined. Possibly the finest known. NGC ID# 22CW, PCGS# 37714 Base PCGS# 2602
- 3185 1931 MS67 Red NGC. This magnificent Superb Gem exhibits well-detailed design elements and impeccably preserved original red surfaces, with vibrant mint luster throughout. Overall eye appeal is terrific. Census: 9 in 67 Red, 0 finer (1/18). NGC ID# 22D2, PCGS# 2614
- 3186 1931 MS67 Red PCGS. The 1931-S is the more famous issue from this year, but the 1931-P is a rarity in its own right in Superb Gem Red condition. Glowing mint luster shimmers over fiery copperorange surfaces that are practically void of contact. There are a few microscopic carbon specks, but not much else. Boldly struck and eye-appealing. Population: 25 in 67 (2 in 67+) Red, 0 finer (1/18). NGC ID# 22D2, PCGS# 2614
- 3187 1931-S MS66 Red PCGS. The 1931-S is a low-mintage issue that is unknown in grades above MS66, with the Red designation (1/18). This delightful Premium Gem offers well-detailed design elements and lustrous, original red surfaces with no mentionable distractions. NGC ID# 22D4, PCGS# 2620
- 3188 1933-D MS67 Red PCGS. A conditionally scarce Registry coin, among the finest certified by PCGS or NGC. This Superb Gem 1933-D cent displays satiny orange-gold luster and carbon-free surfaces. Bold design elements complete the appeal. Population: 36 in 67 (1 in 67+) Red, 0 finer (1/18). NGC ID# 22D8, PCGS# 2632
- 3189 1936 Doubled Die Obverse, FS-103, MS66 Red PCGS. FS-103 shows doubling on LIBERTY and IN GOD WE TRUST but not the date. This piece is well-struck and immensely frosty, showing essentially unabraded surfaces. Eye appeal is generous. Population (FS-103): 18 in 66 Red (1 in 66+), 1 finer (1/18). NGC ID# 22DE, PCGS# 37756 Base PCGS# 2650
- 3190 1955 Doubled Die Obverse, FS-101 Environmental Damage PCGS Genuine. AU Details. The surfaces are finely textured beneath deep olive-brown and burgundy toning on this sharply detailed doubled die obverse cent. Although not numerically graded, this piece will fit in well with an otherwise circulated collection of Lincoln Wheat cents.
- 3191 1955 Doubled Die Obverse, FS-101, AU53 NGC. CAC. A spectacular spread throughout the obverse legends confirms the famous doubled die variety. The walnut-brown surfaces are problem-free, and wear is chiefly confined to Lincoln's jaw and cheekbone. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3192 1955 Doubled Die Obverse, FS-101, AU58 NGC. The chocolate-brown surfaces are smooth and without apparent carbon. The cheekbone shows only a whisper of wear. The obverse legends exhibit a spectacular spread, diagnostic for the famous FS-101 variety. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

1955 Cent, MS64 Red and Brown Doubled Die Obverse, FS-101

- 3193 1955 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. Is there a more dramatic or well-known Doubled Die Obverse variety in all of American numismatics? We do not believe so. This Choice Uncirculated example displays pale peach-orange color around the borders and within the design recesses. It deepens to shades of reddish-brown and violet over the exposed areas. The reverse is stronger than the obverse with complete detail on the legends. Minimal carbon and a few scattered flecks. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826
- 3194 1962-D MS67 Red PCGS. This extraordinary Superb Gem Lincoln cent displays sharply detailed design elements and impeccably preserved original red surfaces, with vibrant mint luster and outstanding eye appeal. Population: 11 in 67 (1 in 67+) Red, 0 finer (1/18). NGC ID# 22G4, PCGS# 2881
- 3195 1970-S Large Date, Doubled Die Obverse, FS-101, MS64 Red and Brown NGC. Bold die doubling is evident on the date, LIBERTY, and IN GOD WE TRUST. An impressive and very scarce variety. This satiny near-Gem is almost entirely mint red, although a few wisps of lavender toning encourage a Red and Brown designation from NGC. A couple of insignificant ticks on the obverse decide the numeric grade. NGC ID# 22GN, PCGS# 37998 Base PCGS# 2938

1970-S Large Date Cent, MS64 Red and Brown FS-101, Bold Obverse Die Doubling

3196 1970-S Large Date, Doubled Die Obverse, FS-101, MS64 Red and Brown NGC. The doubling is fairly wide across LIBERTY and IN GOD WE TRUST, and is seen on the date with low-power magnification. NGC designates this piece Red and Brown due to a few blushes of burgundy that faintly tint portions of the obverse and most of the reverse, but the overall coloration leans toward copperred. Bold design elements and a lack of distracting abrasions add to the eye appeal, and the only mentionable spot tends to blend into the field below TE in STATES. NGC ID# 22GN, PCGS# 37998 Base PCGS# 2938

1971 Lincoln Cent, MS67+ Red Tied for Finest Certified

- 3197 1971 MS67+ Red PCGS. This Plus-graded Superb Gem Lincoln cent is among the finest certified examples at either of the leading grading services. The impeccably preserved original red surfaces radiate vibrant mint luster on both sides and the design elements are sharply detailed throughout. Overall eye appeal is tremendous. Population: 61 in 67 (3 in 67+) Red, 0 finer (1/18). NGC ID# 22GP, PCGS# 2941
- 3198 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS. This important *Guide Book* variety is conditionally scarce in MS67 Red, and only a single numerically finer piece is reported by PCGS. This Registry-grade example displays satiny luster and a sharp strike. Mainly copper-orange color adorns each side, although the reverse border shows vivid cherry-red patina. Population: 51 in 67 Red (1 in 67+), 1 finer (1/18). NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950
- 3199 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS. A magnificent pumpkin-orange Superb Gem. Strong cartwheel luster illuminates pristine surfaces. The strike is unimprovable, and only a minuscule fleck or two precludes perfection. Though a number of doubled die varieties exist for the 1972 cent, FS-101 is the *Guide Book* entry, and it exhibits a remarkable spread throughout the obverse legends. NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950
- 3200 1992-D Close AM, FS-901, AU55 NGC. PCGS estimates "about 15" Close AM 1992-D cents are known, although significantly more than that number are listed on the population reports of the two leading services, suggesting either new finds of this important variety or greatly inflated submission totals. The present Choice AU example shows no loss of detail to wear, but has slight highpoint rub that prevents a Mint State designation. Lavender and steel-blue overtones accent coppery-orange underlying luster. NGC ID# 22JJ, PCGS# 391427 Base PCGS# 83099

PROOF LINCOLN CENTS

1909 Lincoln Cent, PR66 Red First-Year Matte Proof Issue

3201 1909 PR66 Red PCGS. A fully struck matte proof with contact-free orange-gold and fire-red surfaces. Essentially perfect aside from a tiny spot above the I in LIBERTY. Far scarcer than its business strike counterpart, especially in full Red. Housed in a green label holder. Population: 47 in 66 (4 in 66+) Red, 7 finer (1/18). Ex: Houston Signature (Heritage, 12/2013), lot 3141, which realized \$2,588.53. NGC ID# 22KS, PCGS# 3305

3202 1911 PR65 Red NGC. Matte proof cents were shipped by the Mint in cellophane wrappers that typically toned the coins, particularly if the collector left the cent with the cellophane. As a result, NGC has certified *just 12* proof 1911 cents as Red. The present fully struck specimen is predominantly apricot-gold, though the portrait high points are toned. In an older generation holder. Census: 4 in 65 Red, 1 finer (1/18). NGC ID# 22KU, PCGS# 3311

1912 Cent, PR66 Red and Brown Mostly Red Obverse

- 3203 1912 PR66 Red and Brown PCGS. CAC. Rich cherry-red, gold, and copper-orange hues decorate the obverse of this Premium Gem matte proof, while the reverse displays burgundy overtones that earn the Red and Brown designation. The coin is sharp and luminous with no distracting contact marks and only a few unobtrusive specks. A rarity this fine. Population: 16 in 66 (2 in 66+) Red and Brown, 2 in 66 Red finer. CAC: 8 in 66, 0 finer (1/18). NGC ID# 22KV, PCGS# 3313
- 3204 1913 PR66 Red PCGS. This spectacular Premium Gem shows the razor-sharp design detail expected of a matte proof issue and the impeccably preserved original red surfaces emit vibrant mint luster throughout. Population: 40 in 66 (2 in 66+) Red, 7 finer (1/18). NGC ID# 22KW, PCGS# 3317
- 3205 1936 Type One—Satin Finish PR65 Red PCGS. Glimmering copper-orange surfaces display no bothersome contact marks and have sharply struck devices. A few unobtrusive specks are not out of line for the grade. The fields are slightly more reflective than on many Satin finish 1936 proof cents. NGC ID# 22L2, PCGS# 3332
- 3206 1936 Type Two Brilliant Finish PR65 Red PCGS. CAC. A delightful Gem representative of this brilliant finish proof issue, with razor-sharp definition on all design elements and deeply mirrored fields. The well-preserved surfaces retain all their original red color. NGC ID# 22L3, PCGS# 3335

1937 Cent, PR67 Red High-End Registry Coin

- 3207 1937 PR67 Red PCGS. CAC. This top-grade Red proof earns a CAC green label for outstanding quality and eye appeal, even within the lofty PR67 Red grade. The glimmering surfaces are deeply reflective with rich tangerine-orange coloration and no marks or spots. Ideal for Registry Set purposes. Population: 24 in 67 Red, 4 in 67 Red Cameo finer. CAC: 11 in 67, 0 finer (1/18). NGC ID# 22L7, PCGS# 3338
- 3208 1938 PR67 Red PCGS. A magnificent Superb Gem proof, with razor-sharp definition on all design elements and impeccably preserved original red surfaces on both sides. The fields are deeply mirrored, but the all-brilliant finish prevents cameo contrast. Population: 49 in 67 (3 in 67+) Red, 0 finer (1/18). NGC ID# 22L5, PCGS# 3341

3209 1971-S Doubled Die Obverse, FS-101, PR68 Red Cameo PCGS. Prominent die doubling is visible on the date, LIBERTY, and portions of IN GOD WE TRUST. This intriguing proof variety is rare in such fine condition as the present example, a PR68 Red Cameo that shows virtually flawless surfaces and beautiful contrast. Both sides have vivid tangerine-orange luster. NGC ID# 22M3, PCGS# 83533 Base PCGS# 83548

TWO CENT PIECES

3210 1864 Small Motto, FS-401, MS64 Red and Brown PCGS. CAC. Only a tiny percentage of the 1864 issue is the introductory Small Motto subtype. This lustrous sun-gold and olive-green near-Gem has a good strike and unobtrusive contact near the date. PCGS# 38233 Base PCGS# 3580

1864 Small Motto Two Cent, MS65 Satiny Red and Brown Surfaces

- 3211 1864 Small Motto, FS-401, MS65 Red and Brown NGC. CAC. This Gem is sharp and satiny with no major abrasions. Undertones of copper-gold luster appear in the fields on each side, although chestnut-brown and olive toning is slightly more dominant. The Small Motto variety is a key to the two cent series and is elusive in MS65. CAC-approved in a prior generation holder. Census: 53 in 65 (1 in 65+) Red and Brown, 15 finer; 16 in 65 Red, 6 finer. CAC: 30 in 65, 3 finer (1/18). PCGS# 38233 Base PCGS# 3580
- 3212 1865 Fancy 5 MS66 Red and Brown PCGS. The centers are mostly Brown, but the borders are predominantly peach-gold. A sharply struck and lustrous high-grade type coin. No marks are present, and carbon is virtually impossible to find. NGC ID# 8HFV, PCGS# 38257 Base PCGS# 3583
- 3213 1866 MS65 Red PCGS. Appealing luster and lovely orange and wheat-gold hues, including a few hints of red, provide this Gem with a pleasing appearance. A few tiny splashes of goldenbrown color appear near 3 and 5 o'clock on the obverse. Scattered microscopic specks of carbon are present. Population: 46 in 65 (3 in 65+) Red, 13 finer (12/17). NGC ID# 274R, PCGS# 3590

1868 Two Cent, MS65 Red Seldom Offered This Fine

3214 1868 MS65 Red PCGS. The vast majority of Uncirculated 1868 two cent pieces are in the Brown or Red and Brown color categories. This Gem Red coin is conditionally rare. Satiny copper-red luster shows no major abrasions but does have a few minor carbon flecks. The design elements are well-struck. Population: 17 in 65 Red, 6 finer (1/18). NGC ID# 22NC, PCGS# 3599

3215 1871 MS65 Red and Brown PCGS. CAC. This Gem 1871 two cent piece is more red than brown, showing satiny amber-gold and copper-orange hues with a few olive and chestnut overtones. A few small, scattered flecks are noted under magnification. The strike is sharp and no major abrasions are seen. Population: 58 in 65 (1 in 65+) Red and Brown, 23 finer. CAC: 34 in 65, 2 finer (1/18). NGC ID# 22NF, PCGS# 3610

1871 Two Cent Piece, MS66 Red and Brown

- 3216 1871 MS66 Red and Brown PCGS. Considerable faded mint red luster is blended with light brown toning on this attractive and conditionally elusive issue. A sharp strike accompanies excellent eye appeal. The pristine surfaces lack abrasions. Population: 5 in 66 Red and Brown, 0 finer (1/18). NGC ID# 22NF, PCGS# 3610
- 3217 1871 Repunched Date, FS-301, MS65 Red and Brown PCGS. CAC. Although undesignated as such on the PCGS holder, this is the most prominent repunched date variety of 1871. The second 1 is broadly doubled southwest, while the base of the 7 and the flag of the first 1 are also repunched. Sharply struck and lustrous with a chestnut-gold obverse and a blush of lavender on the central reverse. PCGS# 569416 Base PCGS# 3610

PROOF TWO CENT PIECES

- 3218 1864 Large Motto PR63 Red and Brown NGC. CAC. Large Motto 1864 business strikes are plentiful, but proofs are very scarce, even though the traditional mintage of 100 pieces is undoubtedly too low. This flashy and fully struck Select sun-gold example has a few splashes of lilac and sea-green color on the reverse. Encapsulated in a former generation holder. NGC ID# 274T, PCGS# 3622
- 3219 1867 PR64 Red PCGS. Coppery-orange coloration warms reflective fields and sharp devices on this near-Gem Red proof two cent piece. A few tiny specks are seen under magnification but are not distracting. PCGS has only graded three Cameo examples of the 1867 proof in all grades, making attractive Red non-Cameos the finest coins available to most collectors. Population: 30 in 64 Red, 30 finer (including Cameos) (12/17). NGC ID# 274W, PCGS# 3635
- 3220 1869 PR65+ Red and Brown PCGS. CAC. This fully struck Gem is primarily peach-red but has a hint of ruby toning on the central reverse. The flashy fields are unabraded and display only inconsequential carbon. CAC: 31 in 65, 15 finer (1/18). Ex: Beverly Hills Signature (Heritage, 11/2011), lot 3106. NGC ID# 274Y, PCGS# 3640
- 3221 1869 PR66 Red and Brown PCGS. Both sides of this Premium Gem proof exhibit nearly full red mint color that has only faded slightly from its brilliance, exhibiting traces of violet and blue toning. Population: 29 in 66 Red and Brown, 3 finer (1/18). NGC ID# 274Y, PCGS# 3640

1869 Two Cent, PR66 Red Attractive Toning

3222 1869 PR66 Red PCGS. Shades of magenta and gold complement this copper-orange two cent proof, one of at least 600 such pieces manufactured in 1869 (the exact distribution was unrecorded). The reverse displays a slight cameo effect. Preservation and strike are both top-notch, as expected. A curious planchet defect occurs above the N in IN, but it does not affect the appeal. Population: 14 in 66 Red, 0 finer (1/18). NGC ID# 274Y, PCGS# 3641

1870 Two Cent, PR66 Red and Brown Attractive Dappled Color

3223 1870 PR66 Red and Brown PCGS. CAC. Blue-green, olive, and copper-gold elements are most prominent on this Red and Brown Premium Gem. Sharply struck with quality mirrors, this is a high-end survivor from an issue of only 1,000 proofs. Both sides are practically spot-free. No finer Red and Brown proofs are reported, although PCGS does list a small number of Red and Cameo examples in this and finer numeric grades. Population: 32 in 66 (2 in 66+) Red and Brown, 17 Red and Cameo coins finer. CAC: 17 in 66, 0 finer (12/17).

Ex: Central States Signature (Heritage, 4/2012), lot 3448. From The Bayside Collection. NGC ID# 274Z, PCGS# 3643

- 3224 1870 PR65 Red NGC. A distinctive glimmer in the deep orangered fields of this Gem proof is immediately observed, and the design elements are sharp. No distracting abrasions are observed. Census: 28 in 65 (3 in 65+) Red, 17 finer (including 2 Red and Brown Cameos and 1 Red Cameo in PR65 or finer) (12/17). NGC ID# 274Z, PCGS# 3644
- 3225 1871 PR66 Red and Brown PCGS. CAC. The obverse of this highly attractive proof two cent piece exhibits virtually full mint red with slight toning at the peripheries. The reverse has heavier toning with mellow red mint color. Population: 28 in 66 Red and Brown, 0 finer. CAC: 16 in 66, 0 finer (1/18). NGC ID# 22NH, PCGS# 3646
- 3226 1872 PR65 Red and Brown PCGS. This Gem proof is sharp and well-mirrored, showing only a few faint specks on the obverse when viewed under a loupe. The obverse leans heavily toward the Red end of the Red and Brown spectrum, although a blush of auburn toning on the central reverse prevents a full Red designation.

 From The Jamestown Collection, Part II. NGC ID# 2752, PCGS# 3649

1872 Two Cent, PR66 Red and Brown Cameo CAC-Approved and Deeply Reflective

3227 1872 PR66 Red and Brown Cameo NGC. CAC. This glimmering Premium Gem proof displays mainly green-gold color, although a subtle, well-blended blush of auburn on the central reverse prevents a Red designation from NGC. This CAC-endorsed proof is fully struck and devoid of any sort of distraction save for a few microscopic pepper specks. Red and Brown proofs are scarce in PR66 and extremely rare finer.

From The Bayside Collection. NGC ID# 2752, PCGS# 3649

1873 Two Cent, PR63 Brown Original Closed 3 Issue

3228 1873 Closed 3 PR63 Brown PCGS. Terminology is sometimes unclear when it comes to the Closed coinage of 1873. In reality, Close 3 is a more fitting moniker; The opening of the 3 is merely narrow compared to the Open 3 variant. This key proof representative has rich olive-brown surfaces with a trace of gunmetal-blue patina that is more noticeable on the reverse. Contact marks are few in number and minimal in size. Most are difficult to discern without magnification.

From The E.B. Strickland Collection, Part II. NGC ID# 2753, PCGS# 3651

1873 Closed 3 Two Cent, PR65 Red and Brown Mostly Red in Color

3229 1873 Closed 3 PR65 Red and Brown PCGS. CAC. Designated Red and Brown, this Gem Closed 3 proof leans heavily toward the red color spectrum. Both sides has largely copper-gold and orange hues over glimmering fields and sharp devices. On the reverse, a subtle blush of olive in the upper margin prevents a Red designation from PCGS. A few small flecks are seen under a loupe. NGC ID# 2753, PCGS# 3652

THREE CENT SILVER

- 3230 1851 MS66 PCGS. CAC. The first year of issue for the three cent denomination, these pieces produced from an alloy of 75% silver and 25% copper. This Premium Gem has frosty luster that shines through lovely golden and rose toning on both sides. PCGS has only certified 21 finer examples (1/18). NGC ID# 22YX, PCGS#
- 3231 1851 MS66 PCGS. CAC. This diminutive silver coin represents the first year of issue for the three cent denomination. Both sides have a bold strike and frosty silver luster with untoned surfaces. An outstanding and highly appealing coin. PCGS has only certified 21 numerically finer examples (1/18). NGC ID# 22YX, PCGS# 3664
- 3232 1851 MS66+ PCGS. CAC. Delicate gold and iridescent toning is barely visible on the brilliant and highly lustrous surfaces of this impressive Premium Gem circulation-strike three cent silver. The strike is bold. Slight repunching is noted on the 5 and 1 in the date. PCGS has certified 14 of these as MS66+, and 21 finer (1/18). NGC ID# 22YX, PCGS# 3664
- 3233 1852 MS66 PCGS. Well-struck from unlapped dies, showing full detail on the reverse C and the interior. A hint of light golden toning warms frosty luster, and there are no distracting abrasions. PCGS reports 23 finer representatives (12/17). NGC ID# 22YZ, PCGS# 3666
- 3234 1855 MS63 PCGS. CAC. The 1855 is the most elusive Type Two issue in the three cent silver series, coming from a low mintage of 139,000 pieces. This CAC-approved MS63 example displays an impressively sharp strike, along with clash marks on the reverse. Pastel toning graces satiny, minimally abraded mint luster. NGC ID# 22Z4, PCGS# 3671
- 3235 1855 MS64 PCGS. CAC. The 1855 is among the scarcest Type Two three cent silver issues, rarely offered finer than MS64. This CAC-approved Choice example displays clash marks in the fields but is boldly struck. Satiny mint luster yields champagne and rosegold coloration with no major abrasions. Population: 48 in 64, 25 finer. CAC: 10 in 64, 14 finer (1/18). NGC ID# 22Z4, PCGS# 3671

1871 Three Cent Silver, MS67 Reflective Prooflike Fields

3236 1871 MS67 NGC. From a limited business-strike mintage of 3,400 pieces, this delightful Superb Gem exhibits lightly frosted, sharply detailed design elements and deeply reflective prooflike fields. The untoned surfaces are impeccably preserved and overall eye appeal is tremendous. Census: 17 in 67, 4 finer (1/18). NGC ID# 22ZM, PCGS# 3692

PROOF THREE CENT SILVER

3237 1858 PR63 PCGS. This is a fully struck, reflective proof with deep olive-gray and russet toning. No distracting marks are seen, but the deep patina likely contributes to the grade. Only about 100 1858 proof silver three cents are believed known, or about half of the 210-coin Guide Book mintage. NGC ID# 27C5, PCGS# 3705

- 3238 1859 PR64 NGC. CAC. On the obverse, rose-gold border toning surrounds a sea-green interior. The reverse displays the same colors but with the rose-gold hue at the center. Glimmering fields and sharp motifs are further visual attributes. Few CAC-endorsed coins are known. CAC: 7 in 64, 17 finer (1/18). NGC ID# 27C6, PCGS#
- 3239 1859 PR66 PCGS. This reflective Premium Gem proof displays bold detail despite excessive die polishing on portions of the reverse. Each side displays original umber and orange-gold toning, with the reverse also showing deeper olive-blue at the borders. Population: 5 in 66 (1 in 66+), 5 finer (including Cameos) (1/18). From The Bayside Collection. NGC ID# 27C6, PCGS# 3708
- 3240 1863 PR64 Cameo PCGS. CAC. By 1863, the three cent silver series was seeing wider actual distribution in proof sets than as a regular coinage denomination. This well-struck near-Gem example exhibits toning on both sides, with the color more pronounced on the obverse. The colors include orange, sea-green, copper, and plum. The degree of cameo contrast is pleasing, adding to the eye appeal. Population: 12 in 64 Cameo, 15 finer. CAC: 7 in 64, 15 finer (12/17). Ex: New York Signature (Heritage, 11/2013), lot 3168.

From The Bayside Collection. NGC ID# 22ZP, PCGS# 83712

- 1863 PR65 Cameo NGC. CAC. Plenty of eye appeal is seen on this Cameo PR65 with delicate reflective fields and full frost over the devices. There are no distracting hairlines. Census: 6 in 65 Cameo (1 in 65+), 6 finer. CAC: 5 in 65, 10 finer (12/17). Ex: Santa Clara Signature (Heritage, 11/2002), lot 5665. From The Bayside Collection. NGC ID# 22ZP, PCGS# 83712
- 3242 1864 PR65 Cameo PCGS. Intermingled shades of pinkish-gray, powder-blue, and champagne-gold toning enliven the reflective surfaces of this impressive Gem, with sharply detailed devices that possess enough mint frost to produce noticeable elements of contrast. Population: 16 in 65 Cameo, 20 finer (12/17). Ex: Houston Signature (Heritage, 11/2012), lot 3289 From The Bayside Collection. NGC ID# 27CA, PCGS# 83714
- 3243 1865 PR65 NGC. This reflective proof is razor-sharp and wellpreserved, showing areas of brilliance and some with deep bluegreen and lavender toning. Gem-quality proofs of this date are scarce, even without a Cameo designation. This is a most attractive example with original coloration. Census: 25 in 65 (1 in 65+), 26 finer; 7 in 65 Cameo, 9 finer (12/17). NGC ID# 27CB, PCGS#
- 3244 1866 PR64 Cameo NGC. CAC. Despite a measure of gold-gray patina that has settled over the fields, this near-Gem specimen offers undeniable contrast thanks to the richly frosted devices. Sharply struck with only a handful of generally inoffensive flaws. Census: 16 in 64 Cameo, 22 finer. CAC: 9 in 64, 26 finer (1/18). From The Bayside Collection. NGC ID# 27CC, PCGS# 83716
- 3245 1866 PR65 Cameo NGC. Attractive shades of pale gold and violet toning blanket the well-preserved surfaces of this delightful Gem proof, with sharply detailed design elements and deeply reflective fields underneath. Field/device contrast is noticeable, despite the toning. Census: 9 in 65 Cameo, 13 finer (1/18). From The Bayside Collection. NGC ID# 27CC, PCGS# 83716
- 3246 1867 PR65 PCGS. Dappled aquamarine and golden-brown toning adorns this fully struck Gem. Both sides are free from perceptible detractions. Only 625 proofs were produced. Housed in a green label holder.

Ex: Pre-Long Beach Auction (Ira & Larry Goldberg, 2/2012), lot 2384, which realized \$1,150.

From The Bayside Collection. NGC ID# 27CD, PCGS# 3717

1868 PR65 NGC. A splendid late-issue three cent silver, this Gem proof survives from a small mintage of 600 proofs, with an additional 3,500 circulation strikes coined throughout the year. This piece has light champagne toning on its proof surfaces with good contrast. Census: 41 in 65 (1 in 65+), 23 finer (1/18). NGC ID# 2U25, PCGS# 3718

3248 1870 PR64 Cameo PCGS. The sharply detailed, frosty design elements of this impressive Choice proof contrast boldly with the deeply mirrored fields, despite some low-intensity pale gold toning that enhances the outstanding eye appeal. Population: 15 in 64 Cameo, 23 finer (1/18).

From The Bayside Collection. NGC ID# 27CF, PCGS# 83721

1871 Three Cent Silver, PR66+ Cameo Beautifully Toned

- 3249 1871 PR66+ Cameo NGC. Only one Ultra Cameo is reported at NGC, making this high-end Cameo among the finer-known representatives of the 1871 proof three cent silver. Sharp devices and deeply reflective fields offer modest cameo contrast, accentuated by rose-gold, sea-green, blue, and champagne toning. No distractions are observed. Census: 5 in 66 Cameo (1 in 66+, 1 in 66 ★), 7 finer (1/18). NGC ID# 27CG, PCGS# 83722
- 3250 1872 PR64 PCGS. CAC. Ocean-blue borders surround violetred and pumpkin-gold centers. Sharply struck and attractive. The penultimate three cent silver date has a combined proof and commercial mintage of 1,950 pieces. Encased in an old green label holder. CAC: 10 in 64, 36 finer (1/18). NGC ID# 27CH, PCGS# 3723
- 3251 1873 PR62 PCGS. Only 600 proof silver three cent pieces were struck in 1873. This PR62 specimen is sharply detailed and lightly marked, under shades of emerald-green, lavender-gray, and ceruleanblue toning. The reflective fields shine through the patina.
 From The E.B. Strickland Collection, Part II. NGC ID# 27CJ, PCGS# 3724

1873 Silver Three Cent, PR66 Cameo Beautifully Toned Final-Year Proof

3252 1873 PR66 Cameo PCGS. The 1873 silver three cent is in demand as a proof-only date but also as the last year of the denomination. This high-end Cameo displays a full strike and strong contrast. Beautiful old-time border toning accentuates the cameo effect, showing concentric blue, violet, and orange-gold hues. Population: 11 in 66 Cameo, 5 finer (1/18). NGC ID# 27CJ, PCGS# 83724

THREE CENT NICKELS

3253 1866 MS66 PCGS. In 1865, while the Philadelphia Mint continued limited production of silver three cent pieces, a new version of the denomination was produced from a 75% copper and 25% nickel alloy, and these pieces are known as three cent nickel coins today. This second year issue had a mintage of 4.8 million coins, the second largest of the series. However, few survive in top grades such as this lovely Premium Gem that exhibits pleasing gold and champagne toning on its lustrous gray surfaces. Population: 34 in 66 (3 in 66+), 3 finer (1/18). NGC ID# 22NK, PCGS# 3732

1872 Three Cent Nickel, MS66+ One Coin Finer at PCGS

3254 1872 MS66+ PCGS. This three cent nickel stands out as one of the finest survivors from a mintage of 861,000 coins. PCGS and NGC each report a finer example, but this is the only Premium Gem at the former service with a Plus designation. Both sides are fully struck and nickel-gray with soft mint luster and thin golden accents. Population: 19 in 66 (1 in 66+), 1 finer (1/18). NGC ID# 2757, PCGS# 3738

1873 Three Cent Nickel, MS66+ Closed 3, Finest at PCGS

3255 1873 Closed 3 MS66+ PCGS. CAC. This glittering Premium Gem three cent nickel offers scintillating luster and complete brilliance, appearing as it did the day it was struck. Bold design elements are seen on each side. A loupe fails to reveal any marks worth mentioning. Finest at PCGS by the Plus margin. Population: 14 in 66 (1 in 66+), 0 finer. CAC: 8 in 66, 0 finer (1/18). NGC ID# 22NP, PCGS# 3739

PROOF THREE CENT NICKELS

1865 Three Cent Nickel, PR65 First Year of Issue

- 3256 1865 PR65 PCGS. The tripled date is a common feature among most 1865 proof three cent nickels, of which 500+ pieces were struck in the series' inaugural year. The rims are broad and sharp. Fully struck motifs feature a delicate overlay of champagne-gold color. The obverse is partially contrasted. Population: 49 in 65 (2 in 65+), 17 finer in this category(1/18). NGC ID# 275K, PCGS# 3761
- 3257 1869 PR66 Cameo PCGS. CAC. A conditionally scarce Cameo, this CAC-approved proof 1869 three cent nickel displays modest contrast and warm golden toning. The strike is sharp and the surfaces are without distracting marks. A small number of Deep Cameos are finer in this grade. Population: 24 in 66 (1 in 66+) Cameo, 7 finer. CAC: 19 in 66, 4 finer (1/18). NGC ID# 275P, PCGS# 83765
- 3258 1870 PR66 PCGS. CAC. The actual mintage of minor proof coins prior to the late 1870s was not carefully recorded in Mint records. However, proof production was limited to small quantities. This Premium Gem features a bold strike and fully mirrored fields with untoned gray surfaces and a hint of field-to-device contrast. NGC ID# 275R, PCGS# 3766
- 3259 1875 PR66 Cameo NGC. Among the finest Cameos certified, this Premium Gem proof 1875 three cent nickel displays a bold strike and reflective fields that still show die polishing lines. The obverse portrait has several small planchet marks (as-made), including a "shiny" area on Liberty's jaw and mouth. The coin is untoned. Census: 6 in 66 Cameo (1 in 66+, 1 in 66★), 0 finer (1/18). NGC ID# 22NV, PCGS# 83771

1877 Three Cent Nickel, PR66 Almond-Gold Key Date

3260 1877 PR66 PCGS. A lack of demand for circulating minor coinage resulted in the production of only 900 three cent nickel pieces in 1877, all in proof format. That makes this one of the most sought-after keys in the series. Almond-gold patina blankets watery, partly contrasted surfaces. Contact is virtually unseen without a glass. There are just four higher-graded non-Cameo submissions at PCGS (1/18). NGC ID# 275X, PCGS# 3773

3261 1887/6 PR66 Cameo PCGS. Designated "Strong Overdate" by PCGS. There are only a few overdates among proof-only coinage in the American series, and one of those is the 1887/6 with a strong overdate that can actually be seen without magnification. This sharply struck Premium Gem Cameo proof has light field-to-device contrast and fully mirrored fields beneath attractive champagne toning. Population for the Strong Overdate: 44 in 66 (4 in 66+) Cameo, 8 finer non-Cameo, 13 finer Cameo (1/18). NGC ID# 276A, PCGS# 83784

1887/6 Three Cent Nickel, PR67 FS-302, A High-Grade Representative

- 3262 1887/6 FS-302 PR67 PCGS. This Superb Gem proof is among the finest non-Cameo Strong Overdate coins at PCGS. The strike is full, and the lightly toned surfaces yield modest reflectivity in the fields and exceptional preservation. All four date numerals exhibit repunching, but the underlying six on the 7 is the most significant. Population: 8 in 67, 13 Cameos finer (1/18). PCGS# 416356 Base PCGS# 3784
- 3263 1889 PR67 PCGS. CAC. The nickel three cent series came to a close in 1889, although proof coins of this date are fairly plentiful and make excellent type representatives. This Superb Gem displays pastel toning amid modestly reflective fields and sharp, frosty devices. The strike is razor-sharp. Population: 72 in 67 (1 in 67+), 30 finer. CAC: 33 in 67, 1 finer (1/18). NGC ID# 22NW, PCGS# 3786
- 3264 1889 PR67 PCGS. CAC. Pastel ice-blue and butter-gold patina embraces this sharply struck final-year three cent nickel. One small spot above the left foot of the first column, but the lustrous surfaces are otherwise immaculate. Encased in an old green label holder. NGC ID# 22NW, PCGS# 3786

SHIELD NICKELS

- 3265 1869 MS66 NGC. Multiple prominent die cracks appear on the obverse of this attractive Premium Gem 1869 Shield nickel. Both sides have a sharp strike and highly lustrous gray surfaces with delicate peripheral gold toning. Census: 16 in 66 (1 in 66★), 4 finer (1/18). NGC ID# 22P3, PCGS# 3796
- 3266 1872 MS66 PCGS. A brilliant, lustrous, and sharply struck Shield type coin. The obverse is practically pristine, and the reverse shows only a minor graze east of the large 5. Population: 33 in 66 (3 in 66+), 2 finer (12/17). NGC ID# 22P6, PCGS# 3799
- 3267 1875 MS66 PCGS. Two of the important entries in a complete set of circulation-strike Shield nickels are the 1871 and 1875, each with low overall certified populations. For the present issue, PCGS has only certified 190 examples in all Mint State grades. This lovely example has light blue and gold toning on its frosty, fully lustrous surfaces. Population: 16 in 66 (3 in 66+), 0 finer (1/18). NGC ID# 22PA, PCGS# 3804
- 3268 1883/2 FS-301 AU55 PCGS. Cherrypickers' lists five overdate varieties for 1883 Shield nickel, but FS-301 shows much more of the underdigit 2 than the other four obverses. It is also very scarce, especially relative to FS-303. A satiny and lightly abraded stonegray and almond-gold example. FS-301 Population: 2 in 55, 4 finer (1/18). NGC ID# 22PD, PCGS# 38416 Base PCGS# 3814

PROOF SHIELD NICKELS

3269 1866 Rays PR61 NGC. CAC. This is the initial year of the five cent denomination. This PR61 example displays brownish patina imbued with traces of light green, and the design features are sharply impressed. A few minute marks are not significant. This piece has remarkably pleasing eye appeal despite the numerically designated grade, an attribute that CAC saw fit to recognize. NGC ID# 276G, PCGS# 3817

1867 No Rays Shield Nickel, PR66 Cameo Warm Golden Toning

3270 1867 No Rays PR66 Cameo PCGS. CAC. The usual proof reverse with the star pointing between the AM in AMERICA. This is a sharp, golden-toned Cameo with unmarked surfaces and pleasing visual appeal. Cameo examples of this inaugural No Rays proof are scarce at the Premium Gem level, and PCGS has seen only six Deep Cameos in all grades combined. Population: 18 in 66 (1 in 66+) Cameo, 5 finer. CAC: 12 in 66, 0 finer (1/18). NGC ID# 5EB6, PCGS# 83821

1868 Shield Nickel, PR67 Cameo Elusive Contrasted Proof

- 3271 1868 PR67 Cameo NGC. The depth of mirroring on this Superb Gem Cameo proof is reminiscent of a modern proof issue certainly far more reflective than is typically seen on Shield nickel proofs. The strike is sharp, and cameo contrast is outstanding. The lower-right obverse displays a glint of light golden toning. The date is lightly recut, visible at the bases of the 18 and within the loops of the 68. Census: 5 in 67 Cameo, 0 finer (1/18). NGC ID# 276J, PCGS# 83822
- 3272 1877 PR61 PCGS. The key date 1877 Shield nickel was only struck in proof format, with a limited mintage of 900 pieces. This PR61 example is somewhat shallowly mirrored, with well-detailed design elements and lightly marked surfaces that show a small planchet void in the left obverse field.

From The E.B. Strickland Collection, Part II. NGC ID# 276U, PCGS# 3831

1877 Nickel, PR66 ★ Cameo Eye-Catching Finish

- 3273 1877 PR66 ★ Cameo NGC. Eye-catching field-device contrast defines this lovely Premium Gem nickel proof. A black-and-white effect is the result of frosted motifs and glassy mirrors. Not only is the finish on this piece outstanding, but its appeal is heightened by the issue's key-date status. There was virtually no demand for nickel coinage in 1877, so the Mint restricted output to a limited number of proofs for collectors (900 specimens). Census: 62 in 66 Cameo (4 in 66★), 4 finer (1/18). NGC ID# 276U, PCGS# 83831
- 3274 1878 PR66 NGC. CAC. Light wheat-gold toning visits this lustrous and unmarked Premium Gem. A few pinpoint flecks deny perfection. A popular proof-only date. Housed in a prior generation holder. CAC: 61 in 66, 7 finer (1/18). NGC ID# 276V, PCGS# 383?
- 3275 1878 PR66+ PCGS. CAC. The centers of this Premium Gem proof are brilliant and mirrored, with muted gold toning that masks the mirrored finish closer to the borders. The 1878 is a proof-only issue that had a production of 2,350 examples. NGC ID# 276V, PCGS# 3832
- 3276 1881 PR67 Cameo PCGS. CAC. This modestly contrasted Superb Gem features warm golden toning and sharp design elements. The fields are faintly reflective with an overall satiny appearance. Conditionally elusive this fine. Population: 29 in 67 (1 in 67+) Cameo, 0 finer. CAC: 29 in 67, 0 finer (12/17). NGC ID# 276X, PCGS# 83836

LIBERTY NICKELS

- 3277 1883 No Cents MS67 NGC. The nickel-white surfaces of this Superb Gem are devoid of mentionable marks and exhibit well-struck devices, including the lower-left portion of the wreath. Star 13 is a trifle soft. Frosty luster embraces each side, becoming somewhat thicker on the motifs. Census: 69 in 67 (1 in 67+, 4 in 67 ★). 0 finer (1/18).
 - Ex: Houston Signature (Heritage, 12/2009), lot 243. NGC ID# 2772, PCGS# 3841
- 3278 1883 No Cents MS67 PCGS. An important type coin, this No Cents 1883 Liberty nickel is among the finest examples of the variety certified, and it is scarce as such. Golden-olive and lilac hues embrace satiny luster on each side, and no major strike weakness is seen. The corn ear left of the wreath bow is almost fully defined. Population: 48 in 67 (2 in 67+), 0 finer (1/18). NGC ID# 2772, PCGS# 3841

1886 Liberty Nickel, MS64 Lower-Mintage Key Issue

- 3279 1886 MS64 PCGS. CAC. The 1886 Liberty nickel has a small business-strike mintage of 3.3 million pieces, making it a scarce issue at the MS64 grade level. This attractive Choice specimen exhibits well-detailed design elements, with a touch of softness on the lower stars and wreath. The lightly marked, lustrous surfaces show a few highlights of greenish-gold and lavender-gray toning. PCGS has graded 89 numerically finer examples (1/18). NGC ID# 277U, PCGS# 3847
- 3280 1889 MS66 PCGS. This lovely Premium Gem exhibits bold design definition with fully lustrous and frosty light gray surfaces beneath pleasing gold overtones on both sides. Population: 51 in 66 (5 in 66+), 0 finer (1/18). NGC ID# 2775, PCGS# 3850
- 3281 1889 MS66 PCGS. CAC. A conditional rarity at the Premium Gem level, the 1889 Liberty nickel saw an increase in the number of pieces struck per average die over previous years. This piece is fairly well-struck on the obverse save for stars 1 and 2, and some detail shows on the lower wreath details. The surfaces are faintly pebbly and lustrous with an attractive gold-gray appearance. Population: 51 in 66 (5 in 66+), 0 finer. CAC: 20 in 66, 0 finer (1/18). Ex: Central States Signature (Heritage, 4/2013), lot 1467. NGC ID# 2775, PCGS# 3850
- 3282 1892 MS66 PCGS. An impressive Premium Gem that is tied for the finest certified at PCGS or NGC, this example exhibits an above average strike with wispy gold toning over its brilliant and lustrous light gray surfaces. Population: 41 in 66 (5 in 66+), 0 finer (1/18). NGC ID# 2777, PCGS# 3853
- 3283 1894 MS66 PCGS. CAC. This spectacular Premium Gem offers well-detailed design elements, with a slight touch of softness on some star centers. The impeccably preserved surfaces exhibit vibrant mint luster, under delicate shades of pale gold and lavender toning. Population: 42 in 66 (8 in 66+), 1 finer. CAC: 18 in 66, 0 finer (1/18). NGC ID# 2779, PCGS# 3855
- 3284 1895 MS66 PCGS. This is a totally brilliant, needle-sharp Premium Gem from a mintage that approaches 10 million coins. Two ticks within the hair and on the tip of the bust probably prevent an even higher grade. A single 1895 nickel is reported finer at both services combined. Population: 34 in 66 (3 in 66+), 1 finer (12/17). NGC ID# 277A, PCGS# 3856
- 3285 1904 MS66+ PCGS. CAC. Although a handful of finer pieces are reported by PCGS and NGC, this 1904 Liberty nickel is among the finest endorsed by CAC. Vibrant, frosty luster illuminates delicate ice-blue toning on each side, and no abrasions are seen. The corn ear to the left of the wreath bow is slightly weak, but the strike is otherwise sharp. Population: 95 in 66 (16 in 66+), 2 finer. CAC: 47 in 66, 0 finer (1/18). NGC ID# 277F, PCGS# 3865
- 3286 1906 MS66+ PCGS. This Plus-graded Premium Gem offers sharply detailed design elements, aside from the slightest touch of softness on the lower left wreath elements. The impeccably preserved, lustrous surfaces exhibit a few hints of pale gold and lavender-gray toning. Population: 53 in 66 (9 in 66+), 0 finer (1/18). NGC ID# 277H, PCGS# 3867

3287 1908 MS66+ PCGS. Delicate pastel toning complements frosty, virtually flawless surfaces that produce a cartwheel effect with only slight rotation beneath a light. The lower portion of the wreath and several obverse stars are weakly struck, as usual for this type. This piece is among the finest 1908 Liberty nickels at PCGS. Population: 34 in 66 (7 in 66+), 0 finer (12/17). NGC ID# 24FR, PCGS# 3869

1912-D Nickel, MS66 One Finer Coin at PCGS

- 3288 1912-D MS66 PCGS. This final-year branch mint issue the first production of minor coinage at the Denver Mint is rare in MS66. Although the 1912-S gets more attention, both issues are about equally available (or unavailable) at this grade level. Satiny luster and pale golden accents adorn pristine nickel-gray surfaces. The strike is bold, and die cracks connect many obverse stars. Population: 58 in 66 (5 in 66+), 1 finer (1/18). NGC ID# 277P, PCGS# 3874
- 3289 1912-S MS64 NGC. The first branch mint nickels were struck at Denver and San Francisco in 1912, and they are the only issues of the Liberty design struck outside of Philadelphia. Production of the Buffalo design began early the next year. This Choice Mint State piece features a sharp strike and thick gold and iridescent toning. NGC ID# 277R, PCGS# 3875
- 3290 1912-S MS64 PCGS. CAC. This satiny near-Gem represents the first San Francisco Mint issue of the denomination. Both sides have light gray luster and excellent design definition including bold details in both ears of corn at the lower reverse. NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

1884 Liberty Nickel, PR67+ ★ Cameo Delicately Toned

- 3291 1884 PR67+ ★ Cameo NGC. No Superb Gem Ultra Cameos are listed at NGC, making this high-end, eye-appealing Cameo a prime consideration for Registry purposes. The strike is full, and the surfaces are seemingly flawless. A blush of delicate ice-blue and yellow-gold toning on each side complements the cameo effect. Census: 14 in 67 Cameo (1 in 67 ★, 1 in 67+★), 3 finer (1/18). NGC ID# 22PV, PCGS# 83882
- 3292 1885 PR66 PCGS. CAC. Housed in a green-label PCGS holder is a lovely Premium Gem proof example of the always-popular 1885 Liberty nickel. This piece exhibits fully mirrored fields, light fieldto-device contrast, and delicate iridescent toning. NGC ID# 277T, PCGS# 3883

- 3293 1885 PR67 PCGS. Wispy blue and gold toning graces the obverse and reverse of this lovely Superb Gem proof that represents a popular year for collectors, given the elusive nature of circulation strike pieces. Population: 24 in 67 (3 in 67+), 2 finer (1/18). NGC ID# 277T, PCGS# 3883
- 3294 1885 PR65 Cameo PCGS. This Gem proof is fully struck and displays stark cameo contrast, as designated by PCGS. The coin is brilliant aside from a blush of golden toning at the center on each side. Circulation-strike nickels of 1885 are key-date coins with a hefty price tag attached in the upper Mint State grades. For date purposes, this attractive proof is a beautiful and more affordable alternative. NGC ID# 277T, PCGS# 83883
- 3295 1890 PR66 Cameo PCGS. Lovely gold and iridescent toning accents the strong contrast between deeply mirrored fields and lustrous devices on this Premium Gem Cameo proof. A bold strike resulted in full design definition. Population: 25 in 66 (4 in 66+) Cameo, 2 finer (1/18). NGC ID# 277Y, PCGS# 83888
- 3296 1893 PR66+ Cameo PCGS. CAC. A sensational Premium Gem Cameo proof, this Liberty nickel exhibits brilliant and untoned gray proof surfaces with fully mirrored fields and sharply detailed, satin devices. Population: 40 in 66 (8 in 66+) Cameo, 23 finer. CAC: 28 in 66, 15 finer (1/18). NGC ID# 2783, PCGS# 83891
- 3297 1897 PR67 Cameo PCGS. An exquisite beauty, this 1897 Liberty nickel features frosty, sharply defined devices on a deeply mirrored gray background with pale blue, amber, and lavender toning. Population: 21 in 67 (5 in 67+) Cameo, 3 finer (1/18). NGC ID# 2787, PCGS# 83895

1898 Liberty Nickel, PR67 Rare Cameo Example

- 3298 PR67 Cameo PCGS. From a limited proof mintage of 1,795 pieces, this spectacular Superb Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices to produce a startling cameo effect. The brilliant surfaces are virtually flawless. Population: 12 in 67 (3 in 67+) Cameo, 0 finer (1/18). NGC ID# 2788, PCGS# 83896
- 3299 1905 PR67 PCGS. CAC. Wispy blue, gold, and rose toning resides on the pristine surfaces of this Superb Gem proof. The satin devices are boldly rendered on deeply mirrored fields. Population: 33 in 67 (4 in 67+), 1 finer. CAC: 19 in 67, 2 finer (1/18). NGC ID# 278F, PCGS# 3903
- 3300 1905 PR67 PCGS. CAC. Struck during early operations of the third Philadelphia Mint at a time when mint officers discourage the production of contrasted proofs. This piece approaches the quality of elusive Cameo proofs with satiny, sharply defined devices and fully mirrored fields. Population: 33 in 67 (4 in 67+), 1 finer. CAC: 19 in 67, 2 finer (1/18). NGC ID# 278F, PCGS# 3903

1906 Nickel, PR67 Cameo Sharp and Well-Contrasted

- 3301 1906 PR67 Cameo PCGS. CAC. PCGS reports a single Deep Cameo example of the 1906 proof, graded PR65+, making this Superb Gem Cameo coin among the top considerations for Registry Set collectors. The CAC-approved surfaces are beautifully contrasted, showing a delicate hint of pastel color. The strike lacks nothing in sharpness. Population: 29 in 67 (3 in 67+) Cameo, 2 finer. CAC: 22 in 67, 1 finer (1/18). NGC ID# 278G, PCGS# 83904
- 3302 1908 PR67 PCGS Secure. A stunning Superb Gem with deeply mirrored fields and satin devices, this piece has exceptional eye appeal. Delicate gold and iridescent toning accompanies the bold design definition. Population: 35 in 67 (5 in 67+), 1 finer (1/18). NGC ID# 278J, PCGS# 3906
- 3303 1908 PR67 PCGS. CAC. A delightful Superb Gem proof, this 1908 Liberty nickel has brilliant and untoned light gray surfaces with deeply mirrored fields and satin devices that exhibit a hint of contrast. Population: 35 in 67 (5 in 67+), 1 finer. CAC: 19 in 67, 1 finer (1/18). NGC ID# 278J, PCGS# 3906
- 3304 1910 PR67 NGC. CAC. Medium orange-gold and powder-blue patina enriches this intricately impressed Superb Gem. Contact is absent and carbon is infrequent. Encased in a prior generation holder. CAC: 10 in 67, 4 finer (1/18). NGC ID# 278L, PCGS# 3908
- 3305 1911 PR67 Cameo PCGS. Light honey-gold toning visits this prominently mirrored and intricately impressed Superb Gem. Frosty motifs ensure exemplary cameo contrast. A strong lens reveals a few pinpoint flecks on the portrait. Population: 20 in 67 (3 in 67+) Cameo, 0 finer (1/18). NGC ID# 278M, PCGS# 83909

BUFFALO NICKELS

- 3306 1913-S Type One MS66 PCGS. CAC. An exemplary Premium Gem representative of the short-lived Type One design, with sharply detailed design elements and vibrant mint luster on both sides. Eye appeal is terrific. PCGS has graded 29 numerically finer examples (1/18). NGC ID# 22PY, PCGS# 3917
- 3307 1913-S Type Two MS64 PCGS. CAC. From a low mintage of 1.2 million pieces, this attractive Choice specimen represents the first issue of the Type Two design. The design elements are sharply detailed in most areas, with just a touch of softness on the bison's shoulder. The well-preserved, lustrous surfaces show a few highlights of pale gold and ice-blue toning. NGC ID# 22R3, PCGS# 3923
- 3308 1913-S Type Two MS64+ PCGS. CAC. Warm golden toning graces the luminous satin luster of this high-end Choice 1913-S Type Two Buffalo nickel. Under magnification, abrasions are difficult to discern, although some microscopic pepper specks are visible on the reverse. The strike is slightly soft at the centers, possibly contributing to the seemingly conservative grade from PCGS. NGC ID# 22R3, PCGS# 3923
- 3309 1914/(3) FS-101 AU55 PCGS. A raised "bar" bookends the top of the 4 in the date. The so-called overdate, which commands many multiples of common 1914 prices in all grades. A mark-free and satiny stone-gray representative with well-struck borders and incompletely impressed centers. NGC ID# 22R4, PCGS# 147844 Base PCGS# 93924

- 3310 1914-S MS65 PCGS. This delightful Gem displays sharply detailed design elements throughout, with well-preserved, lustrous surfaces that exhibit delicate hints of lime-green and ice-blue toning. PCGS has graded 43 numerically finer examples (1/18). NGC ID# 22R6, PCGS# 3926
- 3311 1915-D MS65 PCGS. This impressive Gem Buffalo nickel displays well-detailed design elements, with just a touch of the usual softness on the bison's shoulder. The well-preserved, textured surfaces show subtle hints of lavender and greenish-gold toning, with satiny mint luster throughout. PCGS has graded 45 numerically finer examples (1/18). NGC ID# 22R8, PCGS# 3928
- 3312 1915-S MS64 PCGS. A pleasing Choice example of this early-series Buffalo nickel, with well-detailed design elements and lightly marked, lustrous surfaces that show subtle hints of pale gold and ice-blue toning. From a mintage of 1.5 million pieces.
 From The Jamestown Collection, Part II. NGC ID# 22R9, PCGS# 3929
- 3313 1918-S MS63 PCGS. An impressive Select specimen of this popular issue, with satiny mint luster on both sides and well-detailed design elements that show just a trace of softness on the hair above the ear and the bison's shoulder. NGC ID# 22RK, PCGS# 3940
- 3314 1918-S MS63 ANACS. This satiny, luminous 1918-S Buffalo nickel shows no distracting abrasions and has a hint of light golden toning. The centers are poorly struck, as often seen on this issue, and the die state is far advanced in addition to metal flowlines in the fields, a heavy die crack runs from the rim into the upper feather at 10 o'clock on the obverse. NGC ID# 22RK, PCGS# 3940
- 3315 1919-D MS64 PCGS. This attractive Choice Buffalo nickel exhibits well-detailed design elements that show just a touch of softness on the bison's shoulder. The well-preserved surfaces radiate satiny mint luster, under shades of pale gold and ice-blue toning. NGC ID# 22RM, PCGS# 3942
- 3316 1921 MS66 PCGS. CAC. Although the 1921 Buffalo nickel is moderately plentiful in MS66, CAC-approved coins are not. This piece displays glowing, frosty mint luster and an impressively sharp central strike. Ice-blue and champagne hues attractively drape each side. PCGS has seen 32 Superb Gems finer. CAC: 41 in 66, 3 finer (1/18). NGC ID# 22RT, PCGS# 3947
- 3317 1921 MS66 PCGS. CAC. Lovely quicksilver luster and solid definition are the prime attributes of this predominantly nickelgray example. Excellent preservation makes this a coin that should appeal to the date collector. NGC ID# 22RT, PCGS# 3947
- 3318 1925-D MS64+ PCGS. This champagne-toned, high-end near-Gem displays luminous frosty surfaces that are devoid of significant abrasions. Die fatigue produces metal flowlines in the fields, more prominently on the reverse. The usual high points and peripheral relief elements exhibit minor strike softness. Finer 1925-D nickels will be challenging to acquire. NGC ID# 22S3, PCGS# 3955
- 3319 1926 MS67 PCGS. This stunning Superb Gem exhibits sharply detailed design elements and impeccably preserved, lustrous surfaces. A few highlights of lime-green toning on the reverse accent the outstanding visual appeal. Population: 50 in 67 (3 in 67+), 0 finer (1/18). NGC ID# 22S5, PCGS# 3957
- 3320 1926-D MS64 PCGS. CAC. An impressive Choice specimen, with well-detailed design elements that exhibit just a touch of the typical softness on the hair above the braid and the bison's shoulder. A few hints of sea-green and ice-blue toning enhance the well-preserved lustrous surfaces. NGC ID# 22S6, PCGS# 3958
- 3321 1926-S AU53 PCGS. An impressive AU53 example of this low-mintage series key, with just a touch of wear on the well-detailed design elements and lightly abraded lavender-gray surfaces. From a mintage of 970,000 pieces. NGC ID# 22S7, PCGS# 3959

1927 Nickel, Untoned MS67 A Top-Grade Registry Coin

3322 1927 MS67 PCGS. Close study of this Superb Gem under a loupe finds no imperfections that would deny the lofty grade PCGS has assigned. Slight strike weakness is visible on the bison's shoulder and the hair above the Indian's braid, but otherwise this untoned and frosty coin is essentially flawless. Neither PCGS nor NGC has seen a finer example, and pieces in this grade are rare. Population: 18 in 67, 0 finer (1/18). NGC ID# 22S8, PCGS# 3960

1927-D Buffalo Nickel, MS65 Few High-Grade Examples to Meet Demand

3323 1927-D MS65 PCGS. This moderately scarce issue in high grades is subject to far greater demand than the available supply can meet given the popularity of the Buffalo nickel series. The obverse is well-defined, while softness occurs on the bison's head and shoulder. Satiny luster and glimpses of pale gold adorn clean surfaces. PCGS reports merely seven finer submissions (1/18). NGC ID# 22S9, PCGS# 3961

1927-D Nickel, Lightly Toned MS65

- 3324 1927-D MS65 PCGS Secure. The 1927-D Buffalo nickel is scarce in MS65 and rare finer. This example displays softly frosted mint luster and unabraded, champagne-toned surfaces. The centers show moderate strike softness, as is normal for Denver issues of the 1920s. Population: 95 in 65 (12 in 65+), 7 finer (1/18). NGC ID# 22S9, PCGS# 3961
- 3325 1929 MS66+ PCGS. CAC. Hints of champagne toning accent the satiny surfaces of this high-end Premium Gem, a coin struck from fresh dies with no metal flowlines in the fields. Slight strike weakness on the bison's shoulder and the hair above the Indian's braid is typical of Buffalo nickels from this period. NGC ID# 22SE, PCGS# 3966

- 3326 1929 MS66+ PCGS. CAC. Delicate shades of ice-blue and pale gold toning highlight the virtually pristine surfaces of this Plusgraded Premium Gem, with vibrant mint luster on both sides and sharply detailed design elements throughout. PCGS has graded 11 numerically finer examples (1/18). NGC ID# 22SE, PCGS# 3966
- 3327 1929-D MS66 PCGS. Pastel shades of rainbow toning grace the frosty surfaces of this Premium Gem example, while a lack abrasions adds to the eye appeal. Moderate strike weakness on each side is typical of the issue. The 1929-D is scarce in this grade and rarely offered finer. Population: 68 in 66 (5 in 66+), 3 finer (1/18). NGC ID# 22SF, PCGS# 3967
- 3328 1929-D MS66 PCGS. A conditionally scarce Premium Gem example of this otherwise plentiful Denver issue, showing champagne-tinted satin luster and an impressively sharp strike. Struck from fresh dies with no metal flowlines or other signs of die deterioration. Population: 68 in 66 (5 in 66+), 3 finer (1/18). NGC ID# 22SF, PCGS# 3967
- 3329 1935 MS67 PCGS. CAC. The champagne surfaces yield undertones of rose, green, and blue, complementing satiny luster and well-struck design elements. There are no mentionable abrasions. The 1935 is occasionally available in this grade, but PCGS has seen only a single numerically finer example; none are finer at CAC. CAC: 35 in 67, 0 finer (1/18). NGC ID# 22SN, PCGS# 3974
- 3330 1935 Doubled Die Reverse, FS-801, AU58 ANACS. FIVE CENTS and E PLURIBUS UNUM are nicely die doubled. A *Guide Book* variety, described in *Cherrypickers*' as "extremely rare in any grade above Very Fine." Lightly toned and lustrous with pleasing surfaces. The strike is generally good, though the 19 and the hair above the braid are indistinct. NGC ID# 22SN, PCGS# 38465 Base PCGS# 93974

1936 Nickel, Luminous MS66 FS-102 Doubled Die Obverse Variety

- 3331 1936 Doubled Die Obverse, FS-102, MS66 PCGS. PCGS designates this piece as FS-102, a minor doubled die obverse variety. Cherrypickers' notes: "This variety is identified by extra strong thickness on LIBERTY and the date." Under a loupe, the 19 in the date appear unusually thick on the present coin, although the effect is less noticeable on LIBERTY. PCGS has attributed 15 examples of FS-102, with this piece and one other MS66 tied as the finest (1/18). The coin is brilliant and luminous, struck from fresh dies with no unsightly metal flowlines. Moderate weakness is seen at the centers as usual. PCGS# 569455 Base PCGS# 3977
- 3332 1936-S MS67 PCGS. Frosty nickel-gray luster and virtually full design definition are the prime attributes of this Superb Gem 1936-S nickel that exhibits wisps of champagne toning. This piece is tied for the finest numerically certified. Population: 92 in 67 (5 in 67+), 0 finer (1/18). NGC ID# 22SU, PCGS# 3979
- 3333 1937-D Three-Legged, FS-901, AU58+ PCGS. Splendid firered, apple-green, and lemon-gold patina endow this practically Uncirculated key date nickel. No marks are more than incidental, and the bison's hip shows only a hint of wear. A colorful example of the famous *Guide Book* variety. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1937-D Three-Legged Nickel, MS62 Famous Lapped Die Mint Error

- 3334 1937-D Three-Legged, FS-901, MS62 PCGS. The famous *Guide Book* variety with a missing front foreleg on the bison, the result of overzealous lapping of the reverse die at the Denver Mint. Breen (1988) named a "Mr. Young" as the offending Mint worker but did not provide a source. This is a pleasing stone-gray example with good luster, minor carbon, and no apparent marks. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982
- 3335 1938-D/D MS67+ PCGS. CAC. The mintmark is repunched on the left side. This is an interesting variety that is relatively elusive in Superb Gem condition and rare so fine with a CAC endorsement. This Plus-graded coin displays bold detail and satiny luster, cast in olive-gold, lavender, and ice-blue toning. NGC ID# 22T2, PCGS# 93984 Base PCGS# 3984

PROOF BUFFALO NICKELS

1913 Type One Buffalo Nickel, PR66 Delightful Toning, Luminous Surfaces

3336 1913 Type One PR66 PCGS. CAC. This beautifully preserved CAC-approved Type One proof displays needle-sharp detail and luminous, pastel-toned surfaces. Although not rare in Premium Gem condition, the Type One matte proof is seldom offered with as much eye appeal as the present coin displays. The CAC green label is scarce on this issue in the top grades.

Ex: Samuel W. Wolfson Collection, Part II (Stack's, 5/1963), lot 364.

From The Property of a Lady. NGC ID# 278R, PCGS# 3988

3337 1913 Type Two PR65 PCGS. From a matte proof mintage of 1,514 pieces, this delightful Gem represents the Type Two design, with the denomination recessed in the exergue to reduce wear on the letters. The design elements are sharply detailed throughout and the well-preserved, lustrous surfaces show subtle highlights of lime-green and ice-blue toning.

From The Property of a Lady. NGC ID# 278S, PCGS# 3990

1914 Nickel, CAC-Approved PR66+ Lightly Toned Matte Proof Type Coin

3338 1914 PR66+ PCGS. CAC. This sharp, high-end Premium Gem proof displays uniformly golden toning, with subtle iridescence visible throughout when viewed beneath a loupe. The 1914 matte proof is available in this grade, but CAC-approved coins such as the present are in the minority. Suitable for date set purposes or as a matte proof type coin.

From The Property of a Lady. NGC ID# 278T, PCGS# 3991

3339 1915 PR66 PCGS. From a low mintage of 1,050 pieces, this Premium Gem proof exhibits razor-sharp definition on all design elements, with well-preserved, textured matte surfaces and satiny mint luster on both sides. Low-intensity shades of greenish-gold, lavender, and ice-blue toning enhance the outstanding eye appeal. Ex: Samuel W. Wolfson Collection, Part II (Stack's, 5/1963), lot 372, flip accompanies the lot.

From The Property of a Lady. NGC ID# 278U, PCGS# 3992

- 3340 1936 Type Two Brilliant Finish PR65 PCGS. Razor-sharp definition is evident on all design elements and the well-preserved surfaces of this attractive Gem show the brilliant finish that characterizes the Type Two proofs. A well-preserved specimen with just a whiff of lime-green patina at selected angles.

 From The Sea Cliff Collection. NGC ID# 278Y, PCGS# 3995
- 3341 1937 PR66 PCGS. CAC. The design elements of this delightful Premium Gem are fully struck, and the deeply mirrored fields are virtually flawless. The surfaces are essentially brilliant, with just the lightest hints of pale lime-green toning.
 From The Property of a Lady. NGC ID# 278Z, PCGS# 3996
- 3342 1937 PR66 PCGS. CAC. As expected, this Premium Gem proof exhibits sharply detailed design elements throughout, and the fields are brightly reflective. The well-preserved surfaces show just a hint of lime-green toning and eye appeal is outstanding. NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

1940-S Nickel, MS67+ Full Steps A Top-Graded Example at Both Services

3343 1940-S MS67+ Full Steps PCGS. This is one of a handful of top-graded, fully struck 1940-S nickels — amazing considering the lofty production of nearly 40 million coins. Light gold and powder-blue tones gently accent largely brilliant, exceptionally clean surfaces. A single tick appears in the upper-left obverse field. Population: 48 in 67 (4 in 67+) Full Steps, 0 finer (1/18). NGC ID# 22TF, PCGS# 84009

3344 1942-S MS67+ Full Steps PCGS. This frosty, golden-toned Registry coin is among the finest 1942-S nickels certified. The strike is full, and neither side exhibits a single noteworthy abrasion. A thin die crack bisects the reverse from 12 to 6 o'clock, appearing like a lightening bolt between the upper rim and the dome of Monticello. Population: 56 in 67 (6 in 67+) Full Steps, 0 finer (1/18). NGC ID# 22TN, PCGS# 84017

1949-D Nickel, MS67 Full Steps Magnificent Multicolor Tones

- 3345 1949-D MS67 Full Steps PCGS. This MS67 Full Steps nickel stands atop the certified populations at both services, tied with seven other coins at PCGS and four more at NGC (1/18). The hallmark is undoubtedly the magnificent multicolor toning that covers each side in shades of pastel blue, green, yellow, pink, violet, and orange. There are a couple of small ticks on the portrait, but the only obvious mark appears in the field above Monticello. NGC ID# 22UC, PCGS# 84038
- 3346 1952-D MS67 Five Full Steps NGC. Perhaps as few as 1 in 20 1952-D nickels show Five Full Steps, and only a tiny fraction of those qualify for the Superb Gem grade by either service. This lustrous and frosted example is sharply struck at the centers with a mark-free obverse and only a few tiny ticks on Monticello. Gleaming iridescence combines shades of ice-blue and champagnegold for terrific eye appeal. Census: 4 in 67 Five Full Steps, 0 finer (10/17). NGC ID# 22UL, PCGS# 84047

PROOF JEFFERSON NICKEL

3347 1940 Reverse of 1938, FS-901, PR67 PCGS. Indistinct steps on Monticello identify the scarce Reverse of 1938 variety, which comprises only a small portion of the proof 1940 nickels known. This Superb Gem is high-end for the variety, showing nearly pristine surfaces and glimmering fields that yield lavender and golden toning. Population: 70 in 67 (2 in 67+), 2 finer (1/18). NGC ID# 279Y, PCGS# 38540 Base PCGS# 94177

EARLY HALF DIMES

- 3348 1795 V-3, LM-4, R.6 Scratches NGC Details. XF. Each side displays several very light hair-thin marks, perhaps judged too severely by NGC. This rare variety Flowing Hair half dime has impressive sharpness and good eye appeal. Lightly toned centers cede to charcoal-tinted margins.

 From The Sea Cliff Collection.
- 3349 1795 V-5, LM-8, R.3, Fine 12 PCGS. CAC. An unblemished charcoal-gray Flowing Hair type coin. The familiar radial crack through the Y in LIBERTY to the nose is apparent here, though scrutiny beneath a glass is required. Evenly defined throughout, and a coin that will please many observers.

From The Bayside Collection. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

1795 V-5, LM-8 Half Dime, VF25 Evenly Defined

3350 1795 V-5, LM-8, R.3, VF25 PCGS. A charming cream-gray Flowing Hair half dime. All legends are sharp, and plentiful hair detail remains. A lens reveals faint marks above the ear and below the jaw and wreath stems. The lines within the eagle's wings are adjustment marks, as made. Struck from rotated dies.

From The Bayside Collection. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

1795 Flowing Hair Half Dime, VF25 Attractive V-5, LM-8 Example

3351 1795 V-5, LM-8, R.3, VF25 PCGS. The usual die crack through the Y in LIBERTY toward Liberty's nose is weak on this piece due to wear, but it is visible with a loupe. The coin displays an even strike and original pewter-gray patina with deep russet and olive-gold margins. Other than a small mark on Liberty's cheek near the ear, the coin is problem-free and appealing.

From The Property of a Lady. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

1800 V-1, LM-1 Half Dime, VF25 Highly Appealing for the Grade

1800 V-1, LM-1, R.3, VF25 PCGS. CAC. Stars 1 and 9 are close to the curl and Y, respectively. TES in STATES is low relative to the clouds. An early die state example without the cud that later forms below the date. Though circulated, the devices show partial curl and feather detail, and the shield lines are strong. Well-centered with varying shades of steel-gray patina that is both overtly original and most appealing. NGC ID# 2326, PCGS# 38601 Base PCGS# 4264

1803 Draped Bust Half Dime, VF25 Large 8, V-1, LM-2

3353 1803 Large 8, V-1, LM-2, R.4, VF25 PCGS. Rich rose-red, apple-green, sun-gold, and stone-gray toning blanket this early half dime. Two small digs are noted below the hair ribbon and above the beak, and a thin mark crosses the M in AMERICA, but no other detractions are present. The Heraldic Eagle type is very scarce, and underappreciated relative to its Flowing Hair and Small Eagle predecessors.

From The Bayside Collection. NGC ID# 2329, PCGS# 38608 Base PCGS# 4269

BUST HALF DIMES

- 3354 1832 V-5, LM-8.4, R.3, MS65 PCGS. A gorgeous and brilliant Gem. The lustrous surfaces are well struck and uncommonly free from contact. Worthy of the finest specialized collection. A late die state with the field buckling near the eagle's beak. We have not seen the final die state with a filled N in UNITED, though that letter shows a small chip above the diagonal. PCGS# 38673 Base PCGS# 4279
- 3355 1834 V-1, LM-2, R.1, MS64+ PCGS. Rich apple-green, autumnbrown, and lavender toning embraces this sharply struck near-Gem. The lustrous fields are smooth save for a single slender mark beneath the beak. LM-2 is identified by the die erosion near the profile. Also, the F in OF is entered low and has a repunched base. NGC ID# 232G, PCGS# 38702 Base PCGS# 4281

SEATED HALF DIMES

3356 1837 No Stars, Large Date (Curl Top 1) MS65 PCGS. CAC. The curled top on the 1 immediately identifies this as a Large Date representative, the more plentiful of the two 1837 Seated half dime types in high grade and ideal for type purposes. The strike is sharp, and satiny luster displays olive-gold and amber toning over both sides, which masks a few unimportant surface grazes. Finer examples of the No Stars type are rare, and CAC-approved coins are seldom seen even in this grade. Population: 69 in 65, 36 finer. CAC: 22 in 65, 21 finer (12/17). NGC ID# 232M, PCGS# 4311

1837 No Stars Seated Half Dime, MS66 Beautiful Luster and Detail

- 3357 1837 No Stars, Large Date (Curl Top 1) MS66 NGC. The Large Date 1837 Seated half dime is the ideal No Stars type coin due to its moderate availability in high grade. This lustrous Premium Gem example showcases Gobrecht's seated figure in boldly rendered, unabraded fashion amid frosty surfaces that glow with the slightest hint of pale golden toning. An immensely attractive example of this sought-after type. Census: 80 in 66 (1 in 66+, 1 in 66★), 13 finer (1/18). NGC ID# 232M, PCGS# 4311
- 3358 1842 MS66 NGC. The conditionally elusive 1842 half dime is rarely encountered above MS65 grade. NGC and PCGS have combined to certify just 17 examples in MS66 and only finer example at each service. This Premium Gem has a high degree of luster beneath intense gold and sea-green toning with exquisite design definition. Census: 8 in 66, 1 finer (1/18). NGC ID# 2332, PCGS# 4330
- 3359 1842 MS66 PCGS. CAC. This attractively toned, satiny Premium Gem displays sharp design elements and original multicolor border toning around light golden interiors. The 1842 half dime is available through MS64 but is scarce in MS65 and rare at the present grade level. Only two finer coins are known. Population: 9 in 66 (2 in 66+), 1 finer. CAC: 9 in 66, 1 finer (1/18). NGC ID# 2332, PCGS# 4330
- 3360 1853 Arrows MS66+ PCGS. First year of the three-year design type that features arrows to the left and right of the date, signifying the slight weight reduction that occurred in 1853 to promote production and circulation of the subordinate silver coinage. This Premium Gem exhibits delicate gold toning over brilliant satin luster. Population: 60 in 66 (13 in 66+), 11 finer (1/18). NGC ID# 233Y, PCGS# 4356
- 3361 1858-O MS66 PCGS. A splendid Premium Gem representing the Stars Obverse half dime coinage of the New Orleans Mint. This piece features a bold strike with full luster shining through the rich gold and iridescent toning. Population: 9 in 66 (2 in 66+), 1 finer (1/18). NGC ID# 233V, PCGS# 4369
- 3362 1860 MS67 PCGS. The date is boldly repunched on this variety. A dash of gold toning appears on the shield of this otherwise brilliant and untoned first-year type issue featuring the statutory legend on the obverse. Both sides have frosty luster and excellent design definition. Population: 52 in 67 (8 in 67+), 4 finer (1/18). NGC ID# 2347, PCGS# 4377
- 3363 1861 MS66 PCGS. Softly struck on the upper-left reverse wreath, with glowing satiny luster, a seemingly unmarked reverse, and a few tiny nicks in the obverse fields. This is a lightly toned and highly attractive Premium Gem Seated half dime, suitable for type or date representation. The 1861 is scarce in this lofty grade. Population: 24 in 66 (2 in 66+), 3 finer (1/18). NGC ID# 2349, PCGS# 4379
- 3364 1871-S MS65 PCGS. CAC. From a mintage of 161,000 pieces, the 1871-S half dime is rare in high grade. This sharply detailed Gem shows light clash marks, but no mentionable distractions on either side. The surfaces are lustrous and lightly toned. Population: 6 in 65, 6 finer. CAC: 4 in 65, 4 finer (1/18). NGC ID# 234W, PCGS# 4399
- 3365 1873-S MS66 PCGS. Both sides of this Premium Gem final-year half dime from the San Francisco Mint exhibit brilliant silver luster beneath champagne, gold, and blue toning. Population: 7 in 66, 2 finer (1/18). NGC ID# 2354, PCGS# 4405

PROOF SEATED HALF DIMES

- 3366 1858 PR63 NGC. CAC. Splashes of forest-green and pastel purple patina enrich this precisely struck and pleasing specimen. The Guide Book proof mintage is only 300 pieces. Certified in a pre-hologram holder. CAC: 1 in 63, 14 finer (1/18). NGC ID# 235N, PCGS# 4437
- 3367 1859 PR64 Cameo PCGS. Flynn-RPD-001. The date is clearly repunched south, strongest on the 1 and 9. The popular Paquet obverse with hollow-centered stars and a different rendition of the seated Liberty. This design was only used on the 1859 regular issue, along with the 1859 and 1860 transitional patterns. Brilliant, flashy, and sharply struck.

From The Sea Cliff Collection. NGC ID# 23CD, PCGS# 84438

- 3368 1867 PR65 Cameo PCGS. CAC. This glittering Gem Cameo proof half dime was coined a time of minimal coinage production during the post-Civil War years. Fully brilliant and untoned, this example features a full strike and impressive field-to-device contrast. Population: 12 in 65 (3 in 65+) Cameo, 12 finer. CAC: 8 in 65, 8 finer (1/18). NGC ID# 2364, PCGS# 84450
- 3369 1870 PR66 PCGS. Attractive original toning in shades of rose, gold, sea-green, and russet-gray complements the mirrored fields and sharp design elements of this Premium Gem proof. The 1870 is scarce in this condition and rarely found finer, even when Cameo coins are considered. Population: 18 in 66 (2 in 66+), 15 finer (including Cameos) (12/17).

From The Jamestown Collection, Part II. NGC ID# 2367, PCGS# 4453

3370 1873 PR66 PCGS. CAC. The final year of issue for the half dime denomination that began in 1792 as the first coinage struck in Philadelphia, although those first coins were struck outside of the Mint that was not yet ready for occupancy. Returning to 1873, the Philadelphia Mint coined 600 proof half dimes. This Premium Gem has lovely emerald and gold toning over lightly mirrored fields and strong design details. Population: 20 in 66 (2 in 66+), 7 finer. CAC: 9 in 66, 3 finer (1/18). NGC ID# 236A, PCGS# 4456

EARLY DIMES

1796 JR-1 Draped Bust Dime, Good 6 Problem-Free, Even Wear

- 3371 1796 JR-1, R.3, Good 6 PCGS. An unblemished cream-gray example with clear legends and mostly well-defined rims. JR-1 can usually be attributed upon first sight, due to the cud below star 1 found on most examples. The present piece exhibits the cud, which is larger than usual and encompasses three of the six radials. The intersecting die cracks below the right (facing) wing are faint but apparent. NGC ID# 236B, PCGS# 38742 Base PCGS# 4461
- 3372 1796 JR-3, R.5 Cleaned PCGS Genuine. VG Details. Die cracks through the first T in STATES are characteristic of this better variety first-year dime. The obverse is stone-white and the reverse displays a substantial blush of ocean-blue. A slender flan flaw (as made) affects portions of the N in UNITED.

- 3373 1796 JR-5, R.5 Repaired PCGS Genuine. VG Details. The bisecting die crack from the rim at R in LIBERTY to the rim between the date and star 15 identifies the JR-5 variety, the rarest variety of 1796. This well-worn piece shows VG sharpness on most design elements, but some smoothing is evident on the central obverse. The reverse shows some vertical planchet flaws in the upper field.
- 3374 1796 JR-6, R.3, Fair 2 PCGS. A horizontal die break through the 7 in the date identifies the JR-6 obverse, while most other variety diagnostics are worn away or faint. This coin grades Fair 2 by PCGS' standards, with a clear date and mostly outlined devices, but lacking definition around the margins. Light olive-gold toning blankets each side, and numerous small abrasions are seen with a loupe. NGC ID# 236B, PCGS# 38747 Base PCGS# 4461

1798/97 JR-1 Dime, VF25 16 Stars Reverse

3375 1798/97 16 Stars Reverse, JR-1, R.3, VF25 NGC. Ex: Hilt Collection. An attractive stone-gray representative with an exceptionally bold reverse for the designated grade. The wings are well-defined and all letters in E PLURIBUS UNUM are clear. No marks are worthy of mention. Each of the four 1798-dated die marriages receives a separate *Guide Book* listing, due to differences in the date logotype or reverse star count.

Ex: Central States Signature (Heritage, 4/2015), lot 3802.

From The Bayside Collection. NGC ID# 236F, PCGS# 38750 Base PCGS# 4468

3376 1802 JR-2, R.5 — Repaired — PCGS Genuine. VF Details. The tip of the highest curl is under the center of B in LIBERTY and star 8 nearly touches Y on the obverse, while the second T in STATES is over the left quarter of cloud 3 on the reverse, identifying the popular JR-2 variety. This lightly worn and lightly abraded specimen shows some roughness on Liberty's neck and in the fields on both sides.

1802 JR-4 Draped Bust Dime, VF30 Scarce in All Grades

3377 1802 JR-4, R.4, VF30 PCGS. Although 1802 dimes are seen from time to time, the date is scarce in all grades. The Mint delivered 10,975 dimes on July 22, the only delivery of the year, although additional examples were likely struck in 1803. With about 125 to 150 pieces known, the JR-4 is the most plentiful variety of all 1802-dated dimes. This pleasing piece has light silver devices with gray and iridescent toning in the fields, especially attractive on the reverse. None of the scattered surface marks are consequential. Ex: FUN Signature (Heritage, 1/2013), lot 3924.

From The Bayside Collection. NGC ID# 236K, PCGS# 38761 Base PCGS# 4472 3378 1805 4 Berries, JR-2, R.2, Fine 15 NGC. An evenly circulated dove-gray Large Eagle type coin. Free from detracting abrasions, and much hair and plumage definition is apparent. The usual die state with clash marks below the chin and above the date, and cracks through the ERT in LIBERTY.

From The Sea Cliff Collection. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

3379 1807 JR-1, R.2, VF25 PCGS. CAC. This piece appears to be an early die state without the usual extensive die wear seen on the vast majority of 1807 dimes. Both sides exhibit a mix of pewter-gray and light silver-gray with trivial, grade-consistent marks. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

BUST DIMES

1814 JR-3 Capped Bust Dime, MS64 Large Date, Late Die State

3380 1814 Large Date, JR-3, R.2, MS64 PCGS. A lustrous stone-white near-Gem. The surfaces appear unabraded, though we note a small flan flaw below Liberty's jaw. An interesting die variety, JR-3 features myriad clash marks near the profile and intersecting die cracks within the shield. The dies were out of alignment, which caused a sharp strike on the left sides and a soft impression on the right sides. NGC ID# 236W, PCGS# 38775 Base PCGS# 4488

1827 Bust Dime, MS64 JR-11, Pointed Top 1

- 3381 1827 Pointed Top 1, JR-11, R.2, MS64 PCGS. Star 13 is repunched, diagnostic for this conditionally scarce die marriage. The coruscating surfaces appear void of abrasions, though a mintmade lint mark is west of star 11. The centers show striking incompleteness, but the borders are bold and display attractive golden-brown and navy-blue toning. NGC ID# 2375, PCGS# 38821 Base PCGS# 4504
- 3382 1829 Medium 10C, JR-11, R.4, MS62 PCGS. The design elements of this attractive MS62 specimen are sharply detailed and the surfaces are blanketed in shades of powder-blue, sea-green, and lavender toning, with traces of prooflike reflectivity underneath. The JR-11 variety is easily located in lower circulated grades, but Mint State examples are elusive. PCGS# 38837 Base PCGS# 84511
- 3383 1829 Medium 10C, JR-12, R.3, MS62 PCGS. Although not a great rarity like the Curl Base 2 variety, the Medium 10C is scarce overall and rare in Mint State. This practically unabraded creamgray representative shows incompleteness of impression on the eagle's claws and Liberty's forehead. NGC ID# 2378, PCGS# 38838 Base PCGS# 84511

- 3384 1830/29 JR-5, FS-301, R.2, MS63 NGC. This piece is in an advanced die state where the overdate feature is weak, although all other diagnostics match the JR-5 die pairing. The stars are well-struck, but the eagle's neck shows the usual softness of the variety. Amber-gold and russet toning is deeper on the reverse than the obverse, and both sides are satiny. Light contact marks account for the grade. NGC ID# 4FA7, PCGS# 38848 Base PCGS# 4519
- 3385 1830 Medium 10C, JR-7, R.4, MS63 NGC. A die break from Liberty's hair curls toward star 12 aids in identification of this relatively plentiful variety, which is conditionally elusive in high grade. The present Select example displays slight softness on the fletchings and the eagle's neck but is otherwise well-struck. Mottled aquamarine and golden-russet toning appears on each side with a few minor abrasions. PCGS# 38844 Base PCGS# 4516
- 3386 1831 JR-3, R.1, MS62 PCGS. CAC. A nicely struck and coruscating Capped Bust type coin. Chestnut-gold toning accompanies design recesses. No marks are consequential. Die cracks between the 31 in the date and the ER in AMERICA confirm the variety. Encapsulated in an old green label holder.

 From The Bayside Collection. NGC ID# 237B, PCGS# 38851 Base PCGS# 4520
- 3387 1835 JR-1, R.1, MS63 PCGS. Ex: Pittman. A beautifully patinated Select example. Sea-green, lavender, violet-red, and peach-gold patina consumes both sides. A slender vertical line on the cheek and a field mark near star 11 are all that deny a finer grade. Ex: Barney Bluestone, 11/1943; John Jay Pittman Collection, Part One (David Akers, 10/1997), lot 573, which realized \$1,210. NGC ID# 237F, PCGS# 38879 Base PCGS# 4527
- 3388 1835 JR-6, R.4, MS62 PCGS. Among the scarcest die marriages for the date, JR-6 is seldom seen in Mint State. This example is crisply struck save for blending on the eagle's claws. The battleshipgray surfaces are satiny and devoid of detractions. NGC ID# 237F, PCGS# 38884 Base PCGS# 4527

1836 JR-2 Capped Bust Dime, MS64 Satiny Type Coin With Original Toning

1836 JR-2, R.2, MS64 NGC. The 1836 Capped Bust dime is popular among type collectors. Examples are somewhat scarce in MS64, and finer pieces are rarely offered. This near-Gem displays a bold strike and satiny mint luster with no distracting abrasions. Lavender-gray margins surround sea-green interiors. Census (all varieties included): 33 in 64 (2 in 64+), 12 finer (12/17). From The Bayside Collection. NGC ID# 237G, PCGS# 38889 Base PCGS# 4528

1837 JR-2 Bust Dime, MS64 Scarce CAC Seal

3390 1837 JR-2, R.3, MS64 NGC. CAC. A small die chip atop the period after 10 C is the attribution marker for the moderately scarce JR-2. A fully struck and remarkably smooth near-Gem. Light wheat-gold and silver-gray toning contributes further to the eye appeal. For all four 1837 die varieties combined, CAC: 3 in 64, 10 finer (1/18). From The Bayside Collection. NGC ID# AS2U, PCGS# 38892 Base PCGS# 4529

SEATED DIMES

- 3391 1852 F-112, R.3, MS65 NGC. An exceptional Gem example of this variety that displays two distinctive rim cuds outside the denticles over TAT of STATES. Both dies have additional die cracks, although this example is a fairly early die state of the Fortin-112 die marriage. Both sides have an adequate strike with frosty silver luster and splashes of gold toning. Census: 12 in 65, 7 finer (1/18). PCGS# 537930 Base PCGS# 4597
- 3392 1853-O Arrows, F-101, R.3, AU55 PCGS. This satiny, goldentoned Choice AU example displays little actual wear, although some characteristic strike weakness is seen on the upper part of Liberty's figure. The 1853-O Arrows dime is scarce in all grades and rare at the AU level. Few Mint State pieces are known. Population: 12 in 55, 22 finer (1/18). PCGS# 537998 Base PCGS# 4604

1857 F-102 Seated Liberty Dime, MS66 Outstanding Preservation

- 3393 1857 F-102, R.3, MS66 PCGS. Light butter-gold toning accompanies this lustrous and splendidly preserved Premium Gem. The overall strike is good, although Liberty's curls and portions of the dentils are incomplete. The 1857 is a plentiful issue, but examples of the present superlative quality are undeniably rare. Population: 7 in 66, 1 finer (1/18). PCGS# 538091 Base PCGS# 4614
- 3394 1857-O Medium O, F-107a, R.3, MS65 PCGS. The sole Medium O die pair for the date. The usual die state with dual cracks from the obverse rim near 8 o'clock. A lustrous and intricately struck Gem with a well-preserved obverse and a few wispy grazes on the reverse field. PCGS# 538118 Base PCGS# 4615

1866 F-102b Dime, MS64+ Low-Mintage Postwar Rarity

3395 1866 F-102b, R.6, MS64+ NGC. Silver coin was still hoarded after the Civil War, and mintages of dimes at Philadelphia fell to token levels. The 1866 has a production of just 8,000 pieces. This is a brilliant and semiprooflike near-Gem with exemplary surfaces and impressive eye appeal. Fortin-102b is the clashed die state of F-102a, which in turn is the business version of the proof-only F-102. F-102, F-102a, and F-102b are all from the same die pair. PCGS# 538214 Base PCGS# 4643

1873 Open 3 Dime, MS64 No Arrows, F-102a

- 3396 1873 Open 3, No Arrows, F-102a, R.3, MS64 PCGS. A sharp and lustrous Choice dime. The lightly toned surfaces display only unimportant contact. The 1873 Open 3, No Arrows dime is the missing link between the Closed 3 and the Arrows varieties. The traditional mintage is only 60,000 pieces, and near-Gems are undeniably rare. Population: 4 in 64, 1 finer (1/18). PCGS# 538297 Base PCGS# 4660
- 3397 1876 Type One Reverse, F-113, R.2, MS66+ PCGS. Lustrous and brilliant with a good strike and exemplary surfaces. Attribution is based on the date location. Characteristics of the present piece, such as clash marks on both sides, a light horizontal die scratch on the gown over the legs, and specific die chips on the corn husks, are absent from the online Fortin reference. PCGS# 538481 Base PCGS# 4679
- 3398 1876-CC MS66 PCGS. The 1876-CC is a plentiful Carson City issue, although Premium Gem examples are conditionally scarce. This piece displays bold detail and unabraded satin luster. Large areas of blue-green and lavender-gold toning appear on each side. Finer representatives are rarely offered. Population: 21 in 66, 4 finer (1/18). NGC ID# 23AJ, PCGS# 4680

PROOF SEATED DIMES

3399 1858 F-101, R.5, PR63 PCGS. CAC. Although close to brilliant, this needle-sharp Select specimen displays occasional blushes of light tan-brown toning. The strike is bold and the fields are flashy. The proof mintage is unrecorded but estimated at 300+ pieces. Housed in a green label holder. NGC ID# 23CC, PCGS# 538998 Base PCGS# 4747

3400 1858 F-101, R.5, PR64 PCGS. A brilliant and boldly struck specimen. The reflective fields are void of distractions. 1858 was the first year that proofs were sold to the general public, and the mintage was considerably less than subsequent years, estimated at 300 pieces.

From The Sea Cliff Collection. NGC ID# 23CC, PCGS# 538998 Base PCGS# 4747

1859 F-102 Dime, PR65 Scarce Early Proof Date

3401 1859 F-102, R.5, PR65 PCGS. CAC. The number of proof dimes struck in 1859 amounted to 800 pieces. Many were melted as unsold or spent. Enough survive to the present day, however, to meet collector demand, especially through near-Gem. This is significant because the relatively low mintage of the circulation strikes, 429,000 pieces, makes locating higher-graded Mint State examples difficult. Bluish-green patination dominates the obverse of this Gem proof, accented with splashes of russet. A melange of golden-tan, purple, russet, and bluish-green cascades over the reverse. The design elements are sharply struck throughout. The pleasing eye appeal is appropriately recognized by CAC. NGC ID# 23CD, PCGS# 539006 Base PCGS# 4748

1860 Seated Dime, PR66 Doubled Die Reverse, Gold and Rose Patina

3402 1860 Doubled Die Reverse, F-101, R.3, PR66 PCGS. CAC. A 13-cent proofing fee was introduced in 1860, resulting in the sale of fewer proof sets that year. While the reported mintage was 1,000 pieces, it is likely many were melted. Gold and rose patina blankets this original Premium Gem dime, covering what few marks prevent an even higher grade. Population: 17 in 66, 7 finer. CAC: 6 in 66, 1 finer (1/18). NGC ID# 23CI, PCGS# 539007 Base PCGS# 4753

3403 1864 PR65 Cameo PCGS. This impressive Gem Cameo proof survives from a low production of 470 proofs that occurred during the Civil War. A blazing beauty, this glittering dime exhibits brilliant and untoned silver surfaces with excellent field-to-device contrast. Population: 6 in 65 (1 in 65+) Cameo, 13 finer, including Deep Cameo proofs (1/18).

From The Property of a Lady. NGC ID# 23CM, PCGS# 84757

1864 Dime, PR67 Cameo Exceptional White-on-Black Contrast

3404 1864 PR67 Cameo NGC. F-101, R.4. An extraordinary specimen, one of a mere 470 pieces struck during this tumultuous year, with outstanding contrast between the frosted devices and deeply mirrored fields. Few proof 1864 dimes could possibly compete with this Superb, untoned representative. Census: 6 in 67 Cameo, 2 finer (1/18).

Ex: New York Signature (Heritage, 6/2005), lot 5379; Long Beach Signature (Heritage, 9/2005), lot 2393. NGC ID# 23CM, PCGS# 84757

1865 F-102 Dime, PR66 Low-Mintage Date

3405 1865 F-102, R.4, PR66 PCGS. CAC. Ocean-blue and straw-gold shades appear when this splendid Premium Gem is rotated beneath a light. The strike is razor-sharp, and the mirrored fields are void of detractions. Only 500 proofs were struck, and some may have been melted as unsold. CAC: 4 in 66, 1 finer (1/18). PCGS# 539014 Base PCGS# 4758

1874 Arrows Dime, PR65 Cameo Unlisted Proof Dies

3406 1874 Arrows PR65 Cameo PCGS. F-108. Although Fortin only lists a single proof die pair (F-101), this Gem Cameo proof is an exact match to the F-108 obverse by date and arrow placement, as well as the presence of a small die dot on Liberty's neck. Heavy die polishing leaves mirrored areas in the recesses of Liberty's gown, and the fields are deeply reflective. The coin is sharp and lightly toned with a champagne tint. Population: 6 in 65 Cameo, 2 finer (1/18). Ex: Central States Signature (Heritage, 4/2013), lot 1780. NGC ID# 23DJ, PCGS# 84770

3407 1874 Arrows, F-101, R.3, PR64 Cameo PCGS. The base of the 4 is lightly repunched. A scarce two-year proof subtype. This well-struck Choice Cameo proof is mostly snow-white but does display rich peach-gold, rose-red, and cobalt-blue toning across the margins. From The Sea Cliff Collection. NGC ID# 23DJ, PCGS# 539481 Base PCGS# 84770

1875 Dime, PR66 Cameo Seldom Offered This Fine

3408 1875 PR66 Cameo PCGS. CAC. F-101, R.3. The 1875 is a plentiful proof issue overall, although high-end Cameo examples are conditionally rare. This Premium Gem shows deeply reflective fields with obvious contrast against the frosted devices. The cameo effect is apparent even through original blue, mint-green, gold, and lavender toning on each side. Population: 11 in 66 Cameo, 1 finer. CAC: 6 in 66, 0 finer (1/18).

Ex: Rosemont Signature (Heritage, 8/2013), lot 3529. NGC ID# 23CY, PCGS# 84772

1875 Seated Dime, Toned PR67

3409 1875 F-101, R.3, PR67 NGC. This is a late die state, as die polishing has removed all signs of repunching on the date numerals and a faint crack is seen from the rim to the first T in STATES. The strike is bold and the fields display glassy reflectivity. Vivid teal and green-gold toning accents the borders, while soft lavender and golden hues encompass the central regions. This is a beautifully preserved example, from a mintage of only 700 pieces. Census: 5 in 67 (1 in 67 ★), 1 finer; 5 in 67 (1 in 67 ★) Cameo, 1 finer (1/18). Ex: ANA Signature (Heritage, 8/2014), lot 3490. NGC ID# 23CY, PCGS# 539035 Base PCGS# 4772

3410 1876 PR65 Cameo PCGS. F-101, R.4. Type One Reverse, usual for Centennial-year proofs. A practically brilliant Gem that demonstrates substantial white-on-black contrast, especially on the reverse. The upper left portion of the wreath is somewhat granular, as made, but the remainder of the coin is well struck.

From The Sea Cliff Collection. NGC ID# 23CZ, PCGS# 84773

1879 Dime, PR66 Ultra Cameo Rare at This Level

- 3411 1879 PR66 Ultra Cameo NGC. The 1879 had a slightly elevated proof mintage of 1,100 pieces, but circulation-strike production was down considerably to just 14,000 dimes. The scarcity of the latter, especially in high grades, means many collectors turn instead to proofs like the one here-offered. Contrast is dramatic, undiminished by the delicate layers of violet and rose patina that drape each side. Eye appeal and preservation are virtually unimprovable. Census: 1 in 66 Ultra Cameo, 1 finer (1/18). PCGS# 94776
- 3412 1880 PR66 Cameo PCGS. F-101, R.3. A trace of honey-gold toning adorns this unblemished and reflective example. The strike shows minor softness on the upper left portion of the wreath. A die chip on the M in DIME, and a defective second 8 in the date, are characteristic of the Fortin variety. Population: 17 in 66 Cameo, 9 finer as Cameo, 1 as 66 Deep Cameo (1/18). NGC ID# 23D5, PCGS# 84777
- 3413 1884 F-101, R.3, PR66 PCGS. A single die marriage is recorded as "Proof Dies" at www.seateddimevarieties.com. A lovely Premium Gem, this example has splashes of gold, blue, and iridescent toning over brilliant surfaces that exhibit considerable field-to-device contrast. Population: 38 in 66 (1 in 66+), 14 finer (1/18). NGC ID# 23D9, PCGS# 539055 Base PCGS# 4781

1884 Dime, PR67 Cameo Brilliant Unmarked Surfaces

3414 1884 PR67 Cameo PCGS. CAC. F-101, R.3. The sharply detailed design elements of this impressive Superb Gem exhibit a rich coat of mint frost that contrasts boldly with the deeply mirrored fields. The mostly brilliant surfaces are impeccably preserved and eye appeal is terrific. Vivid blue, violet, and gold border toning accents each side. Population: 23 in 67 (1 in 67+) Cameo, 1 finer. CAC: 21 in 67, 2 finer (1/18).

Ex: Long Beach Signature (Heritage, 6/2014), lot 3586. NGC ID# 23D9, PCGS# 84781

1885 Dime, Brilliant PR67 Hint of Field-Device Contrast

3415 1885 F-101, R.3, PR67 NGC. Superb Gem proof 1885 Seated Liberty dimes are scarce regardless of the level of cameo contrast. This glimmering example is essentially brilliant and shows a hint of contrast on both sides, although not quite strongly enough for Cameo designation from NGC. No surface blemishes are observed. Census: 11 in 67 (1 in 67 ★), 3 finer; 19 in 67 (1 in 67 ★, 1 in 67+) Cameo, 8 finer; 2 in 67 Ultra Cameo, 0 finer (1/18). NGC ID# 23DA, PCGS# 539056 Base PCGS# 4782

1885 Dime, PR67 Cameo Snow-White Surfaces

3416 1885 PR67 Cameo NGC. F-101, R.3. Consistent, thick frost throughout the motifs and legends confirms the Cameo designation of this splendid Superb Gem. Brilliant and beautiful with only a single minute imperfection, a fleck in the reverse field near the rim at 2 o'clock. Census: 19 in 67 Cameo (1 in 67+, 1 in 67★), 8 finer as Cameo, 2 as 67 Ultra Cameo (1/18).

From The Bayside Collection. NGC ID# 23DA, PCGS# 84782

3417 1888 PR66 Cameo PCGS. Considerable field-to-device contrast is present on this Premium Gem Cameo proof that has light peripheral gold toning on each side accompanying bold design definition. Population: 12 in 66 (1 in 66+) Cameo, 3 finer (1/18). NGC ID# 23DD, PCGS# 84785

BARBER DIMES

3418 1895-O VF35 PCGS. The 1895-O Barber dime claims a small mintage of just 440,000 pieces. This attractive Choice VF specimen shows some wear on the design elements, but LIBERTY remains plainly legible and the pleasing lavender-gray surfaces are lightly abraded. NGC ID# C4KL, PCGS# 4807

1897-O Dime, Brilliant MS66 Rare in This Lofty Grade

3419 1897-O MS66 NGC. This sharp Premium Gem is satiny and untoned, showing well-preserved surfaces and strong eye appeal. The 1897-O is conditionally scarce in Mint State and genuinely rare in MS65 or finer grades. This is true of many New Orleans issues from this period, which circulated extensively with little regard for the future numismatic importance of high-grade Barber dimes. NGC ID# 23E4, PCGS# 4813

1900-O Barber Dime, MS65 Conditionally Rare

3420 1900-O MS65 PCGS Secure. The 1900-O dime is a better date in Uncirculated condition and is rare at the Gem level. This frosty example displays original luster with delicate olive-gold toning. The strike is sharp, and only a few light marks are visible on Liberty's cheek beneath a loupe. Population: 14 in 65, 7 finer (1/18). NGC ID# 23ED, PCGS# 4822

1900-S Barber Dime, MS66 High Quality for the Grade and Issue

3421 1900-S MS66 PCGS. CAC. The 1900-S is a popular date among turn-of-the-century enthusiasts but is also conditionally rare in MS66 and nearly unknown numerically finer. Only a handful of CAC-approved coins exist in Premium Gem condition. This piece, showing silvery luster beneath mottled olive-gold toning, is sharp and frosty with no distracting abrasions. Population: 26 in 66 (4 in 66+), 1 finer. CAC: 8 in 66, 1 finer (1/18). NGC ID# 23EE, PCGS# 4823

1901-O Dime, MS65 Rarely Offered in High Grades

3422 1901-O MS65 PCGS. This moderately scarce Louisiana issue ranks within the top 20% of Barber dime rarities despite an innocuous mintage of 5.6 million coins. The impression is razorsharp, showing exceptional detail on the upper wreath elements in particular for a New Orleans coin. Dusky tan-gold and lavendergray hues grace predominantly silver surfaces. A set of reeding marks on the neck defines the grade. Population: 11 in 65, 8 finer (1/18). NGC ID# 23EG, PCGS# 4825

1902-O Barber Dime, MS65 Better New Orleans Issue

3423 1902-O MS65 PCGS. CAC. Dusky golden-gray toning in the centers gradually cedes to sun-gold and amber at the borders, revealing olive undertones here and there. This Gem is well-struck and free of even minor distractions. The 1902-O is scarce in all Mint State grades and decidedly rare in MS65. Only a half dozen finer pieces are reported by PCGS and NGC combined. Population: 11 in 65, 2 finer. CAC: 3 in 65, 2 finer (1/18). NGC ID# 23EK, PCGS# 4828

3424 1903 MS66 PCGS. With a mintage of 19.5 million pieces, the 1903 is generally available in whatever grade is desired. This is a multicolor Premium Gem whose vibrancy is enhanced by the underlying brightness of the mint luster. Population: 15 in 66 (1 in 66+), 2 finer (1/18). NGC ID# 23EM, PCGS# 4830

1905 Barber Dime, MS66+ Lightly Toned, Lustrous Example

3425 1905 MS66+ PCGS. CAC. The 1905 Barber dime is very rare in MS66 condition, and finer coins are virtually unobtainable. This delightful Plus-graded Premium Gem exhibits sharply detailed design elements throughout and the well-preserved surfaces are awash in vibrant mint luster. Low-intensity shades of lavender-gray and golden-tan toning add to the outstanding eye appeal. Population: 13 in 66 (3 in 66+), 4 finer. CAC: 7 in 66, 5 finer (1/18). NGC ID# 24FX, PCGS# 4835

1905-O Dime, Crisp MS66 Outstanding Visual Appeal

- 3426 1905-O MS66 PCGS. CAC. There are a handful of exceptional 1905-O dimes that survive in grades as high as MS67+. Although this Premium Gem falls shy of that in terms of its technical quality, it undoubtedly rivals the finest examples in terms of its visual appeal. Both sides are attractively toned in original blue and golden hues, save for the frosty central obverse. The devices are fully struck—a remarkable feat for a New Orleans coin. Population: 20 in 66, 6 finer. CAC: 5 in 66, 6 finer (1/18). NGC ID# 23EU, PCGS# 4836
- 3427 1908-S MS65 PCGS. Like many Barber dime issues, the 1908-S is plentiful in lower Mint State grades but conditionally elusive at the Gem level. This piece is well-struck and satiny with silvery interiors that cede to amber and ocean-blue border hues. No major abrasions are seen. Population: 26 in 65, 18 finer (1/18). NGC ID# 23FA. PCGS# 4849

PROOF BARBER DIMES

- 3428 1894 PR66 PCGS. A famous year for the Barber dimes, represented by a lovely Premium Gem proof that has considerable contrast beneath splashes of attractive champagne and iridescent toning. This example is on the verge of a Cameo designation. Population: 46 in 66 (3 in 66+), 26 finer (1/18). NGC ID# 23G6, PCGS# 4878
- 3429 1901 PR66 PCGS. Struck during the first year of operations at the new Third Philadelphia Mint building, this brilliant and untoned Premium Gem proof Barber dime has excellent eye appeal. Although undesignated, it qualifies as a Cameo proof, in our opinion. Population: 32 in 66, 5 finer (1/18). From The Sea Cliff Collection. NGC ID# 23GE, PCGS# 4885
- 3430 1905 PR67 PCGS. A fully struck Superb Gem proof with appreciable Cameo contrast on the obverse. Both sides have original sea-green and deep golden-gray toning that complements the mirroring in the fields. The preservation is outstanding. Proof 1905 Barber dimes are rare this fine. Population: 19 in 67 (2 in 67+), 1 finer (1/18). NGC ID# 23GJ, PCGS# 4889
- 3431 1905 PR66 Cameo PCGS. Brilliant and untoned silver surfaces exhibit deeply mirrored fields and satiny, lustrous devices. Exceptional field-to-device contrast is rewarded with a PCGS Cameo designation. Population: 17 in 66 (1 in 66+) Cameo, 8 finer (1/18)
 - From The Property of a Lady. NGC ID# 23GJ, PCGS# 84889
- 3432 1906 PR66 PCGS. This brilliant Premium Gem proof has a hint of contrast between the fields and devices. Both sides are untoned, save for a small splash of dark toning at the upper reverse border. Population: 24 in 66 (2 in 66+), 14 finer (1/18).

 From The Property of a Lady. NGC ID# 23GK, PCGS# 4890
- 3433 1906 PR66 PCGS. Bold design motifs characterize this Premium Gem proof that exhibits fully mirrored fields and satin devices beneath lovely pastel gold, rose, sea-green, and blue toning on both sides. Population: 24 in 66 (2 in 66+), 14 finer (1/18). NGC ID# 23GK, PCGS# 4890

MERCURY DIMES

- 3434 1916-D VG10 PCGS. An attractive pewter-gray representative of the low-mintage key date, this piece exhibits dark steel-gray toning around the devices. With a production limited to 264,000 coins, the 1916-D had a vastly lower mintage than any other Mercury dime issue. NGC ID# 23GY, PCGS# 4906
- 3435 1916-D VG10 PCGS. A pleasing VG10 representative of this sought-after first-year key, from a series-low mintage of 264,000 pieces, this coin shows considerable wear on both sides, but more than half of the rods in the fasces are distinctly visible, and the lightly toned surfaces show only minor abrasions. NGC ID# 23GY, PCGS# 4906

1916-D Mercury Dime, VF30 Pleasing Lavender-Gray Surfaces

- 3436 1916-D VF30 PCGS. An impressive VF30 specimen of this first-year key from a series-low mintage of 264,000 pieces. This coin displays moderate, even wear on the design elements and a bold mintmark. The diagonal bands on the fasces are still visible. Pleasing lavender-gray surfaces are lightly abraded, and the overall presentation is most attractive. NGC ID# 23GY, PCGS# 4906
- 3437 1916-S MS66 Full Bands PCGS. CAC. Gleaming, frosty surfaces are virtually brilliant on this razor-sharp Full Bands example from the first year of Mercury dime production. More than 10.4 pieces were struck at the San Francisco Mint, less than half the number struck at Philadelphia. PCGS reports 26 finer submissions. CAC: 16 in 66, 9 finer (1/18). NGC ID# 23GZ, PCGS# 4909
- 3438 1918 MS66 Full Bands PCGS. This boldly detailed Mercury dime has intricate hair detail on the obverse and sharply split bands on the reverse. A brilliant Premium Gem, this piece exhibits traces of gold toning on the reverse. Population: 55 in 66 (3 in 66+) Full Bands, 5 finer (1/18). NGC ID# 23H5, PCGS# 4917

1919-S Dime, MS64 Full Bands A Top Strike Rarity

3439 1919-S MS64 Full Bands PCGS. The 1919-S is one of the top strike rarities in the series. Breen noted in his *Encyclopedia* that Uncirculated examples "are often weak," and CoinFacts places only one issue — the 1919-D — ahead of it with Full Bands. This wonderful near-Gem is fully struck, including the motto, date, and central fasces. Dappled gunmetal-gray and gold patina appears over each side with shimmering luster. NGC ID# 5LLN, PCGS# 4927

- 3440 1920-D MS64 Full Bands PCGS. This satiny Choice example is fully struck and toned light golden. There is not much evidence of die wear in the fields or on the devices, although an obverse die crack extends from the rim between the RT in LIBERTY into the winged cap, and on the reverse a heavier crack runs upward from the rim through the N in ONE. The 1920-D is a challenging issue in the finer Full Bands grades. NGC ID# 23HC, PCGS# 4931
- 3441 1920-D MS64 Full Bands PCGS. CAC. This coin is sharply struck and untoned, showing remarkably frosty mint luster. A thin die crack connects the winged cap to the obverse rim between the RT in LIBERTY. CAC-approved Full Bands examples of this Denver issue are rare. CAC: 14 in 64, 22 finer (1/18). NGC ID# 23HC, PCGS# 4931
- 3442 1921 AU58 PCGS. From a small mintage of 1.2 million pieces, the 1921 Mercury dime is seldom encountered in Mint State grades. Only the slightest trace of wear shows on this attractive near-Mint example and the lightly abraded surfaces retain much of their original mint luster. Population: 46 in 58, 14 finer (1/18). NGC ID# 23HE, PCGS# 4934

1921 Dime, MS65 Full Bands Marvelously Preserved and Brilliant Key

3443 1921 MS65 Full Bands NGC. Bold clash marks appear on each side of this brilliant Gem Mercury dime. Central detail is unaffected, exhibiting clear separation of the horizontal bands. Die erosion is evident in the form of extensive flowlines in the fields and peripheral elements drawn to the border. A marvelously preserved example of this cornerstone issue. NGC ID# 23HE, PCGS# 4935

1921-D Dime, MS63 Full Bands Second Lowest Mintage in the Series

- 3444 1921-D MS63 Full Bands NGC. One of the key low-mintage issues in the series with a production barely in excess of 1 million coins. It is possible that total enticed speculators to put a few Uncirculated rolls aside. That would explain the reported totals of mid-level Mint State survivors. This fully struck Select example is bright silver with splash of golden color. Luster is typically satiny. Few overt marks. NGC ID# 23HF, PCGS# 4937
- 3445 1923-S MS63 Full Bands PCGS. CAC. Hints of sea-green, lavender-gray, and turquoise toning visit the lightly marked surfaces of this impressive Select Mercury dime, with sharply detailed design elements and Full Bands definition on the fasces. Satiny mint luster shines through the patina. NGC ID# 23HH, PCGS# 4941

- 3446 1924 MS67 Full Bands PCGS. A hint of golden patina denies full brilliance, but the coruscating surfaces display only minimal grazes. The obverse field exhibits delicate die polish lines. The strike is needle-sharp throughout. A pleasing example, and one of a mere handful to attain this lofty status. Population: 28 in 67 (2 in 67+) Full Bands, 0 finer (1/18).
 - Ex: Larry Shapiro #1 All-Time Finest Mercury Dimes Full Bands Basic PCGS Registry Set (Heritage, 1/2006), lot 1885. NGC ID# 23HJ, PCGS# 4943
- 3447 1924-S MS64 Full Bands PCGS. This is one of the more elusive issues in the series to locate in Uncirculated condition, let alone with Full Bands. All examples are scarce; Gems are very rare. Varying shades of golden patina dominate each side. The upper-obverse rim shows hints of cobalt and magenta toning. The centers and marginal elements are strong. NGC ID# 23HL, PCGS# 4947
- 3448 1925 MS66+ Full Bands PCGS. CAC. This Philadelphia issue is more often seen with Full Bands than without. This high-end Premium Gem displays sharp detail and original satin luster. A woodgrain pattern of olive-gold toning covers silver luster on both sides. Population: 68 in 66 (5 in 66+) Full Bands, 29 finer. CAC: 24 in 66, 3 finer (1/18). NGC ID# 23HM, PCGS# 4949
- 3449 1925-S MS64 Full Bands PCGS. Irregular splashes of sea-green, gold, and pale lavender toning appear on each side of this near-Gem, which shows sharp central definition and minimal abrasions overall. The surface quality is upper-end for the grade. NGC ID# 5LX3, PCGS# 4953

1927-D Dime, MS64 Full Bands Strike Rarity

- 3450 1927-D MS64 Full Bands PCGS. CAC. The population figures for the 1927-D with Full Bands are likely inflated. This is one of the more challenging issues to locate in Mint State grades with strong central definition. Satiny luster over brilliant surfaces generates pleasing, natural eye appeal. No blatant imperfections are seen. Struck from slightly rotated dies. NGC ID# 23HV, PCGS# 4963
- 3451 1929-D MS67 Full Bands PCGS. A boldly defined pre-Depression representative from the Denver Mint, this beautiful Superb Gem has brilliant and frosty silver luster with peripheral gold and iridescent toning. Population: 73 in 67 (4 in 67+) Full Bands, 2 finer (1/18). NGC ID# 5LXC, PCGS# 4975
- 3452 1929-D MS67 Full Bands PCGS. CAC. The sharp central strike extends to the border legends on this high-end, CAC-approved Full Bands example. Frosty luster is unabraded and mostly brilliant, showing flecks of russet in the obverse margins. The 1929-D Mercury dime is scarce in this grade and a major rarity finer. Population: 73 in 67 (4 in 67+) Full Bands, 2 finer. CAC: 19 in 67, 1 finer (1/18). NGC ID# 5LXC, PCGS# 4975

1934-D Dime, MS67+ Full Bands Finest at PCGS

- 3453 1934-D MS67+ Full Bands PCGS. CAC. Almost four times as many dimes were manufactured at the Philadelphia Mint in 1934, in the depths of the Great Depression, as were struck at the Denver facility that same year. That ratio, 4:1, roughly holds for certified Full Bands examples in the upper echelons of Mint State. Where as the 1934 is merely scarce in MS67, the 1934-D is conditionally rare. This brilliant, nearly unabraded example presents full strike characteristics and a single wisp of thin golden color from Liberty's cheek to IN. Population: 55 in 67 (7 in 67+) Full Bands, 0 finer. CAC: 17 in 67, 0 finer (1/18). NGC ID# 23JB, PCGS# 4991
- 3454 1935-D MS67 Full Bands PCGS. Splashes of vibrant gold toning appear on the brilliant and highly lustrous obverse of this Superb Gem Mercury dime. The reverse is similar, with delicate gold toning. Both sides are exquisitely detailed. Population: 53 in 67 (8 in 67+) Full Bands, 0 finer (1/18). NGC ID# 23JD, PCGS# 4995
- 3455 1941-S MS68 Full Bands NGC. The Condition Census of Full Bands 1941-S Mercury dimes at NGC includes three pieces that are designated Prooflike, although this high-end Superb Gem is the technical equal of those coins, with brilliant, frosty luster that produces the coveted cartwheel effect. The surfaces are virtually pristine, and the conditional rarity of this piece makes it a must-have item for Registry Set collectors. Census: 17 in 68 (10 in 68 ★) Full Bands, 0 finer; 3 in 68 Prooflike Full Bands, 0 finer (12/17). NGC ID# 23JZ, PCGS# 5033

1942/1 FS-101 Dime, MS63 Nearly Unblemished Surfaces

3456 1942/1 FS-101 MS63 NGC. The bands are virtually split, with one slender bridge seen in the center. A lustrous and unabraded pearl-gray example of this famous mint error, caused when the Philadelphia Mint transitioned between the two wartime dates. A presumably inexperienced worker used successive 1941 and 1942 hubs to produce a 1942/41 obverse die. A similar error, perhaps by the same employee, led to the 1942/1-D variety.

Ex: FUN Signature (Heritage, 1/2011), lot 4601; J. David Bonn Family Trust Collection (Heritage, 3/2011), lot 3452, which realized

PROOF MERCURY DIMES

\$3,450. NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

3457 1936 PR66 PCGS. CAC. Intense green-gold toning visits the mirrored surfaces of this Premium Gem proof, the first issue of this format in the Mercury dime series after 20 years without any regularly issued proof coins of any denomination. NGC ID# 27DG, PCGS# 5071 3458 1938 PR67+ PCGS. This Plus-graded Superb Gem proof exhibits sharply detailed design elements and deeply reflective fields, but the all-brilliant finish prevents any real field/device contrast. Impeccably preserved, this coin has terrific eye appeal. PCGS has graded 18 numerically finer examples (1/18).

From The Jamestown Collection, Part II. NGC ID# 27DJ, PCGS# 5073

1941 Dime, Lightly Toned PR68 Tied for the Finest at PCGS

3459 1941 PR68 PCGS. PCGS does not list a single Cameo example of the 1941 proof Mercury dime, making this high-end Superb Gem among the finest pieces available to Registry Set collectors. The coin is fully struck with delicate champagne toning and also displays deeper orange-gold and amber along the right-hand borders. Population: 31 in 68, 0 finer (1/18). NGC ID# 27DM, PCGS# 5076

1942 Dime, PR68+ Iridescent Border Toning

3460 1942 PR68+ PCGS. CAC. The centers remain brilliant, while the outer areas showcase variegated iridescence in shades of blue, green, magenta, and golden-orange. Eye appeal is tremendous, matching the near-flawless preservation of this proof dime. Population: 90 in 68 (8 in 68+), 1 finer. CAC: 57 in 68, 1 finer (1/18). NGC ID# 27DN, PCGS# 5077

TWENTY CENT PIECES

- 3461 1875-CC MS62 NGC. BF-4, R.2. The extremely wide spacing of the mintmark immediately identifies this plentiful variety. As a date, the 1875-CC is usually available in Mint State but experiences significant collector demand as the only collectible Carson City issue in the series. Flecks of russet accent champagne toning on each side, and only a few minor abrasions appear beneath a loupe. The stars and localized areas of the central devices show slight strike softness. NGC ID# 23R6, PCGS# 5297
- 3462 1876 MS63 PCGS. BF-4, R.4. This is an elusive variety that shows a number of diagnostics, including a thin die line in the dentils below the WE in TWENTY, a line in the recesses of Liberty's gown above the 6 in the date, and die lapping in the recesses of the eagle's wings. As a date, the 1876 is slightly better in Mint State, but this Select example remains collectible. The coin is sharp and satiny with golden toning and only minor abrasions. From The Jamestown Collection, Part II. NGC ID# 23R8, PCGS# 5299

3463 1876 MS64 PCGS. CAC. BF-2, R.2. A splendid near-Gem of this low-mintage Philadelphia issue. Light wheat-gold toning accompanies crisply struck and thoroughly lustrous surfaces. A couple of obverse field ticks prevent a higher grade. CAC: 17 in 64, 17 finer (12/17).

From The Bayside Collection. NGC ID# 23R8, PCGS# 5299

PROOF TWENTY CENT PIECES

1875 Twenty Cent, Toned PR63
In a Prior Generation Holder

3464 1875 PR63 NGC. CAC. BF-1, R.1. Most proof and circulation strikes known are of this die pair. The present CAC-endorsed proof is sharp and deeply reflective. A Cameo designation might have been achieved were it not for deeply set gunmetal-blue and green toning on each side. No distracting marks are apparent, making this piece upper-end for the grade. Housed in a prior generation holder. NGC ID# 27GZ, PCGS# 5303

3465 1876 PR61 NGC. BF-4, R.4. According to Brunner and Frost, BF-4 "may exist as a proof as well as a circulation strike, but this is not yet known for certain. If so, proofs are very rare." Brilliant aside from a hint of tan-gold toning near the rims. Sharply struck and flashy with minor field hairlines. NGC ID# 27H3, PCGS# 5304

1876 Twenty Cent, PR63 Undesignated Cameo Contrast

3466 1876 PR63 PCGS. CAC. BF-1, R.4. This variety is usually seen in proof format but occurs on about 10% of the circulation strikes. This coin is CAC-endorsed and shows a blush of lovely rose-gold toning that deepens toward the borders. Undesignated cameo contrast is apparent on both sides, and eye appeal is outstanding for the grade. Only a few light lines are visible in the fields under a loupe. NGC ID# 27H3, PCGS# 5304

1876 Twenty Cent, PR64 Cameo Scarce Proof Denomination

3467 1876 PR64 Cameo PCGS. BF-3, R.4. An intricately struck Choice proof. The butter-gold fields are reflective and undisturbed. A desirable contribution to a proof silver type set. A die chip west of LIBERTY identifies the Brunner-Frost variety. A scarce denomination in proof format. Population: 33 in 64 Cameo, 24 finer (1/18). NGC ID# 27H3, PCGS# 85304

3468 1878 — Edge Damaged — PCGS Genuine. Proof, AU Details. BF-1, R.3. The fourth and final date of the twenty cent denomination was proof-only. Just 600 pieces were produced. The present specimen shows slight wear on the eagle's breast, and displays faint obverse horizontal hairlines. The rims display light filing near 6 o'clock on the obverse and 12 o'clock on the reverse. From The E.B. Strickland Collection, Part II.

1878 Twenty Cent Piece, PR63 Cameo Elusive Proof-Only Date

3469 1878 PR63 Cameo NGC. CAC. BF-1, R.3. Dazzling field reflectivity and a razor-sharp strike confirm the quality of this Select proof-only example. The eagle and seated Liberty are frosty, and the fields exhibit dramatic walnut-brown and aquamarine toning. Rotation beneath a loupe reveals delicate hairlines. NGC ID# 27H5, PCGS# 85306

EARLY QUARTERS

3470 1804 B-1, R.3, AG3 PCGS. Tompkins Die State 2/2. This well-circulated Browning-1 example displays smooth, problem-free surfaces with natural battleship-gray patina that shows hints of lavender in the fields. Most design elements are clear, although Liberty's profile blends into the field, and the eagle's right (facing) leg is worn away. The rims merge with the border legends in spots. The date and LIBERTY are sharp and clear.

From The Jamestown Collection, Part II. NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

3471 1806/5 B-1, R.2 — Cleaned — PCGS Genuine. XF Details. Only light wear shows on the strongly impressed design elements, but the lightly abraded lavender-gray surfaces have an unnatural sheen from the noted cleaning. The lower half of an undertype 5 is evident below the last digit in the date.

3472 1806 B-6, R.5, Fine 12 PCGS. A rare die pairing. The high points and open fields are stone-gray. Charcoal toning fills design recesses. Faintly hairlined, and a few minuscule ticks surround the nose, but the coin is attractive for the Fine level. NGC ID# 379E, PCGS# 38932 Base PCGS# 5314

3473 1806 B-7, R.5, Fine 12 PCGS. Tompkins Die State 1/4. A much better Browning variety identified by the bold radial die line between the rim and the N in UNITED. A pearl-gray and almondgold example. The sole mentionable abrasion is a thin mark across Liberty's jaw. NGC ID# 4E82, PCGS# 38933 Base PCGS# 5314

1806 B-10 Quarter, VF30 Rare Die Marriage

- 3474 1806 B-10, R.5, VF30 PCGS. Tompkins Die Stage 1/2. A die crack connects the base of ST. Diagnostic indicators include the leaf tip pointing to the right foot of the I in AMERICA and the closest arrowhead under the left foot of the N in UNITED. This is a rare die marriage, although examples survive in grades as high as MS64. The variety is seldom seen above AU. Bright stone-gray dominates the obverse. Gunmetal and golden tones appear within the reverse legends. The finer points of the design are largely worn away, but the major elements remain clear. NGC ID# 23RD, PCGS# 38937 Base PCGS# 5314
- 3475 1807 B-1, R.2, VF30 NGC. Tompkins Die State 5/2 with partly lapped shoulder curls. A dusky dove-gray representative with generally unmarked surfaces. The strike is soft on the reverse stars, as often seen.

Ex: FUN Signature (Heritage, 1/2008), lot 1089, which realized \$1,610

From The Bayside Collection. NGC ID# 23RF, PCGS# 38939 Base PCGS# 5316

BUST QUARTERS

3476 1818 B-8, R.3, XF45 NGC. Tompkins Die State 2/2, heavily clashed on both sides. The strike is sharp and well-centered, and light wear over each side leaves substantial detail in the devices. Original old-time toning in shades of olive-gray, gold, amber, and russet appears on each side, with the more vibrant colors near the borders. Eye appeal is outstanding. NGC ID# 23RH, PCGS# 38949 Base PCGS# 5322

1821 Quarter Dollar, B-4, AU55 Smooth and Appealing Surfaces

3477 1821 B-4, R.3, AU55 NGC. A die scratch connects an olive leaf to the rim on B-4. This Choice AU example displays satiny pewter-gray surfaces and sharp detail. The fields are remarkably free of heavy abrasions, making this a highly appealing type or date coin. The 1821 is a moderately plentiful Capped Bust issue in AU and Mint State grades, if only in the context of the type. NGC ID# 23RM, PCGS# 38966 Base PCGS# 5331

3478 1822 B-1, R.2, XF45 PCGS. Only two die varieties are known for the 1822 quarter. Browning-1 is the regular denomination variety. This Choice XF example displays bold detail and smooth, problemfree surfaces. Original olive-gray and russet patina blankets each side. NGC ID# 23RN, PCGS# 38969 Base PCGS# 5332

1824/2 B-1 Quarter, VF25 Scarce Capped Bust Date

- 3479 1824/2 B-1, R.3, VF25 PCGS. Only a single scarce die pair is known with 1824-dated dies, which makes the 1824/2 a much better date. The mintage of 168,000 pieces is for both 1824 and 1825, and most of those pieces were likely dated 1825. The present pearl-gray example displays caramel-gold and sea-green undertones. The evenly worn surfaces are surprisingly unabraded, save for a single diagonal line below the eagle's beak.
 - From The E.B. Strickland Collection, Part II. NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335
- 3480 1825/4/(2) B-2, R.2, AU55 NGC. A lightly circulated Capped Bust type coin. Rich silver-gray and chestnut-gold toning encompasses lightly marked and pleasing surfaces. B-2 is sometimes confused with the rare 1825/2 B-1, but the placement of star 8 relative to cap allows identification at arm's length. NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336
- 3481 1825/4/(2) B-3, R.3, XF45 PCGS. B-3 is intermediate in rarity between the fairly common B-2 and the costly 1825/2 B-1. The present Choice XF example offers dove-gray, navy-blue, and tanbrown toning. Marks are minimal, though the top of Liberty's cap is moderately granular. NGC ID# 23RS, PCGS# 38973 Base PCGS# 5336
- 3482 1828 B-1, R.1, AU55 NGC. The date and the denomination have Curved-Base 2s on this available die combination. A pleasing Choice AU example, this Capped Bust quarter exhibits untoned light silver-gray surfaces with minuscule, inconsequential marks visible only under a glass. Census for all four 1828 varieties: 14 in 55, 76 finer (1/18). NGC ID# 23RV, PCGS# 38976 Base PCGS# 5347
- 3483 1828 25 Over 50C, B-3, R.5, VG8 PCGS. The reverse die with a blundered denomination was first used to strike the rare 1822 B-2, and resurfaced six years later to coin the 1828 B-3. A challenging *Guide Book* variety, much more difficult to locate than the 1828 B-1. The cream-gray surfaces show expected wear but marks are confined to two field ticks beneath the bust tip.

From The E.B. Strickland Collection, Part II. NGC ID# 23RV, PCGS# 38979 Base PCGS# 5343

1831 B-1 Quarter, MS63 **Small Letters Reverse**

3484 1831 Small Letters, B-1, R.3, MS63 PCGS. Tompkins Die State 1/3. Dynamic luster sweeps this minimally abraded and virtually brilliant Select quarter. The first star is softly defined, but the remainder of the strike is bold. Browning-1 is the second-rarest 1831 Small Letters variety, scarcer than B-4 and B-2 but more available than B-3. NGC ID# 23RW, PCGS# 38980 Base PCGS#

3485 1831 Small Letters, B-4, R.1, MS62 PCGS. CAC. A sharply detailed Mint State type coin with original satin luster and deep olive-gray and gold toning. A loupe reveals scattered light contact marks, although they are mostly unnoticed beneath the patina. NGC ID# 23RW, PCGS# 38983 Base PCGS# 5348

1831 B-4 Quarter, MS63 Small Letters, Narrow Arrowheads

3486 1831 Small Letters, B-4, R.1, MS63 PCGS. The radial die crack through the C in the denomination provides an identifier for B-4. A splendid representative of the Capped Bust type. The strike is intricate, the surfaces display minimal contact, and the cartwheel luster is vibrant. Pumpkin-gold and powder-blue toning intermingle across both sides.

Ex: Los Angeles Signature (Heritage, 8/2009), lot 569, which realized

From The Bayside Collection. NGC ID# 23RW, PCGS# 38983 Base PCGS# 5348

1831 B-5 Quarter, MS63 Repunched Date, FS-301

3487 1831 Large Letters, B-5, FS-301, R.3, MS63 PCGS. The moderately scarce B-5 variety is listed in Cherrypickers' due to its repunched Large Date over Small Date, most apparent beneath the flags of the 1s. Rich aquamarine and chestnut-gold toning adorns the borders of this satiny and carefully preserved Capped Bust quarter. A few stars lack a full impression, but the remainder of the strike is crisp. NGC ID# 23RW, PCGS# 38984 Base PCGS# 5349

1832 B-2 Quarter, MS63 **Original Toning**

3488 1832 B-2, R.2, MS63 NGC. Tompkins Die State 2/2. A generous quantity of luster emanates from beneath deep but delightful patina on this Bust quarter. The color scheme is a familiar one to lovers of original coloration, consisting of iridescent steel-blue near the rims ceding to copper-gold centers, although the splash of mintgreen on Liberty's cap is a bit unusual. This is a well-struck example for the grade, with few mentionable marks. Census (all varieties included): 7 in 63, 16 finer (12/17).

Ex: Long Beach Signature (Heritage, 9/2011), lot 3388.

From The Bayside Collection. NGC ID# 23RX, PCGS# 38988 Base PCGS# 5351

1834 B-1 Quarter, MS63 Colorful Border Toning

1834 O Over F in OF, B-1, FS-901, R.1, MS63 NGC. Tompkins Die State 3/4. Bands of powder-blue, lavender-red, and olive-gold toning endow the borders of this well-struck and attractive Capped Bust type coin. No marks are remotely relevant. An interesting variety, due to the blundered F in OF and the absent period after 25 C.

From The Bayside Collection. NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353

1836 B-5, High R.6 — Devices Outlined — PCGS Genuine. Fine Details. The rarest die marriage of the year, which combines the obverse of B-4 with the reverse of B-1. Thus, both the radial crack through star 1 and the the ascending crack through STATE must be present to confirm Browning-5. This gunmetal-gray and powder-blue representative is cloudy from hairlines and shows pinscratches on the field near the profile.

1837 B-2 Quarter, MS62 Clashed Dies, Well-Preserved

3491 1837 B-2, R.1, MS62 NGC. Tompkins Die State 2/2. Goldenbrown and apple-green toning embraces the borders of this fully struck and satiny quarter. The fields are clashed but free from any remotely relevant abrasions. The eye appeal is exceptional for the designated grade. A desirable Capped Bust type coin. NGC ID# 23S4, PCGS# 39011 Base PCGS# 5356

SEATED QUARTERS

- 3492 1841 MS63 PCGS. Briggs 1-A, Flynn DDR-001. ED STATES OF shows impressive die doubling. Breen (1988) described the variety as "very rare," but a survey of Heritage auction appearances confirms that a majority of the issue has the doubled die reverse. An unmarked stone-gray example with bountiful luster and good eye appeal. NGC ID# 23SK, PCGS# 5399
- 3493 1842-O Small Date Fine 15 PCGS. Briggs 1-A. A very scarce New Orleans *Guide Book* variety. Natural old-silver patina has a two-tone appeal, with lightly toned devices over rich-gray fields. The definition throughout both sides exceeds the Choice Fine grade, with LIBERTY readable on the shield and about 60% of the wing feathers defined. Mentionable contact is confined to an obverse rim nick at 9:30. NGC ID# 23SN, PCGS# 5403
- 3494 1842-O Small Date Fine 15 PCGS. An important and rare variety, the 1842-O Small Date is listed individually in the *Guide Book*, and it is an essential part of a complete set of Seated Liberty quarters. This piece blends medium gray toning in the fields with lighter silver-gray on the devices. Population: 7 in 15, 33 finer (1/18). From The E.B. Strickland Collection, Part II. NGC ID# 23SN, PCGS# 5403
- 3495 1849-O Fine 12 PCGS. Briggs 1-A. Due to a late delivery, the 1849-O mintage is unknown; lumped in with the 1850-O production. Briggs (1991) estimates that only 16,000 '49-O quarters were struck. This stone-white, charcoal-gray, lilac-red, and powder-blue example lacks obtrusive abrasions and shows nearly all of LIBERTY.

 From The E.B. Strickland Collection, Part II. NGC ID# 23T3, PCGS# 5414

1853/53 No Arrows Quarter, Choice VF Exceptional Old-Time Coloration

- 3496 1853/53 No Arrows, Briggs 1-A, FS-301, VF35 NGC. The repunching on the 53 of the date is plain under a loupe despite circulation wear and natural toning. Each side of this No Arrows 1853 Seated quarter displays light gray relief elements and old-time olive-gray, russet, and golden field patina. Even wear leaves moderate detail on the devices, and the coin is entirely problem-free. Eye appeal is outstanding for the grade. Only 44,200 examples of this challenging issue were struck.
 - From The Sea Cliff Collection. NGC ID# 23TA, PCGS# 395930 Base PCGS# 5421
- 3497 1853-O Arrows and Rays AU55 PCGS. An accurately graded Choice AU example, showing only slight friction over the high points of Liberty's figure and the upper edges of the eagle's wings and brow. Some satin luster remains in the fields. This attractive Arrows and Rays New Orleans type coin has pleasing champagne and steel-blue toning. Population: 9 in 55, 14 finer (1/18). NGC ID# 23U5, PCGS# 5428
- 3498 1854-O Huge O, Briggs 1-A, FS-501, VG8 PCGS. CAC. The reverse die apparently arrived at the New Orleans Mint sans mintmark. The die was lapped beneath the eagle, and an oversized, high relief mintmark was added by hand. A scarce and popular *Guide Book* variety. The present piece shows about four letters in LIBERTY. Protected areas are deep gray and the high points are pearl-white. NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434
- 3499 1854-O Huge O, Briggs 1-A, FS-501, Fine 15 PCGS. The oddly shaped mintmark was hand-cut in the reverse die of this distinctive and popular *Guide Book* listed variety. The light gray surfaces exhibit wisps of champagne and pale blue toning with trivial, grade-consistent marks of no consequence. Population: 10 in 15, 47 finer (1/18). NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434
- 3500 1854-O Huge O, Briggs 1-A, FS-501, XF40 NGC. The heralded Guide Book variety with the oversized "Yap stone" mintmark. The much-told tale is that New Orleans received a reverse die without a mintmark, so it was added by hand to that die. Whatever was done also partially effaced nearby letter and branch elements. A pearl-white and almond-gold example with lightly marked surfaces. NGC ID# 23U7, PCGS# 395933 Base PCGS# 5434
- 3501 1857 MS64 PCGS. Peripheral die cracks appear around much of the obverse and the upper reverse. Clash marks are visible on both sides. This sharp near-Gem displays a hint of champagne toning over satiny, minimally marked surfaces. Eye appeal is pleasing. The 1857 is usually available in Mint State and is a worthy type candidate. NGC ID# 23TE, PCGS# 5442

1860-S Quarter, Choice Fine Challenging Old West Issue

3502 1860-S Fine 15 PCGS. Briggs 1-A. Though the San Francisco Mint struck 472,000 half dollars in 1860, their production of quarters was much smaller at 56,000 pieces. Survivors are scarce and typically well-worn, since there were few if any West Coast numismatists during the 19th century. This lavender-gray representative has bold letters in LIBERTY. Relevant marks are confined to a single thin line on the upper-right obverse field. From The E.B. Strickland Collection, Part II. NGC ID# 442R, PCGS# 5453

3503 1861 MS65 NGC. Type Two Reverse, showing a convex eye on the eagle. Softy frosted luster cartwheels when rotated beneath a light, illuminating warm amber-gold interior toning and aquamarine borders. The peripheral stars are incomplete, as usual, but the strike is otherwise pleasing. Census: 30 in 65 (1 in 65 ★), 19 finer (1/18). From The Bayside Collection. NGC ID# 23TT, PCGS# 5454

1861 Seated Quarter, MS65 Bright Frosty Luster

3504 1861 MS65 NGC. Type Two Obverse and Reverse. An amazing Gem from the final year of large scale coinage production at the beginning of the Civil War. This bright Gem exhibits frosty mint luster with delicate lavender toning, deeper along the borders, including blue and russet at the lower left reverse. Census: 30 in 65 (1 in 65★), 19 finer (12/17).

Ex: Summer FUN Signature (Heritage, 7/2011), lot 3499; New York Signature (Heritage, 12/2011), lot 3469.

From The Bayside Collection. NGC ID# 23TT, PCGS# 5454

3505 1861-S VF20 PCGS. Briggs 1-A. Another elusive West Coast issue with a stingy production of 96,000 pieces. Half dollars were the preferred silver denomination in California during the Civil War. This inoffensively abraded Very Fine example has gunmetal-blue motifs and chestnut-gold fields.

From The E.B. Strickland Collection, Part II. NGC ID# 23TU, PCGS# 5455

3506 1866-S Fine 12 PCGS. Briggs 1-A. The first West Coast Motto issue has a mintage of just 28,000 pieces, and is challenging in all grades. This is a pleasing dove-gray example. All letters in LIBERTY are clear, and neither side shows apparent abrasions. From The E.B. Strickland Collection, Part II. NGC ID# 23UC, PCGS# 5469

3507 1867 XF40 PCGS. Briggs 1-A. Gresham's Law and fractional currency combined to drive silver coins from circulation during Reconstruction. As a result, many Philadelphia Seated mintages of the era had minimal production runs. The 1867 quarter had an output of just 20,000 pieces. This moderately circulated and lightly abraded representative exhibits dusky sea-green and golden-brown toning.

From The E.B. Strickland Collection, Part II. NGC ID# 23UD, PCGS# 5470

3508 1869 XF45 PCGS. Light gray surfaces on this Choice XF Seated Liberty quarter exhibit attractive magenta, gold, and iridescent toning. This is a rare issue from a mintage of 16,000 coins. Population: 6 in 45, 18 finer (1/18).

From The E.B. Strickland Collection, Part II. NGC ID# 23UH, PCGS# 5474

1871-CC Quarter, About Good Rare Early Carson City Issue

3509 1871-CC AG3 PCGS. The second-year Carson City quarter is nearly as rare as the debut issue. Only 10,890 pieces were struck, and the survival rate is low with most examples well-circulated or impaired. This cream-gray example shows a faint mintmark beneath the fletchings. The date is bold, and most letters in OF AMERICA are readable. We note tiny digs near stars 8 and 9, and a slight rim knock at 3 o'clock.

From The E.B. Strickland Collection, Part II. NGC ID# 23UN, PCGS# 5479

3510 1872-CC Good 4 PCGS. Briggs 1-A. An early Carson City issue with a stingy mintage and low survival rate, the 1872-CC is typically found with problems and in lower grades. LIBERTY is worn smooth, but the date and mintmark are bold, and most of UNITED STATES OF AMERICA is sharp. The bottoms of QUAR DOL blend into the rim. Both sides are lightly hairlined. From The E.B. Strickland Collection, Part II. NGC ID# 23US, PCGS# 5482

3511 1872-S Good 4 PCGS. Briggs 1-A, Flynn RPM-001. An Old West origin and a mintage of only 83,000 pieces ensure the rarity of the 1872-S in all grades. The present cream-gray and wheat-gold example is smooth aside from a small dig below star 6. Most of LIBERTY is clear. The date is bold. The reverse legends show only a few faint letters.

From The E.B. Strickland Collection, Part II. NGC ID# 23UT, PCGS# 5483

1873 Closed 3 No Arrows Quarter AU Details

- 3512 1873 Closed 3 Obverse Improperly Cleaned NGC Details. AU. All Closed 3 examples of the 1873 quarter dollar are No Arrows coins. The Guide Book lists a mintage of 40,000 pieces for this variety, examples of which are scarce today. This piece is sharp and partially lustrous with brilliant surfaces. Hairlines on the obverse suggest a light cleaning, although the coin is generally appealing.
- 3513 1873 Arrows MS64 PCGS. Briggs 3-B. The dies are clashed on this piece, although only lightly. This near-Gem displays satiny luster and a faint trace of light champagne toning. Several stars are incomplete, but the central devices show bold definition. All With Arrows 1873 quarters feature the Open 3 logotype. Examples are scarce in this grade and rare finer. Population: 48 in 64 (1 in 64+), 18 finer (12/17). NGC ID# BZMG, PCGS# 5491
- 3514 1875-CC XF40 PCGS. An important issue in the Seated Liberty quarter dollar series, the 1875-CC had a mintage of only 140,000 coins, and survivors are invariably in the middle circulated grade range, Fine to XF. This example has wisps of gold and pale blue toning over light gray surfaces. Population: 20 in 40, 54 finer (1/18). From The E.B. Strickland Collection, Part II. NGC ID# 23UY, PCGS# 5499

1877 Seated Liberty Quarter, MS67 Very Rare Any Finer

- 3515 1877 MS67 PCGS. Briggs 5-F. From a large mintage of 10.9 million pieces, the 1877 Seated Liberty quarter becomes very scarce in MS67 condition and finer coins are very rare. This attractive Superb Gem exhibits well-detailed design elements with the general softness typically seen on this variety. As always with Briggs 5-F, the stars show little to no centrils and a couple of spidery die cracks travel through the letters in AMERICA and QUAR. DOL. Some horizontal striations on the reverse prevent the motto from striking up properly, but the impeccably preserved surfaces radiate vibrant mint luster. Population: 50 in 67 (5 in 67+), 4 finer (1/18). NGC ID# 23V5, PCGS# 5504
- 3516 1878-CC MS63 NGC. Briggs 2-B. Dusky golden-brown, lavender-red, and gunmetal-blue toning embraces this sharply struck and satiny final-year Carson City quarter. A lens reveals unobtrusive marks on the left obverse field.

 From The Bayside Collection. NGC ID# 23V9, PCGS# 5509

- 3517 1879 MS64 PCGS. Briggs 1-A. A tiny die lump in the top of the third shield recess on the reverse, as well as date position, identify the business strike die pair of the 1879 quarter, despite this near-Gem example having prooflike fields and an incredibly sharp strike. Delicate golden border toning surrounds uncolored interiors. No major abrasions are present.
 - From The Jamestown Collection, Part II. NGC ID# 23VB, PCGS# 5511
- 3518 1881 MS64+ NGC. Briggs 1-A. Aquamarine and butter-gold grace the obverse, while the reverse is consumed with forest-green and lavender-red patina. Lustrous and unmarked. The strike is sharp except on the uppermost stars. Just 12,000 pieces were struck. NGC ID# 23VD, PCGS# 5513
- 3519 1882 MS66 PCGS. A small mintage of 15,200 circulation strikes in 1882 had an accompanying production of 1,100 proofs. Most collectors preferred the proofs at the time they were issued. This Premium Gem is an important rarity with bold design definition and frosty mint luster beneath lovely pastel gold and iridescent toning. Population: 23 in 66 (2 in 66+), 19 finer (1/18). NGC ID# 23VE, PCGS# 5514
- 3520 1887 MS62+ PCGS. An important entry in the final decade of Seated Liberty quarter production. The 1887 had a circulation strike mintage of 10,000 coins, and only a small percentage survives today. This pleasing Mint State piece has trivial marks on its brilliant and satiny silver surfaces with delicate peripheral gold toning. From The E.B. Strickland Collection, Part II. NGC ID# 23VK, PCGS# 5519

PROOF SEATED QUARTERS

1857 Seated Quarter, PR63 Early and Better Proof Date

3521 1857 PR63 NGC. Briggs 7-G. Proof mintages are unknown for any issue prior to 1859, but PCGS estimates that 75 to 100 proof 1857 quarters have survived, a much lower number than subsequent dates in the series. This example has light golden toning and nicely mirrored fields. The strike shows minor inexactness on the eagle's leg feathers and fletchings. Housed in a circa-2000 holder. NGC ID# 23WJ, PCGS# 5553

1857 Seated Quarter, PR63 A Rarity in Any Grade

- 3522 1857 PR63 PCGS. CAC. Briggs 7-G. PCGS estimates that 75 to 100 proof 1857 quarters are known, although we believe that the actual survival may be fewer than 50 pieces, more in line with the survivng number of proof half dollars of this date. The auction listings of the past two decades have been skewed by the reappearances of several coins that make this issue seem more plentiful than it is. The present piece, CAC-endorsed and sharply struck, shows modestly reflective fields and sea-green toning with golden accents. No major contact marks are seen. Population: 12 in 63 (1 in 63+), 16 finer (including Cameos). CAC: 1 in 63, 9 finer (12/17). From The Bayside Collection. NGC ID# 23WJ, PCGS# 5553
- 3523 1858 PR64 PCGS. The base of the 1 is repunched. Apparently a different variety than Briggs 5-E, the only proof pairing listed for the date in his classic 1991 reference. The Guide Book estimates only 300 proofs were struck for the first year of direct sales to the public. A well-struck near-Gem with chestnut-gold and sea-green toning. A few mint-made obverse lint marks are scattered. From The Bayside Collection. NGC ID# 23WK, PCGS# 5554

1858 Seated Quarter, Toned PR64 CAC Green Label, Old Generation Holder

- 3524 1858 PR64 NGC. CAC. Briggs 5-E. A thin die crack connects the arrowheads on the proof die marriage. This Choice proof is sharply struck and deeply reflective, although also deeply toned on both sides in gunmetal-blue and lavender hues. No major distractions are seen. The 1858 proof is a challenging issue in all grades, with a Guide Book-listed mintage of only 300 pieces. CACendorsed in a prior generation holder. Census: 22 in 64 (1 in 64+), 16 finer; 1 in 64 Cameo, 8 finer. CAC: 1 in 64, 3 finer (1/18). NGC ID# 23WK, PCGS# 5554
- 3525 1859 PR64 PCGS. The light gray surfaces of this Choice proof exhibit green-gold and blue toning on both sides. Sharply defined, this piece has fully mirrored fields that frame the lustrous devices, imparting slight contrast that is insufficient for a Cameo designation. Population: 60 in 64, 17 finer (1/18). NGC ID# 23WL, PCGS# 5555
- 3526 1859 PR64 PCGS. CAC. Briggs 2-B. A well struck Choice proof with exceptional eye appeal. The sea-green, plum-red, and golden-brown shades are particularly prominent on the reverse. Housed in a green label holder. Population: 60 in 64, 17 finer. CAC: 7 in 64, 5 finer (12/17).

From The Bayside Collection. NGC ID# 23WL, PCGS# 5555

1859 Quarter Dollar, PR65 **Deep Original Toning**

- 3527 1859 PR65 NGC. Briggs 1-A. The commonly accepted figure is 800 proofs produced for this issue, but this gives no accounting of how many sets were actually sold, as the rest were likely melted or put into circulation (a normal Mint practice of the time). This well-struck Gem proof shows deep toning in shades of aqua, amber, and jade on both sides with generous luster and strong reflectivity. Ex: Pittsburgh Signature (Heritage, 10/2011), lot 3603; Central States Signature (Heritage, 4/2014), lot 4253. NGC ID# 23WL, PCGS# 5555
- 1860 PR64 PCGS. Briggs 9-H. Type Two Obverse, Type One Reverse. Autumn-gold toning graces the margins of this reflective and carefully preserved near-Gem. The strike is sharp except on stars 3 to 8. Much scarcer than implied by the mintage of 1,000 proofs, since unsold sets were melted by the Mint. From The Bayside Collection. NGC ID# 23WM, PCGS# 5556
- 3529 1861 PR63 PCGS. The obverse of this pleasing Select proof is essentially brilliant with splashes of sea-green and amber toning, while the reverse exhibits delicate emerald, blue, and gold toning. A pleasing piece for the type collector or specialist. Population: 42 in 63, 46 finer (1/18).

From The Property of a Lady. NGC ID# 23WN, PCGS# 5557

- 3530 1862 PR64 PCGS. One of 550 proofs struck, this mostly brilliant example shows a slight encroachment of faint golden-tan toning. The raised motifs retain much frosted contrast with the glassy fields, although the near-Gem grade lacks any mention of cameo contrast. The strike is consistently sharp throughout both sides. Population: 46 in 64, 21 finer (1/18). NGC ID# 23WP, PCGS# 5558
- 3531 1862 PR64 PCGS. Briggs 5-E. A fully struck and flashy Civil War near-Gem, one of just 550 proofs produced. Light straw-gold toning accompanies unblemished surfaces. A desirable addition to an advanced Seated holding. Ex: Americana Sale (Bowers and Merena, 1/2012), lot 8565. From The Bayside Collection. NGC ID# 23WP, PCGS# 5558
- 3532 1862 PR64 PCGS. This gorgeous Choice proof has faint gold toning over brilliant silver surfaces with a hint of field-to-device contrast that is insufficient for a Cameo designation. Population: 46 in 64, 21 finer (1/18).

From The Property of a Lady. NGC ID# 23WP, PCGS# 5558

3533 1862 PR64 Cameo PCGS. Briggs 5-E. Field-to-device contrast is clear upon first glance on this near-Gem, a survivor of a Civil War proof mintage of only 550 proofs. Larry Briggs' series reference claims that 120 proofs were melted, leaving a net production of 430 pieces. Well-struck, the surfaces exhibit cream-gray centers and wheat-gold borders. Population: 7 in 64 Cameo, 7 finer as Cameo, 1 finer as Deep Cameo (12/17). Ex: Milwaukee Central States Signature (Heritage, 4/2010), lot 675.

From The Bayside Collection. NGC ID# 2A4Z, PCGS# 85558

1863 PR64 Cameo PCGS. The obverse die differs from the listed Briggs 4-D. An intricately impressed Choice proof. Luminous motifs rise above glassy, undisturbed fields. The centers are brilliant but the margins exhibit forest-green patina. A mere 460 proofs were struck for this Civil War date. Population: 23 in 64 (2 in 64+) Cameo, 7 finer as Cameo, 3 finer as Deep Cameo (12/17). Ex: Los Angeles Signature (Heritage, 8/2009), lot 603; FUN Signature (Heritage, 1/2012), lot 6735, which realized \$2,300. From The Bayside Collection. NGC ID# 23WR, PCGS# 85559

1864 Quarter Dollar, Toned PR65

3535 1864 PR65 PCGS. Briggs 3-C. This Gem proof is sharp and reflective, showing deep blue, violet, and orange-gold toning on each side. The obverse features cameo contrast despite the patina, although the reverse prevents such a designation from PCGS. Gem proof 1864 Seated quarters are scarce, mostly split between the non-Cameo and Cameo categories at PCGS; a single PR65 Deep Cameo is reported (1/18).

From The Property of a Lady. NGC ID# 23WS, PCGS# 5560

3536 1865 PR63 PCGS. Briggs 3-B. The intricately struck surfaces are deeply patinated ocean-blue, olive-green, peach-gold, and violet-red. Undisturbed and impressive. A Civil War date with a proof mintage of only 500 pieces.

From The Property of a Lady. NGC ID# 23WT, PCGS# 5561

3537 1868 PR64 Cameo PCGS. Briggs 2-B. An impressive specimen that has luminous devices and prominently mirrored fields. Close to white, but the margins show lilac tints. The strike is full and the eye appeal is undeniable. Scarce due to a proof mintage of only 600 pieces.

From The Bayside Collection. NGC ID# 23WZ, PCGS# 85567

3538 1869 PR64 PCGS. CAC. Briggs 2-B, Flynn-DDO-001. From a proof mintage of just 600 pieces, the present specimen is brilliant with reflective fields and icy motifs. We wonder why a Cameo designation is absent. Close evaluation reveals minor strike-throughs, as coined. The obverse shield stripes are lightly die doubled. From The Bayside Collection. NGC ID# 29SH, PCGS# 5568

1871 Quarter, Toned PR66 960 Proofs Minted

- 3539 1871 PR66 PCGS. Briggs 1-A. Intensely toned in green, blue, and violet hues on the obverse with a small window of brilliance, allowing for a hint of field-device contrast. The reverse has similar patina, more pronounced reflectivity, and additional peach color. A Premium Gem proof with great appeal. Population: 5 in 66 (1 in 66+), 0 finer (1/18). NGC ID# 23X4, PCGS# 5570
- 3540 1872 PR64 Cameo PCGS. CAC. Briggs 3-C. Brilliant save for a blush of rose-red along the lower reverse margin. A well-struck and pleasing Choice Cameo proof. Population: 18 in 64 (3 in 64+) Cameo, 22 finer as Cameo, 2 finer as Deep Cameo. CAC: 3 in 64, 8 finer (12/17). NGC ID# 23X5, PCGS# 85571
- 3541 1873 Arrows PR63 PCGS. Briggs 5-D. CAC. A scant 500 proofs were struck for the first year of the two-year Arrows, Motto subtype. The present specimen is well-struck and shows only a trace of peripheral gold patina. No hairlines are readily apparent. Undesignated as Cameo, but white-on-black contrast is nonetheless significant.

From The Bayside Collection. NGC ID# 23XR, PCGS# 5574

3542 1879 PR64 Cameo PCGS. Briggs 2-B. Type Two Reverse. A nicely struck Choice proof. The fields are flashy and show only a hint of golden toning, along with a brief streak of gray above Liberty's foot. Population: 14 in 64 (1 in 64+) Cameo, 16 finer (12/17). From The Bayside Collection. NGC ID# 23XB, PCGS# 85580

3543 1881 PR64+ PCGS. CAC. Briggs 2-B, Flynn-RPD-001. Both 8s are repunched within loops. Spectacular rose-red, sun-gold, and ocean-blue patina illuminates this crisply struck and prominently mirrored near-Gem. Exceptional eye appeal for the scarce proof date.

From The Property of a Lady. NGC ID# 23XD, PCGS# 5582

1884 Quarter, PR67 Diverse Patination

- 3544 1884 PR67 NGC. Briggs 2-B. Lovely honey-gold toning dominates the obverse field, though it cedes to ruby-red and navy-blue shades near the rims. The reverse is principally bathed in jade-green and violet-red shades, with butter-gold emerging at the border. A sharply struck specimen with few imperfections. Only 875 proofs were struck. NGC ID# 3TWH, PCGS# 5585
- 3545 1885 PR66 Cameo PCGS. Briggs 3-B. Splendid electric-blue, magenta-red, and peach-gold toning endows this fully struck and pristine Premium Gem. A delightful proof Seated type coin. Population: 16 in 66 Cameo, 12 finer as Cameo, 1 finer as Deep Cameo (12/17). NGC ID# 23XH, PCGS# 85586
- 3546 1887 PR64 Cameo NGC. Briggs 2-B. A flashy snow-white Choice Cameo proof. The upper stars lack a full impression, but the remainder of the strike is bold. Icy motifs ensure strong eye appeal. Another low-mintage date due to unprecedented silver dollar production, which surpassed 20 million pieces at Philadelphia for the first time that year.

From The Bayside Collection. NGC ID# 23XK, PCGS# 85588

- 3547 1889 PR63 PCGS. CAC. Briggs 2-B. Light chestnut-gold and blue-green patina grace this flashy and fully struck Select specimen. The devices on both sides are frosty, though PCGS does not designate the coin as Cameo. The eye appeal is excellent for the PR63 level. CAC: 3 in 63, 13 finer (1/18).
 - From The Bayside Collection. NGC ID# 44CX, PCGS# 5590
- 3548 1889 PR64 Cameo PCGS. CAC. Briggs 2-B. Light wheat-gold and aquamarine toning. The motifs exhibit consistent white frost, and the fields are glassy. The strike is sharp except on the first two stars. One small spot noted west of Liberty's rock. Just 711 proofs were struck.

From The Property of a Lady. NGC ID# 23XM, PCGS# 85590

1890 Quarter, PR66 Cameo Frost-White, Sharp Devices

3549 1890 PR66 Cameo NGC. A pretty Premium Gem from the penultimate proof Seated quarter issue, fantastically mirrored in the fields with intense frost over the devices. The reverse is close to an Ultra Cameo designation. Both sides display a thin halo of light golden toning around the extreme outer periphery. This is an impressive proof type coin in virtually all respects. Census: 11 in 66 Cameo (1 in 66+), 19 finer; 8 in 66 (1 in 66+) Ultra Cameo, 15 finer (12/17).

Ex: Long Beach Signature (Heritage, 6/2010), lot 668. From The Bayside Collection. NGC ID# 27US, PCGS# 85591

BARBER QUARTERS

- 3550 1893 MS66 PCGS. An extraordinary Premium Gem, this impressive Mint State example has deep gold, magenta, and cobaltblue toning over frosty, highly lustrous underlying silver surfaces. Population: 19 in 66 (6 in 66+), 1 finer (1/18). NGC ID# 23XW, PCGS# 5604
- 3551 1896-S VG8 PCGS. From a small mintage of 188,039 pieces, the 1896-S Barber quarter is one of the key issues in the series. This impressive VG8 specimen shows considerable wear, but the date, mintmark, and legends remain legible and the central design elements are completely outlined.

From The E.B. Strickland Collection, Part II. NGC ID# 23Y9, PCGS# 5615

- 3552 1897-O MS64 PCGS. Pink, orange, and gray hues cover most of the obverse, while the reverse is brighter with paler silver hues aside from the reddish-pearl elements at the margins. Great eye appeal for this O-mint issue which is challenging so fine. Population: 15 in 64, 43 finer (1/18).
 - Ex: Houston Signature (Heritage, 12/2010), lot 3556. NGC ID# 23YB, PCGS# 5617
- 3553 1901-S AG3 PCGS. Only 72,664 Barber quarters were struck at the San Francisco Mint in 1901. The 1901-S is one of the "Big Three" issues in the Barber quarter series and collectors prize examples in all grades and conditions. This well-worn AG3 specimen shows the central design elements complete in outline and the date and mintmark are legible, but much of the peripheral legend is worn flat on the reverse.

From The E.B. Strickland Collection, Part II. NGC ID# 23YR, PCGS# 5630

1909-D Quarter, Colorful and Lustrous MS67 The Single Finest at NGC

- 3554 1909-D MS67 NGC. The 1909-D is a rarity in Gem condition and exceedingly so any finer. This Superb Gem is the sole finest at NGC. PCGS has seen four submissions in this grade, also with none finer (1/18). The coin displays original luster with olive-gold, amber, and dusky gray toning. The eagle's right (facing) talons and several obverse stars show slight weakness when viewed with a loupe. NGC ID# 43NY, PCGS# 5654
- 3555 1914 MS66 ★ NGC. This frosty, high-end type coin displays swaths of orange-gold, violet, and blue on the obverse, while the reverse is uniformly yellow-gold. No singular abrasions are noticed. The usual strike weakness is seen on the right shield corner and the eagle's right (facing) talons, and a loupe reveals minor incompleteness on some of the obverse stars. Census: 9 in 66 (1 in 66 ★), 2 finer (1/18). NGC ID# 23ZX, PCGS# 5667

PROOF BARBER QUARTERS

- 3556 1895 PR64 Cameo PCGS. CAC. This modestly contrasted proof is nearly untoned in the centers but shows deep blue-green and lavender border coloration. The strike is razor-sharp, as expected for this well-made proof issue. No major contact marks are observed. NGC ID# 242A, PCGS# 85681
- 3557 1899 PR65 PCGS. A brilliant Gem proof, this late 19th century Barber quarter features a full strike and excellent eye appeal with untoned silver surfaces. A glass reveals faint lines on this sharply struck representative. Population: 26 in 65, 32 finer (1/18). From The Property of a Lady. NGC ID# 242E, PCGS# 5685
- 3558 1899 PR66 PCGS. Both sides of this Premium Gem proof exhibit dusky olive, tan-gold, russet, and peach toning over mirrored fields and satiny devices. The strike is razor-sharp, and neither side has bothersome contact marks. NGC ID# 242E, PCGS# 5685

1900 Barber Quarter, PR67 Registry Set Contender

3559 1900 PR67 PCGS. CAC. From a typical proof mintage of 912 pieces, this delightful Superb Gem is near the top of the list of survivors. The design elements are sharply detailed throughout and the fields are deeply mirrored. The impeccably preserved surfaces exhibit attractive highlights of lavender-gray and cerulean-blue toning. Population: 10 in 67 (1 in 67+), 1 finer. CAC: 2 in 67, 4 finer (1/18).

From The Property of a Lady. NGC ID# 43VN, PCGS# 5686

- 3560 1901 PR66 NGC. A beautifully detailed and colorfully toned representative of this popular turn-of-the-century issue. Bluegreen and orange-gold toning drape the watery, carefully preserved mirrors on both sides. A hint of contrast is visible through the patina, although apparently not enough for a Cameo designation. Just 813 proofs were issued. Census: 37 in 66 (2 in 66+), 33 finer (12/17). NGC ID# 242G, PCGS# 5687
- 3561 1903 PR66 PCGS. CAC. This stunning Premium Gem proof has rich azure-blue, coral, and mint-green toning on both sides with fully mirrored fields. Considerable field-to-device contrast remains, although the thick toning prevents a Cameo designation. Population: 24 in 66 (1 in 66+), 20 finer. CAC: 12 in 66, 6 finer (1/18). From The Property of a Lady. NGC ID# 242J, PCGS# 5689
- 3562 1904 PR65 PCGS. Fully mirrored fields frame the lustrous devices of this sharply defined Gem proof. Light reddish-gold toning on both sides enhances the eye appeal. Population: 39 in 65 (1 in 65+), 47 finer (1/18).
 From The Property of a Lady. NGC ID# 242K, PCGS# 5690
- 3563 1905 PR66 PCGS. CAC. Bold design definition is evident throughout on this brilliant Premium Gem proof that exhibits attractive iridescent toning splashes on both sides. Population: 33 in 66 (1 in 66+), 17 finer. CAC: 17 in 66, 16 finer (1/18). From The Property of a Lady. NGC ID# 242L, PCGS# 5691
- 3564 1906 PR65 PCGS. Light straw-gold and steel-gray toning accompanies this fully struck, satiny Gem. Virtually void of imperfections. A scarce proof issue with a mintage of only 675 pieces. Certified in a first-generation holder. NGC ID# 242M, PCGS# 5692
- 3565 1908 PR66 PCGS. Although this Premium Gem is undesignated, considerable contrast is evident between the mirrored fields and the lustrous, sharply defined devices. Both sides are mostly brilliant and untoned within a frame of peripheral iridescence. Population: 23 in 66 (1 in 66+), 26 finer (1/18). NGC ID# 242P, PCGS# 5694
- 3566 1909 PR65 PCGS. Hazy gold toning resides on the brilliant silver surfaces of this important Barber quarter that survives from a mintage of 650 proofs. This example is clearly a candidate for a Cameo designation. Population: 32 in 65 (1 in 65+), 66 finer (1/18). From The Property of a Lady. NGC ID# 242R, PCGS# 5695
- 3567 1912 PR66 PCGS. CAC. An extraordinary Premium Gem proof, this undesignated example has full cameo contrast with lovely gold and iridescent toning on both sides. Population: 23 in 66 (1 in 66+), 14 finer. CAC: 3 in 66, 11 finer (1/18).

 From The Property of a Lady. NGC ID# 242U, PCGS# 5698
- 3568 1913 PR66 NGC. Non-Cameo 1913 proof quarters are scarce this fine, and Cameos are rare; no Ultra Cameos are reported at NGC in any grade (12/17). This sharp, toned Premium Gem displays rose-gold and peach borders around sea-green interiors. No distracting marks are seen. Census: 38 in 66, 23 finer; 4 in 66 Cameo, 14 finer (12/17). NGC ID# 242V, PCGS# 5699

1913 Quarter Dollar, PR66+ Colorful Toning

- 3569 1913 PR66+ PCGS. CAC. The Cameo population of the 1913 proof is limited, although at the Premium Gem level even non-Cameo pieces such as this are scarce. Boasting a rarely seen CAC green label, this Plus-graded coin displays attractive sea-green, yellow-gold, fire-orange, and forest-green toning over each side, with sharp, satiny design elements underneath. The glimmering fields complement the patina.

 From The Property of a Lady. NGC ID# 242V, PCGS# 5699
- 3570 1915 PR67 NGC. An amazing Superb Gem proof, this 1915 Barber quarter is one of just 450 proofs minted that year. Light gold toning resides at the border on each side, with brilliant and untoned silver at the centers. Census: 14 in 67 (2 in 67★), 5 finer (1/18). NGC ID# 242X, PCGS# 5701

STANDING LIBERTY QUARTERS

- 3571 1917 Type One MS66 Full Head PCGS. This is a fully struck and remarkably well-preserved example of the second-year Type One Standing Liberty quarter. The faintest trace of light golden toning warms the vibrantly frosted surfaces. The Type One issue was in production through the first half of the year, after which it was replaced by MacNeil's reworked design that incorporated chain mail on Liberty's torso and elevated the eagle in the reverse field. Ex: Long Beach Signature (Heritage, 5/2008), lot 456. NGC ID# 242Z, PCGS# 5707
- 3572 1917 Type One MS66 Full Head PCGS. CAC. Dazzling luster radiates from frosty, silver-gray surfaces and sharp design elements on this high-end, CAC-endorsed type coin. A few minute marks are noted on Liberty's chest and knee, but there are no other distractions. CAC-approved Type One quarters in this and finer grades are moderately scarce and highly sought-after.

 Ex: Long Beach Signature (Heritage, 6/2006), lot 1439. NGC ID# 242Z, PCGS# 5707
- 3573 1917-D Type One MS66 PCGS. CAC. Frosty and highly brilliant mint luster graces the obverse and reverse surfaces of this sharply defined Premium Gem Type One quarter. Although shy of a Full Head designation, this piece has far finer details than most other undesignated examples. NGC ID# 2432, PCGS# 5708
- 3574 1917-D Type One MS65 Full Head NGC. As with most Type One 1917 coins, this Denver piece is sharply struck. The surfaces are softly frosted and original, showing a subtle champagne hue overall with no bothersome abrasions. The leading edge of the eagle's left (facing) wing a usual trouble spot on Type One quarters is sharp on this piece. NGC ID# 2432, PCGS# 5709
- 3575 1917-S Type One MS65 Full Head PCGS. The luster on this piece is vibrant and frosty, showing no toning. Sharp design elements complement a lack of major abrasions on the obverse, and the only mentionable flaw on the reverse is a long graze on the leading edge of the eagle's left (facing) wing. The S-mint coin is the scarcest of the Type One 1917 issues, although pieces in this grade are usually available to collectors. NGC ID# 2433, PCGS# 5711

1917-S Type One Quarter, MS66 Full Head Seldom Available Finer

- 3576 1917-S Type One MS66 Full Head PCGS. This sharp Premium Gem displays hints of russet toning atop satiny mint luster. A few microscopic ticks are not distracting and certainly not out of line for the grade. The 1917-S is the scarcest Type One issue of this year in high grade. PCGS has seen only 18 Full Head coins numerically finer than the present (1/18). NGC ID# 2433, PCGS# 5711
- 3577 1917-D Type Two MS64 Full Head PCGS. Sharp head detail and partial shield rivets make this Choice coin above average for the Type Two 1917-D issue. Satiny luster yields subtle champagne hues, and abrasions are light and mostly unnoticeable to the naked eye. NGC ID# 2435, PCGS# 5717

1918 Quarter Dollar, MS66 Full Head Vibrant Mint Luster

- 3578 1918 MS66 Full Head PCGS. High-grade Full Head examples of this otherwise plentiful Philadelphia issue are scarce. This Premium Gem is not only sharp on the head, toes, and central gown folds, it also displays blazing frost-white luster and untoned surfaces. The shield rivets are a trifle weak, which is not always the case on the 1918 issue. Population: 54 in 66 (5 in 66+) Full Head, 14 finer (1/18). NGC ID# 2437, PCGS# 5721
- 3579 1918/7-S FS-101 Good 6 PCGS. The 1918/7-S overdate competes with the 1916 for the prize of series key. A gunmetal-gray example with partial wing plumage. The date is faint, but the surfaces are pleasing for the grade, with only a single diagonal mark noted near the elbow of Liberty's extended arm.

From The E.B. Strickland Collection, Part II. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

1918/7-S Quarter, XF Details FS-101, Famous 20th Century Hubbing Error

- 3580 1918/7-S FS-101 Cleaning PCGS Genuine. XF Details. The most famous variety in the series is widely sought-after across all grade levels, from Poor to the highest reaches of Mint State. This is a pleasing mid-grade example with bold design detail, perfect for collectors on a limited budget. Dusky, muted surfaces are the result of a cleaning that does not overly detract.
- 3581 1918-S MS65 PCGS. CAC. A lustrous pearl-white Gem. Marks are virtually absent, and the grade is limited solely by incompleteness of strike on Liberty's head. The date and mintmark are sharply impressed.

 Ex: Pre-Long Beach Auction (Ira & Larry Goldberg, 6/2013), lot 2768, which realized \$1,006.

From The Bayside Collection. NGC ID# 2439, PCGS# 5724

- 3582 1918-S MS63 Full Head PCGS. A lustrous and splendidly unabraded representative. The strike favors Liberty's head, though the waist and the top of the date are incompletely brought up. The reverse field exhibits die polish lines, as made. Encased in an old green label holder. NGC ID# 2439, PCGS# 5725
- 3583 1919 MS65 Full Head PCGS. CAC. This is an eye-catching, brilliant Gem with frosty surfaces and sharp devices. Liberty's head details are what J.H. Cline would have called "ultimate," but equally important are the full shield rivets. No singular abrasions are observed.

 Ext. FUN Simpature (Harriage, 1/2007), lot 4169, NGC UD# 243B.

Ex: FUN Signature (Heritage, 1/2007), lot 4169. NGC ID# 243B, PCGS# 5729

3584 1920 MS66 Full Head PCGS. Tiny flecks of gold, olive, rose, and blue appear throughout champagne-gray toning on this Premium Gem, while frosty luster shows only a few minor abrasions, none out of line for the grade. Liberty's head meets the requirements for a Full Head designation, although the definition grows weak at the temple, as usual for this issue. Full Head examples of the 1920 quarter dollar are scarce in MS66 and rare finer. Population: 44 in 66 (6 in 66+) Full Head, 8 finer (12/17). NGC ID# 243E, PCGS# 5735

1920-D Quarter Dollar, MS66+ Well-Struck, Few Known Finer

3585 1920-D MS66+ PCGS. This high-end 1920-D quarter dollar displays partial head detail and above-average definition on the shield rivets. The tops of the date numerals are weak, as usual. Original, frosty luster appears on each side with golden and russet border toning around the obverse. A few faint grazes on the left wall next to Liberty are all that prevent an even finer grade. Population: 39 in 66 (3 in 66+), 3 finer (1/18). NGC ID# 243F, PCGS# 5736

- 3586 1920-D AU55 Full Head PCGS. CAC. A rare circulated example of the 1920-D quarter dollar that still has Full Head detail, this CAC-approved Choice AU coin also displays sharp detail on the shield rivets and the eagle's feathers. The date numerals are weak, as usual for the issue. Olive-gold and greenish toning blankets each side with a few hints of field luster. NGC ID# 243F, PCGS# 5737
- 3587 1920-D MS62 Full Head NGC. Incredibly sharp head detail and mostly defined shield rivets are the hallmarks of this lower-end Mint State 1920-D quarter. Satiny mint luster illuminates light russet toning, and only light, well-hidden abrasions limit the grade. The 1920-D is a better date in Full Head, and low-end Uncirculated pieces with good eye appeal are always in demand. Census: 14 in 62 Full Head, 55 finer (12/17). NGC ID# 243F, PCGS# 5737
- 3588 1923 MS67 PCGS. The 1923 Standing Liberty quarter is scarce in MS67, and only six pieces in this grade are designated Full Head at PCGS (1/18). The present coin just missed a Full Head designation the ear area is full and the hairline is complete, but the three leaves at the top of the head are indistinct. Sharp shield definition and a bold date add to the eye appeal. This satiny, well-preserved Registry coin displays lovely golden toning. Population: 85 in 67 (9 in 67+), 0 finer (1/18). NGC ID# 243], PCGS# 5742
- 3589 1923-S XF45 PCGS. From a modest mintage of 1.3 million pieces, the 1923-S Standing Liberty quarter is a better date in the series. This Choice XF specimen shows some light wear, but the date is plainly legible and most interior detail on the central design elements remains intact.

From The E.B. Strickland Collection, Part II. NGC ID# 243K, PCGS# 5744

3590 1923-S AU50 PCGS. CAC. Significant areas of iridescence complement otherwise golden-toned, lightly worn surfaces on this CAC-approved AU example. The date numerals are clear, and some satiny luster remains in the fields and design recesses. The 1923-S is considered a key date in circulated condition and is in high demand at the AU level. NGC ID# 243K, PCGS# 5744

1923-S Quarter, CAC-Approved MS66 Exceptional Frosty Luster

- 3591 1923-S MS66 PCGS. CAC. Frosty, luminous mint luster on this Premium Gem dazzles the eye under magnification, a welcome characteristic over the usual satiny or even dull luster that this issue often has. Liberty's head is incomplete in the vicinity of the ear but is otherwise sharp. Liberty's toes are full, and the shield rivets exhibit partial definition. Seldom offered this fine with a CAC green label. Population: 39 in 66 (2 in 66+), 7 finer. CAC: 18 in 66, 2 finer (1/18). NGC ID# 243K, PCGS# 5744
- 3592 1925 MS66 Full Head PCGS. CAC. A conditionally elusive Premium Gem example with Full Head detail and well-defined shield rivets. Liberty's toes and the eagle's feathers are also sharp. Olive-gold toning blankets the satiny mint luster and no major abrasions are seen. This is the first year of the recessed date, making it an important type coin within the series. NGC ID# 243P, PCGS# 5753
- 3593 1926 MS66 Full Head PCGS. Delicate iridescence beautifully accentuates the frosty, luminous luster of this high-end Full Head example. The shield rivets, Liberty's toes, and the leading edge of the eagle's left (facing) wing also benefit from the sharp strike. No distracting abrasions are seen. Population: 47 in 66 (8 in 66+) Full Head, 3 finer (1/18). NGC ID# 243R, PCGS# 5755

3594 1928-S MS66 Full Head NGC. This lustrous Premium Gem is nearly brilliant on the obverse and displays dappled apple-green and russet toning over the reverse. Liberty's ear and the shield rivets are a trifle weak, but the strike is otherwise excellent. No distracting abrasions are seen. Finer Full Head 1928-S quarters are scarce. Ex: Baltimore Signature (Heritage, 3/2009), lot 1184. NGC ID# 243Z, PCGS# 5771

1929-D Quarter, MS65 Full Head Underrated and Very Scarce So Sharp

- 3595 1929-D MS65 Full Head PCGS. Cline extols the virtues of the 1929-D quarter in Full Head, calling it "very scarce" and "certainly an underrated coin." Roughly 2% of the 1.3 million examples struck qualify for Full Head designation. Indeed, Liberty's head is fully defined. The chainmail, shield, and rivets are similarly strong, while the date and eagle's breast feathers are trivially soft. Each side presents attractive blushes of golden-russet and cobalt-blue toning intermixed with areas of brilliance. Population: 47 in 65 Full Head, 18 finer (1/18). NGC ID# 2443, PCGS# 5775
- 3596 1930-S MS66 ★ Full Head NGC. CAC. The Star designation and CAC endorsement are well-warranted on this Premium Gem. Frosty, brilliant luster is virtually pristine, and the strike is above average on the head and shield rivets. Eye appeal is about as strong and quality is about as superb as is possible without warranting an even finer grade. NGC ID# 2446, PCGS# 5781

WASHINGTON QUARTERS

- 3597 1932 MS66+ PCGS. Pale, iridescent olive-gold toning blankets the left-hand portion of each side, while the remainder shows lighter pastel hues. The strike is crisp and the frosty luster cartwheels without interruption. PCGS has Plus-graded only 35 Premium Gems and lists seven MS67s finer (1/18). Ex: Beverly Hills Signature (Heritage, 11/2014), lot 3530. From The jwb1040 Collection. NGC ID# 2447, PCGS# 5790
- 3598 1932-D MS63 NGC. This is a sharp, highly lustrous example of the key 1932-D quarter dollar, that shows traces of golden toning on each side. A few small abrasions account for the grade, but eye appeal nonetheless surpasses expectations for this level. The Washington quarter debuted as a circulating commemorative in 1932, celebrating the bicentennial of George Washington's birth, and the low mintage of the 1932-D (436,800 pieces) reflected the lack of need for circulating coinage in 1932, during the height of the Great Depression. NGC ID# 2448, PCGS# 5791
- 3599 1932-D MS63 NGC. CAC. A hint of champagne toning and satiny luster complement well-struck design elements on this keydate Washington quarter. A few small abrasions are seen under a loupe, but the preservation is outstanding for the MS63 grade. Few CAC-approved coins are known in this grade. NGC ID# 2448, PCGS# 5791

1934 Quarter, Frosty MS67 Light Motto, FS-401

3600 1934 Light Motto, FS-401, MS67 PCGS. The 1934 Light and Heavy Motto Washington quarters are not only Registry Set essentials, they are also *Guide Book* varieties, helping to increase their popularity and collectibility. This richly frosted Superb Gem is basically untoned with just the slightest suggestion of golden and ice-blue color, unmarked throughout and extremely attractive. Population: 23 in 67 (4 in 67+), 0 finer (1/18).

Ex: ANA National Money Show Signature (Heritage, 2-3/2014), lot 3800

From The jwb1040 Collection. NGC ID# 7JK9, PCGS# 146000 Base PCGS# 5794

3601 1934 Medium Motto, FS-402, MS67+ PCGS. CAC. The Medium Motto is the most plentiful of the three 1934 hub types, although it is conditionally scarce in MS67 and extremely rare in MS68. PCGS has Plus-graded 19 MS67s and lists two MS68s finer (1/18). This CAC-approved coin displays vibrant, frosty mint luster and virtually perfect surfaces, cast in delicate champagne and iridescent toning. CAC: 38 in 67, 1 finer (1/18).

From The jwb1040 Collection. PCGS# 146002 Base PCGS# 5793

3602 1934 Heavy Motto, FS-403, MS67 PCGS Secure. Three distinct hub types were used in 1934 with light, medium, and heavy mottos respectively. Breen's *Encyclopedia* estimated that 3.4 million Heavy Motto coins were struck, but David Lange argued in his 2003 article in *The Numismatist*: "I believe the third hub is rarer than his figures suggest." The appeal of this all-brilliant Superb Gem is irrefutable. Frosty luster cartwheels over pristine surfaces with well-defined motifs. A few unimportant ticks on the reverse define the grade. Population: 14 in 67 (3 in 67+), 0 finer (1/18).

Ex: Central States Signature (Heritage, 4/2015), lot 4295.

From The jwb1040 Collection. PCGS# 146001 Base PCGS#

3603 1934-D Medium Motto MS66+ PCGS. CAC. Dusky gold and russet toning appears on each side, masking any insignificant abrasions that prevent absolute perfection on this CAC-approved Premium Gem. The strike is slightly uneven, being weak along the upper obverse and lower reverse borders but bold elsewhere. PCGS has seen only nine finer Medium Motto coins (1/18). NGC ID# 244C, PCGS# 5796

1934-D Washington Quarter, MS67 Among the Top Medium Motto Representatives

3604 1934-D Medium Motto MS67 PCGS. The middle peak of the W in WE is lower than the outside members, identifying the popular Medium Motto type. This attractive Superb Gem displays sharply detailed design elements and lustrous, impeccably preserved surfaces with speckled sea-green toning on the obverse. Population: 9 in 67, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 244C, PCGS# 5796

3605 1934-D Heavy Motto MS66+ PCGS. Normal D. The Heavy Motto Denver issue is scarce in MS66 and extremely rare finer, being in high demand among Registry Set collectors. PCGS lists 13 in MS66+ and four MS67s finer (1/18). This satiny example is mostly brilliant on the reverse and displays rose-gold and champagne hues across the obverse.

From The jwb1040 Collection. NGC ID# 244C, PCGS# 85796

3606 1935 MS67+ PCGS. CAC. Both sides of this remarkably beautiful and high-end 1935 quarter show rainbow toning, but the colors are in pastel shades that melt into the thickly frosted surfaces and take on an iridescent appeal. Sharp devices and unabraded surfaces add to the visual charm. PCGS lists 18 coins in MS67+ and one MS68 finer. CAC: 60 in 67, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 244D, PCGS# 5797

3607 1935-D MS67 PCGS. A mere hint of lemon-gold and lilac toning hovers over the brilliant-white surfaces of this pristine Superb Gem quarter. No examples are certified numerically finer at either PCGS or NGC, nor are any likely to exceed the eye appeal of this brightly lustrous coin. Population: 25 in 67 (2 in 67+), 0 finer (1/18). Ex: PNG Invitational Signature (Heritage, 10/2014), lot 3499. From The jwb1040 Collection. NGC ID# 244E, PCGS# 5798

1935-S Quarter, MS67+ Condition Census Registry Coin

3608 1935-S MS67+ PCGS. CAC. This Plus-graded Superb Gem 1935-S Washington quarter, bearing a green CAC sticker, ranks atop the Condition Census for Registry collectors. The strike is sharp, and softly frosted, unabraded surfaces yield glowing mint luster. Wisps of pale champagne color appear on each side. Population: 78 in 67 (5 in 67+), 0 finer. CAC: 17 in 67, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 244F, PCGS# 5799

1936 FS-101 Quarter, MS66 Doubled Die Obverse, None Graded Finer

3609 1936 Doubled Die Obverse, FS-101, MS66 PCGS. The obverse of this impressive Premium Gem is strongly doubled, a feature most easily seen on the letters in the motto IN GOD WE TRUST. The design elements are sharply detailed and well-preserved surfaces show highlights of golden-brown and amber toning. This is one of the top-graded examples at both services and a strong Registry contender. Population: 2 in 66, 0 finer (1/18).

Ex: Long Beach Signature (Heritage, 9/2015), lot 3647.

From The jwb1040 Collection. NGC ID# 244G, PCGS# 146091 Base PCGS# 5800

1936-D Quarter, MS67 Tied for Finest

- 3610 1936-D MS67 PCGS. Despite a mintage of 5.3 million coins, the 1936-D was not greatly saved. The issue claims an average certified grade between MS60 and MS61. This spectacular Superb Gem is tied among the finest examples at both PCGS and NGC, making it perfect for a top Registry Set. Each side remains wholly brilliant and thickly frosted. A loupe is required to bring a couple of tiny ticks into view. Population: 23 in 67 (2 in 67+), 0 finer (1/18). From The jwb1040 Collection. NGC ID# 244H, PCGS# 5801
- 3611 1937-S MS67 PCGS. An impressive example of this early Washington quarter issue, which boasts the third-lowest business strike mintage of the series (1.6 million coins). This is a beautiful, untoned Superb Gem with frosty luster. Sharply struck with smooth, near-flawless surfaces. Population: 52 in 67 (3 in 67+), 0 finer (1/18).

Ex: Central States Signature (Heritage, 4/2014), lot 3521; Summer FUN Signature (Heritage, 7/2014), lot 3416.

From The jwb1040 Collection. NGC ID# 244M, PCGS# 5805

3612 1938-S MS67+ PCGS. CAC. A thin speckling of coffee-brown toning on the obverse is secondary to the primarily frosty-silver luster that prevails over the balance of the Superb Gem surfaces. The strike is sharp, coupling with outstanding eye appeal that imbues this CAC-endorsed Registry Set candidate. No finer pieces are listed at PCGS. Population: 79 in 67 (9 in 67+), 0 finer. CAC: 16 in 67, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 244P, PCGS# 5807

3613 1939-D MS67+ PCGS. CAC. PCGS reports eight Plus-graded coins in MS67 as the finest at that service (1/18). This example shows a hint of iridescent toning atop satiny luster and sharp devices. A single, tiny tick on Washington's cheek appears to be the only discernible blemish. CAC: 30 in 67, 0 finer (1/18). From The jwb1040 Collection. NGC ID# 244S, PCGS# 5809

1940-D Quarter, MS67+ Vibrant Mint Luster, Finest at PCGS

3614 1940-D MS67+ PCGS. CAC. 30th Anniversary green label holder. Quarter dollar production was markedly smaller at the Denver Mint in 1940 than it was in Philadelphia or San Francisco. Merely 2.7 million coins were struck, and this piece is one of the finest survivors. This high-end Superb Gem is sharply detailed throughout with vibrant mint luster and subtle hints of greenishgold toning. Population: 59 in 67 (3 in 67+), 0 finer. CAC: 25 in 67, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 244V, PCGS# 5812

3615 1940-D Doubled Die Obverse, FS-101, MS66 PCGS. Strong die doubling is visible on IN GOD WE TRUST. PCGS has only attributed five examples of this elusive variety, with this piece and one other MS66 tied for the finest (1/18). The interiors are satiny and brilliant with no distracting abrasions. Thin ribbons of rainbow toning are visible along the lower obverse and upper reverse rims. From The jwb1040 Collection. PCGS# 146092 Base PCGS# 5812

1941-D Quarter, MS67 FS-101, Doubled Die Obverse

3616 1941-D Doubled Die Obverse, FS-101, MS67 PCGS. This Doubled Die Obverse variety has long been known by specialists in the Washington quarter series, but its recent inclusion in the Cherrypicker's Guide should add considerably to its appeal. Doubling is clearest on the motto and 41 in the date. Speckled golden tones occur mostly around the rims, leaving the centers brilliant. A sharply struck, top-graded example of this interesting variety. Population: 1 in 67, 0 finer (1/18).

From The jwb1040 Collection. PCGS# 511571 Base PCGS# 5815

- 3617 1941-S MS67+ PCGS. Registry collectors have a number of Superb Gem 1941-S quarters from which to choose, but Plusgraded coins are few and far between. This top-grade PCGS coin boasts sharp detail and satiny luster. The interiors are brilliant, and the peripheries display russet, amber, and olive toning. PCGS has Plus-graded 13 MS67s with none finer (1/18).
 From The jwb1040 Collection. NGC ID# 244Z, PCGS# 5816
- 3618 1942 MS67+ PCGS. Powder-blue and golden accents appear over mostly brilliant, beautifully preserved surfaces. A couple of minuscule ticks on the left (facing) wing and leg are the only apparent marks, and a strong loupe is required to bring them into focus. The Plus designation is well-earned. Few 1942 quarters are certified this fine at PCGS, and none are superior. Population: 54 in 67 (10 in 67+), 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 2452, PCGS# 5817

- 3619 1942 Doubled Die Reverse, FS-801, MS65 PCGS. OF AMERICA is die doubled with a spectacular spread. E PLURIBUS UNUM also exhibits impressive doubling. The wings, QUARTER, and STATES show minor doubling. Lustrous and essentially brilliant with exemplary surfaces. Population: 1 in 65, 1 finer (1/18). From The jwb1040 Collection. PCGS# 146057 Base PCGS#
- 3620 1942-D MS67+ PCGS. CAC. This magnificent high-end Superb Gem exhibits sharp design elements and vibrant mint luster throughout. The well-preserved surfaces show a few traces of greenish-gold toning and no mentionable distractions. Overall eye appeal is terrific. A beautiful Registry coin and a condition rarity with the CAC green label. Population: 56 in 67 (6 in 67+), 2 finer. CAC: 16 in 67, 1 finer (1/18).

Ex: FUN Signature (Heritage, 1/2014), lot 4297.

From The jwb1040 Collection. NGC ID# 2453, PCGS# 5818

1942-D Doubled Die Obverse Quarter, MS63 FS-101, Major Rarity at This Level

- 3621 1942-D Doubled Die Obverse, FS-101, MS63 PCGS. Doubling is most evident on the motto and LIBERTY. This sought-after Guide Book listing is scarce in any grade but is major condition rarity at this level. Daubs of dusky almond-gold patina blend with remaining brilliance. Satin luster shines from each side. There a couple of ticks on the cheek and neck, but not much else. Population: 4 in 63, 3 finer (1/18).
 - From The jwb1040 Collection. NGC ID# 2452, PCGS# 145011 Base PCGS# 95818
- 3622 1942-D Doubled Die Reverse, FS-801, MS65 PCGS. The eagle and wreath a boldly die doubled on this important variety. The doubling is reminiscent of the "Shifted Eagle" doubled die on the 1901 Morgan dollar. PCGS has graded only eight Gem examples of this variety (four in MS65+) and three Premium Gems finer (1/18). This piece displays orange-gold, champagne, and sea-green toning in varying amounts on each side, with satiny, unabraded luster. From The jwb1040 Collection.
- 3623 1942-S MS67+ PCGS. CAC. A mintage exceeding 19.3 million pieces might suggest a higher availability for the 1942-S at this grade level, but such is not the case. Examples graded MS67 are scarce. Superb Gems with CAC approval are rare, and Plus-graded, CAC-approved coins are major condition rarities. This piece is thickly frosted with a ring of golden-russet, violet, and blue patina around the edges. Population: 67 in 67 (9 in 67+), 2 finer. CAC: 28 in 67, 0 finer (1/18).
 - From The jwb1040 Collection. NGC ID# 3TEN, PCGS# 5819
- 3624 1943 MS67+ PCGS. CAC. A Registry Set candidate, this CACapproved, high-end Superb Gem displays sharp motifs and vibrant, satiny mint luster. Delicate lavender and champagne hues encompass much of each side, but the obverse periphery displays additional mint-green and olive-gold color. PCGS has Plus-graded 16 MS67s and lists three MS68s finer. CAC: 59 in 67, 4 finer (1/18). From The jwb1040 Collection. NGC ID# 2455, PCGS# 5820
- 3625 1943 MS67+ PCGS. CAC. Light honey-gold toning graces this lustrous and well-preserved Superb Gem. Due to the concave borders, the strike shows minor incompleteness on the date and AMERICA. As of (1/18), PCGS has certified 16 pieces as MS67+ with only 3 finer. NGC ID# 2455, PCGS# 5820

- 3626 1943 Doubled Die Obverse, FS-102, MS67 PCGS. Cherrypickers' states that "this variety is very popular among Washington specialists." LIBERTY is nicely die doubled, with the spread most apparent on the stand of the Y. Virtually brilliant with booming luster and a sharp strike. A blush of tan toning is beneath Washington's queue.
 - From The jwb1040 Collection. NGC ID# 2455, PCGS# 145619 Base PCGS# 95820
- 3627 1943-D MS67+ PCGS. Untoned and brilliant, this gleaming, frosted Superb Gem is at the top of its grade as designated by the PCGS Plus award. Both the strike and the mint luster are exceptional. PCGS and NGC each report only a single finer piece. Population: 90 in 67 (14 in 67+), 1 finer (1/18). Ex: Long Beach Signature (Heritage, 9/2015), lot 3660.
 - From The jwb1040 Collection. NGC ID# 2456, PCGS# 5821
- 3628 1943-S Doubled Die Obverse, FS-101, MS66 PCGS. This is a must-have coin for collectors building a set of Cherrypickers' Guide or Guide Book varieties, or those putting together a collection of top-graded Washington quarters. The obverse legends all exhibit broad doubling. Clean surfaces are virtually brilliant with cartwheel mint frost. Population: 18 in 66 (4 in 66+), 0 finer (1/18). From The jwb1040 Collection. NGC ID# 2457, PCGS# 145154 Base PCGS# 5823
- 1943-S Doubled Die Obverse, FS-101, MS66 NGC. Strong doubling is evident on the date, motto, and LIBERTY. Radiant luster emanates from both sides of this Premium Gem, each of which displays brief wisps of orange-gold and reddish-purple. Wellstruck throughout. Census: 5 in 66, 2 finer (1/18). Ex: FUN Signature (Heritage, 1/2011), lot 4678. NGC ID# 2457, PCGS# 145154 Base PCGS# 5823
- 3630 1943-S Goiter, FS-401, MS65 PCGS. This is a long-recognized and sought-after variety that is scarce in any grade and rare at the Gem level. The deteriorated obverse die is buckling at the left obverse border and in front of Washington's throat, earning this variety the "Goiter" moniker. This Gem example is frosty and brilliant, showing a bold strike. Population: 4 in 65 (1 in 65+), 1 finer (1/18) From The jwb1040 Collection. PCGS# 511572 Base PCGS#

1944 Quarter, MS67+ Toned Borders Around Frosted Centers

- 3631 1944 MS67+ PCGS. CAC. Crimson and golden-orange borders cede to frosty untoned centers. The Plus designation and CAC endorsement affirm both the eye appeal and high-end nature of this piece for the Superb Gem assessment. There are no abrasions to report. A die crack travels through Washington's head. None graded higher at PCGS. CAC: 38 in 67, 0 finer (1/18) From The jwb1040 Collection. NGC ID# 2458, PCGS# 5824
- 3632 1944-D MS67+ PCGS. CAC. Satiny, vibrantly lustrous surfaces display iridescent toning throughout, with deeper olive-gold and amber color around the obverse margin. This high-end Superb Gem is a Registry Set must-have. PCGS has Plus-graded only 20 MS67s and lists two MS68s finer. CAC: 48 in 67, 0 finer (1/18). From The jwb1040 Collection. NGC ID# 2459, PCGS# 5825

1944-S Quarter, MS68+ The Single Finest Certified

- 3633 1944-S MS68+ NGC. As the only Plus-graded MS68 1944-S Washington quarter at NGC or PCGS, this remarkably highend Registry coin is the single finest example of the date known. Vivid fire-red, jade-green, and orange-gold toning on the obverse undoubtedly helps the grade, though the reverse is nearly brilliant. Both sides are sating and well-struck. Census: 7 in 68 (1 in 68+, 2 in 68★), 0 finer (1/18). NGC ID# 245A, PCGS# 5826
- 3634 1944-S Doubled Die Obverse, FS-101, MS67 PCGS. The doubling is evident on IN GOD WE TRUST, visible with a 10x loupe. This variety is moderately plentiful in lower grades, but the present coin is tied with four others as the finest attributed by PCGS (1/18). Softly frosted surfaces are free of abrasions and exhibit a dusting of light golden and iridescent toning.

From The jwb1040 Collection. NGC ID# 245A, PCGS# 144442 Base PCGS# 5826

3635 1945 MS67+ PCGS. CAC. It is amazing to consider how few 1945 Washington quarters survive in MS67 given a massive production of 74.3 million coins. All Superb Gems are scarce, but high-end examples with Plus designations and CAC stickers are major rarities. Dusky patina reveals translucent elements of tangold and crimson on the obverse of this piece. The reverse shows a few splashes of color but is otherwise brilliant. Thickly frosted and tremendously appealing. Population: 48 in 67 (7 in 67+), 2 finer. CAC: 22 in 67, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 245B, PCGS# 5827

1945-D Quarter, Attractive MS67+ Tied for Finest at PCGS

3636 1945-D MS67+ PCGS. CAC. Remarkably few 1945-D Washington quarters survive in Superb Gem condition and none are finer than this Plus-designated piece at PCGS. The strike is bold, and the preservation is excellent — chief considerations when selecting a Registry Set coin. This piece displays vivid pine-green, crimson, and sun-gold toning around the obverse periphery with russet coloration around the reverse border. The interiors are essentially brilliant. Population: 63 in 67 (12 in 67+), 0 finer. CAC: 27 in 67, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 245C, PCGS# 5828

3637 1945-S MS67+ PCGS. CAC. At PCGS, the finest 1945-S Washington quarters listed grade MS67+. This CAC-approved coin is essentially the best possible quality that a Registry Set collector can acquire. Beautiful, blazing mint luster yields just the faintest hint of iridescence on each side, with deeper russet, green, and crimson tinges visible around the outer edge. This eye-catching coin is arguably the most attractive 1945-S quarter that we have seen. Population: 74 in 67 (12 in 67+), 0 finer. CAC: 33 in 67, 1 finer (1/18).

From The jwb1040 Collection. NGC ID# 245D, PCGS# 5829

3638 1946 MS67+ PCGS. CAC. The 1946 Washington quarter is remarkably scarce in MS67 and unknown numerically finer. A handful of Plus-graded coins are the finest at PCGS. This CACapproved example displays a full strike and seemingly flawless surfaces. Delicate mint-gold interior toning cedes to pastel multicolor hues at the borders. Population: 46 in 67 (8 in 67+), 0 finer. CAC: 17 in 67, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 245E, PCGS# 5830

1946-D Quarter, MS67+ Beautiful Luster and Border Toning

3639 1946-D MS67+ PCGS. CAC. 30th Anniversary Green Label Holder. Vivid forest-green, violet, and gold border toning appears around the obverse rim and occasionally around the reverse as well. The interiors offer warm champagne color atop softly frosted mint luster. The strike is sharp, and the preservation is unsurpassed in a PCGS holder. Among the finest endorsed by CAC. Population: 75 in 67 (3 in 67+), 0 finer. CAC: 24 in 67, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 245F, PCGS# 5831

3640 1947 MS67+ PCGS. CAC. Although the 1947 quarter dollar is not truly rare in MS67, no numerically finer pieces are reported at PCGS. PCGS lists nine Plus-graded Superb Gems as the finest (1/18). This CAC-approved coin is a must-have item for Registry Set collectors. Glistening, pristine surfaces yield delicate golden tinting and sharp motifs. There are no distractions visible. From The jwb1040 Collection. NGC ID# 245H, PCGS# 5833

3641 1947-D MS67+ PCGS. CAC. Only 20 MS67 coins are Plusgraded at PCGS, and a single MS68 is finer (1/18), giving this CAC-approved coin a claim in the Condition Census and correspondingly strong appeal for the Registry Set collector. Iceblue and lavender interiors cede to varying shades of gold and amber around the peripheries. The motifs are boldly rendered, and the frosty luster is uninterrupted by abrasions.

Ex: Houston Signature (Heritage, 12/2015), lot 3724. From The jwb1040 Collection. NGC ID# 245J, PCGS# 5834

3642 1948-D MS67+ PCGS. CAC. A top-grade Registry coin, this high-end Superb Gem 1948-D Washington quarter displays full detail and satiny mint luster with no bothersome abrasions. Deep olive-gold and amber toning on each side appears in varying intensities. Eye appeal is pleasing. Population: 97 in 67 (9 in 67+), 0 finer. CAC: 29 in 67, 0 finer (1/18). From The jwb1040 Collection. NGC ID# 245M, PCGS# 5837

3643 1948-S MS67+ PCGS. CAC. Light golden interiors cede to deeper sea-green, amber, and lavender border toning on this highend, CAC-approved Registry coin. The strike is sharp and no distracting abrasions are visible. PCGS has seen only 20 coins in MS67+ and one MS68 finer (1/18).

From The jwb1040 Collection. NGC ID# 245N, PCGS# 5838

3644 1949 MS67+ PCGS. CAC. With a paltry two coins finer at PCGS, this Plus-graded Superb Gem 1949 quarter is well within the cross hairs of Registry Set collectors. Rich satin luster is almost immaculately preserved, showing near-brilliance in the centers with transitional tan-gold, lavender, mint-green, and lemonyellow peripheral colors. The strike is bold, and the eye appeal is exceptional. Population: 92 in 67 (14 in 67+), 2 finer. CAC: 42 in 67, 1 finer (1/18).

From The jwb1040 Collection. NGC ID# 245P, PCGS# 5839

1950-D/S Quarter, FS-601, MS65 Popular Guide Book Variety

3645 1950-D/S FS-601 MS65 PCGS. CAC. The remnants of an undertype S are visible below the primary D mintmark on this popular *Cherrypickers*' variety. The design elements are sharply rendered and the well-preserved surfaces radiate vibrant mint luster. Eye appeal is outstanding. Population: 19 in 65 (1 in 65+), 19 finer. CAC: 2 in 65, 9 finer (1/18).

Ex: FUN Signature (Heritage, 1/2015), lot 4782.

From The jwb1040 Collection. NGC ID# 245T, PCGS# 145638 Base PCGS# 5843

1950-S Quarter, MS67+ Registry-Quality Example

3646 1950-S MS67+ PCGS. CAC. Thick mint frost prevails on both sides, with the untoned central area considerably larger on the reverse and bounded by deep amber and jade patina on the obverse. Sharply struck and beautifully preserved. PCGS has seen a handful of Plus-graded Superb Gems, and only one coin is graded higher at that service (1/18).

From The jwb1040 Collection. NGC ID# 245V, PCGS# 5844

3647 1950-S/D FS-601 MS66+ PCGS. CAC. This is a prominent overmintmark variety. Examples are often available, but seldom is this true in MS66 and rarely is a finer coin seen. The Plusgraded Premium Gem offered here displays warm golden luster with additional flecks of russet and sea-green on the obverse. The strike is sharp and no abrasions distract from the frosty, attractive surfaces. Population: 67 in 66 (12 in 66+), 6 finer. CAC: 22 in 66, 2 finer (1/18).

From The jwb1040 Collection. NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

3648 1952 MS67+ PCGS. CAC. Mottled toning forms concentric patterns on this high-end Superb Gem, emitting lavender and cool blue hues in the centers with spruce-green, yellow-gold, and amber-red around the peripheries. The strike is bold and the preservation is excellent. This CAC-endorsed 1952 quarter is among the finest in a PCGS holder, suitable for Registry purposes. Only eight MS67s are Plus-designated at this service (1/18). Ex: Houston Signature (Heritage, 12/2015), lot 3725.

From The jwb1040 Collection. NGC ID# 245Z, PCGS# 5849

3649 1952-D MS67 PCGS. CAC. This Superb Gem 1952-D possesses a wealth of visual attributes, beginning with the beautifully undisturbed surfaces, continuing with the sharp motifs, and ending with eye-catching multicolor toning that casts the satiny surfaces into mottled shades of straw-gold, violet, and forest-green. Among the finest at PCGS and ideal for Registry purposes. Population: 20 in 67, 0 finer. CAC: 6 in 67, 0 finer (1/18).

Ex: Long Beach Signature (Heritage, 6/2015), lot 3722.

From The jwb1040 Collection. NGC ID# 2462, PCGS# 5850

1952-S Washington Quarter, MS68 Lovely Registry-Grade Example

3650 1952-S MS68 PCGS. Ex: Larry Shapiro. A rich circle of orange and reddish-gold color encircles the peripheral areas of this well-struck, well-preserved Superb Gem, virtually free from contact marks or other distractions. The underlying luster is frosty, adding to the splendid eye appeal. Unsurpassed at either service. Population: 5 in 68, 0 finer (1/18).

Ex: Long Beach Signature (Heritage, 9/2003), lot 6923; The Del Rio Collection, Part Two / Pittsburgh Signature (Heritage, 8/2004), lot 6130; Houston Signature (Heritage, 12/2015), lot 3166.

From The jwb1040 Collection. NGC ID# 3TEV, PCGS# 5851

3651 1953 MS67+ PCGS. CAC. Deep gold, teal, violet, and olive toning forms a mottled pattern on the obverse, while the reverse displays similar colors with the addition of forest-green and crimson in the margins. This sharp, beautifully preserved CAC coin is tied for the finest at PCGS, a distinction that makes it essential for Registry Set purposes. Population: 82 in 67 (4 in 67+), 0 finer. CAC: 40 in 67, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 2464, PCGS# 5852

3652 1953-D/S FS-601 MS66 PCGS. CAC. 30th Anniversary Green Label Holder. The underlying S in mainly visible at the top of the primary D on this lesser-known overmintmark variety. The coin offered here is tied with one other MS66 as the finest that PCGS has attributed, making it a superb Registry Set candidate (1/18). A dusting of russet toning accents otherwise champagne-tinted surfaces. No distracting abrasions are seen.

From The jwb1040 Collection. PCGS# 146075 Base PCGS# 5853

3653 1954-D MS67 PCGS. A gorgeous, intensely lustrous Superb Gem example from the Denver mint with silver-gray centers framed by sky-blue, gold, and red coloration in the fields and around the borders. Well-struck and impressively preserved, with near-pristine surfaces and tremendous eye appeal. This is among the finest 1954-D quarters known and it is a rarity as such in a PCGS holder. Population: 19 in 67 (1 in 67+), 0 finer (1/18). Ex: Central States Signature (Heritage, 4/2014), lot 3540; Summer

FUN Signature (Heritage, 7/2014), lot 3743.

From The jwb1040 Collection. NGC ID# 43PC, PCGS# 5856

3654 1957-D MS67+ PCGS. This deeply toned, vibrantly lustrous Registry coin displays steel-blue, russet, olive-gold, forest-green, and crimson hues across almost flawless surfaces. A tiny tick on Washington's nose and another on the eagle's left (facing) leg appear to be the only surface imperfections. PCGS has Plus-graded only four MS67s and lists none finer (1/18).

From The jwb1040 Collection. NGC ID# 246E, PCGS# 5863

- 3655 1958 MS67+ PCGS. This is a razor-sharp Registry candidate, showing satin luster and beautiful multicolor obverse border toning. The reverse is champagne tinted with iridescence along the upper margin. The 1958 is an available date even in MS67, but PCGS has Plus-graded just six coins in this grade and lists none finer (1/18). From The jwb1040 Collection. NGC ID# 246F, PCGS# 5864
- 3656 1959 MS67 PCGS. Tightly concentric rainbow bands surround the peripheries, leaving the central regions with just a suggestion of light golden color. The strike is sharp and a single, small mark on Washington's neck is the only surface imperfection of note. Among the finest certified and scarce as such. Population: 19 in 67 (1 in 67+), 0 finer (1/18).

Ex: Central States Signature (Heritage, 4/2015), lot 4313. From The jwb1040 Collection. NGC ID# 246H, PCGS# 5866

- 3657 1959 Type B Reverse, FS-901, MS66+ PCGS. Ex: Omaha Bank Hoard. One of the chief identifiers of Reverse B is the olive leaf covering the arrowheads. This reverse type is scarce on circulation strikes. The coin offered here is sharp and sating with light golden toning. This high-end Premium Gem is one of the two finest FS-901 coins at PCGS. Population: 32 in 66 (2 in 66+), 0 finer (1/18). From The jwb1040 Collection. NGC ID# 246H, PCGS# 146068 Base PCGS# 5866
- 3658 1960-D MS67 PCGS. A common date in lower grades, the 1960-D Washington quarter is rare in MS67 and unknown finer. This Registry Set candidate displays a bold strike and satiny luster with dusky olive-gold toning overall. Population: 15 in 67, 0 finer (1/18). NGĆ ID# 3TEX, PCGS# 5869
- 3659 1960-D MS67 PCGS. CAC. Deep burgundy, copper, and emerald hues appear on the obverse of this Superb Gem quarter while the reverse is untoned silver-white with a thin ring of pale gold. The preservation puts this piece in a distinct minority of the large mintage, however, showing only a couple of faint pecks on the bust of Washington. Population: 15 in 67, 0 finer. CAC: 7 in 67, 0 finer

Ex: FUN Signature (Heritage, 1/2015), lot 4794. From The jwb1040 Collection. NGC ID# 3TEX, PCGS# 5869

3660 1961 MS67 PCGS. Attractive shades of magenta and sea-green toning visit the impeccably preserved surfaces of this remarkable Superb Gem, with most of the toning on the obverse. The design elements are sharp throughout, and vibrant mint luster radiates from both sides. Among the finest known and rare as such. Population: 11 in 67, 0 finer (1/18).

Ex: Houston Signature (Heritage, 12/2015), lot 3728.

From The jwb1040 Collection. NGC ID# 246M, PCGS# 5870

1962-D Quarter, Delicately Toned MS67 None Certified Numerically Finer

3661 1962-D MS67 PCGS. A beautifully toned Registry coin, this Superb Gem is among the finest-certified 1962-D quarters at both leading services. Both sides show blended lavender and ice-blue toning over much of the central and right-hand areas, with a crescent of olive and sun-gold color along the left-hand border. Sharply struck, with carefully preserved surfaces. Population: 10 in 67 (1 in 67+), 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 246R, PCGS# 5873

3662 1964-D MS67+ PCGS. CAC. A Plus-graded Superb Gem Washington quarter from the last year of the 90% silver composition, this coin exhibits lustrous, lavender-blue centers that yield to vivid shades of sea-green, russet, amber, and magenta at the borders. The design elements are sharp and overall eye appeal is tremendous. Population: 71 in 67 (12 in 67+), 0 finer. CAC: 35 in 67, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 246V, PCGS# 5877

3663 1965 MS67+ PCGS. Registry Set collectors should take notice of this piece, one of the finest finest 1965 Washington quarters in a PCGS holder. The coin is sharp, satiny, and brilliant, showing virtually pristine surfaces. An outstanding coin in every respect. Population: 33 in 67 (5 in 67+), 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 246W, PCGS# 5878

1968-D Quarter, MS68 Nicely Toned, None Finer

3664 1968-D MS68 PCGS. Not only is this 1968-D quarter essentially immaculate, it features delicate, visually appealing shades of powder-blue, lemon-gold, and lavender patina over each side. Remarkably few peers from a mintage of 101 million coins survive so fine. Population: 9 in 68, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 2472, PCGS# 5882

3665 1968-D Doubled Die Reverse, FS-801, MS65 PCGS. Bold die doubling is evident on all reverse lettering and the wreath. This is a scarce variety. PCGS has attributed only five examples, with just two in Mint State (both Gems). Obviously, the present coin is one of those two finest (1/18). Dusky champagne toning blankets satiny, pristine surfaces. The strike is sharp and no significant abrasions are seen.

From The jwb1040 Collection. NGC ID# 3GXM, PCGS# 145807 Base PCGS# 5882

3666 1969-D MS68 PCGS. The combined PCGS and NGC population of the 1969-D quarter in MS68 is only 11 coins, including eight at PCGS and three at NGC (1/18). This PCGS Registry coin displays a full strike and satiny, unabraded luster. Deep golden toning shows multicolor hues in the fields and gives the coin tremendous eye

From The jwb1040 Collection. NGC ID# 2474, PCGS# 5884

3667 1972-D MS68 PCGS. A remarkably high-end example of this Denver issue and greatly rare as such. This sharp, satiny coin is untoned, showing its pristine surfaces without the distraction of patina. Tied for the finest certified and an unsurpassed Registry coin. Population: 9 in 68, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 247A, PCGS# 5890

- 3668 1982-D MS67+ PCGS. This high-end Superb Gem displays sharply detailed design elements and lustrous, impeccably preserved surfaces, under shades of greenish-gold and lavender patina. Eye appeal is tremendous. Tied with one other Plus-graded coin as the finest at PCGS. Population: 42 in 67 (2 in 67+), 0 finer (1/18). From The jwb1040 Collection. NGC ID# 247V, PCGS# 5913
- 3669 1985-P MS67 PCGS. PCGS has awarded the lofty MS67 grade designation to only 10 coins with none finer (1/18). This piece, untoned and sating with pristine surfaces, represents unsurpassable quality and rarity for the Registry Set collector. Sharp design elements add to the visual appeal.

From The jwb1040 Collection. NGC ID# 2482, PCGS# 5918

3670 1992-D MS67 PCGS. Registry collectors will find the 1992-D quarter an extreme rarity in certified Superb Gem condition. This Condition Census coin is well-struck with radiant, champagnetinged luster. Some die erosion is seen in the peripheral fields, and parallel diagonal die lines dominate the fields adjacent to the portrait. Population: 5 in 67, 1 finer (1/18).

From The jwb1040 Collection. NGC ID# 248H, PCGS# 5933

SMS WASHINGTON QUARTERS

3671 1965 SMS SP68 Cameo PCGS. Most 1965 Special Mint Set pieces are brilliant or semibrilliant (2018 *Guide Book*, p. 362). This Superb Gem quarter, on the other hand, displays semifrosted devices highlighted by mirrored fields, yielding a Cameo appearance. This coin is an excellent choice for a Registry Set. Population: 3 in 68 Cameo, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 27J9, PCGS# 85997

3672 1967 SMS SP67 Deep Cameo PCGS. PCGS has certified only 33 Deep Cameo examples of the 1967 Special Mint Set quarter, most of which are high-grade coins such as this piece. The strike is full, and the brilliant surfaces display stark white-on-black contrast such that the eye appeal is comparable to a proof. Suitable for Registry purposes. Population: 16 in 67 Deep Cameo, 4 finer (1/18). From The jwb1040 Collection. NGC ID# 4C6S, PCGS# 95999

PROOF WASHINGTON QUARTERS

- 3673 1937 PR67+ PCGS. CAC. Impressively sharp and deeply mirrored, this high-end Superb Gem proof showcases almost perfect preservation and excellent eye appeal. The reverse and internal obverse show near-brilliant color, while the outer peripheries exhibit deeper tan-gold hues. PCGS has Plus-graded 18 PR67s and lists three finer coins. CAC: 67 in 67, 1 finer (1/18). From The jwb1040 Collection. NGC ID# 27HP, PCGS# 5976
- 3674 1938 PR67+ PCGS. CAC. A fully struck Superb Gem proof with deeply mirrored fields and traces of pastel toning. Close study fails to reveal any distractions on this Registry-grade example. There are 11 Plus-graded coins in PR67 at PCGS and three PR68s finer (1/18). From The jwb1040 Collection. NGC ID# 27HR, PCGS# 5977
- 3675 1939 PR67+ PCGS. CAC. This well-mirrored Superb Gem proof 1939 Washington quarter is very nearly the finest graded at PCGS, with the exception of six examples in PR68. Light but lovely patina accentuates the excellent eye appeal and top-notch preservation. Only 10 PR67 coins are Plus-graded at PCGS, where six PR68s are finer. CAC: 70 in 67, 3 finer (1/18). From The jwb1040 Collection. NGC ID# 27HS, PCGS# 5978
- 3676 1941 PR68 NGC. Cream-gray interiors display glints of seagreen and russet toning. The obverse borders are richly patinated in peach-orange, magenta, violet, and forest-green hues. The underlying surfaces of this Superb Gem proof are virtually unmarked. Census: 31 in 68 (5 in 68 ★), 0 finer (1/18). NGC ID# 27HU, PCGS# 5980
- 3677 1941 PR68 PCGS. CAC. With no Cameos known to exist, this CAC-endorsed, high-end Superb Gem proof 1941 quarter is tied for the finest certified. The Registry Set appeal is unrivaled, as only six pieces are this fine at PCGS, and only seven coins from PCGS and NGC combined are CAC-approved (1/18). The coin shows a bold strike and deeply reflective fields. Dusky yellow-gold and pale russet toning blankets each side.

From The jwb1040 Collection. NGC ID# 27HU, PCGS# 5980

3678 1952 Superbird FS-901 PR68 Cameo PCGS. Although its base is missing, enough of a tiny letter S is apparent on the eagle's breast that collectors have dubbed the variety "Superbird", after the DC Comics superhero. This immaculate and fully brilliant specimen exhibits a razor-sharp strike and outstanding eye appeal.

From The jwb1040 Collection. NGC ID# 248X, PCGS# 144444

3679 1952 Superbird, Hand Engraved Tail Feathers, FS-902, PR68 PCGS. The wispy letter S on the eagle's chest identifies the "Superbird" variety, but the present piece is from the late die state with mint-strengthened tail feather definition. The working reverse proof die was modified by hand at the Philadelphia Mint to "restore" separation of the tail feathers. Fully struck and brightly mirrored with peripheral chestnut-gold toning.

From The jwb1040 Collection. NGC ID# 248X, PCGS# 511254

Base PCGS# 5984

1953 Quarter, PR68 Deep Cameo Doubled Die Obverse, FS-101, None Finer

3680 1953 Doubled Die Obverse, FS-101, PR68 Deep Cameo PCGS. The 1953 proof quarter is scarce in Deep Cameo grades, and this high-end Superb Gem is tied with 16 others as the finest at PCGS (1/18). This example also represents the FS-101 Doubled Die Obverse, of which three examples are included in that highest-grade total. The variety shows a significant spread on the date, motto, and designer's initials. The strike is full, and the untoned surfaces yield stark white-on-black contrast.

From The jwb1040 Collection. PCGS# 144448 Base PCGS# 95985

3681 1954 PR68 Deep Cameo PCGS. The finest 1954 proof quarter dollars at PCGS are graded at the PR68 numeric level with Deep Cameo contrast. This brilliant example is sharp and well-contrasted, showing pristine surfaces. A rarity this fine and appropriate for Registry purposes. Population: 26 in 68 (1 in 68+) Deep Cameo, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 27HY, PCGS# 95986

3682 1968-S Repunched Mintmark, FS-501, PR68 Cameo PCGS. The 1968-S is the first proof quarter struck since 1964. FS-501 shows the mintmark repunched at the top. Most examples attributed by PCGS are non-Cameos, and this is the sole Cameo at that service (1/18). Warm golden toning accentuates stark field-device contrast, and the sharp design elements and mirrored fields are virtually flawless. From The jwb1040 Collection. NGC ID# CKBL, PCGS# 147214 Base PCGS# 86000

1971-S Quarter, PR69 Deep Cameo Pristine and Profoundly Contrasted

3683 1971-S PR69 Deep Cameo PCGS. Ex: Michael Fuller Collection. This example is almost fully brilliant with a hint of champagne toning that adds to the overall aesthetic appeal. Contrast between the fields and devices is profound, and both sides are effectively mark-free. Population: 13 in 69 Deep Cameo, 0 finer (1/18). Ex: Houston Signature (Heritage, 11/2007), lot 60961; Summer FUN Signature (Heritage, 7/2010), lot 3944; Central States Signature (Heritage, 4/2012), lot 4342.

SESSION TWO

COLONIALS

1662 Oak Tree Twopence, AU58 Small 2, Noe-29, Ideal for Type

3684 1662 Oak Tree Twopence, Small 2, AU58 NGC. Crosby 1-A2, Noe-29, W-240, Salmon 1-A, R.4. 13.4 gn. A lovely creamgray Oak Tree type coin. The obverse is nicely centered, and shows a complete legend and all of the outer beads. The reverse is misaligned toward 10:30 but also has full legends, though the upper outer beads are off the flan. The A in ENGLAND is softly brought up, and the AT in MASATHVSETS is a bit weak, but the remainder of the strike is consistent. Satin luster is apparent across unmarked surfaces. Listed on page 40 of the 2018 Guide Book. Census: 4 in 58, 11 finer (1/18). NGC ID# 2ARD, PCGS# 45355 Base PCGS# 17

1652 Oak Tree Shilling, Attractive VF30 Spiny Tree, Noe-14, Salmon 11a-Gi

W-530, Salmon 11a-Gi, R.4. 69.7 gn. Generally regarded as the final Oak Tree shilling prior to introduction of the Pine Tree design, Noe-14 is a recutting of Noe-13 and its intermediate die states. The Spiny Tree variety is a popular *Guide Book* entry that is listed on page 41 of the 2018 edition. This example is well-centered with its devices entirely visible on the smooth, lilac-gray planchet, which is slightly convex on the obverse (concave on the reverse) as produced on the rocker press. It is a thoroughly pleasing midgrade example, nearly impossible to surpass in technical quality and eye appeal at the assigned grade. NGC ID# 2ARN, PCGS# 45364 Base PCGS# 20

(1659) Lord Baltimore Shilling, VF Details Hodder 1-A

3686 (1659) Lord Baltimore Shilling — Obverse Scratched — NGC Details. VF. Hodder 1-A, W-1080, R.6. Die alignment: 180°. A well-struck circulated example of this important early issue produced by the Tower Mint exclusively for use in Colonial Maryland. This piece displays full legends and good central detail, though with old scratches present in the hair that extend lightly down the cheek. The obverse fields are toned a rich gold. The reverse features the checkerboard toning often seen on these, with alternating silver and gold creating a striking visual effect. Listed on page 42 of the 2018 Guide Book.

from The Julian Kaufman Collection.

1779 Rhode Island Ship Token, AU58 No Wreath, Struck in Brass

3687 1779 Rhode Island Ship Token, No Wreath, Brass, AU58 NGC. Betts-562, W-1730, R.3. Brass examples of the 1779 Rhode Island Ship token (or medal, as some argue) are decidedly scarcer than their copper counterparts. Three varieties are known. The first features VLUGTENDE, meaning fleeing, below the ship. This was later removed from the exergue, representing the No Wreath variety here. Finally, a wreath was added at the lower obverse to fill the void. Olive-brown surfaces retain bright brassy-gold highlights within the recesses. A trace of cabinet friction appears over razorsharp devices. Listed on page 52 of the 2018 Guide Book.

From The Jamestown Collection, Part II. NGC ID# 26LC,

PCGS# 588

1776 Continental Dollar, Good 4 Pewter Example, Newman 1-C, W-8445

3688 1776 Continental Dollar, CURENCY, Pewter Good 4 PCGS. CAC. Newman 1-C, W-8445, R.3. A well-worn example of the Newman 1-C variety struck in pewter with solid lines forming the reverse rings. A die break above GI in FUGIO confirms the late die state. These Continental dollars are normally found in high grades, with the issue boasting an average certified grade approaching AU53. This is the lowest-graded example at PCGS, suitable for a lower grade Registry Set or perhaps the collector on a budget. Its pewter-gray surfaces are partly readable, though much of the design is indistinct. The date is absolutely bold. A curious example of his fascinating Colonial issue. Listed on page 87 of the 2018 Guide Book

From The Bayside Collection. NGC ID# 2AYN, PCGS# 791

1787 Massachusetts Half Cent Ryder 4-C, Remarkable MS65 Red and Brown Ex: Hanson/Partrick, One of the Finest Known

3689 1787 Massachusetts Half Cent, Ryder 4-C, W-5940, R.2, MS65 Red and Brown NGC. CAC. Ex: Hanson/Donald G. Partrick Collection. The preparation of the dies for the 1787 Massachusetts half cents is attributed to Joseph Callender, a local Boston engraver. Callender prepared six obverse and four reverse dies for 1787 coinage, with which the Boston-based Massachusetts Mint produced a total of nine individual varieties. Ryder 4-C, arguably the most available, features the only use of this reverse die, though the obverse was employed for two other marriages, despite a break that developed early near the Indian's left (facing) foot.

This remarkable Gem displays substantial Mint-red luster, with subtle overtones of auburn and burgundy. Sharp definition on the central elements further increases the appeal, as these are frequently soft, even on the generally well-made Massachusetts coppers. It is the only 1787 Massachusetts half cent at either grading service designated as Red and Brown, with no examples in full Red regardless of grade. Listed on page 61 of the 2018 Guide Book. Ex: Jon Hanson (6/2002); Donald Groves Partrick Collection (Heritage, 1/2015), lot 5681. PCGS# 297 Base PCGS# 296

1785 African Head Connecticut, AU58 The Finest Known M. 4.1-F.4

3690 1785 Connecticut Copper, African Head AU58 PCGS. M. 4.1-F.4, W-2355, R.1. The popular African Head Connecticut coppers are scarce by demand in lower circulated grades, and they are very rare in an absolute sense when in About Uncirculated condition. Seldom does a Connecticut copper combine high numeric grade with excellent eye appeal; not surprisingly, the present example is the finest known M. 4.1-F.4 African Head copper.

The variety is unknown in full Mint State. This is a glossy and attractive chocolate-brown example that is easily the finest known for the variety. This piece appears as AU58 on the NGC Census. A handful of small planchet voids exist on the otherwise smooth surfaces. The obverse strike is sharp, with leaflike hair strands brushed upward and individually defined. As usual, the reverse shows weakness at the date and along the lower-right border. A cluster of five pinprick marks on the cheek join a planchet defect at the first C in CONNEC to help pedigree this outstanding early copper. Listed on page 63 in the 2018 *Guide Book*. NGC ID# 4G7F, PCGS# 319

1787 Nova Eborac Copper, MS66 Brown Seated Left, Breen-986, W-5755 Finest Known Example, Ex: Norweb/Partrick

3691 1787 Nova Eborac Copper, Seated Left, Breen-986, W-5755, R.3, MS66 Brown NGC. Ex: Norweb. The 1787 Nova Eborac coppers may have been struck by John Bailey and Ephraim Brasher, as they are known to have filed a petition to produce copper coinage with the New York State Assembly on February 11, 1787. The letter punches used for the Nova Eborac coppers are identical with those used on the famous Brasher doubloon, providing a solid link between the two issues. Their petition was not approved, but Bailey and Brasher probably struck the coins on their own authority in their New York City workshop.

We believe this impressive Premium Gem is the finest known example of the W-5755 variety. Considerable golden-tan overtones are seen on the pristine olive-brown surfaces. Full luster is apparent. This piece exhibits exceptional centering despite the absence of border dentils. The date is full (only about 20% of known specimens have a full date) and the head is sharply detailed. A thin die break is evident from the top of the shield to B in LIB. As of January 2018, NGC has certified four Mint State examples of this variety, including the present Premium Gem and others graded MS64+ Red and Brown (Newman), MS64 Brown (Partrick duplicate), and MS61 Brown (another Partrick duplicate). This coin is plated on the NGC Coin Explorer website. Listed on page 70 of the 2018 *Guide Book*.

Ex: New Netherlands Coin Company (privately, 9/23/1954); Norweb Collection (Bowers and Merena, 3/1988), lot 2677; Marvin Browder; Ed Milas; Stack's; Jon Hanson (8/8/1998); Donald Groves Partrick; Partrick Collection (Heritage, 1/2015), lot 5665 (as MS65 Brown NGC). NGC ID# 2B4A, PCGS# 478

1783 Chalmers Shilling, VF20 W-1785, Short Worm

1783 Chalmers Shilling, Short Worm VF20 NGC. Breen1011, W-1785, High R.4. An uneven strike affects the lower
left obverse and the left side of the reverse with the opposing
points showing excellent design definition. The poor quality of the
strike challenges the grading process. Pewter-gray surfaces exhibit
splashes of light gray on each side. Although the worm is not visible
due to the strike, a heavy die line down from the S in SHILLING
identifies this variety. Listed on page 53 of the 2018 Guide Book.
From The Jamestown Collection, Part II. NGC ID# 2AUU,
PCGS# 596

(1785) Original Bar Copper, VF35 Unusual 'Oval' Planchet, W-8520

3693 (1785) Bar Copper VF35 NGC. Breen-1145, W-8520, R.4. An original Bar copper, with the appropriate diagnostics including a tiny tine off the upper left edge of the 12th bar and the right upright of A over S. Struck on an elongated 'oval' planchet, with extended dentils left and right, yet the motifs are well-centered on both sides. An exceptional Choice VF example, with smooth, mahogany-brown surfaces and only a few light marks from circulation. Listed on page 76 of the 2018 Guide Book. Census: 1 in 35, 18 finer (1/18). from The Julian Kaufman Collection. NGC ID# 2B5J, PCGS# 599

Washington Funeral Urn Medal Silver, Baker-166A VF20, GW on Urn

3694 (1800) Washington Funeral Urn, Silver, VF20 PCGS. Baker-166A, Fuld 3-C2, Musante GW-70C. Jacob Perkins of Newburyport, Massachusetts was the engraver for this issue, worn at Washington's civic funeral procession in Boston on February 22, 1800. The cream-gray surfaces display wear consistent with the grade and are free from distractions. Holed as issued at 12 o'clock. From The Jamestown Collection, Part II. NGC ID# D4P6, PCGS# 928

(1800) Washington Funeral Urn Medal, VF20 Struck in Silver, Baker-166A, GW-70B

3695 (1800) Washington Funeral Urn, Silver VF20 PCGS. Baker-166A, Fuld 3-B, Musante GW-70B. A pleasing lavender-gray example of the Washington Funeral Urn medal, struck in silver and scarce as such. Holed at 12 o'clock as-issued; These were meant to be worn during the late President's funeral procession. Diagnostics for this variety include the bases of HE joined, the comma after GLORY low, a berry between (H)E I(S), and the 9 at the end of the first line of text on the reverse merged into the pedestal. From The Jamestown Collection, Part II. NGC ID# D4P6, PCGS# 928

Washington Silver Funeral Urn Medal Baker-166A, GW on Urn, VF25

3696 (1800) Washington Funeral Urn, Silver VF25 PCGS. Baker-166A, Fuld 3-B, Musante GW-70B. Deep dove-gray fields contrast with pearl-white high points. Neatly holed at 12 o'clock, customary for the series. A pleasing, problem-free example. The Funeral Urn medals were made to be worn at George Washington's Boston civil funeral procession, held on what would have been his 68th birthday.

From The Jamestown Collection, Part II. NGC ID# D4P6, PCGS# 928

HALF CENTS

1793 Half Cent, C-1, B-1, XF45 Choice Chestnut-Brown Surfaces

3697 1793 C-1, B-1, High R.3, XF45 PCGS. CAC. Manley Die State 2.0. A glossy, lightly marked example of America's first half cent variety, struck in the early days of the Philadelphia Mint and made from sheet copper. The Liberty Cap design with head facing left was employed only in 1793. A modified design with the head facing right was introduced in 1794.

Struck from an intermediate die state, this CAC-endorsed 1793 example is free from most of the environmental factors that normally affect the issue. Die deterioration is visible particularly on the reverse, where HALF CENT is legible but indistinct in places from die fatigue. Small voids and flaws are planchet-related, rather than a result of mishandling or damage. On the obverse, high point wear is visible on the cheek and upper hair strands along with a few light circulation marks. The eye appeal and color of this mostly smooth, chestnut-brown coin are impressive. Our EAC grade VF30. NGC ID# 2222, PCGS# 35003 Base PCGS# 1000

1794 C-6a, B-4b Half Cent, AU Details Condition Census

1794 Normal Head, Small Edge Letters, C-6a, B-4b, R.5 — Environmental Damage — PCGS Genuine. AU Details. The usual die state with heavy obverse clash marks and a perfect reverse die. This piece has exceptional sharpness for an example from this die marriage. This piece has sharpness that is finer than the Missouri Cabinet coin that realized \$74,750, although the surfaces of the present example display a thick coat of emerald patina and underlying corrosion. The condition census includes one VF, three that grade Fine, and a small number of VG examples. Our EAC grade VG10.

1796 C-1, B-1 Half Cent, Fair 2 Rare No Pole Variety

3699 1796 No Pole, C-1, B-1, R.6, Fair 2 PCGS. The bust of Liberty is fully outlined with LIBERTY partially readable and the date faint but fully visible. The reverse detail is partially evident. All genuine 1796 No Pole half cents have a prominent bisecting die crack from 3 o'clock to 9 o'clock on the obverse. Due to the low grade of this example, that bisecting crack is not discernable in its entirety, but a trace of the crack remains visible at Liberty's upper lip just below the nose. This is an extremely important opportunity for the advanced collector to obtain a rarity in the early half cent series. Our EAC grade Fair 2.

From The Lona Linda Collection, Part II. NGC ID# 2226, PCGS# 35095 Base PCGS# 1030

1796 C-2, B-2 Half Cent, AG Details With Pole Variant

3700 1796 With Pole, C-2, B-2, High R.4 — Environmental Damage — PCGS Genuine. AG Details. The surfaces of this important half cent key are lightly corroded steel-brown with slightly lighter brown devices. The date and LIBERTY are visible, and the bust of Liberty is fully outlined. About half of the reverse design is visible, and the lettering is partially legible. Still and all, an important opportunity for the advanced half cent collector. Our EAC grade Fair 2. From The Loma Linda Collection, Part II.

1802/0 C-1, B-1 Half Cent, VG Details Reverse of 1800

3701 1802/0 Reverse of 1800, C-1, B-1, R.6 — Environmental Damage — PCGS Genuine. VG Details. One of the most coveted varieties in the Draped Bust half cent series is the 1802/0 C-1, B-1 variety with the Single Leaves reverse, known as the Reverse of 1800. Perhaps two dozen examples are known in all grades with the finest known grading no better than VF20. This pleasing piece has attractive olive-brown surfaces that exhibit light, evenly distributed, and non-distracting granularity. All of the design types and lettering are fully evident on both sides. Our EAC grade Good 4. From The Loma Linda Collection, Part II.

1831 C-1, B-1 Half Cent, AU Details

3702 1831 C-1, B-1, R.6 — Damaged — PCGS Genuine. AU Details. The 1831 Original half cents have been the source of much debate over many years regarding their status as circulation strikes or proofs. There are some who feel that this is a proof-only issue, while others suggest that both circulation strikes and proofs were minted from the same die pair. The striking format of this piece is undeterminable. This example has the sharpness of XF to AU with major damage on its olive and golden-brown surfaces. There is a heavy dent at the upper left obverse, the coin has several bends, and the rims are flattened on both sides. It is possibly the Hollinbeck-Kagin coin listed in the Breen Census as having "major damage." Our EAC grade Good 6.

Ex: Bowers and Merena (6/1990), lot 297. From The Loma Linda Collection, Part II.

PROOF BRAIDED HAIR HALF CENTS

1842 B-2 Half Cent, PR64 Brown From the Brobston Collection

3703 1842 First Restrike, B-2, R.6, PR64 Brown PCGS. CAC. An impressive Choice proof, this piece light brown and iridescent toning with hints of underlying mint red in fully mirrored fields that surround sharp devices. The description in the 1963 Stack's catalog mentioned "an extremely high wire edge" that is visible from 3 o'clock to 8 o'clock on the reverse. Our EAC grade PR63. Ex: Joseph Brobston Collection (Stack's, 1/1963 FPL); sold with the Samuel Wolfson Collection (Stack's, 5/1963), lot 30.

From The Property of a Lady. PCGS# 35354 Base PCGS# 1263

1845 B-1 Half Cent, PR63 Brown The Eliasberg Large Berries Original

3704 1845 Original PR63 Brown PCGS. B-1, R.6. Researcher Richard T. Coleman, Jr. provided an accounting of 20 different 1845 Original half cents in his March 2003 Penny-Wise article that is available on the Newman Numismatic Portal. There may be a few more known today, although the total is certainly well below 30 examples. Splashes of original mint red appear on the mirrored golden-brown surfaces of this lovely Select proof that also exhibits delicate blue overtones. Small toning spots near stars 8 and 10 identify the pedigree of this coin. Our EAC grade PR62. Ex: J.M. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 5/1996), lot 462; Larry Briggs; to the present consignor. The earlier pedigree from the Charles Morris Collection (Chapman Brothers, 4/1905) as presented in the Eliasberg catalog is uncertain as this piece does not appear to match the plate from that Chapman sale.

From The Loma Linda Collection, Part II. NGC ID# 26ZC, PCGS# 1278

1847 B-1 Original Half Cent, PR63 Brown From the Brobston Collection

3705 1847 Original PR63 Brown PCGS. B-1, R.6. Only about two dozen examples of the 1847 Original proof-only half cent exist, including 20 listed in Richard T. Coleman's list, and possibly three or four others. This splendid Select proof exhibits brilliant cobalt-blue toning on the obverse that changes to walnut-brown when tilted under a light. The reverse changes from golden-brown to delicate blue. Trivial lint marks are evident in the obverse fields, with faint hairlines. This is an exceptionally attractive representative of the 1847 Large Berries Original half cent. Our EAC grade PR62. Population: 1 in 63 Brown, 5 finer (1/18). Ex: Joseph Brobston Collection (Stack's, 1/1963 FPL); sold with the Samuel Wolfson Collection (Stack's, 5/1963), lot 34. From The Property of a Lady. NGC ID# 26ZG, PCGS# 1290

1848 B-1 Original Half Cent, PR64 Red and Brown From the Samuel Wolfson Sale

3706 1848 Original PR64 Red and Brown PCGS. B-1, Low R.6. Myriad lint marks are scattered across the obverse of this lovely near-Gem proof, along with a planchet defect, as struck, on Liberty's jaw next to the ear. There are no readily apparent post-minting defects on this example that retains about half of its red mint color with delicate bluish-brown patina. Our EAC grade PR63. Population: 7 in 64 (1 in 64+) Red and Brown, 2 finer (1/18). Ex: Consignment "T.V.Y." (Stack's, 12/1962), lot 18; Samuel Wolfson Collection (Stack's, 5/1963), lot 35.

From The Property of a Lady. PCGS# 1297

1849 B-2 Half Cent, PR64 Brown First Restrike From the Brobston Collection

3707 1849 First Restrike PR64 Brown PCGS. B-2, Low R.6. This variety is on the border of Low R.6 and High R.5, with 28 examples listed in Rick Coleman's survey, and at least two others that probably exist. A splendid Choice proof, this 1849 Small Date half cent exhibits brilliant blue and violet toning on the obverse, with blue and emerald toning on the reverse. It was described as a "Gem blue and gold proof" in the Wolfson catalog. Our EAC grade PR63. Population: 5 in 64 Brown, 3 finer (1/18).

Ex: Joseph Brobston Collection (Stack's, 1/1963 FPL); sold with the Samuel Wolfson Collection (Stack's, 5/1963), lot 36.

From The Property of a Lady. NGC ID# 26ZM, PCGS# 1305

1852 B-2 Half Cent, PR63 Brown First Restrike

3708 1852 First Restrike PR63 Brown PCGS. CAC. B-2, High R.4. Possibly as many as 100 examples of this proof-only variety exist. Walter Breen rated the variety R.5 in his Half Cent Encyclopedia that was published 35 years ago. Called "a lovely iridescent proof" in the Wolfson catalog, this piece exhibits gold, olive, and blue toning on lightly mirrored surfaces with good eye appeal. Our EAC grade PR62. Population: 4 in 63 Brown, 8 finer (1/18). Ex: Samuel Wolfson Collection (Stack's, 5/1963), lot 39.

From The Property of a Lady. PCGS# 35402 Base PCGS# 1317

1856 B-3 Half Cent, PR65 Brown From the Missouri Cabinet

3709 1856 Restrike PR65 Brown PCGS. B-3, R.4. 87.1 grains. Doubled T in CENT, Reverse of 1856. Type collectors will be interested to know that this variety ranks among the most plentiful of Braided Hair proof half cents along with the 1841 B-1 Original and the 1852 B-2 Restrike. Walter Breen assigned three subvarieties of the Breen-3 based on weight. This piece falls at the high end of the Series II or "thick planchet" pieces where he noted: "possibly four proofs are in collectors' hands." Attractive mahogany-brown on the obverse with sea-green overtones. The reverse exhibits golden-tan patina with delicate teal overtones. Both sides of this lovely Gem proof exhibit fully mirrored fields. Our EAC grade PR62.

Ex: Douglas Weaver (12/6/1971); R. Tettenhorst; Eric P. Newman Numismatic Education Society; Missouri Cabinet (Goldberg Auctions, 1/2014), lot 224.

From The Bayside Collection. PCGS# 35423

LARGE CENTS

1793 S-3, B-4 Chain Cent, Fine Details AMERICA Reverse

3710 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Edge Damaged — PCGS Genuine. Fine Details. Several edge dents are visible on each side of this Chain cent. Otherwise, the pleasing olive-brown surfaces exhibit only scattered, trivial handling marks. This is an exceptional first-year example from the Philadelphia Mint. Our EAC grade Good 5.

From JC's Dollars.

3711 No Lot.

1794 S-28, B-10 Cent, XF40 The Single-Leaf Reverse

3712 1794 Head of 1794, S-28, B-10, R.2, XF40 PCGS. A single leaf covers the branch stem of the wreath below the RI of AMERICA, and that lone feature is diagnostic for the reverse die that appears on S-27 and S-28, the latter encountered more frequently. This piece has smooth and attractive tan surfaces and inconsequential marks on each side. Our EAC grade VF35. NGC ID# 223P, PCGS# 35549 Base PCGS# 901374

1794 S-33, B-19 Cent, AG3 The Wheelspoke Variety

3713 1794 Head of 1794, S-33, B-19, High R.5, AG3 PCGS. The reverse is noticeably buckled on this example, with the area inside the wreath raised and flat. None of the wheelspoke die cracks are readily visible on the reverse. The S-33 is an elusive variety that is rarely encountered above the grade of Good, with only 10 examples in the Condition Census that grade VG7 or finer, and only four that grade Fine or better. This piece has pleasing mahogany, olive, and steel patina with slight roughness but no marks or other defects. A highly attractive piece for the grade. Our EAC grade AG3. From The Loma Linda Collection, Part II. NGC ID# 223P,

PCGS# 35564 Base PCGS# 901374

1794 S-36, B-23 Cent, VF20 From the Robert Matthews Collection

3714 1794 Head of 1794, S-36, B-23, R.5, VF20 PCGS. Die State I, from perfect dies. This rich olive and steel-brown cent has microscopic corrosion that slightly reduces the sharpness grade. A small pit mark is noted on the cap but no other marks are evident on either side. This is a highly attractive cent for a specialized collection. Our EAC grade VG10.

Ex: Garry Fitzgerald (11/24/1966); Jackson C. Storm (8/1/1984); Robert E. Matthews (Superior Galleries, 5/1989), lot 167; Larry Briggs.

From The Lona Linda Collection, Part II. NGC ID# 223P, PCGS# 35573 Base PCGS# 901374

1794 S-37, B-24 Cent, VF20 Tied for Seventh Finest Known

3715 1794 Head of 1794, S-37, B-24, R.6, VF20 PCGS. The Steigerwalt Variety and a great rarity in the Sheldon numbered series. There are currently 19 examples known, and 10 of those grade less than VG8 per EAC grading interpretations. This piece is listed as VG10 and tied for the seventh finest in Del Bland's Condition Census available at www.1794largecents.com. We agree with Bland's assessment that this piece has the sharpness of Fine 15 with numerous handling marks, and we note that those handling marks on both sides of this medium brown cent are trivial in nature. There is a minuscule edge dent below the 7, and a small mark in the field over Liberty's nose that serve to identify this example. Our EAC grade VG10.

Ex: Denis Loring (1/1983); Jack H. Robinson; Richard V. Punchard; Tom Morley (9/12/1991); Robinson S. Brown, Jr. (Superior, 1/1996), lot 53; Larry Briggs; to the present consignor.

From The Loma Linda Collection, Part II. NGC ID# 223P, PCGS# 35576 Base PCGS# 901374

1794 S-46, B-36 Cent, VF35 The Crossed E Variety

3716 1794 Head of 1794, S-46, B-36, R.3, VF35 PCGS. Die State I with an obverse die crack from the rim right of the 4 into the bust. A die chip in the central reverse interrupts the E in CENT, giving this variety its name. Smooth olive-brown surfaces exhibit minuscule handling marks of no consequence on this attractive example. Our EAC grade Fine 12.

Ex: Frank H. Masters, Jr. (RARCOA, 5/1971), lot 63; Jackson C. Storm (8/1/1984); Robert E. Matthews (Superior, 5/1989), lot 177; Larry Briggs.

From The Loma Linda Collection, Part II. NGC ID# 223P, PCGS# 35603 Base PCGS# 901374

1794 S-48 Cent The Famous Starred Reverse

3717 1794 Starred Reverse, S-48, B-38, R.5, ANACS Genuine. The obverse of this example has certain details that suggest a sharpness grade of Good or VG, while the reverse is nearly smooth, showing just enough of the border from 6 o'clock to 8 o'clock for positive identification. Several of the lowest grade survivors have a nearly identical striking pattern, with the border stars visible at the lower left. Although no grade is assigned by ANACS, in our opinion this piece has Fair to About Good details with environmental damage. Pleasing light to medium brown surfaces exhibit faint granularity and scattered marks. Our EAC grade Fair 2.

From The Loma Linda Collection, Part II.

1803 S-256, B-15 Cent, AU58 Condition Census

3718 1803 Small Date, Small Fraction, S-256, B-15, R.3, AU58 PCGS. CAC. An early die state with delicate obverse and reverse die cracks, struck before the reverse rim break developed at ST. The surfaces exhibit full cartwheel luster with a small area of steelbrown patina on the reverse. Traces of faded mint red are especially evident in the protected areas of the reverse. There are no marks of consequence on either side of this lovely Condition Census cent that qualifies for sixth finest known. Our EAC grade AU50. NGC ID# 224G, PCGS# 36383 Base PCGS# 1482

1857 N-2 Cent, MS65 Red and Brown Small Date

3719 1857 Small Date, N-2, R.1, MS65 Red and Brown PCGS. CAC. Two date logotypes used in the final year of large cent production are known as the Large Date and the Small Date, and the present piece represents the latter. This example has splashes of mint red on the obverse, intermingled with blue-brown toning, and considerable mint red on the reverse that is only slightly mellowed from full brilliance. Our EAC grade MS64. Population: 7 in 65 Red and Brown, 1 finer (1/18). NGC ID# 226P, PCGS# 148731 Base PCGS# 1932

PROOF LARGE CENTS

1848 N-19 Cent, PR63 Brown Rare Proof-Only Issue

3720 1848 N-19, Low R.6, PR63 Brown NGC. The proof-only Newcomb-19 variety is rightfully in strong demand by large cent specialists — there are simply not enough examples to go around, from a surviving mintage that ranges from an estimated 25 to 35 pieces. This Select proof displays lovely violet, gold, aquamarine, and sky-blue shades that emerge as a medley of variegated color across mirrored fields, vibrantly visible when the coin is viewed at the proper angle. The devices are well-struck and the surfaces are free from all but a few faint handling marks beneath the toning, including a cluster of shallow abrasions in the field near star 2. We expect spirited competition when this attractive N-19 large cent is called. Our EAC grade PR62.

Ex: Boys Town Sale (Superior, 5/1990), lot 3385, which realized \$6,600

From The Loma Linda Collection, Part II. PCGS# 397617 Base PCGS# 1973

1850 N-11 Cent, PR63 Red and Brown Extremely Rare Proof Issue From the Norweb Collection

3721 1850 PR63 Red and Brown PCGS. N-11, R.7. One example of 1850 N-9 and six examples of 1850 N-11 are identified as the only proof examples of this date. Del Bland grades the 1850 N-9 as PR60, and Denis Loring grades the known 1850 N-11 proofs as PR64, PR63 (2), PR60 (2), and PR55. This piece exhibits fiery orange, green, and light brown tones on its mirrored surfaces with sharp design motifs and pleasing eye appeal. Our EAC grade PR60. Population: 1 in 63 Red and Brown, 1 finer (1/18).

Ex: T. James Clarke Collection (Abe Kosoff, 4/1956), lot 361; Norweb Collection (Bowers and Merena, 11/1988), lot 2978.

From The Loma Linda Collection, Part II. NGC ID# 272S, PCGS# 1980

1855 N-11 Cent, PR64 Brown Proof-Only Variety

1855 PR64 Brown PCGS. N-11, R.6. According to Denis W. Loring's proof census, less than 20 examples of this important proof-only variety exist. Denis grades this piece PR60+ and Superior assigned a grade of PR62 in 1991. Traces of mint red appear on the iridescent-toned obverse with splashes of red mint color on the reverse that exhibits mottled blue and iridescent toning. A faint hairline is noted below the outer hair bun. Our EAC grade PR62. Population: 7 in 64 (1 in 64+) Brown, 5 finer (1/18).

Ex: Superior (10/1991), lot 645; Larry Briggs; the present consignor. From The Loma Linda Collection, Part II. NGC ID# 2273, PCGS# 1994

PROOF FLYING EAGLE CENT

1858 Small Letters Flying Eagle Cent, PR64

3723 1858 Small Letters PR64 PCGS Secure. Proof examples of the short-lived Flying Eagle cent variety are treasured by date collectors and specialists, alike. This lovely example features a bold strike, light golden-tan surfaces, and lightly mirrored fields that exhibit trivial carbon flecks on each side. A glass reveals delicate rose toning that enhances the eye appeal. Population: 44 in 64 (3 in 64+), 11 finer (1/18). NGC ID# 227D, PCGS# 2043

INDIAN CENTS

1859 Indian Head Cent, MS66 Among the Finest at PCGS

3724 1859 MS66 PCGS. A colorful and lustrous Premium Gem—fully struck, with four razor-sharp diamonds and tip-top definition throughout the headdress feathers. Coruscating mint luster embellishes peach-gold and tawny bronze coloration throughout both sides. Carbon is absent from the obverse, and a few pinpoint spots on the reverse are immaterial. PCGS has seen no numerically finer examples. Population: 35 in 66 (4 in 66+), 0 finer (1/18). NGC ID# 227E, PCGS# 2052

1873 Closed 3 Cent, MS64 Red and Brown Doubled LIBERTY, Snow-1b, FS-101 Key Variety in the Series

3725 1873 Doubled LIBERTY, Snow-1b, FS-101, MS64 Red and Brown PCGS. Like the 1916 Buffalo nickel or 1955 Lincoln cent, this major doubled die variety is collected alongside regular issues in its series. Broad doubling is seen on LIBERTY, and throughout the portrait, including the eye and nose. Two reverses are known. This is the usual one with a die lump between the oak leaves and the C in CENT. Despite its bold nature, the variety now known as Snow-1 was only first published in 1957 by Walter Breen. Over the past 60 years, it has established itself as the top variety in the Indian Head series. All examples are highly collectible, regardless of condition. Mint State coins are particularly popular and especially rare, representing an estimated 20 of the 300 coins believed extant.

A majority of the surface area on this near-Gem remains copperorange. Central violet tones inhibit a full Red designation. The strike is uniformly strong, though the upper-right leaves appear to have been struck through either grease or water — a common trait for the issue. Marks below the N in UNITED and right of the shield identify this Choice example. Population: 12 in 64 (1 in 64+) Red and Brown, 2 finer (1/18). PCGS# 37505 Base PCGS# 2116

PROOF INDIAN CENTS

1863 Indian Cent, PR66 Cameo Registry-Grade Example

3726 1863 PR66 Cameo PCGS. The design elements of this delightful Premium Gem are sharply detailed in most areas, with just a touch of softness on some feather tips. The deeply reflective fields contrast boldly with the frosty devices to produce a strong cameo effect and the well-preserved original copper-red surfaces add to the outstanding eye appeal. From a proof mintage of 800-1,000 pieces. Population: 16 in 66 Cameo, 0 finer (1/18). NGC ID# 26SX, PCGS# 82262

1863 Indian Cent, PR66 Cameo Among the Finest Seen at PCGS

3727 1863 PR66 Cameo PCGS. CAC. The 2018 Guide Book estimates between 800 to 1,000 proof Indian cents were struck in 1863, but Indian cent specialist Rick Snow opts for a smaller production total of 460 pieces. Certainly, fewer coins were actually distributed, as collector demand was at a low ebb amidst the turmoil and uncertainty of the Civil War. The proof mintage was similar to that of 1862, but the 1863 proofs are nearly twice as rare in today's market. Fortunately, the 1863 proofs were well-produced, and many examples display excellent cameo contrast.

Like most proof 1863 Indian cents, this delightful Premium Gem was struck from the Snow-PR1 dies, with unpolished centers on the first A in STATES and the last A in AMERICA. Parallel vertical die lines are evident in front of the eye and a small lump shows on the lower edge of the ribbon, and below the I in LIBERTY. The design elements exhibit razor-sharp definition throughout and the deeply reflective fields contrast boldly with the frosty devices. The eye appeal is terrific. Population: 16 in 66 Cameo, 0 finer. CAC: 5 in 66, 0 finer (12/17). NGC ID# 26SX, PCGS# 82262

1877 Indian Cent, PR66 Brown Registry-Grade Example

1877 PR66 Brown PCGS. The business-strike 1877 Indian cent is the acknowledged low-mintage key to the series, putting extreme pressure on the small mintage of 900 proofs from date collectors. This spectacular Premium Gem exhibits razor-sharp definition on all design elements, while the impecably preserved original red surfaces have mellowed to lilac and brown in many areas. Population: 6 in 66 Brown, 0 finer (12/17). NGC ID# 229W, PCGS# 2318

1877 Indian Cent, PR66 Brown Famous and Popular

3729 1877 PR66 Brown PCGS. A stunning Premium Gem proof representative of the famous and always popular 1877 Indian cent, an issue that enjoys great demand at all preservation levels. This sharply defined piece exhibits fully mirrored fields with lovely blue and violet-brown toning, and significant orange mint color on the reverse. For all color designations, PCGS has certified only two numerically finer examples (1/18).

From The Property of a Lady. NGC ID# 229W, PCGS# 2318

1884 Indian Cent, PR67 ★ Original Red Surfaces

3730 1884 PR67 ★ Red NGC. Even though 3,942 proofs were struck of the 1884 cent, few have survived with full red and pristine, sparkling surfaces such as this Superb Gem that was assigned the coveted Star designation. The design elements are impressively brought up, including sharpness on all four diamonds, and their mildly frosted finish yields relatively strong contrast with the deeply mirrored fields. Both faces are bright orange-red with no mentionable defects. An outstanding example of this underappreciated date in the proof series. Census: 4 in 67 (1 in 67★) Red, 0 finer (1/18). Ex: Long Beach Signature (Heritage, 6/2005), lot 5188; FUN Signature (Heritage, 1/2008), lot 2696. NGC ID# 22A5, PCGS# 2341

LINCOLN CENTS

1909-S VDB Cent, MS66 Red and Brown Luminous Surfaces

3731 1909-S VDB MS66 Red and Brown NGC. Satiny mint luster adorns this Premium Gem S-VDB Lincoln cent in warm copper-orange and gold hues, with subtle chestnut accents that determine the Red and Brown color designation. The strike is sharp, and neither side shows abrasions. A few microscopic specks are barely discernible with a loupe. Census: 47 in 66 (4 in 66★) Red and Brown, 0 finer; 39 in 66 (1 in 66★) Red, 1 finer (1/18). NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS66 Red Prized Low-Mintage Issue

3732 1909-S VDB MS66 Red PCGS. The first year and low mintage 1909-S VDB cent has been popular with collectors for more than a century. This fully struck and highly lustrous fire-red and apple-green Premium Gem is pristine aside from delicate field contact above the date, and a few microscopic flecks near Lincoln's nose. NGC ID# 22B2, PCGS# 2428

1909-S Lincoln Cent, MS66 Red Important Early S-Mint Rarity

3733 1909-S MS66+ Red PCGS. Often overshadowed by its VDB counterpart, the non-VDB San Francisco issue is a rarity in its own right but it lacks the one-year of issue status of the S-VDB. This is a bright, pristine example that gives the viewer the appearance that it was recently struck. The mintmark placement on this coin is noticeably shifted to the right. Fiery-red luster overall and a bold strike, an ever popular first-year semikey date Lincoln cent. NGC ID# 22B4, PCGS# 2434

1909-S/S Lincoln Cent, MS66+ Red S Over Horizontal S

3734 1909-S/S S Over Horizontal S, FS-1502, MS66+ Red PCGS. CAC. The mintmark feature is visible with a 10x loupe. This high-end Red example displays blazing copper-gold luster and well-struck design elements. The surfaces are free of abrasions or carbon spotting. On the reverse, a small planchet lamination on the E in UNITED is peeled back to stand perpendicular to the surface of the coin. A coin of outstanding eye appeal. NGC ID# 22B4, PCGS# 37645 Base PCGS# 92434

1909-S/S Lincoln Cent, MS66+ Red S Over Horizontal S Mintmark

3735 1909-S/S S Over Horizontal S, FS-1502, MS66+ Red PCGS. CAC. This blazing golden-red Lincoln cent has brilliant and frosty luster with extraordinary eye appeal. The surfaces are pristine without marks, exhibiting a few trivial, microscopic spots. The distinctive S Over Horizontal S mintmark is clearly evident. PCGS has examined 15 of these in MS66+ and only two finer pieces. CAC: 36 in 66, 0 finer (1/18). NGC ID# 22B4, PCGS# 37645 Base PCGS# 92434

1914-D Cent, MS64 Red and Brown Attractive Coloration

3736 1914-D MS64 Red and Brown PCGS. CAC. This Colorado issue is often one of the final pieces required to complete a set of Lincoln cents (even though it is advised to buy the key dates first). Readily appealing surfaces exhibit melded copper-orange hues with deeper violet accents. There are a few specks of carbon on each side. Strongly struck. Fully deserving of the CAC approval sticker. NGC ID# 22BH, PCGS# 2472

1914-D Cent, MS64 Red

3737 1914-D MS64 Red PCGS. One of the most challenging dates in the Lincoln cent series, second only to the 1909-S VDB. Examples with Red coloration are particularly elusive. This near-Gem is satiny and well-struck, save for the upper reverse rim. Extensive carbon spotting appears on each side, but post-Mint contact is minimal. From a low mintage of 1.2 million coins. Exceedingly scarce in higher grades. NGC ID# 22BH, PCGS# 2473

1914-D Lincoln Cent, MS65 Red Rarely Saved in High Grades

3738 1914-D MS65 Red PCGS. Unlike a number of other key dates in the Lincoln cent series, the 1914-D was not saved in quantity. While first-year enthusiasm preserved numerous 1909-S VDB cents, the 1931-S was anticipated as a low-mintage year, and the 1955 Doubled Die was tucked away as a curiosity even by non-numismatists, the 1914-D quietly slipped into circulation, and by the time collectors realized how elusive examples were, the vast majority of the issue was circulated to some degree.

By contrast, this vibrant Red Gem is a beautifully preserved survivor. The slightly hazy surfaces are predominantly copper-orange with elements of pale lilac and rose. Pleasingly detailed and surprisingly mark-free. Population: 72 in 65 (8 in 65+) Red, 7 finer (1/18). NGC ID# 22BH, PCGS# 2473

1916 Cent, MS67+ Red Blazing Mint Luster

3739 1916 MS67+ Red PCGS. CAC. This Superb Gem is fully detailed throughout with complete beard and lapel definition. The surfaces also display beautiful, frosty red mint luster with a finely granular texture. A virtually flawless coin, among the finest at both services. Population: 70 in 67 (13 in 67+) Red, 0 finer. CAC: 18 in 67, 0 finer (1/18).

Ex: Long Beach Signature (Heritage, 9/2004), lot 5450; Long Beach Signature (Heritage, 5/2008), lot 1048; Long Beach Signature (Heritage, 2/2012), lot 3878. NGC ID# 22BN, PCGS# 2488

1922 FS-401 No D Cent, AU55 Strong Reverse, Die Pair 2

3740 1922 No D, Strong Reverse, FS-401, AU55 PCGS. CAC. Die Pair 2. A long time ago, this variety was called the 1922 Plain or even the 1922-P, but that created confusion among individuals who thought they were minted in Philadelphia. However, no cents were minted in Philadelphia or San Francisco in 1922. Only the Denver Mint produced our one cent coins that year. Die Pair 2 with the strong reverse is the variety that qualifies as a true 1922 No D cent, while Die Pair 1 and Die Pair 3 are each best described as Weak D varieties where the mintmark is faintly visible. Grading is always by the reverse, and this Choice AU example has outstanding surfaces with lovely olive-brown and iridescent surfaces. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

1922 No D Cent, AU58 Sought-After Die Pair 2 Variety

3741 1922 No D, Strong Reverse, FS-401, AU58 PCGS. CAC. Die Pair 2. There are three No D varieties of the 1922-D Lincoln cent. Die Pair 2 is the most sought-after and is distinguished by strong reverse detail and a sharp second 2 in the date. On this piece, die wear blurs the other obverse design elements. Light highpoint friction prevents a Mint State designation, although this chocolate-brown collector coin is yet satiny and appealing. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

1955 Cent, MS64 Red Doubled Die Obverse

3742 1955 Doubled Die Obverse, FS-101, MS64 Red PCGS. This Guide Book variety is only marginally available in Choice Red condition, and Gems are rare with any amount of original luster. The present near-Gem displays full, satiny luster with rich copperred coloration. A sharp strike complements a lack of severe abrasions, as eye appeal surpasses expectations for the grade. PCGS lists 21 numerically finer Red examples, all in MS65 or MS65+ (1/18). NGC ID# 8H87, PCGS# 37912 Base PCGS# 2827

1955 Lincoln Cent, MS65 Red Doubled Die Obverse Popular *Guide Book* Variety

3743 1955 Doubled Die Obverse, FS-101, MS65 Red NGC. The adjectives "1955 Doubled Die Obverse," "MS65," and "Red" so seldom occur together that dedicated Lincoln cent collectors are bound to sit up and take notice of a coin such as this one, certified MS65 Red by NGC. The surfaces are smooth, medium copperred on each side and devoid of mentionable distractions of any sort. Generous luster shines forth, complementing a bold strike and top-notch eye appeal. Recent sales include the MS65 Red NGC example in the April, 2015 Central States Signature that realized \$25,850. We expect intense competition from Registry Set collectors when this lot is called. Census: 3 in 65 (1 in 65+) Red, 1 finer (1/18). NGC ID# 8H87, PCGS# 37912 Base PCGS# 2827

PROOF LINCOLN CENT

1914 Cent, PR67 Red Only Two Finer at PCGS

3744 1914 PR67 Red PCGS. Subdued orange luster appears on the matte surfaces of this Superb Gem proof Lincoln Cent. The strike is exquisite, exhibiting prominent rims on both sides with every element of Lincoln's hair, beard, and bow-tie in bold relief. The wheat ears on the reverse are equally sharp. An impressive piece and an important opportunity. Population: 8 in 67 Red, 2 finer (1/18). NGC ID# 22KX, PCGS# 3320

TWO CENT PIECES

1864 Small Motto Two Cent MS66 Red and Brown Conditionally Scarce

3745 1864 Small Motto, FS-401, MS66 Red and Brown NGC. Although technically a variety of the 1864 issue, the Small Motto two cent piece is collected as an independent date and is one of the two keys to the circulation strike series. This Premium Gem is among the finest Red and Brown coins known. The strike is sharp, and neither side exhibits bothersome abrasions. Copper-orange luster shows a woodgrain pattern of amber-brown toning on each side. Census: 15 in 66 Red and Brown, 6 in 66 Red finer (1/18). PCGS# 38233 Base PCGS# 3580

1872 Two Cent Piece, MS64 Red and Brown Only 65,000 Circulation Strikes Produced

3746 1872 MS64 Red and Brown PCGS. CAC. Sharply struck and free from visible carbon, the surfaces are exceptionally clean and mark-free for the grade. Each side presents a tan-brown appearance with hints of gold. The luster quality is only slightly muted, the grade-limiting factor. The 1872 has the lowest (and last) mintage of business strikes in the two cent series, with only 65,000 pieces struck. Population: 35 in 64 (2 in 64+) Red and Brown, 22 finer. CAC: 9 in 64, 17 finer (1/18).

Ex: Long Beach Signature (Heritage, 9/2005), lot 1245; FUN Signature (Heritage, 1/2010), lot 409. NGC ID# 22NG, PCGS# 3613

1872 Two Cent, MS66 Red Among the Finest Certified

3747 1872 MS66 Red PCGS. CAC. The Civil War era brought about a number of unusual denominations and methods of paying for goods and services, including encased postage stamps, fractional currency notes, paper scrip (known today as obsolete notes) and tokens. The federal two cent coins were introduced in 1864, with the three cent nickel coins debuting the next year, closely followed by the nickel five cent piece in 1866.

As the new denominations were issued, the two cent pieces dwindled in popularity. The initial production figure for the denomination was in excess of 19 million pieces, but annual mintages would only decline from this point forward. Although the series officially ended in 1873, production of business strikes ceased in 1872, with a mintage of only 65,000 coins. Survivors of this final-year issue are among the most sought-after of the series, especially in full Red grades.

Bright orange-red surfaces along with strong luster are attributes of this Premium Gem example. In addition, the strike is sharp. A few wispy die cracks are present, and an as-made lint mark appears on the leaf near 3 o'clock on the obverse. Minor scattered carbon does not pose a distraction.

An exceptional coin with strong visual appeal, this piece is tied with only two others as the finest surviving example and is housed in a first generation holder. PCGS has awarded the MS66 Red grade to three examples, with none so-graded at NGC. Neither service has awarded a higher grade to a single piece (1/18), and this is the only CAC-designated MS66 Red.

Ex: FUN Signature (Heritage, 1/2014), lot 5151; PNG Invitational Signature (Heritage, 10/2014), lot 4645. NGC ID# 22NG, PCGS# 3614

PROOF THREE CENT SILVER

1866 Three Cent Silver, PR65 Deep Cameo Elusive Contrasted Proof

3748 1866 PR65 Deep Cameo PCGS. CAC. PCGS has certified more than 300 examples of the 1866 three cent silver issue, yet only seven pieces have achieved the Deep Cameo designation. This remarkable Gem exhibits deeply mirrored fields and highly lustrous, silver devices with outstanding contrast. A hint of peripheral gold toning enhances the eye appeal. Population: 1 in 65 Deep Cameo, 3 finer. CAC: 1 in 65, 3 finer (1/18). NGC ID# 27CC, PCGS# 03716

SHIELD NICKEL

1879 Shield Nickel, Satiny MS66 Sharp and Well-Preserved

3749 MS66 PCGS. The 1879 Shield nickel is a better date, coming from a mintage of only 25,900 coins. The only lower mintage in the series belongs to the 1880 (16,000 pieces), which is considered the key date in all grades. This Premium Gem 1879 is conditionally rare, and only a few finer pieces are known. Razorsharp devices reside amid satiny mint luster, which shows faint golden overtones atop the silvery-gray patina. Population: 28 in 66 (2 in 66+), 2 finer (1/18).

From The Sea Cliff Collection. NGC ID# 5KWK, PCGS# 3808

LIBERTY NICKELS

1885 Liberty Nickel, MS67 Tied for Finest at PCGS

3750 1885 MS67 PCGS. A surprisingly small mintage of 1.4 million Liberty nickels was accomplished in 1885 and few high-quality examples were saved by contemporary collectors at the time of issue. Most collectors of that era preferred to update their collections every year by ordering proof sets from the Philadelphia Mint and proofs are actually more common than high-grade business strikes in today's market. Among business-strike issues, the 1885 is clearly the most challenging issue of the series in high grade, even outdistancing the lower mintage 1912-S.

The present coin is a spectacular Superb Gem, with impeccably preserved surfaces that radiate vibrant, frosty mint luster from both sides. The design elements are sharply detailed throughout, even on the usual troublesome spots on the lower wreath. Struck from a late state of the dies, both sides of this coin show an extensive network of die cracks through the peripheral elements. The break above the E in AMERICA is especially interesting. Pleasing shades of pale gold and lavender toning enhance the terrific eye appeal. Population: 4 in 67, 0 finer (12/17). NGC ID# 2773, PCGS# 3846

PROOF LIBERTY NICKELS

1901 Liberty Nickel, PR68 Tied for the Finest Certified

1901 PR68 PCGS. An exquisite Superb Gem proof, this 1901 Liberty nickel marks the opening coinage at the third Philadelphia Mint building. Satiny and boldly detailed devices seem to float across the lightly mirrored fields of this gorgeous example that exhibits champagne and iridescent toning over flawless light gray surfaces. Population: 2 in 68, 0 finer (1/18). NGC ID# 278B, PCGS# 3899

1910 Liberty Nickel, PR68 None Graded Finer

3752 1910 PR68 NGC. A sole daub of obverse amber-gold patina appears on the otherwise untoned surfaces on each side of this pristine Superb Gem 1910 Liberty nickel, one of the few finest certified at NGC and PCGS combined. The strike is impeccable throughout, with top-notch eye appeal. Census: 5 in 68 (1 in 68★), 0 finer (1/18). NGC ID# 278L, PCGS# 3908

BUFFALO NICKELS

1914-S Buffalo Nickel, MS66 Splendid Color, Sharply Struck Motifs

3753 1914-S MS66 PCGS. The 1914-S is moderately available in all grades through MS65, but Premium Gem examples are very scarce and finer coins are extreme rarities. This satiny Premium Gem displays elegant coloration and lively mint luster. The strike is sharp — not always the case for a 1914-S, even in high Mint State condition — and the surfaces are virtually mark-free. Pale-blue and steely nickel color yield to violet and gold accents that give the coin exceptional eye appeal. Population: 41 in 66 (6 in 66+), 2 finer (1/18). NGC ID# 22R6, PCGS# 3926

1921-S Nickel, Luminous MS65 CAC-Endorsed Condition Rarity

3754 1921-S MS65 PCGS. CAC. Struck from eroded dies, showing metal flowlines in the fields and fine cracks throughout. The sharpness of the strike also suffers as a result. Nonetheless, the frosty mint luster is beautifully preserved, and eye appeal is outstanding. A hint of champagne toning graces each side. The 1921-S is a better date in Gem condition and is rarely seen finer. Housed in a first generation holder. Population: 78 in 65 (4 in 65+), 9 finer. CAC: 10 in 65, 2 finer (1/18). NGC ID# 22RU, PCGS# 3948

1937-D Three-Legged Nickel, MS64 Well-Struck and Lightly Toned

3755 1937-D Three-Legged, FS-901, MS64 NGC. Satiny luster and golden toning accent his Choice 1937-D Three-Legged Buffalo nickel. The strike is above average for the variety, and no major abrasions are visible. Heavy metal flowlines in the fields and recesses is diagnostic of the Three-Legged issue, as the advanced die state is the cause of the bison's missing forward leg. This piece balances quality and affordability and will appeal to many collectors. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1937-D Three-Legged Nickel, MS64 FS-901, Famous Guide Book Entry

3756 1937-D Three-Legged, FS-901, MS64 PCGS. CAC. Most 1937-D Three-Legged nickels are in Very Fine to About Uncirculated condition, as the variety was only discovered a few years after its issuance. Choice examples are scarce, and Gems are rare. A thin veneer of gold patina covers this satiny key date. The devices are typically struck, and the usual signs of die erosion are present. Postmint flaws are trivial. NGC ID# 22SX, PCGS# 38475 Base PCGS#

1937-S Nickel, Lightly Toned MS67+ A CAC-Approved Registry Coin

3757 1937-S MS67+ PCGS. CAC. This piece is among the finest 1937-S Buffalo nickels endorsed by CAC and one of only four Plus-graded MS67s at PCGS, where a single MS68 coin is finer (1/18). The strike is bold, and the satiny surfaces display yellowgold toning overall. No abrasions are visible beneath a loupe. An outstanding Registry Set candidate. NGC ID# 22SY, PCGS# 3983

1938-D Buffalo Nickel, MS68 Colorfully Toned Registry Coin

3758 1938-D MS68 PCGS. CAC. The 1938-D Buffalo nickel is a plentiful issue, ideal for type purposes. Nonetheless, MS68 coins are conditionally rare and none are known finer. This CAC-approved piece is a must-have item for the Registry Set collector. Sharp design elements and smooth, satiny mint luster reside amid beautiful multicolor toning on each side. Minor die erosion in the fields and recesses is normal for the issue. Population: 25 in 68 (1 in 68+), 0 finer. CAC: 5 in 68, 0 finer (1/18). NGC ID# 22T2, PCGS# 3984

JEFFERSON NICKEL

1944-P War Nickel, MS67+ Full Steps Immaculately Preserved, Tied for Finest Known

3759 1944-P MS67+ Full Steps PCGS. Swirling mint luster illuminates a palette of lemon-gold, peach, and pale-rose toning that graces both sides of this immaculate, high-end Superb Gem war nickel. The Full Steps designation is richly deserved, since the steps are razor sharp. Parts of the upper portico are not quite as bold. This resplendent nickel is tied for the finest-certified at either service. PCGS population: 30 in 67 (3 in 67+) Full Steps, 0 finer (1/18). NGC ID# 22TU, PCGS# 84022

PROOF JEFFERSON NICKEL

1941 Nickel, Lightly Toned PR68 A Top-Grade Registry Coin

3760 1941 PR68 PCGS. CAC. PCGS does not record a single Cameo example of the 1941 proof Jefferson nickel, and this piece is tied with four others as the finest non-Cameo (1/18). Lovely pastel toning on each side gives the interiors a lavender-blue hue, ceding to gold, yellow, and mint-green at the borders. Only the bottom step of Monticello exhibits any form of strike weakness. The preservation is virtually flawless. NGC ID# 27A2, PCGS# 4178

EARLY HALF DIMES

1796 Draped Bust Half Dime, VF25 Colorfully Toned LIKERTY Example, V-1, LM-1

3761 1796 LIKERTY, V-1, LM-1, R.3, VF25 PCGS. A solid, midgrade representative of this popular early half dime variety. Both sides are veiled in medium-intensity lavender, gold, and charcoal patina, requiring close examination to discern some minor abrasions in the right obverse field. There are a few shallow and not overly conspicuous planchet voids (as produced) within the same area. Sharp for the assigned grade. Housed in a previous generation blue label holder with barcode on the back. Population: 9 in 25, 82 finer (12/17).

From The Bayside Collection. NGC ID# 22ZX, PCGS# 38596 Base PCGS# 4254

1797 Half Dime, VF30 V-2, LM-1, 15 Stars

3762 1797 15 Stars, V-2, LM-1, R.3, VF30 PCGS. The 1797 half dimes are known with three different obverse layouts including 13, 15, and 16 stars. Most numismatic researchers now believe that the 15 Stars coins were struck first, then the 16 Stars coins, and finally the 13 Stars pieces. Like nearly all known examples, this light gray piece has central weakness on both sides, with virtually no detail remaining in the eagle. Examination with a glass reveals that this attractive half dime has minuscule marks on each side. However, this piece is much finer than the typical survivor. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

SEATED HALF DIME

1853 Arrows Half Dime, MS67 Superb Preservation, Old-Time Toning

3763 1853 Arrows MS67 PCGS. The 1853 is one of the two most plentiful With Arrows half dime issues, popular as a type coin. Nonetheless, Superb Gem examples are rarely located. This piece is among the finest known. Sharp design elements complement frosty, unabraded mint luster. The interiors show light golden toning, while the borders have deeper amber, russet, and teal coloration. Population: 11 in 67 (1 in 67+), 0 finer (1/18).

From The Sea Cliff Collection. NGC ID# 233Y, PCGS# 4356

PROOF SEATED HALF DIME

1863 Half Dime, PR67 Cameo Lovely Golden Toning

3764 1863 PR67 Cameo NGC. Both sides of this Superb Gem Cameo proof exhibit exceptional gold toning that accents the contrast on this important Civil War issue. The proof mintage was just 460 coins, and 445 submissions have been certified at NGC and PCGS. However, only 71 of those are Cameo examples, and none are Deep or Ultra Cameo. Census: 4 in 67 Cameo (1 in 67★), 0 finer (1/18). NGC ID# 235Y, PCGS# 84446

EARLY DIMES

1797 Draped Bust, Small Eagle Dime JR-2, Knob 9, 13 Stars, AU Sharpness

3765 1797 13 Stars, JR-2, R.4 — Cleaned — PCGS Genuine. AU Details. A Knob 9 and 13 Stars on the obverse confirms the variety. JR-2 dimes are rare in any condition approaching Mint State, and while this example has traces of an old cleaning beneath pleasing bluish-gray and gold toning, the strike remains sharp with only slight wear in the centers. Brief adjustment marks in the central reverse are largely unseen without a lens. The slightly granular surfaces show few abrasions and the eye appeal remains strong for the assigned grade.

1805 JR-2 Dime, CAC-Approved MS64 Four Berries Reverse Type Coin

3766 1805 4 Berries, JR-2, R.2, MS64 PCGS. CAC. JR-2 is distinctive for having only four berries on the reverse olive branch. As most design features during this period were entered into the die by hand, this variety has numerous other differences from the scarcer JR-1 die pairing, but the berry count is the most significant as it separates JR-2 as a unique *Guide Book* variety.

The obverse die crack from the rim through ERTY is well-documented in all references, although less attention is paid to the heavy clash marks that are seen on both sides in this late die state. The most prominent clash runs through the right-side reverse stars into the ribbon at UNUM. A heavy die line from star 10 in that region and small rust lumps around it give the impression of a die crack to the untrained eye, although no such defect is documented for this reverse. Other, more prominent rust lumps are visible near the D in UNITED.

This is a lustrous, frosty near-Gem, with silver surfaces lightly tinged with gold. Liberty's portrait is well-defined, but the eagle, shield, and numerous stars are incompletely struck, with parallel roller marks (mint-made) visible on the reverse, not fully struck out of the planchet. Population: 28 in 64 (2 in 64+), 19 finer. CAC: 7 in 64, 8 finer (1/18).

Ex: Central States Signature (Heritage, 4/2008), lot 2263. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

BUST DIME

1829 JR-7 Dime, Sharp MS65 A High-End Small 10C Variety

3767 1829 Small 10C, JR-7, R.1, MS65 PCGS. CAC. Small 10C varieties show the 0 in the denomination noticeably shorter than the 1, as seen here. Date position and star placement aid in identification of the available JR-7 die pair. This CAC-approved Capped Bust type coin displays sharp detail and satiny, goldentoned mint luster. No distracting abrasions are seen. PCGS# 38832 Base PCGS# 4511

SEATED DIMES

1838 Seated Liberty Dime, MS66 No Drapery, Large Stars

3768 1838 No Drapery, Large Stars, F-111, R.4, MS66 PCGS. CAC. Attributed by a diagonal crack bisecting the obverse from star 7 through Liberty, exiting below the foot to the rim; repunching of star 13; and die scratches behind the ribbon knot and lower portion of the wreath. Lustrous silvery surfaces exhibit sharply struck design elements and are impeccably preserved. The CAC sticker affirms the quality of this beautiful Premium Gem. Population: 17 in 66, 2 finer. CAC: 6 in 66, 2 finer (12/17). PCGS# 537657 Base PCGS# 4568

1884-S F-104 Dime, MS66 Rich Original Patina

3769 1884-S F-104, R.4, MS66 PCGS. Sea-green and lavender shades embrace the obverse. The reverse is peach-gold and aquamarine. The cartwheel shimmer is formidable. A bold strike and pristine preservation testify to the quality. The 1884-S is surprisingly rare in Gem or finer grades. For all Fortin varieties, Population: 3 in 66, 2 finer (1/18). PCGS# 593529 Base PCGS# 4693

1885-S Dime, Toned MS63 Rare in All Mint State Grades

3770 1885-S F-101, R.3, MS63 NGC. A small mintage of only 43,690 pieces makes the 1885-S Seated dime a semikey date in all grades. Mint State coins are genuinely rare. This Select example displays sharp design elements and deep gunmetal-gray, lavender, and golden toning. Any minor abrasions are masked by the rich patina. Census: 3 in 63, 10 finer (1/18). PCGS# 538701 Base PCGS# 4695

PROOF SEATED DIMES

1859 Dime, Brilliant PR66+ Cameo Final Year of the With Stars Type

3771 1859 PR66+ Cameo PCGS. CAC. F-101, R.4. Stark field-to-device contrast is apparent on each side of this sharply struck, impressively preserved Premium Gem proof specimen that features both the PCGS Plus designation and CAC endorsement. The surfaces are free of contact marks, with only a few scattered, microscopic hairlines noted on either side and a thin strike-through lint mark at Liberty's head. This is an important date among type collectors, since the 1859 is the final proof issue in the Stars Obverse Seated dime series. Population: 7 in 66 (2 in 66+) Cameo, 3 finer. CAC: 5 in 66, 1 finer (1/18).

Ex: Baltimore Signature (Heritage, 3/2009), lot 864; Summer FUN Signature (Heritage, 7/2009), lot 365; Long Beach Signature (Heritage, 6/2013), lot 4429. NGC ID# 23CD, PCGS# 84748

1874 Arrows Dime, PR66 Cameo Extraordinary Eye Appeal and Quality

3772 1874 Arrows PR66 Cameo PCGS. F-101, R.3. Shining silver centers contrast boldly with glassy-mirrored fields, while the margins show translucent layers of peach and orange patina. Great preservation and all-around visual appeal are the hallmarks of this popular and elusive Arrows proof dime issue. An exquisite example, suitable for the finest proof Seated dime collection. Neither PCGS nor NGC have seen one finer. Population: 2 in 66 Cameo, 0 finer (1/18). NGC ID# 23DJ, PCGS# 84770

1879 Dime, PR66 Deep Cameo Outstanding White-on-Black Contrast

3773 1879 PR66 Deep Cameo PCGS. CAC. A deeply contrasted representative with bold white-on-black contrast and a high level of visual appeal, this is one of just 1,100 proofs struck in 1879. Each side is entirely brilliant with deep mirroring in the fields and a thick layer of mint frost over the devices. Exceptionally preserved and virtually unmarked. This is the single finest Deep Cameo coin at PCGS (1/18). PCGS# 94776

1883 Seated Dime, PR68 Cameo Magnificently Toned, Finest Cameo at PCGS

3774 1883 PR68 Cameo PCGS. F-103, R.3. Two varieties are known for the proof 1883 dime. Fortin-103 shows a level date positioned farther right and a partial first S in STATES. This amazing specimen, from a mintage of 1,039 proofs, features pristine surfaces and a razor-sharp strike. Brilliant centers turn to apricot-orange, violet, and cobalt-blue at the borders on each side. The fields display mirrored reflectivity to contrast boldly with the richly frosted devices, earning the all-important Cameo designation. The field-device contrast is complete on both sides in spite of the magnificent toning, which dominates the borders yet yields to the immaculate silver and gold-toned centers. Population: 1 in 68 Cameo, 0 finer (1/18). NGC ID# 23D8, PCGS# 84780

BARBER DIMES

1892 Barber Dime, MS67+ Beautiful CAC-Approved Type Coin

3775 1892 MS67+ PCGS. CAC. Most Barber dime issues are rare or unknown in Superb Gem condition, which leaves only a few dates for type collectors to choose from when this grade is desired. The 1892 is among the collectible dates in this grade and arguably makes the most sense as a type coin due to its first-year status. Here offered is a Plus-graded, CAC-approved coin with frosty luster and razor-sharp devices. Attractive rose-gold, champagne, and seagreen toning graces unabraded surfaces on each side. Population: 21 in 67 (5 in 67+), 1 finer. CAC: 22 in 67, 0 finer (1/18). NGC ID# 23DK, PCGS# 4796

1895 Barber Dime, MS66+ Very Rare Any Finer

3776 1895 MS66+ PCGS. From a small mintage of 690,000 pieces, the 1895 Barber dime is very rare in grades above the MS66 level. This Plus-graded Premium Gem exhibits well-detailed design elements and well-preserved, lustrous surfaces, under shades of greenish-gold and lavender toning. Eye appeal is outstanding. Population: 43 in 66 (30 in 66+), 5 finer (1/18). NGC ID# 23DV, PCGS# 4806

1899-O Dime, MS66+ Rarely Encountered Finer

3777 1899-O MS66+ PCGS. CAC. Some strike weakness is evident as planchet rolling lines are visible on the high points of this lovely New Orleans dime that ranks high in the census for the issue. This piece has brilliant satin luster beneath lovely blue, gold, and iridescent toning. Population: 24 in 66 (1 in 66+), 2 finer. CAC: 4 in 66, 1 finer (1/18). NGC ID# 23EA, PCGS# 4819

PROOF BARBER DIME

1893 Barber Dime, PR67 Deep Cameo

3778 1893 PR67 Deep Cameo PCGS. CAC. Ex: Bruce Scher. The proof 1893 dime production of 792 pieces is substantially smaller than the proof mintage of the previous year, presumably due to reduced collector enthusiasm for the second year of the Barber type. This fully struck Superb Gem delivers incredible eye appeal with heavily frosted devices, deeply mirrored fields, and just a trace of light golden patina. Population: 4 in 67 Deep Cameo, 0 finer. CAC: 4 in 67, 0 finer (1/18).

Ex: Long Beach Signature (2/2005), lot 4055; Joseph C. Thomas Collection / Central States Signature (Heritage, 4/2009), lot 245; ANA Signature (Heritage, 8/2010), lot 5634. NGC ID# 23G4, PCGS# 94877

MERCURY DIMES

1916-D Mercury Dime, XF40

3779 1916-D XF40 PCGS. The Denver Mint only struck 264,000 examples of the newly approved Mercury dime in 1916 before it was ordered to stop and focus all its resources on striking the even newer Standing Liberty quarters. Accordingly, the 1916-D has always been a sought-after key to the series. This XF40 specimen exhibits some wear on the diagonal bands, but the surfaces are lightly abraded and show attractive highlights of golden-brown toning. NGC ID# 23GY, PCGS# 4906

1916-D Mercury Dime, AU Details Split Bands

3780 1916-D — Cleaning — PCGS Genuine. AU Details. Hairlines on each side betray an old cleaning, although this borderline Uncirculated 1916-D Mercury dime still has pleasing satin luster and a faint hint of light golden toning. Scattered light abrasions are also apparent on each side but do not detract. Of special importance on this piece is a remarkably sharp strike that includes the centers and the border legends. The horizontal fasces bands are fully separated.

1916-D Mercury Dime, MS66 Full Bands Deep Original Toning Housed in an Old Green Label Holder

3781 1916-D MS66 Full Bands PCGS. The 1916-D Mercury dime is one of the famous 20th century key dates that once ignited often feverish searches in circulation among school children (and adult collectors and dealers) who hoped to find an example for their collection. Although the date was never truly rare in the absolute sense, it was genuinely elusive in circulation where most examples wound up shortly after production. The scarcity of the Denver key eventually prompted counterfeiters to begin adding mintmarks to the common Philadelphia coins to turn a fast profit, a practice that only intensified many collectors' desire to acquire the genuine article.

The Denver Mint bore the brunt of quarter dollar production near the end of 1916, when Adolph Weinman's so-called Mercury dime made its debut. Dime coinage was almost entirely laid upon the Philadelphia and San Francisco Mints until early 1917, which stunted the Denver dime out toward the end of the year. Only 264,000 D-mint Mercury dimes were produced in 1916, which would come to be by far the lowest mintage of any mint for the entire 1916-1945 series.

Demand for the 1916-D Mercury dime has withstood a century of numismatic market swings and continued production of new series. Many collectors consider the Mercury dime as the last truly challenging series to collect of this denomination, thanks in part to the key-date 1916-D, which is a "stopper" in all grades. In MS66 with Full Bands definition, the '16-D is genuinely rare. The piece offered here is sharp throughout the design elements. Medium intensity charcoal-gray, olive, and sea-green toning bathes lustrous surfaces on both obverse and reverse. A couple of tiny, unobtrusive marks that are well concealed within the toning are not in the least bothersome. This is a prize specimen for the advanced Mercury dime specialist. Housed in an old green label holder. Population: 26 in 66 (3 in 66+) Full Bands, 8 finer (1/18). Ex: Pittsburgh Signature (Heritage, 8/2004), lot 5728; Long Beach Signature (Heritage, 2/2005), lot 6336. NGC ID# 23GY, PCGS# 4907

1918 Dime, MS67 Full Bands A Condition Census Rarity

3782 1918 MS67 Full Bands PCGS. This sharp, frosty Superb Gem displays hints of golden toning across otherwise brilliant mint luster. No distractions are apparent beneath a loupe. The 1918 is a plentiful date, but high-end Full Bands examples are conditionally elusive. PCGS has only certified five coins in this grade and NGC four, neither service having seen a finer representative (1/18). NGC ID# 23H5, PCGS# 4917

1918-S Dime, MS66 Full Bands Lightly Toned and Lustrous

3783 1918-S MS66 Full Bands PCGS. Light wheat-gold toning adorns portions of this thoroughly lustrous and well-struck Premium Gem. Careful examination with a lens shows only unimportant imperfections. The 1918-S has a generous mintage, but relatively few pieces were set aside by collectors prior to the 1930s. Most Mint State examples lack full separation on the central bands of the fasces, but the present coin provides an exception. This high-grade dime will be of interest to series specialists. Population: 17 in 66 Full Bands, 2 finer (1/18). NGC ID# 23H7, PCGS# 4921

1919-S Mercury Dime, MS64 Full Bands Seldom Encountered Finer

3784 1919-S MS64 Full Bands PCGS. The 1919-S Mercury dime is something of a strike rarity in the series and examples in MS64 condition, with the Full Bands designation, are quite elusive. This impressive Choice example offers unusually sharp design details, with Full Bands definition on the fasces, and well-preserved, lustrous surfaces, with a few hints of green and amber toning. Population: 40 in 64 Full Bands, 28 finer (12/17). NGC ID# 5LLN, PCGS# 4927

1925-S Dime, MS66+ Full bands Beautiful Luster and Toning

3785 1925-S MS66+ Full Bands PCGS. CAC. The 1925-S is conditionally scarce in MS66 and rare finer, with or without Full Bands. This CAC-approved example displays full central detail on the portrait and fasces with localized weakness on the upper reverse border legend. The coin is frosty and lustrous, showing no mentionable abrasions. Lovely golden toning deepens toward the peripheries. Population: 27 in 66 (3 in 66+) Full Bands, 5 finer. CAC: 7 in 66, 1 finer (1/18). NGC ID# 5LX3, PCGS# 4953

1941-S Mercury Dime, MS68 Full Bands Semiprooflike Fields, None Certified Finer

3786 1941-S MS68 Full Bands PCGS. An available date in lower grades, the 1941-S is a great condition rarity in MS68 Full Bands, and at this level it is highly sought-after by Registry Set collectors. The present coin displays brilliant, satiny mint luster with semiprooflike fields that still show faint die polishing lines under magnification. The strike is sharp in the centers but slightly weak around the outer edges of the border legends. Population: 11 in 68 Full Bands, 0 finer (1/18). NGC ID# 23|Z, PCGS# 5033

1945-S Micro S Dime, MS67 Full Bands

3787 1945-S Micro S MS67 Full Bands PCGS Secure. The 1945 Micro S is popular as the only mintmark punch of this type and size known during the 1940s. In Superb Gem condition with Full Bands, it is a rare and highly popular issue among *Guide Book* variety collectors and Mercury dime Registry Set specialists. This brilliant and frosted example is especially sharp at the centers with a faint hint of reddish-gold patina creeping down from the rims. There are no marks of consequence. Population: 36 in 67 (3 in 67+) Full Bands, 3 finer (1/18). NGC ID# 2YXG, PCGS# 5063

PROOF ROOSEVELT DIME

1972-S Dime, PR70 Deep Cameo Single Finest Certified

3788 1972-S PR70 Deep Cameo PCGS. The Registry collector in search of the single-finest 1972-S dime need look no further than the present specimen. It is the only example to attain the ultimate grade at either leading service. The glassy fields are pristine, the strike is unimprovable, and the cameo contrast is irrefutable. NGC ID# 27F7, PCGS# 95250

PROOF TWENTY CENT PIECES

1877 Twenty Cent, Mirrored PR61 Umber and Blue Border Toning

3789 1877 PR61 PCGS. BF-1, R.3. A proof-only issue from a net mintage of just 350 pieces, many of the original mintage of 510 proofs were apparently melted. The bright surfaces of this example display traces of purple toning in the protected areas and exhibit sharply struck design features, except for the usual softness on the eagle's right (facing) claw. The few hair-thin lines in the fields are not all that bad. All in all, a nice twenty cent piece that will fit comfortably into its challenging spot in a high-grade collection. From The E.B. Strickland Collection, Part II. NGC ID# 27H4, PCGS# 5305

1878 Twenty Cent, PR64 Challenging Proof-Only Semikey

3790 1878 PR64 PCGS. BF-1, R.3. A raised lump in the drapery right of the shield is common to all 1878 twenty cent proofs from the final issue in the series. The Mint struck 600 specimens that year. Minimal toning appears over the centers. Instead, color is generally confined to the border areas, where blushes of gold are seen. The fields display a hint of reflectivity, and there are few contact marks. Housed in a green label holder. NGC ID# 27H5, PCGS# 5306

EARLY QUARTERS

1796 Quarter Dollar, Good Details B-1, Visually Pleasing

3791 1796 B-1, R.4 — Scratch — PCGS Genuine. Good Details. Tompkins Die State 3, with a crack through the 1 in the date. This pewter-gray Small Eagle type coin displays boldly outlined — and partially detailed — central devices, along with completely readable border legends and a sharp date. The obverse rim is slightly weak along the upper-left and lower-right borders, as well as the corresponding portions of the reverse — uneven striking from early screw presses often resulted in apparently uneven wear in low grades. The only aspect of this piece that prevents a numeric grade is an old, thin, X-shaped scratch on the reverse below the eagle that is almost unseen by the naked eye.

From The E.B. Strickland Collection, Part II.

1804 Quarter Dollar, B-1, VG8 Attractive Color and Surfaces Early Die State

3792 1804 B-1, R.3, VG8 PCGS. Tompkins Die State 1/1, with no visible clashing on either side. This attractive circulation cameo displays deep smoke-gray fields and lighter tan-gray relief elements. Liberty's eye remains visible, and on the reverse RIBUS UNUM is visible on the ribbon. The obverse rim is sharp, but the reverse is slightly weak from 2 to 7 o'clock. No bothersome abrasions are seen. The 1804 is a key date in the Draped Bust type. This was the first quarter dollar struck since 1796, and only 6,738 pieces were produced.

From The E.B. Strickland Collection, Part II. NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

1806/5 B-1 Quarter Dollar, MS63 Conditionally Rare *Guide Book* Overdate

3793 1806/5 B-1, R.2, MS63 PCGS Secure. Tompkins Die State 2/3. Both dies are clashed, and a crack is visible along the top of the UNI in UNITED. B-1 is the only overdate variety for this issue, a *Guide Book*-listed variety that is in high demand in all grades. This is a high-visibility overdate, seen by the unaided eye. On the reverse, the C. in the denomination crowds into the eagle's tailfeathers. Mint State examples of the variety are rarely offered, mainly scattered throughout the MS61 to MS64 grade range. This Select coin is well-struck in the centers and only mildly weak on the border stars. A hint of champagne toning graces the satiny surfaces, which show only a few light abrasions. Population: 3 in 63, 8 finer (1/18). NGC ID# 23RE, PCGS# 38938 Base PCGS#

BUST QUARTERS

1822 B-2 Quarter, AG3 25 Over 50C

1822 25 Over 50C, B-2, R.5, AG3 PCGS. This is a rare and popular variety that enjoys its own *Guide Book* listing, along with a total population in the range of 50 to 60 pieces. The availability is far below the countless number of collectors who seek quarter dollars by Guide Book or Browning varieties. The smooth pewtergray surfaces show a full date, an outlined bust, most star details, complete legends and denomination on the reverse, and a nearly complete reverse border. Slightly lighter areas on the eagle's wings are inconsequential.

From The E.B. Strickland Collection, Part II. NGC ID# 23RN, PCGS# 38970 Base PCGS# 5333

1831 B-1 Quarter, MS64 Small Letters

3795 1831 Small Letters, B-1, R.3, MS64 PCGS. CAC. A later die state most easily identified by the pattern of die cracks in the reverse peripheries, and the second-scarcest Small Letters die marriage of the year. This is a lustrous coin, particularly so on the devices, featuring mainly mauve-gray fields with green-gold accents in the peripheries. A few minute surface marks appear to determine the grade. Population for all Small Letters varieties: 68 in 64 (8 in 64+), 23 finer (1/18). NGC ID# 23RW, PCGS# 38980 Base PCGS# 5348

1831 Large Letters Quarter, MS63 B-5, FS-301, Colorful Toning

3796 1831 Large Letters, B-5, FS-301, R.3, MS63 NGC. CAC. The B-5 die pairing is identified in part by the repunched date, showing clear small underdigit 1s beneath the primary impression. The 8 is also repunched. The 2 in the denomination is halfway left of the fletching. Liberty and the eagle are razor-sharp. Design detail softens toward the outer regions. Mint luster shines through lovely crimson, gold, blue, and green patina. Reverse toning is a shade lighter, but both sides are equally eye-appealing. NGC ID# 23RW, PCGS# 38984 Base PCGS# 5349

SEATED QUARTERS

1855 Seated Liberty Quarter, MS65 Short-Lived Arrows Design

3797 1855 Arrows MS65 NGC. Medium blue rims on the obverse frame a golden center, while the reverse is scarcely toned silver-gold. A few scattered marks appear under a loupe, mostly confined to the obverse. This piece is sharply struck and lustrous, an attractive representative of the second-year Arrows, No Rays issue. Census: 8 in 65 (1 in 65+), 6 finer (1/18). NGC ID# 23U8, PCGS# 5435

1870-CC Seated Liberty Quarter, Good 6 Rare First-Year Key

3798 1870-CC Good 6 PCGS. The Carson City Mint began coinage operations in 1870, when a meager mintage of 8,340 Seated Liberty quarters was accomplished. Carson City coinage from this period was often struck on faulty, porous planchets, caused by improper annealing. In addition, Larry Briggs reports the planchets were composed of pure Comstock Lode silver, unalloyed with copper, which made the coins softer and more prone to wear. Few examples were saved for numismatic purposes, and only one coin has been certified in Mint State.

The present coin is an evenly worn Good 6 example, with the date, mintmark, and much of the lettering still legible. Three letters in LIBERTY remain intact and the major design elements are completely outlined, with some interior detail still discernible. The pleasing dove-gray surfaces show only minor abrasions and are free of planchet voids, with no porosity. This lot represents an important opportunity to acquire a problem-free example of this elusive key issue. Population: 4 in 6, 44 finer (12/17).

From The E.B. Strickland Collection, Part II. NGC ID# 23UL, PCGS# 5477

1873-CC Seated Quarter, AU Details Low-Mintage Arrows Type

3799 1873-CC Arrows — Plugged — PCGS Genuine. AU Details. Briggs 1-A. Only 12,462 Seated Liberty quarters with the short-lived Arrows design were struck at the Carson City Mint in 1873. Some evidence of repair can be seen on Liberty's head but the design elements retain almost all of their original detail. The surfaces are blanketed in shades of greenish-gold and magenta toning and the overall presentation is quite attractive. From The E.B. Strickland Collection, Part II.

PROOF SEATED QUARTERS

1863 Seated Liberty Quarter, PR65 Cameo Only 460 Examples Struck

3800 1863 PR65 Cameo PCGS. Briggs 4-D. Only 460 proof Seated Liberty quarters were struck in 1863, making the issue very rare in Gem condition, with Cameo surfaces. The sharply detailed frosty design elements of this delightful Gem contrast boldly with the reflective fields and the well-preserved surfaces show a few hints of greenish-gold toning. Population: 4 in 65 Cameo, 3 finer (1/18). NGC ID# 23WR, PCGS# 85559

1872 Quarter, PR67 Cameo Terrific All-Around Quality

3801 1872 PR67 Cameo PCGS. CAC. This CAC-approved proof quarter is lightly frosted over the central design features, contrasting against reflective, flawlessly preserved fields. The obverse displays cream-gray and golden color, while the reverse has variegated violet, blue, green, and rose hues throughout. Merely 950 specimens were stuck in 1872, and this piece ranks among the finest at PCGS and CAC. Population: 4 in 67 Cameo, 1 finer. CAC: 4 in 67, 0 finer (1/18). NGC ID# 23X5, PCGS# 85571

1873 No Arrows Quarter, PR67 Strong Registry Set Contender

1873 No Arrows PR67 PCGS. Briggs 1-A. Only 600 proof No Arrows quarters were struck early in the year, before the weight was slightly changed. All No Arrows proofs display the Closed 3 in the date. This stunning Superb Gem exhibits sharply detailed design elements and deeply reflective fields throughout. The impeccably preserved surfaces are blanketed in vivid shades of cerulean-blue, pale gold, and bluish-gray toning. Population: 2 in 67, 0 finer (12/17). NGC ID# 23X6, PCGS# 5572

BARBER QUARTERS

1900-O Barber Quarter Dollar, MS66 Rarely Seen This Fine

3803 1900-O MS66 PCGS. This lightly toned, lustrous Premium Gem displays bold definition on most design features, including the hair over Liberty's ear, but a touch of the usual softness is evident on the eagle's claw and arrow fletchings. A couple of trivial marks on Liberty's cheek do not detract from the outstanding overall eye appeal. Population: 9 in 66 (1 in 66+), 5 finer (1/18). Ex: Long Beach Signature (Heritage, 6/2006), lot 2267. NGC ID#

23YL, PCGS# 5626

1913-S Quarter Dollar, MS63 Key Date in High Grade

3804 1913-S MS63 PCGS. The 1913-S is one of the three big keys of the Barber quarter series, along with the 1896-S and 1901-S. Of the three, the '13-S has by far the lowest mintage at only 40,000 pieces. Uncirculated survivors exist primarily by chance, as even the low-mintage dates in the Barber series failed to excite numismatists at the time of issue, and few high-end examples were set aside. The rather basal quality of artistic creativity in the design caused the Barber coins to become a workhorse of commercial transactions rather than a popular collectible. In the earliest part of the 20th century, coin collections were heavily weighted toward series with established rarity and challenge, interesting die varieties, or exceptional aesthetic appeal and intrigue — none of which the Barber quarters could claim at the time. Only in recent decades have the Barber dimes, quarters, and halves received due recognition as worthy collectibles.

This 1913-S quarter dollar has well-struck design elements and mauve, pale-blue, and speckled dark olive toning. Lustrous surfaces are relatively well-preserved, revealing just a few minute contact marks on Liberty's face. A high-end example of a rare date and mintmark combination. NGC ID# 23ZW, PCGS# 5666

1914-S Quarter Dollar, MS65 Slight Field Reflectivity

3805 1914-S MS65 PCGS. The 1914-S is a better date in Uncirculated condition, scarce at all such grade levels. However, Gems are notably rare, and only a few finer coins are seen. This satiny example displays a blush of light champagne toning. The surfaces are smooth with a subtle hint of reflectivity in the fields. The eagle's right (facing) talons and the fletchings exhibit the only notable strike weakness. Population: 15 in 65, 9 finer (1/18). NGC ID# 23ZZ, PCGS# 5669

PROOF BARBER QUARTERS

1906 Barber Quarter, PR68 Only 675 Pieces Struck

3806 1906 PR68 NGC. Vivid shades of peach, forest-green, and cherrywine toning adorn this sharply struck and virtually pristine PR68 Barber quarter. A coin for the most discerning collector or Registry Set enthusiast. One of just 675 proofs produced, few of which can match the quality and eye appeal of the present specimen. Census: 12 in 68 (1 in 68+, 2 in 68★), 0 finer (1/18).

Ex: FUN Signature (Heritage, 1/2008), lot 1210; Rosemont Signature (Heritage, 4/2008), lot 890. NGC ID# 242M, PCGS# 5692

1907 Quarter, PR66 Deep Cameo Near the Condition Census

3807 1907 PR66 Deep Cameo PCGS. CAC. The combined PCGS and NGC population of Deep/Ultra Cameo proof 1907 quarter dollars is only 14 coins. This Premium Gem CAC example is beautifully preserved with strong contrast and a trace of delicate champagne toning. The only mentionable strike weakness is seen on the eagle's right (facing) talons. This is a high-end, conditionally rare example of an otherwise plentiful proof issue, ideal for Registry Sets. Population: 5 in 66 (2 in 66+) Deep Cameo, 3 finer. CAC: 2 in 66, 1 finer (1/18).

From The Property of a Lady. NGC ID# 242N, PCGS# 95693

1913 Barber Quarter, PR67+ Cameo Only Four Finer Cameo Proofs

3808 1913 PR67+ Cameo PCGS. This is an amazing, high-end Superb Gem Cameo proof, with smoothly frosted motifs and glittering, fully mirrored fields. For all practical purposes, this stunning beauty should be called brilliant and untoned, although a subtle hint of seethrough champagne toning adheres to the upper-right obverse field. The impeccable surfaces are entirely free of post-Mint distractions. Only two numerically finer Cameo proofs exist at PCGS, with no Deep Cameos in any grade at that service. Population: 9 in 67 (3 in 67+) Cameo, 2 finer (1/18). NGC ID# 242V, PCGS# 85699

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter Pastel-Toned MS64 Full Head

3809 1916 MS64 Full Head PCGS. CAC. While just 52,000 pieces were struck for the 1916 Standing Liberty quarter, owing to production delays with the design and a subsequent late start to coinage, a number of examples were saved in the years immediately following their release as the scarcity of the issue was almost immediately apparent to the collecting public. Examples are usually available today in most grades, for a price, although quality greatly varies even within a single grade. This CAC-approved near-Gem is exemplary in every respect. The strike is as sharp as is ever seen on the 1916, and the satiny mint luster is free of even minor abrasions. Champagne and other pastel hues decorate each side in an attractive fashion.

Ex: FUN Signature (Heritage, 1/2011), lot 5530. NGC ID# 2AMV, PCGS# 5705

1917-D Standing Liberty Quarter, MS67 Full Head Type One Example

3810 1917-D Type One MS67 Full Head NGC. While a slightly better issue in the Type One series, the D-mint can still be used as a type coin by those who are willing to pay a small premium. The surfaces on this piece are completely brilliant and free from abrasions and they also show the most intense, frosted luster imaginable. But what really sets this piece apart from others of its type is the incredible striking detail. The drapery folds on Liberty's gown are so deeply impressed that they remind one of the "wet drapery" look on statues from Hellenistic Greece. Truly, a coin that must be seen to be fully appreciated. Census: 24 in 67 (2 in 67+ Full Head, 6 in 67 ★), 2 finer (1/18).

Ex: FUN Signature (Heritage, 1/2001), lot 7070. NGC ID# 2432, PCGS# 5709

1917-S Type One Quarter, MS67 Full Head A Top-Grade Registry Set Rarity

3811 1917-S Type One MS67 Full Head PCGS. The San Francisco Type One quarter is a rarity in Superb Gem condition with Full Head detail. None are known numerically finer than the present piece. Razor-sharp detail is evident on each side, and the satiny surfaces are unabraded. Delicate pastel toning graces each side, adding to the eye appeal. Population: 18 in 67 (2 in 67+) Full Head, 0 finer (1/18). NGC ID# 2433, PCGS# 5711

1917 Type Two Quarter, MS67 Full Head Among the Finest Known

3812 1917 Type Two MS67 Full Head PCGS. This Superb Gem is beautifully preserved and frosty, being among the finest Type Two 1917 quarters known. The strike is needle-sharp aside from minor weakness on the border pattern immediately left of the date. Neither side exhibits significant toning, and the eye appeal is outstanding. Population: 15 in 67 (3 in 67+) Full Head, 0 finer (1/18). NGC ID# 2434, PCGS# 5715

1924-S Quarter, MS65+ Full Head Conditionally Elusive CAC Coin

3813 1924-S MS65+ Full Head PCGS. CAC. Frosty mint luster illuminates warm golden toning on this high-end Gem, which shows no distracting surface abrasions. The date numerals are sharp and Liberty's head is well-defined, even while the shield rivets exhibit the usual softness. The 1924-S Standing Liberty quarter is a better date in Full Head grades, scarce at the Gem level and a major rarity any finer. Population: 36 in 65 (3 in 65+) Full Head, 13 finer. CAC: 6 in 65, 1 finer (1/18). NGC ID# 243N, PCGS# 5751

1926-D Quarter, MS65 Full Head Undeniably Attractive for the Issue

1926-D MS65 Full Head PCGS. The 1926-D is one of the renowned strike rarities of the Standing Liberty quarter series, with remarkably few Gem or finer coins certified with the Full Head designation. Some experts consider the '26-D the most challenging issue of the series to locate with a bold strike, while strictly full details examples simply do not exist. Others consider its branch mint brother — the 1926-S — to be equally elusive with a sharp strike.

On the 1926-D, the head is perhaps less problematic than the center and lower-left shield edge, the drapery, sash, and wing edges in determining the overall strike quality. This Gem example earns the Full Head designation from PCGS and is highly lustrous, with brilliant, finely granular surfaces that capture mint luster and return it to the eye in rippling waves of silver sheen. Faint specks of almond-gold toning verify the original surfaces. The shield lacks a bit of central detail and a pair of its rivets, yet the eye appeal is exceptional. Population: 20 in 65 Full Head, 15 finer (1/18). NGC ID# 243S, PCGS# 5757

1927 Quarter Dollar, MS67 Full Head Beautifully Preserved and Toned

Sals 1927 MS67 Full Head NGC. Most collectors consider the 1927 Standing Liberty quarter a common date in the series, but is anything but plentiful in Superb Gem Full Head. This piece is one of only 10 graded so fine at NGC and PCGS combined with none superior (1/18). Sharp head and shield definition complements comparably well-struck toes and eagle's feathers. Frosty, pristine surfaces illuminate rich multicolor toning on each side. Census: 3 in 67 Full Head, 0 finer (1/18). NGC ID# 243U, PCGS# 5761

1930-S Quarter, MS67 Full Head

3816 1930-S MS67 Full Head PCGS. This is a beautifully preserved, luminous, and frosty Superb Gem with a Full Head and partially defined shield rivets. Delicate pastel toning graces each side. Under a loupe, not even a single notable abrasion is observed. The 1930-S is scarce in this high of a grade, and only a handful of finer pieces are known. Population: 31 in 67 (3 in 67+) Full Head, 1 finer (12/17).

From The Jamestown Collection, Part II. NGC ID# 2446, PCGS# 5781

WASHINGTON QUARTERS

1932-D Washington Quarter, MS65 Registry Set Essential, One Finer at PCGS

3817 1932-D MS65 PCGS. Gem examples of the key-date 1932-D quarter are certainly at the top of collectors' want lists, doubly desirable given that PCGS has graded only two pieces numerically finer, making piece such as the present MS65 PCGS coin a must for Registry Set purposes. The satiny surfaces show ivory-white centers ringed in russet with light powder-gray interspersed. The few contact marks are inconsequential, and the strike boldly brought up throughout both sides. Population: 89 in 65 (4 in 65+), 2 finer (1/18).

From The jwb1040 Collection. NGC ID# 2448, PCGS# 5791

1934 Quarter, MS66+ Double Die Obverse

3818 1934 Doubled Die Obverse, FS-101, MS66+ PCGS. IN GOD WE TRUST and the date are widely die doubled on this important *Guide Book* variety. The present example is further significant as the sole finest example attributed by PCGS (11/15). The strike is bold, and the frosty, glowing surfaces display a hint of light golden toning. The preservation is exceptional. Population: 16 in 66 (2 in 66+), 0 finer (1/18).

From The jub1040 Collection. NGC ID# 244A, PCGS# 5900 Base PCGS# 5795

1934 Quarter, Top-Grade MS67+ Widely Collected Light Motto Variant

3819 1934 Light Motto, FS-401, MS67+ PCGS. CAC. Pastel patina comprises mixed powder-blue, gold, and lilac elements that contribute the the outstanding, original eye appeal of this Plusgraded Superb Gem. Radiant luster and pristine surfaces further the visual and technical allure. This is a must-have Registry coin that ranks among the finest examples at both services. Population: 23 in 67 (4 in 67+), 0 finer. CAC: 14 in 67, 0 finer (1/18). NGC ID# 7|K9, PCGS# 146000 Base PCGS# 5794

1937 Washington Quarter, MS65 Doubled Die Obverse, Listed in *Guide Book*

3820 1937 Doubled Die Obverse, FS-101, MS65 PCGS. This elusive *Guide Book* variety exhibits bold die doubling on all obverse elements, most obvious on the date, IN GOD WE TRUST, and the tip of Washington's nose. This variety is one of the most soughtafter in the entire series, but is very seldom found, especially in Mint State. The present coin displays satiny golden luster, with a couple deep amber areas on Washington's neck and the along the lower obverse border. A small mark behind the eye is the only abrasions of note, and the strike is sharply executed. An attractive, high-end example of this important doubled die variety. Population: 3 in 65, 2 finer (1/18).

Ex: Houston Money Show (Heritage, 12/2014), lot 3574.

From The jwb1040 Collection. NGC ID# 49ES, PCGS# 145291 Base PCGS# 95803

1941-D Washington Quarter, MS68 Tied for Finest Certified

3821 1941-D MS68 PCGS. CAC. Vivid shades of sea-green and lavender toning visit the impeccably preserved surfaces of this magnificent Washington quarter, with vibrant mint luster underneath. The design elements are sharply detailed throughout and overall eye appeal is terrific. This coin should find a home in the finest collection or Registry Set. Population: 3 in 68, 0 finer. CAC: 3 in 68, 0 finer (1/18). NGC ID# 244Y, PCGS# 5815

1943 FS-103 Quarter, MS66 Doubled Die Obverse The Finest Attributed at PCGS

3822 1943 Doubled Die Obverse, FS-103, MS66 PCGS. CAC. There are three doubled die varieties known for the 1943 Washington quarters, and the PCGS overall population is approximately the same for all three of those varieties. Just over 30 of each are PCGS-certified in all grades. What sets FS-103 apart, aside from being Guide Book-listed, is that only three of the attributed coins at PCGS are in Mint State, and of those three, the present example is the finest by a margin of two points. There are three finer doubled die coins reported at PCGS, two of which are attributed as FS-102, and one of which is unattributed (1/18). Doubling is evident on the date and all lettering, and is especially visible on IN GOD WE TRUST. This Premium Gem has frosty silver luster and hints of champagne toning on the obverse, with a brilliant, untoned reverse. A prime Registry Set candidate and arguably the most important Washington quarter offering in this sale.

From The jwb1040 Collection. NGC ID# 2455, PCGS# 145620 Base PCGS# 95820

1945 Quarter, Partially Toned MS68 Among the Finest Known

3823 1945 MS68 PCGS. For general collecting purposes, the 1945 Washington quarter is plentiful in attractive Mint State grades, but for Registry Set assemblers and those who simply desire only the finest available, the choices are incredibly few. Superb Gems are scarce, and the top grade — MS68 — has been achieved by only six pieces at PCGS and NGC combined, with none finer. One of the two PCGS coins is housed in the current highest-rated Registry Set; the other, a plate coin for the CoinFacts webpage, is offered here.

Vivid rainbow-like patination hugs the right and lower obverse margin while the remaining surfaces display occasional whispers of nearly imperceptible ice-blue and violet colors. Both sides are awash with stunning luster and exhibit well-struck design features. This is a remarkably well-preserved representative that will appeal on grounds of beauty and rarity even to collectors not normally in pursuit of the Washington quarter series. Population: 2 in 68, 0 finer (1/18). NGC ID# 245B, PCGS# 5827

PROOF WASHINGTON QUARTERS

1936 Washington Quarter, PR67 Tied for the Finest at PCGS

3824 1936 PR67 PCGS. This is the first proof Washington quarter issued in Philadelphia, and an important component of a first year proof type set, or a specialized collection of proof Washington quarters. Dusky gold toning resides on the highly mirrored and fully brilliant proof surfaces of this Superb Gem. Population: 15 in 67, 0 finer (1/18).

From The jwb1040 Collection. NGC ID# 27HN, PCGS# 5975

1958 Quarter, PR69 Deep Cameo Top-Grade Rarity

3825 1958 PR69 Deep Cameo PCGS. Hints of light gold toning enhance the aesthetic desirability of this nearly flawless Superb Gem proof. It is a nearly perfect example that has deeply mirrored fields and frosty, highly lustrous devices. A conditionally rare, top-grade Registry coin. Population: 5 in 69 Deep Cameo, 0 finer (1/18). Ex: Houston Signature (Heritage, 12/2010), lot 3606. From The jwb1040 Collection. NGC ID# 27]4, PCGS# 95990

1973-S Quarter, PR70 Deep Cameo The Ultimate Quality

3826 1973-S PR70 Deep Cameo PCGS. There is little that has to be said about the quality of a perfect PR70 Deep Cameo example. The delicate champagne-toned surfaces are brilliant gray, with deeply mirrored fields, frosty and fully lustrous devices, and unbeatable eye appeal. Population: 11 in 70 Deep Cameo (1/18).

From The jwb1040 Collection. NGC ID# 27JD, PCGS# 96005

EARLY HALF DOLLARS

1794 Flowing Hair Half Dollar, Good 6 O-101, T-7 Variety

3827 1794 O-101, T-7, High R.3, Good 6 PCGS. Tompkins Die State 1/3. The reverse of this well-worn Good 6 example shows 21 berries in the wreath, arranged in a 10x11 pattern, identifying the popular O-101 variety. The date and all lettering remain legible and the major design elements are completely outlined, but the obverse rim is worn flat in places. The lavender-gray surfaces are free from large or distracting abrasions, but some faint planchet adjustment marks are evident on the reverse. Housed in a green label holder. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 Flowing Hair Half Dollar, VG8 O-101a, Advanced Die Stage

3828 1794 O-101a, T-7, High R.3, VG8 PCGS. Tompkins Die State 1/5. The late die state shows the beginnings of bilevel surfaces on the reverse of this smoothly worn 1794 half. The crack through F in OF displays an advanced stage, as does the secondary crack between UNITED and STATES. Still, the devices are well-defined for the VG8 grade, with sharp dentils and rims throughout all but the lowerright obverse quadrant. Remnants of adjustment marks and a few old scrapes angle from the margins to Liberty's central hair strands. Brownish-gray surfaces reveal attractive, faint golden undertones. From The Loma Linda Collection, Part II. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, VG8

3829 1794 O-101a, T-7, High R.3, VG8 NGC. Tompkins Die State 1/4. A generally pleasing, warm-gray example of the O-101a (T-7) variety, with sharpness that suggests a slightly finer grade, but with some small planchet flaws — one between the inner points of stars 12 and 13, and another beneath the eagle's head. A rim bump exists between stars 11 and 12. Some remnant adjustment marks near the ear are well hidden in the hair, and a few light, hair-thin lines reside below the eagle's right wing. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half, VG10 Collectible First-Year Flowing Hair Type

1794 O-101a, T-7, High R.3, VG10 NGC. Tompkins Die State 1/1. All of the diagnostic die cracks are visible on this late die stage O-101a example. While the variety is readily obtainable for first-year Flowing Hair type, no 1794 half dollar is "common," nor are any of the 11 die marriages abundant in higher grades. The average die produced no more than 4,000 pieces — some dies much less — although the O-101 die pair was the most resilient of all. Researches estimate the O-101 and O-101a varieties make up at least 60% of the surviving 1794 half dollar population. This well-struck example shows a few light marks but has a strong date and attractive goldengray toning that deepens slightly at the outer margins. We note a few light pinscratches and an old scrape beneath the left (facing) wing but no other marks of great significance. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Flowing Hair Half Dollar, VG10 Popular O-101a, T-7 Variety

1794 O-101a, T-7, High R.3, VG10 PCGS. Tompkins Die State 1/5. This pleasing VG10 specimen is from the late state of the O-101 dies, with the die crack from the final leaf tip extending to the second S in STATES. The O-101 variety is the most available of the 11 1794 half dollar varieties, with a surviving population of 200-300 pieces in all grades. Considered by itself, the late die state O-101a is probably an R.4 issue. This evenly worn VG10 specimen exhibits well-formed lettering and date, with some interior detail intact on the central design elements. Pleasing shades of lavendergray and golden-brown toning blanket the lightly abraded surfaces. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Flowing Hair Half, Fine Details

3832 1794 O-101a, T-7, High R.3 — Reverse Scratched — NCS. Fine Details. Tompkins Die State 1/5. Numerous old pinscratches criss cross the reverse, softened by wear and long toned-over, now visible with aid of a loupe. Iridescent shades linger beneath gunmetal-gray patina. Both sides are well-defined (the reverse is especially sharp for the Fine level) and the date is reasonably strong.

1794 Flowing Hair Half Dollar, Fine 15 O-101a, Problem-Free, Choice Surfaces

1794 O-101a, T-7, High R.3, Fine 15 NGC. Tompkins Die State 1/4. The Steve Tompkins reference adds clarity to intermediate die stages for Flowing Hair and Draped Bust halves. This coin is shown as O-101a on the NGC holder, although it is not quite the late die stage for the die marriage. Sharply struck and well-preserved for the Choice Fine grade level, it displays attractive bluish-gray toning and exceptionally smooth surfaces for a 1794 half with 45 points of wear. Marks are faint an unobtrusive, while the rims, dentils, and date are strong. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Flowing Hair Half, Fine 15 Problem-Free, Choice Surfaces

1794 O-101a, T-7, High R.3, Fine 15 NGC. Tompkins Die State 1/5. Even lilac-gray toning envelops both sides of this smooth, well-circulated 1794 half, with Choice surfaces that are remarkably free of marks and abrasions and entirely without adjustment marks on either side. The devices are fully outlined but not sharply defined, a function of the late die stage where the reverse die shows signs of sinking. The date is full, and the rims are mostly bold for the grade except at the lower-right obverse. A golden glow from deep beneath the patina adds to the considerable eye appeal. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, VF Details Richly Toned, Strong Date

3835 1794 O-101a, T-7, High R.3 — Reverse Planchet Flaw, Improperly Cleaned — NCS. VF Details. Tompkins Die State 1/5. Slate-gray toning deepens to charcoal-gray at the borders of this richly toned first-year half. Evidence of an old cleaning is circumstantial, while the holder indicates a planchet flaw on the reverse that is a small, minor void beneath the right (facing) wing. Some brief adjustment marks are widely spaced near the lower-right obverse rim, but they do not enter the date area, which is boldly struck. This is a nicely collectible example of the O-101a latest die stage, with beginnings of biplanar levels at the diagnostic reverse die cracks.

1794 O-101a Half Dollar, VF20 Strong Definition for the Grade

3836 1794 O-101a, T-7, High R.3, VF20 NGC. Tompkins Die State 1//5. The late die stage, where a blurry die crack crosses the topright single leaf and continues on to the last S in STATES. Earlier die cracks include the long-standing crack from the right edge through Fin OF, which precedes all other die cracks that define the reverse die. The obverse die for O-101a is, as always, perfect.

This example is exceptionally well-detailed for the VF20 level. A halo of bluish-gray toning at the margins suggests storage in a coin board or album for many years. Steel-blue accents on the portrait and eagle add to the overall eye appeal. As expected, myriad small marks exist on both sides — most are microscopic, visible only with a loupe. A few faint adjustment marks remain across the eagle's right wing. About 60% of the wing feathers remain sharp. Liberty's Flowing Hair strands suggest an even finer grade. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, VF20 Ideal for the Grade, CAC Endorsed

3837 1794 O-101a, T-7, High R.3, VF20 PCGS. CAC. Tompkins Die State 1/5. The O-101a die cracks are all present, although sinking of the reverse die is not as pronounced as on some late die stage coins. On many examples, heavy wear occurs at the middle of the reverse and at the lower-right obverse. Here, only slight loss of definition is visible along the lower obverse border and dentils. The date remains sharp, as do the central motifs.

This is an ideal 1794 for the assigned grade, free of adjustment marks or any Mint-related imperfections of note, and equally clear of the expected signs of circulation other than smooth, honest wear. Lovely, original lavender-gray toning deepens slightly at the borders, while the raised elements lighten to golden-tan. Bits of mint glow remain in protected places. CAC endorsement confirms the quality of this picture-perfect O-101a specimen, which easily exceeds most other representatives at the midgrade level. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Flowing Hair Half Dollar, XF40 O-101a, T-7, Colorfully Toned In-Demand First-Year Issue

3838 1794 O-101a, T-7, High R.3, XF40 NGC. Tompkins Die State 1/5. Iridescent rainbow shades form concentric rings of colorful toning and add great eye appeal to this attractive O-101a half. The sulfites in cardboard coin boards, albums, or kraft envelopes are often credited for inducing an array of toning from long term storage in old collections. This piece has the look of such preservation. Vibrant gold shades at the margins retain considerable mint luster. Blue accents cede to lilac-gray interiors.

Most of the eagle's wing feathers are present, with light wear at the breast, shoulders and wingtips. The wreath and reverse legend are sharp. Liberty's hair strands show sharp detail except at the crown of the head. The date, stars, and LIBERTY are well-formed and have little wear, while the rims and dentils are sharp throughout both sides. Remnants of faint adjustment marks remain on the central and upper-right obverse, and we note a shallow mark in the field beneath Liberty's chin. Seldom does any 1794 half approach either the numeric grade or visual allure of this remarkable coin. Census: 13 in 40, 29 finer (1/18). NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Flowing Hair Half Dollar, Fine 12 Scarce O-103, Seldom Seen Finer

1794 O-103, T-10, High R.5, Fine 12 NGC. Tompkins Die State 1/1. Splashes of ocean-blue toning enrich silver-gray toning of this pleasing O-103 example. This 1794 die marriage is seldom seen finer, with VF coins making up the entire Condition Census for the variety except for a single AU58 coin, which is the finest-known O-103. The present coin retains sharp definition for the Fine 12 grade, and shows scattered tiny marks but no serious abrasions. There are no perceptible adjustment marks on the smoothly worn surfaces. NGC ID# 24E6, PCGS# 39203 Base PCGS# 6051

1794 Flowing Hair Half Dollar, VF Detail Rare O-103, T-10 Die Marriage

3840 1794 O-103, T-10, High R.5 — Cleaned — PCGS Genuine. VF Detail. Tompkins Die Stage 1/1. According to Steve Tompkins, only one example of this rare die variety is known above VF condition (an AU58 coin). If not for the cleaning, this piece would certainly quality for the Condition Census. Overton-103 is attributed by star 1 piercing the left part of the lowest curl and the leaf tip pointing to the center of the I in AMERICA. Olive tones frame silvery centers on this important first-year half dollar. The noted impairment is minimally distracting, and detail is good. There is one small dig between the chin and star 10.

From The Property of a Lady.

1794 Flowing Hair Half Dollar, VG8 Very Scarce O-104 Variety

3841 1794 O-104, T-11, R.5, VG8 NGC. Tompkins Die State 1/3. The 1794 Flowing Hair half dollar claims a mintage of 23,464 pieces, with 11 die varieties known for the date. This evenly worn VG8 example represents a middle state of the O-104 dies, with a large rim cud over ER in AMERICA, but before the obverse die break from star 11 through Liberty's chin. The O-104 is a scarcer variety in the series and no examples are known in Mint State. The glossy blue-steel and golden-brown surfaces are lightly abraded and the date and all lettering remain bold. Some interior detail remains intact on the central design elements. NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

1794 O-104 Half, Fine 12 **Pleasingly Toned Surfaces**

3842 1794 O-104, T-11, R.5, Fine 12 ANACS. Tompkins Die State 1/1. Rich, colorful toning includes shades of cobalt-blue, russetbrown, and gold with silver-gray patina on the smoothly worn, raised devices. This is a sharply defined 1794 in the date area and throughout the obverse for the assigned grade. The reverse shows sharp definition as well, although we note a pair of minor rim raises and some latent adjustment marks. Nice eye appeal remains. NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

1794 Flowing Hair Half Dollar, Fine 12 Better O-104 Variety, Middle Die Stage

3843 1794 O-104, T-11, R.5, Fine 12 PCGS. Tompkins Die State 1/3. A full cud exists at the border above E and R of AMERICA to confirm the late stage of the reverse die, partially satisfying the Overton diagnostic for O-104a. The heavy die break across the obverse has yet to form, so technically this is still an O-104 coin despite the O-104a designation on the previous generation PCGS holder. Attractive olive-gray patina gains intensity at the margins. The date is sharp, as are the other devices on both sides. Some minimal adjustment marks remain among the lower-right stars. From The Merrill Collection. NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

1794 Half Dollar, Good 6 O-105, T-3, Lavender-Gray Patina

3844 1794 O-105, T-3, R.5, Good 6 PCGS. Tompkins Die Stage 1/1. Overton-105 is encountered with the second-highest degree of frequency after Overton-101. This is a heavily circulated half dollar from the famous first year of issue. Deep lavender-gray patina covers each side uniformly. Device outlines and the date are clear on the obverse. Detail is typically soft on the reverse with little evidence of the eagle remaining. Wispy lines seen throughout. NGC ID# 24E6, PCGS# 39206 Base PCGS# 6051

1794 Flowing Hair Half Dollar Elusive First-Year Issue, O-106

3845 1794 O-106, T-4, Low R.6, PCGS Genuine. Tompkins Die State 1/1. In our opinion, this coin has the details of a Fine specimen that has been repaired and scratched. The lavender-gray surfaces of this scarce first-year issue are lightly abraded, aside from a long, diagonal scratch through Liberty's head. Some roughness in the same area indicates the surface has been repaired at some time. The date and all lettering remain legible and some interior detail remains intact on the central design elements. From The Merrill Collection.

1794 Half Dollar, VG8 O-106, Attractive Old-Silver Toning

PCGS# 39208 Base PCGS# 6051

3846 1794 O-106, T-4, Low R.6, VG8 PCGS. Tompkins Die State 1/2. A faint crack through the middle of F in OF is the earliest appearance of this diagnostic crack, which plays an important role not just for the O-106 (T-4) variety, but also for O-107 (T-5), O-108 (T-6), and O-101 (T-7), which all share the same reverse. The current example shows no evidence of a major die crack that bisects the upper obverse in its terminal die state. Attractive golden-gray toning deepens to bluish-gray at the margins. The smoothly worn surfaces show no major abrasions or adjustment marks. The date is clear although the four lacks definition at its bottom serif. From The Loma Linda Collection, Part II. NGC ID# 24E6,

1794 Half, Scarce and Original VG8 O-106, Early Die State

S. H. & H. CHAPMAN, NUMISMATISTS, PINE STREET, PHILADELPHIA Half Dollar

3847 1794 O-106, T-4, Low R.6, VG8 PCGS. Tompkins Die State 1/1. This wonderfully original 1794 half comes out of the April, 1903 George Eavenson, Esq. And Others sale by S.H. & H. Chapman, where it realized \$3. There, it was described as "Fair. Rare." To that brief description, we can add that this example is the early die stage of O-106, without any die cracks visible on either side of the coin. Rich, warm-gray patina lightens to cream-gray on the central high points. A tiny planchet void near B of LIBERTY pedigrees the piece, while a few light lines and tiny marks are visible with magnification over the smoothly worn surfaces. All of motifs remain well-outlined with grade-consistent wear. The original kraft envelope from the auction accompanies the coin, itself a great collector's item. Ex: George Eavenson, Esq. And Others (S.H. & H. Chapman,

4/1903), lot 536.

From The Merrill Collection. NGC ID# 24E6, PCGS# 39208 Base PCGS# 6051

1794 Flowing Hair Half Dollar, VF Details Elusive O-106, T-4 Die Marriage

3848 1794 O-106, T-4, Low R.6 — Improperly Cleaned — NCS. VF Details. Tompkins Die State 1/1. Evidence of a light cleaning is hidden beneath a covering of golden-gray toning that subtly deepens at the borders. A small rim ding near 9 o'clock on the obverse joins some weakness at the lower-left reverse rim, with fine granularity throughout the fields. The devices show solid VF definition. O-106 (T-4) is a considerably better variety, listed at Low R.6 but perhaps not quite that scarce overall.

1794 Flowing Hair Half, Well-Preserved XF45 O-106, Solid Condition Census Coin

3849 1794 O-106, T-4, Low R.6, XF45 NGC. Tompkins Die State 1/1. Every 1794 variety is scarce-to-rare in higher grades, and all die marriages except O-101 and O-101a are at least very scarce at the VF level and finer. Choice XF coins are seldom seen regardless of variety. This XF45 example is solidly within the Condition Census for the O-106 die pair, struck from an early state of the dies without the bisecting die crack that brought a premature end to the obverse die.

Glints of mint luster remain in sheltered areas throughout both sides of this sharply struck coin. Iridescent hues occupy areas not dominated by blue and reddish-gold shades. Liberty's hair strands are sharply defined, while the stars and date are well-defined. The reverse shows a few faint adjustment marks that do little to disturb the bold eagle and wreath motifs. The Tompkins Condition Census of 58,55,53,50,40,40,40 must make room for the present coin, which challenges an even finer grade. NGC ID# 24E6, PCGS# 39208 Base PCGS# 6051

1794 Flowing Hair Half, Good 4 O-110 Die Marriage, Exceedingly Rare Variety

3850 1794 O-110, T-9, R.7, Good 4 PCGS. Tompkins Die State 1/3. Cherrypicked from E-bay several years ago, this smoothly worn and originally toned Overton-110 example ranks among the scarcest Flowing Hair varieties from either 1794 or 1795. The reverse die failed early-on, doomed by a bisecting die crack from above D in UNITED to the edge near the first A in AMERICA. This example dramatically shows the bi-level effect of the die break, with the coin's upper reverse well-defined, while the lower two-thirds of the coin displays extensive, premature wear. On the obverse, the date is clear while LIBERTY fades to be nearly invisible, as well as about half of the right-side stars.

The variety was identified by Jules Reiver in March, 1982. We believe 10 pieces are known, although all but two of the coins are in Fine or lower grades. At least three of the pieces are impaired. The present coin is tied at the low end of the Condition Census for the variety (1/18). We expect spirited bidding when this problem-free R.7 1794 is called.

From The Merrill Collection. NGC ID# 24E6, PCGS# 39212 Base PCGS# 6051

1795 O-101, T-28 Half Dollar, Fine Details Ninth Known Example

3851 1795 2 Leaves, O-101, T-28, R.7 — Edge Damage — PCGS Genuine. Fine Details. There are only nine examples of the 1795 O-101 half dollar known, and this example was the ninth piece to be discovered. This example has a thin scratch at the upper left obverse that provides positive identification. It has also been cleaned with slight edge damage. The surfaces are light to medium gray, and the overall appearance is pleasing. This is an extremely important opportunity for the advanced specialist to obtain one of the rarities in the pre-Turban half dollar series.

Ex: Harry Laibstain Rare Coins. From our Chicago Signature Sale (8/2011), lot 3905.

From The Merrill Collection.

1795 Flowing Hair Half, AU53 O-110, Ideal for High-Grade Type

3852 1795 2 Leaves, O-110, T-21, R.3, AU53 PCGS. Tompkins Die State 2/1. Any About Uncirculated Flowing Hair half is enormously popular, as it fully represents the first silver design of the U.S. Mint. Struck for just two years, mintages were low in 1794 but (fortunately for collectors) more generous in 1795. Examples went into circulation and remained there for decades.

Few who encountered the new Federal type had the foresight or means to set aside high grade examples, which means most survivors are VG to VF. The present silver-gray piece is noteworthy for its ample shimmering luster and bold hair definition. Impressively understurbed by abrasions apart from a hair-thin mark near the TAT in STATES. Struck from prominently clashed dies, as usually seen with the O-110 variety, which ranks as the most-available of all the Flowing Hair die marriages.

Ex: Long Beach Signature (Heritage, 9/2008), lot 2015, which realized \$17.825.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39228 Base PCGS# 6052

1795 Half Dollar, VF25 Two Leaves, O-117a, T-3

3853 1795 2 Leaves, O-117a, T-3, R.4, VF25 PCGS. Tompkins Die Stage 4/2. This scarce late die state shows cracks along the top of 795, from the point of the bust to the rim, and from that crack to star 15. The obverse, unique to this pairing, has a diagnostic die line down the right side of the Y in LIBERTY, possibly the remnant of a previously punched letter. Clash marks appear above Liberty's head and below the chin. Each side is smooth with gunmetal-gray patina and areas of remaining brightness within the recesses. Worn motifs are still largely well-defined. The finer points of the curls and feathers are largely indistinct.

From The Bayside Collection. NGC ID# 24E7, PCGS# 39234 Base PCGS# 6052

1795 O-121 Half, AU55 Y Punched Over a Star Ex: Buddy Ebsen Collection

3854 1795 2 Leaves, Y Over Star, O-121, T-2, High R.4, AU55 PCGS. Tompkins Die State 2/1. A somewhat scarce and always interesting 1795 variety, with the Y in LIBERTY punched over an extra star — one of the classic engraver errors of the Flowing Hair type. This Choice About Uncirculated example makes its first appearance in more than 30 years, last offered in Superior's 1987 Buddy Ebsen Collection sale. Struck from a fairly early die stage, the obverse shows heavy die clashing from the eagle's wing at Liberty's chin and neck. Three points of an errant star are visible beneath Y.

Traces of mint luster remain beneath attractive, slate-gray toning on the obverse. The reverse shows colorful iridescence at the margins around lustrous, lilac-gray central elements. The strike is impressively sharp on the eagle, where virtually all of the eagle's feathers are defined including much of the breast and leg plumage. Razor-sharp hair detail balances a touch of rub on the neck truncation and slight weakness at the dentils above stars 8 and 9. A few light adjustment marks at the borders and across Liberty's hair require a lens for viewing.

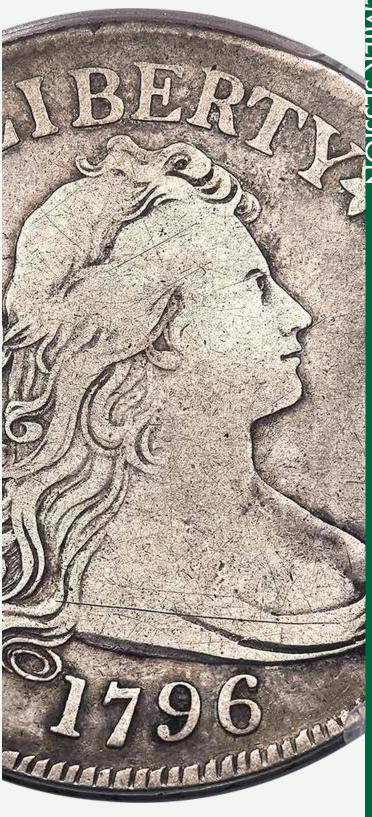

Ex: Buddy Ebsen Collection (Superior, 6/1987), lot 1320. Auction ticket accompanies the coin.

From The Loma Linda Collection, Part II. NGC ID# 24E7, PCGS# 39256 Base PCGS# 6052

1795 Two Leaves Half Dollar, VF25 O-130, T-8, Berries 7x10

3855 1795 2 Leaves, O-130, T-8, Low R.5, VF25 PCGS. Tompkins Die Stage 3/3. The obverse is lightly clashed, and a die crack passes through OF. This rare Overton variety is easily identified by the arrangement of the reverse berries seven left by 10 right — a trait unique to this pairing. Richly toned, original surfaces are smooth with gunmetal-gray patina. Adjustment marks appear throughout the reverse. A trio of pinscratches occur within the left obverse field. Perfect for the die variety specialist. NGC ID# 24E7, PCGS# 39242 Base PCGS# 6052

1796 Draped Bust Half Dollar, Fine 15 Sought-After 15 Stars, O-101 Variety Ex: George Walton

3856 1796 15 Stars, O-101, T-1, R.5, Fine 15 PCGS. Amato 155. Tompkins Die State 2/1. The 1796 and 1797 Draped Bust half dollars are two of the most sought-after issues in American numismatics, due to their overall rarity and their status as a short-lived, two-year design type. All the coins were actually delivered in calendar year 1797, with a combined reported mintage of just 3,918 pieces. Experts believe the combined surviving population of both dates numbers no more than 300 specimens today. The two dates appear with about equal frequency in today's market. Using delivery warrants combined with the frequency of appearances, Steve Tompkins theorizes the 1796-dated half dollars accounted for about 1,934 pieces of the reported mintage.

Two die varieties of 1796 half dollars are known to numismatists today, easily distinguished by the number of stars on the obverse. This coin represents the O-101 variety, with 15 obverse stars arranged in an 8 x 7 pattern around the bust. The O-101 obverse was probably completed before June 1, 1796, when Tennessee joined the Union as the 16th state, but delivery warrants confirm no half dollars were struck until February of 1797. Observant numismatists noticed the difference in star count at an early date, and catalogers began differentiating between the two varieties as early as the J.N.T. Levick Sale (Edward Cogan, 12/1859), when Cogan cataloged a 16-star O-102 example in lot 37.

The present coin traces its history back to the fabulous collection of George Walton, of Charlotte, North Carolina. Walton was a prolific collector during the middle part of the 20th century, best known for his 1913 Liberty nickel, which vanished after his death in a car wreck in 1963 for more than four decades. His 1796 O-101 half dollar was offered as lot 1665 of the George O. Walton Collection (Stack's, 6/1963):

"1796 Draped Bust, 15 stars on obverse. Reverse: Small perched eagle, 1/2 below. This is the only silver coin with a fraction for a denomination. A strong Fine bordering on Very Fine. Perfectly centered, well struck, no nicks or scratches. Worth in excess of \$3,000.00."

The fractional denomination on the 1796 and 1797 half dollars has puzzled numismatists ever since it was noticed. As the Stack's cataloger noted, no other silver coin in the U.S. series expresses the denomination this way. Steve Tompkins believes Mint personnel added the denomination on the reverse because of the introduction of the quarter denomination in 1796. They were apparently hoping to avoid the kind of confusion that occurred many years latter between the similarly sized and designed 20 cent piece and the quarter. Since contemporary copper half cents used a fractional denomination, they simply borrowed the symbol for the half dollar.

As the Stack's cataloger noted in 1963, this coin is a strong Fine 15 example, lightly worn and lightly abraded for the grade. The pleasing dove-gray surfaces show shadows of amber toning around some of the devices, with a few hints of lavender at the peripheries. The design elements were strongly impressed and the usually seen obverse die crack from the rim at 5 o'clock to the bust is in an early state. A few tiny rim bruises on the reverse, two above the serifs of T in UNITED and one above the E, serve as pedigree markers for this coin. This piece is serial number 155 in Jon Amato's reference on 1796 and 1797 half dollars.

Ex: George O. Walton Collection (Stack's, 6/1963), lot 1665. **From The Property of a Lady.** NGC ID# 24E9, PCGS# 39261 Base PCGS# 6057

1796 15 Stars Half Dollar, O-101,VF30 Attractive Late Die State Example

3857 1796 15 Stars, O-101, T-1, R.5, VF30 PCGS. Amato-134. Tompkins Die State 5/3. Just four varieties make up the entire output of Draped Bust Small Eagle half dollars, struck during a two-year period from 1796 to 1797. The subset presents a formidable challenge for variety collectors, who must compete with type collectors for the few available coins. Half dollars with the Small Eagle reverse coupled with Robert Scot's Draped Bust obverse are dated either 1796 or 1797. Most likely, all of the coins were struck in 1797, with the exact mintage of 1796 vs. 1797 coins an enigma

that puzzles researchers even today.

The 1796-dated varieties are easily identified. O-101 (T-1) has 15 obverse stars, while the 1796 O-102 (T-2) displays 16 stars. The two 1797 varieties share a common 15-Star obverse — a different die than the 1796 15-Star obverse — distinguished one from the other by the reverse die. The reported mintage for both years combined is 3,918 pieces, of which we believe fewer than 300 total coins are extant today.

The present VF30 1796 15 Stars piece is sure to please the early half dollar date/variety specialist, as well as the collector seeking to complete a design-type collection of U.S. coinage. The coin shows sharp definition for the grade. The obverse displays crisp details despite a late die stage. Liberty's hair strands in are sharp, as is the dentilation on both sides, the sole exception being that on the upper obverse. Particularly noteworthy is the clarity in most of the diagnostic semi-circular crack above Liberty's shoulder; this fine crack is usually visible only on higher-end VF and better examples. The reverse is bold as well. Strong definition exists on about 50% of the eagle's wing plumage, along with that on the tail.

Soft champagne-gold patina accented with whispers of sky-blue and lavender covers both sides, and traces of luster are visible in some of the motif interstices, especially those of Liberty's hair and the eagle's feathers. The surfaces are relatively clean for a coin having seen light to moderate circulation. A couple of inoffensive obverse pinscratches are only mentioned for complete accuracy, and two minute marks near the rim above star 7, one between 9 and 6 in the date, and another to the top right of the 2 in the fraction may help in identifying the coin for future catalogers and researchers.

From The Merrill Collection. NGC ID# 24E9, PCGS# 39261 Base PCGS# 6057

1797 Draped Bust Half Dollar, Fine Details Rare Early Type Issue, O-101

3858 1797 O-101, T-1, R.5, Amato-330 — Obverse Graffiti, Cleaned — NGC Details. Fine. This earlier die state shows three of the die cracks on Reverse A that later develop into O-101a. Two of the three are only vaguely discernible with strong magnification, the third is readily visible. The first is extremely faint, connecting the tops of ES in STATES with the top of the O in OF. The other is seen at the top of the first T in STATES and travels only faintly to the eagle's neck. The third is better developed and located at the upper right of the O in OF. Several pedigree identifiers are listed on page 216 of the Amato reference, the most obvious being the graffiti in the left field in the form of a vertical scratch between stars 4 and 6, and a backward S in the lower-right obverse field. The surfaces are light overall with slightly darker peripheries. Detailing is stronger on the devices on the left part of each side, weaker on the right, indicating the dies were misaligned at the time of striking.

Ex: Stanley Simon Collection (Stack's, 1/1989), lot 1004, where it brought \$15,400. NGC ID# 24EC, PCGS# 39264 Base PCGS# 6060

1797 Half Dollar, Fine 15 Important O-102 Variety

Tompkins Die State 1/1. It is cause for excitement when any midgrade, problem-free Draped Bust Small Eagle half dollar crosses the auction block. Many coins of this two-year design type (1796-1797) are in low grade and/or plagued with problems, such as deep scratches, harsh cleaning, corrosion, tooling, repairs, or the like. At the other end of the spectrum, the price tags for Mint State, About Uncirculated, or even Extremely Fine examples put them out of reach for most collectors.

It is especially an event of great importance when a Choice Overton 102 variety makes an appearance. By far, the O-102 1797-dated half is the rarest of the four 1796-1797 die marriages, and it is a stopper for many who attempt to collect all four Small Eagle half dollar varieties.

The laurel leaf extending beneath the base of the second T in STATES and the palm leaf terminating at the lower left serif of F in OF confirm the variety. The present Fine 15 offering displays a delicate blend of lilac and light golden-gray patina that covers both sides. The design elements show strong detail for the grade designation — particularly on the obverse, where many of Liberty's hair strands remain. Indeed, the obverse might lay claim to VF definition. On the reverse, about one-third of the feather detail is visible. There are faint adjustment marks at the right obverse border between the stars and the rim, and a scattering of light marks over each side is consistent with a coin having seen moderate circulation. An inoffensive pinscratch running from the eagle's neck to the right (facing) leg is mentioned solely for pedigree purposes, as is one from the leg to the upper part of the palm leaf. Ex: Stack's (May, 1973); Gary L. Burhop and Mel W. Davis Collections and other important properties (Bowers and Merena, 10/1996), lot 2011; Glenwood Collection (Heritage, 6/2008), lot 962, which realized \$54,625.

From The Merrill Collection. NGC ID# 24EC, PCGS# 39266 Base PCGS# 6060

1801 O-101, T-2 Half Dollar, XF40 Scarce First-Year Heraldic Eagle Issue

3860 1801 O-101, T-2, R.3, XF40 PCGS. Tompkins Die State 1/3. Speckled umber-gray toning shows glints of lilac-silver across the well-defined surfaces of this attractively toned O-101 half. The left-side stars are slightly less-sharp than those on the right. As the first year of the Heraldic Eagle reverse, large areas of die rust are visible on all O-101 coins, and may indicate that the die was actually made in 1796 to 1799, but unused until pressed into service after the O-102 reverse die failed. Scarce as a date and always in demand, just 30,289 pieces were struck of both 1801 varieties combined. Population (both varieties): 21 in 40, 37 finer (1/18).

From The Merrill Collection. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

1802 O-101, T-1 Half Dollar, VF35 Early Semikey Date

3861 1802 O-101, T-1, R.3, VF35 PCGS. Tompkins Die State 1/1. While a later reverse die state exists, it is very rare. Nearly all known 1802 halves lack the late-stage die crack at ED of UNITED to the adjacent wing. This Choice VF coin shows the usual die state, with only a small crack at the upper-right serif of the first S in STATES. Bluish-gray toning with cream-gray high points covers both sides of the coin. A sharp strike exists beneath grade-consistent wear, accompanied by numerous small marks and light lines well-hidden by the toning. Population: 29 in 35, 62 finer (1/18). NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

1802 O-101 Draped Bust Half Dollar, AU53 Challenging Low-Mintage Issue Ex: Garrett-Pryor

3862 1802 O-101, T-1, R.3, AU53 PCGS. Ex: Pryor. Only 29,890 Draped Bust half dollars were minted in 1802, and the date is the most difficult to locate of all the Heraldic Eagle half dollars, especially in high grades. Only one die variety is known for the issue.

The present coin has an illustrious history, linked to three great collections of past years. This example surfaced in the collection of John Colvin Randall, the great 19th century student of die varieties. W. Elliot Woodward sold the collection in 1885. The description in his auction catalog reads, "1802 Uncirculated; brilliant. The finest I have met with; extremely rare. Plate." The lot was sold to T. Harrison Garrett, a director of the B & O Railroad, of *Monopoly* fame, and the architect of the famous Garrett Collection. The coin later found a place in the James Bennett Pryor Collection, a specialized gathering of half dollars known for the quality and completeness of the collection.

The coin offered here is an attractively toned high-grade example, with a sharp strike and minimally abraded surfaces. The surfaces are a pleasing greenish-gray, with touches of rose and blue in areas. Population: 10 in 53, 11 finer (1/18).

Ex: John Colvin Randall Collection (Woodward, 6/1885), lot 221; T. Harrison Garrett; John Work Garrett; Johns Hopkins University; Garrett Collection (Bowers and Ruddy, 11/1979), lot 278; James Bennett Pryor Collection (Bowers and Merena, 1/1996), lot 5; ANA Signature (Heritage, 8/2010), lot 3139; Pre-Long Beach Auction (Goldberg Auctioneers, 1/2011), lot 1416.

1805/4 O-102 Half Dollar, AU50 Sharply Struck Overdate Variety

3863 1805/4 O-102, T-5, R.3, AU50 PCGS. Tompkins Die State 1/3. Overton-102 is a slightly scarcer overdate die pair among the 1805 varieties. This attractive AU coin displays subtle mint luster beneath the rich violet, green-gold, and coffee toning that drapes each side. A sharp strike remains even though the variety comes a bit soft at the star centers and at the lower shield. Liberty's hair definition is strong, as are the breast feathers above the shield. Marks are limited to a few tiny abrasions on the neck, with a naked-eye overdate and smooth fields that are sure to make early half dollar collectors take notice.

Ex: FUN Signature (Heritage, 1/2010), lot 3419.

From The Merrill Collection. NGC ID# 24EH, PCGS# 39292 Base PCGS# 6070 1805 O-106 Half Dollar, AU55 Beautifully Toned and Lustrous A Condition Census Example

1805 O-106, T-13, High R.3, AU55 PCGS. CAC. Tompkins Die State 2/1. The 5 is close to the bust on Overton-106. Likely tied for third finest, this CAC-endorsed coin is a previously undocumented example in this grade. Steve Herrman and Steve Tompkins each list two MS62s and two AU55s in the Condition Census, not including the present coin. This piece shows beautiful multicolor border toning around original champagne-gray interiors. Luster remains in the fields, and light wear over the design elements fails to remove sharpness from the central devices. Weakness of strike on the border stars is normal for the issue. An eye-appealing and high-end example of this Draped Bust issue. From The Property of a Lady. NGC ID# 24EG, PCGS# 39279 Base PCGS# 6069

1806 Draped Bust Half Dollar, Fine 12 Knob 6, No Stem, O-108 Seven Examples Known

3865 1806 Knob 6, No Stem, O-108, T-2, R.7, Fine 12 PCGS. The 1806 Knob 6, No Stem O-108 half dollar is one of the greatest rarities in the Draped Bust series. Examples have been avidly sought after by series specialists for decades. The variety was discovered by Walter Breen when he studied the coin in the Philip Straus Collection in 1951. Breen observed the O-108 was an easily attributed "naked eye type" and noted it was "comparable in importance to the 1817/4 overdate." Only seven examples have been identified (see roster below), with six pieces certified by PCGS (1/18). The present coin was the last specimen to be discovered, as Steve Tompkins notes it was held in a single Pennsylvania Collection for 60 years before Rich Urich acquired it in 2013. Heritage Auctions is privileged to offer this important early rarity in its first auction appearance.

The coin offered here is an impressive Fine 12 specimen, with pleasing dove-gray and blue-steel surfaces that show only minor abrasions and minimal wear for the grade. Like all examples seen, the strike is somewhat soft in areas like Liberty's chest and some stars on the obverse. Likewise, clouds six and seven show the typical softness seen on all examples and dentilation is weak on the right reverse rim. Liberty's hair ends are all discernible and some interior detail remains intact in her hair. The overall presentation is quite attractive for this landmark early rarity.

Roster of 1806 O-108 Half Dollars

This roster was expanded from Steve Tompkins listing in Early United States Half Dollars 1794-1807.

1. XF40 PCGS. Found in El Paso, Texas in 1979; sold privately in 2002; ANA Auction (Bowers and Merena, 7/2003), lot 1395; Orlando Sale (Stack's, 1/2009), lot 416, realized \$126,500; Larry Hanks; Pogue Collection; D. Brent Pogue Collection (Stack's Bowers, 5/2015), lot 4858, realized \$105,750.

2. VF35 PCGS. Brian Greer in January of 1995; Sheridan Downey; Dr. Gerald Schertz (1995-1998); Mail Bid Sale #22 (Sheridan Downey, 10/1998), lot 267; Downey FPL (7/1999).

3. VF Details — Cleaned — PCGS Genuine. Charles R. Ross in 1965; Paul Munson (1966-1989); Jascha Heifetz Collection (Superior, 10/1989), lot 462; Larry Briggs; private collection; FUN Signature (Heritage, 1/2018), lot 4858.

4. Fine 15 PCGS. Philip Straus before 1951-1959; Metropolitan New York Convention Sale (Stack's, 5/1959), lot 1866; private collection (1959-1970); Public Auction Sale (New Netherlands, 6/1970), lot 369; Al Overton (1970-1972); Donald Parsley (1972-1993); Mail Bid Sale #9 (Downey, 7/1993), lot 97; Overton Collection. The discovery coin.

5. Fine 12 PCGS. Pennsylvania collection for the previous 60 years; Rich Urich in 2013; purchased by the present consignor on 2/5/2013. This coin may be the one examined at a coin show in Pennsylvania in 1984 and seen again in 1997. The present coin.

6. VG10. Harry Bernstein (mid-1970s-1979); Jeff Friedman (1979-1985); Dr. Gerald Schertz (1985-1996); Sheridan Downey (1996); Charles Meyer (1996-2008); Harry Laibstain (2008); unknown intermediaries; Rare Coin Wholesalers (2011); Dr. Charles Link.

7. VG8 PCGS Secure. Discovered in Hawaii in 1976; Donald Frederick (1977-2008); Bayside New York Collection; Baltimore Signature (Heritage, 7/2008), lot 439, as Fine Details NCS; Harry Laibstain; David J. Cinquina; Mail Bid Auction #45 (Downey, 8/2017), lot 50.

From The Merrill Collection. NGC ID# 37BY, PCGS# 39309 Base PCGS# 6072

1806 Pointed 6, No Stem Half, Attractive AU58 O-109a, Scarce in Higher Grades

1806 Pointed 6, No Stem, O-109a, T-15, R.3, AU58 PCGS. Tompkins Die State 6/4. Rich lavender and sea-green toning embraces this partly lustrous Draped Bust type coin. The reverse is refreshingly smooth, and only a few marks are detected with a lens near the profile. O-109 is available, but the late die state (O-109a), with the die-chipped crack from the inner point of obverse star 12, remains scarce, especially in finer grades. Population (all die states combined): 20 in 58 (1 in 58+), 29 finer (1/18).

Ex: 74th Anniversary Sale (Stack's, 11/2009), lot 1359; (Long Beach Signature (Heritage, 9/2006), lot 1868.

From The Merrill Collection. NGC ID# 24EJ, PCGS# 39311 Base PCGS# 6073

1806 O-115, T-17 Half Dollar, AU55 Repunched TY in LIBERTY

3867 1806 Pointed 6, Stem, O-115, T-17, R.1, AU55 NGC. An early die state with a single delicate crack from the base of the date to the outer left star points. This is one of the most plentiful varieties among 1806 half dollars, an ideal candidate for type collections. The obverse is immediately recognized by the repunched TY in LIBERTY, and that obverse also appears on O-114, 116, and 117. Although somewhat weakly defined at the centers as often for the variety, this piece has nearly full satin luster with delicate peripheral gold toning and dark steel toning across the shield. NGC ID# 24EJ, PCGS# 39317 Base PCGS# 6071

1806 O-122 Draped Bust Half, VG10 Scarce Variety, Just Over 20 Pieces Known

3868 1806 Pointed 6, Stem, O-122, T-25, High R.6, VG10 PCGS. Ex: Jules Reiver Collection. Tompkins Die State 2/4. A "circulation cameo" example, with silver-gray high points on the motifs contrasted with deep-gray fields. The surfaces are remarkably clear of abrasions and marks for the VG10 grade. Overton-122 features a strong reverse die crack that runs vertically from the edge tangent to the eagle's tail through the shield. In advanced stages, broad chipping and biplanar levels occur along the crack as shown on the present coin. A circular new crack runs from the arrow fletchings below the base of UNITED to the ribbon end and left wing. Plated in the Stephen Tompkins Pictorial Census with 21 or 22 pieces reported known inn all grades combined (1/18). Ex: Jules Reiver Collection (Heritage, 1/2006), lot 22573; David Kahn

(11/2013)

From The Merrill Collection. PCGS# 39328 Base PCGS# 6071

1806 Bust Half, XF Sharpness O-122, Very Scarce Die Pair

1806 Pointed 6, Stem, O-122, T-25, High R.6 — Cleaning — PCGS Genuine. XF Details. Tompkins Die State 2/4. The obverse seems a bit glossy with dappled blue and reddish-gold toning, but there are no overt hairlines from cleaning and mint luster remains plentiful on both sides of this sharp Overton-122. Liberty's drapery folds are crisp, and only brief high-point wear is seen on the ribbon and on Liberty's hair strands at the temple. Struck from the late die state, with heavy reverse cracks and multiple die clashing throughout both sides. The Tompkins' Pictorial Census ranks this piece as #2 for the variety behind an About Uncirculated example important, because there are no full Mint State representatives known of the rare O-122 (1/18).

From The Merrill Collection.

1806 Pointed 6 Half Dollar, Fine 15 Rare O-127a, Condition Census Example

3870 1806 Pointed 6, Stem, O-127a, T-9, High R.6, Fine 15 PCGS. Tompkins Die State 2/1. The late die state, with a short die crack through the lower points of star 6 into the field near the ribbon. Nearly all, if not all, of the known examples have the die crack at star 6. Current references rank O-127a as R.6 with 19 pieces known, but it is considerably scarcer than that in problem-free condition. This Choice Fine example occupies the low end of the Condition Census, according to Stephen Herrman's listing of coins without impairments. It resides in sixth place according to Steve Tompkins' Pictorial Census, if placed above two VF Details coins (one holed, the other with graffiti on both sides). The coin displays lovely, richgray color with gold accents throughout both sides. A tiny circular planchet flaw on the neck pedigrees this Fine 15 example, with sharply defined motifs that suggest an even finer grade. Ex: Sheridan Downey MBS #34 (8/2009), Lot 5.

From The Merrill Collection. PCGS# 39335 Base PCGS# 6071

1807 Draped Bust Half Dollar Choice AU O-105 Representative

3871 1807 Draped Bust, O-105, T-4, R.1, AU55 NGC. Tompkins Die Stage 3/2. Lumps below the dentils between S and O, and above UN in UNUM are unique to this die marriage — a relatively available one in most grades. The strike is slightly uneven, showing good detail on the stars, lower curls and shield despite softness on the left wing and upper hair strands. A hint of rub has minimal impact on design detail. Antique lavender-gray patina includes accents of gunmetal and gold mainly around the obverse border. From The Bayside Collection. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

1807 O-115 Half Dollar Rarity, VF20 The Overton Plate Coin The Finest of Four Confirmed Examples

3872 1807 Draped Bust, O-115, T-10, High R.7, VF20 PCGS. Tompkins Die State 1/1. Ex: Meyer Collection. This is the finest of just four confirmed examples of the very rare 1807 O-115 half dollar. The first example was located in June 2004, and a few additional pieces have been found since. The others grade Fine 15, Fine 12, and VG8. As a late entry in the Overton numbering sequence, the O-115 variety seems out of place, since O-111 through O-114 are all Capped Bust half dollars.

The obverse is a newly discovered die with the T in LIBERTY slightly higher than the neighboring R, where it is higher above the R than on any other 1807 Draped Bust obverse. The reverse die appears on 1807 O-103 and O-104. There is no evidence of the reverse die crack found in late states of O-103, so the O-104 and O-115 varieties were both struck before O-103.

This wonderful piece is fully original with deep silver-gray and steel patina, showing minor splashes of light-silver color. The surfaces are exceptional for the VF level with only a few insignificant abrasions. We last handled this coin in 2010. Since that time, no new examples have come to light, and the present coin retains its place as the finest known of the rare O-115 Draped Bust die marriage. The Tompkins reference suggests that a fifth example is rumored to exist, and gives that unknown coin the hypothetical grade of Fine 15.

Ex: FUN Signature (Heritage, 1/2010), lot 2542.

From The Merrill Collection. PCGS# 39353 Base PCGS# 6079

BUST HALF DOLLARS

1807 Capped Bust Half, AU58 O-114, Essential Two-Year Type

873 1807 Capped Bust, Large Stars, O-114, R.3, AU58 NGC. Much frosted silver luster remains across the surfaces of this briefly circulated O-114 half, struck from John Reich's first-year Capped Bust Left design. The scalloped outer point of star 13 shows the designer's signature notch. A few deep-gray accents accompany light high-point wear to confirm the assigned grade, although this borderline Uncirculated piece is extremely sharp with few abrasions. Both sides show die clashing, but none of the die cracks that determine a later die state. Census (all Capped Bust varieties): 42 in 58 (1 in 58★), 45 finer (1/18).

From The Sea Cliff Collection. NGC ID# 24EN, PCGS# 39361 Base PCGS# 6088

1812 O-110b Half Dollar, AU53 Single Leaf Die State

3874 1812 Large 8, O-110b, R.6, AU53 PCGS. Single Leaf. Although the O-110 die marriage is common, rated R.1, examples of the latest die state are major rarities with less than 20 known in all grades. The reverse die is cracked through UNITED STATE to the scroll, continuing to the R in AMERICA. That die is also lapped, creating the rare and popular Single Leaf die state. This is one of only a few die states that enjoy a separate listing in the Guide Book.

Stephen Herrman's auction analysis of early half dollar varieties shows that just seven examples have been sold at auction over the last 15 years, and among those, an XF40 is the finest. This piece is far finer with a trace of high-point wear on the ivory and golden toned surfaces, showing iridescent highlights. A remarkable opportunity for the specialist.

Ex: Long Beach Signature (Heritage, 6/2012), lot 3769.

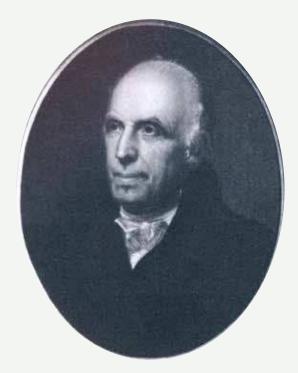

From The Merrill Collection. PCGS# 39459 Base PCGS# 6100

1815/2 Half Dollar, VF35 O-101, Prized Issue

3875 1815/2 O-101, R.2, VF35 PCGS. CAC. The 1815/2 Capped Bust half dollar is a sought-after key date, from a mintage of 47,150 pieces. Only one pair of dies was used to strike the entire mintage, and this specimen displays a series of die cracks and clashmarks on the reverse that are characteristic of the O-101a variety. This example exhibits some wear on the devices, but all important detail remains intact, and the problem-free surfaces are toned in pleasing shades of gray and blue-steel. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

Mint Director Robert Patterson

1815/2 O-101 Half Dollar, AU50 Famous Overdate, Just 47,150 Pieces Struck

3876 1815/2 O-101, R.2, AU50 PCGS. A solitary die pair struck the entire mintage of 47,150 half dollars in 1815, which was all the bullion-starved Mint could manage for the year. The total mintage was delivered on January 10, 1816 — just one day before the Mint burned and no more half dollars were produced until 1817. While survivors of the issue are available in lower grades, attractive coins in About Uncirculated or finer are scarce and always in demand by collectors and specialists, who require the 1815/2 for date and variety sets.

This example is from a middle state of the dies. Multiply clashed on both sides, it was struck before the reverse die cracked through the denomination. Gunmetal-gray toning covers both sides with sea-green and rose undertones. The surfaces are minimally marked aside from the aforementioned die clashing. Light wear is seen over the high points of the well-defined motifs. Housed in a previous generation green label holder. Population: 22 in 50, 68 finer (1/18)

From The Merrill Collection. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

1815/2 Bust Half, Attractive AU58 O-101a, Key Overdate Issue

3877 1815/2 O-101a, R.3, AU58 PCGS. With just 47,150 pieces struck, the 1815/2 is by far the lowest mintage of the Capped Bust, Lettered Edge series. Perhaps as many as 1,000 pieces survive in all grades, although the issue is very scarce in About Uncirculated and finer conditions. Its status as a popular overdate with only a single variety for the year puts it in high demand among date, variety, and type collectors alike.

The 1815 year was one of turmoil for the United States in general and particularly for the Philadelphia Mint. Remaining hostilities and financial chaos from the War of 1812 put silver bullion in short supply. The only available dies were left over from 1812 — just a single obverse and reverse — which the Mint employed for the entire production. Multiple die clashes soon appeared on both sides, and eventually the dies cracked. This near-Mint example shows a late die stage with a heavily cracked reverse. The strike remains sharp beneath attractive grayish-blue margins and still-lustrous, golden-brown central toning. Population: 23 in 58 (2 in 58+), 12 finer (1/18).

From The Merrill Collection. NGC ID# 24F5, PCGS# 39492 Base PCGS# 6108

1817/4 Capped Bust Half Dollar, Good 6 Famous *Guide Book* Rarity, O-102 Eleven Examples Known

3878 1817/4 O-102, High R.7, Good 6 PCGS. Heritage Auctions is pleased to offer the Colorado specimen of the famous 1817/4 Capped Bust half dollar, one of the rarest and most famous of all half dollar varieties, with only 11 examples known. This coin was the ninth example discovered. The discovery of this coin was announced in the December 17, 2007 issue of Coin World, that says a Colorado woman, who requested anonymity, received the coin from the dispersal of her father's coin collection to her and her three siblings 10 years previously. She indicated that she received several silver dollars, as well as many foreign coins he obtained during his military service in World War II. She said she did not know how the 1817/4 Capped Bust half dollar came to be in his possession.

According to Coin World, the woman, who believed the half dollar might be something special, purchased coin reference books over a period of eight years in an attempt to place a value on the coin. After turning down an offer of around \$100 from a local Colorado Springs dealer, she took the half dollar to the headquarters of the American Numismatic Association in Colorado Springs, where she was referred to Independent Coin Grading (ICG) in Englewood, a suburb of Denver, who initially certified the coin as VG8, Scratched. The woman contacted Heritage Auctions and we were privileged to offer this piece in the ANA Signature (Heritage, 7/2008), lot 1680, where it realized \$87,499 to the present consignor. He subsequently got the coin crossed to its current Good 6 PCGS holder. Donald Parsley's 2005 rewrite of Al Overton's United States Early Half Dollar Die Varieties, 1794-1836 indicates that a later die state of this variety (O-102a) has "... a die crack spanning the entire obverse, from edge above upper peak of cap and running downward across cap, lobe of ear, lower curl and just right of 7 to edge." In addition to the current coin, four others are classified as O-102, and six as O-102a (see roster below).

The 1817/4 half dollar was first announced to the numismatic community in the October 1930 issue of The Numismatist, under the "Editorial Comments-Numismatic News" section. The commentary, entitled NEW VARIETY OF HALF DOLLAR OF 1817 REPORTED, says:

"E.T. Wallis, of Los Angeles, Cal., writes that he has recently discovered a heretofore unknown variety of the 1817 half dollar, the last figure of the date being cut over a 4. A number of half dollars of 1817 over '13 are known, but this is the first one over '14 reported, Mr. Wallis says. He also says the coin is practically Uncirculated and the overdate can be seen plainly. The reverse is also an unlisted variety, as both I's in United and America have the lower ceriphs broken off diagonally toward the right, and the I in United also has the left side of the top ceriph broken off. The obverse shows a die break across the coin, starting from the border to the right of the figure 7 and through the ear and between B and E of Liberty to the top of the border. Mr. Wallis thinks the die may have been cracked when the 7 was cut over the 4 and the die may have been broken when the striking began. Howard R. Newcomb, of Los Angeles, and M.L. Beistle, of Shippensburg, Pa., both authorities on the half-dollar series, have examined the coin and pronounced it a hitherto unknown variety."

Why were so few 1817/4 half dollars apparently minted? Part of the reason may stem from Wallis' thought above that the die may have broken when the 7 was cut over the 4, which had been partially effaced by Mint personnel. We might speculate that this effacing weakened the die, causing premature failure after just a few strikings. In this regard, it is interesting to note that the 1817/4's cousin, the 1817/3, did not have the 3 effaced, and was produced with a considerably higher mintage.

Early half dollar specialist Sheridan Downey presents additional information that may help to explain the shorter-than-normal life of the 1817/4 obverse die. In his April 1, 1997 catalog of the Alfred E. Burke 1817/4 specimen, he states:

"I have seen and studied the Dosier, Overton, Burke and Meyer specimens. It is apparent that the obverse die was poorly prepared, either in 1814 or when it was reworked in 1817. Its face was 'sprung' or warped, not flat. When brought down in the screw press it unevenly impressed the planchet. The high portion of the left side of the die, the fields, could not properly smooth the natural roughness of a raw planchet. The adjoining curls, struck from the low areas of the die, are noticeably flat. The absence of pressure on the obverse, of course, led to weakness on the reverse. Thus we see flatness along the right side of the shield, the claws below and the tip of the right wing. Two theories seek to explain the shorter life of the die. First, it was not properly hardened after the annealing process, leading to its early fracture. Second, its irregular shape subjected portions of the die to unusual pressure during the coining process, again leading to early deterioration."

The present coin exhibits considerable wear on the design elements, but the date and all lettering, including LIBERTY, remain legible. The major design elements are complete in outline, except for some blurring of the eagle's tail, and some interior detail remains visible. The remnants of the undertype 4 are visible under the last digit in the date. The surfaces are a pleasing bluish-gray color, with lighter silver-gray on the devices, and show only minor abrasions, outside of a scratch from the edge near the date to Liberty's hair.

Roster of 1817/4 Half Dollars

1. AU53 PCGS. E.T. Wallis-Louis Eliasberg specimen, O-102a. Offered in a Fixed Price List by Wallis, said by Wallis to have been in a family collection since 1846; "rediscovered" in the Pratt Collection by Al Overton (1953), sold to Louis Eliasberg for \$1,500; Eliasberg Collection (Bowers and Merena, 4/1997), lot 1735; purchased out of Eliasberg by Don Kagin and Andrew Lustig for \$209,000; sold ca. June 1997 by Kagin and Lustig to Dr. Juan XII Suros for a reported \$250,000; Juan XII Suros Collection (Superior, 2/1999), lot 180; sold to Jay Parrino and Don Kagin for approximately \$184,000; ANA Auction (Bowers and Merena, 7/2003), lot 14430, unsold; Richmond II Collection (David Lawrence, 11/2004), lot 1388; sold to George "Buddy" Byers for \$333,500; George "Buddy" Byers Collection (Stack's, 10/2006), lot 1031, to John Gervasoni; "Treasures from the S.S. New York" Sale (Stack's, 7/2009), lot 542, where it realized \$356,500. The finest of the eleven known examples.

2. XF Details NGC. George Williams example, O-102a, XF Details, Corroded ANACS, subsequently crossed over to an NGC XF Details, Environmental Damage holder. Reported in Coin World on February 13, 2006, page 10; discovered by George Williams in some fill dirt in upper New York in 2005, dispected in Tarn-X; FUN Signature (Heritage, 1/2006), lot 3184; Central States Signature

(Heritage, 4/2009), lot 2418, where it brought \$109,500; Philadelphia Signature (Heritage, 8/2012), lot 1173, realized \$164,500.

3. VF35 PCGS. Charlton Meyer/D. Brent Pogue specimen, O-102. Purchased from a coin dealer in 1962 by Al Overton; sold to Empire Coin Company; sold privately to Hazen B. Hinman; The Century Sale (Paramount, 5/1965), lot 1112; offered in The Rare Coin Review (Bowers and Ruddy, issues #18-22, 1973-1975); purchased by Gloria Meyer as a gift for her husband, Charlton Meyer; sold to Sheridan Downey and Stu Levine, March 2008; Downey and Levine to the Pogues; D. Brent Pogue Collection (Stack's Bowers, 9/2015), lot 2021, realized \$282,000.

4. VF25 NGC. Floyd Farley specimen, O-102a. Discovered or first reported by Thomas Pfeffer in 1967 or 1968 and sent to Don Taxay for authentication and sale; sold to Stewart Witham in early 1968; sold privately by Witham to Floyd Farley in March

1968, where it remained until 2002; Floyd Farley Collection (Sheridan Downey, 7/2002), lot 8, where it brought \$132,000.

5. VF20 PCGS. Alfred E. Burke example, O-102a. Acquired in 1965 by Burke of Philadelphia from Robert Dando as a "Punctuated Date" (O-103) in 1970 for \$28; recognized by Burke as an 1817/4 in 1973 or 1974 after he bought the 1970 edition of Overton's reference; Sheridan Downey Mail Bid Sale (4/1997), where it brought \$135,000; Oregon Collection of Capped Bust Half Dollars (Downey, 7/2005), lot 100, where it realized \$193,359 to James Ross; crossed over from NGC VF20 to PCGS VF20 at ANA show in August 2009.

6. VF20 PCGS. Stewart Witham example, O-102a. Discovered by Ohio coin dealer Ed Johnson, who owned it in

the 1940s; purchased by Stewart Witham in 1966; offered privately in 1983; ANA Signature (Heritage, 8/2010), lot 3147.

7. VF Details - Tooled PCGS Secure. Newly discovered example, O-102. The most recently discovered example, purchased from a dealer as an example of the O-103 variety; Chicago ANA Auction (Stack's Bowers, 8/2014), lot 13096.

8. Fine 15 PCGS. Leonard Elton Dosier specimen, O-102. Discovered by Milton Silverman in 1976. Silverman did not reveal the existence of this piece until 1985. Sold to Leonard Elton Dosier; sold privately by Elton Dosier to Sheridan Downey in 1988; Mail Bid Sale #22 (Downey, 10/1988), lot 268, to John Crowley for \$90,860; Crowley Selected Rarities Sale (Downey MBS, 8/2001), lot 4, to Jonathan Tidwell for \$116,771; sold privately by Sheridan Downey from the Tidwell Collection (8/2004), for \$135,000; sold privately by Anthony Terranova on December 6, 2004 to Dr. Charles Link for \$155,000.

9. VG8 PCGS. The Louisiana coin, O-102a, discovered and announced in the numismatic press in July of

2012; purchased for \$140,000 on July 3, 2012; currently part of an advanced Capped Bust half dollar collection in Louisiana.

10. Good 6 PCGS. The Colorado coin, O-102. Found by a Colorado woman in a family inheritance in 2007. Reported in December 17, 2007 *Coin World* that an anonymous woman had received the coin from her father's coin collection left to her and her three siblings 10 years before; source unknown. Sold from the Colorado woman in the ANA Signature (Heritage, 7/2008), lot 1680, where it realized \$87,499 to the present consignor; crossed by him from ICG VG8 Obverse Scratch to PCGS Good 6. The scratch extends from the clasp to the left of the date. The coin displays VG detail. The present coin.

11. Good 6, Repaired. Overton example, O-102. Located in 1963 or 1964 by Ed Shapiro; sold to Dan Messer in 1964 or 1965; sold to John Cobb in 1965; sold to Steve Markoff in 1969; Al Overton bought the coin in 1969 and had a gouge on the reverse repaired (smoothed out); inherited by Donald and Bonnie Parsley (Al's daughter) in 1972; sold with the Al Overton Collection by Sheridan Downey in July 1993 to the current owner.

From The Merrill Collection. NGC ID# 8YFC, PCGS# 39513 Base PCGS# 6112

1818 Half Dollar, O-111, MS63+ Attractively Toned, Sharp Strike

3879 1818 O-111, R.1, MS63+ PCGS. CAC. Pick up points to for the variety include a small spike from Liberty's cap and the second 1 in the date that sits lower than the other digits. The MS67 we sold in 2002 represents the top of the Condition Census for the O-111 variety, yet this Select Uncirculated example holds its own in terms of strike, eye appeal, and surface quality while qualifying for the lower end of the Census. The obverse stars are razor-sharp. Peachgold toning shines beneath mottled shades of aquamarine and coppery-tan patina. NGC ID# 24F9, PCGS# 39528 Base PCGS# 6113

1822 O-113 Half Dollar, MS64 Ex: Mougey, Eliasberg

3880 1822 O-113, R.3, MS64 NGC. This cataloger had the pleasure of cataloging this piece and the other early half dollars in the Eliasberg collection two decades ago. Delicate golden toning over satin luster on both sides exhibits faint rose accents around certain of the reverse devices. The strike is generally sharp although some weakness appears on the hair curls and the wings. The Eliasberg notebook identified this piece from the Mougey collection. That collection had four 1822 half dollars, three called proofs. They were lots 484 through 487 in the Mougey catalog.

Ex: Peter Mougey Collection (Thomas L. Elder, 9/1910); John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1789. NGC ID# 24FG, PCGS# 39601 Base PCGS# 6129

1823 Half Dollar, MS63+ O-110a, Ugly 3 Variety In the Condition Census

3881 1823 Ugly 3, O-110a, R.3, MS63+ PCGS. An effort by a die sinker to strengthen the 3 in the date malformed the numeral into what is called the "Ugly 3" on Overton-110a. This late die state variety also shows a circular die crack around the eagle on the reverse. An MS65, MS64, and several MS63s are at the top of Steve Herrman's Condition Census. Prior pedigree of the present Plus-graded coin is unknown. Both sides show russet and gold toning with subtle mint-green undertones visible with a loupe. A few minor abrasions prevent a finer grade but are unobtrusive. The central devices are well-struck, although some left-hand border stars are incomplete. From The Property of a Lady. NGC ID# 24FJ, PCGS# 39623 Base PCGS# 6134

1823 Half Dollar, Pleasing VG8 Very Rare Overton-113 Variety

3882 1823 O-113, High R.6, VG8 PCGS. The Overton-113 variety represents the only truly rare die pair dated 1823, and ranks among the challenging die marriages sought by serious variety specialists from the entire Capped Bust series. The position of stars 7 and 8 are key to confirming the variety, sitting closer to the cap than any other 1823 variety. On the reverse, 50 and C. are more widely spaced than any other 1823 reverse and confirm the sole use of that die.

The latest report from Steve Herrman (Autumn, 2017) suggests that only 13 examples of the rare O-113 are known. A search of our archives reveals just three appearances of the variety in Heritage auctions over the past 20+ years, and two of those coins showed impairments. This is a solid VG8 example — smoothly worn, with pleasing lilac-gray patina and strong rims for the assigned grade. The devices show considerable wear but are fully outlined and problem-free. We note some short, minor abrasions in the left obverse field and an old scratch from the back of the cap toward star 9. This coin is plated on the PCGS Coin Facts website (1/18). From The Loma Linda Collection, Part II. NGC ID# 24FJ, PCGS# 39619 Base PCGS# 6131

1824 O-107 Half Dollar, MS64+ Top-Notch Quality for the Grade

3883 1824 O-107, R.2, MS64+ PCGS. CAC. Star 7 is close to the cap, 24 in the date is lower than 18, and a large die dot occurs between the left shield border and the fifth crossbar. The devices are uniformly strong across each side of this near-Gem half dollar. A veil of golden and pale lavender-gray patina blankets smooth, softly lustrous surfaces. Chatter is minor, and quality for the grade is top-notch. From The Bayside Collection. NGC ID# 35ES, PCGS# 39628 Base PCGS# 6137

1827 Half Dollar, Fine 12 Rare O-148 Die Marriage

3884 1827 Square Base 2, O-148, High R.6, Fine 12 PCGS. A diagnostic line angles across the headband between L and I of LIBERTY to help identify the obverse, a characteristic that is shared by three other 1827 varieties. Paired with the reverse die characteristics — two shield lines extend into the right wing, E and D joined (or very nearly so) at the base, M and E in AMERICA close, with the serif of M higher — this example confirms as the rare O-148 variety. The Dotted Beak feature of O-148 is barely visible on this specimen. Silver-gray high points contrast with gunmetal-gray fields, with sharply defined devices for the assigned grade.

From The Merrill Collection. NGC ID# 24FN, PCGS# 39746 Base PCGS# 6144

1829/7 O-101 Half Dollar, MS63+ Attractively Toned

3885 1829/7 O-101, R.1, MS63+ PCGS. CAC. The overdate feature is plain to the unaided eye on Overton-101. This reverse is lapped and shows the first A in AMERICA repunched on the left base. This high-end, CAC-approved Select Mint State coin displays sharp central devices and only minor softness on some of the borders stars. Vibrant, satiny mint luster is warm golden in color across the interiors, showing lavender and blue overtones in the margins. Eye appeal is excellent.

From The Property of a Lady. NGC ID# 24FT, PCGS# 39807 Base PCGS# 6155

1831 O-111 Half Dollar, MS64 Multicolor Patina

3886 1831 O-111, R.1, MS64 PCGS. CAC. Die cracks through the date and left-side stars help attribute this colorful Choice Capped Bust half. Deep ocean-blue, lilac-red, forest-green, and autumn-brown shades invigorate satiny and minimally abraded surfaces. Several stars are lightly brought up, but the major devices are crisply impressed. NGC ID# 24FV, PCGS# 39848 Base PCGS# 6159

1834 O-106 Half Dollar, MS65 4/4, Large Date, Small Letters

1834 Large Date, Small Letters, O-106, R.1, MS65 PCGS. Best known for its large, crude 4 cut over what is perhaps a smaller 4, the Overton-106 variety also shows recutting on the 183 visible on high-grade specimens, and it is especially clear on this sharply struck Gem. Liberty's hair curls are razor-sharp, as are most of the motifs. Typical for the variety, a few of the stars are flat in their centers. The left upright of M in AMERICA is curved, and shows obvious recutting in a failed attempt to correct its strange shape. Attractive rose and grayish-blue toning covers both sides, with silver luster shining through. Housed in an old blue label holder with barcode on the back, incorrectly noting a "Lg Let" reverse (Small Letters is correct). NGC ID# 24FY, PCGS# 39910 Base PCGS# 6165

REEDED EDGE HALF DOLLARS

1836 GR-1 Bust Half, AU50 Coveted First-Year Reeded Edge Issue

3888 1836 Reeded Edge, GR-1, R.2, AU50 PCGS. This 1836 issue is justly famous for adding the half dollar to the list of those denominations struck by the Mint's new Thonnelier steam coining press. As a low-mintage date, it is also highly prized. The present piece is only modestly worn with delicate rose and lilac toning over the fields that turns to green-gold close to the rims. A few minor abrasions contribute to the grade, including a faint line on the cheek. Population: 26 in 50, 111 finer (1/18).

Ex: Central States Signature (Heritage, 4/2009).

From The Merrill Collection. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

1836 GR-1 Reeded Edge Half, AU55 First Steam Press Half Dollar Issue

3889 1836 Reeded Edge, GR-1, R.2, AU55 NGC. The 1836 Reeded Edge half dollars were struck on the new steam press, the Thonnelier press, that was installed at the Philadelphia Mint. Today, more than 180 years later, that first press is still in operational condition (and electrified) and is housed at the ANA Money Museum in Colorado Springs, Colorado. An excellent article by Cathy L. Clark appeared in the March 2000 issue of *The Numismatist*. This piece has excellent surfaces and rich gray patina with delicate blue overtones that masked the satiny surfaces. Scattered marks are evident on both sides. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

1836 Reeded Edge Half, GR-1 Attractively Toned Choice AU

890 1836 Reeded Edge, GR-1, R.2, AU55 PCGS. Much scarcer than its Lettered Edge predecessor also dated 1836, a relatively small number of 1836 Reeded Edge halves were struck on the new Mint steam-powered press. The mintage is traditionally given as 1,200 pieces, although numismatists have long suspected that the actual quantity delivered was somewhat higher. This lightly circulated example has lavender high points and autumn-gold fields. A couple of minor field marks are noted near the chin and behind the eagle's neck. Plentiful mint luster remains throughout the attractively toned surfaces. Population: 30 in 55, 59 finer (1/18).

From The Merrill Collection. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

1838 Reeded Edge Half Dollar GR-3, Dusky Gold Near-Gem

3891 1838 GR-3, R.2, MS64 NGC. A challenging final die state example of this otherwise plentiful variety with diagnostic cracks on each side, but most prominently through the shield and lowest olive leaf. The strike shows strong detail in the centers that softens toward the outer areas. Mint luster glistens from smooth surfaces with an overlay of dusky gold and lavender-gray patina.

From The Bayside Collection. PCGS# 531082 Base PCGS# 6177

1839 GR-1 Half Dollar, Good 4 Extremely Rare Small Letters Variety Only 10 or 11 Pieces Traced

3892 1839 Small Letters, GR-1, R.7, Good 4 PCGS. This is one of the absolute rarest entries in the Bust half dollar series. Even the *Guide Book* makes sure to note "ex. rare." Differentiation between the usual Large Letters reverse and this Small Letters reverse is fairly straightforward if one knows what to look for. (Many specialists do, having undoubtedly searched through thousands of 1839 half dollars looking or an undiscovered example). The denomination is far from the border, and only a small fraction of the fletching extends past the branch stem. The variety was discovered by Maurice Rosen in September 1972. Breen confirmed the reverse die "was the same, or at least from the same complete hub, as the pattern Judd 95," according to his 1988 *Encyclopedia*. The Graham-Reiver reference includes a 10-coin census. This is the Merrill coin:

"Found by the owner and added to his extensive Registry collection. Coin is well worn but very clean for the assigned grade. A scratch from the rim thru S1 down thru the left wing serves as a marker for the future pedigree of this coin.

The obverse shows myriad wispy lines across smooth steel-gray surfaces. The reverse features an appealing circulated cameo effect with light gray motifs and rich gunmetal-blue and olive patina in the fields. The date is clear, and partial detail appears on the upper horizontal shield lines and feathers. A momentous offering of this exceptional rarity. Examples tend to disappear into strong hands. Enthusiasts keen on targeting this piece should act accordingly. Population: 1 in 4, 5 finer (1/18).

From The Merrill Collection. PCGS# 531098 Base PCGS# 6180

1839 Large Letters Half Dollar, MS64 GR-7, Ex: Green, Newman

3893 1839 Large Letters, GR-7, R.1, MS64 NGC. Ex: "Col." E.H.R. Green, Newman. A highly lustrous and sharply struck example. The central motifs and fields are virtually brilliant, while the peripheries offer rich golden-russet, cobalt-blue, and sea-green shades. Marks are minimal for the designated grade. An early die state of this collectible die marriage. Census: 43 in 64, 8 finer (1/18). Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$4.50; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33689. From The Bayside Collection. NGC ID# 24G6, PCGS# 531104 Base PCGS# 6179

SEATED HALF DOLLARS

1840-(O) Half Dollar, Reverse of 1838, MS64 O-Mint Issue Without Mintmark

1840-(O) Medium Letters, WB-101, Die Pair 4, R.3, MS64 PCGS. CAC. This is one of two famous "Missing Mintmark" varieties struck by the New Orleans Mint in 1840, from a muling of dies from the Bust half and Seated half series. It is a toss-up which is more amazing, whether the omitted mintmark was not noticed until 1980, or whether the reverse die survived long enough to strike any coins at all. It was (incredibly) used again to strike a few more coins with a different obverse. The reverse die was carried over from 1839, but it was a Bust half Reeded Edge die (mintmark on the obverse, with Medium Letters), and no one noticed there was no mintmark. Paired with an 1840 Seated half obverse, multiple radial die cracks emerged from the edge to the eagle and legend — many of them lengthy and heavy. The fact that the reverse die was a slightly smaller diameter (30.0 mm vs. 30.6 mm) was a factor that contributed to the ultimate die failure.

The present coin ranks highly in the Condition Census for the variety. Smooth, silver-gray surfaces display full mint luster that glows softly from beneath the frosted fields and devices. A splendid near-Gem example, there are no significant marks to mention. The strike is sharp given the circumstances of this unusual variety. Population: 3 in 64 (1 in 64+), 1 finer. CAC: 3 in 64, 1 finer (1/18). NGC ID# 24GP, PCGS# 572003 Base PCGS# 6233

1841 WB-101 Half Dollar, MS64+ Ex: Green, Newman

1841 WB-101 MS64+ NGC. Ex: Newman. There are no observable marks or defects on this half dollar other than minor die clash in the drapery beneath Liberty's elbow and within the lower-right portion of the reverse shield. Some rather suspect die handwork at the Mint shows dramatic, extended vertical shield lines far into the horizontal stripes above and beyond the shield edge below. Each side of this fully struck half dollar displays outstanding blue and gold peripheral toning surrounding lustrous fields and devices. Census: 7 in 64 (1 in 64+), 6 finer (1/18)

1844-O Half Dollar, AU50 Dramatic Doubled Date, FS-301

3896 1844-O Doubled Date, FS-301, WB-103, Die Pair 2, R.4, AU50 PCGS. This is one of the most dramatic doubled dates in all of American numismatics. Remnants of the initial impression jut out from the base of the rock, apparent solely on this die pairing with a Medium O mintmark. Silver surfaces are minimally toned and well-detail with minor high-point rub. The single area of real softness occurs at the upper obverse border. Housed in a green label holder. Population: 5 in 50, 7 finer (1/18).

From The Merrill Collection. NGC ID# 24H2, PCGS# 145817 Base PCGS# 6247

1852 Half Dollar, MS64 A Rarity in This Grade

3897 1852 WB-101, Die Pair 1, R.4, MS64 PCGS. CAC. Uncirculated 1852 Seated half dollars are scarce, and this Choice example is rare. Only a handful of finer coins are known. Frosty surfaces yield warm golden toning and show only a few light abrasions. Stars 7, 8, and 9 exhibit weakness, but the central devices are generally sharp. One obverse die was used for the coinage of 77,130 half dollars at the Philadelphia Mint in 1852, paired to three different reverse dies. Population: 7 in 64, 5 finer. CAC: 2 in 64, 3 finer (1/18). From The Property of a Lady. NGC ID# 24HL, PCGS# 572083 Base PCGS# 6268

1854-O Arrows WB-101 Seated Half, MS65

Frosted Cartwheel Luster

3898 1854-O Arrows, WB-101, MS65 PCGS. The date is broadly doubled — the sign of an early die state — although diagnostic die cracks from a later die state exist on both the obverse and reverse. It appears the coin was struck before any relapping or polishing of the obverse die. The strike is bold with just nominal weakness at the eagle's left (facing) talon. Strong mint luster radiates in cartwheels over silver-white surfaces interspersed with areas of amber and russet-gold toning. The 1854-O Arrows is scarce in Gem or finer conditions in spite of its huge mintage of 5,240,000 pieces. Population: 19 in 65, 20 finer (1/18). NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

CONFEDERATE STATES OF AMERICA

1861 Scott CSA Restrike Half, Unc Details Only 500 Examples Produced

3899 1861 Scott Restrike — Cleaned — PCGS Genuine. Unc. Details. Breen-8002. The Scott restrikes rightfully command a place in numismatic history and in diverse collections, since they are struck from the original Confederate half dollar die used to issue the rare original Confederate halves (just four pieces known). New York coin and stamp dealer J.W. Scott saw the potential for promotion (and profit) in the late 1870s, striking 500 storecard-style tokens in white metal utilizing the Confederate die, and then lathed the reverse devices off 500 federal 1861 half dollars to issue replica silver Confederate halves as well. Both the tokens and the silver Scott restrikes are highly collectible. This example shows the typical flattened federal obverse created when the screw press struck the Confederate reverse. The surfaces of this example show signs of a light cleaning, yet the piece displays attractive, light bluish-gray toning and Uncirculated sharpness.

1861 Confederate Restrike Half Dollar, MS61 J.W. Scott's 1879 Emission

3900 1861 Scott Restrike MS61 NGC. Breen-8002. Benjamin F. Taylor, who was born in Tennessee in 1823, was the Chief Coiner in the New Orleans Mint prior to the Civil War and continued at that post when the facility came under Confederate control. A design was created and a die engraved for the Confederate half dollar. Using a standard 1861 Liberty Seated obverse die, four original half dollars were minted. Taylor apparently retained the reverse die for the Confederate half dollar along with one of the four original half dollars, and sold the pair to Ebenezer Mason in 1879. Mason then sold the die and coin to J.W. Scott.

Scott announced in September 1879 that he was about to produce 500 restrikes from the Confederate die that he would sell at a price of \$2.00 each. He acquired 1861 half dollars, reportedly from New Orleans, and used those to make his restrikes; however, this piece does not match known New Orleans die characteristics. The first couple examples showed traces of the undertype from the reverse, so Scott decided to plane off the reverse of the coins before making his restrikes.

This lovely example shows flattening of the obverse that is characteristic of these restrikes, and clearly shows the lathe lines from the planed-down reverse. Trivial hairlines and minuscule marks limit the grade. Both sides are highly lustrous with brilliant silver surfaces and delicate peripheral gold toning. Census: 15 in 61, 46 finer (12/17).

Ex: Auction '87 (RARCOA, 7/1987), lot 1117. NGC ID# 2C4R, PCGS# 340402

1861 Scott Token, MS63 Deep Prooflike Confederate States Association Piece Breen-8003, White Metal Striking

3901 1861 Scott Token MS63 Deep Prooflike NGC. Breen-8003. After acquiring the Confederate half dollar die in 1879, coin dealer J.W. Scott developed a plan to produce restrikes using existing 1861 half dollars. However, as a precaution against possible die breakage, he first created 500 white metal tokens, such as the one that is offered here. He sold these pieces for 50 cents each to those who subscribed to his restrike program. Design elements are bold with trivial handling marks on each side. This impressive piece has brilliant pewter-gray surfaces with exceptional eye appeal. This is the only example that NGC has certified as Deep Prooflike in any grade, and an MS64 submission is the only NGC Prooflike example. Census: 7 in 63 (1 in 63 Deep Prooflike), 15 finer (12/17). NGC ID# 2C4T, PCGS# 340403

1861 Confederate States of America Cent, XF Details Haseltine's Gold Restrike of 1874 Struck from Robert Lovett's Original Dies Only Six Pieces Positively Identified

3902 1861 CSA Cent, Gold Restrike — Damaged — NGC Details.

XF. 6.46 grams. Ex: Groves-Robison. Numismatic tradition states that Robert Lovett made a small quantity of original coppernickel Confederate cents after receiving an order from a well-known Philadelphia jeweler who reportedly represented the CSA government. That tradition continues to state that Lovett became nervous over perceived treasonous activities, and told no one about the coins until almost a decade had passed since the end of the Civil War. We are unaware of any fact to support this tradition, aside from the coins themselves.

In 1874, coin dealer John W. Haseltine, who himself served in the Civil War, became aware of these pieces and persuaded Lovett to sell them to him, along with the dies. Haseltine then set about making restrikes in copper, silver, and gold. A circular to collectors bearing the imprint of Haseltine, J. Colvin Randall, and Peter L. Krider, notes that seven gold examples, 12 silver examples, and 55 copper restrikes were minted. Three decades later, Haseltine claimed only three were struck in gold and five in silver. Clearly the circular is more accurate.

Both sides have myriad small marks, with a sizeable gouge at CA in AMERICA on the obverse, and short scratches inside the wreath on the reverse. Although noticeably cleaned, this gold restrike has acquired attractive peripheral copper toning. Although NGC describes this piece as damaged, it represents an extremely important opportunity for the collector to acquire the most affordable example among the six surviving specimens.

Abbreviated Census of Haseltine Gold Restrike Confederate Cents

- 1. PR64 Uncertified. Eliasberg Collection (Bowers and Merena, 4/1997), lot 3011, which sold for \$55,000.
- 2. Choice Brilliant Proof. Americana Sale (Stack's, 1/2002), lot 876
- **3.** PR63+ Deep Cameo PCGS. CAC. Henry P. Kendall Foundation (Stack's, 3/2015), lot 2580, which sold for \$76,375.
- **4. PR63 Uncertified.** Harry W. Bass, Jr. Collection (Bowers and Merena, 5/1999), lot 2074.
- 5. PR62 Cameo PCGS. William H. Labelle, Sr. Sale (ANR, 7/2005), lot 27, not sold.
- **6. VF, impaired.** Ex: Major Mackey (Jacksonville, Florida); Louis Moskovits (New Smyrna Beach, Florida, circa 1934); later, Brand-Lichtenfels Sale (Kreisberg-Schulman, 3/1964), lot 1017; Lester Merkin (10/1973), lot 457; Donald Groves [Partrick] Collection (Stack's, 11/1974), lot 467; Ellis Robison Collection (Stack's, 2/1979), lot 325; Michael Steig Collection (Bowers and Ruddy, 9/1982), lot 2013; Stack's (1/1989), lot 680, which sold for \$6,600. **The present specimen.**

Additional Appearances:

- **A. Proof.** J.W. Haseltine (11/1881), lot 486a, sold for \$19.25.
- **B. Proof.** H.P. Smith (7/1882), lot 945, sold for \$17.75.
- C. Proof. W.E. Woodward (6/1885), lot 1388, sold for \$15.00.
- D. Proof. W.E. Woodward (1/1889), lot 847.
- **E. Proof.** The Judson Brenner specimen illustrated in the 1914 ANS Exhibition Catalog. Brenner loaned his original copper-nickel cent along with Haseltine Restrikes in gold, silver, and copper. The catalog notes that the gold restrike was illustrated, although the image is suggestive of a copper or copper-nickel example.
- **F. Proof.** Walter Breen reported a gold Confederate Restrike cent that is part of the Smithsonian Institution. We believe that the piece is a circa 1961 Bashlow Restrike. The Smithsonian also has the original dies for the Confederate cent.
- **G. Brilliant Proof.** Dealer B.G. Johnson sold a gold Confederate cent to F.C.C. Boyd for \$150 on August 9, 1941. We have not determined which coin this is among those listed above. NGC ID# 2C4X, PCGS# 340408

SEATED HALF DOLLARS

1861-S Half Dollar, Rare MS65+ WB-102, Medium S Reverse

3903 1861-S Medium S, WB-102, Die Pair 1, R.3, MS65+ PCGS. The mintmark is far separated from the stem and claw on this reverse, one of only two reverses where this is the case. As a date, the 1861-S half dollar is scarce in any Mint State grade, and Gem examples are genuinely rare. The present coin displays vibrant, frosty mint luster and unabraded surfaces. Some faint diagonal roller marks are visible at the centers under magnification, but the strike is nonetheless sharp. Small flecks of russet toning appear at the borders, complementing champagne-tinted interiors. An outstanding example of the date and die pair. Population: 5 in 65 (1 in 65+), 2 finer (1/18). PCGS# 572150 Base PCGS# 6306

1863-S Seated Half Dollar, MS64+ WB-102, Die Pair 3 Only One Finer at PCGS

3904 1863-S Small Broken S, WB-102, Die Pair 3, MS64+ PCGS. CAC. Vertical die lines at the top of Liberty's head to the border identify the obverse die. The reverse has a partially broken S mintmark with a projection from the upper left curve. Dappled gold and iridescent toning resides on the highly lustrous surfaces of this near-Gem 1863-S Seated half dollar. This is quite an impressive specimen and nearly impossible to find in finer grades. Population: 20 in 64 (4 in 64+), 1 finer. CAC: 4 in 64, 0 finer (1/18). PCGS# 572157 Base PCGS# 6310

1873 No Arrows Half Dollar, VF20 Scarce Open 3 Variant

3905 1873 No Arrows, Open 3, WB-101, VF20 PCGS Secure. 30th Anniversary holder. According to Breen's Complete Encyclopedia, the mintage of 214,200 pieces "doubtless included many Closed 3 coins; many were melted after July 10, 1873. Usually in low grades." PCGS CoinFacts estimates 150 1873 No Arrows, Open 3 half dollars extant. The surfaces are mostly bright steel-gray, exhibiting slightly deeper olive tones around the obverse border. Well-worn, but LIBERTY is still clear on the shield.

From The Merrill Collection. PCGS# 572206 Base PCGS# 6337

1873 Arrows Half Dollar, MS65 WB-109, Bold Doubled Die Obverse

3906 1873 Small Arrows, Doubled Die Obverse, WB-109, FS-101, MS65 NGC. This Small Arrows variety exhibits arguably the boldest die doubled obverse in the entire Seated Liberty half dollar series. The doubling is easily seen on Liberty's gown folds, fingers, foot, the lower stars, the scroll, and the shield stripes which exhibit four lines each instead of the normal three. This variety is extremely rare in Mint State grades, although the 1873 With Arrows half dollar is a rarity at the Gem grade level regardless of variety. NGC has seen only seven pieces in this grade (two in MS65+), all varieties included, with just three finer (1/18).

The present coin displays soft, satiny luster beneath intermingled shades of sun-red, olive-green, and gunmetal-gray toning. The strike is sharp and only a few minute ticks on the figure of Liberty preclude an even finer assessment from NGC. An important piece for the advanced Seated half dollar specialist. Ex: FUN Signature (Heritage, 1/2015), lot 4956. NGC ID# 24L7, PCGS# 400136 Base PCGS# 6343

1874-S Arrows Half Dollar, MS64 WB-103, Sharp Strike, Choice Surfaces

3907 1874-S Arrows, Minute S, WB-103, Die Pair 3, R.3, MS64 PCGS. Dappled peach-gold and lilac hues provide nice eye appeal, while the strike is needle-sharp on this near-Gem 1874-S half. Three different mintmark punches were used among four die marriages. The mintmarks are more easily identified by position than by size, confirming the Die Pair 3 attribution. The present coin is a lustrous and Choice Arrows half with a 'Minute S' mintmark. Few pieces are finer at PCGS or NGC, regardless of variety. PCGS population: 12 in 64, 3 finer (12/17).

From The Bayside Collection. PCGS# 572225 Base PCGS# 6348

1875-CC Half Dollar, MS64 WB-101, Seldom Seen Finer

3908 1875-CC WB-101, Die Pair 4, R.4, MS64 PCGS. CAC. Ex: Dick Osburn Collection. This near-Gem Carson City half is mostly brilliant and frosted with faint, dappled golden-gray toning above Liberty's left-side shoulder and in small areas along the margins. Sharply struck with only a few minor marks and strong cartwheel silver luster, the coin is particularly well-defined on the hair strands and star-by-star at the obverse periphery. The die marriage shows an unfinished area beneath the chin with a pair of diagnostic die lines and tiny tines protruding in that area. On the reverse, several die cracks include a strong one at ERICA and at the arrowheads. The Medium CC mintmark is widely spaced, high, and nearly level. Population: 30 in 64 (1 in 64+), 9 finer. CAC: 10 in 64, 3 finer (12/17).

From The Bayside Collection. PCGS# 572227 Base PCGS# 6350

1877-S Half Dollar, Reflective MS66 Beautifully Toned Type Coin Unlisted Die Pair

3909 1877-S Closed Bud, Very Small S, WB-104, Die Pair Unlisted, MS66 PCGS. CAC. In A Register of Seated Half Dollar Varieties, Bill Bugert writes: "I believe there are more 1876-S and 1877-S die marriages yet to be discovered. There are just too many dies and too high a mintage for me to feel confident all the 1877-S die marriages have been discovered and documented." We believe this piece represents a new variety. The reverse matches Bugert's Reverse X, but while the obverse date placement is similar to that of Obverse 23 (the usual obverse for Reverse X), the 1 is a trifle nearer the rock base and none of the other die markers are present. The drapery at the elbow is mostly lapped away, and the foot support is full. There is a short, horizontal die line in the recess of the drapery below Liberty's left (facing) breast, immediately left of the stomach swell. Other attributes of this high-end type coin include semiprooflike fields and well-struck design elements. Gold, mint-green, violet, and blue toning forms concentric circles on each side. Population: 28 in 66 (1 in 66+), 1 finer. CAC: 7 in 66, 2 finer (1/18). NGC ID# 24KM, PCGS# 572255 Base PCGS# 6357

1878-S Seated Liberty Half Dollar, AG3 Only 12,000 Pieces Struck Rare Series Key

3910 1878-S WB-101, Die Pair 1, R.5, AG3 PCGS Secure. From a meager mintage of just 12,000 pieces, the 1878-S Seated Liberty half dollar is an elusive key issue, and collectors prize examples in all grades and conditions. The San Francisco Mint had to allocate most of its resources to silver dollar production in 1878, because of the provisions of the Bland-Allison Act, accounting for the limited mintage of other silver issues. Since there was almost no interest in collecting branch mint issues at the time few, if any, high-quality specimens were saved for numismatic purposes. Most survivors seen today are well-worn and heavily abraded. Randy Wiley and Bill Bugert estimate about 60 examples are extant in all grades.

The present coin shows extensive wear on both sides, with the rims and LIBERTY worn smooth. The major devices are nearly complete in outline and the date, most of the legend and mintmark are legible. The lavender-gray surfaces are free of large or distracting abrasions. Housed in a new 30th Anniversary green label holder. Population: 2 in 3, 29 finer (1/18).

From The Merrill Collection. NGC ID# 24KR, PCGS# 572258 Base PCGS# 6360

PROOF SEATED HALF DOLLARS

1858 Seated Liberty Half, PR65 Only Three Pieces Finer at PCGS

3911 1858 PR65 PCGS. Ex: Col. Green-Newman. In 1858, the first year of the Mint's commercial proof set offerings, an estimated 300 proof Seated Liberty half dollars were struck. This delightful Gem exhibits Walter Breen's diagnostic area of unfinished polish between Liberty's chin and shoulder. The devices are well-defined and the fields are deeply mirrored, with brilliant silver centers highlighted by spectacular shades of cobalt-blue and sea-green toning at the rims. Population: 6 in 65, 3 finer; 1 in 65 Cameo (1/18). Ex: ANA Signature (Heritage, 8/2014), lot 4472; PNG Dallas Signature (Heritage, 2/2015), lot 3114. NGC ID# 27TH, PCGS# 6412

1864 Half Dollar, PR64 Cameo Rare With Field-Device Contrast in This Grade

3912 1864 PR64 Cameo PCGS. CAC. Cameo 1864 proof half dollars are scarce in all grades and rare above PR64. Deep Cameos are seldom offered. This near-Gem displays sharp devices and warm golden interiors. Blue and lavender appear around the borders. Both sides display attractive cameo contrast, although the effect is greater on the obverse. Population: 23 in 64 (3 in 64+) Cameo, 6 finer. CAC: 6 in 64, 2 finer (1/18).

From The Property of a Lady. NGC ID# 27TR, PCGS# 86418

1864 Seated Half Dollar, PR64 Ultra Cameo Brilliant and Starkly Contrasted Rare in Deep or Ultra Cameo Format

War issue with a low mintage of only 470 proofs. Few high-grade examples are known of the 1864 and even fewer with Cameo or Ultra Cameo surfaces. This piece shows profound white-on-black contrast on each side. This contrast is even more apparent because of the total lack of color, with deep silver mirrors and frost-white devices. The only mentionable "flaw" is Mint-made, a vertical planchet lamination from the eagle's beak down to the top of the left wing. Census: 1 in 64 Ultra Cameo, 1 finer; 1 in 64 ★ Cameo, 6 finer in Cameo; and 19 numerically finer as non-Cameo (12/17). Ex: New York Signature (Heritage, 3/2012), lot 3436.

From The Bayside Collection. NGC ID# 27TR, PCGS# 96418

1865 Half Dollar, Toned PR65 Elusive CAC Example

3914 1865 PR65 PCGS. CAC. The availability of this proof issue issue declines sharply at the Gem grade level, with or without cameo contrast. This is a rare CAC-approved example, showing deep olive-gold and peach-orange toning on each side. Modest field-device contrast is apparent beneath the patina. Only 500 proof half dollars were struck in 1865. Population: 13 in 65 (1 in 65+), 11 finer; 13 in 65 (1 in 65+) Cameo, 11 finer. CAC: 2 in 65, 6 finer; 0 in 65 Deep Cameo, 2 finer. CAC: 2 in 65, 6 finer (1/18). From The Property of a Lady. NGC ID# 27TS, PCGS# 6419

1868 Seated Half, PR66 Colorfully Toned, Needle-Sharp Strike

3915 1868 PR66 NGC. Only 600 proof Seated Liberty half dollars were struck in 1868, and few survivors can match the quality and eye appeal of the present coin. The design elements are sharply struck throughout, and the deeply mirrored fields are immersed in attractive shades of blue, green, and gray. A few delicate lines exist beneath the toning, yet the Liberty's portrait is razor-sharp and pristine. Census: 8 in 66 (2 in 66★), 1 finer; 6 in 66 Cameo (3 in 66★, 2 in 66+, 1 in 66+★); 0 in 66 Ultra Cameo, 2 finer (1/18). Ex: Rosemont Signature (Heritage, 8/2013), lot 3935; FUN Signature (Heritage, 1/2014), lot 4563; Dallas PNG Signature (Heritage, 2/2015), lot 3119. NGC ID# 27U3, PCGS# 6426

1871 Half Dollar, PR65+ Cameo Exceptional Eye Appeal

3916 1871 PR65+ Cameo PCGS. CAC. A sensational Gem Cameo proof Seated Liberty half dollar, this piece has deeply mirrored fields that surround the fully lustrous devices, and is a borderline Deep Cameo example. The central obverse is bright silver with rings of gold, violet, and blue toning toward the borders. The reverse is mostly brilliant with similar rings of toning through the legends. Population: 3 in 65 (3 in 65+) Cameo, 2 finer. CAC: 3 in 65, 1 finer (1/18). NGC ID# 27U6, PCGS# 86429

1876 Half Dollar, PR65+ Cameo Beautiful Border Toning

3917 1876 PR65+ Cameo PCGS. CAC. The cameo contrast on this Gem proof is dramatic, accentuated by the attractive toning pattern that includes light golden interiors with vivid amber, violet, and blue borders. The eagle's left (facing) talons and the fletching exhibit minor softness, but the obverse is bold. Eye appeal is exceptional on this conditionally rare With Motto proof type coin. Population: 8 in 65 (1 in 65+) Cameo, 8 finer. CAC: 1 in 65, 9 finer (1/18). NGC ID# 27UA, PCGS# 86437 Base PCGS# 86437

1877 Half Dollar, Brilliant PR66 Cameo Tied for Finest Certified

1877 PR66 Cameo PCGS. The 1877 is one of the most frequently encountered Seated half dollars as a circulation strike, but the same cannot be said of proofs. Only 510 pieces were struck. This is a dazzling, all-white example with deeply mirrored fields that establish the "black" background for well-frosted devices, a combination that yields substantial cameo contrast. A full strike exists throughout both sides, and there are no mentionable post-Mint contact marks on either side. High-grade proofs are of the greatest rarity. PCGS has only certified five others as PR66 Cameo, and NGC has graded just four at this high level. PCGS population: 6 in 66 (1 in 66+) Cameo, 0 finer (1/18).

Ex: FUN Signature (Heritage, 1/2014), lot 4574; PNG Dallas Signature (Heritage, 2/2014), lot 3124. NGC ID# 6LUM, PCGS# 86438

1879 Seated Half, PR67 ★ Cameo Superb Contrast

3919 1879 PR67 ★ Cameo NGC. This is a boldly contrasted Superb Gem with spectacular eye appeal. The centers are essentially untoned with amazing contrast, while hints of umber, orange, and violet grace the margins. Out of 10 PR67 Cameo coins graded by NGC, the present coin is one of just three to have received the ★ designation, with only one numerically finer Cameo. Just one is finer at PCGS, but it is not a Cameo. NGC Census: 10 in 67 Cameo (1 in 67+, 3 in 67★), 1 finer (1/18).

Ex: ANA Signature (Heritage, 7/2008), lot 577; Long Beach Signature (Heritage, 2/2009), lot 1364; New York Signature (Heritage, 11/2013), lot 3626; FUN Signature (Heritage, 1/2014), lot 4578; PNG Dallas Signature (Heritage, 2/2015), lot 3126. NGC ID# 27UE, PCGS# 86440

1880 Seated Half Dollar, PR66 Cameo None Numerically Finer at PCGS

3920 1880 PR66 Cameo PCGS. CAC. The contrast between the fields and devices is readily apparent on both sides of this Premium Gem Cameo proof. Colorful toning saturates the peripheries on both sides, with shades of turquoise, gold, copper, yellow, plum, and violet. The obverse exhibits a sharp strike, while a few areas of incompleteness are present on the reverse. An as-made lint mark appears near Liberty's mouth. Housed in a previous generation blue label holder with barcode on the back. Population: 13 in 66 (3 in 66+) Cameo, 0 finer. CAC: 12 in 66, 0 finer (1/18).

Ex: FUN Signature (Heritage, 1/2014), lot 4580; PNG Dallas Signature (Heritage, 2/2015), lot 3127. NGC ID# 27UF, PCGS#

1891 Half Dollar, PR66+ Only 600 Proofs Produced

1891 PR66+ PCGS. CAC. Just 200,000 circulation strikes and 600 proofs were produced in 1891 — the final year of the Seated Liberty half dollar series. This colorful, high-end proof example is deeply mirrored and lustrous. Blue, purple, and red-orange toning dominates the obverse, while the reverse displays a halo of redorange and blue-green. The devices are well-struck with light mint frost. This is a thoroughly attractive proof, earning the PCGS Plus designation and CAC-approval for eye appeal and quality at the Premium Gem grade. Population: 14 in 66 (1 in 66+), 1 finer; 4 in 66 Cameo (2 in 66+), 1 finer. CAC: 6 in 66, 1 finer (1/18). Ex: FUN Signature (Heritage, 1/2014), lot 4605; PNG Dallas Signature (Heritage, 2/2015), lot 3132. NGC ID# 27UT, PCGS# 6452

BARBER HALF DOLLARS

1895-S Barber Half Dollar, MS65+ Conditionally Rare

3922 1895-S MS65+ PCGS. CAC. The 1895-S Barber half dollar is rarely seen in grades finer than MS64. This amazing Gem has brilliant and satiny silver luster on both sides, with a bold strike, and lovely iridescent toning crescents at the lower obverse and lower right reverse. The balance exhibits delicate champagne toning that results in extraordinary eye appeal. Population: 11 in 65 (2 in 65+), 6 finer. CAC: 4 in 65, 4 finer (1/18).

From The Property of a Lady. NGC ID# 24LU, PCGS# 6473

1896-S Barber Half Dollar, MS64+ Famous Old-Time Rarity

3923 1896-S MS64+ PCGS. CAC. Half a century or longer ago, the 1896-S was considered one of the important rarities in the Barber half dollar series, and top quality pieces were rarely encountered. Although several issues are rarer in top condition today, this piece remains one of the important keys to a complete set. Both sides of this sharply defined Choice Mint State piece have brilliant silver luster, with virtually undetectable marks. Peripheral gold, blue, and iridescent toning enhances the eye appeal. Population: 27 in 64 (2 in 64+), 16 finer. CAC: 5 in 64, 6 finer (1/18).

From The Property of a Lady. NGC ID# 24LX, PCGS# 6476

1897-O Barber Half Dollar, MS64 Elusive, Low-Mintage Issue

3924 1897-O MS64 PCGS. CAC. An especially attractive Choice specimen from a small mintage of 632,000 pieces, this delightful Barber half dollar exhibits well-detailed design elements, with just a touch of the usual softness on the eagle's claw and shield point. the well-preserved surfaces radiate vibrant mint luster, with highlights of sea-green and lavender toning. Population: 17 in 64, 19 finer. CAC: 4 in 64, 5 finer (1/18). NGC ID# 24LZ, PCGS# 6478

1900-S Half Dollar, MS66 Only One Finer at PCGS

1900-S MS66 PCGS. With a mintage that exceeded 2.5 million coins, the 1900-S is not a rarity in the Barber half dollar series. However, the date is conditionally elusive with only 14 PCGS-certified examples that grade higher than MS64. This Premium Gem is sharply detailed with wispy gold and pale blue toning on its ivory surfaces. Both sides have brilliant mint luster. Population: 4 in 66, 1 finer (1/18). NGC ID# 57PC, PCGS# 6488

1894-O Barber Half Dollar, MS64 Sharp Strike, Colorfully Toned

3926 1904-O MS64 NGC. CAC. Most 1894-O halves require a degree of compromise, since the issue is almost always weakly struck and full details pieces may not exist. This vibrant and colorful Choice Uncirculated example approaches the finest of the issue, with a strong strike throughout both sides and exceptional eye appeal. Mint luster coruscates beneath rich shades of blue, lavender, reddish-gold, and orange toning. The shield corner is sharp and the talon below only lacks its uppermost detail. CAC endorsement confirms the high quality of this conditionally rare, near-Gem New Orleans half. Census: 11 in 64, 5 finer. CAC: 3 in 64, 4 finer (1/18). NGC ID# 5EPG, PCGS# 6499

1904-S Half Dollar, Satiny MS63 Better Date in Uncirculated Condition

3927 1904-8 MS63 PCGS. CAC. Half dollar coinage at San Francisco in 1904 amounted to only a little more than 550,000 coins, a relatively small production for the California branch mint during this period. In 1903, the San Francisco Mint struck nearly 2 million Barber halves, and in 1905, coinage neared 2.5 million pieces. Mint State survivors of the 1904-S are scarce overall, and are decidedly rare in Choice of better grades. Only a handful of CAC-approved coins are known. This Select example balances quality and affordability, showing satiny luster with a hint of champagne toning. The border stars are sharp, but the eagle's right (facing) shoulder and the shield corner are typically weak. On the obverse, parallel roller marks are visible on the portrait, not fully struck out of the planchet. No major abrasions are seen. Population: 9 in 63 (1 in 63+), 30 finer. CAC: 1 in 63, 12 finer (1/18).

From The Property of a Lady. NGC ID# 24MP, PCGS# 6500

PROOF BARBER HALF DOLLARS

1893 Barber Half, PR67+ Richly Toned, High-End Proof

3928 1893 PR67+ PCGS. CAC. A window of brilliant gold is surrounded by glasslike reflectivity and deep shades of azure-blue, lavender, violet, and royal purple on this boldly struck Barber half proof. The toning appears to be the result of long storage with an original proof set, now separated into its component coins and encapsulated as singles. CAC confirms the high quality of this Superb Gem proof. It is one of the few examples in PR67 to receive the important Plus designation from PCGS. Population: 13 in 67 (2 in 67+), 1 finer; 7 in 67 Cameo (1 in 67+), 2 finer; 4 in 67 Deep Cameo (3 in 67+), 0 finer. CAC: 6 in 67, 2 finer (1/18).

Ex: Long Beach Signature (Heritage, 9/2014), lot 3182. NGC ID# 24NV, PCGS# 6540

1896 Barber Half Dollar, PR67+ Cameo Only 762 Pieces Struck

3929 1896 PR67+ Cameo NGC. CAC. Sharply struck with exceptionally glassy deep mirror fields, this Plus-graded Superb Gem also displays gorgeous variegated coloration in waves of ocean-blue, champagne, violet, and lilac-gray across pristine fields and devices. One of the finer-known examples of this well-produced proof issue of just 762 pieces. Census: 12 in 67 Cameo (1 in 67+), 3 finer. CAC: 4 in 67, 0 finer (1/18). Ex: ANA Signature (Heritage, 8/2014), lot 4524. NGC ID# 24NY, PCGS# 86543

WALKING LIBERTY HALF DOLLARS

1917-S Half Dollar, MS64 CAC-Approved Obverse Mintmark Coin

3930 1917-S Obverse MS64 PCGS. CAC. A blush of light champagne toning graces the satiny mint luster of this Choice 1917-S Walker. Liberty's branch hand is well-defined, but her head and the eagle's trailing leg feathers are weak as often seen. The Obverse Mintmark variety is scarce in Gem condition and only moderately available in the current MS64 grade level. CAC-approved coins are rare regardless of numeric grade. PCGS lists 45 finer submissions. CAC: 24 in 64, 10 finer (1/18).

From The Property of a Lady. NGC ID# 26G7, PCGS# 6572

1918-D Half Dollar, MS64 Rarely Offered Finer

3931 1918-D MS64 PCGS. CAC. Softly frosted luster is original on this near-Gem 1918-D Walker, while gold and russet toning on each side masks a few unobtrusive abrasions. Liberty's head and branch hand are well-defined, in contrast to the eagle's trailing leg which shows indistinct feather detail. The 1918-D is available in this grade, but PCGS has seen only 32 finer submissions (1/18). From The Property of a Lady. NGC ID# 24PW, PCGS# 6575

1919-D Half Dollar, MS64 Above-Average Strike

3932 1919-D MS64 PCGS. The 1919-D is one of the important keys to the series, from a mintage of 1,165,000 coins. Few of those have survived in Mint State grades, and most of those that do have half of the details missing due to the typical poor strike. This lovely Choice Mint State 1919-D Walking Liberty half dollar has an above average strike with traces of head detail, most skirt lines present, an outlined thumb, and nearly full breast feathers on the reverse. A few trivial toning specks appear on the brilliant and otherwise untoned silver surfaces. An extraordinary opportunity for the Set Registry collector. Population: 90 in 64 (7 in 64+), 12 finer (1/18). From The Property of a Lady. NGC ID# 24PZ, PCGS# 6578

1919-S Half Dollar, Iridescent MS62

3933 1919-S MS62 PCGS. The 1919-S is one of the most conditionally challenging dates in the series, rare at the Gem level and in high demand in lower grades among the general collecting populace. This satiny, champagne-tinted coin displays some attractive iridescence along the left obverse margin and is free of singularly bothersome abrasions. The central high points are weakly struck, as expected. From The Property of a Lady. NGC ID# 24R2, PCGS# 6579

1919-S Walking Liberty Half Dollar, MS64 Nice Luster and Toning

bester date in the series, especially in high grade, from a mintage of 1.5 million pieces. This attractive Choice specimen displays well-detailed design elements, with just a touch of the usual softness on the head and wreath hand. The lightly marked, lustrous surfaces show highlights of lavender-gray, greenish-gold, and amber toning. Census: 50 in 64 (1 in 64+), 29 finer (1/18). NGC ID# 24R2, PCGS# 6579

1920-D Half Dollar, MS64 An Elusive CAC-Approved Example

3935 1920-D MS64 PCGS. CAC. This is a better Denver issue, scarce in MS64 and borderline rare at the Gem level. Only a small number of coins in this and finer grades are CAC endorsed. This piece displays satiny mint luster and warm golden toning with varying degrees of intensity on each side. A few light abrasions do not detract, and partial thumb separation is visible on Liberty's branch hand. From The Property of a Lady. NGC ID# 24R4, PCGS# 6581

1920-S Half Dollar, MS64 Better Early Branch Issue

3936 1920-8 MS64 PCGS. Silver-gold surfaces with a hint of smokegray on the obverse and lovely pastel rose and jade-green on the reverse. The strike is soft through the centers, as usual for this difficult issue, but mentionable abrasions are nonexistent, the luster is strong, and the eye appeal is high. Two tiny ebony flecks appear on the wing near CA.

Ex: Dallas Signature (Heritage, 10/2006), lot 2053; Milwaukee Central States Signature (Heritage, 8/2007), lot 1071, which realized \$2,990. NGC ID# 24R5, PCGS# 6582

1920-S Half Dollar, Delicately Toned MS64+

3937 1920-S MS64+ PCGS. CAC. PCGS has awarded a Plus designation to only a dozen Choice 1920-S Walkers, and the number of coins in this and finer grades endorsed by CAC is similarly small. The present example combines the PCGS Plus designation and CAC green label. Satiny mint luster shows warm golden toning with iridescence around the margins. Liberty's branch hand is moderately weak, as expected.

From The Property of a Lady. NGC ID# 24R5, PCGS# 6582

1921 Half Dollar, MS65 Only Four Finer at PCGS

3938 1921 MS65 PCGS. CAC. The three 1921 Walking Liberty half dollars, Philadelphia, Denver, and San Francisco, are the classic key-date issues for this series. While the 1921-S is rarest in high grades, the 1921 and 1921-D issues had the two lowest mintages in the series at 246,000 and 208,000, respectively. While the PCGS population data suggests that certain other issues are more elusive in MS65 or finer grades, the 1921 figures are likely inflated due to a higher number of resubmissions. This Gem is an extraordinary representative with an excellent strike that features bold skirt lines, partial head details, and an outlined thumb. The frosty silver surfaces are brilliant and untoned. Population: 60 in 65 (7 in 65+), 4 finer. CAC: 14 in 65, 2 finer (1/18).

From The Property of a Lady. NGC ID# 24R6, PCGS# 6583

1921-D Walking Liberty Half, MS62 Lowest Mintage of the Series

3939 1921-D MS62 PCGS. Only 208,000 examples of this key Denver issue were struck, making it the lowest-mintage date in the entire series. Uncirculated examples are only moderately scarce as a whole, although demand for them is unceasing. This piece displays satiny mint luster and warm golden toning. Abrasions are minimal, and partial thumb separation is seen on Liberty's branch hand. From The Property of a Lady. NGC ID# 24R7, PCGS# 6584

1921-S Walking Liberty Half Dollar, MS65 Most Elusive Walker in Mint State Low-Mintage Key

3940 1921-S MS65 PCGS. The 1921-S Walking Liberty half dollar has a small reported mintage of just 548,000 pieces, making it one of the rarest issues of the series in high grade. Of course, half dollar mintage was severely limited at all three active mints in 1921, and production totals at the Philadelphia and Denver facilities were even smaller than the San Francisco output. While all the 1921 half dollar issues are elusive today, the coins from the other mints definitely experienced a higher survival rate, especially in Mint State grades. Contemporary collectors and dealers seem to have ignored the 1921-S at the time of issue, despite its low mintage. Additionally, coins always circulated more in the Western part of the country, which was primarily supplied by the San Francisco Mint, than they did in the East and Midwest, which got most of their coins from Denver and Philadelphia. Evaluating the 1921-S in his series reference Collecting and Investing Strategies for Walking Liberty Half Dollars, Jeff Ambio reports, "Coins that grade MS65 or finer are exceedingly rare, MS66s are virtually unobtainable and Superb Gems are unknown." Currently, PCGS has graded 18 specimens in MS65 condition, with two of those in MS65+, and just one example finer, while NGC has certified 21 pieces in MS65, with two finer (1/18).

The 1821-S is always seen with areas of softness on Liberty's wreath hand and head, and this coin is no exception, but other areas are sharper than usual, and at least some emerging detail is evident on the feathers of the eagle's trailing leg, which is another typical trouble spot. The surfaces are impeccably preserved and exhibit subtle hints of pale gold toning. Vibrant mint luster adds to the terrific eye appeal. This coin will be a welcome addition to a fine collection or Registry Set.

From The Property of a Lady. NGC ID# 24R8, PCGS# 6585

1923-S Half Dollar, Lustrous MS64+

3941 1923-S MS64+ PCGS. CAC. This better-date Walker is the only half dollar issue struck from 1922 to 1926. During the 1920s, there was little commercial need for new half dollar coinage, and most of the pieces struck during this period were produced at the San Francisco Mint for the West Coast states. Gem 1923-S half dollars are scarce today. This Plus-graded, CAC-approved Choice example displays vibrant, frosty mint luster and yellow-gold toning. Moderate strike weakness on the devices is normal for the issue. From The Property of a Lady. NGC ID# 24R9, PCGS# 6586

FRANKLIN HALF DOLLARS

1948-D Franklin Half, MS67 Full Bell Lines None Certified Finer at Either Service

3942 1948-D MS67 Full Bell Lines PCGS. CAC. Attractive pastel hues glisten from both sides of this satin-smooth and lustrous Superb Gem Franklin half. Shimmering ivory-gold and pale lavender-gray shades reveal hidden iridescence when the coin rotates in light. 1948-D halves are extremely rare in MS67 condition either with Full Bell Lines or without. On this stunning example, the Bell Lines are needle-sharp, as is the overall strike. Two or three tiny marks are microscopic and wholly inconsequential. There are no finer 1848-D Full Bell Lines half dollars at either PCGS or NGC. PCGS population: 7 in 67 Full Bell Lines, 0 finer. CAC: 2 in 67, 0 finer (1/18). NGC ID# 6LLM, PCGS# 86652

1959 Franklin Half, MS66+ Full Bell Lines Tied for Finest at PCGS

3943 1959 MS66+ Full Bell Lines PCGS. CAC. Although PCGS reports a few Superb Gem coins without Full Bell Lines, this Plusgraded, CAC-approved Premium Gem is among the finest at that service with sharp detail on the lower reverse bell. Luster is frosty and vibrant, and no bothersome abrasions are discernible. Light champagne interiors cede to deeper russet borders, transitioning through rose and forest-green hues in the obverse margins. Population: 72 in 66 (6 in 66+) Full Bell Lines, 0 finer. CAC: 17 in 66, 0 finer (1/18). NGC ID# 24TJ, PCGS# 86676

PROOF FRANKLIN HALF DOLLARS

1950 Franklin Half Dollar, PR67+ First-Year Franklin Proof

3944 1950 PR67+ PCGS. CAC. Only 51,386 proof half dollars were struck in 1950, the first year proofs were offered with the Franklin design. This Plus-graded Superb Gem exhibits razor-sharp definition on all design elements and the fields are hazily reflective. The impeccably preserved surfaces show highlights of greenish-gold toning and overall eye appeal is terrific. PCGS has graded one numerically finer example (1/18). NGC ID# 27VA, PCGS# 6691

1954 Franklin Half, PR68 Ultra Cameo Registry Grade Example

3945 1954 PR68 Ultra Cameo NGC. The 1954 proof Franklin half dollar is seldom encountered with Ultra Cameo surfaces. This magnificent PR68 example is among the finest coins certified at the leading grading services. The design elements are sharply detailed and the deeply mirrored fields contrast intensely with the frosty devices. The brilliant surfaces are impeccably preserved and overall visual appeal is tremendous. Census: 13 in 68 Ultra Cameo, 0 finer (1/18). NGC ID# 27VE, PCGS# 96695

1962 Franklin Half Dollar, PR69 Extraordinary Deep Cameo Example

3946 1962 PR69 Deep Cameo PCGS. This magnificent 1962 Franklin half dollar is among the finest examples certified at either of the leading grading services. The sharply detailed design elements contrast profoundly with the deeply mirrored fields, creating an intense cameo effect. The brilliant surfaces are virtually pristine and eye appeal is tremendous. Population: 22 in 69 Deep Cameo, 0 finer (1/18). NGC ID# 27VK, PCGS# 96703

EARLY DOLLARS

1794 Flowing Hair Silver Dollar, VF35 B-1, BB-1, The Mougey Specimen Just Its Third Public Offering

3947 1794 B-1, BB-1, R.4, VF35 PCGS Secure. Bowers Die State III. A few key, diagnostic markers on each side of this pleasing 1794 dollar trace its pedigree to the September 3, 1910 Thomas Elder coin auction, where it was plated as part of the magnificent Peter Mougey Collection. That important sale was the only time this coin had been publicly offered (to the best of our knowledge), and it was the coin's only auction appearance until it was consigned to our January, 2007 FUN sale. In the Mougey sale, it quietly brought \$150 as Lot 940, while it realized more than \$200,000 during enthusiastic floor bidding at our 2007 FUN Platinum Night .

More than a century ago, Elder described the coin only briefly: "Head of Liberty undraped. Standing eagle. About Fine. Extremely rare." That was hardly a rousing description to lead off what Elder touted as "SILVER DOLLARS / The Rarest Collection Ever Offered."

The low-key approach was not out of character for the era or the collector. Peter Mougey (1841-1908) was a grocer by trade, and also a coin collector who quietly amassed an important cabinet. Although he was an early ANA member (number 47), Mougey was little known in his time except among a few well-connected dealers and collectors. Even today he is remembered primarily by large cent collectors. But in addition to his fine large cents and half cents, Mougey also owned a rare 1802 half dime (today known as the seventh-finest example), as well as important collections of half dollars and silver dollars. His nearly complete date set of early half eagles represented most issues from 1813 to 1834, and an extensive assemblage of proof sets from 1842 to 1906 included a run of gold proof sets from 1882 to 1903. All were part of Mougey's impressive holdings. William H. Woodin purchased Mougey's collection en masse, keeping a number of select coins including many gold pieces and a few silver dollars, while the rest of Mougey's extensive collection made up the 1910 Thomas Elder offerings (then owned by Woodin), including the present 1794 silver dollar.

It is important to understand that grading standards are much different today than during the early 20th century. Specialists will note that this coin has an unusually sharp strike for the first-year issue, with the stars all boldly defined, including stars 1 to 4. Only minor weakening of the left obverse border appears on the circumference of the piece. Tellingly, the word STATES is fully formed and the date is sharp as it can be for the coin's VF35 grade. A check of 130+ 1794 dollars in the Martin A. Logies reference confirms that only 20% to 25% of all known 1794 specimens demonstrate

these well-executed characteristics of strike. Apparently, this coin and a few others were produced before the dies were misaligned.

A tiny planchet flaw is visible just right of star 8, and a long, thin scratch from the top of OF to the top of AM are both useful features to positively identify this example. A few other light scratches appear on each side, along with scattered, faint adjustment marks near the obverse borders. None of these imperfections are overly significant for the assigned grade. To be sure, this is a highly attractive example of a midgrade, moderately circulated 1794 dollar. Pleasing lilac-gray and brownish-gold color adorns the Choice surfaces, and the coin displays an important pedigree along with a notably sharp strike that will more than satisfy even the most particular collector of early dollars. Ex: Peter Mougey (Thomas Elder, 9/1910), lot 940, which brought \$150; FUN Signature (Heritage, 1/2007), lot 1020, which realized \$207,000. NGC

ID# 24WY, PCGS# 39972 Base PCGS# 6851

1795 Flowing Hair Dollar, Pleasing VF25 B-5, BB-27, Three Leaves

1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF25 NGC. Bowers Die State II. Attractive lilac-gray toning with blue and golden undertones glows from both sides of this pleasing, midgrade early dollar. The high relief of BB-27 die marriage encouraged early wear on Liberty's hair, the eagle's breast, and on the high rims, yet this example is crisply defined in protected areas and smoothly worn at the high points. Marks are limited to occasional light lines and tiny nicks — a few around the eagle's head, and a small bright spot on the rim beneath 7 in the date.

From The Bayside Collection. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Off-Center Draped Bust Dollar, VF20 B-14, BB-51, Smooth and Well-Defined

1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF20 PCGS. Bowers Die State 1/1. Initially, the Draped Bust portrait of Liberty was entered too far left on the master die — a situation that was soon corrected on the subsequent B-15, BB-52 variety. This smoothly worn, richly toned gunmetal-gray example of the Off-Center BB-51 is pleasing and sharp for the grade. We note a tiny field tick near star 3 and remnants of a few vertical adjustment marks, now faint, that remain on the obverse. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1795 Draped Bust Dollar, VF25 B-14, BB-51, Off-Center Bust

3950 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF25 NGC. Bowers Die State I, unclashed. The bust was entered into the die off-center on this variety, one of only two Draped Bust die pairings of 1795. The coin offered here displays an even, well-centered strike with complete border dentils. Medium pewter-gray patina blankets each side, and the devices show moderate detail. Heavy adjustment marks are visible on the obverse portrait (mint-made), although there are no other distractions.

From The Sea Cliff Collection. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1795 Draped Bust Dollar, VF30 Off-Center Variety, B-14, BB-51

3951 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF30 NGC. Bowers Die State 1. Variegated gunmetal-blue and creamgray toning covers both sides of this richly toned Draped Bust dollar. The portrait was set too far left, suggesting the B-14, BB-51 variety was the Mint's first attempt at the Draped Bust motif in dollar format. Paired with Robert Scot's Small Eagle reverse, both the Draped Bust and wreath punches for the master dies were sophisticated and exceptionally well-made. This example is sharply defined for the VF grade, with a few small field abrasions but no adjustment marks. A glass reveals faint slide marks on the portrait and the eagle's breast. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1795 B-14, BB-51 Dollar, Bold XF40 Off-Center Draped Bust

3952 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, XF40 PCGS. Bowers Die State I. This unique off-center Draped Bust die variety represents the first use of new obverse and reverse motifs. This portrait of Liberty, believed to be by Robert Scot, would be used through the end of silver dollar production in 1804. This pinpoint-sharp example exhibits strong curl and feather detail, including partial definition on the eagle's breast. Light steel-gray patina covers each side. Small adjustment marks are seen on the lower reverse. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1795 Draped Bust Dollar, VF25 Centered Bust, B-15, BB-52 Variety

3953 1795 Draped Bust, Centered, B-15, BB-52, R.2, VF25 PCGS. Bowers Die State IV. This is a well-defined Centered Bust dollar that displays blue-gray fields with iridescent undertones on both sides. Light, silver-gray patina covers the raised devices for nice contrast with the deeply toned fields. A glass reveals a scattering of tiny marks in the fields as well as areas of die rust that appear as microscopic raised lumps near the borders. The rims and dentils remain strong, with impressively sharp central devices.

From The Bayside Collection. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

1795 Draped Bust Dollar, VF25 Centered Portrait, B-15, BB-52

3954 1795 Draped Bust, Centered, B-15, BB-52, R.2, VF25 PCGS. Bowers Die State V. A die break with a knife-like extension in the hair above the ribbon and a thin die crack through ICA confirm the die state. BB-51 (Off-Center Bust) and BB-52 (Centered Bust) are the only two varieties for the 1795 Draped Bust dollar. The placement of the highest curl below the E confirms this die pair. Evenly struck and well-circulated, this piece has an untoned reverse and splashes of multicolor patina across much of the obverse. A planchet defect and adjustment marks appear along the lower reverse border. Housed in a green label holder. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

1796 Large Date Dollar, VF30 B-5, BB-65, Small Letters

3955 1796 Large Date, Small Letters, B-5, BB-65, R.2, VF30 PCGS. Bowers Die State II. The die break at the I in AMERICA is present but does not yet connect with the C. This midgrade BB-65 dollar displays a bold, even strike with little high-point wear and no adjustment marks. Both sides have uniform golden-gray patina with lavender tints throughout. The reverse is rotated slightly counterclockwise.

From The Property of a Lady. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

1797 Dollar, B-3, BB-71, VF35 10x6 Stars, Large Letters

3956 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF35 PCGS. Bowers Die State III. The usual state with lapping on the upper curl and lowest leaf above the final A in AMERICA. An arrangement of 10 stars left and six stars right on the obverse is diagnostic for this accessible *Guide Book* variety. Steel-gray patina deepens toward the outer areas. Much detail remains on Liberty's curls, and partial definition appears on the eagle's wing feathers. A trio of pinscratches occurs left of the date near the lowest curls. The surfaces are otherwise smooth.

From The Bayside Collection. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1797 Draped Bust Dollar, XF40 10x6 Stars, Large Letters, B-3, BB-71

3957 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, XF40 PCGS. Bowers Die State III. According to Mint records, only 7,776 Draped Bust, Small Eagle dollars were struck in 1797, but numismatists believe many 1797-dated dollars were struck in 1798, making the number of specimens available today larger than the small production total would indicate. Three die varieties are known for the date. This coin represents the BB-71 variety, the only one with the stars arranged in a 10x6 pattern on the obverse. This lightly worn XF specimen retains much interior detail on Liberty's hair and the lavender-gray surfaces are lightly abraded and problem free. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1799/8 B-3, BB-141 Dollar, Choice AU 15 Stars Reverse

Bowers Die State IV, extensively cracked on the reverse. The die sinker entered 15 stars into this reverse die and then corrected the number to 13 by enlarging the two end clouds to envelop the extra stars. Known as the 15 Stars Reverse, this overdate variety is highly popular. The present coin displays a sharp, even strike with no adjustment marks. Golden-gray surfaces are smooth and faintly lustrous in the fields, showing only slight high-point wear over the devices.

From The Property of a Lady. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

1799/8 B-1, BB-142 Dollar, XF45 13 Stars Reverse

Bowers Die State III, the usual state with heavy die crumbling near the I in AMERICA. This piece has an even, well-centered strike with bold sharpness at the centers and around the borders. Only light wear is visible on the portrait and eagle. Yellow-gold, mintgreen, olive, and russet hues accent the pewter-gray surfaces, and there are no distracting adjustment marks.

From The Property of a Lady. NGC ID# 24X8, PCGS# 40065 Base PCGS# 6884

1799 B-16, BB-158 Dollar, AU50 Defective U in UNITED

3960 1799 7x6 Stars, B-16, BB-158, R.2, AU50 ANACS. The left top of the U in UNITED is missing on the reverse, a characteristic found on three different reverse dies. This lovely early silver dollar exhibits considerable underlying mint luster that shines through rich sea-green, magenta, and rose toning on both sides. A highly attractive representative. NGC ID# 24X7, PCGS# 40050 Base PCGS# 6878

1799 7x6 Stars Dollar, Lustrous AU58 B-16, BB-158, Original Surfaces

3961 1799 7x6 Stars, B-16, BB-158, R.2, AU58 PCGS. Bowers Die State IV, extensively cracked on the obverse with clash marks on both sides. This near-Mint Draped Bust type coin displays original luster in the fields, along with outstanding old-time toning that includes golden-gray interiors and sea-green or russet borders. The strike is sharp and even, and only light high-point friction is discernible. The quality and eye appeal are exceptional, rarely seen on early dollars. Even the available BB-158 variety, offered here, is rare in Mint State and infrequently available in AU grades with the degree of quality that the present coin offers.

From The Property of a Lady. NGC ID# 24X7, PCGS# 40050 Base PCGS# 6878

1799 B-23, BB-159 Dollar, XF40 Distinct 8x5 Star Pattern

3962 1799 8x5 Stars, B-23, BB-159, R.3, XF40 PCGS. Bowers Die State II. Faint crack through BE in LIBERTY. The distinctive star arrangement, 8x5, makes this a highly popular variety with its own separate listing in the *Guide Book*. Most examples known are in VF or lower condition. The devices are clearly well-struck despite blending on the curls and breast feathers. Light silver-gray surfaces show specks of faint color. There are a few shallow pinscratches behind the hair ribbon, but they do little to detract. NGC ID# 24X7, PCGS# 40063 Base PCGS# 6881

1799 Dollar, B-21, BB-169, AU50 Partial Luster Remains

3963 1799 7x6 Stars, B-21, BB-169, R.3, AU50 PCGS. CAC. Bowers Die State IV, the latest confirmed die state, showing cracks at the date and the reverse periphery. This About Uncirculated coin is free of adjustment marks and displays sharp detail from an even strike. Mottled olive, russet, and golden-gray toning blanket each side, and hints of luster that emerge from the protected portions of the fields are original. Housed in a green label holder. NGC ID# 24X7, PCGS# 40060 Base PCGS# 6878

1800 Dollar, AU50 B-19, BB-192, AMERICAI

3964 1800 AMERICAI, B-19, BB-192, R.2, AU50 PCGS. Bowers Die State III, clashed on the obverse with a faint die crack at the top of the LI in LIBERTY. BB-192 is the only use of this obverse, although the AMERICAI reverse is shared by the BB-191 die marriage. This piece is boldly and evenly struck with no visible adjustment marks. Both sides have pewter-gray patina, while the obverse also shows daubs of amber and blue at the borders.

From The Property of a Lady. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

GOBRECHT DOLLARS

1836 Original Gobrecht Dollar Judd-60, VF Details

1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Repaired — PCGS Genuine. VF Details. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State B. This early die state shows a die chip between two dentils above the final A in AMERICA. No other die defects are seen, indicating this piece was struck early in the final week of 1836. Each side exemplifies what is meant by a "circulated cameo" with deep toning in the fields and bright high-points over the design elements. The shield shows the effect of an attempted repair.

1836 Gobrecht Dollar, XF Details Judd-60 Original, Die State B/C

3966 1836 Name on Base, Judd-60 Original, Coin Alignment, Pollock-65, R.1 — Surfaces Smoothed — PCGS Genuine. XF Detail. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State B/C. This intermediate state clearly shows the die chip in the dentils above the final A in AMERICA (State B), it shows the dentil chip above the second T in STATES (State C), but it does not show any evidence of the feeder finger damage to the rim usually found on Die State C. The surfaces have been slightly smoothed and each side displays rose and blue-gray toning. Even wear over the devices.

From The E.B. Strickland Collection, Part II.

1836 Gobrecht Dollar, XF Details Judd-60 Original, Die State B

1836 Judd-60 Original, Medal Alignment, Pollock-65, R.1 — Repaired — PCGS Genuine. XF Details. Silver. Plain Edge. Die Alignment IV (center of Liberty's head opposite the right side of F in OF). Die State B. This early die state only shows one diagnostic, die chips in the dentils above the second A in AMERICA. One byproduct of the massive amount of research done over the past 10 years by John Dannreuther, Craig Sholley, and Saul Teichman is it now almost possible to pinpoint the day a particular coin was struck. It would be possible if we only knew when the diagonal die clash occurred in State D. In this case, this coin was struck early in the week (Monday?) in the final week of 1836. Called Repaired, we do not see a specific area that was repaired, but rather an overall smoothing of the surfaces as well as cleaning. The surfaces are bright and only toned within the recesses of the devices and around the margins.

From The E.B. Strickland Collection, Part II.

SEATED DOLLARS

1843 Seated Dollar, MS63 Conditionally Elusive

3968 1843 MS63 NGC. OC-1, R.1. Osburn-Cushing Die State d/b. Mint State examples of the 1843 Seated dollar are elusive at all numerical levels, and nearly impossible to locate above MS62, and they are impossible to locate above MS64. NGC and PCGS have graded 26 of these in MS63, and only 14 in MS64, with none certified finer at either service (1/18). This Select Mint State representative has reflective silver surfaces with hints of gold at the borders. As usual, Liberty's head, some of the stars, and the tops of the eagle's wings show some strike weakness. The pleasing surfaces have no marks of consequence. Census: 8 in 63, 8 finer (1/18). NGC ID# 24YD, PCGS# 6929

1855 Silver Dollar, MS62 Low-Mintage Rarity

Seate a/b. The 1855 Seated Liberty silver dollar had a mintage of only 26,000 coins. Two years earlier, when Congress authorized a slight weight reduction for the smaller silver coins, they excluded the silver dollar. As a result, production of these cartwheels, as they were called, continued at low levels for the rest of the decade. Mint State examples are rarely encountered. PCGS has only certified 23 examples in grades from MS60 through MS64, and only two examples boast that top grade. In fact, it is interesting that they have graded nearly as many proofs. Scattered marks are consistent with the grade on this pleasing medium gray example that features wisps of iridescent toning on the reflective surfaces. The strike is typically weak at the eagle's head and top of the left (facing) wing. This is an exceptional, highly pleasing Mint State representative. Population: 11 in 62, 8 finer. CAC: 2 in 62, 6 finer (1/18).

From The Property of a Lady. NGC ID# 24YU, PCGS# 6943

1857 Seated Dollar, Toned MS62 Outstanding for the Grade

3970 1857 MS62 PCGS. CAC. OC-2, R.3. Osburn-Cushing Die State a, with unpolished dies. A long, thin die line is visible above OF A(MERICA) on the reverse, and there is a small unfinished area on the obverse at each end of the rock base. Mint State 1857 Seated dollars are scarce, and CAC-approved coins are rare regardless of numeric grade. This piece displays subtly reflective fields beneath original russet-gray, sea-green, and golden toning. Strike weakness appears on Liberty's head, the right-hand stars, and the upper edge of the eagle's left (facing) wing. No major abrasions are noted. Population: 18 in 62, 20 finer. CAC: 1 in 62, 11 finer (1/18). From The Property of a Lady. NGC ID# 24YW, PCGS# 6945

1859-O Seated Liberty Dollar, MS65 Registry Set Essential

3971 1859-O MS65 PCGS. OC-1, R.1. The 1859-O Seated Liberty dollar has a substantial mintage of 360,000 pieces. While a number of coins were released into circulation at the time of issue, several bags were held in government storage until the great Treasury releases of the early 1960s. Dick Osburn and Brian Cushing estimate at least 2,000 examples were released from the Treasury Hoard, making the 1859-O an available date in high grade and a popular choice for type collectors. Most of the Treasury coins show extensive bagmarks from being stored with other coins for more than a century, however. The 1859-O is almost unobtainable at the MS65 grade level, and no finer coins have been certified at either of the leading grading services (1/18).

The present coin is a spectacular Gem, with well-detailed design elements and well-preserved, lustrous surfaces. Both sides are blanketed in low-intensity shades of pale gold toning, with a few subtle hints of lavender. Overall visual appeal is quite strong. Population: 2 in 65, 0 finer (12/17). NGC ID# 24YY, PCGS# 6947

1870-CC Seated Dollar, Unc Details Inaugural Issue From the CC-Mint

3972 1870-CC — Cleaned — PCGS Genuine. Unc Details. OC-9, Low R.4. The date is centered vertically, distinguishing this obverse from the three others used to produce nine die varieties (paired with six reverses). The 1870-CC has a fairly high survival rate of 750 coins or 6% of its 12,642-coin mintage. However, few pieces remain in Uncirculated condition. This coin has subdued surfaces from cleaning, but they are not overly bright and have delicately retoned. Strike detail is strong, except for Liberty's head. From The Property of a Lady.

1871 Seated Liberty Dollar, MS64 Richly Toned Original Surfaces

3973 1871 MS64 PCGS. CAC. OC-13, R.2. A bold Choice Uncirculated Seated Liberty dollar, with complex gray and rose toning with undertones of gold and blue that boasts of its originality. The obverse has a few nicks here and there, commensurate with the grade. A reverse die break over the tops of UNITE draws attention, but no post-striking marks jump out at the naked eye. While 1871 dollars are not particularly rare, they become much harder to find with truly original surfaces like these. Population: 51 in 64 (4 in 64+), 8 finer. CAC: 18 in 64, 4 finer (1/18). NGC ID# 5DNV, PCGS# 6966

1871-CC Silver Dollar, AU53 An Early Carson City Rarity

3974 1871-CC AU53 PCGS. CAC. OC-1, High R.4. Early coinage at the Carson City Mint was often dictated by the orders of depositors, who frequently desired their deposits back in the form of bullion bars rather than federal coinage. This contributed to the small mintage of the 1871-CC Seated dollar at just 1,376 pieces, despite the heavy mining operations underway with the Comstock Lode.

Today, the Carson City issues are collectively some of the most challenging With Motto Seated dollars to collect. The 1871-CC is rare in About Uncirculated condition and prohibitively so in Mint State. This CAC-approved AU coin is sharp and brilliant with modest reflectivity in the fields. Only slight high-point wear is visible, and there are no distracting abrasions. Population: 6 in 53, 12 finer (1/18).

From The Property of a Lady. NGC ID# 24ZH, PCGS# 6967

1872-CC Dollar, Unc Details 3,150 Examples Minted

3975 1872-CC — Cleaned — PCGS Genuine. Unc Details. OC-1, High R.3. The desirability of the 1872-CC reflects the issue's ultra-low mintage of 3,150 coins and the fact these coins claim a Western origin. Osburn and Cushing suggest 20 examples survive in all levels of Mint State. Definition is expectedly strong and prooflike reflectivity is obvious. However, both sides are somewhat muted from a cleaning. They have since developed pale golden accents, while remaining mostly untoned.

From The Property of a Lady.

PROOF SEATED DOLLARS

1858 Seated Dollar, PR65+ Beautifully Toned and High-End

3976 1858 PR65+ PCGS. CAC. OC-P1, Low R.4. The 1858 Seated Liberty dollar is a proof-only issue of great desire in the series. No mintage records were apparently kept by the Mint that year, and the *Guide Book* mintage of 210 coins is an estimate. Dick Osburn and Brian Cushing note that most estimates claim a mintage of about 300 pieces. Including possible resubmissions, PCGS and NGC combined list 182 grading events, almost all of which are for non-Cameo coins.

This high-end Gem is among the finest seen by PCGS. The die variety is believed to have struck all original 1858 proofs, plus possible restrikes, with die polishing on the obverse differentiating the two. This piece is unfinished beneath Liberty's chin, suggesting that it is an original 1858 proof. Several stars and the upper edge of the eagle's left (facing) wing are slightly weak, but the coin is otherwise sharp. Deeply mirrored fields showcase beautiful gold, lavender, and ocean-blue toning and are free of bothersome abrasions. Population: 6 in 65 (2 in 65+), 0 finer. CAC: 6 in 65, 0 finer (1/18).

From The Property of a Lady. NGC ID# 252C, PCGS# 7001

1860 Seated Dollar, PR63 Only One Proof Die Pair Known

1860 PR63 PCGS. CAC. OC-P1, R.2. This die pair later struck circulation-issue coins, although the present piece an obvious proof, showing deeply mirrored fields and fully defined central devices. Cameo contrast is absent in favor of satiny luster on the devices and delicate champagne toning overall. Faint hairlines in the fields determine the grade. An appealing No Motto proof in an affordable grade.

From The Property of a Lady. NGC ID# 252E, PCGS# 7003

1861 Seated Liberty Dollar, PR64 Lightly Toned, Reflective Fields

3978 1861 PR64 PCGS. OC-P1, High R.3. A relatively generous mintage of 1,000 proof Seated Liberty dollars was accomplished in 1861, using two different die pairs. This coin represents the OC-P1 variety that shows doubling on the right side of the horizontal shield lines on the obverse. The 1861 is not as easy to locate as its mintage would indicate, so some coins were undoubtedly melted as unsold after the end of the year. This delightful Choice specimen is sharply detailed throughout, with well-preserved surfaces and deeply reflective fields. Low-intensity shades of greenish-gold toning add to the outstanding eye appeal. Population: 26 in 64 (1 in 64+), 9 finer (12/17).

From The Bayside Collection. NGC ID# 252F, PCGS# 7004

1861 Silver Dollar, PR65 Cameo Beautiful Border Toning Among the Finest Cameos at PCGS

1861 PR65 Cameo PCGS. OC-P2, Low R.4. According to Mint records, 1,000 proof Seated dollars were struck in 1861, although perhaps not all were distributed to collectors. This issue is no more plentiful than the lower-mintage proofs of the mid-1860s, and it is arguably scarcer overall. Cameo examples are rare in any grade, and this Gem is among the finest seen by PCGS (1/18).

Two proof die pairs were used in 1861 for this denomination. OC-P2 is second in the emission sequence and arguably struck the more appealing coins, as the recesses around the olive leaves are completely finished. The example offered here displays original toning, with warm golden interiors and deeper violet, plum, and blue borders. Cameo contrast is immediately apparent, and the strike is full. Population: 4 in 65 Cameo, 0 finer (1/18).

From The Property of a Lady. NGC ID# 252F, PCGS# 87004

1862 Seated Dollar, Toned PR63 Scarcer of Two Proof Die Varieties

3980 1862 PR63 PCGS. OC-P1, R.5. OC-P1 is the scarcer of the two proof die pairings for the 1862 Seated dollar, identified by the second line in the first vertical shield strip extending to the second horizontal line. Both varieties included, this issue is elusive in most grades. This glimmering Select example has warm golden toning and sharp design elements. Faint, grade-limiting lines in the fields are hidden by the patina. Quite appealing for the grade.

From The Property of a Lady. NGC ID# 252G, PCGS# 7005

1862 Seated Liberty Dollar, PR64 Vivid Multicolor Toning

3981 1862 PR64 PCGS. OC-P2, High R.3. Only 550 proof Seated Liberty dollars were struck in 1862, using one obverse and two reverse dies. This impressive Choice example exhibits sharply detailed design elements, with a couple of broken leaf ends on the branch, probably the result of foreign matter adhering to the die. The well-preserved surfaces are blanketed in shades of emerald-green, lavender, and violet toning, with reflective fields underneath. Population: 28 in 64, 14 finer (1/18).

From The Sea Cliff Collection. NGC ID# 252G, PCGS# 7005

1863 Seated Dollar, PR64 Deep Cameo Beautifully Toned and Contrasted Only Three Deep Cameos Certified

3982 1863 PR64 Deep Cameo PCGS. CAC. OC-P1, High R.4. Only three Deep Cameo examples of the 1863 proof Seated dollar are reported, all are graded PR64 at PCGS, and only one — the present coin — is endorsed by CAC (1/18). We have never before offered a Deep Cameo example of this issue, and this is the first Deep Cameo known to have appeared at auction since a couple of the others were sold in 2004 and 2005 American Numismatic Rarities auctions. This coin displays full detail and dramatic field-device contrast. Blue and violet cling to the extreme outer peripheries, while the interiors showcase warm orange-gold coloration. The depth of mirroring is outstanding, and eye appeal is superb.

From The Property of a Lady. NGC ID# 252H, PCGS# 97006

1865 Seated Dollar, PR64 Cameo Elusive With Field-Device Contrast

1865 PR64 Cameo PCGS. OC-P2, R.3. This proof die pair has faint die doubling on the lower hem of Liberty's gown as well as on the top of the UNI in UNITED. As a date, the 1865 proof Seated dollar is scarce in Cameo grades and genuinely rare above PR64. This Choice example displays attractive contrast with light golden toning. Splashes of blue and amber-orange appear at the upper reverse. Population: 17 in 64 (2 in 64+) Cameo, 18 finer (1/18). From The Property of a Lady. NGC ID# 252K, PCGS# 87008

1866 Seated Dollar, Toned PR64 First-Year Motto Coin

3984 1866 Motto PR64 PCGS. OC-P2, R.3. The most striking feature is the rich multicolor toning that graces this first-year Motto proof dollar. Melded shades of golden-russet and cobalt-blue cover flashy fields, obscuring contrast against the devices. Two contact marks in the right obverse field define the grade. Osburn and Cushing estimate that 500 of the 725 proofs minted in 1866 survive, making this one of the more accessible issues in this format. NGC ID# 5GDV, PCGS# 7014

1866 Motto Silver Dollar, PR64 Ultra Cameo Well-Preserved With Bold Contrast

3985 1866 Motto PR64 Ultra Cameo NGC. OC-P1, Low R.4. Osburn-Cushing Die State a/a. The date is positioned left with a slight upslope, diagnostic of the OC-P1 die pair. Numerous die lines, lumps, and unfinished areas around the reverse devices confirm the early die stage of the reverse die. This original proof is sharply struck with strong, wide rims and starkly contrasted devices set against glassy-mirrored fields. Faint russet toning deepens at the borders, where blue accents add to the considerable eye appeal. The portrait and raised motifs are silky smooth and thickly frosted. A solitary hair-thin line runs from below Liberty's knee upward to the field between stars 11 and 12. Census: 4 in 64 Ultra Cameo, 8 finer (1/18). NGC ID# 46ES, PCGS# 97014

1867 Seated Dollar, Toned PR64

3986 1867 PR64 NGC. OC-P1, R.3. Gold, olive, russet, and peach are colorations in the reflective fields of this Choice proof, although they are only visible at certain angles. Both sides of the coin are overlayed in olive-gray toning that prevents a Cameo designation. This sharp 1867 proof Seated dollar shows no bothersome contact marks. Higher-grade coins are seldom offered. NGC ID# 252N, PCGS# 7015

1867 Seated Liberty Dollar, PR63 Spectacular Deep Cameo Specimen

3987 1867 PR63 Deep Cameo PCGS. OC-P1, R.3. A well-produced mintage of just 625 Seated Liberty dollars was achieved in 1867 and many examples show strong cameo surfaces. This impressive Select specimen exhibits sharply detailed design elements and deeply mirrored fields that contrast profoundly with the frosty devices to create an intense cameo effect. The lightly marked surfaces show a few highlights of pale gold toning. Population: 2 in 63 (1 in 63+) Deep Cameo, 11 finer (12/17). NGC ID# 252N, PCGS# 97015

1869 Seated Liberty Dollar, PR64 Impressive Deep Cameo Representative

3988 1869 PR64 Deep Cameo PCGS. OC-P3, R.4. Osburn-Cushing Die State a/a. Brilliant except for a barely perceptible lilac-gold sheen on both sides, this impressively contrasted near-Gem proof displays frost-white devices that contrast starkly with waterlike, deep-mirrored fields. A few wayward hairlines in the obverse fields do not diminish the vibrant eye appeal. This is one of only 600 proofs struck in 1869, although the population reports suggest an abnormal survival rate for 1869 proofs — possibly the result of many resubmissions, or misidentified prooflike circulation strikes. The OC-P3 dies struck only proofs, confirmed by www.seateddollarvarieties.com. Population: 9 in 64 (3 in 64+) Deep Cameo, 11 finer (1/18).

Ex: Palm Beach Signature (Heritage, 3/2005), lot 6760. NGC ID# 252R, PCGS# 97017

1871 Silver Dollar, PR65+ Cameo Attractively Toned High-End Example

3989 1871 PR65+ Cameo PCGS. CAC. OC-P1, R.2. Cameo proof 1871 Seated dollars are scarce overall, but Gem-quality pieces are genuinely rare. Between PCGS and NGC, this is one of only two Plus-graded Gem Cameos certified, and is one of only three coins in this grade with a CAC endorsement (1/18). Modest field-device contrast is apparent beneath the dusky tan-gold toning on each side, around which rings of orange-gold and blue border toning can be seen. Any faint, grade-limiting lines in the fields are well-hidden by the patina. High-end proof Seated dollars are in constant demand, particularly with outstanding old-time toning such as is seen here. Population: 4 in 65 (2 in 65+) Cameo, 8 finer. CAC: 3 in 65, 5 finer (1/18).

From The Property of a Lady. NGC ID# 252T, PCGS# 87019

1872 Silver Dollar, PR65 Cameo High-End and Conditionally Rare

3990 1872 PR65 Cameo NGC. CAC. OC-P1, R.2. The 1872 proof Seated dollar is an available date overall, but cameo-contrasted coins are rare. NGC has certified only 30 pieces in all Cameo and Ultra Cameo grades combined, and Gems are in the minority of these. The present coin is one of the two finest Cameos endorsed by CAC. Modest contrast is apparent on each side, warmed by delicate russet-gold toning that deepens toward the borders, with tinges of blue on the outer rims. No distracting marks are seen, and a few faint lines in the fields are not bothersome.

Only one die variety is known for proofs, which shows strong die doubling on IN GOD WE TRUST. This reverse die was later used to strike 1873 proof Seated dollars, and specialists of the series will recognize the familiar doubling on the motto. Census: 5 in 65 Cameo, 6 finer. CAC: 2 in 65, 0 finer (1/18). NGC ID# 252U, PCGS# 87020

1873 Seated Dollar, Lightly Toned PR64

3991 1873 PR64 PCGS. CAC. OC-P1, R.3. In 1873, proof silver dollar coinage consisted of 600 Seated Liberty coins and an equal number of Trade dollars. The Seated Liberty issue is rare in Gem condition with any level of Cameo contrast, and its status as the final issue of the series heightens collector demand. This CAC-approved near-Gem has claims to a Cameo designation on the obverse, but dusky tan-gold reverse toning prevents such from PCGS. Gold, lavender, and blue border toning clings to the outer peripheries on the obverse but makes a wider swath in the left reverse margin. Quite appealing for the grade.

From The Property of a Lady. NGC ID# 252V, PCGS# 7021

TRADE DOLLARS

1875 Trade Dollar, MS64 Type Two Reverse

3992 1875 Type Two Reverse MS64 PCGS. CAC. The Type Two Reverse does not show a berry under the eagle's right (facing) claws. As a date, the 1875 Trade dollar is relatively scarce in Mint State, and coins grading finer than MS64 are rare. This CAC-approved near-Gem displays sharp detail and softly frosted mint luster. Dusky lavender-gray and russet-gold toning graces each side. Population (both reverse types included): 29 in 64 (4 in 64+), 5 finer. CAC: 9 in 64, 4 finer (1/18). NGC ID# 2534, PCGS# 40107 Base PCGS# 7037

1877-S Trade Dollar, MS65 Semiprooflike Reverse

3993 1877-S MS65 PCGS. Large S. The 1877-S is an available type coin issue, although Gems are conditionally scarce and finer pieces are rare. This coin is sharp and luminous, showing frosty surfaces with golden toning. At certain angles, tinges of deeper peach and violet appear at the borders. The reverse fields are semiprooflike. An eye-appealing, high-end example of the issue. Population: 36 in 65 (5 in 65+), 8 finer (1/18). NGC ID# 253E, PCGS# 7046

1877-S Trade Dollar, Frost-White Gem FS-802, Die Doubled Reverse

3994 1877-S Doubled Die Reverse, FS-802, MS65 PCGS. CAC. Large S. The reverse is lightly die doubled, most prominently on TRADE and 420. The variety is undesignated on the PCGS insert. A wisp of gold patina visits this highly lustrous Gem. The strike is full, unusual for the series, with crisp definition on the eagle's legs and Liberty's hair. A few delicate obverse field marks are noted, mostly near the branch stem, but the reverse is virtually immaculate. Though the 1877-S has the highest mintage of the series, examples of the present extraordinary quality are subject to strong demand from type set collectors. Population: 36 in 65 (5 in 65+), 8 finer. CAC: 13 in 65, 4 finer (1/18).

Ex: FUN Signature (Heritage, 1/2013), lot 4620. NGC ID# 253E, PCGS# 145810 Base PCGS# 7046

PROOF TRADE DOLLAR

1877 Trade Dollar, PR65 Only 510 Examples Struck

3995 1877 PR65 NGC. Only 510 proof Trade dollars were struck in 1877 and high-grade examples are rare in today's market. This impressive Gem exhibits sharply detailed design elements, aside from some stars on the right, and deeply reflective fields, under shades of lavender-gray, cerulean-blue, and greenish-gold toning. Census: 14 in 65 (1 in 65★), 9 finer (1/18). NGC ID# 27YN, PCGS# 7057

MORGAN DOLLARS

1878 Morgan Dollar, MS66 Eight Tailfeathers, VAM-6, 'Pin in Eyelid'

3996 1878 8TF Pierced Eyelid, VAM-6, MS66 PCGS. A well-struck Premium Gem with bright semiprooflike surfaces. The fields are exceptionally undisturbed. Both the obverse and reverse are diedoubled, most notably on E PLURIBUS UNUM and the wreath leaves. The obverse border has multiple wispy die cracks. The reverse displays several lengthy curved and raised die scratches in the fields. A few raised spike-like lines (as-made) are noted from the rim below the R in DOLLAR. These mint-made irregularities attest to the travails of the Philadelphia Mint as it struggled to produce silver dollars in sufficient quantity to satisfy the Bland-Allison Act. Population (all varieties): 86 in 66 (4 in 66+), 2 finer (12/17).

Ex: FUN Signature (Heritage, 1/2003), lot 7756.

1878 Morgan Dollar, MS66 8TF, Diagonal in 8, VAM-17

3997 1878 8TF Diagonal In 8, VAM-17, MS66 PCGS. Ex: California Collection. A diagonal die chip in the bottom loop of the first 8 in the date identifies the popular VAM-17. This first-year Premium Gem Morgan dollar exhibits the eight tailfeathers design, which was struck early in the year and had slightly higher relief than the other 1878 varieties. The design elements are well-detailed and the lustrous surfaces show no mentionable distractions. Population: 2 in 66, 0 finer (1/18). NGC ID# 253H, PCGS# 133818 Base PCGS# 7072

1878 Morgan Dollar, VAM-33, MS66 7/8 Tailfeathers, Doubled Legs

3998 1878 7/8TF Doubled Legs, VAM-33, MS66 PCGS. Clashing occurs before Liberty's portrait, the two stars right of the date are doubled, and four weak tailfeathers emerge from the primary seven. Perhaps the most dramatic feature is broad doubling on the eagle's legs. Discovered in 2004, this variety is rated R.6 by VAMWorld.com This Premium Gem here may very well be one of the finest examples extant. This frosty first-year Morgan dollar has untoned interiors that meld with blended hues of gold, magenta, and cobalt-blue at the borders. Well-struck and among the highest-graded for any variety at PCGS (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2TY3, PCGS# 134032 Base PCGS# 7074

1878 Morgan Dollar, MS66+ 7TF, Reverse of 1878

3999 1878 7TF Reverse of 1878 MS66+ PCGS. The Morgan dollar design was introduced in 1878 and the recently passed Bland-Allison Act mandated the production of an unprecedented number of silver dollars each year. The first reverse design, with eight tailfeathers on the eagle, was deemed unsuitable because its high relief made preparing enough dies to strike the required number of coins impractical. Accordingly, in March, Mint Director Henry Linderman ordered new dies prepared, with seven tailfeathers and slightly lower relief. The new dies were ready by April and the Philadelphia Mint struck a total of 9.75 million coins of the new design by the end of the year.

Two major varieties are known for the seven tailfeathers variety. This coin represents the Reverse of 1878, with a parallel top arrow fletching. A delightful Plus-graded Premium Gem, this piece exhibits razor-sharp definition on all design elements and the well-preserved surfaces radiate vibrant mint luster on both sides. A few hints of lime-green and turquoise toning enhance the terrific eye appeal. Population: 58 in 66 (8 in 66+), 0 finer (1/18). NGC ID# 2TY3, PCGS# 7074

1878 Morgan Dollar, MS66 ★ Reverse of 1878, Seven Tailfeathers

4000 1878 7TF Reverse of 1878 MS66 ★ NGC. VAM-130C1. This Premium Gem Morgan dollar from the inaugural year of issue has seven tailfeathers, a parallel top fletching, and a short nock (middle arrow shaft). Liberty's nostril is weak, and die lines appear within the R and Y in LIBERTY. The surfaces are nearly pristine, with a single graze above the nose in the field. Not a lick of toning is present, and the motifs are fully struck. Census: 28 in 66 (1 in 66+, 1 in 66★), 1 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2TY3, PCGS# 7074

1878 Morgan Dollar, Bright MS66 Seven Tailfeathers, Reverse of 1879

4001 1878 7TF Reverse of 1879 MS66 PCGS. The final design type for the first year of Morgan dollar production features a rounded breast, seven tailfeathers, and a slanted top arrow feather instead of a parallel one. Examples are collectible through Gem condition, but the issue becomes conditionally rare at this level. Brightly frosted silver surfaces yield occasional blushes of gold over the portrait and upper reverse. Detail is good despite a slightly incomplete strike, explaining the presence of faint roller marks across each side. Marvelously preserved. Population: 26 in 66, 1 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 253L, PCGS# 7076

1878-CC Morgan Dollar, MS66+ Beautiful Border Toning

4002 1878-CC MS66+ PCGS. CAC. This high-end first-year Carson City Morgan displays blazing frosted mint luster and beautifully preserved surfaces. The interiors are brilliant, surrounded by vivid amber, violet, and blue border toning. The eagle's talons are poorly struck, but the design elements are otherwise sharp. PCGS lists only six finer representatives (1/18). NGC ID# 253M, PCGS# 7080

1878-S Morgan Dollar, Frosted MS67 None Finer at NGC

4003 1878-S MS67 NGC. An estimated 600,000 1878-S Morgan dollars were distributed during the Treasury release of 1962-1964, accounting for the issue's survival rate. That said, Superb Gems are rare and a single PCGS-graded coin is known finer. This piece ranks among the top examples at NGC along with 34 other submissions (1/18). Enjoying all-brilliant, marvelously preserved surfaces and razor-sharp design detail, it also boasts noticeable semiprooflike contrast.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 253R, PCGS# 7082

1878-S Morgan Dollar, MS67 Extremely Rare in Finer Grades

4004 1878-S MS67 PCGS. From a large mintage of 9.7 million pieces, the 1878-S Morgan dollar represents the first year of the design. This spectacular Superb Gem offers sharply detailed design elements and virtually flawless creamy surfaces, with vibrant mint luster on both sides. Population: 35 in 67 (2 in 67+), 1 finer (1/18). NGC ID# 253R, PCGS# 7082

1879-CC Morgan Dollar, MS64 Normal Mintmark, Attractive Surfaces

4005 1879-CC MS64 NGC. Ex: Goshen Collection. Normal Mintmark. Although the mintage was low (just 756,000 pieces struck), the 1879-CC is generally well-produced — particularly those examples with the Normal Mintmark. This Choice Uncirculated piece is no exception. The lustrous fields combine satiny and semireflective characteristics, framed by vibrant orange toning at the margins that cede to ivory-gold interiors. The central motifs are frosted and sharply struck. Light marks include a few faint, angled striations from the dies, easily missed amid the strong mint luster that covers both sides. NGC reports just 44 finer examples (1/18). NGC ID# 253U, PCGS# 7086

1879-CC Dollar, MS65 Frosty Motifs, Normal Mintmark

4006 1879-CC MS65 NGC. Despite a mintage that exceeds several other Carson City Morgan dollars (756,000 coins), the 1879-CC is the secondmost challenging issue from that facility after the 1889-CC. It is the first real key date in the series, examples of which are seldom found in high grades. In fact, the average certified survivor falls just shy of XF45. This piece is a full 20 grade points higher. It would also be nearly impossible to upgrade. There are merely two better examples at NGC and four more at PCGS (1/18).

Liberty's portrait, the eagle, and the surrounding motifs are well-detailed and frosted, producing a degree of contrast against the untoned fields. There is just a bit of softness at the lower obverse and over the extreme centers. Chatter is limited to the lower-left obverse quadrant, namely the bust truncation and chin.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 253U, PCGS# 7086

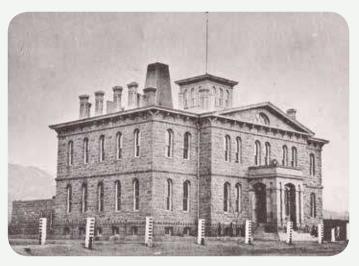

1879-CC GSA Dollar, MS62 Lustrous and Brilliant

4007 **1879-CC GSA MS62 NGC.** The lustrous surfaces are brilliant aside from a couple of small and unobtrusive gray areas on the eagle. The obverse exhibits no more than the expected quantity of minor abrasions. This semikey Carson City dollar is band-certified in the black GSA holder of issue. Offered with a GSA box. Ex: Houston Signature (Heritage, 11/2012), lot 4648. NGC ID#

253T, PCGS# 518848 Base PCGS# 7086

The Carson City Mint circa 1879.

1879-CC GSA Dollar, Brilliant MS64 High-Grade Carson City Semikey

4008 1879-CC GSA MS64 NGC. VAM-4. The 1879-CC is the first truly scarce issue in the Morgan dollar series. With the exception of the 1889-CC, no other Carson City dollar commands as much collector attention. Just 756,000 pieces were struck at the Nevada mint, which lacked the silver bullion necessary to strike more. This is an essentially brilliant, frost-white example with lustrous and smooth surfaces and a crisp strike. Tinges of golden-gray toning make a brief appearance along the obverse margin at UNUM. Marks are limited to a few light luster grazes and pinprick marks.

The VAM-4 variety is well-represented among the GSA survivors, discovered by Leroy Van Allen in May, 1973. The mintmark is shifted far to the left and recut slightly on the inside curve of the second C. A long, spikelike die line extends downward from the underside of Liberty's nose. A large die chip fills the junction at the outer-left loops of 8 in the date. This near-Gem example is band-certified by NGC and remains in its original GSA holder of issue. Census: 108 in 64 (8 in 64+, 1 in 64*), 9 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 253T, PCGS# 518848 Base PCGS# 7086

1879-CC Dollar, MS61 Prooflike VAM-3, Capped Die

4009 1879-CC Capped Die, VAM-3, MS61 Prooflike PCGS. A Top 100 Variety. Also known as the Large over Small CC mintmark, the initial small mintmark was partially tooled away, leaving rough spots that resemble die rust. Then the larger CC mintmark was punched, creating a distinctive, unmistakable appearance. The obverse of this example has mirrored fields with a ring of peripheral gold around otherwise brilliant silver surfaces. The reverse is also prooflike beneath gold and blue toning. Trivial grade-consistent marks are evident on both sides. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC VAM-3 Dollar, MS62 The Capped Die Top 100 Variety

4010 1879-CC Capped Die, VAM-3, MS62 PCGS. An essential piece of the Top 100 VAM variety collection, the Capped Die issue is in constant demand in all grades. This example is well-struck and brilliant, showing satiny mint luster with a few abrasions on Liberty's cheek that limit the grade. The fields are better-preserved. This variety is believed to be a CC/CC mint alteration and is listed in the *Guide Book* as such. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC Dollar, Choice Uncirculated Capped Die, VAM-3, Rare Any Finer

4011 1879-CC Capped Die, VAM-3, MS64 PCGS. A Top 100 Variety. The 1879-CC Capped Die Morgan dollar is an elusive issue in better Mint State grades. The Choice Uncirculated example that we offer here displays bright surfaces that are free of all but the most trivial bagmarks. An otherwise strong strike softens slightly over the central obverse, but the overall eye appeal is undiminished. PCGS reports 14 finer submissions (1/18).

Ex: Long Beach Signature (Heritage, 9/2003), lot 8708.

1879-O Dollar, MS65+ First New Orleans Morgan

4012 1879-O MS65+ PCGS. Ex: California Collection. The New Orleans Mint reopened in 1879, mainly to help coin all the silver dollars mandated by the Bland-Allison Act. This Plus-graded Gem displays a sharp strike for a New Orleans issue, with little blending in the hair strands over Liberty's ear. The well-preserved brilliant surfaces radiate vibrant mint luster, with outstanding eye appeal. PCGS has graded 26 numerically finer examples (1/18). NGC ID# 253X, PCGS# 7090

1879-O Dollar, MS66 One of The Finest Coins Extant

4013 1879-O MS66 NGC. In the fifth edition of his *Guide Book of Morgan Silver Dollars* (2016), Dave Bowers estimates 220,000 to 350,000 1879-O dollars survive in MS60 to MS62 condition, another 15,000 to 25,000 in MS63, and 5,000 to 8,000 in MS64. The population dwindles to 450 to 700 pieces at the Gem grade level, and the issue becomes conditionally rare in MS66. Probably no more than 25 to 30 such pieces exist. Consequently, we expect to see spirited bidding from Registry Set participants and other advanced collectors of this ever-popular series.

Both sides are almost completely brilliant. The only exception are two arcs of golden color near E PLU and below ONE. Satin mint luster glistens over well-struck devices, qualities that, unlike most other New Orleans products, are often found on 1879-O dollars. Uncharacteristic is the lack of bagmarks. There are just a couple of superficial luster grazes in the left obverse field and some minor chatter above IN GOD. Census: 7 in 66, 0 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 253X, PCGS# 7090

1880-CC Dollar, MS66+ VAM-6, 8 Over Low 7

4014 1880-CC 8 Over Low 7, VAM-6, MS66+ PCGS. A Top 100 Variety. This strong overdate variety shows the underlying 7 set low in relation to the 8. The present example is among the finest non-Prooflike pieces at PCGS. Frosty, brilliant mint luster forms a radiant cartwheel effect. The reverse is pristine, and the only has only a few microscopic surface grazes. Well-struck design elements complete the eye appeal. Population: 70 in 66 (8 in 66+), 8 Prooflike and Deep Mirror Prooflike coins finer (1/18). NGC ID# 2542, PCGS# 133878 Base PCGS# 7104

1880-CC Dollar, MS67 None Graded Higher

4015 1880-CC MS67 NGC. Demand for high-grade Carson City material is strong across all denominations and series, but Morgan dollars in particular seem to capture the hearts and mind of collectors. Part of what makes high-end Nevada mint Morgans so interesting are the numerous forces that work to influence their availability and collectibility. For example, many issues, like the 1880-CC, have low mintages. But they were often also widely held in storage through the mid-20th century. Essentially, relatively few coins were made, a high proportion of them survive, but even that sizeable number is insufficient to fully satisfy demand. In the case of the 1880-CC, examples are widely available through the mid-Uncirculated grade levels. Even Premium Gems are reasonably collectible. However, MS67 representatives are rare and highly sought-after. This piece offers good detail with limited softness on the eagle's breast, which shows faint roller marks. Frosty surfaces are brilliant with a single splash of pale gold color behind the portrait. Census: 23 in 67 (1 in 67+), 0 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2542, PCGS# 7100

1880-CC GSA Dollar, Exceptional MS66

4016 1880-CC GSA MS66 PCGS. VAM-3. A delightful Premium Gem Morgan dollar from the famous GSA Hoard, this piece exhibits well-detailed design elements, with just a touch of the usual softness on the hair above the ear. The impeccably preserved brilliant surfaces radiate vibrant mint luster and eye appeal is outstanding. The VAM-3 was discovered by Walter Breen in 1964 and is identified by the "dash" under the second 8 in the date. No cardboard box or certificate included. NGC ID# 2542, PCGS# 518851 Base PCGS# 7100

1880-O Morgan Dollar, MS65 Rare, Among the Finest at NGC

4017 1880-O MS65 NGC. The 1880-O is a major condition rarity among Morgan dollars of this decade, being plentiful in MS64, very scarce in MS65, and almost unknown finer. Q. David Bowers writes in A Guide Book of Morgan Silver Dollars, fifth edition, "Luster varies from satiny to 'greasy,' but is generally satisfactory." This Gem example shows luster that is vibrant and softly frosted, being devoid of toning and all but the most trivial surface imperfections. Slight strike weakness above Liberty's ear is normal for the issue but hardly noticeable on this piece. The Gem population at NGC includes only 25 non-Prooflike coins and one Prooflike piece, with none finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2543, PCGS# 7114

1880-S Morgan Dollar, MS68 Prooflike Registry Set Contender

4018 1880-S MS68 Prooflike PCGS. CAC. A magnificent MS68 representative of this popular Morgan dollar type issue, with virtually pristine surfaces that feature deeply reflective fields and sharply detailed, richly frosted design elements. A few subtle hints of golden-tan toning are evident at certain angles and the overall eye appeal is terrific. Population: 21 in 68 (2 in 68+) Prooflike, 1 finer. CAC: 5 in 68, 0 finer (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2544, PCGS# 7119

1881-CC Morgan Dollar, MS67 Very Rare Any Finer

4019 1881-CC MS67 PCGS. CAC. The 1881-CC Morgan dollar claims a small mintage of 296,000 pieces, but approximately half that total was preserved in government storage until the great Treasury releases and GSA sales of the 1960s and 1970s. This delightful Superb Gem exhibits sharply detailed, frosty design elements and virtually pristine surfaces that radiate vibrant mint luster throughout. PCGS has graded four numerically finer examples (1/18). NGC ID# 2549, PCGS# 7126

1881-CC Morgan Dollar, MS67+ Impeccably Preserved Lustrous Surfaces

4020 1881-CC MS67+ PCGS. CAC. Equipment problems and a scandal involving key Mint personnel combined to limit Carson City Mint coinage operations to just six months in 1881. As might be expected, production totals were quite small for all denominations that year, and only 296,000 Morgan dollars were struck. Most of the coins were not needed in the national economy of the time and the majority of the mintage was stored in government vaults until the 1950s. The 1881-CC was seldom available in the first half of the 20th century and the low mintage caused contemporary numismatists to believe the coins were rare, increasing collector demand and prices to artificially high levels. The situation changed with the Treasury releases of the 1960s, when a number of bags were released. Then the news broke that nearly half the original mintage was still being held in government storage, and years later they were offered in the GSA sales of the 1970s. Fortunately, collector interest in Morgan dollars grew substantially in those years, and enough new collectors emerged to absorb the outpouring of fresh coins without severely reducing the price. Interest in the issue has continued to grow in recent years.

The 1881-CC was a well-made issue and this Plus-graded Superb Gem is an outstanding representative, with razor-sharp definition on the richly frosted design elements and virtually pristine brilliant surfaces. Vibrant mint luster radiates from both sides, enhancing the incredible eye appeal. This coin should find a home in the finest collection or Registry Set. PCGS has graded four numerically finer examples (1/18). NGC ID# 2549, PCGS# 7126

1881-CC GSA Dollar, Frosty MS67 Among the Finest GSA Coins Known

4021 1881-CC GSA MS67 NGC. The General Services Administration sales of the 1970s dispersed more than 147,000 1881-CC Morgan dollars, or about half of the 296,000-coin mintage. This is a plentiful issue as a result, but it is conditionally elusive at the Superb Gem level. Coins this fine remaining in their original GSA plastic holders are rare. The present example is one of finest known in a GSA holder. It yields frosty, vibrant cartwheel luster that is free of even minor abrasions. The strike is also sharp, even on the eagle's talons, and the eye appeal is outstanding. GSA dollars are common with heavy bagmarks. Any Carson City coin in GSA plastic is a great rarity at this condition level. Census: 35 in 67 (3 in 67+, 1 in 67★), 0 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2547, PCGS# 518863 Base PCGS# 7126

1882 Dollar, MS67 Among the Finest Known A Registry Set Essential

4022 **1882 MS67 NGC.** One look at this high-end 1882 dollar and collectors will know how an MS67 Morgan is supposed to appear — there is a striking lack of even minor abrasions and no shortage of "pop." Vibrant, frost-white luster rolls across the eye-catching fields and sharp devices, producing visual appeal that is almost not attainable on lower-grade coins. NGC and PCGS combined have seen only 19 pieces in this grade and none finer. Census: 9 in 67 (1 in 67 ★), 0 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254A, PCGS# 7132

1882-CC Morgan Dollar, MS67 Frosty Carson City Type Coin

4023 1882-CC MS67 PCGS. Superb Gem examples of the 1882-CC Morgan dollar are scarce. PCGS has graded one non-Prooflike coin finer than this piece, plus two more MS67s in Prooflike and Deep Mirror Prooflike (1/18). This piece is frost-white, showing sharp design elements and unabraded surfaces. The eye appeal is exceptional. Population: 88 in 67 (3 in 67+), 3 finer (1/18). NGC ID# 254S, PCGS# 7134

1882-CC GSA Dollar, MS67 Tied for the Finest at NGC

4024 1882-CC GSA MS67 NGC. In the early 1970s, the General Services Administration distributed 2.9 million Carson City Morgan dollars, including more than 600,000 examples dated 1882. NGC has certified nearly 23,000 of these in all grades, yet only 17 examples have achieved the MS67 grade, including 2 graded MS67 ★ (1/18). While the numbers released are staggering, the lack of examples in the highest grade is telling. This impressive Superb Gem exhibits brilliant silver luster and frosty texture with nearly flawless silver surfaces and incredible eye appeal. A delightful example for the connoisseur. NGC ID# 254H, PCGS# 518866 Base PCGS# 7134

1882-O/S Dollar, MS64+ PCGS VAM-4, Strong O/S Feature

1882-O/S VAM-4, Early Die State, MS64+ PCGS. CAC. PCGS has identified this as the "Strong" version of the O/S overmintmark variety, and it is more specifically identified as VAM-4. This example is the rare early die state, per the information at www. vamworld.com, the go-to website for collectors of Morgan and Peace dollar varieties. The obverse displays a crescent of violet and iridescent toning from 6 to 10 o'clock and is otherwise brilliant with satin luster. The satiny reverse is also brilliant, lustrous, and untoned. PCGS has certified 20 examples of this variety (Strong O/S) as MS64+ and only two finer MS65 examples (1/18). From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# CVKK, PCGS# 133892 Base PCGS# 7138

1884 Morgan Dollar, MS68 Registry Set Essential

4026 1884 MS68 PCGS. CAC. To satisfy the demands of the Bland-Allison Act, the Philadelphia Mint produced a huge mintage of more than 14 million Morgan dollars in 1884. Accordingly, the 1884 is a plentiful issue in most grades today, but few examples can match the outstanding quality and eye appeal of this magnificent MS68 example. Razor-sharp definition is evident on all design elements and the impeccably preserved surfaces radiate vibrant mint luster from both sides. The surfaces are essentially brilliant, but a few subtle highlights of golden-tan and lavender toning appear at selected angles. PCGS has graded only three examples in this exalted grade, with none finer, while NGC has certified two coins in MS68, also with none finer (12/17). This coin should find a home in the finest collection or Registry Set.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254L, PCGS# 7150

1884-CC Morgan Dollar, MS67 Prooflike Spectacular Branch Mint Type Coin

4027 1884-CC MS67 Prooflike NGC. This spectacular Superb Gem Morgan dollar exhibits impeccably preserved surfaces with deeply reflective prooflike fields and sharply detailed frosty design elements. Strong field/device contrast is evident and a few subtle wisps of pale gold toning show at selected angles. Eye appeal is tremendous. Census: 9 in 67 (1 in 67+★) Prooflike, 0 finer (1/18). From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254M, PCGS# 7153

1884-S Morgan Dollar, MS62 Seldom Encountered in Mint State

4028 1884-S MS62 NGC. The 1884-S Morgan dollar is an enigmatic issue, with a reported mintage of 3.2 million pieces. Despite the more-than-adequate production total, and a plentiful number of circulated examples in today's market, the 1884-S is quite elusive in all Mint State grades. Certainly, few high-quality examples were saved by contemporary collectors, and it may be that most of the coins held in government storage were among those melted under the Pittman Act in 1918. Collector interest was never very high in the early 20th century and only peaked after no large number of coins emerged during the Treasury releases of the 1960s. Today, the 1884-S is recognized as an elusive key to the series in high grade.

The coin offered here is a sharply detailed MS62 example, with lightly marked brilliant surfaces and radiant mint luster on both sides. Overall eye appeal is quite strong for this elusive Mint State issue. NGC has graded 61 numerically finer examples (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254P, PCGS# 7156

1884-S Morgan Dollar, MS63 Surprisingly Elusive in High Grade

4029 1884-S MS63 NGC. Despite an adequate mintage of 3.2 million pieces, the 1884-S Morgan dollar is surprisingly difficult to locate in all Mint State grades today. The elusive nature of the 1884-S in high grade was not appreciated until recent times and the issue has been somewhat neglected historically. Circulated specimens have always been available, and a number of bags were paid out from government storage in the first half of the 20th century, but collector interest was low, and few examples remained in numismatic hands after they were released. Nevada casinos may have been the most common destination of the coins released in this manner. It also seems likely that many coins were melted in 1918, under the provisions of the Pittman Act. In any case, the 1884-S was not well-represented in the Treasury releases of the 1960s, and numismatic interest in high-grade specimens has increased considerably since that time.

The present coin is an impressive Select example, with lightly marked, lustrous surfaces, under medium-intensity shades of lavender-gray and golden-tan toning. The design elements are well-detailed, with just a trace of softness on the usual trouble spots, like the hair above the ear. Altogether, a most attractive specimen of this important key issue. Census: 46 in 63, 15 finer (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254P, PCGS# 7156

1885-CC Dollar, MS67 Just One Finer Coin at PCGS

4030 1885-CC MS67 PCGS. The 1885-CC is scarcer than its three immediate Carson City predecessors, and only the most advanced collections will include a Superb Gem. This wholly untoned MS67 dollar would be ideal for Registry Set purposes. Entirely untoned surfaces are brightly frosted and nearly mark-free. The devices are well-detailed. Housed in an old green label holder. Population: 92 in 67 (4 in 67+), 1 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254S, PCGS# 7160

1885-O Dollar, Top-Graded MS68

4031 1885-O MS68 NGC. October 1962 saw the beginning of a massive release of New Orleans Morgan dollars from Philadelphia Mint vaults. This explains the widespread availability of the 1885-O and its two immediate predecessors. Coins survive in relatively large numbers through MS67, but the issue becomes very rare at the esteemed MS68 level. Brilliant and fully struck, this Superb Gem is virtually flawless. Faint specks of russet color appear on each side. Census: 11 in 68 (1 in 68 ★), 0 finer (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254T, PCGS# 7162

1886 Silver Dollar, MS68 Among the Finest Known A Brilliant, Vibrant Type Coin

4032 1886 MS68 NGC. The 1886 Morgan dollar is often seen with somewhat dull luster. Despite being a common date from a nearly 20 million-coin mintage, it is rarely encountered with the combination of surface quality and attractive luster demanded by the lofty MS68 grade level. This piece, fully brilliant and seemingly pristine, is an important find. The luster is satiny but impressively vibrant and unblemished. Well-struck central devices confirm this as one of the finest-known 1886 Morgans. Census: 31 in 68 (3 in 68+, 2 in 68 ★), 0 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254V, PCGS# 7166

1886-O Dollar, MS64 Uncollectible Any Finer

4033 1886-O MS64 PCGS. Ex: Cajun. Mintages and availability are not always correlated. Such is the case for the 1886-O, with a mintage of 10.7 million coins. A few million were used commercially at the time at issue, and the rest were likely melted under the terms of the 1918 Pittman Act. High-grade survivors are exceedingly scarce. This well-struck near-Gem is almost entirely brilliant, save for a vertical splash of golden-russet toning across the cheek and under the chin. Satiny surfaces are minimally marked. Only three finer coins at PCGS (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254W, PCGS# 7168

1886-S Silver Dollar, MS66 Brilliant Satin Luster

4034 1886-S MS66 NGC. Planchet production left parallel drawing lines on the surface that affected the strike on Liberty's cheek and the hair over the ear on this otherwise boldly defined and highly attractive San Francisco Mint dollar. A lovely Premium Gem, this piece has brilliant luster and untoned satin surfaces. Census: 17 in 66, 3 finer, including one MS66 Prooflike (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254X, PCGS# 7170

1887/6-O Dollar, MS64 VAM-3, Popular *Guide Book* Variety

4035 1887/6-O VAM-3 MS64 PCGS. CAC. A Top 100 Variety. Incredibly clean, untoned fields are the first thing that stand out about this terrific Choice Uncirculated dollar, followed by its vibrant satin luster. Several minor marks are seen on the devices, but none are individually noteworthy. While both sides are a trifle soft, the overall appeal is even greater than the grade suggests, hence the CAC approval sticker. PCGS reports only a single finer example (1/18).

Ex: FUN Signature (Heritage, 1/2003), lot 8006.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

1887-O Morgan Dollar, MS66 Registry Grade Example

4036 1887-O MS66 PCGS. Ex: Jack Lee 2. The 1887-O Morgan dollar claims a large mintage of 11.5 million pieces, making it an available issue in absolute terms, but few survivors can match the quality and eye appeal of the present coin. Unfortunately, the 1887-O was not a well-produced issue and most examples seen tend to have weak strikes and lackluster surfaces. A number of coins were released into circulation at the time of issue and the 1887-O can be located in circulated grades with no difficulty. A significant portion of the mintage was held in government storage, and the 1887-O was released in bag quantities at intervals over the years, but these coins were often handled roughly during storage and the typical Uncirculated specimen exhibits numerous bagmarks and luster grazes. The 1887-O is a prime condition rarity above the MS65 grade level.

This spectacular Premium Gem exhibits well-detailed design elements that show just a trace of the usual blending on the hair strands above Liberty's ear. The well-preserved surfaces display a few subtle hints of lavender and golden-tan toning at selected angles and unusually vibrant mint luster adds to the outstanding eye appeal. Population: 14 in 66, 0 finer (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2547, PCGS# 7176

1887-S Morgan Dollar, MS66 Nearly Unsurpassed Quality

4037 1887-S MS66 PCGS. Ex: M.J.O. Strongly detailed relief elements appear on each side, including the central hair strands and eagle's feathers. The obverse shows daubs of bluish-green, crimson, and golden color around untoned interiors, while the reverse maintains complete brilliance. A thickly frosted Premium Gem of nearly unsurpassed technical quality. Population: 33 in 66 (3 in 66+), 1 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2554, PCGS# 7180

1880-O Morgan Dollar, MS63+ Vam-1B4, Scarface

4038 1888-O Scarface, VAM-1B4, MS63+ PCGS. CAC. A Top 100 Variety. The obverse die is heavily cracked from the rim at 10 o'clock to Liberty's nose, across the face, and along the neck to the lower hair curls. This the latest of four documented die states for the Scarface variety. The early die states, identified as VAM-1B1 and VAM-1B2, were struck before the crack crossed Liberty's nose and cheek, and those die states command little premium. However, the two later states, VAM-1B3 and VAM-1B4, have the die crack entirely across Liberty's cheek, and they are prized by advanced Morgan dollar specialists.

This Select Mint State example has the heavy die crack in its most advanced state. Both sides are lightly marked as expected, with brilliant and frosty silver luster. Peripheral gold and blue toning adds to the exceptional eye appeal of this piece. Population: 25 in 63 (5 in 63+), 3 finer. CAC: 4 in 63, 2 finer (1/18). NGC ID# 2556, PCGS# 133918 Base PCGS# 87184

1889-CC Dollar, AU53 Always a Collector Favorite

4039 1889-CC AU53 PCGS. The 1893-S and the 1895 (if one counts the proof-only issue) are the only two Morgan dollars more difficult to locate in general than the 1889-CC. Demand is always strong, given the low mintage of 350,000 coins and the Carson City origin — arguably the most popular branch mint among collectors. Minimally circulated and virtually untoned, this pleasing key date shows partial luster shining from the recesses. Thin marks are normal for the grade. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Partially Reflective AU55

4040 1889-CC AU55 NGC. This piece may have been among the many thousands of 1889-CC Morgan dollars paid out into circulation in the 19th century, although it circulated less extensively than most. The Choice AU surfaces retain sharp detail and remnants of prooflike mirroring in the fields. Each side has delicate golden tinting over problem-free surfaces. About Uncirculated examples of the 1889-CC Morgan are in high demand due to the scarcity and cost of Mint State coins. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, AU55+ Most Elusive CC-Mint Morgan

1041 1889-CC AU55+ PCGS. The Carson City Mint was dormant for three years before being reactivated in July of 1889. Unfortunately, the Mint's physical plant was in disrepair and key members of the staff, including the superintendent, had to be replaced. Carson City undertaker Samuel C. Wright was quickly appointed to the superintendent position, but repairs to the building's structure and replacing and repairing old equipment delayed coinage operations until October 10. After that, a small mintage of 350,000 Morgan dollars was achieved in the short period before the end of the year.

A portion of the mintage was released into circulation at the time of issue and the coins served their purpose admirably in the hard-money economy of the Western United States. The 1889-CC is found most often in circulated grades today. While a number of coins were undoubtedly placed in government storage in the early years, the majority of those pieces was probably melted in 1918, as a consequence of the Pittman Act. No large number of coins was ever released from Treasury holdings, and only a single example was offered in the GSA sales of the 1970s. Today, the 1889-CC is the most elusive Morgan dollar from the Carson City Mint and an in-demand key to the series.

This Plus-graded Choice AU specimen shows just a touch of actual wear on the well-detailed design elements and the lightly abraded surfaces retain significant traces of original mint luster. The overall presentation is most attractive for this sought-after branch mint issue. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, Unc Details Seldom Encountered Branch Mint Key

4042 1889-CC — Cleaned — PCGS Genuine. Unc Details. This low-mintage key Morgan dollar shows no actual wear on the well-detailed design elements, but the lightly marked surfaces have an unnatural sheen that indicates a light cleaning in the past. This coin retains significant amounts of original mint luster, despite the dampening effects of the noted cleaning. The overall presentation is still attractive for this elusive branch mint issue.

Mint Engraver George T. Morgan

1889-CC Morgan Dollar, MS61 Lightly Toned, Minimal Marks Rare VAM-2A Variety

4043 1889-CC MS61 NGC. VAM-2A. The 9 in the date is set higher than the other numerals on this R.6 variety. The N is clashed at Liberty's neck, and numerous interesting die cracks appear throughout the legends. The 1889-CC has long held its position as the most famous Morgan dollar from the Carson City Mint and the second-rarest issue in the series after the 1893-S. This key date saw widespread circulation, experienced heavy melting, and more recently has been the target of counterfeiters. Genuine Uncirculated survivors are very scarce. They often display myriad abrasions and overly bright surfaces, but this piece is a delightful exception. Each side is softly frosted with dappled gold, crimson and gunmetal patina around the peripheral areas. Wispy marks occur in the fields, but Liberty's cheek is clean. Soft over the centermost areas, yet strongly defined everywhere else.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, MS61 Challenging Branch Mint Issue

1889-CC MS61 PCGS. The Carson City Mint was used as an assay office and storage facility from 1886-1888, but no coins were struck during this time period. The facility was reactivated in 1889, but necessary structural repairs, machinery updates, and personnel replacement delayed the commencement of coinage operations until October 10. Due to the short period of operations, only 350,000 Morgan dollars were struck before the close of the year. Some coins were released into circulation at the time of issue, and the 1889-CC can be found in circulated grades with a little patience. Many of the coins held back in government storage were probably melted under the provisions of the Pittman Act in 1918. Small quantities were paid out over the years, but only a single coin was still in government custody by the time of the GSA sales of the 1970s. Today, the 1889-CC is the rarest Morgan dollar from the Carson City Mint.

The present coin is an attractive Mint State specimen, with sharply detailed design elements and vibrant mint luster throughout. The surfaces are minimally marked for the grade and display highlights of pale gold toning. Overall eye appeal is quite strong. NGC ID# 2559, PCGS# 7190

1889-O Dollar, MS66 Surprisingly Rare at This Level Finest at Both Services

4045 1889-O MS66 NGC. Carson City coinage from this year tends to overshadow all other Morgan dollar issues. That is not exactly a surprise, considering the 1889-CC is one of the keys to the series in all grades. Additionally, the 1889-O was produced in prodigious quantities and fails to distinguish itself as a anything other than a plentiful date in most grades. However, Gems are exceedingly scarce, and Premium Gems are very rare. In recent years, MS66 offerings have occurred as often as twice a year and as rarely as one in four years. We encourage interested parties to act accordingly.

The hair over Liberty's ear and the lower obverse are incompletely defined, but design detail is considerably stronger on the reverse. Each side is satiny and bright with untoned, well-preserved surfaces. The cheek lacks mentionable contact, and a loupe only brings up a few ticks and grazes of almost no importance. Census: 7 in 66, 0 finer (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255A, PCGS# 7192

1890 Silver Dollar, MS66 Eye-Catching Top-Grade Example

4046 1890 MS66 NGC. The only Premium Gem 1890 Morgan dollars at NGC are eight non-Prooflike pieces; PCGS lists only five such coins, plus a lone Prooflike example. Neither service has seen a finer representative of this major condition rarity. The present coin is sharp, frosty, and shows only a faint trace of light champagne toning. Liberty's cheek is clean, and there is a subtle hint of reflectivity in the fields. An eye-appealing and top-graded Registry coin.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255C, PCGS# 7196

1890-CC Morgan Dollar, MS65+ Condition Rarity in Finer Grades

4047 1890-CC MS65+ PCGS. CAC. The 1890-CC Morgan dollar claims the largest mintage of the Carson City series at 2.3 million pieces. However, the issue was not heavily represented in the Treasury releases and GSA sales of the mid 20th century, and it is far from being the most available Carson City Morgan today. This Plus-graded Gem is sharply detailed throughout and the well-preserved surfaces are lustrous and attractive. PCGS has graded 16 numerically finer examples (1/18). NGC ID# 255D, PCGS# 7198

1890-CC GSA Dollar, MS63 Scarce in a GSA Original Holder

4048 1890-CC GSA MS63 NGC. While the mintage of this Carson City dollar was large (more than 2.3 million pieces struck), the number of coins in the GSA Hoard was less than 3,600 Mint State pieces, making the 1890-CC a scarcity in Select Uncirculated or finer condition among the few examples remaining in GSA holders. This sharply struck representative is brilliant with smooth, partially reflective fields and only a scattering of small nicks on the portrait. Frosted cartwheel luster gleams from both sides. Bandcertified in its GSA holder of issue. Census: 175 in 63 (4 in 63+), 19 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255D, PCGS# 518878 Base PCGS# 7198

1892 Morgan Dollar, MS66 Tied for Finest Certified

4049 1892 MS66 PCGS. Silver dollar production was markedly reduced at the Philadelphia Mint in 1892, with a reported mintage of just over 1 million pieces. For the first time, all three branch mints struck more Morgan dollars than the Philadelphia facility in 1892. Apparently, the Mint was only striking silver dollars on demand, rather than striving to produce the unneeded millions of coins mandated by the Sherman Silver Purchase Act in earlier years. The 1892 Morgan dollar is very rare in MS66 condition, and neither PCGS nor NGC have certified any coins in higher grades (1/18).

This delightful Premium Gem exhibits well-detailed design elements, with just a touch of blending on the hair strands above Liberty's ear. The impeccably preserved, creamy surfaces radiate vibrant mint luster on both sides and eye appeal is terrific. Population: 7 in 66, 0 finer (1/18). NGC ID# 255L, PCGS# 7212

1892-CC Silver Dollar, MS65 Well-Preserved, Lustrous Example

4050 1892-CC MS65 PCGS. A well-preserved Gem Morgan dollar, from a branch mint production of 1.3 million pieces, this coin exhibits well-detailed design elements and vibrant mint luster on both sides. The mostly brilliant surfaces show just the faintest hints of pale gold toning and overall eye appeal is outstanding. PCGS has graded 35 numerically finer examples (12/17). NGC ID# 255M, PCGS# 7214

1892-CC Morgan Dollar, MS65 Elusive Issue in Finer Grades

4051 1892-CC MS65 PCGS. This nearly brilliant Gem has flashy luster and splendidly smooth surfaces. The hair above the ear and the eagle's breast show only a hint of incompleteness. The 1892-CC never emerged in quantity from GSA holdings, unlike most CC-mint Morgan issues, and is rare at the MS65 level. PCGS has graded 35 numerically finer examples (12/17). NGC ID# 255M, PCGS# 7214

1892-CC Morgan Dollar, MS65 Conditionally Elusive in Finer Grades

4052 1892-CC MS65 PCGS. An attractive Gem Morgan dollar from the famous Carson City Mint, this coin exhibits sharply detailed design elements and well-preserved lustrous surfaces, with subtle highlights of sea-green toning. Overall eye appeal is quite strong for this popular branch mint issue. Housed in an old green label holder. PCGS has graded 35 numerically finer examples (12/17). NGC ID# 255M, PCGS# 7214

1892-S Morgan Dollar, MS65 First Gem Offering in Eight Years A Beautiful, High-End Example

4053 1892-S MS65 PCGS. The 1892-S is the second-rarest Morgan dollar in Uncirculated condition, trailing only the series key 1893-S. The 1892-S is otherwise a little-known better date in the series, being relatively plentiful in circulated condition due to a mintage of 1.2 million pieces. Low-end circulated examples can be acquired for less than \$100, while similar representatives of the low-mintage 1893-S will cost thousands. But in Mint State, the 1892-S is one of the great stoppers to the series both in absolute terms and conditionally, especially at the Gem level.

Our experience offering Gem-quality key-date Morgans at auction suggests that the 1892-S is about twice as plentiful in MS65 and better grades than the '93-S. However, we have only ever handled such a coin on 20 previous occasions, with some duplication between the individual pieces represented. We have not offered an 1892-S Morgan dollar grading finer than MS63 since 2011, and the last MS65 coin we handled was in the January 2010 FUN Signature, lot 2623, which realized \$115,000.

This issue's rarity in Mint State has only been fully appreciated since the advent of third-party grading, as in earlier years the availability of Uncirculated coins was artificially inflated due to many AU coins being offered as Mint State. True Uncirculated examples are rare. In A Guide Book of Morgan Silver Dollars, fifth edition, Q. David Bowers notes that in a series collection, the 1892-S is one of only a few dates that is almost never represented in Mint State, simply because such pieces are too rare to easily acquire.

The present coin is not only a Gem, but it is high-end for the grade. Under a loupe, the only mentionable abrasions are a few small, faint marks in front of Liberty's ear and a linear mark on the eagle's breast. The fields are clean. Faint traces of light champagne toning grace each side, and the strike is bold. Eye appeal is outstanding. This piece is destined for a high-ranking Registry Set or other specialty collection, in which it will be one of the chief highlights. Population: 5 in 65 (1 in 65+), 9 finer (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255P, PCGS# 7218

1892-S Morgan Dollar, AU55 Prooflike Rare With Designated Prooflike Finish

4054 1892-S AU55 Prooflike NGC. Prooflike and Deep Mirror Prooflike examples are seldom available for the 1892-S, so when an example crosses the block it is an event that transcends the issue's scarcity in About Uncirculated or finer conditions. This brilliant Prooflike coin is a Choice AU, with mirroring at the margins and lightly abraded fields. Aside from light field chatter, a mere handful of tiny marks are distributed across the reflective surfaces. Sharp definition remains, with just a bit of weakness over the ear from strike and wear. We last offered a designated Prooflike example in 2008. Census: 4 in 55 (1 in 55+★) Prooflike, 5 finer (1/18). NGC ID# 255P, PCGS# 7219

1892-S Morgan Dollar, AU58 Rare Prooflike Example

4055 1892-S AU58 Prooflike NGC. The 1892-S Morgan dollar is a rare key issue in high grade, and specimens with prooflike surfaces are "nearly unheard of" according to series specialist Michael Standish. This attractive near-Mint example shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces exhibit prooflike reflectivity throughout. Census: 4 in 58 Prooflike, 1 finer (1/18). NGC ID# 255P, PCGS# 7219

1893 Morgan Dollar, MS65+ Better Philadelphia Mint Issue

4056 1893 MS65+ PCGS. The 1893 Morgan dollar claims a low mintage of 380,000 pieces and the issue is very rare in grades above the MS65 level. This Plus-Graded Gem exhibits well-detailed design elements, with just the slightest trace of blending on the hair strands above Liberty's ear. The lustrous, lightly marked surfaces show a few hints of pale gold and lavender toning. PCGS has graded six numerically finer examples (12/17). NGC ID# 255R, PCGS# 7220

1893 Silver Dollar, Frosty MS65+ Exemplary for the Grade

4057 1893 MS65+ PCGS. CAC. This better Philadelphia issue comes from a small mintage of 378,000 pieces. Survivors are usually available for a price through MS64, but Gems are moderately scarce. PCGS and NGC combined list only 10 examples finer than the present, including six at PCGS and four at NGC (1/18). This Plus-graded, CAC-approved Gem displays thickly frosted, brilliant mint luster and well-struck design elements. The preservation is outstanding. NGC ID# 255R, PCGS# 7220

1893 Morgan Dollar, MS66 Tied for Finest at NGC

4058 1893 MS66 NGC. The Panic of 1893 had far-reaching financial consequences, including the repeal of the Sherman Silver Purchase Act. Freed from the obligation to produce massive quantities of unneeded silver dollars, the United States Mint drastically reduced Morgan dollar production at all active mints in 1893. Only 378,000 examples were struck at the Philadelphia facility that year, making the 1893 a challenging date in the series, especially in grades above the MS65 level.

The coin offered here is a delightful Premium Gem, with well-detailed design elements that show just the slightest touch of the usual softness on the hair strands above Liberty's ear. The well-preserved, brilliant surfaces radiate vibrant mint luster from both sides and the overall eye appeal is outstanding. Census: 4 in 66, 0 finer (12/17). From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255R, PCGS# 7220

1893-CC Silver Dollar, MS60 Final Carson City Morgan

4059 1893-CC MS60 PCGS. The 1893-CC is the last of the Carson City Morgans. Although 677,000 pieces were struck, this issue is significantly scarcer in Mint State than many of the CC-mint dollars of the 1880s. This is largely due to large quantities of the latter being released in the GSA sales of the early 1970s, while the 1893-CC was represented in those sales by only a single coin. The present example is Uncirculated, although weakly struck at the centers, as often seen on this issue. Luster is softly frosted and essentially brilliant with moderate abrasions throughout the obverse. Housed in a green label holder. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS62 Lightly Toned, Reflective Fields

4060 1893-CC MS62 PCGS. A thin layer of pleasing, lilac-gray toning joins glints of gold at the margins on both sides of this reflective and minimally marked 1893-CC. Only nominal weakness exists in the centers — a common occurrence for the issue — which is a welcome trade-off for the lack of significant bagmarks seen on most of Carson City's final-year dollars. Silver luster glows from the smooth fields and lightly frosted devices. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS62 Sharply Detailed, Lustrous Example

4061 1893-CC MS62 PCGS. Only 677,000 Morgan dollars were struck at the Carson City Mint in 1893, in the final year of coinage operations at the famous Western facility. This attractive MS62 specimen offers lustrous, brilliant surfaces that show a few minor contact marks on the devices and some chatter in the fields, but nothing worthy of individual mention. The design elements are sharply rendered and eye appeal is outstanding. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS64 Final Carson City Mint Issue

4062 1893-CC MS64 PCGS. The Carson City Mint suspended coinage operations on June 1, 1893, after a final production run of 677,000 Morgan dollars was accomplished. The 1893-CC was not heavily represented in the Treasury releases of the 1960s, but a few bags later surfaced in the Redfield Hoard. Unfortunately, many of these coins were damaged by a faulty coin-counting machine that left disfiguring scrapes on Liberty's cheek when the hoard was inventoried. Most Uncirculated examples have weak strikes or excessive bagmarks, making the 1893-CC a condition rarity in grades above MS64.

The coin offered here is an impressive Choice specimen, with sharply detailed design elements and well-preserved surfaces that show a few subtle hints of golden-tan toning. Vibrant mint luster adds to the outstanding eye appeal. PCGS has graded 15 numerically finer examples (12/17). NGC ID# 255S, PCGS# 7222

1893-CC Dollar, Bright and Frosty MS65 Exemplary Final-Year Semikey Nearly Unseen Any Finer

4063 1893-CC MS65 NGC. The return of the anti-silver Democrat Grover Cleveland to the White House in the presidential election of 1892 sounded the death knell of coinage operations at the Carson City Mint. The last of the facility's Morgan dollars, a total of 677,000 pieces, fell from the presses in 1893. Although quantities of 1893-CC dollars emerged from government vaults from the 1920s through the late 1950s, their numbers were far fewer than those of many of the CC-mint issues from the early 1880s. A date that was essentially absent from the Treasury Department releases of the 1960s and the later General Services Administration sales, the 1893-CC is now widely recognized as one of the scarcer Morgan dollars from the Nevada branch mint.

The majority of extant 1893-CC dollars are extensively abraded and grade no finer than MS63. On the positive side, if one were able to locate a high-grade (MS64 or finer) representative, it would almost certainly display rich, coruscant mint frost. Sharp striking quality, however, is not a guarantee for this issue. In addition to mostly full definition, this Gem is praiseworthy for an uncommon lack of distracting abrasions. In fact, the number of blemishes is few, and there is not a single area of bothersome incompleteness of detail. Untoned, and possessed of memorable eye appeal. One of the finest certified 1893-CC Morgans, this coin shares the MS65 grade level with only seven other examples at NGC and 14 PCGS. Each service reports one finer submission (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255S, PCGS# 7222

1893-O Dollar, Satiny MS64 Highest Reasonably Attainable Grade

4064 1893-O MS64 PCGS. The year 1893 provides a particular challenge to Morgan dollar collectors, with low mintages and condition rarities from all four facilities. The New Orleans issue claims a production of only 300,000 coins and an average certified grade that barely exceeds XF40. Comparable near-Gems are very scarce and are virtually impossible to upgrade. Satiny mint luster glistens softly over bright, untoned surfaces that show scattered grazes. Well-detailed with a touch of softness over the ear and on the eagle's talons. There are just six finer submissions at PCGS (1/18). From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255T, PCGS# 7224

1893-S Morgan Dollar, VF30 Pleasing Color and Surfaces

4065 1893-S VF30 NGC. A collectible midgrade example of this key issue, showing pewter-gray surfaces and good detail. Each side is smooth and free of bothersome abrasions. Although the undisputed key to the series, the 1893-S Morgan dollar is usually available for a price. The challenge comes in finding a coin in any given grade with strong eye appeal for that numeric level. This piece accomplishes that feat for the VF30 designation. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, VF35 Among the 100 Greatest U.S. Coins

4066 1893-S VF35 PCGS. Taking 38th place on the list of the 100 Greatest U.S. Coins is the 1893-S dollar — the lowest-mintage issue in the Morgan dollar series. Only the 1895 is rarer, but only proofs are known for that date. This Choice VF dollar displays above-average detail. Deep steel-gray patina covers the obverse, while the reverse is slightly lighter in tone. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, AU53 King of the Circulation Strikes

4067 1893-S AU53 PCGS. A pair of die gouges ("rabbit ears") near the right foot of R and a strong die line across the top of the T in LIBERTY confirm the authenticity of this smooth and partially reflective 1893-S. A low-mintage issue when struck, its inherent scarcity was enhanced when many pieces were presumably melted under mandate of the Pittman Act. Today, About Uncirculated coins are in great demand among collectors given the expense and rarity of full Mint State coins.

This example displays pleasing silver-gray color that flows evenly across both sides. Mint luster clings to the margins and within the protected areas of the motifs. Marks are limited to a few inconsequential, light lines and Liberty's cheek shows only tiny abrasions. We expect a serious show of hands and substantial online bidding when this sharp and appealing 1893-S is called. NGC ID# 255U, PCGS# 7226

1894 Silver Dollar, MS63 Low-Mintage Issue

4068 1894 MS63 PCGS. The Philadelphia Mint coined a mere 110,000 circulation-strike Morgan dollars in 1894, and examples are coveted in all grades among today's collectors. This brilliant and frosty Select Mint State example has full luster and wispy gold and blue toning. The 1894 has the third lowest mintage of all Morgan dollars behind the key 1893-S and the proof-only 1895. NGC ID# 255V, PCGS# 7228

1894 Dollar, MS64 In-Demand Low-Mintage Key

4069 **1894 MS64 PCGS.** Merely 10,000 more Morgan dollars were struck at the Philadelphia Mint in 1894 than were produced at the San Francisco Mint the year before. This is the second-lowest mintage issue in the series (110,000 coins) and a semikey as such. The 1894 is scarce in this grade and rare any finer, with 31 Gemor-better submissions at PCGS (1/18). Golden accents complement bright silvery surfaces that are void of any serious or distracting imperfections. Mint luster is softly frosted.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, Rare MS65 Almost Unobtainable Any Finer

4070 1894 MS65 PCGS. From any perspective, the 1894 must be considered the key circulation-strike issue among all Philadelphia Morgan dollars. Just 110,000 pieces were struck — less than any other P-Mint silver dollar, the unproven 1895 "business strikes' (which appear as a 12,000-piece entry in the Mint records) notwithstanding. Yet only in high grades does the 1894 fully capture the imagination (and wallet) of collectors.

This brilliant Gem example will have no problem asserting its rightful place in a fine collection among the ranks of specialists and Registry Set enthusiasts. The smoothly frosted fields are virtually without distractions. A few tiny ticks are easily offset by velvety, silver-white luster that flows over both sides. The strike is comprehensively sharp, lacking pinpoint definition only on a few strands above the ear and at the high points of the talons. Population: 26 in 65 (1 in 65+), 5 finer (12/17). NGC ID# 255V, PCGS# 7228

1894-O Morgan Dollar, MS64 Finest Collectible Grade for the Issue

4071 1894-O MS64 NGC. Uncirculated 1894-O dollars tend to be heavily bagmarked, lackluster, and poorly struck — not exactly great selling points. But the issue is so challenging in high grades that examples in MS61 or MS62 are often the finest coins that collectors can find or afford. This is a premium quality near-Gem with delicate golden border toning around brilliant, satiny centers. An incomplete impression over the middle part of Liberty's portrait and the eagle's breast and talons is typical, but the noticeable lack of major abrasions is a refreshing exception to the rule for this conditional semikey. NGC reports nine finer submissions (12/17). From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255W, PCGS# 7230

1895-O Dollar, MS63 A Top Condition Rarity Satiny and Strongly Struck

4072 1895-O MS63 NGC. Nearly unobtainable in strictly Uncirculated condition, the 1895-O is one of the few issues in the Morgan dollar series that approaches the rarity in Mint State of the legendary 1892-S and 1893-S. All the necessary conditions for an attractive, high-grade dollar seem to have conspired against the 1895-O. The typical coin shows indifferent luster, numerous abrasions, and a weak strike. This brilliant coin is bright and satiny on both sides. It is nearly fully struck with only the faintest bit of weakness evident over the ear of Liberty, while the eagle's breast feathers are fully defined. The only abrasions of any note are a couple of milling marks on the cheek of Liberty and a cluster of marks in the reverse field between the eagle's right (facing) wing and the wreath. Census: 15 in 63, 15 finer (12/17).

Ex: Central States Signature (Heritage, 4/2001), lot 6798; Atlanta Signature (Heritage, 8/2001), lot 6741.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255Y, PCGS# 7236

1895-S Morgan Dollar, MS63 Low-Mintage Semikey

4073 1895-S MS63 NGC. This piece is brilliant and well-struck, showing semireflective fields and frosty devices. Scattered abrasions account for the grade, but such are usually unavoidable on the 1895-S. This is a better date in Uncirculated condition with only 400,000 coins struck. Most of the pieces known today either survived circulation or were paid out in bags in the 1940s and '50s. NGC ID# 255Z, PCGS# 7238

1896-O Morgan Dollar, MS64 Prime Condition Rarity in Higher Grades

4074 1896-O MS64 PCGS. The 1896-O Morgan dollar claims a more than adequate mintage of 4.9 million pieces, but the issue is a prime condition rarity in the series today. Unfortunately, the 1896-O was not a well-produced issue, and most examples seen have weak strikes and insipid mint luster. To compound the problem, much of the mintage was released into circulation at the time of issue and few high-quality specimens were saved by contemporary collectors. The 1896-O can be easily located in circulated grades, but Mint State examples are scarce. Even the coins that were held in government storage until the 1950s seem to have excessive bagmarks. As a result, the 1896-O is rare in MS64 condition, and virtually unobtainable in higher grades.

This impressive Choice example has a better-than-average strike, with just a touch of the usual softness on the hair above the ear. The lightly marked surfaces are unusually lustrous and attractive, with a few subtle hints of lavender-gray toning. Overall eye appeal is quite strong for this issue. Population: 29 in 64, 3 finer (12/17). From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 27ZU, PCGS# 7242

1896-S Morgan Dollar, MS64+ Seldom Offered Finer

4075 1896-S MS64+ PCGS. The 1896-S is a better date in Uncirculated grades despite a mintage of 5 million coins. Gems are particularly scarce, heightening demand among budget-conscious collectors for attractive Choice examples. This Plus-graded near-Gem displays frosty, brilliant mint luster and only a few faint grazes. The central high points are weakly struck as usual. NGC ID# 2564, PCGS# 7744

1896-S Morgan Dollar, MS65 Extremely Rare in Higher Grades

4076 1896-S MS65 NGC. VAM-2. The doubled 6 is the clearest diagnostic for this variety. Few marks appear in the obverse fields, and only a couple are seen between the eagle's right wing and the wreath. A series of reeding marks occurs on Liberty's temple. Aside for those minor grade-defining traits, this brilliant Gem is remarkably clean and brightly frosted. Characteristically defined over the ear and breast feathers. Census: 14 in 65, 5 finer (12/17). From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2564, PCGS# 7244

1897 Dollar, MS67 Among the Finest Examples

4077 **1897 MS67 NGC.** This is an accessible issue through MS66 that becomes conditionally rare in MS67 and is unavailable any finer. This Superb Gem delivers exactly what is expected of a coin three points shy of technical perfection. Brilliant surfaces glisten with lively mint frost and show no signs of mentionable impairment. The impression is strongly rendered throughout. Census: 11 in 67, 0 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 27P5, PCGS# 7246

1897-O Dollar, MS64 Surprisingly Sharp and Radiant

4078 1897-O MS64 NGC. Locating an 1897-O should be no trouble all for those assembling a set of circulated dollars. If Mint State quality is a requirement, this issue will pose a challenge in MS60 to MS63 condition, but the coins are out there. However, there are probably no more than 20 to 25 Gem-or-better examples of the 1897-O extant, and NGC and PCGS have graded merely 67 Choice Uncirculated representatives combined, likely including duplications. This is all to say that this is an exceedingly elusive condition rarity, and finer coins are likely out of reach.

Satiny luster is surprisingly radiant over all-brilliant surfaces. This piece appears as it did the day it was struck. Inconsequential bagmarks occur on the cheek, limiting the grade, but the fields are relatively clean. As with the luster, strike detail is remarkably good. Census: 26 in 64, 8 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2565, PCGS# 7248

1897-S Morgan Dollar, MS67 Tied for Numerical Finest at NGC

4079 1897-S MS67 NGC. One is challenged to find a single mark of consequence on this smooth and impressive Superb Gem silver dollar. Gunmetal-blue and amber-gold toning occupies the margins and lightens to brilliant, silver-frosted centers, while the reflective fields impart a translucent golden hue. Liberty's cheek is essentially flawless and full. Faint roller marks across the ear and eagle's breast do little to subdue the overall sharpness of this conditionally rare and visually elite 1897-S. Census: 12 in 67 (1 in 67★), 0 finer (1/18). NGC ID# 2567, PCGS# 7250

1897-S Dollar, MS67 Just Two Examples Known Finer

4080 1897-S MS67 PCGS. CAC. Ex: M.J.O. A 93% drop in the PCGS population between MS66 and MS67 illustrates the rarity of this San Francisco issue in the top levels of Mint State. This Superb Gem is brightly frosted and virtually brilliant with just a few hints of thin patina to confirm the originality of each side. Fully struck over the centers. Population: 28 in 67, 2 finer. CAC: 4 in 67, 1 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2567, PCGS# 7250

1898-S Dollar, MS66+ One Coin Finer at NGC

4081 1898-S MS66+ NGC. Cream-gray, pale gold, and a hint of lavender color this carefully preserved, Registry-grade dollar from the San Francisco Mint. Light striations appear over the centers, as strike definition is somewhat soft. Both sides are incredibly smooth. The only noticeable mark is a tick behind Liberty's mouth. The 1898-S has an average certified grade just shy of MS60. Premium Gems of comparable quality are very rare. Census: 9 in 66 (1 in 66+), 1 finer (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256A, PCGS# 7256

1899-O Silver Dollar, MS67+ A Registry-Grade Example

4082 1899-O MS67+ PCGS. Other than a pair of Deep Mirror Prooflike coins in MS67, collectors' only opportunity to acquire a PCGS-graded Superb Gem example of the 1899-O dollar is to strive for a non-Prooflike piece. This Plus-designated coin displays frosty, brilliant mint luster and surprisingly well-struck design elements for a New Orleans issue of the 1890s. A few faint grazes on the forward part of Liberty's cheek are all that limit the grade. PCGS lists 10 Plus-graded MS67s and one MS68 coin finer (1/18). NGC ID# 256C, PCGS# 7260

1900-S Morgan Dollar, MS66+ Lustrous and Lightly Toned

4083 1900-S MS66+ PCGS. CAC. From a mintage of 3.5 million pieces, the 1900-S Morgan dollar is extremely rare in grades above the MS66 level. This Plus-graded Premium Gem displays well-detailed design elements, with just a trace of the usual softness on the hair above the ear. The impeccably preserved surfaces exhibit vibrant mint luster and a few hints of sea-green and blue toning. PCGS has graded three numerically finer examples (1/18). NGC ID# 256H, PCGS# 7270

1901 Morgan Dollar, MS63 Well-Known Philadelphia Condition Rarity

4084 1901 MS63 NGC. Philadelphia Mint officials responsible for the production of nearly 7 million Morgan dollars in 1901 would certainly be surprised to learn of the issue's conditional rarity today. Despite the substantial mintage, this date is well-known for its scarcity in Mint State. Softly frosted surfaces are lightly toned in antique-silver and golden-gray hues. Marks are incredibly scant for the assigned grade. A touch incomplete over the centers. There are only 21 finer submissions at NGC (1/18). From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256], PCGS# 7272

1901 VAM-3 Morgan Dollar, AU58 Important 'Shifted Eagle' Variety

4085 1901 Doubled Die Reverse, VAM-3, AU58 NGC. A Top 100 Variety. The VAM-3 "Shifted Eagle" variety displays bold die doubling on many of the reverse design elements, especially visible at the lower eagle's beak, the tailfeathers, and other low-central devices. As a popular *Guide Book* variety, it shows a large jump in value between About Uncirculated and full Mint State, making this near-Mint example highly desirable. Reddish-gold accents glow beneath attractive, silver-gray surfaces that are more silver than gray. Marks are few and the eye appeal is strong. NGC ID# 256], PCGS# 133965 Base PCGS# 7302

1901-O Dollar, MS67 Among the Highest-Graded at NGC

4086 1901-O MS67 NGC. The subject of vast dispersions during the Treasury release of the early 1960s, the 1901-O is widely collectible through MS66. This Superb Gem is tied with 16 others for finest at NGC, and there is a single coin finer at PCGS (12/17). The hair strands over the ear are soft, and the eagle's breast is downright mushy, as always, but the exceptionally clean, brilliant, and satiny surfaces make up for it. Tiny alloy spots appear in the left reverse field. From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256K, PCGS# 7274

1901-S Dollar, Strong MS66 Terrific Registry Coin

4087 1901-S MS66 PCGS. CAC. Mint State 1901-S dollars are usually found in the MS62-MS64 range. Gems are scarcely offered, and examples in this high grade rarely appear on the market. That is especially true of CAC-approved representatives, which are extremely rare at this level. Each side is frosty and well-struck. Faint roller marks occur on the cheek. Brilliant with a couple of trivial luster grazes. Population: 44 in 66 (5 in 66+), 3 finer. CAC: 7 in 66, 0 finer (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256L, PCGS# 7276

1902-O Morgan, Satiny MS67

4088 1902-O MS67 PCGS. The 1902-O is a rarity in Superb Gem condition, with no coins numerically finer than the present MS67 example (1/18). This Registry-grade PCGS coin displays satiny mint luster and clean surfaces. The obverse has light russet-gold toning, while the reverse exhibits dusky lavender-gold and seagreen hues. The usual strike weakness is visible at the centers. Population: 30 in 67, 1 MS67 Prooflike finer (1/18). NGC ID# 256N, PCGS# 7280

1902-O Dollar, MS67 Prooflike Sole Finest at NGC

4089 1902-O MS67 Prooflike NGC. The dispersal of a few bags of Prooflike 1902-O Morgan dollars in 1968 did not materially affect the high grade availability of such coins in today's market. On the contrary, the typically offered Prooflike 1902-O dollar is noticeably abraded. Similarly, strike is often a problem for this date, and few survivors display the sharpness of detail that is evident on both sides of this Superb Gem. This coin is also noteworthy because its surfaces are smooth and without outwardly distracting abrasions. Untoned and reflective with a well-concealed planchet streak (as struck) on the reverse over the E in AMERICA. Census: 1 in 67 Prooflike, 0 finer in this category (12/17).

Ex: Santa Clara Signature (Heritage, 11/2002), lot 6770.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256N, PCGS# 7281

1903-S Dollar, Lightly Toned Gem

4090 1903-S MS65 PCGS. A scarce, low-mintage issue, the 1903-S Morgan dollar is beyond the scope of most collectors in this high grade. Indeed, any Mint State example is a prize. This well-struck Gem offers soft blushes of gold, russet, and blue patina around minimally toned centers. Mint frost glistens from beneath the subtle overlay. From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256T, PCGS# 7288

1904-S Morgan Dollar, MS65 Very Rare in Higher Grades

4091 1904-S MS65 PCGS. According to Bowers, a particularly large release in 1941-42 helped to "augment dealers' stocks for a long time." However, the issue remains very scarce in Gem condition. Frosty mint luster enlivens bright centers, while the rims feature blue, violet, and golden-russet tones. Most 1904-S dollars display strike softness over the centers, and this piece is typical in that regard. Excellent preservation is anything but typical, however, for this condition rarity. PCGS reports 18 highergraded submissions (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256W, PCGS# 7294

1921 Morgan Dollar, MS67 A Top-Certified Example

4092 1921 MS67 NGC. With a mintage of 44.6 million coins, there is an expectation of availability in high grades for this issue. But the 1921 Morgan dollar is surprisingly scarce in MS66, and advanced specialists recognize its extreme rarity in Superb Gem condition. This piece features complete strike definition and original mint brilliance with thick, frosty luster. Census: 12 in 67 (1 in 67★), 0 finer (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256X, PCGS# 7296

1921-D Morgan Dollar, MS67 ★ The Only Denver Mint Morgan

4093 1921-D MS67 ★ NGC. The Denver Mint produced their first coins in 1906, two years after the last Morgan dollars were minted. Once the Morgan dollar resumed temporarily in 1921, the Colorado facility had its first and only opportunity to coin examples of this iconic design. This Superb Gem is highly lustrous with intense iridescent toning on the obverse, and a crescent of iridescence on the otherwise brilliant and untoned reverse. Census: 12 in 67 (3 in 67★), 1 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256Y, PCGS# 7298

PROOF MORGAN DOLLARS

1878 7TF Morgan, PR64 Cameo Reverse of 1878 Condition Rarity

4094 1878 7TF Reverse of 1878 PR64 Cameo PCGS. CAC. VAM131. Several minute die markers, including a die lump on the D
in UNITED and a "doubled" outline at the top of the second L
in DOLLAR confirm the die pair. According to Van Allen and
Mallis, all seven tailfeathers Reverse of 1878 proofs are of this
variety. Q. David Bowers, in A Guide Book of Morgan Silver Dollars,
fifth edition, notes that no official mintage is recorded for this
subtype, but 200 to 250 pieces is a probable estimate supported by
the certified population that lists 189 coins in all grades, including
some resubmissions.

No Deep Cameo examples of the issue are known, and Cameos are rare. This Choice proof displays appreciable field-device contrast and razor-sharp design elements. Both sides exhibit warm russet-gold toning, but the cameo effect is not hindered. No obtrusive marks or hairlines are discernible. Population: 13 in 64 Cameo, 7 finer. CAC: 4 in 64, 3 finer (1/18).

From The Property of a Lady. NGC ID# 2573, PCGS# 87312

1879 Morgan Dollar, PR64 Cameo Well-Contrasted and Nearly Brilliant

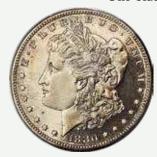

1879 PR64 Cameo PCGS. CAC. With only two Deep Cameos reported by PCGS, attractive Cameo 1879 proof Morgan dollars are typically the finest pieces available to collectors. With CAC green labels, this availability declines significantly. The present coin is fully struck and well-contrasted, showing brilliant interiors surrounded by a hint of golden border toning that melts into the mirrored fields. Eye appeal is pleasing. Population: 23 in 64 (4 in 64+) Cameo, 43 finer. CAC: 10 in 64, 10 finer (1/18).

From The Property of a Lady. NGC ID# 27Z2, PCGS# 87314

1880 Morgan Dollar, PR66 One-Sided Cameo

4096 1880 PR66 PCGS. CAC. The proof Trade dollars of 1880 are famously beautiful coins that are often sharply struck and well-contrasted. The production quality also is apparent on the proof Morgan dollars of this year, although the latter type is less often seen with outstanding eye appeal due to numerous examples being cleaned in the past. Among non-Cameo survivors, this CAC-approved Premium Gem is outstanding. The obverse is fully worthy of a Cameo designation, although the reverse is less well contrasted. Both sides have russet-gold toning and a full strike without noticeable surface imperfections.

From The Property of a Lady. NGC ID# 27Z4, PCGS# 7315

1882 Morgan Dollar, PR65 Modest Field-Device Contrast

1882 PR65 PCGS. The 1882 proof Morgan dollar is well-known for having often deep cameo contrast and sharp strikes. This Gem example is indeed fully defined, and while field-motif contrast is apparent on both sides, a Cameo designation is just missed at PCGS. The coin is well-preserved with near-brilliant interiors and russet-gold margins.

From The Property of a Lady. NGC ID# 27Z6, PCGS# 7317

1883 Morgan Dollar, PR66 Old-Time Toning

4098 1883 PR66 PCGS. CAC. This CAC-endorsed, high-end proof displays deep original toning in shades of lavender, sea-green, blue, and gold. The strike is sharp, and no distracting marks are visible beneath the patina. A Cameo designation might have been awarded were the coin not so deeply toned. Population: 17 in 66, 4 finer; 13 in 66 (3 in 66+) Cameo, 2 finer; 3 in 66 (2 in 66+) Deep Cameo, 0 finer. CAC: 7 in 66, 1 finer (1/18).

From The Property of a Lady. NGC ID# 27Z7, PCGS# 7318

1885 Morgan, PR65+ Deep Cameo Exceptional Contrast and Sharpness

4099 1885 PR65+ Deep Cameo PCGS. A Deep Cameo designation is fully deserved by this high-end Gem, showing dramatic contrast on both sides with thick mint frost on the devices. Virtually brilliant interiors bleed into golden-toned margins, accentuating the cameo effect. The strike is sharp and there are no distracting abrasions. PCGS has certified only four Deep Cameos in all grades combined. Population: 3 in 65 (1 in 65+) Deep Cameo, 1 finer (1/18). From The Property of a Lady. NGC ID# 27ZE, PCGS# 97320

1886 Silver Dollar, PR67 Cameo Superb Quality and Contrast Conditionally Rare

4100 1886 PR67 Cameo PCGS. PCGS has only designated three proof 1886 Morgan dollars as Deep Cameo, and Cameo coins are rarely offered finer than PR65. This Superb Gem is among the finest Cameos at PCGS. Satiny devices are untoned as they reside amid glasslike mirroring in the fields. Vivid gold border toning melts into the mirroring and dissipates as it nears the devices. The strike is full, and eye appeal is exceptional. We have not offered a PCGS-graded Cameo in this numeric level since the August 2011 Chicago Signature sale, where a piece in lot 7361 garnered \$19,550. The present coin is at least as appealing. Population: 3 in 67 Cameo, 2 in 67 Deep Cameo finer (1/18).

From The Property of a Lady. NGC ID# 27ZF, PCGS# 87321

1887 Morgan Dollar, Toned PR65

4101 1887 PR65 PCGS. This Gem proof 1887 Morgan dollar is fully struck and deeply reflective in the fields, although a Cameo designation is prevented by deep olive, russet, amber, and orange-gold toning that appears on each side. Still, at certain angles, modest contrast is apparent on the reverse through the patina. Due to the scarcity of Cameo 1887 proof dollars and an almost complete lack of Deep/Ultra Cameos, Gem non-Cameos such as this are in demand with date collectors.

From The Property of a Lady. NGC ID# 27ZG, PCGS# 7322

1888 Morgan, PR65 Cameo Attractive Contrast, Light Golden Toning

4102 1888 PR65 Cameo PCGS. At PCGS, Cameo proof 1888 silver dollars are scarce, and most grade no finer than PR64. Only two Deep Cameos are reported, making high-end Cameos the ideal choice for many collectors. This Gem is well-contrasted with light golden toning that becomes most apparent at the rims. The centers are poorly struck, an almost unavoidable characteristic of the 1888 issue. Population: 9 in 65 Cameo, 7 finer (1/18).

From The Property of a Lady. NGC ID# 27ZH, PCGS# 87323

1889 Morgan, CAC-Approved PR65 Cameo Contrast on the Reverse

4103 1889 PR65 PCGS. CAC. Continuing a trend established in the early years of the series, the proof 1889 Morgan dollar is a great rarity in Deep Cameo grades and genuinely scarce as a Cameo. This causes high-end non-Cameos to be somewhat overlooked, despite their conditional rarity at the Gem level. This is a particularly elusive CAC-approved example. The strike is full, and dusky champagne toning on each side yields to deeper orange-gold at the borders. Moderate cameo contrast is visible on the reverse.

From The Property of a Lady. NGC ID# 27ZJ, PCGS# 7324

1893 Dollar, PR66 Cameo Attractively Contrasted and Toned

4104 1893 PR66 Cameo PCGS. In A Guide Book of Morgan Silver Dollars, Q. David Bowers calls it "a challenge, a sporting occasion' to find a well-struck and attractive 1893 proof. The present coin is starkly contrasted with liquidlike mirroring in the fields. Golden border toning melts into the fields and eventually cedes to fully brilliant centers. Under a loupe, mild strike weakness is seen on the eagle's breast and the hair above Liberty's ear, although it is not bothersome. Population: 12 in 66 Cameo, 3 finer; 2 in 66 Deep Cameo, 6 finer (1/18).

From The Property of a Lady. NGC ID# 27ZN, PCGS# 87328

1894 Morgan Dollar, PR65 Modest Field-Device Contrast

4105 1894 PR65 PCGS. This Gem proof 1894 Morgan dollar displays sharp central devices and deep, glasslike mirroring in the fields. Warm orange-gold border toning gradually lightens toward brilliant centers. Whether or not to award this piece a Cameo designation seems to have been a judgement call on the part of PCGS, as the reverse is undeniably worthy but the obverse shows contrast only at certain angles. A knife rim circumnavigates each side.

From The Property of a Lady. NGC ID# 2577, PCGS# 7329

1895 Proof Morgan Dollar, VF Details Suitable for a Circulated Set of Morgans

4106 1895 — Graffiti — PCGS Proof Genuine. VF Details. The 1895 Morgan dollar is a first-class numismatic enigma. Although Mint records indicate 12,000 business strike dollars were struck in 1895, along with 880 proofs, no regular-issue coins have ever surfaced. Several explanations for the missing business strike mintage have been advanced over the years, including clerical errors in official records and wholesale destruction of the mintage under the auspices of the Pittman Act in 1918. Whatever the truth may be, the 1895 Morgan dollar is a proof-only issue for all intents and purposes, and the limited proof mintage has always been under extreme pressure from date collectors.

The rarity of the 1895 issue was recognized almost immediately by contemporary numismatists. The 1895 proof sets began appearing at auction within months of the time of issue, with catalogers singling out the rarity of the dollar [see the F. Merritt Alden Collection (S.H. & H. Chapman, 4/1896), lot 161]. By 1898, collector George Rice was writing in The Numismatist that no business strike coins had ever been struck. The elusive nature of this date has become more and more evident, with the growth in popularity of the Morgan dollar series in recent times. Today, the 1895 is recognized as one of the two most important keys to the series, along with the 1893-S. The 1895 is often called the King of the Morgan Dollars. A circulated proof such as this piece is as close as a collector will get to one of the mysterious 12,000 business strikes that were recorded struck. Even wear is seen over the devices and numerous small abrasions are scattered over each side. Pale color.

1898 Dollar, PR67+ Deep Cameo Remarkable Eye Appeal

4107 1898 PR67+ Deep Cameo PCGS. Ice-white motifs rise in full detail above seamless glassy fields. Both sides are essentially brilliant. This magnificent Superb Gem is immaculate aside from a couple of minuscule field specks near the eagle's right (facing) wing. Deep Cameo examples comprise only a small percentage of proofs, since frost diminished from the recesses of the dies with each subsequent strike. Only 735 proofs were produced, 145 pieces fewer than its famous 1895 proof predecessor. Population: 16 in 67 (3 in 67+) Deep Cameo, 3 finer (1/18). NGC ID# 27ZW, PCGS# 97333

1904 Morgan Dollar, PR66 Only 650 Examples Struck

4108 1904 PR66 PCGS Secure. Just the palest touch of lilac patina is visible on the brilliant surfaces of this delightful Premium Gem proof, with perhaps a suggestion of faint jade color on the high points of Liberty. Moderate contrast appears on both sides, along with lots of eye appeal. Population: 37 in 66 (4 in 66+), 9 finer (12/17). Ex: FUN Signature (Heritage, 1/2009), lot 4868. NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

1922-S Peace Dollar, MS66 Among the Finest Certified

4109 1922-S MS66 NGC. The finest-known 1922-S Peace dollars are Premium Gems, and very few are certified in that grade. The combined NGC and PCGS populations count only 29 submissions, including possible duplications (1/18). This is a brilliant example with distinctive satin luster. Liberty's cheek is clean, and there are only a few faint marks on the eagle's wing. The fields appear pristine and present a vibrant cartwheel effect. Census: 17 in 66 (1 in 66 ★), 0 finer (1/18). NGC ID# 257E, PCGS# 7359

1927 Peace Dollar, MS65+ Seldom Encountered Any Finer

4110 1927 MS65+ PCGS. Less than 5% of all 1927 Peace dollars that PCGS has graded MS65 have earned the Plus designation, and that service has graded just 16 numerically finer submissions (12/17). This brilliant and untoned Plus-graded Gem features well-detailed design elements and frosty silver luster with outstanding eye appeal. NGC ID# 257S, PCGS# 7370

1927-D Dollar, MS65 Bright and Satiny

4111 1927-D MS65 PCGS. CAC. Relatively few Peace dollars were struck at the Denver Mint in 1927 (1.2 million coins). Those that survive are seldom found in high grades. Each side is bright and satiny. A blush of golden patina adorns the left reverse border, and a few dark specks of color are scattered across the obverse. Well-struck at the centers. The PCGS Population Report lists 14 higher submissions (1/18). NGC ID# 257T, PCGS# 7371

1935 Peace Dollar, MS66+ Tied for Finest at PCGS

4112 1935 MS66+ PCGS. CAC. This delightful Plus-graded Premium Gem Peace dollar exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces radiate vibrant mint luster on both sides. Subtle hints of golden-tan toning add to the terrific eye appeal. The 1935 Peace dollar is scarce in MS66 condition, and PCGS has certified no examples in finer grades (1/18). NGC ID# 2582, PCGS# 7378

SACAGAWEA DOLLARS

2000-P 'Cheerios' Dollar, MS68 Among the Finest at PCGS

4113 2000-P "Cheerios," FS-902, MS68 PCGS. The highly sought-after so-called "Cheerios" variety of the 2000-P Sacagawea dollar, which famously shows ribbed tailfeathers on the eagle, whereas the majority of the 2000-P issues exhibit smooth, plain tailfeathers. FS-902 appears to have only been distributed through the Cheerios cereal box program, intended to celebrate the new millennium. The example here offers brilliant golden luster and satiny, semireflective surfaces. No abrasions are seen. Accompanied by a 2000 "Cheerios" cent, MS65 Red PCGS; and the original cereal box blister-pack and COA. Population: 40 in 68, 0 finer (1/18). (Total: 2 coins) NGC ID# 282J, PCGS# 147231 Base PCGS# 411990

GOLD DOLLARS

1853-C Gold Dollar, MS62 Challenging Charlotte Issue

4114 1853-C MS62 NGC. Variety 1. With a mintage of only 11,515 pieces, 1853-C gold dollars were not saved by the public, nor were they numismatically preserved. Nearly all survivors are circulated. Doug Winter estimates only 15 to 25 Uncirculated pieces exist (other estimates range upward to 50 Mint State coins), with most pieces at the low end of the Uncirculated scale. This lustrous and attractive MS62 example displays pleasing greenish-gold color and is surprisingly well-produced for the issue. Finely granular surfaces show the expected weakness on the mid-to-lower reverse, where strike doubling is visible on the mintmark and CA of AMERICA. Census: 12 in 62 (2 in 62+), 18 finer (1/18). NGC ID# 25BV, PCGS# 7522

1853-C Gold Dollar, MS63 Outstanding Original Coloration

4115 1853-C MS63 NGC. Variety 1. The 1853-C gold dollar comes from a small mintage of 11,515 pieces, of which fewer than 300 are believed to survive in all grades, according to Southern gold specialist Doug Winter. Uncirculated examples are rare, most grading MS60 to MS62. This Select example is high-end for the issue, and only a few finer pieces are reported. The strike is sharp, and the satiny surfaces display original orange-gold coloration and minimal abrasions. Eye appeal surpasses that of many other Uncirculated pieces that we have seen. Winter writes in Gold Coins of the Charlotte Mint: "Properly graded MS63 to MS64 examples are extremely rare and I have seen only three or four that I feel qualify as such." Census: 14 in 63, 4 finer (1/18). NGC ID# 25BV, PCGS# 7522

1853-D Gold Dollar, MS62 Excellent Dahlonega Type Coin

4116 1853-D MS62 PCGS. Variety 5-G. The 1853-D gold dollar claims a mintage of 6,583 pieces, a small production total in absolute terms but actually fairly generous in the context of the series. The 1853-D is one of the more available issues from the Dahlonega Mint in today's market, making it a popular choice with branch mint type collectors. A single die variety is known for the date.

The present coin is an impressive MS62 example, with lightly marked orange-gold surfaces and vibrant mint luster throughout. The strike is better than average, with a touch of the usual softness on Liberty's hair on top of the bun, but sharp stars. The reverse is sharply rendered throughout. A few vertical die striations show in the reverse field. The 1853-D is very rare in MS62, or finer, grades. Population: 6 in 62 (1 in 62+), 8 finer (1/18). NGC ID# 25BW, PCGS# 7523

1854 Type Two Gold Dollar, MS63 Appealing Type Coin

4117 **1854 Type Two MS63 PCGS.** The 1854 was transitional for the gold dollar design, with both Type One and Type Two coins issued. The Type Two issue is one of the two most plentiful dates for that design, being popular as a type coin in attractive Mint State grades. This Select example displays a bold strike in all regions except the 8 in the date. Frosty wheat-gold luster exhibits minimal abrasions. NGC ID# 25C3, PCGS# 7531

1888 Gold Dollar, MS67+ Conditionally Scarce Type Coin

4118 1888 MS67+ PCGS. CAC. The penultimate issue in the gold dollar series, the 1888 is just as suitable for type purposes as the 1889. This Plus-graded Superb Gem displays frosty wheat-gold luster and fully struck design elements. The fields shimmer when rotated beneath a light. Few CAC-endorsed coins are graded this fine. Population: 54 in 67 (5 in 67+), 6 finer. CAC: 22 in 67, 4 finer (1/18). NGC ID# 25DT, PCGS# 7589

EARLY QUARTER EAGLES

1802/'1' Quarter Eagle, BD-1, VF35 Pleasing Color and Surfaces

4119 1802/'1' BD-1, R.4, VF35 PCGS. Bass-Dannreuther Die State b/c, cracked and clashed; there is a perfect outline of a star in the field in front of Liberty's neck and partial wing feathers from the eagle are impressed into the obverse behind Liberty's hair. BD-1 is the most plentiful of the three 1802 quarter eagle die pairings, although it is still itself scarce with only 90 to 120 examples believed extant. In the past, this issue was thought to be an 1802/1 overdate, although it is now understood to be a normal date with what is likely a die break or defective punch present within the loop of the 2. This example is evenly struck and only lightly worn, with medium honey-gold patina overall. A couple old, faint pinscratches in the right obverse field are not discernible to the unaided eye. Population: 6 in 35, 71 finer (12/17).

Ex: The Twin Peaks Collection/Summer FUN Signature (Heritage, 7/2015), lot 3265.

From The Bayside Collection. PCGS# 45506 Base PCGS# 7650

1808 Quarter Eagle, VF Details Capped Bust Left, BD-1 Only Date of the Type

4120 1808 BD-1, R.4 — Graffiti — NGC Details. VF. Bass-Dannreuther Die State c. The design of the quarter eagle was switched from the old Capped Bust Right motif to the new Capped Bust Left design by John Reich part way through the year in 1808. Only 2,710 examples of the new design were struck before the end of the year, as the quarter eagle denomination was not really useful in the national economy of that period. In fact, the Mint suspended coinage of the quarter eagle denomination after 1808, and no more were struck until 1821. By then, the design had been modified slightly to the Capped Head Left motif, making the 1808 quarter eagle a scarce, one-year design type. The coins were heavily melted in later years and the surviving population numbers no more than 125-150 examples in all grades. As might be expected, the 1808 is always in demand from series specialists and type collectors alike.

The present coin shows some wear on the design elements, but much interior detail remains intact on the central devices, and the antique-gold surfaces are lightly abraded, aside from a large letter H that was inscribed in the left obverse field. Like most examples of this issue, the dentilation is weak on both sides. This piece was struck from a late state of the dies, with a die crack from the cap through the stars on the right and another crack through the numerals in the date. John Reich's signature notched star 13 is barely visible in the NGC holder.

1833 Quarter Eagle, BD-1, XF40 Scarce Date, Just 60 to 80 Pieces Known

Only a single die combination was needed — understandably so — to coin the meager 4,160 reported examples of the 1833 quarter eagle, and only a single die state is known for those pieces, the BD state a/c. The reverse die was a reuse of one employed on quarter eagles of 1830, 1831, and 1832, all in virtually the same die state. This XF example shows some moderate wear on each side consistent with the grade, but the only singular marks are a couple of scrapes on Liberty's lower neck and a vertical mark between the 3s in the date. A diagonal scrape runs though the eagle's shield and onto the neck. Prevailing olive-gold color deepens near the rim to a amber-gold. Ex: FUN Signature (Heritage, 1/2013), lot 6859; ANA Signature (Heritage, 3/2016), lot 5039.

From The Bayside Collection. NGC ID# BFWC, PCGS# 45527 Base PCGS# 7673

1833 Quarter Eagle, AU58 Capped Head Left, BD-1

1833 BD-1, R.5, AU58 NGC. Bass-Dannreuther Die State a/c. The 1833 Capped Head Left quarter eagle claims a small mintage of just 4,160 pieces, all struck from the same pair of dies. As might be expected, this was the only use of the obverse die, but the reverse die was used to strike all quarter eagles of this type produced from 1830-1834. Like all U.S. gold coins of this era, the great majority of these coins was melted almost immediately upon entering circulation because the rising price of gold verses silver made their intrinsic value greater than their face value. The surviving population probably numbers only 60-80 examples in all grades.

The coin offered here is an attractive near-Mint specimen, with just a trace of actual wear on the well-detailed design elements. The devices show a touch of the usual softness on the eagle, not surprising considering the reverse die was in its fourth year of use at this point. The antique-gold surfaces are lightly abraded and the overall presentation is most attractive. Census: 10 in 58, 24 finer, including 1 in MS62 Prooflike (1/18). NGC ID# BFWC, PCGS# 45527 Base PCGS# 7673

CLASSIC QUARTER EAGLE

1834 Classic Quarter Eagle, MS63+ Prooflike Small Head, Breen-6138, Variety 1

4123 1834 Small Head, Breen-6138, Variety 1, R.1, MS63+ Prooflike NGC. CAC. The weight specifications of all U.S. gold coin denominations were changed in 1834, to make the intrinsic value of the coins equal the face value and stop the widespread hoarding that kept U.S. gold coinage from circulating. To signify this change, the Classic Head design was introduced on both quarter and half eagle denominations that year (eagles were not struck during this period). An unprecedented mintage of 112,234 Classic Head quarter eagles was accomplished at the Philadelphia Mint in 1834, by far the largest production total ever achieved for the denomination, up to that point. Accordingly, the 1834 is an available date in today's market, but only a handful of examples have been certified with prooflike surfaces.

Four die varieties are known for the date and type. This coin represents Variety 1, called the Small Head variety by Walter Breen, with a straight line of curls at the back of Liberty's head. The few known proofs of this date were also struck from Variety 1 dies. It is likely that this coin was described as a proof by early catalogers

in its early auction appearances.

The present coin is a remarkable Plus-graded Select specimen with sharply detailed design elements and deeply mirrored prooflike fields. The lemon-yellow surfaces show a few grade-consistent contact marks and hairlines in the fields, including a scrape under the eagle's left (facing) wing that can serve as a pedigree marker. Over all eye appeal is outstanding. Census: 3 in 63 (1 in 63+) Prooflike, 7 finer (1/18). NGC ID# 25FS, PCGS# 77692

LIBERTY QUARTER EAGLES

1843-C Quarter Eagle, XF45 Scarce Small Date, Crosslet 4 Variant

4124 1843-C Small Date, Crosslet 4 XF45 PCGS. Variety 1. Die State III. A strong obverse die crack runs from the rim to the bust tip at 7 o'clock, with a die bulge surrounding the lower portrait that represents a late die stage. The Small Date with its Crosslet 4 is much scarcer than the 1843-C Large Date, which has a Plain 4. This Choice XF example shows brief wear with orange accents at the rims and on some of the raised elements, surrounded by lightly abraded fields. A few tiny tiny marks exist on the chin and cheek. Attractive greenish-gold color retains hints of mint luster. Population: 8 in 45, 28 finer (12/17).

From The Bayside Collection. NGC ID# 7HLG, PCGS# 7729

1844-C Quarter Eagle, AU55 Small Charlotte Mintage

4125 1844-C AU55 NGC. Variety 1. One die pair is known for the meager mintage of 11,622 pieces. Doug Winter estimates that only 150 to 175 coins survive in all grades. The present yellow-gold representative displays noticeable luster and is devoid of relevant abrasions. The strike is slightly soft at the centers, as usual. Under magnification, a fin rim is visible around much of each side. Census: 25 in 55, 28 finer (1/18).

Ex: Central States Signature (Heritage, 4/2012), lot 6372. From The Bayside Collection. NGC ID# 25GU, PCGS# 7735

1845-O Quarter Eagle, AU58 Variety 1, The Only Dies

4126 1845-O AU58 NGC. Variety 1. A mere 4,000 quarter eagles were struck at New Orleans in 1845, following a complete absence of the denomination the previous year. In fact, the Louisiana facility produced quarter eagles in only six of the 10 years that decade. Typical strike weakness is evident at the central reverse involving the shield and the eagle's legs and claws. The honey-gold surfaces are lustrous with minimal, grade-consistent marks. In addition to its low mintage and survival, the 1845-O quarter eagle is also a condition rarity as only three examples are certified in Mint State grades, two at PCGS and one at NGC. Census: 10 in 58, 1 finer (1/18). NGC ID# 25GR, PCGS# 7739

1846-C Quarter Eagle, AU50 Scarce in All Grades

1846-C AU50 NGC. Variety 1. Struck from clashed dies with a few small rust lumps visible under a loupe. This is the only die variety known for the 1846-C quarter eagle, which has a small mintage of 4,808 pieces. This issue is scarce in all grades with fewer than 125 pieces believed extant. The current coin displays medium yellow-gold coloration with trivial strike softness on the eagle's left (facing) leg. Light high-point wear appears on the wing and neck. Census: 9 in 50, 41 finer (1/18).

From The Bayside Collection. NGC ID# 25H2, PCGS# 7741

1846-D Two and a Half, AU58 Pleasing Original Coloration

4128 1846-D AU58 NGC. Variety 7-K. Faint traces of luster remain around the obverse margin of this high-end example, while the fields are otherwise bright and slightly reflective. Each side has a distinctive reddish tinge, and the centers show a bit of strike softness. Light abrasions are consistent with the grade and issue. The 1846-D is moderately plentiful in the context of Dahlonega quarter eagles, although near-Mint coins are conditionally scarce. Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4660. From The Bayside Collection. NGC ID# 25H3, PCGS# 7742

1853-D Quarter Eagle, AU55 Fewer Than 100 Pieces Known

4129 1853-D AU55 NGC. Variety 17-N. The 1853-D quarter eagle is a major key date in the Dahlonega series. Only 3,178 pieces were struck, and Doug Winter estimates that only 85 to 105 coins survive in all grades. This is in harmony with the PCGS survival estimate of "under 100 known." Obviously, resubmissions exist among the 112 grading events reported by NGC and PCGS combined. This Choice AU example displays bright yellow-gold patina and moderately abraded surfaces. Strike weakness at the centers is typical of the issue. Census: 9 in 55, 18 finer (1/18). NGC ID# 25HW, PCGS# 7768

1857-O Liberty Quarter Eagle, MS63 Tied for Finest at PCGS

4130 1857-O MS63 PCGS. Variety 1. The 1857-O was the final Liberty quarter eagle struck at the New Orleans Mint, an important consideration for branch mint type collectors. The 1857-O is not as difficult to locate in high grade as its mintage of 34,000 pieces would suggest, perhaps because some high-quality examples surfaced in a hoard discovered in Jackson, Tennessee in the early 1980s. Most of those coins graded XF40-MS62. However, the 1857-O remains a rare issue at the MS63 grade level.

The present coin is an impressive Select specimen, with welldetailed design elements that show a touch of the usual softness on the eagle's left (facing) leg. The pleasing orange-gold surfaces are lightly marked and radiate satiny mint luster on both sides. Population: 5 in 63, 0 finer (12/17). NGC ID# 25JE, PCGS#

1859-D Two and a Half Dollar, AU58 Minimally Abraded and Boldly Defined

4131 1859-D AU58 PCGS. Variety 22-N. Examples of this low-mintage issue (2,244 coins) tend to be found with severe and distracting abrasions. Smooth, minimally marked representatives like the present offering usually command significant premiums. The devices exhibit strong detail with limited friction over the highest central points of the design. Rich orange-gold surfaces show a hint of semiprooflikeness, particularly in the reverse field. About 150 to 175 1859-D quarter eagles are believed extant. Population: 20 in 58 (2 in 58+), 12 finer (12/17).

From The Bayside Collection. NGC ID# 25JM, PCGS# 7789

1872-S Two and a Half, MS61 Rare in Mint State

4132 1872-S MS61 NGC. The San Francisco Mint struck only 18,000 quarter eagles in 1872. Mint State survivors are rare in all grades. This piece displays sharp detail and original orange-gold luster. Satiny surfaces show minor chatter but lack bothersome abrasions. Eye appeal is outstanding for the grade. Census: 8 in 61, 9 finer (1/18). NGC ID# 25KL, PCGS# 7816

1892 Liberty Quarter Eagle, MS65 Elusive, Low-Mintage Issue

4133 **1892 MS65 PCGS.** The 1892 Liberty quarter eagle claims a low mintage of just 2,440 pieces, making the issue scarce-to-rare in all grades. This delightful Gem offers sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster throughout. Eye appeal is outstanding. Population: 5 in 65, 9 finer (12/17). NGC ID# 25LG, PCGS# 7844

1893 Quarter Eagle, MS67 One of Eight Superb Gems at PCGS and NGC None Certified Finer

4134 1893 MS67 PCGS. This sharply struck and impressive Superb Gem quarter eagle is adorned in peach-orange and sea-green shades. The smooth, nearly unmarked surfaces coruscate with vibrant, frosted mint luster. Like all quarter eagles from the 1890s, the mintage was small — just 30,000 pieces were struck in 1893. The present coin is tied for the finest known at either service, one of just three pieces so-certified at PCGS. Population: 3 in 67, 0 finer (1/18). NGC ID# 25LH, PCGS# 7845

PROOF LIBERTY QUARTER EAGLES

1893 Liberty Quarter Eagle, PR64+ Stunning Deep Cameo Surfaces

4135 1893 PR64+ Deep Cameo PCGS. According to Mint records, an average-sized mintage of 106 proof Liberty quarter eagles was produced in 1893 and PCGS CoinFacts estimates 50-75 examples are extant in all grades today. David Akers and Walter Breen both commented that the 1893 proof was at least as rare as the lower mintage 1892 issue. Two coins are impounded in the National Numismatic Collection at the Smithsonian Institution and a third piece is in the collection of the American Numismatic Society.

The present coin is a spectacular Plus-graded Choice proof, with razor-sharp definition on all design elements and deeply reflective fields throughout. This coin shows repunching on the lower parts of 93 in the date, a feature Walter Breen believed was diagnostic for 1893 proofs. The devices have a thick coat of mint frost that creates intense cameo contrast with the mirrored fields. The gold-on-black cameo flash this coin displays when tilted in the light is truly spectacular. The lemon-yellow surfaces show only minor signs of contact and the overall visual appeal is tremendous. Population: 5 in 64 (1 in 64+) Deep Cameo, 13 finer (1/18). NGC ID# 288G, PCGS# 97919

1894 Two and a Half, PR63 Cameo Vibrant Orange-Gold Contrasted Proof

4136 1894 PR63 Cameo PCGS. Jet-black, mirrored fields surround the gleaming, frosted devices of this orange-gold Select Cameo proof. The strike is razor-sharp on both sides, while a few delicate lines in the fields factor into the assigned grade. Just 122 proofs were struck, and no finer proofs exist with the Cameo designation (although somewhat strangely, several Deep Cameos are numerically finer). Population: 2 in 63 Cameo, 0 finer; 0 in 63 Deep Cameo, 18 finer (12/17).

From The Bayside Collection. NGC ID# 3XUL, PCGS# 87920

1895 Liberty Quarter Eagle, PR64+ Impressive Deep Cameo Specimen

4137 1895 PR64+ Deep Cameo PCGS. A fairly generous mintage of 119 Liberty quarter eagles was accomplished at the Philadelphia Mint in 1895 and PCGS CoinFacts estimates the surviving population at 60-80 examples in all grades. Jeff Garrett and Ron Guth note that population data for this issue has been inflated by resubmissions and crossovers, and offer a slightly lower estimate of 50-70 specimens all told. Two coins are included in the National Numismatic Collection at the Smithsonian Institution and another resides in the Collection of the American Numismatic Society.

The present coin is a delightful Plus-graded Choice proof, with sharply detailed, richly frosted design elements that contrast profoundly with the deeply mirrored fields to create a dramatic Deep Cameo appearance. The well-preserved orange-gold surfaces show only the most insignificant signs of contact and overall eye appeal is terrific. Population: 3 in 64 (1 in 64+) Deep Cameo, 14 finer (1/18). NGC ID# 288J, PCGS# 97921

1906 Liberty Quarter Eagle, PR64 Rare Cameo Example

4138 1906 PR64 Cameo PCGS. The Mint switched to an all-brilliant finish for proof coins after 1902, and coins with cameo contrast are seldom encountered from later dates. This remarkable Choice example exhibits sharply detailed design elements with an unusual amount of mint frost that contrasts boldly with the deeply mirrored fields. The lemon-yellow surfaces are well-preserved and eye appeal is outstanding. Population: 7 in 64 Cameo, 20 finer (1/18). NGC ID# 288W, PCGS# 87932

INDIAN QUARTER EAGLES

1911-D Indian Quarter Eagle, MS62 Low-Mintage Series Key

4139 1911-D MS62 NGC. The 1911-D Indian quarter eagle is the low-mintage key to the series, from a meager production total of 55,680 pieces. The mintmark is often weak on this issue, but this coin exhibits sharply detailed design elements throughout and the mintmark is quite bold. The lightly marked orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half Dollar, MS62 Razor-Sharp Strike

4140 1911-D MS62 PCGS. Strong D. Strike detail is razor-sharp throughout this Uncirculated key date example from the lowest mintage in the Indian Head quarter eagle series (55,680 coins). That includes the often-incomplete mintmark. Straw-gold surfaces exhibit satin luster and a scattering of superficial ticks. A partial wire rim, characteristic of genuine 1911-D quarter eagles, is present. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS62 Sharp Mintmark, Attractive Surfaces

4141 1911-D MS62 PCGS. The mintmark is sharp on this piece, and the satiny orange-gold surfaces show no major abrasions despite the MS62 grade. Attractive low-end Uncirculated examples of this key Denver issue are forever in strong demand. Specialists of the series know all too well the challenge of locating a coin in Mint State grades below MS63 that have not been dipped or otherwise cleaned. NGC ID# 7KR7, PCGS# 7943

PROOF INDIAN QUARTER EAGLE

1910 Quarter Eagle, PR66 Just Two Examples Finer at PCGS

4142 1910 PR66 PCGS. The public was not enamored with the Mint's attempt at a brighter, non-matte finish for its proof gold coinage. The new finish was introduced in 1909 when just 136 proofs were struck. Inexplicably, the Mint responded in 1910 by striking a record number of proofs (682 pieces, according to Mint records) with the same "Roman" gold finish. Again, the public demurred, and numerous unsold proofs were either melted or released into circulation, depending on whose research is believed. Perhaps the Mint record itself is incorrect, since the number of surviving pieces suggests a much smaller mintage.

While much research remains to be done about the actual number of proofs struck, sold, or otherwise dispersed, the population data suggests somewhere around 200 pieces survive today in all grades. This example is a bright yellow-gold example with satiny texture and a pinpoint sharp strike. PCGS has seen just two numerically finer examples. Population: 11 in 66, 2 finer (12/17). From The Douglas Knight Collection, Part II. NGC ID# 7KRP, PCGS# 7959

THREE DOLLAR GOLD PIECES

1878 Three Dollar Gold, MS65 Ideal Type Candidate

4143 1878 MS65 NGC. The first year of issue, 1854, had the highest mintage of any three dollar gold piece, and was the only issue with more than 100,000 coins minted. The next highest mintage was 1878 with a production of 82,304 coins. Those two issues are the ideal candidates for a type collection, as they are each available in nearly any desired grade. This frosty Gem has a high degree of brilliant yellow mint luster and exceptional design definition with nearly flawless surfaces. NGC ID# 25MZ, PCGS# 8000

1879 Three Dollar Gold, MS64+ Well-Preserved and Lustrous

4144 1879 MS64+ PCGS. Only 3,000 business-strike three dollar gold pieces were struck at the Philadelphia Mint in 1879, after a substantial mintage the year before satisfied the needs of the national economy for several years. This Plus-graded Choice example offers sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster throughout. PCGS has graded 49 numerically finer examples (12/17). NGC ID# 25N2, PCGS# 8001

1879 Three Dollar, MS64 Smooth, Semireflective Fields

4145 1879 MS64 PCGS. CAC. After a temporary period of mass three dollar gold production in 1878, output returned to normal in 1879, when only 3,000 coins were struck. Comparable examples to the present are seldom seen, and finer coins in Gem condition or better are moderately rare. This smooth yellow-gold offering is strongly struck on the curls and wreath. The surfaces are lustrous with a hint of semiprooflike reflectivity in the fields. NGC ID# 25N2, PCGS# 8001

PROOF THREE DOLLAR GOLD PIECE

1885 Three Dollar Gold, PR62 Cameo Rare Date as a Proof or Business Strike

4146 1885 PR62 Cameo PCGS. The 1885 three dollar gold piece is a rare issue from a mintage of only 801 business strikes and 109 proofs. Examples enjoy strong demand in all grades, and are usually only found in Mint State or proof. Circulated coins are extremely rare. This lovely Cameo proof has fully mirrored yellow-gold surfaces with satin, boldly detailed devices. A highly appealing example despite faint hairlines and minuscule contact marks. Population: 2 in 62 Cameo, 24 finer (1/18).

Ex: Central States Signature (Heritage, 4/2014), lot 6291. NGC ID# 28AU, PCGS# 88049

EARLY HALF EAGLES

1795 BD-9 Small Eagle Five, AU50 Dramatic Old Toning, Late Die State

4147 1795 Small Eagle, BD-9, High R.5, AU50 NGC. Bass-Dannreuther Die State b/c. The obverse shows light die clashing and the reverse has a prominent die crack through the N in UNITED, terminating at the eagle's breast feathers. The earliest 1795 Small Eagle half eagles display star 1 mostly below the lowest hair curl, and the later varieties have that star left of the lowest hair curl, as on the 1796 and 1797 half eagles. The BD-9 die combination is included in the later group.

This pleasing AU specimen is richly toned with light, yellow-gold surfaces augmented by considerable deep-violet patina on both sides. Faint adjustment marks are evident on the hair near the ear, with scattered minor handling marks on each side. Reddish-gold mint luster surrounds many of the devices. A scarce early half eagle, sharply defined for the assigned grade with impressive eye appeal. Ex: Central States Signature (Heritage, 4/2013), lot 4502. NGC ID# 25ND, PCGS# 519858 Base PCGS# 8066

1798 Capped Bust Right Five, XF45 Large Eagle, Large 8, BD-4

4148 1798 Large Eagle, Large 8, 13 Stars Reverse, BD-4, High R.4, XF45 NGC. Bass-Dannreuther Die State d/e, with a clash mark at Liberty's ear, cuds at the edge above ES in STATES and O in OF, and a thin die crack through the stars on the right. This Choice XF specimen offers well-detailed design elements with only light wear, and lightly abraded orange-gold surfaces. Three small planchet voids are evident on the bust. NGC ID# BFX6, PCGS# 507324 Base PCGS# 8078

1799 Capped Bust Right Half Eagle, AU53 Large Reverse Stars, Rare BD-8 Example

4149 1799 Large Reverse Stars, BD-8, R.6, AU53 NGC. Bass-Dannreuther Die State b/a, with a bisecting vertical die crack from the rim near the L in LIBERTY to the rim below the 7 in the date. This is the second use of this obverse, though it would later be paired with a leftover 1798 reverse die to strike BD-9; this is the only use of this reverse die. BD-8 is one of the rarer varieties of the 1799 half eagle, with only 22 to 30 examples believed extant.

This piece is a remarkably attractive About Uncirculated representative, with fully original olive and orange-gold coloration. Only slight wear is seen over each side, with all design elements well-defined. A few minor surface marks are noted, but none are individually noteworthy. An important opportunity for the variety specialist, the present coin is a rare and elusive representative of the Large Reverse Stars type.

Ex: ANA Signature (Heritage, 8/2014), lot 3850.

From The Bayside Collection. PCGS# 519883 Base PCGS# 98081

1800 BD-5 Half Eagle, MS62 Rare Terminal Die State

4150 1800 BD-5, High R.3, MS62 PCGS. Bass-Dannreuther Die State e/c. Field star 13 touches the back of the eagle's neck to confirm the reverse die, while a faint bisecting crack runs from top to bottom of the obverse from above the cap (right of star 8) through the cap and hair, to the bottom rim left of 1 in the date. Other cracks at IBER of LIBERTY foretell the terminal stage in the obverse die's final use. The reverse die is terminal as well, with a bold crack at R in AMERICA and an arrows-to-branch crack across the shield bottom.

This lemon-gold example is sharply struck given the advanced die state. Mint luster glows from the margins and radiates across the central elements. Liberty's hair strands and cap folds are crisp while mint frost attends the reverse fields and devices. Only a few tiny marks are visible across the obverse fields, and a pair of small digs near S in STATES may be miniature planchet flaws. Overall, this attractive early half eagle is devoid of significant marks.

From The Bayside Collection. NGC ID# 25NW, PCGS# 45595 Base PCGS# 8082

1803/2 BD-3 Half Eagle, XF45 Exceedingly Sharp for the Grade

1803/2 BD-3, R.4, XF45 NGC. CAC. Bass-Dannreuther Die State d/a. The obverse die was lapped in its previous use on BD-2, with stars 8 and 9 noticeably thin. Faint die cracks above star 6 and from stars 10 to 13 remain. The fields are quite reflective as a result of the die refinishing. A fresh reverse die in its first use retains much field reflectivity, with no cracks or die clashing visible. The eagle's shoulder (viewer's left) is sharp and feathered, as opposed to later die stages where die lapping removes its edge. The overdate remains bold as is the overall strike, with rub at the forecurl, yet the overall strike is extra-sharp for the Choice XF grade. Vibrant orange-gold color deepens at the margins for excellent eye appeal, recognized by the assigned CAC endorsement.

From The Bayside Collection. NGC ID# 25NY, PCGS# 504950 Base PCGS# 8084

1803/2 Five Dollar, AU53 BD-4, Good Detail for the Grade

4152 1803/2 BD-4, R.4, AU53 PCGS. Bass-Dannreuther Die State c/c. A die crack runs through the base of the date nearly to star 1. A simple identifier for the BD-4 die pair is the complete right foot on the T in LIBERTY. The Early U.S. Gold Coin Varieties reference provides a survival estimate of 125 to 175 coins from a possible mintage of 6,000 to 9,000 pieces (33,506 total for the date). This is an appealing coin for the grade with minimal friction on Liberty's portrait. The eagle's feathers exhibit bold detail. Bright yellowgold color and glints of original luster within the star recesses characterize the surfaces.

From The Bayside Collection. NGC ID# 25NY, PCGS# 504951 Base PCGS# 8084

1806 Half Eagle, XF45 BD-1, Pointed 6, 8x5 Stars

4153 1806 Pointed 6, 8x5 Stars, BD-1, R.4, XF45 PCGS. Bass-Dannreuther Die State c/e. This is the most accessible of the Pointed 6 varieties, though it is substantially rarer than the Knobbed or Round 6 die pair and very scarce regardless of grade. The present Choice XF example displays rich orange-gold color with occasional glimpses of luster carried over in the protected areas. The coin is minimally abraded for a two-centuries-old half eagle and thoroughly pleasing throughout both sides. Ex: Rosemont Signature (Heritage, 8/2013), lot 5057.

From The Bayside Collection. NGC ID# 25P7, PCGS# 45621 Base PCGS# 8090

1806 BD-6 Five Dollar, VF30 7x6 Stars, Round Top 6

4154 1806 Knob 6, 7x6 Stars, BD-6, R.2, VF30 PCGS. Bass-Dannreuther Die State b/c. BD-6 is the sole 1806 die marriage with the Knob (Round Top) 6, and also the only variety with the obverse stars arranged 7x6. This is a pleasing midgrade example of the Knob 6 type, with tawny olive-gold patina and smoothly worn devices. Most marks are muted by moderate circulation, with some microgranularity visible with a loupe.

From The Bayside Collection. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1806 Knob 6, 7x6 Stars Half Eagle, BD-6, XF45 Ideal Capped Bust Right Type Coin

4155 1806 Knob 6, 7x6 Stars, BD-6, R.2, XF45 NGC. Bass-Dannreuther Die State a/b. Always in demand as the sole Round Top, Knob 6 variety for the year, this solid XF example shows light wear and a few scattered abrasions across pleasing, apricot-gold surfaces. The coin is boldly struck from an early die stage, with light die clashing on the reverse but no discernible obverse die cracks. Nor are there any adjustment marks on either side, making this a Choice example of the only 1806 half eagle with the obverse stars arranged in a 7x6 configuration.

From The Bayside Collection. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1806 Capped Bust Right Half Eagle, AU55 Knob 6, 7x6 Stars, BD-6 Variety

4156 1806 Knob 6, 7x6 Stars, BD-6, R.2, AU55 NGC. Ex: Ashland City. This attractive Choice AU specimen represents the popular BD-6 variety, the only Knobbed 6 variety of the date. While the Knobbed 6 1806 is a common issue among early fives, it is a worthwhile coin in Choice AU condition. This piece has strong remaining mint luster around the devices with a few small abrasions scattered over each side. Sharply defined in the centers with some peripheral weakness evident on the obverse stars. While this issue is often encountered with heavy adjustment marks, the only ones on this piece are a few light, almost unnoticeable ones on the right side of the reverse.

Ex: FUN Signature (Heritage, 1/2003), lot 4721. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1806 Knob 6 Half Eagle, Crisp AU58 7x6 Stars, BD-6, Much Remaining Luster

4157 1806 Knob 6, 7x6 Stars, BD-6, R.2, AU58 NGC. Bass-Dannreuther Die State c/d. Lightly cracked and clashed. The Knob 6 is the key diagnostic for BD-6. All other varieties feature a Pointed 6 in the date. Additionally, this is one of the most accessible of all early half eagles with a population estimated in the range of 600 to 900 coins. Naturally, high-grade survivors with good eye appeal like this near-Mint offering command strong prices from type and date collectors. Bold relief elements and partial remaining frost define each side. Light yellow-gold surfaces display scattered marks, but they are of minimal importance.

From The Bayside Collection. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1806 Knob 6 Half Eagle, BD-6, MS64 A Choice Mint State Condition Rarity

1806 Knob 6, 7x6 Stars, BD-6, R.2, MS64 NGC. Bass-Dannreuther Die State d/e. There is only one set of clash marks in the lower shield, whereas reverse die state f has been seen with a closely spaced double set. BD-6 is the only die variety of the date with a Round Top 6 instead of the Pointed 6, and it is the only variety with six stars after LIBERTY instead of the expected five stars. As a result, the right obverse border is crowded, while the left border has a relatively large open area near Liberty's shoulder, where star 1 is usually found.

John Dannreuther estimates that as many as 900 examples of the 1806 BD-6 half eagle survive today, and that is far more than any other early half eagle variety from 1795 to 1834. The significant survival means this variety is the ideal type coin for collectors who only seek one example of every major design. Despite the large population, few pieces survive that are equal to this representative. The combined NGC and PCGS population shows a total of 62 Choice coins with only four finer examples in Gem condition (1/18). The sun-gold surfaces display billowy luster and only inconsequential marks. Sharply struck except on the junction of the left (facing) wing. Faint greenish overtones add to the eye appeal. Ex: Chicago Signature (Heritage, 8/2011), lot 7521; Philadelphia Signature (Heritage, 8/2012), lot 5351; ANA Signature (Heritage, 10/2012), lot 5829. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1807 Bust Right Half Eagle, XF45 BD-4, Curl Above Flag of 1 Vibrant Original Color

4159 1807 Bust Right, BD-4, High R.4, XF45 PCGS. Bass-Dannreuther Die State c/a. The reverse is in its first use for BD-4, while the obverse die was lapped to remove heavy die clashing. As a result, the surfaces are semireflective and visually free of any Mint-related anomalies other than a die gouge beneath R in LIBERTY. There are no adjustment marks or significant planchet defects. A short die crack above the cap on the obverse remains from the previous use of that die on BD-3. While the BD-4 variety is slightly more available than its BD-3 predecessor, it is still very scarce with perhaps 75 to 90 survivors in all grades. This Choice XF example remains lustrous with minimal wear and marks for the assigned grade. A sharp strike exists on both sides of the pleasing, yellow-gold surfaces with original orange accents at the margins and on the high points. Housed in a previous generation blue label holder with barcode on the back.

From The Bayside Collection. NGC ID# CKLF, PCGS# 519901 Base PCGS# 8092

1807 Bust Right Half Eagle, XF40 Very Rare BD-5 Die Marriage Late Die Stage

A160 1807 Bust Right, BD-5, High R.6, XF40 PCGS. Bass-Dannreuther Die State c/b. The B-D reference says, "There are likely 20 or so still around, but by far, this is the toughest variety of this date." The obverse is in its near-terminal state with numerous die cracks heavy and fully extended. The reverse is in a rather puzzling die stage, since it shows the full die crack beneath the N in UNITED through the arrows, upward through the left (facing) shield point into and among the field stars to cloud 2. A later die state is said to exist where the crack is lapped away. This is a remarkably sharp and attractive, green-gold example of the rare BD-5 variety, with plentiful remaining mint luster. Housed in a green label holder. From The Bayside Collection. NGC ID# CKLF, PCGS# 519902 Base PCGS# 8092

1807 Bust Left Five Dollar, BD-8, MS63 Shimmering, Semiprooflike Surfaces

4161 1807 Bust Left, BD-8, R.2, MS63 PCGS. Bass-Dannreuther Die State d/b, clashed. The 1807 Capped Bust Left five dollar coins were produced in two varieties using one obverse die paired successively with two different reverses, but the BD-7 is rated High R.5 while the BD-8 is much more available at R.2, or several hundred survivors known. This piece is nonetheless conditionally rare so fine, with striations in the fields, in this case created from die polishing, creating a shimmering semiprooflike effect. The mint luster is superior throughout both sides, and the strike is also sharp overall. Only a few minor field marks appear to preclude an even finer grade. Population: 42 in 63, 30 finer (1/18).

Ex: Long Beach Signature (Heritage, 2/2012), lot 4757. NGC ID# CKLH, PCGS# 507607 Base PCGS# 8101

1809/8 BD-1 Five Dollar, AU55 Crisp Definition, Lustrous Design Recesses

4162 1809/8 BD-1, High R.3, AU55 PCGS. Bass-Dannreuther b/b, with cracks connecting the stars and a clashed reverse. Dentilation is clear, the star centers and radials are well-defined, and crisp detail appears on the curls and feathers. Just a hint of friction is evident, and it certainly does not detract from this pleasing, rich yellowgold half eagle. Impressively, remaining luster emerges from the protected areas of the design. A single die pair was used to strike as many as 33,875 five dollar gold pieces in 1809.

From The Bayside Collection. NGC ID# BFXK, PCGS# 507603 Base PCGS# 8104

1810 Capped Bust Left Half Eagle, AU53 Small Date, Tall 5, BD-1

4163 1810 Small Date, Tall 5, BD-1, High R.3, AU53 NGC. Bass-Dannreuther Die State a/a, actually, an intermediate state with the faint die crack showing at stars 3 through five, but no crack through the date. This attractive AU 53 specimen shows just a touch of wear on the well-detailed design elements, and the pleasing orange-gold surfaces are remarkably free of large or distracting abrasions. NGC ID# BFXM, PCGS# 507596 Base PCGS# 8106

1810 Five Dollar, MS63 Large Date, Large 5, BD-4

4164 1810 Large Date, Large 5, BD-4, R.2, MS63 PCGS. Bass-Dannreuther Die State c/b. Coruscating cartwheel luster sweeps the olive-green and wheat-gold surfaces. Both sides are refreshingly unabraded. Faint roller marks, as made, are noted on the eagle's shield, but the strike is generally sharp. A later die state for the Large Date, Large 5 variety, which is often selected for type purposes. The Dannreuther reference for obverse die state c describes a crack between the 81 in the date, but close examination reveals it is a die line instead. The terminal Bass-Dannreuther die state, d/c, has not been confirmed in our auction appearances. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

1811 Half Eagle, AU53 Lustrous Tall 5, BD-1 Example

4165 1811 Tall 5, BD-1, High R.3, AU53 PCGS. Bass-Dannreuther Die State b/d. This frosted and partially lustrous half eagle is sharply defined despite light wear on the curls below Liberty's cap. Attractive greenish-gold color flows evenly across both sides. The 1811 mintage of 99,581 pieces was split between two varieties. The Tall 5, wide denomination die marriage (BD-1) is slightly scarcer than the Small 5 variety (BD-2), yet they are valued about the same in all grades. The present Tall 5 example is particularly well-preserved for the AU53 grade level. Marks are minimal. Population (Tall 5 variety): 4 in 53, 62 finer (12/17).

From The Bayside Collection. NGC ID# BFXS, PCGS# 507600 Base PCGS# 8110

1811 Half Eagle, Partly Lustrous AU50 Small 5, BD-2

4166 1811 Small 5, BD-2, R.3, AU50 NGC. Bass-Dannreuther Die State d/a. The reverse lacks clash marks seen in the later state. Two different reverses were paired with a single obverse die in 1811. Small 5 coins (BD-2) are slightly more available than Large 5 representatives, though both variants appear at auction with nearly the same degree of frequency. Slight friction over well-struck devices explains the technical assessment, but the appeal of this About Uncirculated half eagle is enhanced by partial luster and light yellow-gold coloration. Wispy marks and ticks are normal.

From The Bayside Collection. NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

1811 Small 5 Half Eagle, BD-2, AU50 Bright Luster Remains

4167 1811 Small 5, BD-2, R.3, AU50 NGC. Bass-Dannreuther Die State d/a. Both sides of this partially lustrous, bright yellow-gold half eagle are void of die cracks or clash marks. Needle-sharp design detail is minimally affected by a trace of high-point rub that defines the grade. Myriad marks, most of them minute, are peppered over each side. Both varieties of the 1811 half eagle are collectible in the sense that they come to market relatively often. The presence of an attractive, problem-free example with remaining luster would nonetheless highlight any collection.

From The Bayside Collection. NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

1812 Half Eagle, BD-1, AU55 Wide 5D Variant, Choice Surfaces

4168 1812 Wide 5D, BD-1, R.3, AU55 PCGS. Bass-Dannreuther Die State a/a. A respectable mintage of 58,087 pieces includes two die varieties — the Wide 5D denomination and the much scarcer Close 5D. The difference is clear between BD-1 (Wide 5D, the present example) and BD-2, which has the narrowly spaced denomination. Preferred by type collectors, BD-1 is readily available among all the Draped Bust to Left half eagles (1807 to 1812) and among all early gold issues. This still-lustrous, Choice About Uncirculated example is sharply struck with vivid greengold centers and orange accents at the margins. A touch of wear and a few nondescript, small marks account for the assigned grade.

From The Bayside Collection. NGC ID# 25PL, PCGS# 507601 Base PCGS# 8112

1813 BD-1 Half Eagle, MS63 CAC-Approved Type Coin

4169 1813 BD-1, R.2, MS63 NGC. CAC. Bass-Dannreuther Die State a/a, unclashed. The 1813 is a popular type coin issue, and BD-1 is the more plentiful of the two die varieties. John Dannreuther states in Early U.S. Gold Coin Varieties: "This type was more extensively hoarded and melted than the prior one, so most of the survivors are in high grade — the average survivor for this type is usually found in the higher circulated grades or Uncirculated..." Even so, the quality of Uncirculated 1813 coins varies significantly. The present example displays a sharp strike everywhere except on stars 1 and 2 and the eagle's left (facing) inner wing. Satiny yellow-gold luster shows no major abrasions, and eye appeal is excellent. Census: 36 in 63 (2 in 63+), 25 finer. CAC: 13 in 63, 17 finer (1/18). NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

1813 Five Dollar, AU50 BD-2, Strongly Detailed

4170 1813 BD-2, R.4, AU50 NGC. Bass-Dannreuther Die State d/b. Light clash marks on each side. BD-2 is the rarer of two die varieties, distinguished by the first S in STATES relatively close to the scroll end. John Dannreuther has suggested this die marriage represented roughly 25% of all 1813 half eagles struck, and an estimated 150 to 200 pieces survive. Hints of luster glitter within the star recesses. Light merging and trivial wispy marks occur over orange-gold surfaces. Strike detail remains strong with full radial lines, and bold curls and feathers.

From The Bayside Collection. NGC ID# 25PM, PCGS# 45648 Base PCGS# 8116

1813 BD-2 Half Eagle, Unc Details Struck-Through on Reverse

4171 1813 BD-2, R.4 — Struck-Through Reverse, Cleaned — PCGS Genuine. Unc Details. Bass-Dannreuther Die State d/b. This piece is boldly struck with luminous, softly frosted yellow-gold surfaces. Under a loupe, faint hairlines can be seen on the obverse that prevent a numeric grade, but these are hardly distracting. A lack of bothersome abrasions makes this coin substantially more appealing than many graded pieces that we have seen in the lower Mint State range. Struck through a rather large piece of frayed fabric on the lower reverse with another threadlike strike-through along the upper-left border.

CLASSIC HALF EAGLES

1836 Second Head Five Dollar, MS63 Seldom Seen Finer

4172 1836 MS63 PCGS. Breen-6509, McCloskey 4-D, R.2. Second Head, Large Date. This Select Classic Head five is highly attractive, showing semiprooflike yellow-gold fields and well-struck, frosty devices that exhibit minor weakness only on the left shield border. The surfaces show only light field chatter that determines the grade, with few overt marks.

Most Uncirculated examples of this issue grade no finer than MS62. Typically, collectors only choose to acquire a single example of the issue for type or date purposes, although there are nine different varieties for the more ambitious specialists, using the John McCloskey table. McCloskey 4-D is one of the most plentiful of these varieties, ideal for adding a high-end coin to a collection without breaking the bank. All 1836 varieties are available in at least some capacity save for McCloskey 7-F, which is an R.7 rarity. Ex: Long Beach Signature (Heritage, 9/2012), lot 4911. NGC ID# 25RY, PCGS# 8174

1838-C Half Eagle, VF30 Normal 5, Initial Charlotte Issue

4173 1838-C VF30 PCGS. Breen-6517, Normal 5, Variety 1, R.4. A total of \$127,000 in domestic gold was deposited at the Charlotte Mint in 1838. Nearly 68% of that amount was converted into half eagles (17,179 coins). The 1838-C is perennially in high-demand as a first-year and single-year-of-issue type. According to Winter, about 200 to 250 pieces survive in all, both varieties included. This variety is identified by the leaf spaced away from the U in UNITED. The coin is well-circulated and heavily abraded. Still, the major elements are clear over orange-gold surfaces. Housed in an old green label holder. NGC ID# 25S5, PCGS# 8177

1838-D Half Eagle, Choice VF Lone Classic Head Dahlonega Five

4174 1838-D VF35 PCGS. McCloskey 1-A, R.3. Only a single Classic Head half eagle issue was struck at the Dahlonega Mint: the 1838-D. This issue is immensely popular as a type coin but is also distinctive for having the mintmark on the obverse, above the date. The piece offered here is bright yellow-gold with moderate surface chatter. Light high-point wear leaves the devices nearly worthy of an XF designation. NGC ID# 25S6, PCGS# 8178

LIBERTY HALF EAGLES

1840-C Half Eagle, AU53 Highly Elusive Charlotte Five

4175 1840-C AU53 PCGS. Variety 2. Although a bit softly struck in the centers, as always for the scarce 1840-C half eagle, this About Uncirculated example is sharply defined in other areas with only minor abrasions that interrupt smooth and attractive surfaces. Traces of semiprooflike flash remain around raised elements while rich, greenish-gold color adds eye appeal. Doug Winter estimates between 125 to 150 pieces known, most of which are in XF or lesser grades. Population: 12 in 53, 28 finer (12/17).

From The Bayside Collection. NGC ID# 25VD, PCGS# 8196

1840-O Half Eagle, AU58 Challenging in High Grade

4176 1840-O Narrow Mill AU58 NGC. Variety 3. This early New Orleans issue was a workhorse in Southern commerce, and Mint State survivors are rare. This nearly Uncirculated example retains substantial luster in the peripheral regions and displays medium yellow-gold patina overall. A little softness on the central hair curls and the upper-left corner of the shield is evidence of brief circulation, and this piece is actually fairly well struck for the issue. Census: 28 in 58, 17 finer (1/18). NGC ID# 25SK, PCGS# 8200

1842-O Half Eagle, AU55 Variety 1, The Only Dies

4177 1842-O AU55 NGC. Variety 1. A single die pair accomplished the annual mintage of 16,400 coins in New Orleans in 1842. This Choice AU example features an above average strike with light yellow-gold surfaces and excellent eye appeal. Scattered marks and lines are trivial. Census: 9 in 55, 4 finer (1/18). NGC ID# 25SZ, PCGS# 8212

1853-D Half Eagle, MS60 Attractive Mint State Dahlonega Gold Piece

4178 1853-D MS60 NGC. Variety 34-Y. The mintmark is over the E in FIVE and leans slightly to the left on this variety. The 1853-D is a plentiful Dahlonega issue, ideal for type purposes, although Mint State examples are rare. This coin displays well-struck central devices but is weak around portions of the border dentils — a distinctive characteristic of the issue. The surfaces are satiny yellow-gold and without any wear. NGC ID# 25UF, PCGS# 8255

1853-D Five Dollar, MS61 Scarce Uncirculated Example, Large D Left

4179 1853-D MS61 NGC. Variety 35-X. The Large D mintmark has its upright beneath the feather tip, mostly over V in FIVE, to help identify this scarce variety. Although the 1853-D is the most available Dahlonega Mint half eagle, it is doubly scarce in Mint State for the die marriage. Smooth, orange-gold surfaces are sharply struck with only a few tiny marks visible anywhere on the coin. Certainly among the finest of this seldom-seen variety. Census (all varieties combined): 21 in 61 (1 in 61+), 15 finer (1/18). NGC ID# 25UF, PCGS# 8255

1861-D Liberty Half Eagle, XF Details Most Elusive Dahlonega Five

4180 1861-D — Altered Surfaces — PCGS Genuine. XF Details. Variety 46-JJ. Mint records indicate 1,597 Liberty half eagles were struck at the Dahlonega Mint in 1861, first under federal authority, and later under the auspices of the Confederacy, using up the remaining bullion after the facility was seized. The 1861-D is the rarest half eagle from the Dahlonega Mint and branch mint type collectors prize the coins as the final issue of the Dahlonega series. Only one die variety is known, called 47-GG in the latest edition of Doug Winter's book, and 46-JJ by Heritage numismatist Brian Koller, who has done some groundbreaking work on the series.

The present coin shows a typical strike for the issue, with some weakness on the star centers, Liberty's hair, and the eagle's claws. Only light wear is apparent, but the orange-gold surfaces seem unnaturally dull, indicating some form of alteration. A few small planchet voids show on both sides, but the surfaces are lightly abraded and the overall presentation is quite pleasing for this in-demand Southern gold issue.

1878 Liberty Half Eagle, MS65 Among the Finest at NGC

4181 1878 MS65 NGC. The 1878 Liberty half eagle claims a mintage of 131,740 pieces and the issue is very rare at the MS65 grade level. This delightful Gem features sharply detailed design elements and virtually flawless orange-gold surfaces, with vibrant satiny mint luster on both sides. Census: 6 in 65 (1 in 65+), 0 finer (1/18). NGC ID# 25X4, PCGS# 8345

1880 Half Eagle, MS65+ Frosty Luster, Beautiful Color

4182 1880 MS65+ PCGS. Overall, the 1880 half eagle is plentiful, although Choice examples are moderately scarce and Gems are genuinely rare. This Plus-graded Gem has few peers and few superiors. Frosty original mint luster shows shades of orange, rose, and lilac with only a few minor abrasions. The strike is sharp and eye appeal is outstanding. Population: 22 in 65 (4 in 65+), 4 finer (1/18). NGC ID# 25XA, PCGS# 8351

1884-CC Half Eagle, AU58 Variety 1-A, The Only Die Pair

4183 1884-CC AU58 NGC. CAC. Variety 1-A. A splendid near-Mint example from a single die pair that was used for 16,402 Carson City half eagles struck in 1884. All genuine examples have a diagonal, raised die line across Liberty's cheek, as observed on this piece. The fields of this lovely yellow-gold half eagle are lightly mirrored, with trivial marks as expected for the grade. A splendid representative that is rarely seen in finer grades. Census: 35 in 58, 6 finer. CAC: 11 in 58, 1 finer (1/18). NGC ID# 25XP, PCGS# 8365

1890-CC Half Eagle, MS62+ Variety 1-A

4184 1890-CC MS62+ PCGS. CAC. Variety 1-A. The only known die pair was used for the mintage of 53,800 half eagles at Carson City in 1890. This lustrous yellow-gold representative has a few scattered, grade-consistent marks on its pleasing surfaces. A sharply struck and attractive representative. CAC: 22 in 62, 19 finer (1/18). NGC ID# C5XF, PCGS# 8376

1891-CC Liberty Half Eagle, MS64 Very Rare Any Finer

4185 1891-CC MS64 NGC. Variety 2-A. From a respectable mintage of 208,000 pieces, the 1891-CC Liberty half eagle is very scarce in MS64 condition and finer coins are very rare. This attractive Choice specimen exhibits sharply detailed design elements and lightly marked orange-gold surfaces with vibrant, satiny mint luster. Census: 69 in 64 (9 in 64+), 8 finer (1/18). NGC ID# 25Y5, PCGS# 8378

1891-CC Liberty Half Eagle, MS64+ Conditionally Very Rare in Higher Grades

4186 1891-CC MS64+ PCGS. CAC. Variety 2-A. The 1891-CC Liberty half eagle claims a substantial mintage of 208,000 pieces, but few survivors can match the technical quality and eye appeal of the present coin. This Plus-graded Choice example displays sharply detailed design elements in most areas, with some diagnostic incomplete detail on the banner below WE, due to lapping. The repunched top of a second 1 shows at the top of the final digit in the date and the well-preserved orange-gold surfaces are brightly lustrous throughout. Population: 87 in 64 (4 in 64+), 2 finer. CAC: 20 in 64, 0 finer (1/18). NGC ID# 25Y5, PCGS# 8378

1893-CC Five Dollar, MS62 Dramatic Prooflike Contrast

4187 1893-CC MS62 PCGS. Variety 2-A. The Carson City Mint's final production of five dollar gold coins amounted to 60,000 pieces using two obverse dies and two reverse dies, resulting in three distinct varieties. Variety 2-A has the 1 in the date centered directly over a dentil. This must have been one of the first coins off the press after a new obverse was implemented. The previously used reverse was polished as well. Each side is overtly prooflike with dramatic contrast. The devices are fully rendered. Scattered wispy marks limit the technical grade. PCGS reports 24 finer submissions (1/18). NGC ID# 25YB, PCGS# 8384

INDIAN HALF EAGLES

1908 Indian Head Five, MS65+ Smooth, Luminous Surfaces

4188 1908 MS65+ PCGS. This straw-gold, high-end Gem 1908 Indian five displays exemplary field quality with luminous mint luster. The strike is sharp and eye appeal is exceptional. The 1908 is available in MS65 but elusive with the Plus designation seen here. PCGS has certified only 25 finer examples, possibly including resubmissions (1/18). NGC ID# 28DE, PCGS# 8510

1908 Indian Half Eagle, MS65+ Exceptional Luster

4189 1908 MS65+ PCGS. This well-struck, high-end Gem is an ideal Indian Head type coin, coming from the first year of issue for the series. Luminous, frosty yellow-gold luster is original, and the only surface abrasions on the obverse are a few minor marks in the left field near star 6. On the reverse, a few other field grazes are visible behind the eagle's head. PCGS has seen only 25 finer representatives (1/18). NGC ID# 28DE, PCGS# 8510

1909-D Five Dollar, Rose-Gold MS65 Only Five Finer Coins at PCGS

4190 1909-D MS65 PCGS. A sharp, satiny Gem with well-preserved fields and original rose-gold mint luster. The 1909-D is famous for its substantial mintage of more than 3.4 million coins and is popular for type purposes. However, it is conditionally scarce in MS65, and PCGS has seen only five numerically finer examples (1/18). This piece is outstanding for the grade in every respect. NGC ID# 28DJ, PCGS# 8514

1909-O Indian Head Five, AU53 One-Year New Orleans Type

4191 1909-O AU53 NGC. Light wear is apparent on this piece, although such only makes it more accessible to a wider range of collectors. The design elements retain strong detail and each side has medium brass-gold color. A few light field marks are not unusual for the grade. The 1909-O is a famous New Orleans issue and a major key date in the Indian half eagle series. About Uncirculated examples are in constant demand from series specialists and O-mint gold collectors. NGC ID# 25ZK, PCGS# 8515

1914-S Indian Half Eagle, MS63 Prime Condition Rarity at This Grade

4192 1914-S MS63 PCGS. CAC. Satiny honey-gold surfaces show lilac accents throughout the smooth, raised fields while soft mint luster glows from the recessed design elements. Well-produced for a 1914-S, only a some minor blending of the lower headdress feathers is of note. Marks are limited to a few tiny ticks searched out with a loupe. Scarce in all Mint State grades, the 1914-S is very scarce in Select Uncirculated condition and rare any finer. Population: 52 in 63, 9 finer. CAC: 12 in 63, 4 finer (1/18). NGC ID# 28DW, PCGS# 8529

EARLY EAGLES

1795 Ten Dollar, Near-Mint Small Eagle, 13 Leaves, BD-1 First Issue in the Series

4193 1795 13 Leaves, BD-1, High R.3, AU58 NGC. Bass-Dannreuther Die State a/a. The 1795 Small Eagle ten dollar represents the first emission in the series. These numismatically and historically significant coins are highly sought-after as such. In all, an estimated 5,583 coins were struck bearing this date. Additional Small Eagle tens were manufactured in 1796 and 1797 but in limited quantities. As a type, the Small Eagle ten dollar claims a total production of at most 15,251 pieces. John Dannreuther explains "this type is quite scarce, as the total number of extant examples is probably only slightly greater than 500. Many of them have problems; this leaves only a few hundred problemfree examples of all varieties available to collectors."

Three obverse dies and three reverse dies were used to produce five distinct varieties for the 1795 eagle. One of those is the very rare BD-3 marriage with only nine leaves on the reverse branch. All others have 13 leaves. BD-1 is the usually seen variety for the year. It features star 9 very close to the Y in LIBERTY, and a leaf touches the U in UNITED. Probably more than 200 1795 BD-1 tens survive, the most of any Small Eagle variety struck between 1795 and 1797. If one were to target a single die pair for type representation, it would be this one.

Coloration is bright yellow-gold on each side, showing visible semiprooflikeness in the fields. Full dentils are apparent around the borders, and strike definition is strong over the centers. The eagle's breast feathers are nearly complete with just a touch of friction over the highest points. Numerous marks, including several thin, wispy pinscratches, are noted. The most obvious one almost joins star 6 to Liberty's middle curls. An exceptionally high-grade and attractive survivor destined for another advanced set.

From The Admiral Collection. NGC ID# 25ZU, PCGS# 45710 Base PCGS# 8551

1795 Capped Bust Right Eagle, AU55 Important First-Year *Guide Book* Issue Rare 9 Leaves, BD-3 Variety

4194 1795 9 Leaves, BD-3, R.6, AU55 NGC. Bass-Dannreuther Die State d/b. The Philadelphia Mint struck gold coins for the first time in 1795, when a reported mintage of 5,583 Capped Bust Right eagles was accomplished. It is likely that the 1795-dated dies continued to be used in the early part of 1796, however, so the surviving population for the date is somewhat larger than the modest production total would suggest.

Five die varieties are known for the date, with this coin representing the famous BD-3 variety, with nine leaves in the palm frond on the reverse. The "Nine Leaves" variety is the rarest and most famous of all the Small Eagle ten dollar varieties, with a surviving population of 18-22 examples, according to PCGS CoinFacts. John Dannreuther believes the BD-3 accounted for 210-500 examples of the original mintage for the date. The obverse die was used previously to strike the BD-2 variety of this date, and used again to produce the final BD-5 variety. The reverse die shows several defects on all known specimens, including a die break at the tip of the second leaf, a crack from the edge through the top of the first T in STATES, and another faint crack at the lower right of the first A in AMERICA. These defects may have been caused by die buckling during the preparation of the dies, before the coins were struck. It seems likely that the reverse failed quickly, accounting for the rarity of the BD-3 today.

Although the "Nine Leaves" reverse is a celebrated issue today, it was unknown to early students of the series. John Colvin Randall identified four varieties of 1795-dated eagles by 1885, but he did not mention the "Nine Leaves" reverse in the catalog of his collection when it was sold by W. Elliot Woodward in June of 1885. Likewise, Silas Wodell exhibited three varieties of the 1795 eagle at the 1914 ANS Exhibition, but the BD-3 variety was not represented. The first numismatist to publish a description of the variety was Edgar Adams, in his article in the May 1934 edition of *The Coin Collector's Journal*:

"5-Same as No. 1. Rev. End of stem does not touch or come very close to 'A'. End of one leaf touches center of 'U'. Nine distinct leaves in branch. There is a die defect at the end of the second leaf. Clapp."

Unfortunately, Adams misremembered the owner of the discovery coin, as there was no example of the BD-3 listed in the Clapp notebook. The coin Adams referred to was almost certainly the example in the fabulous collection of Waldo Newcomer, who purchased his example from Adam's friend and associate William Woodin in 1926. The BD-3 received little publicity before about 1980, and it was seldom attributed in its infrequent auction appearances before the turn of the Millenium.

The present coin traces its history only back to December of 2003, when it appeared as lot 979 of the Classics Sale, by American Numismatic Rarities. This coin is an attractive AU55 example that exhibits well-detailed design elements, with just a trace of wear on the high points. Like most BD-3 examples seen, some small planchet flaws are evident in the lower left obverse field. Walter Breen believed these voids were caused by foreign matter adhering to the dies. The pleasing antique-gold surfaces show the expected number of minor abrasions for the grade, including a hair-thin scratch below the eagle's wing to the R in AMERICA. Both sides retain significant amounts of original mint luster and eye appeal is quite strong for this early gold rarity.

Ex: Classics Sale (American Numismatic Rarities, 12/2003), lot 979. From The Admiral Collection. NGC ID# BFYL, PCGS# 45714 Base PCGS# 8552

1796 BD-1 Draped Bust Eagle, AU58 Prooflike Surfaces, Sole Variety for the Year Important Condition Rarity From the Early Mint

4195 1796 BD-1, R.4, AU58 PCGS. Bass-Dannreuther Die State b+/b. Early eagles struck between 1795 and 1804 can be classified into two major types based on their reverse design. Small Eagle coins were struck for three years, beginning in 1795 and ending in 1797, while the Large Eagle design was implemented from that year forward. Within the Small Eagle type are four different styles based on the number of obverse stars, the positioning of those stars, and the number of leaves (or palm fronds) on the reverse branch.

The 1796 ten dollar (BD-1, only dies for the year) features 16 obverse stars arranged eight left by eight right. There are 11 leaves on the branch, as opposed to 13 or nine leaves, as was the case in 1795. The 16 stars represent each state admitted to the Union up to that point. Tennessee became the 16th state to join on June 1, 1796, so these coins must have been produced from that point onward. The dies are in an early state, one that Dannreuther does not mention in his seminal reference, *Early U.S. Gold Coin Varieties*. A crack begins to form in the field below the E in LIBERTY and runs vertically down past the cap to the temple area. On later states, the crack travels all the way to the edge of the bust above the 9.

The reported mintage for the 1796 eagle is 4,146 coins. That may include an unknown number of coins dated 1795, so it may be that as few as 3,500 1796 ten dollar gold pieces were struck. The accepted survival rate is 125 to 175 representatives. Examples are very rare in the upper levels of AU and only 15 or so Uncirculated 1796 eagles are graded higher.

Prooflike surfaces are typical of a high-grade, early die state coin from such a small mintage. The reverse, in particular, is boldly contrasted. A razor-sharp strike is evident on each side, and just a trace of blending occurs over the cheek and eagle's breast. Wispy abrasions are numerous but undistracting. A single pinscratch above the 6 merits mention. Population: 16 in 58, 11 finer (1/18). From The Admiral Collection. NGC ID# BFYM, PCGS# 45715 Base PCGS# 8554

1797 Capped Bust Right Eagle, AU53 Small Eagle Reverse Very Scarce BD-1 Variety

4196 1797 Small Eagle, BD-1, R.5, AU53 NGC. The Small Eagle reverse was retired in 1797, in favor of the Heraldic Eagle motif. Examples of both types were struck during the year, with one variety representing the old Small Eagle type, and three varieties of the Heraldic eagle design. The present coin is easily identified as the BD-1 die marriage, the lone variety with the Small Eagle reverse. The reported mintage for the Small Eagle type was 3,615 pieces, but die evidence indicates some of these coins may have been dated 1796. John Dannreuther estimates the original mintage may have been as low as 1,250 pieces, with 55-65 examples surviving today.

The obverse die features 16 stars, in a 12x4 pattern, the only eagle to exhibit this lopsided arrangement. The number of stars was reduced to 13 in 1798, when the impracticality of adding an additional star to the design for every new state in the Union was realized. The unique die characteristics were recognized at an early date, and the important variety was distinguished in auction catalogs at least as early as the Randall Collection (W.E. Woodward, 6/1885), lot 848:

"1797 No. 3; 4 stars facing, 12 back of the head, one under the bust, touches date; rev., small eagle, with olive wreath, excessively rare."

The cataloger also described examples of the other three varieties of 1797 eagles in neighboring lots, an impressive feat of die study at the time.

The present coin is a lightly circulated specimen, with sharp details in most areas, and a touch of softness on the eagle's breast. The lustrous surfaces display an attractive greenish-gold color. This coin is an example of Bass-Dannreuther Die State b, with the characteristic crack from the edge, past star 16, to Liberty's throat. Census: 5 in 53, 18 finer (1/18). Ex: FUN Signature (Heritage, 1/2011), lot 5174.

From The Admiral Collection. NGC ID# BFYN, PCGS# 45716 Base PCGS# 8555

1797 BD-2 Heraldic Eagle Ten, AU55 10x6 Stars, Long Thin Neck on Eagle

4197 1797 Large Eagle, BD-2, High R.4, AU55 NGC. Bass-Dannreuther Die State b/b. The usual double die crack bisects the second 7 in the date. The right crack is heavy below the 7, and continues to the drapery. After a small production of Small Eagle pieces, the Mint changed to the Heraldic Eagle reverse design that was patterned after the Great Seal. All 1797 varieties exhibit 16 obverse stars, here arranged 10 left, 6 right. The eagle has a long, ungainly neck reminiscent of the Small Eagle design.

This Choice About Uncirculated piece displays pale green and grayish-gold surfaces with traces of lighter rose luster in the peripheral areas. Numerous faint surface marks and tiny planchet flakes are visible on both sides, but they barely affect the overall visual appeal. The motifs are sharply struck, while soft luster remains across both sides.

Ex: Long Beach Signature (Heritage, 6/2010), lot 1710. NGC ID# 25ZY, PCGS# 45717 Base PCGS# 8559

1797 Ten Dollar, BD-2, AU58 Inaugural Heraldic Eagle Issue 80 to 100 Coins Extant

4198 1797 Large Eagle, BD-2, High R.4, AU58 NGC. Bass-Dannreuther Die State b/b, with a vertical crack through the second 7 in the date. The three 1797 Heraldic Eagle ten dollar gold varieties share a common obverse, here in its second state. BD-2 features a long, thin neck on the eagle, and the arrowheads extend past the end of the N in UNITED. Significantly, this was the first Large Eagle variety struck in the series, which came to an end in 1804. As few as 80 and as many as 100 examples are thought to survive, making this rarer than BD-4 but more available than BD-3.

The devices are strongly defined on this bright, partly lustrous borderline-Uncirculated eagle. Liberty's middle curls and the left (facing) talon on the eagle are a trifle weak. Numerous crisscrossing adjustment marks appear on the reverse, but they do not affect the technical grade. A series of reeding marks behind Liberty's head aids in identification.

From The Admiral Collection. NGC ID# 25ZY, PCGS# 45717 Base PCGS# 8559

1797 BD-4 Eagle, XF45 Rare Early Die State

4199 1797 Large Eagle, BD-4, High R.4, XF45 PCGS. Bass-Dannreuther Die State d/a. The obverse die was used for all three known varieties of the 1797 Heraldic Eagle tens, and exhibits a doubled crack from the border through the final 7 to the bust. No die cracks are visible on the reverse that is seen here in its earliest state. John Dannreuther wrote: "Only a few examples have been seen with this perfect state of the reverse die." This reverse die is unique to the 1797 BD-3 die marriage and made no other appearances in the early eagle series. Housed in a green-label PCGS holder, this greenish yellow-gold example has faint hairlines and trivial marks visible on its reflective surfaces. The retention of a slightly prooflike appearance, combined with its early die state, suggests that this was one of the first-struck examples of its variety. NGC ID# 25ZY, PCGS# 45719 Base PCGS# 8559

1798/7 Capped Bust Right Eagle, AU Details Popular 9x4 Stars, BD-1 Variety

4200 1798/7 9x4 Stars, BD-1, High R.4 — Cleaned — PCGS Genuine. AU Details. Bass-Dannreuther Die State c/b. The Mint finally settled on 13 obverse stars in 1798, positioning them in the unusual 9x4 configuration on the 1798/7 BD-1 variety. Perhaps as few as 1,200 to 1,600 pieces were struck of the variety, with only 80 to 100 pieces known today. The unique 9x4 type is always in demand.

This example displays bright, lemon-gold surfaces with light hairlines over reflective fields. About Uncirculated sharpness exists throughout both sides and substantial areas of mint luster survive despite a subtle cleaning. Numerous obverse die cracks suggest the latest die stage of this very scarce overdated early eagle.

From The Admiral Collection.

4201 No Lot.

1799 Irregular Date Eagle, AU55 Terminal Die State, BD-7

4202 1799 Small Obverse Stars, BD-7, R.3, AU55 PCGS. Bass-Dannreuther Die State f/d. Irregular Date. The PCGS insert identifies this coin as a Small Stars Obverse. This final die state is most easily attributed by the short crumbling crack between star 12 and the denticles. The fields are bright, undoubtedly from die lapping that was done to efface die clash marks present in the fields on earlier states. The bright yellow-gold surfaces show just a trace of reddish patina, and noticeable traces of mint luster surround the devices. Numerous small handling marks are scattered over each side, none worthy of individual mention. A bit of high point definition is missing from the central hair curls and the highest portion of the eagle's breast; otherwise strongly struck throughout. Ex: Central States Signature (Heritage, 4/2012), lot 5292.

From The Bayside Collection. NGC ID# 2625, PCGS# 45730 Base PCGS# 98562

1799 BD-7 Ten Dollar, MS60 Small Obverse Stars Bright Lemon-Gold Example

4203 1799 Small Obverse Stars, BD-7, R.3, MS60 NGC. Bass-Dannreuther Die State d/d. This Small Obverse Stars, Irregular Date variety is in a late state of the dies. A thin crack joins stars 1 through 8, and another travels from the rim down through the upright of the E in LIBERTY. These traits suggest this coin was struck after the production of BD-8 coins, with which BD-7 representatives share a common obverse.

This well-struck 18th century gold piece exhibits bright lemongold coloration that blends with lively luster. A predictable amount of field chatter is seen on each side. This Uncirculated Draped Bust eagle would make an excellent representative tor type purposes. From The Admiral Collection. NGC ID# 2625, PCGS# 45730

Base PCGS# 98562

1799 Draped Bust Eagle, MS61 Small Obverse Stars, BD-7 Uniformly Strong Strike

4204 1799 Small Obverse Stars, BD-7, R.3, MS61 NGC. Bass-Dannreuther Die State d/d, with rim crumbling near below stars 1 and 2, a crack through stars 1 to 8, and another crack from the third feathertip on the left wing to the rim. BD-7 shares the same Small Stars Obverse as BD-8, identified by the irregular date, star 9 touching the Y, and star 13 away from the bust. The reverse was previously used to coin BD-6 representatives and features the first S in STATES centered over the cloud. Examples are generally available, but naturally, Mint State coins are conditionally rare and highly sought-after.

The relief elements are uniformly strong over light yellow-gold surfaces. The stars and feathers are noticeably well-defined. Unlike the obverse, which displays myriad scattered marks, the lustrous reverse is notably clean. Census (all varieties): 4 in 61 (1 in 61+), 12 finer (1/18).

From The Admiral Collection. NGC ID# 2625, PCGS# 45730 Base PCGS# 98562

1799 BD-7 Eagle, MS62 Small Obverse Stars, Irregular Date Prooflike Reflectivity

4205 1799 Small Obverse Stars, BD-7, R.3, MS62 PCGS. Bass-Dannreuther Die State b/c, with dentil crumble at stars 1 and 2 in its earliest stage. BD-7 is most interesting for its diminished clouds, which were inadvertently reduced in scale by a mint worker, either to remove clash marks or simply to prepare the die for coinage.

This luminous example has mildly prooflike surfaces and copperorange accents in the fields. No adjustment marks are present, and the strike is unusually sharp for this large denomination. Careful evaluation with a loupe fails to locate any consequential marks. Early eagles are under formidable demand from gold type set collectors, especially those is similarly high grades.

Ex: FUN Signature (Heritage, 1/2007), lot 3617.

From The Admiral Collection. NGC ID# 2625, PCGS# 45730 Base PCGS# 98562

1799 BD-7 Eagle, MS64 Small Obverse Stars Advanced Die State

4206 1799 Small Obverse Stars, BD-7, R.3, MS64 PCGS. Although this is the most plentiful 1799 type with Small Obverse Stars, it is scarcer than the BD-10 Large Obverse Stars type. Since the two types are recorded in the *Guide Book*, both are need for an advanced collection of early eagles. The PCGS Set Registry for early eagles with major varieties also requires both the Small Obverse Stars and the Large Obverse Stars variants.

This Choice Mint State piece is extraordinary, and it is one of the 10 finest examples of the date that PCGS has ever examined. The pristine surfaces of this brilliant lemon-yellow example have trivial, microscopic marks of no consequence, with delicate peripheral rose patina that enhances the eye appeal. A true prize for the connoisseur of early gold coinage.

The obverse die appears on 1799 BD-7 and BD-8, while the reverse die is known on BD-6 and BD-7. Bass-Dannreuther Die State f/d. Light clash marks are evident on both sides. The obverse is cracked from star 1 to Star 8, continuing to the border above star 8, and with a branch crack from star 4 to star 5 and the border. Another crack begins at the border forming a loop at the upper left upright of the E in LIBERTY, continuing through that letter to Liberty's fore curl. A third crack begins at the Y to stars 9 and 10, a fourth crack joins stars 10 and 11, and a fifth crack joins stars 11, 12, and 13. Minor crumbling is evident between the border and star 12, a faint crack joins the date digits at their bases, and another faint crack joins the tops of IB. The reverse has a short crack from the border at 10 o'clock to the third feather tip. Population: 10 in 64 (2 in 64+), 0 finer (1/18). NGC ID# 2625, PCGS# 45730 Base PCGS# 98562

1799 BD-8 Eagle, AU53 Small Obverse Stars, Irregular Date Terminal Die State

4207 1799 Small Obverse Stars, BD-8, R.5, AU53 PCGS. Bass-Dannreuther Die State c/b, the terminal reverse die state. Strong die cracks through AMERICA with die crumbling within the C join myriad lesser cracks on the reverse, while rim crumbling beneath stars 1 and 2 is visible on the obverse. The date was entered askew—the 7 is too high, and leans sharply toward the first 9, which appears low in comparison to the adjacent numerals. Struck after a first marriage of the BD-7 dies, the BD-8 reverse soon failed, prompting a remarriage of the BD-7 dies that share the same obverse.

The famed Harry W. Bass Jr. Collection had but a single example of the very scarce BD-8 variety. Just 45 to 55 examples are thought to exist in all grades. This About Uncirculated survivor is a brilliant, lemon-gold coin with plentiful mint luster around the raised elements and grade-consistent light lines and marks over the sharply struck surfaces. Housed in a previous generation blue label holder with barcode on the back.

From The Bayside Collection. NGC ID# 2623, PCGS# 45731 Base PCGS# 98562

1799 Large Stars Ten, BD-10, VF25 Only Two Large Stars Varieties

4208 1799 Large Obverse Stars, BD-10, R.3, VF25 PCGS. One of only two Large Stars varieties of the 1799 gold eagle, and easily the more common of the two. A leaf tip on the reverse is connected to the lower right foot of I in AMERICA, identifying this piece as an example of B-10 rather than B-9 (the other Large Stars die pair). Typically worn for the grade, this green-gold coin shows a number of small blemishes on each side, but a magnifier will be needed to see most of them. Minimal verdigris nestles near a few of the peripheral devices. For VF type purposes on an early eagle, this piece would be an ideal candidate, especially if the 1799 date is desired.

Ex: Central States Signature (Heritage, 5/2007), lot 2328. From The Bayside Collection. NGC ID# 2625, PCGS# 45723 Base PCGS# 8562

1799 Ten Dollar, Choice XF BD-10, Large Obverse Stars Popular 18th Century Type Coin

4209 1799 Large Obverse Stars, BD-10, R.3, XF45 NGC. Bass-Dannreuther Die State a/a. Free of cracks or clash marks. Ten die varieties are known for the extensively produced 1799 eagle: eight with Small Obverse Stars and two with Large Obverse Stars. BD-10, the final die pair, features the latter star size and is not only the most accessible variety for the date, but it is also one of the most frequently encountered among all early eagles, surpassed only by the 1801 BD-2. With several hundred coins known, BD-10 is often the target of type collectors. An 18th-century date heightens its appeal.

An even layer of rub over the design high points and scattered abrasions are suggestive of a brief time spent in circulation. Yet, much detail remains on the stars, curls, and feathers (wing, neck, and tail). Orange-gold color dominates, with olive accents in the recessed areas.

From The Bayside Collection. NGC ID# 2625, PCGS# 45723 Base PCGS# 8562

1800 BD-1 Eagle, AU50 Low Official Mintage of 5,999 Coins Produced in 1801

4210 1800 BD-1, High R.3, AU50 NGC. Bass-Dannreuther Die State c/e. A die crack through the top of LIBERTY and clashed dentils over STAT are characteristic of the later die state for this, the only variety known for the 1800 ten dollar gold piece. That only one set of dies was employed is unsurprising. Just 5,999 coins were manufactured, according to official records. In reality, an unknown number of coins, including this one, were produced in 1801 after the first obverse die for that year failed. Thereafter, Mint officials reused the 1800 obverse until a new 1801 obverse was finished. That explains the issue's relative availability compared to other early eagles.

The stars are flattened, but Liberty's portrait exhibits good detail with continued delineation of the hair strands. The eagle's wing and neck feathers are clear, but the shield is somewhat soft. Adjustment marks occur around the reverse border on this pale redgold representative.

From The Bayside Collection. NGC ID# BFYT, PCGS# 45732 Base PCGS# 8563

1800 Eagle, Brightly Lustrous MS62 BD-1, The Only Dies

4211 1800 BD-1, High R.3, MS62 PCGS. Bass-Dannreuther Die State b/c, showing a die crack atop LIBERTY. The *Encyclopedia of U.S. Gold Coins* by Jeff Garrett and Ron Guth has this to say of the 1800 eagle:

"The 1800 eagle is popular because of its low mintage and because of past comments, by such notables as Walter Breen, who commented in 1988 that this issue was 'Very rare UNC,' and David Akers, who in 1980 called the 1800 eagle '...an underrated date... .' In reality, the 1800 issue is relatively easy to obtain in most circulated grades, thanks to a cluster of coins at the About Uncirculated level. Mint State examples are truly rare and the unusually high number of MS-63 examples reported is likely bloated by resubmissions."

This early eagle exhibits bright mint luster that illuminates straw-gold surfaces. The peripheral elements are slightly incomplete, but strike detail is bold in the centers. There are myriad marks strewn across each side, the most notable of which appear on and just left of the shield. Population: 22 in 62, 15 finer (1/18). From The Admiral Collection. NGC ID# BFYT, PCGS# 45732 Base PCGS# 8563

1801 Ten Dollar, VF35 Very Scarce BD-1 Variety, Seldom Offered

4212 1801 BD-1, R.5, VF35 NGC. Bass-Dannreuther Die State c/d. The BD-1 variety is scarce due early failure of the obverse die. This well-circulated example shows heavy die cracks including one between 0 and 1 in the date, and another from the edge through L in LIBERTY that extends to mid-portrait. The reverse is an advanced die stage as well, where die clashing earns the variety its "Horned Beak" moniker, although that feature is not readily visible on this Choice VF coin.

Antique-gold surfaces display deep-orange accents around sharp devices for good eye appeal. Light surface marks are smoothed by wear, and we note a small, circular planchet flaw in the field between inner points of stars 11 and 12. Surviving early eagles seldom show as much circulation — not surprisingly, this is the sole VF35 example at NGC (1/18). As a variety, the BD-1 die marriage is much scarcer than the more-available BD-2, and we have only sold a handful in the past 20+ years. The Bass-Dannreuther reference suggests just 40 to 50 pieces are known.

From The Bayside Collection. PCGS# 45733 Base PCGS# 8564

1801 BD-2 Ten Dollar, XF45 Strong Detail, Well-Centered Appropriate Early Eagle Type Coin

4213 1801 BD-2, R.2, XF45 PCGS. Bass-Dannreuther Die State a/a. Two die pairs are known for the 1801 eagle. They are most easily distinguished by the placement of star 1 relative to Liberty's lowers curl. This usually seen variety has the star positioned further away than on the rare BD-1 marriage. BD-2 actually constituted nearly the entire production of 1801 ten dollar gold coins, possibly as many as 40,000 pieces. It is believed that 600 to 800 examples survive, making this the most collectible of all early eagles.

The stars display a hint of incompleteness on the radials, but this Choice XF coin is otherwise remarkably well-detailed. Definition is notably strong on the reverse, which shows razor-sharp feathers and shield lines. Both sides are bright straw-gold with excellent centering and complete dentilation. Marks are minimal.

From The Admiral Collection. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

1801 Ten Dollar, BD-2, AU53 Attractive, Original Coloration

4214 1801 BD-2, R.2, AU53 PCGS. Bass-Dannreuther Die State b/b. The obverse is readily identified by star 1, which is distant from the curl. Star 13 nearly touches the drapery. On the reverse, star 12 has a point nearly touching the beak tip, and it touches the banner below above the left upright of U. Only 10 arrows are present in the eagle's claw. The BD-2 variety makes up the majority of 1801 eagles available to collectors, and it is among the most readily available of all early tens, regardless of date or variety.

This is an original example with greenish-gold color that is richly accented by reddish-orange and canary-yellow highlights. A few light marks account for the About Uncirculated grade, although wear from circulation is minimal and the devices are sharp. A row of nine spines in the cap is a well-known anomaly seen on most BD-2 examples, visible on all but the earliest strikes from the obverse die.

From The Bayside Collection. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

1801 Eagle, BD-2, AU53 Collectible Example of the Date

4215 1801 BD-2, R.2, AU53 NGC. Bass-Dannreuther Die State b/b. Two varieties exist for 1801 eagles and, by far, the BD-2 die marriage is more readily available. This bright, yellow-gold example represents a late die state, struck from slightly misaligned dies with weakness at the lower-left stars and a corresponding area of weakness on the reverse between UNITED and STATES, where the wingtip lacks definition.

A series of spine-like bars in the cap is visible on this coin, sometimes referred to as die clashing, but more accurately described as die damage. Perhaps a set screw or other foreign object fell onto the die to create the effect, because some early BD-2 strikes do not show the damage. This coin is otherwise sharp with only light, pinprick abrasions. Lemon-gold mint luster remains over partially reflective fields. Perhaps as many as 600 to 800 pieces survive of the BD-2 variety in all grades.

From The Bayside Collection. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

1803 BD-3 Eagle, VF30 Small Reverse Stars Terrific Reddish-Gold Color

1803 Small Reverse Stars, BD-3, R.4, VF30 PCGS. CAC. Bass-Dannreuther Die State b/c, lacking obverse clashing. This Small Stars reverse die marriage is identified by the placement of the E in STATES almost completely left of the cloud break. This is one of 150 to 200 BD-3 representatives believed extant, making it scarce in the absolute sense but still relatively accessible. Its reddish-gold surfaces and strong detail for the VF30 grade explain the CAC endorsement. The deepest hues dominate the recesses, while the exposed fields are lighter in tone. Partial detail is evident on the eagle's neck feathers. Terrific eye appeal despite the expected number of small abrasions.

From The Bayside Collection. NGC ID# 2629, PCGS# 45737 Base PCGS# 8565

1803 BD-3 Eagle, MS61 Small Reverse Stars Original With CAC Approval

4217 1803 Small Reverse Stars, BD-3, R.4, MS61 PCGS. CAC. Bass-Dannreuther Die State b/c. The obverse is without clashing, cracks, or lapping. The reverse is extensively clashed, although it is not yet in its terminal state. All six 1803 eagle varieties share a common obverse. The distinguishing feature for this Small Reverse Stars die marriage is the placement of the E in STATES left of the cloud break. The estimated population of 150 to 200 pieces is higher than any other 1803 die pair, but the variant is still very scarce in the absolute sense and conditionally rare. This original example with the approval of CAC should command a strong premium.

Glittering luster around the peripheries and medium wheat-gold coloration deliver marvelous eye appeal. There are a few wispy lines and minuscule ticks on each side, but preservation is better than the grade suggests. The only imperfection is strike softness around the border elements, and the central motifs make up for it with good definition. Mint-made adjustment marks obscure detail on the left (facing) talon and arrows, as well as UNITED. CAC: 4 in 61, 9 finer (1/18).

From The Admiral Collection. NGC ID# 2629, PCGS# 45737 Base PCGS# 8565

1803 Ten Dollar, AU58 BD-5, Extra Star on Cloud Large Reverse Stars

4218 1803 Large Reverse Stars, Star on Cloud, BD-5, High R.4, AU58 PCGS. Bass-Dannreuther Die State g/a. Two of the six 1803 eagle varieties feature Large Reverse Stars, but only one of those die pairs is collectible. There are an estimated 90 to 110 BD-5 representatives extant, according to the 2006 Bass-Dannreuther reference. In February 2017, Heritage Auctions Senior Numismatist Mark Borckardt conducted a survey of early eagles and found 56 BD-5 five appearances in our Permanent Auction Archives and only seven BD-7 appearances. This variety is best known for the anomalous 14th star placed incongruously on the far-right cloud.

This partly lustrous ten dollar gold piece is well-struck overall with limited softness on the lower stars, date, and the reverse legend. Liberty's cheek and the eagle's breast feathers exhibit a hint of friction, precluding a full Mint State assessment. Diagonal adjustment marks are clearest on the bust tip but also appear on the cap. Population: 5 in 58, 16 finer (1/18).

From The Admiral Collection. NGC ID# 262A, PCGS# 45739 Base PCGS# 98565

1804 Eagle, Choice AU Crosslet 4, BD-1 Only Collectible Variety

4219 1804 Crosslet 4, BD-1, High R.4, AU55 PCGS. Bass-Dannreuther Die State b/b. This is certainly one of the most famous dates in American numismatics. It may very well be *the* most famous date. The reasons for its popularity stem from the rarity of the 1804 silver dollar, the so-called "King of American Coins." There is something indescribably appealing, an intangible quality that draws collectors to all coins, not only silver dollars, bearing that date.

The 1804 eagle is the highest denomination coin struck that year. Survivors are among the rarest 1804-dated coins after the 1804 dollars, which, of course, were not actually struck in 1804. It should be noted that like the 1804 silver dollar, the 1804 Plain 4 ten dollar issue (BD-2) was not struck contemporarily. All examples (there are three or four known) are proofs, restrikes produced in during the mid-1830s.

Only Crosslet 4 eagles were actually minted in 1804. All are from a single die pair designated as BD-1. The obverse is unique to this variety, while the reverse was also used to coin 1803 BD-6 ten dollar gold pieces, although that occurred after the production of the 1804 coinage.

Jeff Garrett and Ron Guth write in their Encyclopedia of U.S. Gold Coins that it is "easier to find any other date among the early eagles (only the 1798 comes close to the rarity of the 1804)." About 80 to 100 examples are thought to exist. Most of these are in various stages of AU condition. Probably most coins intended for numismatic purposes were set aside early on, while those subjected any serious circulation and wear were eventually melted for their gold value.

For an issue known for its poor striking, this Choice About Uncirculated representative is remarkably well-detailed. A few of the stars, the eagle's left (facing) claw, and the leading edges of the wings are trivially soft, but the impression is largely crisp. Smooth orange-gold surfaces show two pinscratches in the left obverse field and three ticks across Liberty's cheek and ear. A small dig is noted between the F and the right wingtip. Population: 8 in 55, 14 finer (1/18)

From The Admiral Collection. NGC ID# BFYU, PCGS# 45741 Base PCGS# 8566

1804 Draped Bust Eagle, MS60 Crosslet 4, BD-1, Famous Key Date Extremely Rare in Uncirculated Condition

4220 1804 Crosslet 4, BD-1, High R.4, MS60 NGC. Bass-Dannreuther Die State b/b. Cracked from star 1 through the date and from the U to the tailfeathers and the final A in AMERICA. The officially recorded mintage for the 1804 ten dollar was 3,757 coins. But that is misleading. We know that this reverse die, designated as 1803E in the Early U.S. Gold Coin Varieties reference, was re-paired with Obverse 1 from 1803 to create the very rare 1803 BD-6 eagle. The point is that even the low mintage for this key date overstates the actual number of coins struck. The total certainly includes an unknown number of pieces dated 1803. Possibly only 2,500 eagles were struck in 1804 in Dannreuther's estimation.

Two varieties are known for the 1804. All circulation strikes produced contemporarily are of this variety, featuring a Crosslet 4 in the date. Coins featuring a Plain 4 are proof restrikes, manufactured in 1834 or 1835 (or both) and issued alongside the famous novodel 1804 dollars.

The 1804 Crosslet 4 eagle has long been touted as a rarity, and indeed it is, especially in high grades. Most examples seen are impaired in some way. Dannreuther suggests these coins may have been set aside despite their imperfections during the 1850s, when the 1804 was already known to be a date of special significance. Unfortunately, by that time few coins remained in Uncirculated condition. Of the 80 to 100 pieces extant, perhaps 15 or 20 coins survive in Mint State. The certification totals are likely inflated.

The devices on both sides are incredibly sharp. Notice the finer points of Liberty's curls and the eagle's feathers, all showing crisp delineation. Reddish-gold surfaces are bright and lustrous with a touch of semiprooflikeness in the obverse fields. Myriad marks are of no import. Census: 4 in 60, 22 finer (1/18).

From The Admiral Collection. NGC ID# BFYU, PCGS# 45741 Base PCGS# 8566

LIBERTY EAGLES

1838 Eagle, XF45 First of the Design

4221 1838 XF45 NGC. Following an intermission of 34 years, the eagle denomination began again with Christian Gobrecht's Liberty design. The same design would be used for the first time on half eagles in 1839, and on quarter eagles in 1840. Mint records indicate that only 7,200 of these new Liberty eagles were minted, all in December 1838, and few survive today. Those that do survive are apt to grade in the Very Fine range. This Choice XF example retains traces of luster on butterscotch-yellow surfaces with scattered, inconsequential marks. Census: 8 in 45, 34 finer (1/18). From The Admiral Collection. NGC ID# 262D, PCGS# 8575

1839 Liberty Head Ten Dollar, Choice AU Type of 1840, Small Letters Condition Census Example

Gobrecht's Liberty Head design was implemented on ten dollar gold coins for the first time in 1838, but it was modified partway through the following year. Whether that change had technical implications or was strictly made for aesthetic reasons is unclear. Either way, it satisfied Mint officials. No material changes were made to the design, save for the addition of the motto in 1866, for the duration of the series. The Type of 1840 features less curvature on the bust truncation and different hair curls over the ear. About 50 or 60 examples are believed extant from a mintage of 12,447 coins, making this one of the major rarities in the series in the absolute sense. This piece in particular is solidly within the Condition Census for the issue.

Green-gold color dominates, yielding to occasional reddish accents. Reasonably well-struck over the centers with the oftenseen softness on the peripheral stars. The most significant abrasions for tracing the pedigree of this rare coin are: a scrape in the left obverse field out from the bridge of the nose, and a copper stain by star 6. Certified in a green label holder. Population: 1 in 55, 4 finer (1/18).

Ex: Warren Miller Collection (Heritage, 10/1995), lot 6235. From The Admiral Collection. NGC ID# 54XJ, PCGS# 8580

1841 Eagle, AU58 Conditionally Rare Liberty Ten

4223 1841 AU58 PCGS. Strong financial resources would not be enough to form a set of No Motto Liberty eagles that match this lovely near-Mint example. Time is an equally important aspect of forming such a collection. This beauty, housed in a greenlabel PCGS holder, exhibits minor, trivial marks on both sides, with highly lustrous green-gold surfaces and considerable field reflectivity. The strike is bold and the obverse shows slight evidence of die lapping. An outstanding opportunity. Population: 10 in 58, 7 finer (1/18). NGC ID# 262H, PCGS# 8582

1841 Ten Dollar, MS63 Single Finest Example Known

4224 1841 MS63 PCGS. This is a coin of exceptional importance. As with any early No Motto eagle, the 1841 ten dollar (63,131 coins struck) is rarely encountered at the Mint State level. The appearance of any Uncirculated representative is a noteworthy event. But this is not just any mint condition 1841 eagle. It is the single finest example certified, a position it has held for at least 16 years since its last public appearance.

The surfaces feature soft, frosted mint luster and warm orangegold coloration. The devices are well brought-up with especially strong definition on the stars. Only the hair curl immediately above Liberty's ear is a bit soft. Two marks angle toward each other that resemble an inverted "V" on the lower jawline of Liberty, this being the most readily identifiable marker for pedigree purposes. Population: 1 in 63, 0 finer (1/18).

Ex: Warren Miller Collection (Heritage, 10/1995), lot 6236; Exclusively Internet Auction (Heritage, 4/2002), lot 19361; New York Signature (Heritage, 7/2002), lot 9283. From The Admiral Collection. NGC ID# 262H, PCGS# 8582

1841-O No Motto Eagle, AU55 Inaugural New Orleans Issue Conditionally Rare Low-Mintage Key

4225 1841-O AU55 PCGS. Variety 1. The 1841-O eagle is the first and certainly one of the rarest New Orleans ten dollar gold issues. Only the 1883-O and 1859-O claim smaller mintages, but the 1841-O is actually rarer than both of them in high grades. A mere 2,500 pieces were struck. Winter writes: "Properly graded high end EF coins are extremely rare. There are approximately a half dozen accurately graded AU coins known, and just one that might qualify as Uncirculated by today's standards."

Careful attention must have been paid in the striking of this Choice AU survivor. The 1841-O usually lacks star radials and has softness on the hair bun and coronet, but this piece displays complete lines and a crisp portrait. The reverse motifs and legends are equally bold. Orange-gold surfaces are moderately bright with an overtly prooflike reverse, characteristic of the few known high-grade representatives. This coin does not appear to match the plates for the Clapp-Eliasberg-Miller, Pittman, or Reed Hawn specimens, also graded AU55 by PCGS. Population: 5 in 55, 1 finer (1/18).

From The Admiral Collection. NGC ID# 262J, PCGS# 8583

1842 Small Date Eagle, MS63 Single Finest Example of This Rare Type

1842 Small Date MS63 PCGS. The 1842 Small Date eagle is roughly twice as rare as the later Large Date variant with only 18,623 pieces struck. Prior to this sale, the finest 1842 Small Date eagle made available at public auction was the Harry W. Bass, Jr. coin graded MS62 by PCGS. Garrett and Guth knew of this Select Uncirculated example when they wrote their Encyclopedia of U.S. Gold Coins in 2006. They allowed for the possibility that the Bass coin was the finest extant and had potentially upgraded to MS63, but that is not the case. This incredible representative is almost certainly a different coin based on the Bass plates. It also fails to match the Brilliant Uncirculated example offered in Bowers and Merena's Brilliant and Sieck sale (1/1992, lot 1435), which according to the description was at one point graded MS62 by PCGS.

While the prior whereabouts of this Small Date eagle remain a mystery, its status as the finest known is clear. The devices are virtually fully rendered. Only the lower stars lack radials, but the curls, feathers, talons, and fletchings are razor-sharp. Medium yellow-gold surfaces exhibit a trace of semiprooflikeness in the fields, where minimal chatter is seen. The only pedigree markers are a handful of coppery alloy spots and a tick on the chin. Population: 1 in 63, 0 finer (1/18).

From The Admiral Collection. NGC ID# 262M, PCGS# 8585

1842-O Ten Dollar, AU53 Low Mintage of 27,400 Coins

4227 1842-O AU53 PCGS. Variety 2. Low mintmark. If the spectacular sole-finest 1842-O eagle in MS63 also in this sale is out of reach, here is a pleasing alternative. Strike detail is far better than expected. In fact, all aspects of the eagle are fully defined. Liberty's curls and the lower stars are slightly softer. Bright remaining luster shines from yellow-gold surfaces that exhibit two scrapes in the left and right obverse field. A spot of discoloration occurs below star 11. Population: 14 in 53, 18 finer (1/18). From The Admiral Collection. NGC ID# 262N, PCGS# 8587

1842-O Eagle, MS63 Sole Finest Survivor, CAC Approval Major Branch Mint Condition Rarity

4228 1842-O MS63 PCGS. CAC. Variety 1. This is a monumental offering for Liberty Head eagle collectors and specialists in New Orleans Mint gold. It is well-established as the single finest 1842-O ten dollar gold piece extant.

The Louisiana branch mint coined 27,400 eagles in 1842, its fifth year of operation but only the second year in which it produced coins of this denomination. The issue is scarce in the absolute sense with an estimated survivorship of 175 to 225 pieces. A decent number of those survive in AU condition thanks to the recovery of 17 coins from the S.S. Republic. However, only one example from that wreck was deemed Uncirculated: an MS61 first certified by NGC. In all, there are merely four or five examples of this elusive issue known in mint condition, including a possible presentation piece from the Bernard Shore Collection (Superior, 1-2/1988). That coin is certified PCGS Genuine with Altered Surfaces.

This unrivaled Select example holds top spot among all known survivors. Both the MS60 and MS61 coins are expectedly baggy, but this MS63 is comparatively smooth. Chatter occurs on each side and there are a couple of obvious abrasions near the nose, but they are minor in the grand scheme of things. Brightly frosted yellow-gold surfaces display a strong impression. Most star radials are defined, all but the curls directly over the ear are fully delineated, and the lightly clashed reverse has sharp feathers, claws, and olive leaves.

This piece was last made available publicly more than two decades ago. We would not be surprised in the slightest to see it disappear into strong hands for a similar length of time following this appearance. Collectors should bid accordingly. Housed in a green label holder. Population: 1 in 63, 0 finer. CAC: 1 in 63, 0 finer (1/18).

Ex: Stack's (9/1996), lot 1614.

From The Admiral Collection. NGC ID# 262N, PCGS# 8587

1843-O Eagle, MS62 CAC Approval, Only One Coin Finer Once-in-a-Decade Offering

4229 1843-O MS62 NGC. CAC. Variety 4. Eagle production at New Orleans continued to grow exponentially in 1843, a result of increased deposits from domestic mines. A total of 175,162 ten dollar gold coins were struck that year, an increase of 540% over the 1842 mintage. The 1843-O is moderately accessible in general but extremely rare in mint condition. Probably only eight to 12 examples survive in MS60 or higher, and there is only one finer example known — the Ronald W. Brown Acadiana Collection coin in MS64.

A few isolated coppery alloy spots appear over light straw-gold surfaces. Strike characteristics are exceptional, as the 1843-O is typically regarded as a poorly produced issue, but the motifs are essentially fully brought-up on this piece. Mint luster is vibrant throughout. There are marks peppered over each side, but the only singular abrasion on this CAC-endorsed Condition Census offering occurs above the eagle's head. A hint of reflectivity in the fields is undeniable. Census: 3 in 62, 1 finer. CAC: 1 in 62, 0 finer (1/18). From The Admiral Collection. NGC ID# 262R, PCGS# 8589

1844 Liberty Eagle, MS63 Underappreciated Gold Rarity Finest Known Example

4230 **1844 MS63 NGC.** The Philadelphia Mint struck only 6,361 business-strike Liberty eagles in 1844, making the issue is an overlooked rarity in the U.S. gold series. Doug Winter notes:

"There are a few coins in the \$10 Liberty series that are not well-known outside of the core-collecting community of Liberty Head eagles. I would have to rank the 1844 as the number one sleeper in this group and it is a coin whose true rarity even surprised me as I was researching this series."

The coins were all struck late in the year, with 4,600 pieces delivered on November 30 and the balance on December 31. Ten dollar gold coins were not often needed in the Hard Times economy of that era, accounting for the generally small mintages of the early 1840s. It is unlikely that any of the coins were saved for numismatic purposes, as coin collecting was still in its infancy at that time and collecting large denomination gold coins was too expensive for the average 19th century collector, in any case. An unrecorded, but certainly small number of proofs were struck in 1844, and these probably satisfied the limited collector demand of that era. The proofs were struck from a different die pair than the business strikes,making it possible to distinguish between true proofs and prooflike regular-issue coins. As rare as the proofs are (two or three examples known), Mint State coins are equally elusive in today's market.

PCGS CoinFacts estimates 50-75 1844 Liberty eagles survive today in all grades, and only two coins have been certified in Mint State (1/18). One of those pieces is the MS61 NGC specimen offered in lot 14138 of the Twelve Oaks Collection (Heritage, 9/2016), and the other is the finest known coin offered here. We have been unable to trace the prior history of this piece, as no Mint State examples of this issue have been publicly offered since the 1940s, except for the Twelve Oaks MS61 example, which has appeared twice in Heritage sales since 2002. Doug Winter suggests this may be the J.F. Bell coin, which was described as "Uncirculated choice" in that 1944 auction, but the lot was not plated and no definitive documentary evidence has come to light.

Whatever its history may be, this coin is undoubtedly the finest-known example, with well-detailed design elements and reflective prooflike fields. This coin shows some diagnostic die lines from the dentils under star 1 and near star 3, and the date is placed higher than it is on the proofs. Die striations show in the prooflike fields on both sides and the yellow and orange-gold surfaces show some minor chatter, as usually seen on prooflike coins. The overall presentation is most attractive. This coin should find a home in the finest collection or Registry Set. Census: 1 in 63, 0 finer (1/18). From The Admiral Collection. NGC ID# 262S, PCGS# 8590

1846 Ten Dollar, AU55 Scarce Issue Overall, Seldom Found Finer

4231 1846 AU55 PCGS. CAC. The mintage of 20,095 pieces is a strong clue the 1846 might be a P-mint rarity, but it is much scarcer than even the mintage suggests. Apparently it was only by chance that any examples survived in mint condition. Only 125 to 175 pieces are estimated extant in circulated grades and most of those are VF-XF. AU examples, such as this one, are rare and underrated. The devices are sharply defined, except where slight friction interferes with detailing, and a number of small abrasions are scattered across each side. Much die polish remains, especially evident around the devices, but by and large it is diminished by the numerous small marks present. Population: 8 in 55, 5 finer. CAC: 3 in 55, 0 finer (1/18).

From The Admiral Collection. NGC ID# 262W, PCGS# 8594

1848 Eagle, MS61 A Mint State Rarity

4232 **1848 MS61 PCGS. CAC.** This splendid eagle, housed in a green-label PCGS holder, exhibits satiny fire-gold luster with full brilliance and minimal marks on either side. A mintage of just over 145,000 coins ensured a sufficient supply of survivors for today's collectors, as long as grade is a secondary consideration. However, those connoisseurs who seek an attractive Mint State example have limited opportunities. One such example is the present piece that exhibits excellent eye appeal. Population: 5 in 61, 9 finer. CAC: 1 in 61, 2 finer (1/18).

From The Admiral Collection. NGC ID# 2633, PCGS# 8599

1849-O Ten Dollar Liberty, AU55 Ex: Pittman

4233 1849-O AU55 NGC. Ex: Pittman. The 1849-O is usually seen in VF. This Choice AU example from John Pittman's collection is one of the finest available. This coin was described in the Pittman catalog as: "Medium greenish-gold and copper color. Moderately heavy abrasions throughout the fields, but some original prooflike surface is still evident."

Purchased by JJP from New Netherlands, but the price and date are unknown; Pittman Collection, Part Two (Akers, 5/1998), lot 1928, where it brought \$2,640.

From The Admiral Collection. NGC ID# 2636, PCGS# 8602

1850 Large Date Eagle, MS63 One Finer Example Extant Exceptional All-Around Quality

4234 1850 Large Date MS63 PCGS. CAC. The more frequently encountered of the two date varieties, but still a scarcer issue and one that is rarely found any finer than AU, let alone in Select Uncirculated condition. This is one of the finest examples certified by either of the major grading services and was at one time the sole finest graded. Today, a single MS64 PCGS coin with CAC approval is higher.

The motifs on each side are a bit softly struck, but that is trivial relative to the exceptional overall appearance. The fields show evidence of having been struck from polished dies, imparting a bright semiprooflike sheen that is eminently attractive. There are a few small blemishes that identify this coin: A tiny spot is noted over the right side of the 8 in the date and another is seen in the field in front of the coronet. On the reverse, small spots are located below the A in STATES, in front of the eagle's beak, below the dot to the right of TEN D., and another in the right field out from the E in AMERICA. A visually stunning coin of great importance to the specialist. Housed in a green label holder. Population: 2 in 63 (1 in 63+), 1 finer. CAC: 2 in 63, 1 finer (1/18).

Ex: Herman Halpern Collection (Stack's, 5/89), lot 209; Warren Miller Collection (Heritage, 10/1995), lot 6269.

From The Admiral Collection. NGC ID# 2637, PCGS# 8603

1850 Small Date Eagle, MS63 Single Finest Certified First Public Offering

4235 1850 Small Date MS63 PCGS. From 1795 to 1849, the ten dollar was the highest denomination produced by the United States Mint. That changed in 1850, when the double eagle was first produced for regular circulation. Eagle production declined that year, although a healthy total of 291,451 coins were still struck. That includes both the Large Date and Small Date varieties. These Small Date tens are much scarcer, especially in high grades. Curiously, this date punch was originally intended for large cents and half eagles. Its use here was unintentional.

This is the sole finest 1850 Small Date eagle extant and the first time it has been made available at public auction. It is actually a full two points higher than any other known representative. Both sides are brightly frosted, yellow-gold in color with lightly scattered marks. Strike detail is good in the centers and somewhat soft around the borders. A major die break travels from the rim to star 5 across the coronet to star 9. Die gouges (as made) appear below 50. Population: 1 in 63, 0 finer (1/18).

From The Admiral Collection. NGC ID# 2638, PCGS# 8604

1850-O Coronet Eagle, AU55 Remarkably Sharp and Vibrant

4236 1850-O AU55 PCGS. CAC. Variety 1. Centered date, as usual. The certification totals for the 1850-O No Motto eagle are probably inflated. The number of AU55 representatives, in particular, seems too high. In 2006, Winter suggested only 19 to 24 were extant across all AU grades. Perhaps that was conservative, but the 46 submissions in AU55 alone probably reflect resubmissions in the hopes of obtaining a higher grade. Both sides are incredibly sharp and remarkably vibrant. Small, largely unimportant marks appear over luminous yellow-gold surfaces. Certified in an old green label holder. Population: 14 in 55, 9 finer. CAC: 1 in 55, 6 finer (1/18). From The Admiral Collection. NGC ID# 2639, PCGS# 8605

1851 Ten Dollar, MS62 Very Scarce in All Uncirculated Grades

4237 1851 MS62 NGC. In spite of the substantial mintage of 176,328 pieces, the 1851 is seldom encountered in mint condition. Even when one combines the certification events from both services the 1851 is still very scarce. This is a bright yellow-gold example with semiprooflike fields. Moderate abrasions explain the grade. Census: 4 in 62, 1 finer (1/18).

From The Admiral Collection. NGC ID# 263A, PCGS# 8606

1851-O Ten Dollar, AU58 Collectible No Motto Branch Mint Issue

4238 1851-O AU58 PCGS. Variety 1. A mintage of 263,000 coins contributes to the issue's status as the secondmost plentiful No Motto eagle from the New Orleans Mint. Each side of this nearly Uncirculated orange-gold ten dollar coin radiates substantial satin mint luster. The reverse exhibits bold detail, while the obverse stars are flat. Minimally abraded with a few copper alloy spots. Housed in an old green label holder. Population: 23 in 58, 15 finer (1/18). From The Admiral Collection. NGC ID# 263B, PCGS# 8607

1852-O No Motto Eagle, MS61 The Top-Graded Example Significant Southern Gold Rarity

4239 1852-O MS61 NGC. Variety 1. With their energies directed mostly toward the production of double eagles, New Orleans Mint officials struck a paltry 18,000 ten dollar gold coins in 1852. In 2006, Doug Winter, who called this issue "one of the rarest No Motto eagles," estimated 80 to 90 coins survived in all, including two to four Uncirculated coins. Today, NGC shows two submissions in Mint State (one in MS60 and this MS61), while PCGS has seen one in MS60 (the Byron Reed coin). It is possible that the MS60 on the NGC Census was either crossed over to PCGS or upgraded to this MS61 and that only two Uncirculated 1852-O eagles are extant, with this being the sole finest.

The 1852-O is known for an above-average strike. This top-graded representative presents stars with mostly visible radial lines, crisp details on the curls and hair bun, and uniformly strong definition on the eagle. Orange-gold surfaces glisten with satin mint luster. A mark in the field left of the chin and another above the D in TEN D. were used for attribution. Census: 1 in 61, 0 finer (1/18). Ex: Montgomery Collection (Bowers and Merena, 5/1998), lot 1408. From The Admiral Collection. NGC ID# 263D, PCGS# 8609

1853/'2' Eagle, FS-301, MS62 Finest Example of the Variety

4240 1853/'2' FS-301 MS62 NGC. High-grade eagles from this period are notoriously difficult to locate. While the 1853 is no exception, there are more MS60 and MS61 survivors than for most other issues. As with the double eagles produced for this year, the 1853 ten dollar features a variety with two lines in the lower loop of the 3 widely accepted as being part of an underdigit 2. Recently, that theory has come under scrutiny. Nevertheless, it remains a popular with collectors. This happens to be the sole finest 1853/'2' eagle certified at either NGC or PCGS.

Coruscating mint luster washes over each side. A peach-gold hue colors well-preserved surfaces that have area of moderate chatter in the upper reverse field. Another identifying mark is noted above the 8 in the date. Census: 1 in 62, 0 finer (1/18). From The Admiral Collection. NGC ID# C82G, PCGS# 8611

1854-O Small Date Eagle, MS61 None Graded Higher for This Variety

4241 1854-O Small Date MS61 NGC. Variety 1. Two major varieties are known for the 1854-O eagle, one with a Small Date and the other a Large Date. The former is slightly more available overall, but it is scarcer in high grades. Winter's Gold Coins of the New Orleans Mint: 1839-1909 (2006) suggests a total survival rate for the 1854-O Small Date of 150 to 175 coins, just two or three of which are in mint condition. NGC reports one coin in MS60 and this piece in MS61, plus another MS61 recovered from the S.S. Republic in 2003. We offered another MS61 with a reverse lamination error in a November 2003 internet auction. That coin went unsold and does not show up on the NGC Census.

The satiny luster that covers each side is far more vibrant than grainy and subdued, as typically found. Central design detail is extremely sharp for the issue, with nearly fully detail on the reverse. The upper stars boast strong radial lines. An important, lightly marked Condition Census coin from the Louisiana branch mint. Census: 1 in 61, 0 finer (1/18).

From The Admiral Collection. NGC ID# 263H, PCGS# 8614

1855 Ten Dollar, MS61 Accessible No Motto Type Coin

4242 1855 MS61 PCGS. This was the final year that Slanted 5s were used. The 1855 represents one of the more collectible No Motto eagles. Each side is well-struck with several stars being the only exceptions. Lively luster over orange-gold surfaces contributes to the wonderful eye appeal. Abrasions are all trivial in nature. Housed in an old green label holder. Population: 13 in 61, 10 finer (1/18). From The Admiral Collection. NGC ID# 263L, PCGS# 8616

1855-S Eagle, AU53 Low Mintage

4243 1855-S AU53 PCGS. As the San Francisco Mint embarked on its first full year of coinage production after opening for business the previous April, production of double eagles occupied much of the time and effort at that facility. Just 9,000 eagles were minted during the year, all minted during the third quarter. Housed in a greenlabel PCGS holder, this lovely example has considerable remaining luster with scattered, grade-consistent marks and rich honey-gold surfaces. This issue is unknown in Mint State grades. Population: 9 in 53, 2 finer (1/18).

From The Admiral Collection. NGC ID# 263N, PCGS# 8618

1856 Liberty Ten, MS62 Coruscating Luster

4244 1856 MS62 PCGS. CAC. About half of the 60,490 eagles minted in 1856 were delivered on Leap Day, February 29 according to Mint delivery records. The other half were produced during the last week of May and the first two weeks of June. Surviving Mint State examples of the 1856 are rare, yet available from time-to-time. According to certification data, PCGS and NGC have graded 60 pieces in MS60 or better, including three at the top grade of MS64. This MS62 example is housed in a green-label PCGS holder and exhibits tremendous eye appeal with a bold strike and satin luster on its brilliant yellow surfaces. Population: 8 in 62, 7 finer. CAC: 1 in 62, 0 finer (1/18).

From The Admiral Collection. NGC ID# 263P, PCGS# 8619

1856-O Liberty Eagle, AU55

4245 1856-O AU55 PCGS. Variety 1. Doug Winter records three known die varieties from a single obverse die and three reverse dies, while we are only aware of two different varieties for this issue that had a mintage of 14,500 coins. The 1856-O is an extremely rare issue in Mint State grades, and even those that grade AU are elusive. This Choice AU representative, housed in a green-label PCGS holder, exhibits trivial marks on its still lustrous yellow-gold surfaces with splashes of orange overtones. Population: 5 in 55, 8 finer (1/18). From The Admiral Collection. NGC ID# 263R, PCGS# 8620

1857-O Eagle, AU50 Variety 1, The Only Dies

1857-O AU50 PCGS. Variety 1. New Orleans eagle coinage was extremely limited throughout the second half of the decade following the opening of the San Francisco Mint. Only 5,500 of these coins were produced in 1857, for example. This pleasing AU50 representative is housed in a green-label PCGS holder and exhibits excellent eye appeal despite myriad surface marks. Both sides have light yellow-gold luster with delicate orange overtones. Population: 11 in 50, 22 finer (1/18).

From The Admiral Collection. NGC ID# 263U, PCGS# 8623

1858 Ten Dollar, VF35 Well-Known, Old-Time Rarity

4247 1858 VF35 PCGS. CAC. The 1858 ten dollar is a famous old-time rarity. The mintage is remarkably low with only 2,521 pieces struck. For anyone looking for an 1858, the question is not What is the highest grade I can find? rather it is Can I find an 1858? Only 35 to 50 pieces are known, which places the question above in perspective. For the lucky buyer of this piece, they will not have to settle for a cleaned or damaged example. This is a lovely, original piece that displays rich reddish patina and occasional dabs of luster around the stars. It resembles an XF more than it does a VF, which undoubtedly goes far to explaining the CAC sticker. Exceptional quality for the grade and absolute rarity combine in the same coin. From The Admiral Collection. NGC ID# 263W, PCGS# 8625

1858 Eagle, MS61 Famous Low-Mintage Issue Second Finest Known

4248 1858 MS61 NGC. This piece must have been one of the first struck after the dies were lapped and polished. The fields on each side sparkle with deep reflectivity and the devices are thickly frosted, creating a lovely two-toned cameo effect. The centers are fully struck, while the stars and the tip of the eagle's left wing are incompletely defined. Numerous small abrasions are peppered throughout, but the only ones that might be used for future reference are a milling mark on the lower portion of Liberty's cheek and a short scratch below the TA in STATES.

The 1858 is famous for its low mintage of 2,521 eagles. This is the second finest 1858 known, bested only by the magnificent MS64 from the Warren Miller Collection — a coin that last realized \$276,000 in our May 2007 Central States Signature auction. An important example of singular rarity and beauty. Census: 1 in 61, 0 finer (1/18).

Ex: ANA Signature (Heritage, 8/1997), lot 7753.

From The Admiral Collection. NGC ID# 263W, PCGS# 8625

1858-O Liberty Ten, AU58 Variety 1, Lapped Obverse

4249 1858-O AU58 PCGS. Variety 1. Only one die variety is known for the 1858-O eagles, and two die states are identified. The early die state has repunching visible in the second 8 of the date. The die was then lapped and the repunching is no longer visible, as on this example. This near-Mint representative, housed in a green-label PCGS holder, has exceptional light yellow-gold luster and a strong strike with hints of field reflectivity. An outstanding example for the grade. Population: 15 in 58 (1 in 58+), 8 finer (1/18).

From The Admiral Collection. NGC ID# 55GX, PCGS# 8626

1858-S Eagle, AU50 Impressively Detailed

4250 1858-S AU50 NGC. The certification totals are suspiciously high, especially in AU55 and AU58. These undoubtedly represent repeated attempts at a higher grade. Still, no 1858-S eagles have been graded Mint State. The population is estimated to be 60 to 80 coins (11,800 minted). This About Uncirculated example is bright yellow-gold and partly lustrous. The reverse displays a hint of field reflectivity. Predictably abraded but impressively well-defined. Census: 4 in 50, 30 finer (1/18).

From The Admiral Collection. NGC ID# 263Y, PCGS# 8627

1858-S Eagle, AU58 Tied for Finest Famously Challenging Year

4251 1858-S AU58 NGC. It was still possible for certain S-mint products from this period to survive in Uncirculated condition despite the lack of collectors setting coins aside numismatically. Sometimes it took a terrible tragedy like the sinking of a ship, but it could happen. In the case of the 1858-S, however, nothing of the sort took place and there are no known coins in mint condition. About 1% of the 11,800 coin-mintage is believed extant (100 to 130 coins). A handful of AU58 representatives, including this piece, are the finest available.

Splashes of orange and yellow-gold coalesce over each side. The protected areas of the design emit glints of original mint frost, heightening the appeal. Somewhat lightly impressed, but impossible to improve upon in terms of preservation. Census: 10 in 58, 0 finer (1/18).

From The Admiral Collection. NGC ID# 263Y, PCGS# 8627

1859 Ten Dollar, MS63 Smooth and Attractively Contrasted Finest Known Survivor

4252 1859 MS63 NGC. The appeal of the 1859 can easily be traced to its low mintage of 16,013 coins and the quality with which the issue was made. Like most other Liberty Head tens, examples generally appear no finer than Choice XF. There are a handful of Mint State coins known that are clustered in the MS61 to MS62 range that seldom appear at auction. This Select 1859 eagle is clearly finer. In fact, it is the sole finest example extant.

The surfaces are extraordinarily preserved, smooth and contrasted with reflective fields and frosty relief elements. Bold detail appears over the centers, while the star radials are generally indistinct. Light clash marks are seen under the chin. Two sets of reeding marks on the neck and in the adjacent field, and an alloy spot at the left base of the 1 are pedigree identifiers of this top Condition Census representative. Census: 1 in 63, 0 finer (1/18). From The Admiral Collection. NGC ID# 263Z, PCGS# 8628

1859-O Liberty Ten Dollar, AU58 Rarest Southern No Motto Issue

4253 1859-O AU58 NGC. Variety 1. From a mintage of 2,300 coins, the 1859-O is the rarest No Motto eagle from the Southern branch mint. Writing in *Gold Coins of the New Orleans Mint:* 1839-1909, Doug Winter comments: "This is an exceedingly rare coin in AU55 to AU58 and there is just one known in Uncirculated, a remarkable MS62 that was found on the S.S. Republic."

We last offered an example in near-Mint condition in 2005, attesting to the scarcity with which these coins appear for sale. This orange-gold piece has strongly defined interior relief elements — a characteristic trait. Both sides are abraded, but trivially so, and the only pedigree identifiers include two nicks on the cheek and an area of copper color above the first S in STATES. Census: 3 in 58, 1 finer (1/18).

From The Admiral Collection. NGC ID# 2642, PCGS# 8629

1859-S Eagle, XF45 Low-Mintage Condition Rarity

4254 1859-S XF45 PCGS. Only 7,000 Liberty eagles were minted in San Francisco in 1859, despite a shipment of six obverse dies from Philadelphia that suggested a much larger anticipated mintage. Higher grade circulated examples are rare, and Mint State coins are unknown. This Choice XF piece is housed in a green-label PCGS holder and exhibits considerable muted yellow-gold luster with delicate rose overtones. Population: 8 in 45, 12 finer (1/18).

From The Admiral Collection. NGC ID# 2643, PCGS# 8630

1860-O Ten Dollar, AU55 Scarce New Orleans Issue

4255 1860-O AU55 PCGS. CAC. Variety 1. Two slightly different varieties are known for the 1860-O, Variety 1 can be distinguished by the bold neck curls and die clashing in the reverse shield from the inner ear on the obverse. The 1860-O is the final New Orleans ten of the With Motto type, and only 11,100 examples were produced with an estimated 70 to 85 pieces believed known in all circulated grades. This is a well-struck example that shows bright semiprooflike fields with numerous small but individually insignificant abrasions scattered over each side. Bright yellow-gold color.

From The Admiral Collection. NGC ID# 2645, PCGS# 98631

1860-S Liberty Head Ten, Choice AU Highly Underrated Issue Only 35 or 45 Coins Extant

4256 1860-S AU55 NGC. The 1860-S is, without question, a terrifically underrated, underappreciated, and undervalued date in the series. With a mintage of 5,000 coins and a survivorship of 35 or 45 pieces, this is actually one of the rarest Liberty Head tens. The issue was unknown in Mint State prior to the recovery of the S.S. Republic treasure (two Uncirculated coins were found). This remains a major rarity in Choice AU condition. It has been a few years since a comparable example was made available.

The stars and olive leaves may be incomplete, but the rest of this important San Francisco eagle is boldly defined. Sharp detail is especially evident on the reverse. The surfaces display rich yellow-gold color and bright semiprooflikeness is seen in the fields from the initial die polish. A remarkably clean example. Census: 1 in 55, 7 finer (1/18).

From The Admiral Collection. NGC ID# 55H2, PCGS# 8632

1861 Eagle, MS61 The Logical Choice for a No Motto Type Coin

1861 MS61 PCGS. Bulging Bun subtype. The 1861 has the largest mintage of the decade, and is the logical choice for a No Motto type coin. Considering the grade, this piece shows remarkably few abrasions. The surfaces are warm, even, light reddish-gold and the strike is well brought-up throughout. Significant mint luster is intermixed with semiprooflikeness that was created by die polishing, remnants of which can be seen in the fields.

From The Admiral Collection. NGC ID# 2647, PCGS# 8633

1861-S Ten Dollar, XF45 Low-Mintage, Low Availability in All Grades

4258 1861-S XF45 PCGS. The 1861-S ten dollar is another overlooked and underappreciated rarity in the No Motto series. Only 15,500 pieces were struck, and it is estimated that a mere 70 to 90 coins are extant in all grades (including a single MS61, the finest known). This is a pleasing, problem-free Choice XF that is minimally abraded for the grade. The strike details are slightly soft over the high points, as sometimes seen on this issue.

From The Admiral Collection. NGC ID# 55H3, PCGS# 8634

1862 Liberty Eagle, MS60 **CAC-Approved Example** A Major Rarity So Fine

4259 1862 MS60 NGC. CAC. The significance of the 1862 date is related not only the the Civil War that dominated all aspects of American life at that time, but also to the economic history tied to that violent period. This was the year that the United States government halted specie payments everywhere except the West Coast. Greenbacks were issued and circulated in place of silver and gold, which was hoarded or exported. Only 10,960 eagles were struck in 1862. The existence of most Mint State examples, of which there are perhaps five or 10 pieces, reflects the discovery of a small hoard onboard the S.S. Republic. The older NGC holder suggests this coin pre-dates that 2003 discovery.

Minor abrasions are peppered evenly over this original orangegold eagle. Design definition is exceedingly strong. That includes the star radial lines, Liberty's hair strands, and the eagle's feathers, claws, and fletchings. The surfaces are natural rather than overly bright, and are highly appealing as such. Census: 4 in 60, 7 finer. CAC: 2 in 60, 0 finer (1/18).

From The Admiral Collection. NGC ID# 2649, PCGS# 8635

1862-S Eagle, Still-Lustrous AU58 Exceptional Condition Rarity Just One Example Finer

4260 1862-S AU58 NGC. The San Francisco Mint, which opened just eight years before this coin was struck, was established to provide the Western regions of this country with gold and silver coinage for circulation. Deposits from local mines were converted into coins, which were in turn used extensively in commerce. Few, if any, collectors concerned themselves with collecting by mintmark at that time, and so high-grade S-mint coins from this period seldom survived.

The 1862-S eagle claims a mintage of only 12,500 pieces. About 80 examples are believed extant. This is one of the finest examples known, surpassed by a single MS61 coin that had not been seen by or known to the numismatic community prior to 2011. Indeed, this coin is finer than those in the Eliasberg, Norweb, and Bass holdings. Even the Smithsonian's coin only grades XF45. This is truly a coin of exceptional condition rarity.

Bright, frosty mint luster shines from this near-Mint peach-gold ten dollar. A trace of friction and a slightly incomplete impression result in softness on the stars and the highest points of the portrait and eagle. Marks are more prevalent on the obverse than the reverse, but they are still relatively minor. Census: 2 in 58, 0 finer (1/18). From The Admiral Collection. NGC ID# 55H4, PCGS# 8636

1863 Ten Dollar, VF35 Among the Rarest P-Mint Issues Only 30 to 40 Coins Extant

4261 1863 VF35 PCGS. The Annual Mint Director's Report of 1863 explained: "The coinage for this period has been much less than during the preceding year, although for that year it was much below former years. The same causes that contributed to reduce the coinage of 1862 are still in operation; and we cannot hope for any material increase until the rebellion is crushed, peace restored, and consequent and increasing prosperity gladdens our country." Only 1,218 ten dollar gold coins were struck in circulation-strike format at the Philadelphia Mint in 1863. There are perhaps 30 or 40 coins extant, making this one of the rarest P-mint issues in the entire Liberty Head ten dollar series.

Each side offers attractive reddish-gold color and relatively strong definition for the VF assessment. Some star radial lines are apparent, and the curls and feathers still show good detail. Myriad abrasions throughout. Certified in an old green label holder. Population: 4 in 35, 18 finer (1/18).

From The Admiral Collection. NGC ID# 264B, PCGS# 8637

1863-S Ten Dollar, MS60 One of Three Mint State Survivors Only 10,000 Coins Struck

4262 1863-S MS60 PCGS. Eagle output in the California mint continued its descent in 1863. Only 10,000 pieces were struck that year. A dismal survival rate of about 0.5% accounts for the estimated 50 to 60 pieces known. There are just three Uncirculated 1863-S ten dollar gold coins extant: This piece, and one MS61 representative each at PCGS and NGC. We cannot find any prior appearance for this coin over the past 25 years, and it may not have been made available publicly since it was sent to PCGS in the late 1980s or early 1990s.

Shades of peach-gold reveal scattered orange accents throughout this frosty Condition Census ten. There are thin, wispy abrasions on each side that limit the grade, but the coin still appears finer than assessed almost three decades ago. Uniformly sharp. Housed in an old green label holder. Population: 1 in 60, 1 finer (1/18). From The Admiral Collection. NGC ID# 264C, PCGS# 8638

1864 Eagle, MS60 Conditionally Rare

4263 1864 MS60 PCGS. Gold coins did not circulate east of the Rockies in the 1860s and Philadelphia production was minimal among all denominations. Only 3,530 circulation strike eagles were minted there in 1864. The San Francisco Mint added 2,500 more examples as the California facility concentrated on double eagle production. Add the preference of contemporary collectors to acquire proofs, and Mint State survival quantities are extremely low. For these 1864 eagles, only two examples are PCGS certified in Mint State (this piece and an MS61), and NGC adds three examples graded MS61 and a single MS63 (1/18). A few hairlines are noted in the fields of this satiny example that exhibits slight field-to-device contrast with brilliant honey-gold surfaces. An impressive and important example for the connoisseur.

From The Admiral Collection. NGC ID# 264D, PCGS# 8639

1864-S Ten Dollar, XF40 Capstone Issue in the Coronet Series Roughly 25 Examples Extant

4264 1864-S XF40 PCGS. The fact that the 1864-S went underappreciated for so long is simply astounding. For this cataloger, the issue brings to mind a common phrase often used among dealers and collectors to emphasize the rarity of a particular coin in their inventories or collections: "Go find another one."

The fact is one cannot just pick up an example of the 1864-S ten dollar gold piece at whim. There are only 25 or so pieces that survive, and they appear at auction once every few years at most. The only exception was 2014, a year that saw the sale of four examples from the Bentley Collection. To better illustrate the point, not a single example was offered at auction from 2007 until 2013. This is often the final issue required to complete a set of Coronet ten dollar gold pieces.

San Francisco Mint officials were responsible for the production of 2,500 eagles in 1864, continuing a trend that saw heightened focus on double eagle output at the expense of this denomination. Evidently, the few ten dollar gold coins that were struck saw extensive circulation and experienced an extremely high rate of attrition. The survival rate for the issue is just 1%. According to Doug Winter:

"A comparatively high percentage of the surviving 1864-S eagle are in low grades, i.e., Fine to Very Fine. A properly graded Extremely Fine is very rare and this date is extremely rare in About Uncirculated with no more than three to five currently known. There are no examples known in any grade higher than AU55."

This XF40 S-mint key date is wonderfully attractive, showcasing reddish-gold tones and faint traces of original mint luster within the protected areas. Partial radials, strong curls, feathers, and talons, and a bold date and mintmark are evident despite a short stay in Western circulation. If not one of the highest-graded survivors, this is undeniably one of the most attractive. Housed in an old green label holder. Population: 2 in 40, 10 finer (1/18).

From The Admiral Collection. NGC ID# 55MT, PCGS# 8640

1865 Ten Dollar, AU50 Final P-Mint No Motto Issue

4265 AU50 NGC. Probably 75 or so examples of the 1865 eagle survive. Only 3,980 ten dollar gold coins were struck during the final year of the Civil War, which was still exerting tremendous influence on the hoarding and export of gold and silver coinage. This semikey Philadelphia issue is typically encountered in VF to XF condition. Possibly 15 to 20 pieces are known across all About Uncirculated grades, and only two coins exist in Mint State: An MS60 NGC coin from the S.S. Republic and an MS63 example graded by PCGS.

This piece has the prooflike surfaces sometimes found on coins from this issue. The central motifs are moderately frosted, standing out against partly reflective fields. Light merging is seen over well-struck devices. There are abundant marks on each side, with one on Liberty's neck more prominent than the rest. Census: 5 in 50, 20 finer (1/18).

From The Admiral Collection. NGC ID# 264F, PCGS# 8641

1865-S Ten Dollar, Lustrous MS60 Third Finest for the Issue Finest Normal Date Example

4266 1865-S MS60 NGC. This is an example of the rarer Normal Date variety, though collectors tend to get more excited about the dramatic Inverted 865 variant, which is slightly more available. Minor disparities in rarity fall by the wayside when contextualizing a coin of this quality. Jeff Garrett and Ron Guth explain: "The quality of survivors is lower than average for a No Motto eagle with most examples falling into the VF category. Extremely Fine and About Uncirculated examples are extraordinarily rare, and only one example has ever been certified at the Mint State level (NGC MS-60)." This is that coin.

Only two 1865-S eagles are graded higher: Both feature the Inverted 865 variety. One was recovered from the S.S. Brother Jonathan (MS64 PCGS) and another was found among the contents of the S.S. Republic (MS62 NGC). As far as we can tell, this is the first public offering of this highest-graded Normal Date representative in 25 years.

Lively, uninterrupted mint luster glitters across bright peach-gold surfaces. The strike is slightly uneven. Myriad wispy lines and scattered abrasions are unsurprising, considering the grade. The fact that this Western gold piece survives so well-preserved is astounding. Unlike the two other finest known coins, this piece is not of nautical origin. Census: 1 in 60, 0 finer (1/18).

From The Admiral Collection. NGC ID# 55MU, PCGS# 8642

1865-S Ten Dollar, Choice VF Dramatic 865 Over Inverted 186 Variety

4267 1865-S 865 Over Inverted 186 VF35 PCGS. The spectacular 1865-S 865 Over Inverted 186 variety has obvious appeal. In a way, the charming blunder serves as a reminder that even skilled Mint engravers were apt to make mistakes. This variety is more available than those without the repunched date, yet only 50 or so pieces are believed extant. The underdigits are plain on this Choice VF representative. Central detail is good, while the stars are completely flat. Encapsulated in a green label holder. Population: 9 in 35, 19 finer (1/18).

From The Admiral Collection. NGC ID# 264G, PCGS# 8643

1866-S No Motto Ten, XF40 Rare in All Grades

4268 1866-S No Motto XF40 PCGS. Even though three die pairs were shipped west via Panama in November 1865, apparently only one die pair was used to strike the estimated 8,000 No Motto tens in early 1866. The No Motto 1866-S ten is rare in all grades, incredibly so in mint condition (see next lot), with VF-XF coins the usual grades encountered when it is available at all. The surfaces display even, light reddish-tinged patina, and the only mentionable abrasion is a vertical mark in the center of the obverse.

From The Admiral Collection. NGC ID# 264H, PCGS# 8644

1866-S No Motto Eagle, MS60 First Appearance in Mint State Very Rare in All Grades, Finest Certified

4269 1866-S No Motto MS60 NGC. All 8,500 1866-S No Motto eagles were struck in February before new dies with the added motto IN GOD WE TRUST were received from the Philadelphia Mint. These coins are much rarer than their With Motto counterparts and are seen about one-fourth to one-fifth as often. There are perhaps 50 to 65 examples extant. This is the sole Uncirculated representative at the leading grading services. It is the first time a Mint State example has appeared at auction. Expect a record price to take this coin home.

This lustrous, reddish-gold San Francisco eagle is well-struck for the issue. A couple of obverse stars lack radial lines, but the eagle is boldly rendered. No trace of wear is present. Ticks just left of the nose and below star 10 aid in attribution. Census: 1 in 60, 0 finer (1/18).

From The Admiral Collection. NGC ID# 264H, PCGS# 8644

1866 With Motto Ten, MS61 Only Two Certified Finer

4270 1866 MS61 NGC. The date is sharply doubled as always for the circulation strike 1866 eagles (proofs have a normal date). Gold coin production came nearly to a halt at the Philadelphia Mint throughout the 1860s, during and after the Civil War, beginning in 1862. From that year through 1877, the average coinage of circulation-strike Liberty eagles was less than 6,400 coins per year. The first year of the With Motto reverse type had a below average mintage of only 3,750 coins. Nearly 40 years ago, David Akers wrote that he had only seen one Mint State example of this issue, although NGC reports seven such pieces today. PCGS has not certified any Mint State representatives. This impressive example has lovely orange-gold luster with minimal marks are reflective surfaces. The strike is good, and the eye appeal is excellent. Census: 3 in 61 (1 in 61+), 2 finer (1/18).

From The Admiral Collection. NGC ID# 264J, PCGS# 8649

1866-S Motto Ten Dollar, XF45

4271 **1866-S Motto XF45 NGC. CAC.** The first With Motto issue produced at the San Francisco Mint is always popular. This variety (11,500 coins struck) is slightly more accessible than the earlier 1866-S No Motto eagle. This CAC-endorsed Choice XF representative is attractive with original reddish-gold coloration. Obverse strike detail is soft, while the reverse is somewhat better defined. Census: 10 in 45, 24 finer. CAC: 1 in 45, 3 finer (1/18). **From The Admiral Collection.** NGC ID# 53FR, PCGS# 8650

1867 Eagle, MS60 Only One Finer at NGC

4272 1867 MS60 NGC. Continuing the theme of low coinage production at the Philadelphia Mint, only 3,090 of these 1867 eagles were minted, and few survive in any grade. Only four surviving examples of this coinage are certified Mint State, and none are finer than MS61. NGC and PCGS have certified a combined total of 103 examples in all grades, and that certification total is in line with the number thought to exist. While this piece exhibits myriad surface marks that are expected for the grade, a high degree of eye appeal is the result of full, unbroken mint luster and a bold strike on brilliant yellow-gold surfaces. Census: 1 in 60, 1 finer (1/18). From The Admiral Collection. NGC ID# 264L, PCGS# 8651

1867-S Eagle, AU58 Finest at NGC and CAC

4273 1867-S AU58 NGC. CAC. Writing for PCGS CoinFacts, David Hall provides a sense of just how rare the 1867-S is, especially in high grades: "It is estimated that only 50 to 75 examples of the 1867-S survive today in all grades. I have never seen or heard of a mint state specimen. I was only able to obtain an EX45 for my set and I looked for 6 years." This is one of the top four examples certified (all are at NGC), and it is the only one among them with a CAC approval sticker.

The lower stars and olive leaves are typically soft, but the overall impression is rather sharp. The talons, fletchings, and feathers are fully defined. A trace of friction on the cheek and hair bun limit the grade. Luminous peach-gold surfaces radiate abundant mint frost. Census: 4 in 58, 0 finer. CAC: 1 in 58, 0 finer (1/18).

From The Admiral Collection. NGC ID# 264M, PCGS# 8652

1869 Ten Dollar, AU55 Significant Die Polish Remains

4274 1869 AU55 NGC. When the 1869 ten dollar was struck, and continuing until 1878, gold coins did not circulate in the East or Midwest. This explains the Mint's reluctance to strike substantial numbers of lower-denomination gold coins. Only eight to 12 1869 tens are believed known today in mint condition, with an additional 80 to 100 pieces estimated extant in circulated grades. This briefly handled coin retains much of the initial polish surrounding the devices on each side. Deep, even reddish-gold color covers the surfaces.

From The Admiral Collection. NGC ID# 264R, PCGS# 8655

1869 Ten Dollar Liberty, AU58 Low-Mintage Gold Rarity

4275 1869 AU58 NGC. The 1869 Liberty eagle is always in demand because of its memorably low business-strike mintage of 1,830 pieces. Contemporary collectors preferred to update their collections by purchasing proof specimens from the Mint every year, so few high-quality circulation strikes were saved for numismatic purposes. The issue is very rare in AU58 condition, and finer coins are virtually unobtainable.

The present coin is an impressive near-Mint specimen, with just a trace of wear over the high points of the well-detailed design elements. Some minor chatter is present in the fields, but the light orange-gold surfaces are free from large or distracting abrasions. Prooflike reflectivity is evident in sheltered areas. An attractive specimen of this rare and overlooked issue. Census: 7 in 58, 3 finer (12/17). NGC ID# 264R, PCGS# 8655

1869-S Eagle, MS61 Tied for the Finest Certified

4276 1869-S MS61 NGC. As the San Francisco Mint concentrated on double eagle production throughout the 1860s and 1870s, the mintages of smaller denomination gold coins remained at extremely small levels, and that was especially true of eagles. That facility coined just 6,430 such coins in 1869, and the few survive typically grade VF and XF. Examples that grade AU are rare, and Mint State pieces are extremely rare. The present piece is the only NGC-certified Mint State 1869-S eagle, while PCGS has graded one in MS60 and another in MS61 (1/18). An impressive orangegold eagle, this piece has only microscopic marks on its satiny surfaces with full mint brilliance and sharp design motifs.

From The Admiral Collection. NGC ID# 264S, PCGS# 8656

1870 Ten Dollar, AU55 Rare, Low-Mintage Issue

4277 1870 AU55 PCGS. CAC. The 1870 ten dollar has a remarkably low mintage of only 3,990 pieces. In general, P-mint and S-mint tens from the 1860s and 1870s are overlooked and undervalued, but the 1870 is one of the best known of the many rarities in this 20-year run of tens. Only 40-50 pieces are believed extant in all grades, and this is among the finer examples. The fields retain much initial die polish, but it is somewhat subdued because of the slight friction and light abrasions the coin picked up from the brief time it spent in circulation. Sharply defined throughout with no singularly mentionable marks on either side. Population: 11 in 55 (1 in 55+), 6 finer. CAC: 4 in 55, 2 finer (1/18).

From The Admiral Collection. NGC ID# 264T, PCGS# 8657

1870-CC Eagle, Choice VF Singular Carson City Key Date Inaugural Year for the Nevada Mint

4278 1870-CC VF35 PCGS. Variety 1-B, with a slight downward-sloping mintmark. This is the usual die variety for this most famous of Carson City eagles.

The facility began coining operations in 1870, accomplishing a respectable mintage of 5,908 eagles that was in keeping with other production totals of the era. However, the 1870-CC has a lower survival rate than the 1870, for example, with about 50 known representatives. According to Doug Winter, the issue's "indisputable rarity and its status as the first gold issue struck at the Carson City mint should make it one of the most desirable 19th century United States gold coins."

Heavily worn and abraded is how most 1870-CC eagles are found. This piece is high-end for the VF grade level with good curl and feather detail. However, myriad marks are peppered over deep orange-gold surfaces with coppery accents. The most apparent abrasion occurs on the tip of the bust truncation. Certified in an old green label holder. Population: 8 in 35, 28 finer (1/18).

From The Admiral Collection. NGC ID# 53FU, PCGS# 8658

1870-S Eagle, AU58 Single Finest Example at NGC Only the Eliasberg-Bass Coin is Finer

4279 1870-S AU58 NGC. Both the 1870 and 1870-S are remarkably similar in terms of their availability. The lower-mintage Philadelphia issue had a much better survival rate, however, while this San Francisco emission (8,000 coins) circulated extensively and suffered a high rate of attrition. Approximately 80 to 100 pieces survive in all grades. A single Uncirculated coin, formerly from the Eliasberg and Bass collections, is known. This near-Mint example is the single finest submission at NGC, tied with two comparable representatives at PCGS.

Mint luster emerges from the recessed areas. The exposed orangegold surfaces display a trace of friction upon close examination. Strike characteristics are strong, showing incompleteness mainly over Liberty's ear and the eagle's olive leaves. Both sides exhibit moderate abrasions. Census: 1 in 58, 0 finer (1/18).

From The Admiral Collection. NGC ID# 53FU, PCGS# 8659

1871 Liberty Eagle, AU53 Underrated Low-Mintage Issue

4280 1871 AU53 PCGS. The 1871 Liberty eagle is an underappreciated rare issue in all grades, due to its low mintage of 1,790 pieces. This lightly worn AU53 specimen exhibits lustrous orange-gold surfaces with the expected number of minor abrasions for the grade. Housed in a green label holder. Population: 8 in 53, 9 finer (1/18). From The Admiral Collection. NGC ID# 264W, PCGS# 8660

1871 Liberty Head Ten, MS60 Only Mint State Example Known

4281 1871 MS60 PCGS. This decade is notoriously challenging given the string of low-mintage Philadelphia issues. Only 1,790 eagles were struck at the Mint in 1871. PCGS and NGC have graded just over 100 survivors, mostly in XF to mid-AU grades. This is the single finest representative at both services combined and the only known example in Mint State.

This piece was described in 2000 as a "bright and lustrous honey gold specimen with warm rose highlights." Semiprooflikeness is evident in the fields. Marks on Liberty's forecurls and on the top of the head serve to identify this important Condition Census example. Population: 1 in 60, 0 finer (1/18).

Ex: Lindesmith Collection (Bowers and Merena, 3/2000), lot 2446, which realized \$14,375.

From The Admiral Collection. NGC ID# 264W, PCGS# 8660

1871-CC Eagle, XF45 Natural Red-Gold Color

4282 1871-CC XF45 NGC. CAC. Variety 2-A. There is a single dentil between the base of the 1 and the bust tip. The reverse is the same one used to strike the famous 1870-CC. Four deliveries took place in February, March, August, and November 1871, resulting in a total production of 8,085 1871-CC eagles. Somewhere in the vicinity of 90 to 110 examples are thought to exist. While this issue does not approach the rarity of the 1870-CC or the 1872-CC, it is a scarce date in its own right and is highly pursued among Carson City enthusiasts.

Reddish-gold surfaces are eminently appealing and inarguably natural. Detail is incomplete over the centers, but the stars are well-defined. There are many small abrasions peppered over each side but the only significant mark through the left shield border is well-concealed and undistracting. Census: 20 in 45, 34 finer. CAC: 5 in 45, 3 finer (1/18).

From The Admiral Collection. NGC ID# 264X, PCGS# 8661

1871-S Liberty Eagle, AU58 Low-Mintage Gold Rarity Tied for Finest Certified

4283 1871-S AU58 NGC. The 1871-S Liberty eagle is a rare date in all grades, and this particular coin is probably one of the finest known to exist from the original mintage of 16,500 pieces. The surfaces show scattered handling marks, particularly in the open left obverse field. Liberty's curls and the eagle show just a hint of wear from brief circulation, and the strike quality is good for this date. There is a small lamination (attached) in the left obverse field which forms a right angle near star 3 across from Liberty's chin and this will identify this coin in the future. A classic condition rarity that is certain to attract considerable attention. Census: 4 in 58, 0 finer (1/18). Ex: Dallas Signature (Heritage, 11/2005), lot 2438.

From The Admiral Collection. NGC ID# 264Y, PCGS# 8662

1872 Eagle, Strong Near-Gem One of the Two Finest Known Examples Once-in-a-Generation Opportunity

4284 1872 MS64 PCGS. The Liberty Head eagle series is replete with rarity after rarity, not strictly limited to the branch mint issues, those with or without a motto, or condition rarities, although the set includes all three. No, this long running ten dollar gold series defies all boundaries when it comes to challenging dates.

The 1872 is rare in the absolute sense, a Philadelphia emission struck to the lowly extent of 1,620 circulation strikes and another 30 proofs for collectors. Why were so few coins produced? After specie payments were halted in 1862, Greenbacks became the dominant medium of exchange on the East Coast. Gold coins were hoarded or sold for a premium and did not circulate. In 1872, the gold value of one Greenback dollar was 89 cents, which continued to prevent circulation of the yellow metal.

The eagles produced at the Philadelphia Mint during this period were strictly for export, and depositors had to pay a premium. Many of the coins struck and exported were most likely melted, explaining the low survivorship of 40 to 60 coins (estimate provided by PCGS Population Report). There are just five Mint State coins at PCGS and NGC combined. The former has seen two submissions in MS62 and two more in MS64, while NGC lists a single Select Uncirculated representative. This near-Gem is tied with the Warren Miller Collection coin for finest known. That piece was sold in our October 1995 Long Beach Signature sale, where it set a record price of \$46,750 that still stands. We expect this spectacular Choice example to exceed that total and set a new record.

Frosted motifs and semireflective fields produce a slight cameo effect that is unsurprising given the issue's paltry production total. Hints of mint-green and lavender complement glowing peach-gold surfaces, furthering the appeal. The impression is nearly complete. Simply the finest 1872 eagle available and a once-in-a-generation opportunity. Population: 2 in 64, 0 finer (1/18).

From The Admiral Collection. NGC ID# 264Z, PCGS# 8663

1872-CC Eagle, XF45 Blatantly Original Surfaces Underrated CC Rarity

4285 1872-CC XF45 NGC. CAC. Variety 1-B. Opportunities to acquire an example of the 1872-CC eagle are virtually as scarce as they are for the more famous 1870-CC. Although this issue is valued considerably lower than that first-year rarity, it actually has a lower mintage (4,600 coins versus 5,908 for the 1870-CC). The two dates also have remarkably similar certification totals considering the price disparity. NGC has seen 67 1872-CC eagles, including 16 Details coins. For the 1870-CC, it reports 31 problemfree submissions and 22 Details examples for a total of 53 pieces. Both figures certainly include duplication and the 1870-CC is undeniably the rarer issue, but not by much, and the 1872-CC is probably underappreciated.

Only a handful of survivors are as original and appealing as this Choice XF that offers rich yellow-gold coloration and partial mint luster. The devices are characteristically defined and lightly worn. Peppered marks are largely unobtrusive. The only distinguishing abrasion occurs in the field adjacent to Liberty's forecurl. Census: 14 in 45, 19 finer. CAC: 3 in 45, 6 finer (1/18). From The Admiral Collection. NGC ID# 53M3, PCGS# 8664

1872-S Eagle, Frosty MS60 Only Two Uncirculated Coins Graded Finest With CAC Approval

4286 1872-S MS60 NGC. CAC. The year 1872 saw 17,300 ten dollar gold coins struck at the San Francisco Mint. Both the Philadelphia and Carson City facilities had even lower mintages. Thus, with only 150 to 200 coins extant, the 1872-S is the most plentiful issue for the year. With that said, the 1872-S was still subject to the same degree of circulation as other ten dollar issues struck out West. Only two coins have been certified in Mint State: This coin and an MS61 by NGC. This is the only one endorsed by CAC for quality within the grade.

Mint luster is bright and frosty over well-struck motifs and luminous yellow-gold surfaces. As expected, each side is heavily abraded. A small planchet void occurs just inside star 1. A Mint State 1872-S was last offered at auction in 2004 and another may not be made available for some time. Census: 1 in 60, 1 finer. CAC: 1 in 60, 0 finer (1/18).

From The Admiral Collection. NGC ID# 2653, PCGS# 8665

1873 Closed 3 Ten, AU53 Only 800 Pieces Minted

4287 1873 Closed 3 AU53 PCGS. The 1873 Closed 3 (old name) or Close 3 (current nomenclature) coins were struck early in the year and the date logotype for all denominations was modified following complaints that the digit looked like an 8. Among Liberty eagles, the entire 800 coin mintage for the year was produced in January 1873, and none were minted with the modified Open 3 date style. Proof coins were preferred over Mint State coins in the 19th century, so no circulation strikes were saved at the time of issue, despite the low mintage. As a result, high grade survivors are nonexistent. This piece has brilliant fire-gold surfaces with myriad trivial marks reflected in the slightly mirrored fields. This is an important absolute rarity in the series, with only 19 examples in all grades certified by PCGS. NGC has also certified 19 examples including 10 in AU53 through AU58 grades. Population: 2 in 53, 7 finer (1/18), including a single MS60 as the finest certified. From The Admiral Collection. NGC ID# 2654, PCGS# 8666

1873-CC Ten Dollar, Choice AU Among the Rarest Issues From This Mint One of the Finest Coins Ever Offered at Auction

4288 1873-CC AU55 NGC. Variety 2-A. Carson City eagles from the 1870s are, without exception, major rarities in either the absolute or conditional sense, often both. Not only does the 1873-CC fit that bill, it sets the standard. The 1870-CC is widely regarded as the singlemost important key date from this facility, but the 1873-CC is essentially just as rare. The argument could be made that this issue is, in fact, more challenging in high grades.

Merely 4,543 1873-CC ten dollar gold coins were minted, and they circulated as intended in the channels of Western commerce. There were no collectors interested in setting these coins aside for numismatic purposes, so most examples were used extensively and eventually melted for their gold weight. The fact that any pieces survive at all is simply a matter of happenstance. The estimated survivorship ranges from 60 to 80 pieces.

The average 1873-CC eagle is, as Jeff Garrett and Ron Guth put it, "in miserable condition, heavily marked, and/or softly struck on the center of the obverse." Most coins grade in the VF to XF range. Doug Winter adds: "I doubt if more than a half dozen properly graded AU pieces exist and there are currently no 1873-CC eagles known that are even close to being Uncirculated."

This is one of the finest representatives ever offered at public auction. Indeed, it is one of the finest representatives extant with at most three higher-graded submissions at NGC and PCGS combined, assuming no duplications or crossovers. Partial mint luster remains intact within the recesses of the design, a quality virtually unseen on any other example of the issue. The motifs are strongly detailed with trivial high-point friction. Abrasions are plentiful, but none are singularly distracting. Census: 1 in 55, 2 finer (1/18).

From The Admiral Collection. NGC ID# 53M6, PCGS# 8667

1874 Eagle, High-End MS64 The Finest Offered in a Decade

4289 1874 MS64 PCGS. CAC. The Mint struck 53,140 ten dollar gold coins in 1874 before production plummeted to 100 pieces the following year. In circulated and lower Mint State grades, the 1874 is one of the more accessible issues from the decade, scarce as it may be in an absolute sense. Most Uncirculated examples are either in MS61 or MS62. Higher-graded coins are very rare. According to our Permanent Auction Archive, no MS64 has appeared at auction since 2004, and the last Gem offered publicly was in 2008.

One could easily see this Choice Uncirculated eagle with thick mint frost and peach-gold surfaces upgrading. The strike is even and bold, and the fields are minimally marked. An outer ring of deep orange color encircles the borders on each side. Lightly clashed. Encapsulated in a green label holder with a matching CAC approval sticker. Population: 4 in 64, 3 finer. CAC: 1 in 64, 0 finer (1/18). From The Admiral Collection. NGC ID# 2657, PCGS# 8669

1874-CC Ten Dollar, VF35 Original Carson City Survivor

4290 1874-CC VF35 PCGS. CAC. Variety 1-B. This rare variety features the feathertip over the second C in the mintmark. The 1874-CC is the most available Carson City ten from the 1870s. However, it would be considered a great rarity in many series, since PCGS has certified a total of only 191 pieces, including duplicate submissions, over the past three decades. CAC has confirmed just 11 pieces in all grades (1/18). This lightly marked apricot-gold example displays blending on the wingtips and the hair above the ear, but abundant design definition remains. Ex: Long Beach Signature (Heritage, 6/2013), lot 5803. NGC ID# 54UF, PCGS# 8670

1874-CC Liberty Head Ten Dollar, XF45 Accessible Carson City Eagle

1874-CC XF45 PCGS. Variety 1-A. A production increase of nearly 370% resulted in a mintage of 16,767 eagles at the CC-mint in 1874. Pair that with an above-average survival rate and one begins to grasp what makes this one of the more collectible ten dollar issues from this mint. Hints of luster remain on both sides of this orange-gold representative. Abrasions and blending are consistent with the high-end XF assessment. Encapsulated in an old green label holder. Population: 37 in 45 (1 in 45+), 35 finer (1/18). From The Admiral Collection. NGC ID# 54UF, PCGS# 8670

1875 Ten Dollar Gold, AU50 Lowest Mintage Among Regular-Issue U.S. Coins Extreme Rarity of the Liberty Ten Series

4292 1875 AU50 NGC. Multiple great gold rarities emerged from the Philadelphia Mint in 1875, a strange occurrence that presents a philosophical conundrum for gold collectors and a confusion of small numbers. The 1875 three dollar gold piece is a proof-only six-figure rarity, while the gold dollar and quarter eagle each have mintage of only 400 pieces. The 1875 half eagle is a formidable rarity of its own, with only 10 to 12 pieces known from a mintage of 200 coins. Suddenly, the minuscule circulation strike mintage of the eagle — just 100 pieces — seems like just one more sign of the times. Yet it is arguably the most important rarity of them all.

Foremost is the fact that the 1875 eagle has the lowest circulation-strike mintage of any regular-issue U.S. coin of any denomination. From that tiny mintage, perhaps as many as a dozen pieces survive. (We believe just 8 or 9 pieces can be positively identified.) David Hall calls the 1875 eagle a true "ultra rarity," in a class with the 1894-S dime and the 1870-S Seated dollar. Doug Winter says, "I believe that the 1875 eagle, however, is the rarest of all these impressive Philadelphia issues." David Akers simply states that the date ranks with the rarest and most desirable coins in any U.S. gold series.

The present coin is a sharp AU50 with orange-gold surfaces and scattered, small marks across still-lustrous surfaces. Prooflike flash at the margins adds eye appeal, while the knowledge that only two numerically finer examples exist put this example into truly rare numismatic air. The ten dollar gold series is seldom attempted by even the most patient and well-funded collectors, and the underrated 1875 issue is the crowning jewel among all of its circulation strikes.

Roster of 1875 Liberty Eagles

- 1. AU55 NGC. 1992 GNA Sale (Mid-American Rare Coins, 5/1992), lot 1435; Richmond Collection, Part I (David Lawrence Rare Coins, 7/2004), lot 2102.
- 2. AU53+ PCGS. Margene Heathgate Collection (Superior 6/1997), lot 1541; Atlanta Signature (Heritage, 8/2001), lot 7904; ANA Auction (Stack's Bowers, 8/2011), lot 7732, realized \$345,000.
- 3. AU50 NGC. St. Louis ANA Auction (New England Rare Coin Galleries, 7/1979), lot 313. The present coin.
- **4. AU50 PCGS.** Alto Collection (Stack's, 12/1970), lot 356; Harry W. Bass, Jr.; Bass Collection, Part II (Bowers and Merena, 10/1999), lot 1551; Jeff Garrett; Philadelphia Signature (Heritage, 8/2000), lot 7338; Pre-Long Beach Sale (Superior, 5/2001), lot 4139; Internet Only Auction (Heritage, 4/2002), lot 11458; Old Roswell Mill Collection; offered by John Hamrick in April 2008 at \$150,000; David Hall (Ellen D Collection); Simpson Collection via Legend Numismatics in May 2011.
- 5. AU50 PCGS. Four Landmark Collections (Bowers and Merena, 3/1989), lot 700; Long Beach Signature (Heritage, 10/1995), lot 6376; Boys Town and Mamiye Collections (Bowers and Merena, 3/1998), lot 2207; Baltimore Signature (Heritage, 7/2003), lot 10450; Internet Auction (Heritage, 10/2003), lot 14125; FUN Signature (Heritage, 1/2004), lot 2201; Christopher Bentley's Knob Hill Collection (Heritage, 2/2014), lot 4201, realized \$211,500.
- 6. XF45 PCGS. James and Margaret Carter Collection (Stack's, 1/1986), lot 270; Public Auction Sale (Stack's, 10/1988), lot 126; ANA Signature (Heritage, 7/1997), lot 5510.
- 7. XF45. Possibly Louis Eliasberg, Sr.; H.R. Lee Collection (Stack's, 10/1947), lot 1530; James A. Stack; James Stack Collection (Stack's, 3/1995), lot 610.
- 8. XF40. possibly Col. E.H.R. Green; Dr. Charles W. Green Collection (B. Max Mehl, 4/1949), lot 547; Davis-Graves Collection (Stack's, 4/1954), lot 955; Edwards Metcalf; Gilhousen Collection, Part I (Superior, 2/1973), lot 712; Jeff Browning; Dallas Bank Collection (Sotheby's-Stack's, 10/2001), lot 474; Doug Winter; southern collection.
- 9. VF35 PCGS. Public Auction (Robert A. Siegel, 11/1984); Mid-American Rare Coins, 5/1992), lot 395; Dr. Jon Kardatzke Collection (Goldberg, 6/2000), lot 1539; FUN Signature (Heritage, 1/2006), lot 3536.
- 10. VF30 PCGS. Long Beach Signature (Heritage, 6/1997), lot 5548; ANA Signature (Heritage, 8/1998), lot 7771.
- 11. VF30 PCGS. Cornerstone Sale (Mid-American Rare Coins, 8/1991), lot 758; Long Beach Signature (Heritage, 2/1994), lot 5441; FUN Signature (Heritage, 1/1998), lot 7966; June Auction (Superior, 6/1998), lot 2298.
- 12. VG. William Cutler Atwater Collection (B. Max Mehl, 6/1946), lot 1453; Amon Carter, Sr.; Amon Carter, Jr.; Amon Carter Collection (Stack's, 1/1984), lot 772; Auction '87 (Superior, 8/1987), lot 1946.
- 13. G-VG. Jacob Shapiro, a.k.a. J.F. Bell; J.F. Bell Collection (RARCOA, 4/1963), lot 392.
- 14. Good. Charles Williams; Adolphe Menjou Collection (Numismatic Gallery, 6/1950), lot 1616.
- 15. XF45. Possibly Jacob Shapiro, a.k.a. J.F. Bell; J.F. Bell Collection (Stack's, 12/1944), lot 639; Clifford T. Weihman; Josiah K. Lilly; Smithsonian Institution.

Additional Appearances

- A. Fine, formerly mounted. R.L. Wilson Sale (Stack's, 10/1959), lot 1111; Golden Sale (Kreisberg-Schulman, 3/1962), lot 2678.
- B. Extremely Fine, prooflike. Sale 416 (Morgenthau, 6/1940), lot 145.
- From The Admiral Collection. NGC ID# 54UH, PCGS# 8672

1875-CC Eagle, MS60 One of Three Uncirculated Examples Former Bass Coin

4293 1875-CC MS60 NGC. Variety 2-B. With only 100 circulationstrike eagles produced at the Philadelphia Mint in 1875 (plus 20 proofs) and without an emission from the San Francisco Mint, which abstained from the manufacture of ten dollar gold coins for the first time since it opened in 1854, collectors have no choice but to target an example of the 1875-CC — a rarity in its own right with only 7,715 coins struck. Perhaps 100 to 120 examples survive in all grades, and only three are known in mint condition.

In 2001, Doug Winter ranked this 1875-CC eagle tied for first on the Condition Census with two other coins. Today, NGC shows this coin in MS60 plus one finer example in MS63, while PCGS has graded a single Uncirculated coin in MS62 (1/18). We have not be able to ascertain whether or not those two coins are new discoveries or merely examples Winter knew about in 2001 that have since upgraded.

When this coin was last offered at auction as part of the Harry W. Bass, Jr. Collection, the Bowers and Merena cataloger described it as follows: "Lustrous, light yellow gold with coppery highlights around the periphery. Some prooflike surfaces remain. ... A superb specimen of this issue that usually comes heavily circulated." Nothing has changed (except the grade — upgraded from AU55 PCGS). Mint luster remains vibrant over lightly abraded, semiprooflike surfaces. Design detail is typically incomplete, but not as a result of friction. Another world-class Liberty Head ten dollar offering.

Ex: Pullen and Hanks (8/1975); Harry W. Bass Jr.; Harry W. Bass, Jr. Collection, Part IV (Bowers and Merena, 11/2000), lot 716, which realized \$31,050.00.

From The Admiral Collection. NGC ID# 2688, PCGS# 8673

1876 Liberty Head Eagle, AU50 Mintage of 687 Coins Rare in All Grades

4294 1876 AU50 PCGS. This is one of the most famous issues in the Coronet ten dollar series. A mere 687 eagles were struck at the Philadelphia Mint in 1876. While proof production was up on account of the Centennial celebrations (there was heightened demand for souvenirs), circulation strikes saw only a modest increase over the previous year's record-low output of 100 pieces. Any 1876 eagle is a rarity with one of the smallest regular-issue mintages in all of U.S. coinage. There are only 40 to 50 examples believed extant. Most survive in XF to AU condition.

This lightly circulated semireflective offering presents rich yellow-gold coloration over each side. Strike softness occurs over the central portions of the design, but the stars retain mostly clear radials. Myriad abrasions. Housed in an old green label holder. Population: 9 in 50, 15 finer (1/18).

From The Admiral Collection. NGC ID# 265C, PCGS# 8674

1876-CC Eagle, AU50 Very Scarce Nevada Mint Issue

1876-CC AU50 PCGS. Variety 1-A. A population of about 150 1876-CC ten dollar gold pieces are extant from a mintage of 4,696 coins, which equates to an above-average survival rate of roughly 3%. That may be explained by a heightened sense of of significance for the Centennial-year issue, although no coins were apparently saved in mint condition. The finest known representatives are graded AU58.

Traces of reflectivity appear within the device recesses. Strike detail is good with an expected amount of merging over the stars and central design elements. Light orange-gold coloration and scattered marks define each side. Encapsulated in a green label holder. Population: 11 in 50, 11 finer (1/18).

From The Admiral Collection. NGC ID# 54UL, PCGS# 8675

1876-CC Liberty Eagle, AU53 Elusive Branch Mint Issue

4296 1876-CC AU53 PCGS. Variety 1-A. Only 4,696 Liberty eagles were struck at the Carson City Mint in 1876 and it is doubtful that even a single specimen was saved for numismatic purposes. The coins were all released into circulation at the time of issue and circulated heavily in the regional economy for many years, making examples scarce-to-rare in all grades. The 1876-CC is seen most often in the VF-XF grade range today, and the issue is legitimately rare at the AU53 level. No Mint State examples have been certified at either of the leading grading services (12/17).

The present coin is a pleasing AU53 specimen, with some light wear on the well-detailed design elements and lightly abraded orange-gold surfaces that retain traces of original mint luster. A few hints of prooflike reflectivity are evident in sheltered areas. The elusive nature of the 1876-CC is well-known to series specialists and we expect intense competition when this lot is called. Population: 7 in 53, 4 finer (12/17). NGC ID# 54UL, PCGS# 8675

1876-S Liberty Eagle, AU55 One Finer Coin at NGC

1876-S AU55 NGC. From a tiny mintage of 5,000 pieces, the 1876-S Liberty eagle is very rare in AU55 condition, and finer coins are virtually unobtainable. This attractive Choice AU specimen shows just a touch of wear on the well-detailed design elements and the lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. Census: 7 in 55, 1 finer (1/18). From The Admiral Collection. NGC ID# 265E, PCGS# 8676

1876-S Liberty Eagle, AU58 Finest at Both Services, CAC Approval Top Example Offered in 25 Years

4298 1876-S AU58 NGC. CAC. Here is yet another sole-finest eagle offered as part of the Admiral Collection, a set that will undoubtedly be remembered as one of the top assemblages of Liberty Head tens ever put together. The 1876-S claims a production of 5,000 pieces, apparently all of which saw circulation; There are no Mint State examples graded at NGC or PCGS. Garrett and Guth write: "Akers cited a 1972 auction appearance of a Mint State example, and we've seen a reference to a PCGS MS-64 piece, but both coins (assuming they're not the same) have dropped off the radar screen for now." This is the closest thing to an Uncirculated 1876-S ten dollar gold piece available, affirmed by the CAC endorsement.

Well-struck devices exhibit minimal high-point rub. Glints of luster shine from the recesses, enlivening lightly abraded orange-gold surfaces. The obverse displays faint clash marks in front of and behind the portrait and a small alloy spot above 76 in the date. There is a curious lint mark (as made) between RI in AMERICA and a scrape above the top olive leaf. These will attribute this remarkable survivor in future auction appearances. Census: 1 in 58, 0 finer. CAC: 1 in 58, 0 finer (1/18).

From The Admiral Collection. NGC ID# 265E, PCGS# 8676

1877 Ten Dollar, MS60 Only Three Mint State Survivors Blatantly Prooflike, Ultra Low Mintage

4299 1877 MS60 PCGS. The Philadelphia Mint continued a trend in 1877 that began in 1875: the output of only a few hundred ten dollar gold coins per year. Specifically, that total amounted to 797 circulation strikes in 1877. This issue is nearly as rare as the 1876, while the 1875 is still the hands-down key. Only three 1877 eagles are known in Uncirculated condition: this MS60 and two MS61 representatives graded by PCGS.

As with the two other Mint State survivors, this Uncirculated ten dollar gold piece is blatantly prooflike with deeply reflective fields. The devices are fully struck over reddish-gold surfaces, and marks are fewer in number and more minor in nature than expected. A couple of small marks on the reverse likely prevent a higher grade. Population: 1 in 60, 2 finer (1/18).

From The Admiral Collection. NGC ID# 265F, PCGS# 8677

1877-CC Eagle, AU58 Finest Example Offered Publicly Among the Highest Graded at Both Services

4300 1877-CC AU58 PCGS. Variety 1-A. This amazing 1877-CC eagle marks a number of important milestones. To begin, it is one of the three finest examples at the two leading grading services. Just as significant is the fact that this coin represents not only the single highest-graded example we have handled, but the top-certified 1877-CC eagle sold at public auction as far as we can tell. Recently, the best examples offered publicly have included the Harry W. Bass, Jr. (AU55 PCGS) and Twelve Oaks Collection (AU53 PCGS) coins. The latter set a record price for the issue in our September 2016 Long Beach Signature sale when it brought \$49,350.

In 1893, Augustus G. Heaton described the 1877-CC ten dollar gold piece as "more or less scarce." Today, with only 50 to 70 pieces believed extant from a lowly mintage of 3,322 coins, one might be more inclined, and we believe correctly, to call this issue rare. A majority of survivors are seen in VF to XF condition. Relatively recent importations from overseas holdings account for a small number of AU representatives, but these are still rare. PCGS and NGC have yet to see a truly Uncirculated example, despite David Akers having reported the existence of what he called a "choice mint state" coin in 1980. Rusty Goe described the 1877-CC as a "late bloomer in terms of valuation," and we believe that while the market still fails to fully appreciate the absolute rarity of many Liberty Head eagles, sophisticated collectors will recognize the ultimate importance of this offering and adjust their bids accordingly.

The central obverse is lightly impressed, as always, but otherwise this near-Mint ten is well-struck. Warm, orange-gold surfaces are flashy with remaining mint luster and reddish-copper accents along the border near stars 11 to 13. Faint clash marks appear under Liberty's chin. A thin linear mark across the cheek and another above the arrowhead are the two most prominent pedigree identifiers. Population: 2 in 58, 0 finer (1/18).

From The Admiral Collection. NGC ID# 265G, PCGS# 8678

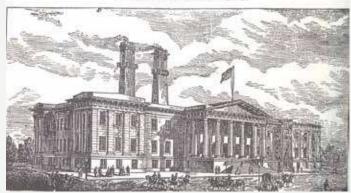

1877-S Ten Dollar, AU58 Much Luster Remains

4301 1877-S AU58 NGC. Only 17,000 gold eagles were struck at the San Francisco Mint in 1877, of which most survivors show light to moderate wear. Near-Mint examples such as the present are rare, and Mint State coins are prohibitively so. This piece displays lustrous orange-gold fields with a brush of friction over the high points of the sharply struck design elements. Moderate surface chatter accompanies the grade. Census: 9 in 58, 3 finer (1/18). NGC ID# 265H, PCGS# 8679

THE SAN FRANCISCO MINT.

1877-S Liberty Head Ten Dollar, MS61 Another Top-Graded Representative Overlooked Condition Rarity

4302 1877-8 MS61 NGC. Our Permanent Auction Archives showed no appearances for the 1877-S eagle in Uncirculated condition from its inception in 1993 until 2014, when we offered the other MS61 NGC representative with which this piece is tied atop the Census. There is one other mint condition example in MS60 at NGC. None are graded so fine at PCGS. Thus, while the 1877-S is a generally overlooked S-mint issue from a mintage of 17,000 coins, it remains a significant condition rarity and is scarce in the absolute sense, too. Few examples are known above XF.

Vibrant mint frost is characteristic of a San Francisco product from this period. Light orange-gold surfaces exhibit an unsurprising number of abrasions for the grade. Strike detail is good despite softness on the first and final stars, and the lower portion of the eagle. Another spectacularly rare offering from this important collection. Census: 2 in 61, 0 finer (1/18).

From The Admiral Collection. NGC ID# 265H, PCGS# 8679

1878-CC Ten Dollar, AU50 Rarely Available This Fine

4303 1878-CC AU50 PCGS. Variety 1-A. The only dies for this low-mintage issue (3,244 coins struck). Rusty Goe explains that as the "Comstock gold bonanza burst," miners' deposits at the Carson City Mint declined, continuing a trend that began in 1877. There are an estimated 70 or 80 pieces extant, most of them in XF to AU grades and only one example known in Mint State.

To locate another example as pleasing as this will prove extremely challenging. Each side is covered in an even layer of deep reddish-orange color. Still-lustrous recesses illuminate each side. Strike softness over the centers and light merging does not diminish the excellent eye appeal. A mark between AT in STATES is the only one of note. Certified in an old green label holder. Population: 5 in 50, 15 finer (1/18).

From The Admiral Collection. NGC ID# 265K, PCGS# 8681

1879-CC Liberty Head Ten Dollar, AU53 Lowest Mintage for Any CC Gold Coin Conditionally Rare

4304 1879-CC AU53 NGC. CAC. Variety 1-A. A single pair of dies accomplished the lowest mintage for any Carson City gold coin. Only 1,762 eagles were struck at the Nevada branch mint in 1879. Consequently, the 1879-CC is about as rare as the famous first-year 1870-CC ten dollar. In all, probably 50 or 60 coins survive, and there are merely one or two examples believed extant in Mint State. The offering of any 1879-CC eagle is a notable event, let alone one in this relatively high grade and with original surfaces. We expect to see spirited bidding from knowledgeable gold specialists.

Trivial friction fails to obscure the design features on this strongly detailed rarity. The 1879-CC tends not to be well-struck, but this is a delightful exception. Lightly abraded red-gold surfaces retain a hint of their original reflectivity in the fields. A terrific example, among the finest with CAC endorsement, showing a single pedigree marker above the 7 in the date. Census: 5 in 53, 9 finer. CAC: 3 in 53, 0 finer (1/18).

From The Admiral Collection. NGC ID# 265N, PCGS# 8684

1879-O Eagle, Choice AU Frosty, Eye-Appealing O-Mint Rarity Just 1,500 Pieces Struck

4305 1879-O AU55 PCGS. CAC. Variety 1. Survival estimates for the 1879-O eagle range from 70 to 135 coins from a mintage of just 1,500 pieces. That is not only the second lowest production total for any New Orleans ten dollar but for any gold denomination from that facility. Auction appearances are scant, perhaps two or three a year, and most of those coins have what Doug Winter calls "below average eye appeal." To that point, this is one of only eight 1879-O eagles that bears the approval of CAC.

Coppery-gold surfaces are characteristically prooflike with frosty, needle-sharp relief elements. On the obverse, the star radials are clear and the central curls bold, while the reverse displays crisp feathers, talons, and olive leaves. There are wispy marks on each side but none of significant importance. Encapsulated in an old green label holder. Population: 6 in 55, 9 finer. CAC: 3 in 55, 2 finer (1/18). From The Admiral Collection. NGC ID# 265P, PCGS# 8685

1880-CC Ten Dollar, MS62 Top Condition Census Coin Possibly the Finest Extant

4306 1880-CC MS62 NGC. CAC. Variety 1-B. The first C in the mintmark is almost entirely left of the N in TEN. This Carson City issue has a relatively healthy mintage (11,190 coins) and survivorship compared to many other dates from this mint and others in the Liberty Head series, though it is by no means plentiful. While the 1880-CC can usually be found in VF through AU grades (average certified assessment is between XF45 and AU50), Mint State representatives are extremely rare. This is one of only two coins certified at this level (both NGC-graded), and there are none finer. The other MS62 has not been endorsed by CAC.

Bright mint luster radiates over this top Condition Census example. Both sides show distinct semiprooflikeness in the fields and the strongly defined relief elements are delicately frosted, especially the central obverse. Spindly die cracks encircle the reverse. Minimally marked. We would not be surprised to see this coin break the previous record for an 1880-CC ten. An MS61 PCGS coin realized \$47,437.50 in our 2007 ANA Signature sale. Census: 2 in 62, 0 finer. CAC: 1 in 62, 0 finer (1/18).

From The Admiral Collection. NGC ID# 265T, PCGS# 8688

1880-O Ten Dollar, AU58 Sharp and Semireflective

1880-O AU58 PCGS. Variety 1. The mintmark is high relative to the fletching, and the left-hand stars are doubled. After resuming coining operations in 1879, the New Orleans Mint took a big stride in eagle production in 1880. The issue still claims a low mintage of 9,200 coins, but survivors are among the more collectible O-mint tens from this period. Lavender hues grace semireflective yellow-gold surfaces. The reverse features a couple of colorful alloy spots. Minimal blending is present over pinpoint-sharp motifs, and the only mentionable mark occurs in the upper-left obverse field. Housed in a green label holder. Population: 15 in 58, 6 finer (1/18).

From The Admiral Collection. NGC ID# 265U, PCGS# 8689

1881-CC Liberty Ten, MS60 Nice Color and Luster

4308 1881-CC MS60 PCGS. CAC. Variety 1-A. The 1881-CC Liberty eagle claims a mintage of just 24,015 pieces, but a substantial hoard of fairly high grade specimens surfaced in the late 1990s, making the issue reasonably available today. This attractive Mint State example offers well-detailed design elements and lustrous orangegold surfaces that are lightly marked for the grade. Population: 2 in 60, 23 finer. CAC: 2 in 60, 12 finer (1/18).

From The Admiral Collection. NGC ID# 265X, PCGS# 8692

1881-O Ten Dollar, MS60 Low-Mintage New Orleans Issue Extremely Rare in Mint State

1881-O MS60 NGC. CAC. Variety 1. The 1881-O is the rarest New Orleans Mint eagle from the early part of this decade. Coins graded AU55 to AU58 are very rare, and there are only a handful of Mint State examples known. In 2006, Winter reported probably four of five Uncirculated pieces extant, a number that likely remains fairly accurate despite inflated certification totals.

This is a well-struck representative with full radial lines on the stars, sharp hair details, and bold feather definition. Each side displays considerable mint frost on the devices with a hint of light reddish-gold color. A choice piece for the grade with satiny surfaces notably free of major marks. Census: 8 in 60, 6 finer. CAC: 3 in 60, 1 finer (1/18).

Ex: James A. Stack Collection (Stack's, 3/1995), lot 630; Ronald W. Brown Acadiana Collection (Heritage, 8/1999), lot 8135.

From The Admiral Collection. NGC ID# 265Y, PCGS# 8693

1882-CC Eagle, AU55 Conditionally Elusive

4310 1882-CC AU55 PCGS. CAC. Variety 2-A. Misplaced date digits are hidden in the obverse dentils at 6 o'clock. While designated as Variety 2-A, this is the only known die pair for the 1882-CC eagles, as it is thought to be the early die state of the 1-A combination. Although a number of AU examples survive from the 6,764-coin mintage, higher level examples are scarce, and Mint State pieces are rare. Housed in a green-label PCGS holder, this Choice AU representative exhibits nearly full luster with frosty surfaces and excellent design definition on the devices. A few trivial copper toning spots are inconsequential. Population: 24 in 55, 24 finer. CAC: 6 in 55, 10 finer (1/18).

From The Admiral Collection. NGC ID# 2663, PCGS# 8696

1882-O Liberty Eagle, MS60 Underrated Branch Mint Issue

4311 1882-O MS60 PCGS. CAC. Variety 1. From a mintage of 10,820 pieces, the 1882-O Liberty eagle is an underrated, elusive issue, despite a few small hoards that surfaced in the early 1990s. This impressive MS62 specimen offers well-detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. Housed in a green label holder. Population: 5 in 60, 12 finer. CAC: 2 in 60, 3 finer (1/18). From The Admiral Collection. NGC ID# 55GJ, PCGS# 8697

1883-O Ten Dollar, AU58 Rarest New Orleans Eagle Only 800 Coins Produced

1883-O AU58 PCGS. Variety 1. The 1883-O is the rarest of all New Orleans Mint eagles and claims the lowest mintage of any gold coin struck at the Southern facility (800 pieces). Doug Winter reported a survival estimate of 35 to 45 coins in his 2006 edition of Gold Coins of the New Orleans Mint: 1839-1909 — a number he maintains is accurate to this day and which is borne out by the certification totals, assuming they include several resubmissions. Fewer than 10 pieces are believed extant in AU condition (all levels), and a single Uncirculated representative is known. This near-Mint example formerly occupied the top spot in Winter's Condition Census. He noted it was "found in a Savannah, Georgia collection and was later sold by a New York dealer to another collector. It may possibly be the Golden I: 2738 coin." That New York dealer was Winthrop Carner, and the collector was Dr. Warren Miller.

Rich golden-orange color covers both sides of this amazing rarity. Bright surfaces exhibit noticeable reflectivity in the fields, delivering a degree of eye appeal unseen among the vast majority of surviving 1883-O tens. Strike definition is strong over the centers, with the usual flatness seen on the peripheral stars. A small mark appears on Liberty's jawline, and another nick is seen in the upper obverse field at the tip of the coronet. These serve as pedigree identifiers. Population: 4 in 58, 1 finer (1/18).

Ex: Warren Miller Collection (Heritage, 10/1995), lot 6421.

From The Admiral Collection. NGC ID# 2668, PCGS# 8701

1884-CC Liberty Ten, AU58 Seldom Seen Any Finer

4313 1884-CC AU58 NGC. CAC. Variety 1-A. From a small mintage of 9,925 pieces, the 1884-CC Liberty double eagle is a rare issue in high grade. This attractive near-Mint specimen exhibits a much better-than-average strike, with just a trace of wear on the design elements. The lightly abraded orange-gold surfaces retain much original mint luster and eye appeal is outstanding. A series of diagnostic die file marks appear on Liberty's neck. Census: 28 in 58, 9 finer. CAC: 6 in 58, 2 finer (1/18).

From The Admiral Collection. NGC ID# 266B, PCGS# 8704

1885 Ten Dollar, MS66 Tied for Finest Extraordinary Quality

4314 1885 MS66 NGC. CAC. Produced from 1838-1907, the Liberty eagle series witnessed the production of numerous scarce and rare issues. With an original mintage of 253,527 pieces, the 1885 does not seem like an especially noteworthy date. Indeed, examples of this delivery are easily obtainable in the circulated and average Mint State grades. Above the MS64 grade level, however, this issue becomes extremely rare.

An extraordinary coin regardless of date or Mint, both sides are thickly frosted with a pristine, reddish-gold sheen. There are a few interesting peripheral cracks near the lower reverse rim, but the dies were more than capable of striking every feature to the fullest. Advanced gold collectors would be wise to take advantage of the fleeting opportunity that this lot represents. Census: 2 in 66, 0 finer. CAC: 1 in 66, 0 finer (1/18).

Ex: FUN Signature (Heritage, 1/2001), lot 8292.

From The Admiral Collection. NGC ID# 266D, PCGS# 8706

1886 Liberty Eagle, MS64 Conditionally Very Rare in This Grade

1886 MS64 PCGS. CAC. Despite a more than adequate mintage of 236,136 pieces, the 1886 Liberty eagle is very rare in MS64 condition. This attractive Choice example offers well-detailed design elements and lightly marked orange-gold surfaces, with satiny mint luster on both sides. Housed in a green label holder. Population: 8 in 64 (1 in 64+), 0 finer. CAC: 1 in 64, 0 finer (1/18). From The Admiral Collection. NGC ID# 266F, PCGS# 8708

1888-O Liberty Ten, MS63 Only One Finer Coin at PCGS

4316 1888-O MS63 PCGS. CAC. The New Orleans Mint resumed coinage of eagles in 1888 after a four-year hiatus, when a mintage of 21,335 pieces was accomplished. The 1888-O is a rare issue in MS63 condition, and finer coins are virtually unobtainable. This attractive Select specimen is well-detailed and lightly marked, with vibrant mint luster throughout. Housed in a green label holder. Population: 25 in 63, 1 finer. CAC: 5 in 63, 1 finer (1/18). From The Admiral Collection. NGC ID# 266L, PCGS# 8713

1890-CC Eagle, MS62 Terrific Eye Appeal

4317 1890-CC MS62 PCGS. Variety 1-A. Although only 17,500 1890-CC eagles were manufactured, the issue enjoys a relatively high rate of survival and can be found in most grades up to MS62. Anything finer will require both significant funding and patience. The eye appeal of this peach-gold example is terrific. Each side is thickly frosted and well-struck. Chatter occurs in the fields, but the only overt reeding marks are mostly concealed under the eagle's right (facing) wing. Housed in a green label holder. Population: 52 in 62, 9 finer (1/18).

From The Admiral Collection. NGC ID# 266S, PCGS# 8718

1891-CC Liberty Eagle, MS63 Repunched Mintmark, FS-501

4318 1891-CC/CC Variety 4-C, FS-501, MS63 NGC. CAC. The 1891-CC Liberty eagle is very scarce in MS63 condition, and finer coins are very rare. This coin shows an interesting repunched mintmark, with the remains of the undertype C easily seen protruding from the right side of the second C. The design elements are sharply detailed and a diagonal spike is seen in the field below Liberty's jaw. The lustrous orange-gold surfaces show some grade-consistent minor contact marks and a die crack is evident through stars 1-5. Census: 6 in 63, 1 finer (1/18). From The Admiral Collection. NGC ID# 266U, PCGS# 145728

Base PCGS# 8720

1892-CC Liberty Eagle, MS62 Excellent Carson City Type Coin

4319 1892-CC MS62 PCGS. Variety 1-A. From a mintage of 40,000 pieces, the 1892-CC Liberty eagle is an available issue, in the context of the series. This attractive MS62 example is sharply detailed throughout, with lightly marked orange-gold surfaces and vibrant mint luster on both sides. The reverse is lightly clashed. Housed in a green label holder. Population: 19 in 62 (2 in 62+), 2 finer (1/18). From The Admiral Collection. NGC ID# 266W, PCGS# 8722

1893-CC Liberty Eagle, AU58 Final Carson City Issue

4320 1893-CC AU58 NGC. CAC. Variety 1-A. From a mintage of 14,000 pieces, the 1893-CC Liberty eagle is a rare issue in grades above the AU58 level. This impressive near-Mint specimen exhibits just a trace of wear on the well-detailed design elements and the yellow and rose-gold surfaces retain much of their original mint luster. Census: 45 in 58, 16 finer. CAC: 9 in 58, 4 finer (1/18). From The Admiral Collection. NGC ID# 2672, PCGS# 8726

1894 Liberty Eagle, MS65 Rare Issue in High Grade

4321 1894 MS65 NGC. Despite a large mintage of more than 2.4 million pieces, the 1894 Liberty eagle is a rare issue in MS65 condition, and neither of the leading grading services has graded a coin in higher numeric grades (1/18). This sharply detailed Gem exhibits well-preserved orange-gold surfaces, with vibrant, satiny mint luster throughout and traces of prooflike reflectivity on the reverse. Census: 16 in 65 (1 in 65★), 0 finer (1/18).

From The Admiral Collection. NGC ID# 2675, PCGS# 8729

1894-O Liberty Eagle, MS63 Only One Numerically Finer at PCGS

4322 1894-O MS63 PCGS. The 1894-O claims a substantial mintage for the series, at 107,500 pieces. Fortunately, some high-quality examples were saved by contemporary collectors and a number of examples have surfaced in hoards, beginning around 1994. The 1894-O is still very rare in MS63 condition, however, and finer coins are virtually unobtainable. This impressive Select specimen is well-detailed and lustrous, with lightly marked orange-gold surfaces. Population: 15 in 63 (2 in 63+), 1 finer (1/18). NGC ID# 2676, PCGS# 8730

1895-O Ten Dollar, MS63 Among the Finest Coins at PCGS

4323 1895-O MS63 PCGS. CAC. Variety 2. Die line under the right foot of (LIBE)R(TY). The years 1894 and 1895 saw eagle production pick up significantly at the New Orleans Mint. The latter issue has a slightly lower mintage (98,000 coins). This is a well-struck Select Uncirculated ten dollar gold piece with original orange-gold surfaces and vibrant satin mint luster. Small, largely insignificant ticks are scattered over each side. Encapsulated in a green label holder. Population: 25 in 63, 0 finer. CAC: 6 in 63, 0 finer (1/18). From The Admiral Collection. NGC ID# 2679, PCGS# 8733

1897-O Liberty Ten Dollar, MS67 The Sole Finest Clapp-Eliasberg Coin Winter: 'Nearly Flawless'

4324 1897-O MS67 PCGS. CAC. Variety 1. Ex: Eliasberg. There is often a degree of subjectivity involved in the determination of a finest-known coin, especially when two or three examples exist with the same technical grade. Other times the answer is more clear-cut. This is one of the latter.

Offered in this lot is the acknowledged sole finest 1897-O eagle. Its pedigree is well-established, having originally been purchased from the United States Mint by J.M. Clapp for face value at the time of issue. Almost half a century later it was acquired by Louis E. Eliasberg, Sr., perhaps the most famous American coin collector, through the purchase of the Clapp Estate in 1942. Its only public offering to date occurred in October 1982, when this ten dollar gold coin realized \$10,450.

In the 36 years that have passed since that sale, several highgrade 1897-O ten dollar gold pieces have been discovered in overseas holdings. None of them can match the quality of this Superb Gem. The grading services have seen a couple of Gem and Premium Gem submissions, but again, this piece is in a league of its own.

Doug Winter has described it as "nearly flawless." In 1982, Dr. Richard Bagg cataloged this coin for the Eliasberg sale, commenting: "An absolutely spectacular example of this New Orleans Mint issue. Undoubtedly one of the very finest known." The surfaces are utterly pristine. There is a single microscopic tick on Liberty's chin and a lint mark (as made) touching the inner point of star 1. A spot of struck-in grease appears within the eagle's shield. Uninhibited mint luster radiates over luminous peach-gold surfaces. The extreme central reverse is a shade darker, furthering the eye appeal. Trivial softness on the stars is typical, while the centers are boldly struck. There may not be another opportunity to obtain this incredible New Orleans eagle for decades. Housed in an old green label holder. Population: 1 in 67, 0 finer. CAC: 1 in 67, 0 finer (1/18)

Ex: Purchased directly from the New Orleans Mint by J.M. Clapp (11/1897); John H. Clapp; Clapp Estate to Louis E. Eliasberg, Sr. (1942); Louis E. Eliasberg, Sr. Collection (Bowers and Ruddy, 10/1982), lot 814.

From The Admiral Collection. NGC ID# 7LHC, PCGS# 8738

1897-S Eagle, Radiant MS63 Clean for the Grade

4325 1897-S MS63 PCGS. Boldly struck motifs define each side. The reverse is incredibly clean for the grade, and there are merely a handful of tiny ticks on the obverse. Radiant, frosty surfaces display uniform peach-gold color. We note two prominent die lines near the T in LIBERTY. The 1897-S eagle becomes rare in MS63. Few examples are known finer. Encapsulated in a green label holder. Population: 16 in 63, 7 finer (1/18).

From The Admiral Collection. NGC ID# 267F, PCGS# 8739

1901-S Ten Dollar, MS65 Rarely Seen Uncentered Broadstrike

4326 1901-S — Uncentered Broadstrike — MS65 PCGS. An uncentered broadstrike, with an unstruck raised border that is widest at about 9:30 on the obverse. The nearby dentils show spread toward that area, while at 3:30 the dentilation is nearly off the planchet. On the reverse the unstruck area is widest at 8:30, with a largely unraised portion on the rim from 7:30 to 9:30. Despite these challenges this coin is boldly struck, as often seen on this issue, with razor-sharp details. Perusal with a loupe reveals only trivial, grade-consistent marks. The luster is superb on this honey-gold example. A wispy die crack joins stars 3 and 4, while two others run through stars 11 through 13. An appealing and interesting coin. Ex: FUN Signature (Heritage, 1/2006), lot 3542.

From The Admiral Collection.

1901-S Ten Dollar, MS66 Only Two Coins Finer at PCGS

4327 1901-S MS66 PCGS. An available date in most grades, the 1901-S Liberty eagle is popular as a 20th century type coin. This Premium Gem example displays a full strike and original softly frosted yellow-gold luster. Even under a loupe, no distractions are seen, making the coin highly eye-appealing. Although moderately available in the current grade, the 1901-S ten is rare finer. PCGS has seen just two Superb Gem examples (1/18). NGC ID# 267S, PCGS# 8749

1903 Ten Dollar, MS65 Conditionally Rare

4328 1903 MS65 NGC. CAC. Vibrant honey-gold luster produces a cartwheel effect on each side, but the fields are also slightly reflective when tilted beneath a light. The strike is razor-sharp. Under a loupe, only a few small marks on Liberty's cheek limit the grade. The 1903 Liberty eagle is available through MS63 but is scarce in MS64 and rare at the Gem level. This coin is within the Condition Census of CAC-approved pieces. Census: 11 in 65, 0 finer. CAC: 2 in 65, 1 finer (1/18).

From The Admiral Collection. NGC ID# 267V, PCGS# 8752

1906-D Liberty Eagle, MS65 Attractive First-Year Issue

4329 1906-D MS65 NGC. CAC. A delightful Gem from the first year of coinage operations at the Denver Mint, this coin offers well-detailed design elements, with just a trace of softness on some star centers. The well-preserved surfaces are virtually flawless, aside from a couple of scrapes between the eagle's head and wing on the reverse. Vibrant mint luster adds to the outstanding eye appeal. Census: 22 in 65, 2 finer. CAC: 8 in 65, 0 finer (1/18). From The Admiral Collection. NGC ID#71HG, PCGS# 8760

1906-O Liberty Head Eagle, MS63 Natural Eye Appeal

4330 1906-O MS63 PCGS. CAC. Variety 1. The 1906-O is the scarcest 20th century eagle from the New Orleans Mint. There are enough Mint State examples to satisfy a few hundred specialists in this series, though few are as naturally appealing as this Select representative. Mint luster is remarkably vibrant over orangegold surfaces with faint reddish accents. Strike detail is virtually complete everywhere except the two strands of hair above Liberty's ear. A mark on the cheek will identify this coin. Housed in a green label holder. Population: 51 in 63 (3 in 63+), 27 finer. CAC: 14 in 63, 9 finer (1/18).

From The Admiral Collection. NGC ID# 53FB, PCGS# 8761

1907-S Eagle, Rare MS64+ Among the Top Five Known

4331 1907-S MS64+ PCGS. CAC. While some say the 1905-S eagle is the scarcest Liberty Head ten of the 20th century, the 1907-S has an equally valid claim. It is virtually unavailable in Gem or finer grades, and borderline Gems are similarly rare. Vibrant wheat-gold surfaces set this conditionally rare example apart from other near-Gem examples. The fields exude frosted mint luster, while sharply struck motifs lack full details only on a few of the hair curls.

Struck during the transitional year for gold coinage designs, few Liberty Head tens were saved numismatically and there were no substantial foreign holdings of the 1907-S. As a result, the present coin is the sole Plus-graded MS64 at PCGS, and also the sole near-Gem to earn CAC endorsement. It is among the top five 1907-S eagles at either service, and quite possibly the finest example available to collectors for the foreseeable future. Population: 10 in 64 (1 in 64+), 2 finer. CAC: 1 in 64, 0 finer (1/18). NGC ID# 38EP, PCGS# 8765

PROOF LIBERTY EAGLES

1869 Ten Dollar, PR61 Cameo From a Mintage of 25 Proofs Top-Notch Eye Appeal

4332 1869 PR61 Cameo NGC. CAC. NGC has certified a total of eight 1869 proof eagles. PCGS reports another four submissions. These totals, including non-Cameo, Cameo, and Deep Cameo specimens, are unsurprising. The Mint struck 25 ten dollar proofs in 1869, so a survival rate of 12 to 14 examples makes sense. Breen wrote in his *Proof Encyclopedia* that this issue was subject to "great pressure from date collectors as almost unobtainable in business strike form." That is certainly true of high-grade representatives, which are virtually unknown. Otherwise, the 1869 circulation strike is far more available despite its low mintage of 1,830 coins.

Contrast between the glassy, jet-black fields and fully frosted devices is profound and bordering on Deep Cameo. Wispy lines on each side define the technical assessment, but the eye appeal remains top-notch. Two alloy spots appear within the O of GOD and between UR in TRUST. Certified in a former generation holder. Census: 1 in 61 Cameo, 4 finer in this category. CAC: 1 in 61, 0 finer (1/18).

From The Admiral Collection. PCGS# 88809

1887 Ten Dollar, PR64 Attractive Orange-Peel Texture Ex: Byron Reed

4333 1887 PR64 PCGS. CAC. Ex: Byron Reed. Proof eagle production reached its highest point to date in 1887, when 80 specimens were struck. A similar level would not be achieved again until 1899. While Garrett and Guth explain that the high mintage was a direct response to actual collector demand, it seems few pieces were preserved in the long term. They write: "Why the survival rate is so low remains a mystery, but today the total population is less than 30 pieces."

Both sides exhibit the classic and highly sought-after orangepeel texture in the fields, which are deeply reflective. The devices are lightly frosted and contrast is evident, but no mention of it is made on the PCGS insert. A few wispy lines appear on the obverse, and there are no other signs of contact. Housed in an old green label holder. Population: 2 in 64, 2 finer in this category. CAC: 2 in 64, 0 finer (1/18).

Ex: Byron Reed Collection (Christie's/Spink America, 10/1996), lot 166

From The Admiral Collection. NGC ID# 28FS, PCGS# 8827

1904 Ten Dollar, PR64 Rare in All Grades 108 Proofs Struck

4334 1904 PR64 PCGS. CAC. The 108-coin mintage for the 1904 ten dollar gold proof stands as one of the highest in the long-running Liberty Head series. However, with roughly 45 to 60 pieces extant according to PCGS, its survivorship compares favorably to many lower-mintage issues from the latter part of the series.

Deep orange-gold surfaces feature reflective fields and few contact marks for the Choice grade. Both sides have above-average contrast for the issue, although there is no mention of it on the PCGS insert. Detail is predictably sharp, the exceptions being stars 1 and 13, which lack radial lines. Housed in a green label holder that is slightly cracked. Population: 11 in 64, 0 finer. CAC: 1 in 64 Cameo, 0 finer in this category (1/18).

From The Admiral Collection. NGC ID# 28GB, PCGS# 8844

INDIAN EAGLES

1907 No Periods Indian Eagle, MS65 Frosty and Attractive No Motto Coin

4335 1907 No Motto MS65 NGC. The 1907 No Periods Indian eagle is an available and popular No Motto type coin, although demand as such increases as one climbs the grade scale. This Gem example is a comfortable balance of quality and cost. The strike is razor-sharp, and the frosty yellow-gold surfaces are original Under a loupe, the fields and even the devices are free of abrasions, although some faint olive coloration on Liberty's cheek likely masks a few faint grazes that limit the numeric designation from NGC. NGC ID# 28GF, PCGS# 8852

1907 No Periods Ten, Luminous MS65 Sharp No Motto Coin

4336 1907 No Motto MS65 PCGS. This straw-gold Gem displays a strong cartwheel effect and has no distracting abrasions. Sharp design elements add to the eye appeal. The No Periods reverse design was the final product of the Mint's tinkering with Saint-Gaudens' eagle models in 1907, and 239,406 pieces were struck. This issue remains the go-to choice for No Motto type representation. Housed in a green label holder. NGC ID# 28GF, PCGS# 8852

1908-D Indian Ten, MS64 No Motto

4337 1908-D No Motto MS64 PCGS. CAC. The No Motto 1908-D Indian eagles were the first branch mint coins of the type. Perhaps the mintmark location wasn't thoroughly considered when the dies arrived from Philadelphia, as the small D mintmark is located inside the reverse rim at about 8:30, well above the terminal leaves of the olive branch. Beginning with the 1908 With Motto issue, and continuing through the end of the series, the mintmark was relocated to the end of the arrowheads, below the branch. This exquisite Choice Mint State example has soft, frosty yellow-gold luster with brilliant, pristine surfaces and an abundance of eye appeal. Population: 62 in 64 (6 in 64+), 9 finer. CAC: 11 in 64, 4 finer (1/18). NGC ID# 28GH, PCGS# 8854

1909 Ten Dollar, MS64 Exemplary for the Grade Seldom Offered Finer

4338 1909 MS64 PCGS. Satiny yellow-gold luster produces a vibrant cartwheel effect on this near-Gem 1909 Indian eagle. No major abrasions are present. Under a loupe, a small mark appears behind Liberty's eye, but any other grade-limiting imperfections are unimportant. This is a well-struck and conditionally scarce example of this slightly better date. PCGS has only certified 30 higher-grade representatives (1/18). NGC ID# 28GM, PCGS# 8867

1909 Indian Ten, Satiny MS64 Elusive in Finer Grades

4339 1909 MS64 PCGS. The 1909 Indian eagle is a slightly better date in high grade, scarce in MS64 and rare finer. This near-Gem is satiny and lustrous, showing yellow-gold cartwheel luster and well-struck design elements. Liberty's cheek is attractively free of bothersome abrasions. PCGS lists only 30 finer representatives, and in more than two decades of record keeping, we have handled only 11 finer PCGS-graded coins (1/18). NGC ID# 28GM, PCGS# 8862

1930-S Ten Dollar, Unc Sharpness Low-Mintage, Heavily Melted Issue

4340 1930-S — Repaired — PCGS Genuine. Unc Details. Gold eagle production was sporadic in the final years of the series, as the denomination was largely unneeded in circulation and most examples remained in bank vaults as backing for paper currency. The Philadelphia Mint struck more than 1 million coins in 1926 — the first issuance of the denomination since 1920 — but then none were coined again until 1930, when the San Francisco Mint struck a small run of 96,000 pieces. Even in the Western regions, this issue did not circulate to any notable extent, as most survivors are in various Uncirculated grades. Much of the mintage remained in Treasury or bank vaults when President Roosevelt, by Executive Order in 1933, prohibited the private ownership of nonnumismatic gold coins, and recalled all modern currency issues for melting. As a result, the 1930-S Indian eagle is one of the scarcest dates in the series.

The present example displays satiny green-gold luster. The surfaces are largely free from noticeable abrasions, though PCGS notes some minor repair work (on Liberty's cheek), where a cluster of small marks remain. The eagle's trailing leg lacks some of its feather definition, although this is clearly a still-pleasing example of the challenging, heavily melted key date.

LIBERTY DOUBLE EAGLES

1850 Liberty Double Eagle, AU53 First-Year Of Denomination

4341 1850 AU53 NGC. The double eagle denomination was struck for circulation for the first time in 1850, to put the the massive influx of gold from the California gold fields to work in the national economy. A substantial mintage of 1.1 million pieces was accomplished at the Philadelphia Mint, making the issue relatively available to series specialists and type collectors alike. This attractive AU specimen is lightly worn and moderately abraded with pleasing yellow and rose-gold surfaces that retain traces of original mint luster. NGC ID# 268F, PCGS# 8902

1850 Double Eagle, Choice AU Some Luster Remains

4342 1850 AU55 PCGS. Bright yellow-gold coloration on this Choice AU 1850 double eagle is original. The devices are sharply detailed, and each side shows moderate surface chatter consistent with the grade. Hints of satiny luster remain in the fields. Collectors interested in federal coins struck with gold mined during the California Gold Rush should not overlook the early Philadelphia double eagles. Prior to the opening of the San Francisco branch mint in 1854, large amounts of California gold were shipped to New Orleans and Philadelphia for coinage. The double eagle denomination was the recipient of most of this gold. NGC ID# 268F, PCGS# 8902

1850-O Liberty Double Eagle, XF45 First-Year Branch Mint Issue

4343 1850-O XF45 NGC. Business-strike double eagles were struck for the first time in 1850, and the New Orleans Mint produced a substantial total of 141,000 examples of the new denomination. This Choice XF specimen shows only light wear on the strongly impressed central design elements and the lightly abraded orange-gold surfaces exhibit traces of prooflike reflectivity in sheltered areas. NGC ID# 268G, PCGS# 8903

1851-O Variety 1 Twenty, AU50 Popular O-Mint Issue

4344 1851-O AU50 NGC. Variety 1. The Heritage numismatic cataloging staff have identified four different varieties of the 1851-O double eagles, and others may exist, considering the 315,000 coin mintage. The obverse die seen here has a distinctive tear-drop die chip in front of Liberty's eye. This honey-gold representative has scattered handling marks with hints of mint luster in the protected areas. The 1851-O double eagle is a popular issue that was almost certainly coined from freshly mined gold shipped from California to Louisiana. NGC ID# 2681, PCGS# 8905

1855 Twenty Dollar, AU58 One of the Finest Collectible Survivors

4345 1855 AU58 PCGS. Doug Winter estimates only 15 to 20 examples of the 1855 No Motto double eagle are extant in Uncirculated condition, making this one of the finest representatives most collectors could hope to obtain. Abundant mint luster remains, and the devices are boldly impressed. Light yellow-gold with a clean obverse and most major marks concentrated at the lower reverse. Struck from slightly rotated dies. Population: 32 in 58, 21 finer (1/18). NGC ID# 268V, PCGS# 8914

1857-S Spiked Shield Twenty, MS64 Ex: S.S. Central America, CAC Endorsed

4346 1857-S MS64 PCGS. CAC. Variety 20A. Ex: S.S. Central America. SSCA 7544. Spiked Shield. This near-Gem has the signature Central America "look" with broad, pale interiors and deeper yellows near the rims, with smooth and finely granular surfaces illuminated by brilliant mint luster. The coin is sharply struck with a few delicate marks to the right of star 3, but otherwise shows only a few minute abrasions. Housed in the original PCGS holder with its gold foil label, endorsed by CAC. NGC ID# 2696, PCGS# 8922

1858 Double Eagle, AU58 Remarkably Smooth and Appealing Rarely Seen CAC Green Label

4347 1858 AU58 PCGS. CAC. Most surviving 1858 double eagles are in the VF to lower-end AU grade levels. Near-Mint coins such as this piece are scarce, and Uncirculated examples are genuinely rare. Moreover, high-quality coins are lacking within each individual grade, as is confirmed by the strikingly small CAC population in this and finer grades. The coin offered here is remarkably sharp and unabraded for the issue and grade, showing lustrous orange-gold fields and satiny devices. Arguably more attractive than most of the Mint State coins that we have seen. Population: 28 in 58, 25 finer. CAC: 7 in 58, 5 finer (1/18). NGC ID# 2697, PCGS# 8923

1858-S Double Eagle, High-End AU58 Rare in Higher Grades

4348 1858-S AU58 PCGS. CAC. Collectors should not assume the 1858-S is available like the 1857-S, though it claims a comparably high mintage. It is far rarer in comparison, and only a handful of Uncirculated examples are known. This borderline-Mint State survivor is bright and lustrous, displaying as strong an impression as one may hope to find on a No Motto twenty. A touch of rub and lightly scattered marks explain the grade. Population: 52 in 58 (2 in 58+), 19 finer. CAC: 19 in 58, 2 finer (1/18). NGC ID# 2699, PCGS# 8925

1859 Liberty Double Eagle, AU55 Low-Mintage Type One Twenty

4349 1859 AU55 PCGS. The 1859 Liberty double eagle claims one of the lowest business-strike mintages of any Type One double eagle from the Philadelphia Mint, at a meager 43,597 pieces. There was little numismatic interest in double eagles at the time of issue, and the few 19th century collectors who did systematically collect the denomination preferred to update their holdings by purchasing proof examples from the Philadelphia Mint every year. The small business-strike production was largely ignored by contemporary numismatists and few high-quality pieces were preserved for posterity. The 1859 is an elusive issue in all grades today, and most survivors grade in the VF-XF range.

The present coin is an attractive Choice AU specimen, with vivid orange-gold surfaces that show the expected number of minor abrasions for the grade, with unusually vibrant traces of mint luster on both sides. Only a trace of actual wear shows on the well-detailed design elements and the overall visual appeal is quite strong. Housed in a green label holder. Population: 16 in 55, 22 finer (12/17). NGC ID# 269A, PCGS# 8926

1859-S Twenty Dollar, AU58 Scarce Type One Issue

4350 1859-S AU58 NGC. CAC. Despite a high mintage, the 1859-S is scarce and highly desirable in near-Mint or Mint State grades. NGC has only certified 22 finer examples (1/18). The issue came after the loss of the S.S. Central America, but far enough before the loss of the S.S. Republic and S.S. Brother Jonathan that few examples were found in either of those treasures. This pleasing green-gold example has exceptional luster with hints of pale rose toning. NGC ID# 269C, PCGS# 8928

1862 Liberty Twenty, AU53 Elusive Type One Double Eagle

4351 1862 AU53 PCGS Secure. The economic stresses and uncertainties of the Civil War resulted in widespread hoarding of all precious metal coinage and the government suspended specie payments in late 1861. These circumstances resulted a drastic reduction of coinage in 1862, and the Philadelphia Mint struck a modest business-strike mintage of only 92,133 double eagles that year. The coins were largely ignored by contemporary collectors and few were saved for numismatic purposes. Unlike some other dates of this period, only a handful of examples have been recovered from shipwreck finds in recent years. Today, the 1862 Liberty double eagle is one of the most elusive issues in the Type One series.

The present coin is an attractive AU53 specimen, with just a touch of wear on Liberty's hair and coronet. The pleasing orange-gold surfaces retain much of their original mint luster and show the expected number of minor abrasions for the grade. The overall presentation is most attractive for this elusive Civil War era issue. Population: 15 in 53, 18 finer (12/17). NGC ID# 269M, PCGS# 8937

1862 Liberty Double Eagle, AU58 Elusive Type One Twenty

4352 1862 AU58 PCGS. The financial stresses and uncertainties of the Civil War caused widespread hoarding of all precious metal coinage and the government suspended specie payments in late 1861. Accordingly, mintages of most gold denominations declined dramatically at the Philadelphia Mint in 1862, and only 92,133 Liberty double eagles were struck. Few examples were saved for numismatic purposes, as the few numismatists that collected double eagles in those days preferred to order proofs to update their collections every year. Unlike most Type One double eagles, which are usually available in circulated grades, but rare in Mint State, the 1862 is an elusive issue in all grades today. Nine examples were recovered from the wreck of the S.S. Republic in recent times, but the 1862 remains one of the rarest Liberty twenties in Mint State grades.

The present coin is an impressive near-Mint specimen, with just a trace of wear over the high points of the well-detailed design elements. Although the pleasing orange-gold surfaces show the expected number of minor abrasions for the grade, both sides retain much of their original mint luster. Overall eye appeal is outstanding. Population: 4 in 58, 11 finer (12/17). NGC ID# 269M, PCGS# 8937

1866-S No Motto Liberty Twenty, AU50 Elusive, Final Type One Issue

4353 1866-S No Motto AU50 PCGS. The design of the Liberty double eagle was modified in 1866 to include the motto IN GOD WE TRUST on the reverse, but the dies for the new Type Two design arrived at the San Francisco Mint after double eagle coinage had commenced that year. As a result, 120,000 Type One double eagles with the old No Motto motif were struck and released into circulation before production switched over to the Type Two design. The 1866-S No Motto double eagle is one of the most elusive issues of the San Francisco Mint series today, with a surviving population of less than 200 examples in all grades.

The present coin is a pleasing AU specimen, with some light wear showing on the coronet and the hair above the eye. The orange-gold surfaces show the expected number of minor abrasions for the grade, but none are unduly distracting. The overall presentation is quite appealing for this elusive branch mint issue. Population: 15 in 50, 29 finer (12/17). NGC ID# 269W, PCGS# 8945

1869-S Double Eagle, MS62 High-End for the Issue, Conditionally Rare

1869-S MS62 NGC. PCGS lists four 1869-S double eagles pedigreed to the Saddle Ridge Hoard, although none are in Mint State. Many lower-end Uncirculated examples of this date come from old-time sources, as David Akers reported numerous auction appearances of such coins in his Analysis of Auction Records (1982). Today, examples are usually available for a price in MS60 or MS61, but in MS62 the date becomes rare, and only a few finer pieces are known. This example displays sharp design elements and frosty peach-gold mint luster. Scattered abrasions define the grade, including a couple of linear scrapes below and to the right of the date. Census: 18 in 62 (3 in 62+), 5 finer (1/18). NGC ID# 26A6, PCGS# 8956

1870 Liberty Twenty, AU55 Lightly Worn, Lustrous Example

4355 1870 AU55 NGC. From a smallish Philadelphia Mint production total of 155,185 pieces, the 1870 Liberty double eagle is an elusive issue in high grade. This attractive Choice AU specimen exhibits just a touch of wear on the well-detailed design elements and the lemon-yellow surfaces show some minor chatter in the fields, but this coin retains much of its original mint luster. Overall eye appeal is quite strong. NGC ID# 26A7, PCGS# 8957

1870 Double Eagle, AU58 Rare CAC-Approved Example

4356 1870 AU58 PCGS. CAC. The 1870 double eagle is a better date in high grade, scarce in AU58 and borderline rare at the Mint State level. CAC has awarded green labels to only a few handfuls of pieces across this entire spectrum, one of which is offered here. This frosty yellow-gold example has enough luster to be Uncirculated, although slight friction on Liberty's cheek and scattered abrasions throughout reduced the PCGS designation. Easily one of the most eye-appealing AU double eagles we have seen. Population: 35 in 58 (2 in 58+), 50 finer. CAC: 8 in 58, 11 finer (1/18). NGC ID# 26A7, PCGS# 8957

1872-CC Double Eagle, AU Details Better Carson City Issue

4357 1872-CC — Improperly Cleaned — NGC Details. AU. Variety 1-B. Glimpses of orange-gold luster remain at the margins and the devices are sharply defined on this low-mintage, better-date Carson City double eagle. The surfaces are lightly granular from a past cleaning. Numerous small abrasions and marks exist, including a small, round void on the neck that is a Mint-related planchet flaw or strike-through.

1873 Open 3 Twenty Dollar, MS63 Few Pieces Known Finer, CAC Endorsed

4358 1873 Open 3 MS63 PCGS. CAC. An uncommonly well-preserved Open 3 coin, and an outstanding example of the date overall. This Select 1873 double eagle displays frosty, wheat-gold luster and bold motifs with only occasional contact marks in the fields. There are no singular abrasions, and eye appeal is excellent. PCGS lists 11 numerically finer representatives (1/18). CAC: 32 in 63, 3 finer (1/18). NGC ID# 26AL, PCGS# 8967

1873-CC Double Eagle, Orange-Gold XF45 Low Mintage, Original Surfaces

4359 1873-CC XF45 NGC. Variety 1-A. Unlike later Carson City double eagles, the 1873-CC circulated heavily in the Nevada Territory and throughout the old West. This Choice XF example shows ample wear from its time in circulation, and picked up a few small marks as well, including a short scrape near Liberty's neck. Other abrasions are few and far between. Attractive orange-gold color remains — an ideal coin for a circulated set. NGC ID# 26AJ, PCGS# 8968

1873-CC Double Eagle, AU55 Attractive Surfaces and Color

4360 1873-CC AU55 PCGS. Variety 1-A. Just 22,410 pieces were struck, and while the occasional 1873-CC still surfaces in foreign holdings, it is unlikely any large number of 1873-CC twenties exists beyond those coins already returned to the U.S. during the 1990s. There are no "readily available" Type Two Carson City twenties from the early 1870s — especially in Choice About Uncirculated or finer conditions. Later CC-Mint twenties (1875-CC and later) are somewhat more available.

This is a pleasing AU55 example with mint luster remaining beneath frosted, wheat-gold surfaces. Abrasions are light-to-microscopic in nature, visible with a loupe but largely unseen in-hand. We note a pair of minor marks near star 4 and some light cheek chatter. Stars 1 to 3 show rounding, but the remaining stars are sharply impressed and the hair definition displays only faint wear. Eye appeal is strong. Population: 35 in 55 (1 in 55+), 75 finer (1/18). NGC ID# 26AJ, PCGS# 8968

1874-CC Double Eagle, AU50 Smooth Surfaces

4361 1874-CC AU50 NGC. Variety 2-A. A small die chip behind Liberty's eye confirms the die variety, as date placement on 1874-CC obverses is fairly similar in some instances. The 1874-CC double eagle is an available date among Carson City issues, and this About Uncirculated example is especially pleasing. Original strawgold surfaces are remarkably smooth, and hints of luster remain in the protected recesses. Light wear on the portrait is not out of line for the grade. NGC ID# 26AP, PCGS# 8971

1874-CC Double Eagle, Original AU50 Above-Average Preservation

4362 1874-CC AU50 PCGS. CAC. Variety 3-A. After low-mintage years in 1870 through 1873 for double eagles, the Carson City Mint hit its stride in 1874 with production that nearly doubled the previous four years combined. The lack of high-grade examples suggests most of the coins were used in domestic circulation. This originally patinated example is high-end for the assigned grade. The sharply struck brassy-gold surfaces retain traces of reflectivity in the fields and display charcoal-gray accents on the raised devices. Housed in a previous generation green label holder with CAC endorsement. NGC ID# 26AP, PCGS# 8971

1874-CC Liberty Head Twenty, AU58 Appealing Carson City Issue, CAC-Endorsed

4363 1874-CC AU58 PCGS. CAC. Variety 1-A. Demand remains strong for Type Two Carson City double eagles in near-Mint condition, particularly among PCGS-graded examples with CAC endorsement. This greenish-gold twenty is sure to draw plenty of attention for both its originality and minimally abraded surfaces. Mint luster remains strong throughout both sides of the coin. In contrast to many CC double eagles, the 1874-CC circulated extensively in the West. The average survivor grades VF to XF. About Uncirculated examples are somewhat available, but fully Mint State pieces are very scarce and usually in heavily bagmarked MS60 condition. AU58 coins may show a bit of wear, but they often have surfaces preferable to examples technically finer on the grading scale. Such is the case here. Population: 83 in 58 (2 in 58+), 24 finer. CAC: 16 in 58, 3 finer (12/17). NGC ID# 26AP, PCGS# 8971

1875-CC Double Eagle, AU55 Vibrant Medium-Gold Color

4364 1875-CC AU55 NGC. Variety 4-A. Despite a healthy population of About Uncirculated and finer coins, the 1875-CC remains in strong demand among Carson City specialists. This Choice AU example is ideal for a high-end circulated set of CC double eagles. The sharp strike and most of the mint luster remains in place. Marks are remarkably absent over much of the coin, with just a few pinprick ticks and light abrasions visible on the obverse. The reverse is partially prooflike. NGC ID# 26AT, PCGS# 8974

1876 Liberty Double Eagle, MS61 Rare Prooflike Example

4365 1876 MS61 Prooflike NGC. CAC. Light Motto. Prooflike coins represent merely 1.4% of the 2,720 1876 double eagle submissions at NGC, attesting to their utmost rarity in any grade. This profoundly reflective and boldly contrasted Mint State example showcases deep yellow-gold color and a strong strike, though the stars are a bit soft. Myriad field marks are typical. Two linear depressions in the left obverse field act as pedigree identifiers. Census: 14 in 61 Prooflike, 3 finer (1/18). NGC ID# 26AV, PCGS# 78976

1876-CC Twenty Dollar, AU53 Rare Wide CC Mintmark

4366 1876-CC AU53 PCGS. Variety 3-D. The only die variety with a Wide CC mintmark, which Breen called "rare" and which only appears at auction from time to time. From a mintage of 138,441 double eagles, the 1876-CC should not pose too much trouble in XF through mid-AU condition, although pricing reflects the always-strong demand for Nevada mint products. An abrasion right of star 3 and some old reed marks below Liberty's chin are the only overt blemishes on this well-detailed, medium yellow-gold twenty. The recesses retain partial mint luster. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU53 Partially Reflective Fields

4367 1876-CC AU53 PCGS. Variety 5-B. Only one 1876-CC variety uses this reverse, which shows the mintmark centered over the space between the NT in TWENTY. The coin offered here exhibits prooflike reflectivity in the protected portions of the fields, with light chatter elsewhere. The yellow-gold coloration is appealing, and the design elements show bold definition. NGC ID# 26AW, PCGS# 8977

1876-CC Liberty Twenty, AU53 Final Type Two Carson City Issue

4368 1876-CC AU53 NGC. Variety 6-A. A scarce die marriage, with a diagnostic, downward spike in the dentils beneath the N and T of TWENTY. Gleaming honey-gold surfaces show only light abrasions and attractive, satiny mint luster that survived seven points of wear. A smooth and well-defined twenty for the AU53 assignment, with plentiful eye appeal and fewer marks than expected for the grade. NGC ID# 26AW, PCGS# 8977

1876-CC Liberty Double Eagle, AU55 Popular Branch Mint Type Issue

4369 1876-CC AU55 PCGS. Variety 6-A. Doug Winter listed two die varieties of 1876-CC double eagles in his popular series reference, but he notes, "I feel certain that others exist." This coin represents one of those undocumented die varieties, Variety 6-A, recently discovered by Heritage numismatist Brian Koller. The 1 in the date is high and the right side of the second C in the mintmark is in line with the left side of T in CENTS. This attractive Choice AU specimen shows only a touch of wear on the well-detailed design elements and the pleasing orange-gold surfaces retain much of their original mint luster. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, AU58 Lustrous and Appealing

4370 1876-CC AU58 NGC. Variety 6-A. Much luster remains in the fields of this near-Mint 1876-CC double eagle, and the surfaces are remarkably free of most noticeable abrasions — a reed mark on the lower part of Liberty's neck is an exception. There is some softness in the elevated portrait details, as is seen on many Carson City double eagles of this period. An eye-appealing and lustrous yellow-gold Carson City type coin. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, MS61 Variety 5-A, Type Two Reverse

4371 1876-CC MS61 PCGS. Variety 5-A. The collector who seeks a challenge might consider a die variety collection of Carson City double eagles from the nation's centennial year. We have notes on 10 different varieties that were coined from combinations of seven different obverse dies and four distinct reverse dies. Date positions, mintmark positions, and die cracks are the primary attribution features. This example has a die crack from the border to the bust left of the date, and a meandering die crack through the denomination and much of the statutory legend. This lovely example has dark patina on the obverse high points with minimal marks, brilliant lemon-yellow luster, and excellent eye appeal. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, MS61 Frosty Original Surfaces

4372 1876-CC MS61 NGC. Variety 2-C. Carson City double eagles are not heavily collected for their rarity, although some issues are rare or conditionally so, but rather for the challenge of completing the entire date set or for the allure of the CC mintmark on the United States' largest circulating denomination. For date set purposes, this 1876-CC offers a chance to add an affordable Mint State coin to the collection. But its luster and sharpness are also prime considerations for the collector seeking a single coin from this mint. The original surfaces yield frosty orange-gold and pale rose hues, with scattered abrasions on account of the grade. The availability of the 1876-CC double eagle declines somewhat in finer grades. NGC ID# 26AW, PCGS# 8977

1879-CC Liberty Twenty, AU53 Low-Mintage Carson City Issue

double eagle claims a small mintage of 10,708 pieces, the fourth lowest production total for any Carson City twenty. A small hoard of XF-AU examples surfaced in the early 1990s, making the 1879-CC more available than the low mintage would suggest in those grades, but Mint State examples are still rare. The coin offered here is an attractive AU53, with just a trace of wear on the hair above the eye and the coronet. The orange-gold surfaces are lightly abraded, aside from one thin, arcing scratch in the lower obverse field, near the neck. Both sides retain much of their original mint luster and eye appeal. This coin will be a welcome addition to fine collection of Carson City double eagles. NGC ID# 338L, PCGS# 8989

1879-CC Liberty Double Eagle, AU53 Low-Mintage CC-Mint Twenty

4374 1879-CC AU53 PCGS. Variety 1-A. A meager mintage of 10,708 Liberty double eagles was accomplished at the Carson City Mint in 1879, a small production total, even by Carson City standards. The coins were released into circulation, in both foreign and domestic trade, and few high-quality examples were saved by contemporary numismatists. Fortunately for collectors today, a hoard of XF-AU specimens was recovered in the mid-1990s, making the issue slightly more available than it was in previous years. The 1879-CC is still quite rare in Mint State grades, however.

The present coin is a lightly worn AU53 specimen that retains much interior detail in Liberty's hair and the star centers. The lightly abraded orange-gold surfaces are still lustrous, and show a few hazy traces of prooflike reflectivity at certain angles. The overall presentation is most attractive. Population: 28 in 53, 51 finer (1/18). NGC ID# 338L, PCGS# 8989

1882-CC Liberty Twenty, AU55 Upper-End for the Grade

4375 1882-CC AU55 NGC. CAC. Variety 1-B. The 1882-CC double eagle is relatively plentiful in the context of Carson City issues, although the quality of AU-level coins varies widely. Only a limited number of CAC green labels have been awarded to examples of this issue. The present coin displays sharp definition and luminous orange-gold surfaces with lustrous fields. Minor surface chatter is lighter than typical, producing good eye appeal. NGC ID# 26BF, PCGS# 8997

1882-CC Liberty Double Eagle, AU55 Sharply Struck Example

4376 1882-CC AU55 NGC. CAC. Variety 1-B. The 1882-CC Liberty double eagle claims a mintage of 39,140 pieces, placing it near the middle of the series in terms of absolute and high-grade rarity. This impressive Choice AU specimen exhibits just a touch of wear on the strongly impressed design elements and the lightly abraded orange-gold surfaces retain much of their original mint luster. NGC ID# 26BF, PCGS# 8997

1882-CC Double Eagle, AU58 Pleasing Luster and Color

4377 1882-CC AU58 PCGS. Variety 1-B. The mintmark slants everso-slightly upward. From a mintage of 39,140 pieces, the 1882-CC Liberty double eagle is a scarce issue at the AU58 grade level, and Mint State coins are exceedingly scarce. This impressive near-Mint representative shows just a trace of wear over strongly impressed design elements, and the lightly abraded orange-gold surfaces retain much original mint luster. NGC ID# 26BF, PCGS# 8997

1883-CC Double Eagle, AU53 Original Patina

4378 1883-CC AU53 NGC. Variety 2-A. This About Uncirculated Carson City double eagle has the typical look of a preferred, uncleaned example, showing frosty fields with moderate surface chatter and a subtle greenish-gold hue. Sharp detail remains in the devices. The 1883-CC double eagle is collectible in the AU grades but moderately scarce in Mint State. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty Dollar, Choice AU Luminous and Appealing

4379 1883-CC AU55 NGC. Variety 2-A. The original surfaces of this Choice AU 1883-CC double eagle have an appealing honey-gold hue with luster remaining in the fields. Sharp design elements exhibit only light high-point wear. Although mild chatter is present on Liberty's cheek and in the adjacent field, the surfaces are generally smoother than usual for a CC-mint twenty in this grade. Eye appeal is excellent. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty Dollar, AU55 Appealing Accents

4380 1883-CC AU55 NGC. Variety 1-B. Although attractive Uncirculated examples of the 1883-CC are quite scarce, pleasing About Uncirculated examples such as this Choice coin are eminently collectible. Smooth wear and the unavoidable field chatter from transport and handling have reduced the formerly prooflike fields on this coin to brief mirroring in the protected areas, yet the effect is quite pleasing. Orange accents add to the appeal. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, AU58 Lustrous Fields

4381 1883-CC AU58 PCGS. Variety 2-A. Frosty yellow-gold luster illuminates the fields, while olive tinting appears on the worn parts of the devices. Although light surface chatter is apparent throughout, this near-Mint 1883-CC double eagle is otherwise attractive with its blatantly original coloration. The 1883-CC is a plentiful issue among Carson City twenties, although coins grading finer than the present are moderately elusive. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, MS60 Luminous Original Surfaces

4382 1883-CC MS60 PCGS. Variety 2-A. Gold specialist Mike Fuljenz speaks very highly of Carson City double eagles as an investment and a collecting pursuit. In *Type Three Double Eagles*, second edition, he writes of the 1883-CC: "This is one of my favorite Carson City double eagles for the new collector who wants a great introduction to this fascinating series. ... due to the fact that it is generally well made with good luster and an above-average appearance." The above-average appearance is in comparison to 1870s CC-mint twenties, which often lack the luster and sharpness seen on the 1883-CC.

The current coin is a conditionally elusive Mint State example with original olive-gold patina that shows ample peach-gold luster in the fields and recesses. We find no mentionable points of strike weakness, and grade-limiting abrasions are at a minimum for the grade. NGC ID# 26BH, PCGS# 8999

1883-S Liberty Double Eagle, MS63 Conditionally Rare in Finer Grades

4383 1883-S MS63 NGC. The 1883-S Liberty double eagle is a scarce date in MS63 condition, and finer representatives are exceedingly rare. This Select example displays sharp design definition and frosty yellow-gold cartwheel luster. A few light, unobtrusive grazes determine the grade. Census: 88 in 63 (1 in 63+), 6 finer (1/18). NGC ID# 26BJ, PCGS# 9000

1884-CC Double Eagle, AU55 A Lustrous Carson City Type Coin

4384 1884-CC AU55 PCGS. Variety 1-A. The Carson City Mint struck 81,139 double eagles in 1884, all from a single die pair. This piece does not show any die lapping at the designer's initials or the eagle's tailfeathers. A hint of reflectivity is visible in the obverse fields when tilted beneath a light, but the coin has a generally satin look and bright yellow-gold coloration. A few noticeable abrasions are on Liberty's cheek, but the fields show only light chatter. NGC ID# 26BK, PCGS# 9001

1884-CC Twenty Dollar, AU55 Ideal for Type

4385 1884-CC AU55 NGC. Variety 1. Among Type Three Carson City issues in the Liberty double eagle series, the 1884-CC is among the most plentiful, ideal for type purposes. This Choice AU representative displays luminous yellow-gold surfaces with luster in the protected regions. Light high-point friction barely blends the fine upper details, and the surfaces are relatively smooth and appealing. NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, AU55 Some Luster Remains

4386 1884-CC AU55 NGC. Variety 1-A. Despite a mintage of 81,139 pieces, only one die variety is recorded for the 1884-CC double eagle. The obverse shows heavy crisscrossing die lines on Liberty's neck near the lower hair curls, and the reverse shows the mintmark slightly right of center between the Y and D in TWENTY DOLLARS. This partially lustrous Choice AU representative has good detail and relatively smooth surfaces. The straw-gold coloration is original. NGC ID# 26BK, PCGS# 9001

1884-CC Twenty Dollar Liberty, AU55 Nice Color and Luster

4387 1884-CC AU55 PCGS. Variety 1-A. The 1884-CC Liberty double eagle claims a mintage of 81,139 pieces, a fairly generous production total in the context of the series. Accordingly, the 1884-CC is a reasonably available issue today and a popular choice for branch mint type collectors. This attractive Choice AU specimen displays lightly abraded orange-gold surfaces that retain much of their original mint luster. Just a touch of wear is evident on the strongly impressed design elements and eye appeal is quite strong. NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, AU58 Near-Mint State Carson City Type

4388 1884-CC AU58 PCGS. CAC. Variety 1-A. CAC endorsement goes a long way to separate this still-lustrous, naturally patinated CC-Mint double eagle from others of its date and grade level. In general, the 1884-CC is a heavily bagmarked issue — in part, because many of the coins traveled abroad to reside in European holdings. Most returned in the 1990s into U.S. collectors' hands. This radiant example retains most of its frosted luster and sharp strike. Any trace of wear is hard to discern. NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, MS61 Variety 1-A, The Only Dies

4389 1884-CC MS61 PCGS. Variety 1-A. The only known die pair for the 1884-CC double eagles, exhibiting a diagnostic intersection of die lines on the lower neck. A large portion of the 81,139-coin mintage was exported overseas for foreign trade payments, and those coins are slowly making their way back to the U.S. for present-day collectors. The dusky high point patina is frequently encountered on these repatriated gold coins. This example is a lovely Mint State piece with brilliant yellow-gold surfaces and hints of rose overtones. This lovely and important example is far finer than the average certified grade that is just AU53. NGC ID# 26BK, PCGS# 9001

1884-CC Variety 1-A Twenty, MS62 Popular Carson City Selection for Type

4390 1884-CC MS62 NGC. If not for coins found in foreign hoards, the 1884-CC would be considerably more challenging in finer grades than it is today. Still, years of counting and overseas handling limits the condition of many repatriated coins. Most of the coins are technically Uncirculated or nearly so, yet they reside at the lower end of the Mint State spectrum.

The exact origin of this MS62 example is unknown, but it is relatively free of bagmarks, sharply struck, with pleasing richgold color and hints of olive patina. Mike Fuljenz suggests that the 1884-CC is one of the best-produced double eagles from the Carson City Mint. This example supports that theory, with strong eye appeal and thick frosted luster. It is an optimal collector grade, since finer examples are very rare. Census: 53 in 62, 6 finer (1/18). NGC ID# 26BK, PCGS# 9001

1885-CC Liberty Head Twenty, XF45 Scarce Nevada Mint Offering

4391 1885-CC XF45 NGC. Variety 1-A. The 1885-CC is perhaps less challenging than its small mintage (9,450 pieces) indicates, yet Choice examples in all grades are always in demand. This Choice XF coin retains traces of luster around the stars and central motifs. Smooth wear moderates tiny marks throughout both sides. For an issue that is notoriously bagmarked, the present example offers respite and the eye appeal is considerable. NGC ID# 26BN, PCGS# 9004

1885-CC Liberty Double Eagle, AU55 Elusive, Low-Mintage Issue

4392 1885-CC AU55 PCGS. CAC. Variety 1-A. A meager mintage of 9,450 Liberty double eagles was accomplished at the Carson City Mint in 1885 and few examples were saved by contemporary collectors. Most examples seen are heavily marked, with lackluster surfaces. As might be expected, the 1885-CC is the most elusive Carson City double eagle of the decade, in terms of overall and high-grade rarity.

The coin offered here is an attractive Choice AU specimen that shows just a trace of wear on the well-detailed design elements. The pleasing orange-gold surfaces are free from large or distracting abrasions and both sides retain much original mint luster. The overall presentation is most attractive. Housed in a green label holder. Population: 34 in 55, 58 finer. CAC: 9 in 55, 7 finer (12/17). NGC ID# 26BN, PCGS# 9004

1889-CC Double Eagle, AU50 Profound Reddish-Gold Color

4393 1889-CC AU50 PCGS. Variety 1-A. The Carson City Mint's return to production in 1889 delivered one of its most famous issues in the 1889-CC Morgan dollar. Double eagles from that year are actually much scarcer. This is a profoundly reddish-gold representative, well-detailed with expected merging, and showing surprisingly few significant abrasions. Attractive for the grade. NGC ID# 26BV, PCGS# 9011

1889-CC Double Eagle, AU53 Popular Type Selection

4394 1889-CC AU53 NGC. Variety 1-A. Apparently, the entire 1889-CC mintage of 30,945 pieces was struck from a single die marriage, although a second die pair is possible (but not confirmed). The Carson City Mint resumed coinage operations in 1889 after personnel and equipment problems were solved — the result of a three-year halt in coin production at the Nevada facility. This example displays light yellow-gold color with mint luster around the stars and throughout the reverse. Abrasions are less frequent than often seen on the issue, while the strike is reasonably strong. A small group of marks above the tip of the coronet offer little distraction. NGC ID# 26BV, PCGS# 9011

1889-CC Liberty Twenty, AU58 Strong Strike, Only A Few Light Marks

4395 1889-CC AU58 NGC. Variety 1-A. The 1889-CC is not always well-struck, although this near-Mint example displays a sharp strike from rim-to-rim on both the obverse and the reverse. Still-lustrous yellow-gold surfaces feature peach-gold accents in the centers and remarkably few marks for the issue. NGC reports just 65 numerically finer examples (1/18). NGC ID# 26BV, PCGS#

1889-CC Liberty Twenty, AU58 Excellent Western Gold Type Coin

4396 1889-CC AU58 PCGS. Variety 1-A. The 1889-CC Liberty double eagle claims a modest mintage of 30,945 pieces, but the issue is more available than its small production total would suggest, thanks to a significant hoard that surfaced in the mid-1990s. This impressive near-Mint specimen shows the slightest touch of wear on the high points of the devices and the lightly abraded orange-gold surfaces retain much original mint luster. NGC ID# 26BV, PCGS# 9011

1889-CC Liberty Twenty, AU58 Popular Branch Mint Type Issue

4397 1889-CC AU58 PCGS. CAC. The Carson City Mint reopened for coinage operations in 1889, after a hiatus of several years. Despite a limited mintage of 30,945 pieces, the 1889-CC is one of the more available Liberty double eagles from the Carson City facility, thanks to a hoard of survivors that was released in the 1990s. This impressive near-Mint example exhibits well-detailed design elements, with just a trace of high-point wear, and satiny mint luster throughout. The lightly abraded orange-gold surfaces add to the outstanding eye appeal. NGC ID# 26BV, PCGS# 9011

1889-CC Double Eagle, MS61 Bright and Lustrous

4398 1889-CC MS61 PCGS. Variety 1-A. The year 1889 saw the abolition of two gold denominations: the gold dollar and three dollar. At the same time these two series were winding down, output at the Carson City Mint was starting back up. The facility had been out of commission for four years dating back to 1885. Upon its reopening, the Nevada branch mint managed to produce small quantities of silver dollars and double eagles. Only 30,945 1889-CC twenty dollar gold pieces were manufactured. High-grade examples, especially those in Mint State, are in ever-strong demand on today's market.

This luminous yellow-gold double eagle exhibits almost complete design detail. An exception would be star 8, which lacks full radials. Small abrasions are unsurprising. A copper alloy spot occurs above the hair bun. NGC ID# 26BV, PCGS# 9011

1890-CC Liberty Double Eagle, XF45 Popular Branch Mint Type Coin

4399 1890-CC XF45 NGC. Variety 1-A. From a substantial mintage of 91,209 pieces, the 1890-CC Liberty double eagles is an available date in the context of the series and a popular choice of branch mint type collectors. This attractive Choice XF specimen shows some light wear on the coronet and Liberty's hair, but most interior design detail is still intact. The pleasing yellow and orange-gold surfaces show only minor abrasions, with traces of original mint luster. This is the early die state, with the tail feathers still intact. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU53 Lustrous Original Surfaces

4400 1890-CC AU53 PCGS. Variety 1-A. The reverse is heavily lapped on this piece, showing much of the eagle's tailfeathers effaced. The obverse is better-defined, and both sides show only light high-point wear. Original orange-gold surfaces have frosty luster in the fields and light chatter overall. The 1890-CC is a plentiful Carson City issue in About Uncirculated condition, but Mint State coins are moderately elusive. NGC ID# 26BY, PCGS#

1890-CC Double Eagle, AU55 Well-Defined CC Type Coin

4401 1890-CC AU55 PCGS. Variety 1-A. The usual lapped die state with the rightmost tailfeathers largely missing. The surfaces of this well-defined Choice AU Carson City double eagle maintain partial frosty luster and appealing orange-gold coloration. The reverse displays a considerable amount of struck-in grease. Most collectors should have little trouble locating an appealing example of the 1890-CC. This is certainly a terrific coin to represent the issue or type. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU55 Satiny and Lustrous

4402 **1890-CC AU55 NGC. Variety 1-A.** The reverse is lapped at the eagle's tailfeathers on this late die state coin. Satiny luster remains in the fields, and each side has original straw-gold coloration. Light olive color appears over the worn parts of the devices. The 1890-CC is a fairly plentiful date among Carson City double eagles, suitable for type purposes. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Double Eagle, AU55 Briefly Circulated, Minimal Marks

4403 1890-CC AU55 NGC. Variety 1. The supply of About Uncirculated and finer 1890-CC double eagles is in decline as fewer coins return from foreign holdings. Choice examples such as the present AU55 piece usually offer nice eye appeal and minimally marked, sharply struck surfaces. Orange accents around the raised elements add visual allure to the present coin. Only a few tiny ticks interrupt the satin-smooth fields. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Twenty, AU55 CAC Green Label, Minimal Abrasions

4404 1890-CC AU55 NGC. CAC. Variety 1-A. Lustrous, light orange-gold color remains across both sides of this Choice About Uncirculated Carson-City twenty. Abrasions are far less prevalent than normal for the issue, with only a few light nicks visible on Liberty's portrait and in the surrounding fields. The sharp strike retains nearly all of its original definition despite a later die stage. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Twenty Dollar, Choice AU Original Collector-Grade Example

4405 1890-CC AU55 PCGS. CAC. Variety 2-B. The 1890-CC may be the most collectible double eagle from this facility, but Choice AU examples with original surfaces can be difficult to track down. This piece has well-defined hair strands and feathers. Lovely olivegold coloration dominates each side, adding considerable visual appeal. A wonderful collector-grade CC twenty. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU58 Exceptionally Lustrous and Appealing

4406 1890-CC AU58 PCGS. Variety 1-A. An intermediate die state, showing the right-side tailfeathers weakened by die lapping but not the left. This near-Mint 1890-CC double eagle has enough luster and sharpness to be Uncirculated, although a brush of friction on Liberty's cheek prevents such a designation from PCGS. A vibrant yellow-gold cartwheel effect appears in the fields, and the only singular abrasion appears above the NT in TWENTY. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU58 Semireflective Straw-Gold Example

4407 1890-CC AU58 PCGS. Variety 1-A. This is the late die state with lapping on the right-side tailfeathers. Semireflective strawgold surfaces display partial mint luster and a scattering of small abrasions. A needle-sharp impression adds to the allure of this near-Mint Carson City double eagle, one of 91,209 twenty dollar gold coins struck at the Nevada facility in 1890. Good for type. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU58 Attractive and Lustrous

4408 1890-CC AU58 PCGS. Variety 1-A. The mintmark is well-centered between the Y and D on this variety. The near-Mint coin offered here is in the usual late die state, showing weakness on the eagle's tailfeathers due to die lapping. Vibrant luster remains in the fields, and the sharp design elements exhibit only slight high-point friction. No major abrasions are observed. The availability of this Carson City issue declines significantly in Mint State grades. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Twenty, AU58 Late Die State

4409 1890-CC AU58 NGC. Variety 1-A. Luster brightens all but the cheek and open fields of this lime-green and wheat-gold Carson City example. Marks are minor for the grade except for a slender abrasion beneath STATES. This piece is from the late die state with lapped right-side tail feathers. Minor die doubling can be seen on TWENTY and PLURIBUS.

Ex: New York Signature (Heritage, 3/2012), lot 4303. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, MS62 Extremely Rare Any Finer

4410 1890-CC MS62 NGC. Variety 1-A. The mintmark is centered between TWENTY and DOLLARS, one of two varieties identified for the 1890-CC twenties. The other die marriage shows the mintmark further right, with the second C above the upright of D in DOLLARS. Most examples of this popular Carson City double eagle are sharply struck (as is the case here), yet show numerous bagmarks. The issue becomes scarce in MS62 and is an important rarity any finer.

The present MS62 example is less abraded than most, with a scattering of tiny marks but no heavy or distracting contact. Frosted mint luster glows beneath attractive medium orange-gold color. Struck from lapped dies, with traces of prooflikeness around the portrait, and most of the tailfeathers polished away at the viewer's right. Census: 59 in 62 (1 in 62+, 3 in 62★), 1 finer (1/18). NGC ID# 26BY, PCGS# 9014

1891-CC Liberty Double Eagle, XF45 Low-Mintage Type Three Issue

4411 1891-CC XF45 NGC. Variety 1-A. The 1891-CC Liberty double eagle claims the second-lowest mintage of the Carson City Mint series, at a meager 5,000 pieces. There was little numismatic interest in double eagles in general, or branch mint issues in particular, in 1891. Accordingly, few examples were saved by contemporary numismatists and the 1891-CC is an elusive issue in high grade today.

The coin offered here is an attractive Choice XF that shows light wear on the prongs of the coronet and Liberty's hair. The pleasing orange-gold surfaces are lightly abraded and retain a few traces of original mint luster, especially on the reverse. This coin should find a home in a fine collection of Liberty double eagles. NGC ID# 26C3, PCGS# 9017

1891-S Double Eagle, MS64 Only One Numerically Finer at PCGS

4412 1891-S MS64 PCGS. Doubled Die Reverse. While earlier San Francisco double eagles have seen their populations radically changed by recoveries from the Saddle Ridge Hoard, just four 1891-S twenties emerged from that historic find. Almost certainly, this Choice Uncirculated example was not among them, since it displays vibrant orange-gold toning with lilac accents that signify time-tested, original color. The strike is sharp and abrasions are few. The 1891-S is somewhat available in MS64 condition but very rare any finer, making the near-Gem level a sweet spot for astute collectors. Population: 119 in 64 (4 in 64+), 1 finer (12/17). NGC ID# 26C4, PCGS# 9018

1892-CC Double Eagle, AU53 Variety 1-A, The Only Dies

4413 1892-CC AU53 PCGS. Variety 1-A. The only known die pair for 1892-CC double eagles. Housed in a green label PCGS holder, this 1892-CC twenty has frosty yellow luster and bold design features. Splashes of light orange toning and dark copper spots are evident on the obverse. The reverse, graded separately, is substantially finer, approaching full Mint State. NGC ID# 26C6, PCGS# 9020

1892-CC Liberty Head Twenty, AU55 Outstanding Original Color

4414 1892-CC AU55 NGC. Variety 1-A. This is an early die state coin, showing a faint die line extending into the field from the ball of the 2 in the date. This die line fades in later die states. The 1892-CC double eagle was struck to the extent of only 27,265 pieces, and high-grade examples carry a modest premium over more plentiful CC-mint issues even in the AU grade range. This Choice About Uncirculated coin is smooth and satiny with original wheat-gold coloration and lustrous fields. NGC ID# 26C6, PCGS# 9020

1893-CC Liberty Twenty, AU58 Smooth, Lustrous Surfaces

1893-CC AU58 PCGS. Variety 2-A. This sharp, satiny near-Mint example displays mostly lustrous yellow-gold surfaces and outstanding eye appeal for the grade. There is a shallow reed mark in the field near Liberty's eye, but no other singular abrasions are discernible. As the final double eagle from the Carson City Mint, the 1893-CC is sought-after in all grades. Many of the high-end pieces known were repatriated from foreign holdings in the late 1960s, according to David Akers. NGC ID# 26C9, PCGS# 9023

1893-CC Double Eagle, MS61 Lustrous Final-Year Carson City Coin

4416 1893-CC MS61 PCGS. Variety 2-A. The 1893-CC double eagle has been fairly plentiful in Mint State for decades, although this only serves to heighten demand among Carson City gold collectors as attractive examples of the issue are viewed as obtainable, albeit for a price. According to David Akers (1982), most Uncirculated pieces known came from European holdings in the late 1960s through repatriation. Were it not for this phenomenon, the 1893-CC would likely be a rare or at least conditionally rare date in the Carson City series, as only 18,402 coins were struck.

The present representative displays radiant honey-gold luster and satiny surfaces. The strike is sharp, and only light surface chatter limits the grade since no major abrasions are observed. No die lapping is visible at the eagle's tailfeathers or James B. Longacre's initials. NGC ID# 26C9, PCGS# 9023

1893-CC Liberty Double Eagle, MS61+ Final Carson City Twenty

4417 1893-CC MS61+ NGC. Variety 2-A. The Carson City Mint struck a small production total of 18,402 Liberty double eagles in 1893, its final year of coinage operations. The 1893-CC was a well-produced issue and interest in branch mint issues probably increased in 1893, due to Augustus Heaton's treatise, *Mintmarks*, which was published that year. In any case, the 1893-CC is not as difficult to locate in today's market as the small mintage would indicate, so perhaps a number of specimens were saved by contemporary collectors.

The present coin is a Plus-graded MS61 example, with well-detailed design elements and vibrant, cartwheel mint luster on both sides. The pleasing orange-gold surfaces show the expected number of minor contact marks for the grade and overall eye appeal is outstanding. NGC ID# 26C9, PCGS# 9023

1901-S Twenty Dollar, MS64+ Only Two Coins Finer at PCGS

4418 1901-S MS64+ PCGS. CAC. Most Uncirculated 1901-S double eagles grade no finer than MS63. This Choice example is conditionally scarce, and finer pieces are extremely rare. No finer coins have been awarded a CAC green label. Frosty yellow-gold luster complements sharp devices and minimally marked surfaces. A small abrasion near Liberty's forehead is the only imperfection of note. PCGS lists only two finer examples. CAC: 9 in 64, 0 finer (1/18). NGC ID# 26CT, PCGS# 9040

1903 Liberty Double Eagle, MS65+ Very Rare Any Finer

4419 1903 MS65+ PCGS. CAC. The Philadelphia Mint produced a fairly modest, but well-made mintage of 287,270 Liberty double eagles in 1903. This Plus-graded Gem exhibits sharply defined design elements and exceptionally well-preserved orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. PCGS has graded only four numerically finer examples (12/17). NGC ID# 26CW, PCGS# 9043

1904 Double Eagle, MS66 Remarkable Luster and Eye Appeal

4420 1904 MS66 PCGS. A common date, the 1904 Liberty double eagle is popular as a type coin but also as a ready gold investment among individuals who buy into the rare coin market. However, its availability declines in MS66, and PCGS has seen only two Superb Gems finer than this. The current coin displays a sharp strike and beautiful, shimmering mint frost in shades of yellow-gold, peach, and lilac. Under a loupe, the only grade-limiting imperfection is a faint graze in the field near Liberty's mouth, although this is hardly distracting. Housed in a green label holder. NGC ID# 26CY, PCGS# 9045

1905 Liberty Double Eagle, MS63 Sought-After, Low-Mintage Issue

4421 1905 MS63 PCGS. The Philadelphia and San Francisco Mints combined to strike a huge mintage of more than 11 million Liberty double eagles in 1904, enough to meet the needs of the economy for years to come. As a result, production was sharply reduced in 1905, and the Philadelphia facility struck only 58,919 double eagles that year. Few examples were saved by contemporary collectors, who generally overlooked circulation-strike Philadelphia coins in favor of proofs, and most of the coins seen in today's market have been repatriated from overseas sources. As might be expected, the 1905 Liberty double eagle is very scarce in MS63 condition, and finer examples are condition rarities.

The present coin is an impressive Select specimen, with well-detailed design elements and lustrous orange-gold surfaces that show only minor signs of contact, aside from a scrape in the lower-right obverse field. Overall eye appeal is outstanding for this elusive Type Three issue. Population: 59 in 63, 12 finer (12/17). NGC ID# 26D2, PCGS# 9047

1906-D Liberty Double Eagle, MS64+ First-Year Branch Mint Issue

1906-D MS64+ PCGS. The Denver Mint struck an adequate mintage of 620,250 Liberty double eagles in 1906, its first year of coinage operations. Despite the healthy production total, the 1906-D is a rare issue in grades above the MS64 level. This Plus-graded Choice example exhibits sharply detailed design elements and well-preserved peach-gold surfaces, with vibrant mint luster on both sides. PCGS has graded 15 numerically finer examples (12/17). NGC ID# 26D5, PCGS# 9050

PROOF LIBERTY DOUBLE EAGLE

1906 Liberty Head Twenty, PR55 Accessible Proof Offering

4423 1906 PR55 PCGS. Although the 1906 proof double eagle's mintage of 94 specimens is far from the highest in the series, this date is one of the most frequently encountered Liberty Head twenties in this format. PCGS CoinFacts suggests a survival estimate of 50 to 60 proofs, ranging in grades from PR55 to PR66 Cameo. This piece was either put into circulation for a brief period or perhaps carried as a pocket piece for a few days. There are peppered contact marks over each side and a trace of high-point rub is evident, but the proof status of this offering is unquestionable. The surfaces remain contrasted with broad, squared-off rims. NGC ID# 26EU, PCGS# 9122

HIGH RELIEF DOUBLE EAGLES

1907 High Relief Double Eagle, AU Details Wire Rim Variant

4424 1907 High Relief, Wire Rim — Mount Removed — NGC Details. AU. From a limited mintage of 12,367 pieces, the 1907 High Relief double eagle has been called America's most beautiful coin design. Like most examples of this issue, this piece shows a fin, or wire rim, around the edge of the coin, caused by metal extruded between the collar and the die during the striking process. Only light wear shows on the central design elements, which have the usual three-dimensional sculptural appearance and the orange-gold surfaces retain much original mint luster. Unfortunately, the edge shows evidence of a previous mounting. NGC ID# 26F2, PCGS#

1907 Wire Rim High Relief Twenty, AU53

4425 1907 High Relief, Wire Rim AU53 PCGS. Striking of the High Relief twenties began at the end of August 1907 after many months of delays and obstruction by Mint personnel, especially Chief Engraver Charles Barber. A design flaw was noticed early in the production run, called "finning," or as it has been termed for decades by numismatists a "wire rim." It wasn't until December that the finning was (mostly) corrected, leaving 80% or so of High Relief twenties with the so-called wire rim. Few collectors were actually able to go to a bank in 1907 and buy a High Relief as so few were distributed to each financial institution. As a result, a secondary market immediately sprang up where those who were able to secure a few pieces could charge \$25 to \$30 for an example. This, of course, meant that most High Reliefs were held by collectors and have been preserved in high grades over the past 100+ years. However, a few were carried as pocket pieces (such as this example) and a few were undoubtedly even spent due to their high face value. This piece shows only slight high-point friction, and the surfaces display the expected reddish patina seen on most examples. There are no obvious contact marks, but there is one surface curiosity, a die crack on the upper-right reverse, something we do not recall having seen previously on a High Relief. NGC ID# 26F2, PCGS# 9135

1907 High Relief Double Eagle, MS63 Wire Rim Variant

4426 1907 High Relief, Wire Rim MS63 NGC. After the death of Augustus Saint-Gaudens on August 3, 1907, there was little initiative to follow through on the production of the High Relief twenties. It might safely be said that if it were not for Theodore Roosevelt's dogged determination to see U.S. gold struck in high relief, much as ancient Greek coins were, the High Relief twenties would be a numismatic footnote and relegated to interesting patterns. But Roosevelt was determined and he did follow through. He managed to keep his legendary impatience in check for the most part. Three days after the sculptor's death Roosevelt suggested to Secretary of the Treasury George Courtelyou that he get in touch with Saint-Gaudens's assistant (Henry Hering):

"Why don't they get into touch with him again? I am sure there has been good-will upon the part of the mint authorities, but I cannot help feeling that there has been a certain cumbersomeness of mind and inability to do the speediest modern work, as shown by these delays."

And that was as diplomatic as Roosevelt could be, considering the concept for the High Relief began over dinner in December 1904. His communiqués became increasingly brusque as the month wore on, culminating in his alleged order to begin the new issue even if it took an entire day to strike one impression. Fortunately it did not come to that, and eventually 12,367 High Relief twenties were produced by the end of the year. This is a bright yellow-gold example that is sharply detailed on each side. A few small contact marks are scattered about, but the only one of note is located in the right obverse field. NGC ID# 26F2, PCGS# 9135

1907 High Relief Double Eagle, MS64 Fully Struck Wire Rim Example

4427 1907 High Relief, Wire Rim MS64 PCGS. More than once Augustus Saint-Gaudens was accused of overthinking artistic projects (it took him more than 10 years to complete the Sherman Monument). However, he definitely understood how to achieve the effect he was striving for, as seen by this quote by his son Homer:

"Simple lines running up and down he believed had much to do with the sense of tallness or beauty, while cut-up objects invariably looked short. Meeting lines should always come together with an acute angle which suggested movement rather than with a right angle which checked the idea of motion. The radiation of lines he also regarded as one of the necessities for success in sculpture."

Once one understands these underlying sculptural concepts it is almost inevitable the reader will have an "Ah-ha!" moment when reflecting on the design of the High Relief twenties. All these concepts are incorporated in these coin's design. This is an especially attractive and well-preserved example that fully displays the deeply incised folds of the drapery (at acute angles) and the radiation of lines from the sun in the background (on both sides). The surfaces are bright and satiny with only the most minute contact marks present. NGC ID# 26F2, PCGS# 9135

MCMVII High Relief Twenty, Wire Rim MS65 Extraordinarily Well-Preserved Surfaces

4428 1907 High Relief, Wire Rim MS65 NGC. CAC. The production of High Relief twenties was far from normal for Mint personnel, both in terms of die cutting and manufacture. Because of the depth of details in the dies as well as the curvature of each die, these pieces had to be struck on hydraulic presses intended for medals. Roger Burdette goes into detail about the difference in this method of production rather than the use of a coining press in the first volume of his trilogy *Renaissance of American Coinage*, 1905-1908:

"The mint had three hydraulic medal presses capable of producing up to three hundred tons of pressure per square inch. The presses were designed to "squeeze" the planchet between the dies rather than "strike" it with a very quick blow as on the automatic production coin presses. Typical tempered steel coinage dies of the era could withstand little more than one hundred fifty tons of pressure before they would collapse or crack. The coiner wanted to use the minimum pressure necessary to bring up the design since this would reduce wear on the dies and make them last longer."

This Gem example displays all the detail engraved in the dies. In addition to a complete strike throughout, the surfaces are impeccably preserved with no noticeable contact marks on either side. The mint luster is bright and satiny with just the slightest hint of reddish patina. An extraordinary example of this one-year gold type coin. NGC ID# 26F2, PCGS# 9135

1907 High Relief, Flat Rim Twenty, MS66 Satiny Surfaces and Nearly Perfect Preservation

4429 1907 High Relief, Flat Rim, MS66 PCGS. Ships have been important staples as devices on American coinage for years. Historic vessels such as the Santa Maria, the Mayflower, the Nieuw Nederland, the Half Moon, and the Kalmar Nyckel have appeared on classic and modern commemoratives alongside unnamed boats in the San Francisco Bay and a number of harbors. One of the most important ships in the history of American numismatics, however, does not appear on a coin. When the Desdemona arrived in New York in 1848, among the passengers fleeing the Great Irish Famine were Bernard and Mary Saint-Gaudens, along with their to-befamous infant son, Augustus.

Though he was hardly the first immigrant to reshape the nation's coinage (John Reich, the Barbers, and George T. Morgan come to mind), the reputation and talent that Augustus Saint-Gaudens mustered for his contributions to American money reverberate to this day. The story of Saint-Gaudens and Roosevelt is a story for the ages, with the will of the ambitious second-term President and the vision of the cancer-stricken artist fighting against the oppressive forces of Charles Barber and the rest of the Mint establishment.

The collaboration between the unlikely duo resulted in tangible mementoes: the coveted and iconic High Relief double eagles. This spectacular Premium Gem shows almost no trace of a wire rim. The luminous butter-yellow and antique-gold surfaces are wonderfully well-preserved, and the profoundly sculptural, fully struck devices are equally exquisite. A marvelous exemplar that would make an attractive addition to any collection.

Ex: Madison Collection / FUN Signature (Heritage, 1/2008), lot 3356; FUN Signature (Heritage, 1/2014), lot 5585, where it realized \$70,500. NGC ID# 26F2, PCGS# 9136

SAINT-GAUDENS DOUBLE EAGLES

1908 No Motto Double Eagle, MS67 Ex: Wells Fargo Hoard

4430 1908 No Motto, Wells Fargo Nevada, MS67 NGC. Ex: Wells Fargo Nevada Gold. From one of the most famous hoards of high-quality Saint-Gaudens double eagles, this Superb Gem twenty would make a perfect No Motto type coin. Glistening, near-flawless surfaces showcase coruscating luster and delicate orange and wheat-gold color. The Capitol columns are strong, as are the torch fingers. One mark occurs left of the branch stem. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

1908-D With Motto Double Eagle, MS65 CAC Green Label, Old Green Holder

4431 1908-D Motto MS65 PCGS. CAC. Long Rays Obverse, which is only seen on the With Motto coins of this date and mint. The 1908-D Saint-Gaudens twenty comes from a healthy mintage of 349,500 coins, although it is mainly available only in grades below MS65. This Gem is one of only 18 coins for the grade endorsed by CAC. Examples certified in finer grades, with or without a CAC green label, are rare. Sharp design elements and satiny rose-gold luster show no major abrasions, and eye appeal is outstanding. Housed in an old green label holder. PCGS lists 37 higher-grade representatives. CAC: 18 in 65, 7 finer (1/18). NGC ID# 26F9, PCGS# 9148

1910-D Twenty Dollar, MS66 Few Finer Pieces Known

4432 1910-D MS66 PCGS. In MS65 and lower grades there is not much particularly exciting about the 1910-D Saint, although it becomes conditionally scarce in MS66 and is a major rarity finer. Surprisingly, most coins in this lofty grade are certified by PCGS, as is the present coin. Frosted prairie-gold luster envelops unabraded fields and highlights the well-struck design elements. Under a loupe, only a few unobtrusive contact marks appear on the high points of the devices. PCGS and NGC each list two finer submissions (1/18). NGC ID# 26FG, PCGS# 9155

1910-D Saint-Gaudens Twenty, MS66+ Very Rare Any Finer

4433 1910-D MS66+ PCGS. CAC. The United States Mint tried to modernize its equipment in 1910, installing automated weighing machines and shaker-hoppers, while laying off adjusters and other staff. As might have been expected, problems arose with the new machinery, which had not been extensively tested before installation. As a result, volume of gold coinage was less than expected. Production of double eagles was delayed until September at the Denver Mint, and a relatively modest mintage of 429,000 Saint-Gaudens twenties was accomplished by the end of the year. The 1910-D has a relatively high survival rate and specimens are generally available in grades up to the Gem level, but examples in MS66 are scarce, and finer coins are extremely rare.

This Plus-graded Premium Gem exhibits razor-sharp definition on all design elements and the well-preserved orange-gold surfaces show no mentionable flaws. Vibrant mint luster adds to the exceptional eye appeal. PCGS has graded only two finer examples (1/18). NGC ID# 26FG, PCGS# 9155

1911-D Saint-Gaudens Twenty, MS66+ Seldom Encountered Any Finer

4434 1911-D MS66+ PCGS. From a substantial mintage of 846,500 pieces, the 1911-D Saint-Gaudens double eagle is a rare issue in grades above the MS66 level. This Plus-graded Premium Gem exhibits razor-sharp definition on all design elements and the virtually flawless orange-gold surfaces are lustrous and appealing. PCGS has graded eight numerically finer examples (1/18). NGC ID# 26FK, PCGS# 9158

1913 Saint-Gaudens Twenty, MS64+ Condition Rarity in Finer Grades

4435 1913 MS64+ PCGS. CAC. From a nominal business-strike mintage of 168,780 pieces, the 1913 Saint-Gaudens double eagle is not too difficult to locate in lower Mint State grades, but it is a well-known condition rarity above the MS64 level. This Plusgraded Choice example offers a good balance of quality and value for the series enthusiast.

This high-end Choice specimen exhibits sharply detailed design elements and well-preserved yellow and rose gold surfaces, with just a few scattered minor contact marks on both sides. Vibrant, frosty mint luster adds to the considerable eye appeal. PCGS has graded 15 numerically finer examples (1/18). NGC ID# 26FN, PCGS# 9161

1913 Saint-Gaudens Twenty, MS64+ Better Philadelphia Issue

4436 1913 MS64+ PCGS. CAC. The 1913 Saint-Gaudens double eagle is a better date in the Philadelphia series, from a smallish mintage of 168,780 pieces. This Plus-graded Choice specimen exhibits sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster on both sides. PCGS has graded 15 numerically finer examples (1/18). NGC ID# 26FN, PCGS# 9161

1913-D Saint-Gaudens Twenty, MS65+ Rare in Finer Condition

4437 1913-D MS65+ PCGS. The 1913-D Saint-Gaudens double eagle is usually available through MS65, but Plus-graded coins are scarce at this level and PCGS has seen only seven finer submissions (1/18). This coin displays vibrant, satiny honey-gold luster and clean fields. The strike is sharp, with only a few small abrasions visible on the high points of Liberty's figure. NGC ID# 26FP, PCGS# 9162

1920 Double Eagle, MS64+ Among the Finest Endorsed by CAC

4438 1920 MS64+ PCGS. CAC. The 1920 Saint-Gaudens double eagle is one of the great condition rarities of the series. It is available in MS64, but PCGS has seen only two Gems finer (1/18). This Plusgraded, CAC-approved Choice example will appeal to a range of collectors. Frosty yellow-gold surfaces are free of major abrasions and yield well-struck design elements. Eye appeal is outstanding. CAC: 79 in 64, 0 finer (1/18). NGC ID# 26FY, PCGS# 9170

1922 Double Eagle, MS65+ Few Finer Representatives Known

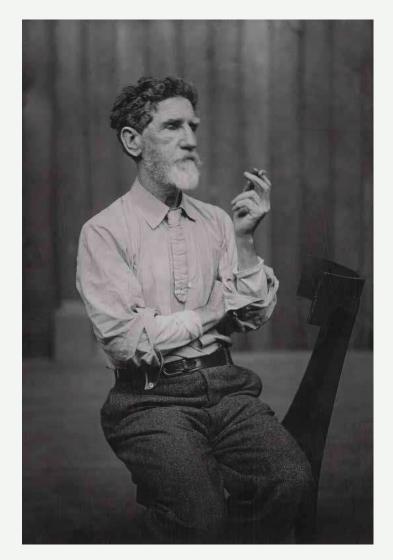

4439 1922 MS65+ PCGS. A high-end Gem, showing frosty yellow-gold mint luster and sharp motifs. A few unobtrusive marks on the high points of Liberty's figure define the grade. The 1922 Saint-Gaudens double eagle is an available date through MS65, but PCGS has seen only eight MS66 pieces finer (1/18). We have not seen a finer PCGS-graded coin since 2012. NGC ID# 26G3, PCGS# 9173

1923 Double Eagle, MS65+ Only Four Coins Known Finer

4440 1923 MS65+ PCGS. This often available Saint-Gaudens double eagle issue is prohibitively rare above the Gem grade level. Here offered is a Plus-graded Gem, a coin of about as much quality as most collectors will ever be able to acquire. Frosty mint luster displays warm rose-gold and orange coloration. Liberty's nose and the top of the torch are slightly weak, but the strike is otherwise pleasing, and no distracting abrasions are present. PCGS lists four finer pieces, NGC none (1/18). NGC ID# 26G5, PCGS# 9175

1931 Saint-Gaudens Twenty Dollar, MS64 Second-Scarcest of the Late-Date Rarities

4441 1931 MS64 NGC. The 1931 Saint-Gaudens double eagle is a formidable rarity in the series, prized by numismatists for the beauty of its design and its mysterious, elusive nature. David Akers considered it the sixth-rarest date of the 53-coin series, and the second most elusive of the famous "late date" Saints; second only to the famous 1930-S.

Among 20th century U.S. gold coins, no group is more celebrated than the later collectible dates in the Saint-Gaudens double eagle series, from 1929-1932. These coins have mystified collectors since the late 1930s, when they were first seriously collected. Mint records indicate the issues were produced in ample numbers, but any supply in numismatic hands has always been minuscule. Of course, the explanation of this paradox is the great majority of these coins were never released from storage in Treasury vaults and Federal Reserve Banks. They were produced and held as backing for currency at a time when the United States was still on the gold standard. When Franklin Roosevelt took the country off the gold standard and called in domestic holdings of gold via executive order in 1933, almost the entire production of these dates was quickly removed from the storage facilities. The coins were later melted into gold ingots and stored in the Fort Knox Bullion Repository.

In the case of the 1931 double eagle, a reported mintage of 2.9 million pieces was achieved at the Philadelphia Mint, but very few examples were released before the Gold Recall took effect. Mint records studied by Dr. Charles W. Green in the 1940s reveal only 45 coins were actually released through official channels. Roger Burdette's research enumerates 22 pieces distributed to known recipients, plus up to 50 more distributed anonymously from the Treasury Cash Room in Washington, D.C. Others were paid out for gold deposits at the Mint. Possibly, more pieces were saved from melting by Treasury officials and Mint personnel who exchanged older, more common double eagles for the rare 1931 coins, and sold them at a profit to Philadelphia and New York area coin dealers.

David Akers estimated the surviving population of Mint State 1931s at 65-85 pieces. More recent research by Roger Burdette pegs the survival number at 110 pieces. The 1931 is almost always seen in Mint State. Historically — and now — the issue is always a featured attraction in its infrequent auction appearances, and record prices often attend these offerings. When a magnificent Superb Gem specimen was offered as lot 6710 of the Phillip H. Morse Collection (Heritage, 11/2005), it realized \$254,500, a record price at the time. The same coin was offered as lot 3650 of the ANA Signature Auction (Heritage, 8/2010), where it eclipsed the old record, setting a new one at \$322,000. Coins such as the present Choice Uncirculated example regularly realize prices approaching six figures.

This bright, satiny near-Gem displays even yellow-gold color over each side. The strike is strong throughout with a few tiny marks visible with a magnifier. Census: 16 in 64 (1 in 64+), 12 finer (12/17). Ex: The Christopher Bently Nob Hill Collection/ANA Signature (Heritage, 8/2014), lot 5767. NGC ID# 332W, PCGS# 9192

COMMEMORATIVE SILVER

1935 Boone Half Dollar, MS68+ Registry Set Essential

4442 1935 Boone MS68+ NGC. CAC. The 1935 Boone commemorative half dollar claims a small distribution of 10,000 pieces and the present coin offers incredible technical quality and eye appeal. This magnificent Plus-graded MS68 specimen exhibits unusually sharp design elements and impeccably preserved, lustrous surfaces, under delicate shades of greenish-gold and lavender patina. Census: 4 in 68 (1 in 68+, 1 in 68★), 0 finer. CAC: 1 in 68, 0 finer (1/18). NGC ID# BYFR, PCGS# 9258

1938 New Rochelle Half, MS68 Magnificent Two-Sided Toning

4443 1938 New Rochelle MS68 PCGS. The New Rochelle half dollar was produced with the intent of commemorating the 250th anniversary of the founding of New Rochelle, New York, which was settled in 1688 by French Huguenots. The coins were appropriately dated 1938 to correspond with the anniversary, but were actually struck the year before in 1937. Congress authorized the coinage of 25,000 pieces, all of which were struck, plus 15 additional coins for assay purposes. Yet, only 15,266 examples (including assay coins) were distributed, with the remainder melted.

This radiant example displays intense, unabraded luster and sharp design definition. The peripheries show vivid crimson and amber toning, while the interiors show light pastel shades of lavender, blue, and champagne. The eye appeal is exceptional. Population: 6 in 68 (1 in 68+), 0 finer (1/18). NGC ID# BYDX, PCGS# 9335

COMMEMORATIVE GOLD

1904 Lewis and Clark Gold Dollar, MS66 Seldom Offered Finer

1904 Lewis and Clark Gold Dollar MS66 PCGS. The central portraits on this Lewis and Clark gold dollar are sharp, although portions of the border dentils exhibit weakness. This semiprooflike Premium Gem displays vibrant straw-gold luster and well-preserved surfaces. The left obverse field shows the beginning stages of metal flowlines, but the reverse fields are smooth. The 1904 issue is moderately elusive in MS66, and PCGS has seen only two dozen Superb Gems finer (1/18). NGC ID# BYLF, PCGS# 7447

1915-S Pan-Pac Quarter Eagle, MS66+ Outstanding Surface Quality

4445 1915-S Panama-Pacific Quarter Eagle MS66+ NGC. While the Panama Canal was of immense importance to ocean-going commerce, transportation, and access to the West Coast of America, it was also the crucible for understanding the causes and effects of yellow fever and malaria. Advances in sanitation and mosquito control helped control the diseases, commemorated on the quarter eagle issued at the 1915 Panama-Pacific Exposition. This high-end Premium Gem displays smooth, nearly unmarked surfaces with a sharp strike and radiant mint luster that shimmers over frosted wheat-gold fields and devices. NGC ID# BYLP, PCGS# 7450

PANAMA-PACIFIC SET OFFERED INDIVIDUALLY

1915-S Pan-Pac Half Dollar, AU58 Toned and High-End for the Grade

1915-S Panama-Pacific AU58 PCGS. CAC. Normal Mintmark. Deep russet-gray, olive, and gold hues blanket each side of this CAC-approved Panama-Pacific half dollar. Under magnification, some faint cabinet friction is discernible on the highest points of the devices, earning a conservative AU58 grade from PCGS. The satiny surfaces remain luminous. The coin is from a five-piece Pan-Pac commemorative set with original case, offered individually in this and the following five lots.

From The Property of a Lady. NGC ID# BYHP, PCGS# 9357

1915-S Pan-Pac Gold Dollar, MS66 A High-End Type Coin

4447 1915-S Panama-Pacific Gold Dollar MS66 PCGS. Charles Keck's design shows a Panama Canal laborer on the obverse, with two dolphins on the reverse, "indicating the meeting of the two oceans." Examples of this issue are available in MS66 but scarce finer. This Premium Gem displays a full strike and shimmering yellow-gold luster. There are no distracting abrasions.

From The Property of a Lady. NGC ID# BYLH, PCGS# 7449

1915-S Panama-Pacific Quarter Eagle, MS65 Exceptional for the Grade

4448 1915-S Panama-Pacific Quarter Eagle MS65 PCGS. Only 6,749 Pan-Pac quarter eagles were distributed, making this a challenging and highly desirable commemorative. The Gem example offered here displays sharp detail and has softly frosted yellow-gold luster. Under a loupe, the fields show swirling die polish lines, as is characteristic of most examples of the issue.

From The Property of a Lady. NGC ID# BYLP, PCGS# 7450

1915-S Round Panama-Pacific Fifty, MS64 Classic Gold Commemorative Issue Only 483 Examples Distributed

4449 1915-S Panama-Pacific 50 Dollar Round MS64 PCGS. CAC. The 1915-S Panama-Pacific fifty dollar gold piece was part of an ambitious five-coin set of commemorative coins issued in conjunction with the Panama-Pacific International Exposition, to commemorate the opening of the Panama Canal and the recovery of San Francisco after the great earthquake of 1906. Numismatic entrepreneur Farran Zerbe conceived the plan for this unprecedented program of commemorative coins, and the set consisted of two fifty dollar gold pieces, both round and octagonal versions, a quarter eagle, a gold dollar, and a silver half dollar. The coins were initially offered in sets or individually, with the sets offered in velvet-lined black leatherette cases. More elaborate purchasing options were offered later, including sets encased in glass-fronted copper frames from Shreve & Co., a local jewelry firm.

The design for the two fifty dollar commemoratives was by sculptor Robert Aitken, who was born in San Francisco in 1878. The obverse features a helmeted Minerva, the Roman goddess of industry. Her companion owl (wisdom), graces the reverse, perched on a branch of western pine. The octagonal and round fifty dollar gold commemoratives were intended to have a maximum distribution of 1,500 pieces each, but sales fell far short of those objectives. The Pan-Pac fifties were priced at \$100 each, a prohibitively high price for most collectors of the time. As a result, only 483 examples of the round fifty dollar coins were sold. The octagonal version fared a little better, but still only sold 645 pieces. The remainder were melted after sales closed.

Heritage Auctions is privileged to offer one of the original sets in the leatherette holder, with the coins and holder offered separately

in consecutive lots in this sale.

The round fifties began appearing at auction at least as early as lot 500 of the Cook-Conover Collections Sale (B. Max Mehl, 11/1916). Lots 500-504 of the sale comprised a five-piece set of 1915-S Panama-Pacific commemoratives, with the coins offered separately, much like the offering of the present set. The set was purchased by a single collector for a total price of \$200. Recent sales of the round Pan-Pac fifty include the MS64 NGC specimen in lot 5194 of our January 2018 FUN Signature, which realized \$120,000.

The present coin is an attractive Choice specimen, with sharp definition on all design elements and well-preserved, lightly textured orange-gold surfaces that show no mentionable distractions. Vibrant mint luster adds to the outstanding eye appeal of this exceptional gold commemorative and we expect intense competition from series specialists when this lot is called. PCGS has graded 30 numerically finer examples (1/18).

From The Property of a Lady. NGC ID# BYHP, PCGS# 7451

1915-S Octagonal Pan-Pac Fifty, MS64 The First of the Two Types Struck A Classic Commemorative Rarity

4450 1915-S Panama-Pacific 50 Dollar Octagonal MS64 PCGS. The first Panama-Pacific fifty dollar gold pieces were struck on June 15, 1915, in a special ceremony at the San Francisco Mint. Utilized was a large medal press that had been shipped to the West Coast from the Philadelphia Mint for this very purpose. Existing presses at the San Francisco Mint were inadequate to strike coins much larger than the silver dollar, which had a diameter of 38.1 mm. The Pan-Pac fifties reached 46 mm in diameter and contained nearly two and a half troy ounces of gold. These were the first fifty dollar gold pieces struck by the U.S. Mint for general distribution, and at the time of issue were as much a curiosity for that purpose as they were a memento of the Panama-Pacific International Exposition.

The first Pan-Pac fifty struck was awarded to Charles C. Moore, president of the Exposition. Upon viewing the first of what would become the most prestigious commemorative ever issued by the U.S. Mint, Moore famously stated: "Numismatists will seek these coins with zeal." Other officials and guests of the ceremony, including the future distributor of the coins, Farran Zerbe, operated the press for the first 29 strikes, whereafter mint employees took over. All of these early strikes were of the octagonal type. Mint records indicate that 609 octagonal fifties were struck before the end of the fiscal year on June 30.

The act of January 16, 1915, provided for the coinage of 3,000 fifty dollar gold pieces and mandated that half of them be struck in octagonal format reminiscent of the fifty dollar ingots issued by the U.S. Assay Office during the Gold Rush. The angular shape of these coins created voids around the periphery not present on the round variety, which designer Robert Aitken filled with dolphins, "suggesting, as they encircle the central field, the uninterrupted water route made possible by the Panama Canal," according to the official description. As such, the octagonal coins were arguably more true to the spirit of the Exposition, and they artistically meshed with the Pan-Pac gold dollar, which featured a pair of dolphins on the reverse, symbolic of the two oceans being joined. Given these considerations, it is understandable that the octagonal fifty dollar gold piece received greater sales than its round counterpart. In total, 645 octagonal fifties were distributed and 483 round. The round variant is slightly scarcer overall today, but both varieties are rare in comparison to the demand for them. Whether the round or octagonal type, Panama-Pacific fifty dollar gold pieces have a century-long history of being the most sought-after of all classic commemoratives and one of the great gold rarities of the 20th century. Charles C. Moore's words ring true — numismatists do seek these coins with zeal.

The near-Gem octagonal piece offered here is sharp and satiny with rich straw-gold luster. Under a loupe, a few minor contact marks are visible on Minerva's cheek and there are a few stray lines in the fields, but the overall eye appeal is exquisite. This piece comes from a complete five-coin Pan-Pac commemorative set, which is offered here in individual lots, including the original leatherette case.

MODERN BULLION COINS

1997 Quarter-Ounce Gold Eagle, MS70 Scarce in This Finest Grade

4452 1997 Quarter-Ounce Gold Eagle MS70 PCGS. PCGS has seen only 21 MS70 examples of the quarter-ounce 1997 Gold Eagle (1/18). While low top-grade populations such as this are not uncommon among bullion issues at PCGS, there is usually a substantial NGC population to supplement it. In this case, NGC has seen only 46 coins in MS70, making the total top-grade census of the 1997 quarter-ounce Gold Eagle unusually small for the series. This piece is fully struck and satiny with flawless golden surfaces. NGC ID# 26MD, PCGS# 9916

1997 Quarter-Ounce Gold Eagle, MS70 Few Certified So Fine

4453 1997 Quarter-Ounce Gold Eagle MS70 NGC. More than 108,000 quarter-ounce Gold Eagles were struck at Philadelphia in 1997, but only 46 pieces are graded MS70 at NGC and 21 at PCGS (1/18). This Registry-grade example displays needle-sharp definition and flawless satin luster with attractive golden color. One of the lesser-known condition rarities in the Gold Eagle series. NGC ID# 26MD, PCGS# 9916

1999 Silver Eagle, MS70 Elusive and Sought-After in This Grade

4454 1999 Silver Eagle MS70 NGC. All MS70 examples of the 1999 Silver Eagle have been certified only in the past few years. In 2012, John Mercanti wrote in *American Silver Eagles*: "None have been certified at the perfect MS-70 level ... making that elusive grade of perfection worth a small fortune if one were to be found." Today, there are a little more than 200 MS70 coins reported by NGC and PCGS combined (1/18). This piece is sharp, frosty, and pristine, showing untoned, shimmering mint luster. NGC ID# 26JX, PCGS# 9947

TERRITORIAL GOLD

Circa 1831 C. Bechtler Five Dollar, AU55 K-15, 150 Grains, 20 Carats Second Series

4455 (1831-34) C. Bechtler Five Dollar, 150G. 20C. AU55 PCGS. K-15, Low R.7. Christopher Bechtler struck gold coins in the Southeastern United States throughout the 1830s and into the 1840s, and August Bechtler continued the coinage through the 1840s, and possibly even into the early 1850s. In his private gold reference, author Donald Kagin identifies seven distinct series of C. Bechtler coinage, and ascribes this piece to the second series that he indicates was only coined in the Fall of 1831. These pieces actually contained slightly more gold than the federal half eagle issued at the same time. The combination of the short striking period and the significant gold content undoubtedly lead to the rarity today, but also certainly contributed to the popularity and success of the Bechtler gold series among the citizens of the time. The actual display of the weight and fineness of gold on each piece, beginning with the second series, was likely a contributing factor to the success of their coinage.

Kagin rated this variety R.7 in 1981, suggesting that seven to nine examples survive in all grades. With a PCGS and NGC combined population of 19 examples, even accounting for resubmissions, there are likely at least a dozen examples in existence today. This example was unevenly struck from non-parallel dies so that the central and lower obverse, and the central and upper reverse, lack detail. Elsewhere, the strike is bold. An attractive green-gold representative exhibiting delicate rose and blue toning, with reflective fields. Trivial hairlines and minuscule marks are inconsequential on this extremely important North Carolina gold piece. Population: 6 in 55, 3 finer (1/18). NGC ID# 2B9L, PCGS# 10118

1849 Moffat & Co. Five, K-4a, AU53 Early Private Gold Issue

1849 Moffat & Co. Five Dollar AU53 NGC. K-4a, R.4. Die breaks at FIVE DOL. confirm the Kagin variety of this Standard Mint Value five dollar gold piece. Modeled to resemble federal half eagles, the Moffat & Co. pieces were held in high regard throughout the Gold Rush-era West, and were readily accepted in commerce. Like most private issue Territorial gold, relatively few pieces survived the rigors of circulation and subsequent melting for bullion. This greenish-gold example retains About Uncirculated definition across the lightly granular, abraded surfaces, struck from a late die stage. Listed on page 395 of the 2018 Guide Book. NGC ID# ANJ5, PCGS# 10240

1850 Moffat & Co. Five, XF45 K-7, Reddish-Gold Surfaces

4457 1850 Moffat & Co. Five Dollar XF45 PCGS. K-7, R.4. Small eagle variety with the leaf trio centered under S in S.M.V. and the berry over FI in FIVE. This is an important Gold Rush souvenir from the esteemed firm of Moffat & Co. The partnership produced five and ten dollar gold coins in 1849 and 1850 that traded at full face value, an unusual occurrence for territorial gold. In 1851, coinage production ended when Moffat & Co. received a federal contract to operate a U.S. Assay Office. Attractive surfaces feature reddish-gold color and pleasing, if somewhat mushy, detail. Listed on page 395 of the 2018 Guide Book.

Ex: Long Beach Signature (Heritage, 9/2014), lot 3556.

From The Bayside Collection. NGC ID# ANJ6, PCGS# 10243

1850 Moffat & Co. Five, XF45 Small Eagle, K-7 Variety

4458 1850 Moffat & Co. Five Dollar XF45 NGC. CAC. K-7, R.4. Small Eagle variety, confirmed by thin arrows that do not touch at the arrowheads. This is the sub-variety with a berry positioned above the F of FIVE. A yellow-gold example with orange-gold accents, the coin is moderately worn but still retains excellent detail on the devices. Numerous small abrasions dot the fields and portrait — none are severe. The MOFFAT & Co. name is worn but readable on the coronet, the mark of the most respected coiner of pioneer gold. Listed on page 395 of the 2018 Guide Book. Census: 10 in 45, 53 finer. CAC: 3 in 45, 12 finer (1/18).

From The Bayside Collection. NGC ID# ANJ6, PCGS# 10243

1851 Humbert Fifty Dollar, 887 THOUS. Reeded Edge

459 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. PCGS Genuine. K-6 or K-7, R.4. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the obverse details of an XF specimen that has been removed from a reverse mount with that entire side sheared off in the process. Rim bumps and other, lesser obverse damage also prevent a numeric grade. The 1851 date below the eagle on the obverse identifies this piece as a reeded edge variety, and 887 THOUS. inscription above the eagle narrows it down to either K-6 or K-7, both of which are R.4 varieties in our estimation. These two varieties differ on the reverse die, which is of course effaced on this piece. The surfaces are bright yellow-gold in color. Listed on page 396 of the 2018 Guide Book. From The Merrill Collection.

1852 Humbert Ten, Well-Preserved XF45 K-10a 'IINITED' Variety

4460 1852 Humbert Ten Dollar XF45 NGC. K-10a, Low R.4. A charming olive-gold example that lacks noticeable abrasions, unlike most Humbert gold coins. This is an example of Kagin's "IINITED" variety, caused by a die crack through the base of UNITED. The advanced obverse die crumbling is mint-made and provides greater interest for the pioneer gold specialist. Struck from rotated dies. Listed on page 397 of the 2018 Guide Book.

Ex: Rosemont Signature (Heritage, 8/2013), lot 5334; FUN Signature (Heritage, 1/2015), lot 7852.

1852 Augustus Humbert Ten, AU53 K-10a, 'IINITED' Variety

4461 1852 Humbert Ten Dollar AU53 NGC. K-10a, Low R.4. Obverse die crumbling and a heavy die crack through the obverse legend makes UNITED look like IINITED, a slightly scarcer variety for the 1852 Humbert ten. Luster remains across the greenish-gold surfaces of this About Uncirculated gold piece, with the reverse approaching Mint State. Slight incompleteness is seen in the center, and the eagle's right shield and leg definition are similarly soft. Marks from circulation are sparse and minor. Some pitting of the obverse die accounts for numerous pinprick lumps across the fields. On balance, a thoroughly satisfying example of the U.S. Assayer of Gold type, struck under the auspices of Moffat & Co. Listed on page 397 of the 2018 Guide Book. Census: 8 in 53, 23 finer (12/17). From The Bayside Collection. NGC ID# ANGG, PCGS# 10187

1852 Humbert Ten Dollar, AU55 K-10, Bold With Minimal Marks

1852 Humbert Ten Dollar AU55 NGC. K-10, Low R.4. An evenly struck, sun-gold Choice AU Humbert ten that lacks the noticeable abrasions usually endemic to the issue. We can only mention three small marks on the obverse rim at 2, 3, and 4 o'clock. A middle to late die state with obverse rust and crumbling. Listed on page 397 of the 2018 Guide Book. Census: 9 in 55, 14 finer (1/18). Ex: Philadelphia Signature (Heritage, 8/2012), lot 4853.

From The Bayside Collection. NGC ID# ANGG, PCGS# 10187

1852 Assay Office Ten, AU50 Popular K-12a Variety

4463 1852 Assay Office Ten Dollar AU50 PCGS. K-12a, R.4. After named partner John Little Moffat retired in February 1852, the United States Assay Office continued to strike tens, twenties, and fifty dollar gold coins under the auspices of the remaining partners, Curtis, Perry, and Ward. There are two distinct varieties of the 1852 Assay ten. This coin represents the K-12a variety, with the O in OFFICE placed under the N in UNITED. This attractive AU specimen shows just a touch of wear on the design elements and the pleasing orange-gold surfaces are lightly abraded. Listed on page 397 of the 2018 *Guide Book*.

From The Bayside Collection. NGC ID# ANGV, PCGS# 10001

1852 Assay Office Ten, K-12a, AU55 Well-Respected Gold Rush Coiner

4464 1852 Assay Office Ten Dollar AU55 PCGS. K-12a, R.4. The widely respected firm of Moffat & Co. was reorganized after the retirement of John Little Moffat in February of 1852, and operations continued under the name of the United States Assay Office of Gold, with Curtis, Perry, and Ward as managing partners. The K-12a ten dollar gold pieces show the O in OFFICE placed under the N of UNITED. This Choice AU specimen is sharply detailed in most areas and the design elements show only a trace of actual wear. The orange-gold surfaces are lightly abraded and retain traces of original mint luster. Listed on page 397 of the 2018 Guide Book. Population: 31 in 55, 34 finer (1/18).

From The Admiral Collection. NGC ID# ANGV, PCGS# 10001

1852 Assay Office Ten Dollar, Near-Mint K-12a, Crisp Gold Rush-Era Survivor

4465 1852 Assay Office Ten Dollar AU58 NGC. K-12a, R.4. The K-12a die marriage features the O in OFFICE under the N in UNITED. In February 1852, John L. Moffat retired, leaving Curtis, Perry, and Ward to reorganize as the United States Assay Office. The firm continued to produce high-quality coinage for the California economy through the end of 1853, shortly before the opening of the San Francisco Mint. This ten dollar Territorial gold coin features crisp detail on the eagle, bold engine turning, and sharp legends. There are few major abrasions over red-gold surfaces. Listed on page 397 of the 2018 Guide Book. Census: 22 in 58 (1 in 58+), 42 finer (1/18).

From The Bayside Collection. NGC ID# ANGV, PCGS# 10001

1853 K-18 Assay Office Twenty, AU58 900/880 Thous., Attractive Territorial Type

4466 1853 Assay Office Twenty Dollar, 900 Thous. AU58 NGC. K-18, R.2. Upon dissolution of Moffat & Co., the company reorganized as the United States Assay Office of Gold under the leadership of Curtis, Perry, and Ward. A long-awaited approval to issue twenty dollar gold pieces was not disputed by Congress, and as long as the pieces were .900 fineness in gold, variances in the proper copper alloy mix was not tolerated. Existing 880 Thous. dies were hastily altered to read 900, and more than 2.5 million 1853 twenty dollar gold pieces were struck.

This near-Mint State example clearly shows the overpunched 900/880 in the banner above the eagle. Nearly full luster remains across bright, greenish-gold surfaces that have just a hint of rub. We note a minor rim ding at 10 o'clock on the engine-turned reverse, and a small depression beneath U in UNITED that may be production-related. The eye appeal is quite strong. Listed on page 399 of the 2018 *Guide Book*.

From The Bayside Collection. NGC ID# ANHD, PCGS# 10013

1855 K-6 Wass Molitor Ten, AU55 Ex: S.S. Central America

4467 1855 Wass Molitor Ten Dollar AU55 PCGS. K-6, High R.5. Ex: S.S. Central America. SSCA 7287. At one time, the K-6 variety was considered R.7 with fewer than a dozen known, but after discovery of the treasure from the S.S. Central America, the rarity dropped to its present High R.5 level. The Wass Molitor firm was well-respected for the quality of their coinage and accuracy of their assays. The 1855 ten dollar gold coins were struck as an emergency measure during a period when a shortage of parting acids caused the San Francisco Mint to temporarily suspend coinage operations. The present coin is softly struck and textured gold, with lustrous orange-gold surfaces that show only light wear, but a number of minor marks and scrapes that contribute to the grade. As an AU55 example, it is a higher-end survivor of the rare 1855 Wass Molitor ten. Listed on page 404 of the 2018 Guide Book. Population: 5 in 55, 2 finer (1/18).

From The Admiral Collection. NGC ID# ANJR, PCGS# 10354

1854 Kellogg Twenty, AU Details K-1a, Bright Orange-Gold Color

4468 1854 Kellogg & Co. Twenty Dollar — Altered Surfaces — PCGS Genuine. AU Details. K-1a, R.4. High-grade Kellogg twenties are a challenge to locate, including those with AU details. While this example has surfaces that appear cleaned and perhaps retoned, the resultant brassy-gold color shows pleasing orange accents and traces of luster at the margins. A few small abrasions are peppered through the fields, as one would expect for a Territorial Gold twenty of the day. The coin is well-struck, with a touch of wear evident over the high points. Distinguishing characteristics of Kagin-1a include short arrows, the date lightly entered (4 is high and leans slightly left), and KELLOGG & CO more or less centered on the coronet, as opposed to its high position on other varieties. Listed on page 406 of the 2018 Guide Book.

Kellogg & Co. Twenty Dollar, Choice XF K-3b, Important Territorial Issue

4469 1855 Kellogg & Co. Twenty Dollar XF45 PCGS. K-3b, R.5. Kellogg and Co. provided double eagles between the cessation of coinage at the U.S. Assay Office in late 1853 and the beginning of gold coin production at the San Francisco Mint (April 1854), as well as for a short time thereafter that extended into 1855. The reverse arrows are short, and the O of CO is in Liberty's hair rather than on the coronet. While the surfaces show a number of moderate abrasions, none of them are especially bothersome. Rich orange-gold surfaces deepen to copper-red at the obverse margins and over much of the reverse, enhancing the excellent appeal. Listed on page 406 of the 2018 Guide Book.

Ex: Summer FUN Signature (Heritage, 7/2007), lot 3326. From The Bayside Collection. NGC ID# ANJ2, PCGS# 10225

1861 Clark, Gruber & Co. Quarter Eagle, AU53 Pleasing K-5a Example, Scarce This Nice

1861 Clark, Gruber & Co. Quarter Eagle AU53 PCGS. K-5a, R.4. This is an attractive, reflective example of the 1861 Clark, Gruber & Co. quarter eagle. PIKES PEAK appears on the coronet, and the date is awkwardly entered with 61 higher than 18. The Kagin-5a variety may, in fact, be an early die stage of Kagin-5, with recutting visible on star 7 above P in PIKES, and the P is widely recut as well. Several letters of the reverse legend show recutting as does the numeral 2 in 1/2. Kagin's reference cites high rims as characteristic of K-5a, but this did not prevent premature wear on the high central motifs, which are always vulnerable to rub as well as weak strike on this variety. Listed on page 410 of the 2018 Guide Book. Population: 5 in 53, 40 finer (12/17).

From The Bayside Collection. NGC ID# ANJY, PCGS# 10139

1861 Clark, Gruber Ten, Choice XF Rich, Original Patina, K-7

4471 1861 Clark, Gruber & Co. Ten Dollar XF45 PCGS. K-7, R.4. The firm of Clark, Gruber & Co. operated on a 24-hour per day schedule for two years. Their reputation was impeccable while acting as a bank and a private mint, and the company was eventually purchased by the U.S. government in 1863. An assay report from July 1861, issued by the Philadelphia Mint stated the Clark, Gruber coins "to be of professed value, or slightly over." This is a wholly original ten dollar, whose surfaces are richly toned in shades of reddish-orange and blue. There are no large or detracting marks on either side, just the small abrasions one would expect from a short stay in circulation. Listed on page 410 of the 2018 Guide Book. Population: 14 in 45, 86 finer (12/17).

Ex: Long Beach Signature (Heritage, 9/2013), lot 6964.

S.S. CENTRAL AMERICA GOLD BARS

Kellogg & Humbert Gold Ingot, 52.37 Ounces Ex: S.S. Central America

4472 Kellogg & Humbert Gold Ingot. 52.37 Ounces. The initial reason for the popularity of private assayers in Gold Rush California was due to the variability in the value of gold dust. Prices varied from \$14 per ounce to as much as \$20 per ounce. Sometimes gold dust was mixed with black dirt, making the value difficult to determine. Highly reputable assayers met this need for a known value for the enormous amounts of gold dust that was brought out of northern California. But it is curious that private assayers remained so popular with gold miners and banking houses, even three years after the establishment of the branch mint in San Francisco. The best clue we have why this is so, comes to us from an 1866 report by John Jay Knox:

"Private assayers will conduct their business much more economically than government officers, and the large quartz mills will in most cases do their own assaying, even if government offices are located in the same towns. Assayers of well established reputations will obtain from large mining corporation compensation for their services, in most cases, nearly or quite double the salaries paid by the United States, or they will earn much more in a private capacity than they will receive if in the employ of the government. The result will be, therefore, that the United States will obtain and retain only indifferent assayers and workmen, or those in its employ will endeavor to increase their pay illegitimately, thus subjecting the United States assay officers to the same charges of injustice and fraud with which private individuals are sometimes accused."

The reputation of West Coast assayers were widely known to East Coast financial institutions, who relied on accurate assays, fineness, and value of the gold ingots that were shipped from west to east. The \$2 million in high-grade gold ingots that were aboard the S.S. Central America when it was lost in a storm in September 1857 further weakened the country's economy and East Coast banking institutions, deepening the Panic that began two months previous to the loss of the ship.

Such ingots as this one are tangible reminders of not only the California Gold Rush, but they also underscore the importance of gold bullion as currency backing in the mid-19th century. This medium-sized ingot is laid out in the usual fashion: No 949 / K&H hallmark / 52.37 Oz / 865 FINE / \$936.43. The lower-center of the company hallmark is absent due to a depression on the top side. The upper-back side repeats the serial number, 949, but in a different font. The ingot measures 45 x 97 x 21 mm. All six sides are bright gold with no traces of the rust from the ship's hull that is often seen.

COINS OF HAWAII

1883 Hawaii Dime, MS66 Single-Year Type

4473 1883 Hawaii Ten Cents MS66 PCGS Secure. The 1883 Hawaiian "umi keneta" was struck at the San Francisco Mint on U.S. dime planchets. Many were redeemed and melted after Hawaii acquired U.S. territorial status. The present sharply struck and lustrous Premium Gem exhibits exemplary surfaces and exceptional eye appeal. Population: 14 in 66 (2 in 66+), 2 finer (1/18). NGC ID# 2C54, PCGS# 10979

1883 Hawaii Dollar, Attractive MS61 CAC-Endorsed Example

4474 1883 Hawaii Dollar MS61 PCGS. CAC. The San Francisco Mint struck four regular-issue silver denominations for the Kingdom of Hawaii in 1883, but most of the coins were later melted. The silver dollar emission amounted to 500,000 pieces, yet Mint State examples are scarce today. This piece offers lightly toned, silvery centers ceding to deep amber-orange and russet patina near the rims. A single tick on the neck of the king and a few light field abrasions comprise the only mentionable contact. An attractive coin for the grade, with ample mint frost on the sharply struck raised devices and partially reflective fields. This is one of just two examples in MS61 with the CAC green approval sticker. Population: 11 in 61, 87 finer. CAC: 2 in 61, 22 finer (12/17). NGC ID# 2TGD, PCGS# 10995

1883 Hawaii Dollar, MS62 Dusky Antique-Gold Patina

4475 1883 Hawaii Dollar MS62 PCGS. This represents the highest-denomination coin struck at the San Francisco Mint in 1883 for circulation in the Kingdom of Hawaii. Most of the 500,000 dollars minted were eventually melted. This sharp Uncirculated example exhibits dusky antique-gold patina over each side. Minor gradelimiting ticks appear mainly on the obverse.

From The Jamestown Collection, Part II. NGC ID# 2TGD, PCGS# 10995

1883 Hawaii Dollar, MS63 Scarce Crown-Sized Type

4476 1883 Hawaii Dollar MS63 NGC. Narrow bands of golden-brown and navy-blue toning are confined to the borders of this coruscating and crisply struck example. Both sides are uncommonly devoid of marks, and the eye appeal is undeniable. The akahi dala or silver dollar is scarcest among the four 1883 Hawaii denominations, each of which is a one-year type. Census: 16 in 63 (1 in 63+), 34 finer (1/18). NGC ID# 2TGD, PCGS# 10995

PATTERNS

1838 Kneass / Gobrecht Half Dollar in Silver Judd-72, PR62

4477 1838 Half Dollar, Judd-72, Pollock-75, R.5 PR62 PCGS. CAC. A large bust of Liberty faces left, with stars and the date at the margins. The reverse features an eagle with spread wings. For many decades, the obverse design was attributed to William Kneass, but Gobrecht was almost certainly the engraver, as the portrait bears close resemblance to the gold eagle also introduced in 1838. Struck in silver with a reeded edge with a medal turn. An estimated 50-60 pieces are known. This is a bright example with untoned centers and lightly toned margins. Lightly hairlined. NGC ID# 3YLW, PCGS# 11282

1850 Cent in Copper-Nickel Judd-124 Restrike, PR65

4478 1850 One Cent, Judd-124 Restrike, Pollock-139, Low R.7 PR65 NGC. The ring cents of 1850 were made in response to Congressman Sam F. Vinton, who drafted a bill in 1849 to reduce the cent diameter. The annular design was simple, featuring CENT / 1850 on the obverse and USA / ONE TENTH SILVER on the reverse. The obverse shows two eight-petal flowers between the inscriptions. Struck without a central perforation, in copper-nickel with a plain edge. Medal turn. The surfaces are toned rose and steel-blue. The reverse exhibits several advanced cracks. Regarding the rarity of Judd-124, USPatterns.com states "about a half dozen are known." NGC ID# 298B, PCGS# 11532

1853 Cent in Copper-Nickel Judd-151, PR64

4479 1853 One Cent, Judd-151, Pollock-178, Low R.6, PR64 PCGS. The obverse design was taken from the issued 1853 quarter eagle, but the reverse shows the denomination ONE CENT within a laurel wreath. Struck with a reeded edge in an alloy of 60% copper and 40% nickel. A flashy and intricately struck near-Gem. A few light flecks of carbon are all that limit the grade of this lovely piece. Ex: FUN Signature (Heritage, 1/2004), lot 8379; New York Invitational Signature (Heritage, 10/2014), lot 4152. NGC ID# 2APC, PCGS# 11628

1858 Flying Eagle Cent in Copper-Nickel Small Letters / Five-Leaf Clusters Judd-191, PR65

4480 1858 Flying Eagle Cent, Judd-191, Pollock-233, R.5 PR65 NGC. Snow-PT14 with five leaf clusters in the wreath. The obverse is from a regular Flying Eagle Small Letters die, while the reverse displays the wreath introduced on the 1859 Indian cent. The wreath has five-leaf clusters, which designates it as a Pollock-233. Struck in copper-nickel with a plain edge. The fields are nicely reflective and serve to enliven the pale rose-lilac toning seen over each side. Sharply struck. NGC ID# 38KC, PCGS# 11840

1870 Standard Silver Quarter in Aluminum Judd-923, PR65 Cameo

4481 1870 Standard Silver Quarter Dollar, Judd-923, Pollock-1028, High R.7 PR65 Cameo PCGS. CAC. The obverse shows Liberty facing right, the hair tied in a loose bun behind the head, with additional flowing curls across the shoulder. The headband is inscribed LIBERTY with a star above the forehead. The reverse is the usual Standard Silver design with the denomination inside a wreath, the date below. Struck in aluminum with a plain edge. Less than a half dozen of this variety are known, making this Gem Cameo an important and rare acquisition for the advanced specialist. Pale ice-blue toning accents frosty devices and deeply mirrored fields. Some lightness of strike is noted on the reverse bow, though the motifs are otherwise sharp. PCGS# 800082

1871 Indian Princess Dollar in Silver Judd-1220, Deeply Toned PR62 Surprisingly Rare

4482 1871 Standard Silver Dollar, Judd-1220, Pollock-1256, High R.7, PR62 PCGS. The James Longacre Indian Princess design dominates the central obverse, showing no stars or other peripheral elements. The initials J.B.L. appear at the lower right of Liberty's rock, in the field. The date 1871 appears below the rock. The 1870 Standard Silver reverse features an open agricultural wreath enclosing 1 / DOLLAR, with STANDARD at the top rim. Struck in silver with a reeded edge. Saul states only three or four examples are known of this Standard Silver dollar, and this piece is not listed on his roster of three pieces on USPatterns.com. Deep charcoal-gray patina covers each side with faint underlying hints of rose. As a result, the mirrored fields are diminished. NGC ID# 99BJ, PCGS# 61379

1875 Quarter Eagle in Copper Judd-1434, PR64 Brown

4483 1875 Quarter Eagle, Judd-1434, Pollock-1577, High R.7, PR64 Brown PCGS. Regular dies Coronet quarter eagle from 1875. Struck in copper with a reeded edge. Only four or five pieces are believed known and a couple are gilt (for obvious reasons). There could be no legitimate reason to strike a quarter eagle in copper, so the inescapable conclusion is these were produced for sale to collectors. Another two or three pieces were struck in aluminum. This is an non-gilt piece. While labeled Brown by PCGS, there is a surprising presence of original yellow-red luster (although admittedly it is subdued). The fields are still brightly mirrored. Fully struck. NGC ID# 2ABV, PCGS# 61741

End of Session Two

SESSION THREE

EARLY HALF DOLLARS

4484 1794 O-101, T-7, High R.3 — Improperly Cleaned, Damaged — NCS. Good Details. The radial die crack through the F in OF, and the location of the final star below the bust tip, combine to attribute the variety. The cream-gray surfaces are somewhat cloudy, and a narrow scratch connects stars 2 and 3. The reverse border is well defined, but the date and the right-side stars are faint. Star 1 is worn smooth. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1794 O-101 Half Dollar, Good 6 Lavender-Gray Patina, Bold Reverse

4485 1794 O-101, T-7, High R.3, Good 6 PCGS. Tompkins Die State 1/2. A die crack connects the rim to the leaf below the first S in STATES. The portrait and stars are clearly outlined, and LIBERTY remains strong, but the date is barely discernible. The reverse maintains bold detail. The eagle is the sole exception, reduced to a silhouette. Pleasing lavender-gray patina with central obverse adjustment marks.

Ex: Purchased from Teletrade (6/2006).

From The Merrill Collection. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

- 4486 1794 O-101, T-7, High R.3 Plugged, Environmental Damage NCS. VG Details. A hole has been plugged at 12 o'clock. Nearby design elements are re-engraved, including the BE in LIBERTY, the right wreath stem and ribbon end, the final A in AMERICA, and the nearby leaf pair. The surfaces are lightly and evenly porous. Stone-white overall with deeper gray shades near the rims. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051
- 4487 1794 O-101a, T-7, High R.3 Damage PCGS Genuine Secure. Good Details. Tompkins Die State 1/5. Everything is well-defined for the grade, although exergue is worn smooth except for the ghost of a 4 that confirms the 1794 date. The "Damage' indicated on the PCGS Gold Shield holder refers to the letters "G.F.G" that are deeply counterstamped vertically on the portrait, a style often seen from gunsmiths, arms inspectors, and blacksmiths in the early 1800s. The reverse is well-detailed except for pitting opposite the counterstamp. Pleasing old-silver color covers both sides. Unlisted in the Brunk reference.

Ex: Coin Galleries (Stack's, 2/1991), lot 2170; Hamilton Collection, Part III / Dallas Signature (Heritage, 10/2016), lot 2170.

From The Merrill Collection.

1794 O-101a Flowing Hair Half, VG Details

4488 1794 O-101a, T-7, High R.3 — Cleaned — PCGS Genuine. VG Details. The lower-right obverse rim is slightly weak, but the reverse dentils are complete. The date and LIBERTY are bold, and some detail remains in Liberty's hair and the eagle's wings. Uniform gunmetal-gray patina blankets each side. Several adjustment marks are seen across the reverse interior, and both sides are uniformly covered in surface chatter, and there is evidence of an old cleaning.

From The Loma Linda Collection, Part II.

1794 O-101a Half, VG Details Collectible First-Year Example

4489 1794 O-101a, T-7, High R.3 — Tooled, Whizzed — NCS. VG Details. Tompkins Die State 1/4. All legends are bold except for the 17 in the date and the F in OF, the latter affected by a die break. This stone-gray first-year Flowing Hair half dollar is hairlined, and portions of the coin are microgranular and moderately bright. Smoothed in the obverse field, and on the portrait near the ear. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Half Dollar, O-102, T-8, Good Details Rare Variety in Collectible Condition

4490 1794 O-102, T-8, High R.6 — Graffiti — PCGS Genuine. Good Details. Faint and illegible pinscratched cursive letters are noted on the obverse field near the stars. A couple of other pinscratches are present near the eagle's neck. The deep dovegray surfaces are dusky but all legends are readable. Rare first-year variety in collectible condition.

Ex: Dallas Signature (Heritage, 10/2012), lot 4270.

From The Merrill Collection.

1794 O-104 Half Dollar, Good 4 Multicolor Field Toning

4491 1794 O-104, T-11, R.5, Good 4 PCGS. Tompkins Die State 2/3. The break through star 3 is present, but not the final O-104a die break from the chin through star 11. This collector-grade example displays iridescent lime-green and rose-red fields, though the devices are gunmetal-gray. Moderate adjustment marks are noted near OF, as made. The date and lower obverse stars are well-worn but apparent.

Ex: Central States Signature (Heritage, 5/2005), lot 7090, which realized \$3,450. NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

4492 1794 O-104, T-11, R.5 — Plugged — PCGS Genuine. VG Details. The coin is crudely plugged and tooled at 7 o'clock relative to the obverse, with the 1 and first two stars effaced and partially reengraved. On the reverse, the ES in STATES is effaced. This well-circulated 1794 half dollar displays boldly outlined central devices and mostly readable legends. The surfaces are generally smooth apart from the plug.

From The Loma Linda Collection, Part II.

4493 1794 O-104a, T-11, R.6 — Repaired — PCGS Genuine. VG Details. This is the rare late die state variant of Overton-104, showing a prominent rim cud above the ER in AMERICA. The surfaces are lavender-gray and generally smooth with careful tooling on both sides that effaces most objectionable abrasions. A couple of old marks near star 12 remain. Sharp rims and boldly outlined devices produce strong eye appeal for a Details-designated Flowing Hair half dollar.

From The Loma Linda Collection, Part II.

- 4494 1794 O-105, T-3, R.5 Damage PCGS Genuine. Fine Details. The date is sharp, and the rims are mostly full save for the upper-right obverse. Pewter-gray surfaces show heavy contact marks and scratches that prevent a numeric grade, although moderate detail remains on Liberty's hair and the eagle's wings. Overton-105 is a less often seen variety, even in this early die state. From The Loma Linda Collection, Part II.
- 4495 1794 O-105a, T-3, R.6, Fair 2 PCGS. The die crack at the first T in STATES is worn away, although the die sinking in the central reverse confirms the late state of the O-105 variety the entire eagle is worn away, while the border legends remain visible. On the obverse, the date and LIBERTY are clear, and the portrait is fully outlined. Olive-gray patina appears in the protected portions of the fields. Faint scratches on each side are consistent with the advanced state of wear.

From The Lona Linda Collection, Part II. NGC ID# 24E6, PCGS# 39207 Base PCGS# 6051

1794 Half Dollar, Good 4 Problem-Free O-105a Representative

From The Merrill Collection.

- 4496 1794 O-105a, T-3, R.6, Good 4 PCGS. Tompkins Die Stage 1/2. Most specialists daring enough to assemble a set of half dollars by die variety would be delighted to obtain any 1794 O-105a representative. This problem-free example is heavily circulated, showing clear legends but much central detail worn away. A cluster of small marks is noted on the cheek. Rich lavender-gray toning. From The Merrill Collection. NGC ID# 24E6, PCGS# 39207 Base PCGS# 6051
- 1794 O-107, T-5, R.6 Holed and Plugged PCGS Genuine. The PCGS number ending in .84 suggests Holed and Plugged as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen that has been holed, plugged, and cleaned. A desirable representative of this very rare die pair. Medium-gray and slate-gray colors dominate. Though this piece was holed at 12 o'clock on the obverse, the subsequent plug was expertly done, and only small traces of the plug are visible on the reverse.

 Ex: Charlton Meyer Collection; Long Beach Signature (Heritage, 5/2009), lot 711, which realized \$2,990.
- 4498 1794 O-107, T-5, R.6 Plugged PCGS Genuine. VG Details. A carefully plugged hole is most easily seen between the ribbon ends on the lower reverse, although tooling is also discernible on the corresponding portion of the obverse. The remainder of the surfaces are whizzed to help mask the repair, which also effaces any major abrasions. This Overton-107 coin has sharp rims, outlined devices, and clear legends. Eye appeal is pleasing for type or variety representation.

 From The Loma Linda Collection, Part II.
- 4499 1795 2 Leaves, O-102, T-26, R.4 Tooled PCGS Genuine. Fine Details. Liberty's hair has VF30 sharpness, in contrast with the Fine definition on the eagle. The right obverse field has a few heavy pinscratches, and the reverse shows a cluster of pinscratches near the tail and right (facing) wing. Both sides display iridescent ocean-blue, lemon-gold, and violet-red shades, more prominently on the obverse.

 From The Property of a Lady.
- 4500 1795 2 Leaves, O-103a, T-29, R.5, VG10 PCGS Secure. 30th Anniversary Green Label Holder. A cud over the AM in AMERICA confirms the late die state of this scarce die marriage. A slate-gray Flowing Hair half dollar without any distracting abrasions. The stars near 3 o'clock are softly defined, partly due to metal flow into the cud.

Ex: Twelve Oaks Collection (Heritage, 9/2016), lot 13087.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39218

Base PCGS# 6052

4501 1795 2 Leaves, O-104, T-24, R.4, Fine 12 NGC. A stone-white Flowing Hair half with pleasing sharpness for the Fine level. The surfaces are free from mentionable marks, although delicate hairlines are present. The die crack across the tops of LIBERTY and a "bridle" die crack below the eagle's beak are characteristic of Overton-104, one of three die pairs with the 10x7 berries reverse. From The Bayside Collection. NGC ID# 24E7, PCGS# 39219 Base PCGS# 6052

1795 Half Dollar, VF30 O-104, Two Leaves Reverse

4502 1795 2 Leaves, O-104, T-24, R.4, VF30 PCGS. Tompkins Die State 3/3. A charming Flowing Hair type coin. Predominantly toned battleship-gray with glimpses of ocean-blue in protected regions. There are no adjustment marks, and abrasions of any consequence are also absent. The late die state with interesting cracks through the C in AMERICA. NGC ID# 24E7, PCGS# 39219 Base PCGS# 6052

4503 1795 2 Leaves, O-105, T-25, High R.3, VG8 PCGS. Sea-green borders frame pearl-white centers. All legends are clear, and the stars are distinct from the rim. The sole detractions are a small reverse edge flaw at 9 o'clock and a thin diagonal field mark near the chin. Ex: Long Beach Signature (Heritage, 6/2006), lot 1579.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39220 Base PCGS# 6052

1795 Flowing Hair Half Dollar, VF20 O-106, Condition Census Survivor

4504 1795 2 Leaves, O-106, T-30, R.6, VF20 PCGS. Tompkins Die Stage 1/2. A heavy diagonal break through the eagle's neck attributes the very rare Overton-106. The obverse is glossy with a pearl-gray portrait and deep charcoal-gray toning in the field. The reverse displays lighter stone-gray and chestnut patina. A few faded scratches are noted on the cheek and near the profile, but the obverse has only occasional thin marks.

Ex: FUN Signature (Heritage, 1/2013), lot 4249; Long Beach Signature (Heritage, 9/2013), lot 3751.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39222 Base PCGS# 6052

4505 1795 2 Leaves, O-107, T-31, R.5, Fine 15 PCGS. The late die state of O-107, recognized by the bisecting die crack from the rim through T in UNITED, all the way across to the rim between OF and AMERICA. ES in STATES is faint but all other legends are bold. The dove-gray surfaces are minimally marked aside from a slight reverse rim nick at 3 o'clock.

Ex: FUN Signature (Heritage, 1/2015), lot 4806, which realized \$2,820. NGC ID# 24E7, PCGS# 39223 Base PCGS# 6052

4506 1795 2 Leaves, O-107a, T-31, R.5, VG10 PCGS. The late die state with a dramatic bisecting reverse crack between 2 and 8 o'clock. A smooth dove-gray Flowing Hair half dollar. Peripheral elements are sharp except for the E in STATES and a few faint right-side stars. Parallel adjustment marks through the T in LIBERTY are of mint origin.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39224 Base PCGS# 6052 4507 1795 2 Leaves, O-108a, T-17, R.4, Fine 15 PCGS. Bold borders, legends, stars, and date attest to an even, sharp strike on this midlevel circulated Flowing Hair type coin. The Liberty portrait is bold also, particularly in the definition of the hair strands. The eagle is worn flat, as usual, but shows a crisp outline. This piece displays deep, original olive-gray, lavender, and gunmetal-blue toning over mostly smooth surfaces. A small rim nick near star 8 on the obverse serves as a pedigree marker. The late die state O-108a variety exhibits a crack along the top of AMERICA, which is partially worn on this example.

Ex: FUN Signature (Heritage, 1/2017), lot 4139.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39226 Base PCGS# 6052

4508 1795 2 Leaves, O-109, T-16, R.4, VG8 PCGS Secure. 30th Anniversary Green Label Holder. Tompkins Die State 1/1. An evenly worn VG example of the Overton-109 variety. The variety is very rare in high grades, but relatively available at this level. Medium to deep dove-gray toning blankets both sides. The borders are bold save for slight weakness at the upper left obverse. Adjustment marks on the portrait are as produced. Ex: FUN Signature (Heritage, 7/2016), lot 3488.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39227 Base PCGS# 6052

4509 1795/1795 2 Leaves, O-112, T-20, R.4, VG8 NGC. The distinctive obverse that shows the date prominently repunched south. Two reverses were mated with the blundered date die. O-112 has a Two Leaves reverse and O-111 is a Three Leaves reverse. Both varieties are listed in the *Guide Book*, O-112 as "Recut Date." This dove-gray and pearl-white example has a bold date and well-outlined types. Several stars and a few peripheral letters are faint. Ex: Long Beach Signature (Heritage, 9/2014), lot 7621, which realized \$1,645. NGC ID# 24E7, PCGS# 39246 Base PCGS# 6055

4510 1795/1795 2 Leaves, O-112, T-20, R.4, Fine 12 PCGS. The "Double Date" *Guide Book* variety with the date initially entered much too low, partly into the dentils. Rich golden-brown toning deepens toward the rims. The device high points are steel-blue. Noticeable contact is confined to a pair of unobtrusive marks near star 13. From The Merrill Collection. NGC ID# 24E7, PCGS# 39246 Base PCGS# 6055

4511 1795 2 Leaves, A Over E in STATES, O-113a, T-14, R.4, VG8 PCGS. The blundered STATES legend was insufficient for the die marriage to secure a separate *Guide Book* listing, though the variety is mentioned in a footnote on page 196. Another die marker is the large lump below the bust tip. A smooth olive-gold and creamwhite example with sea-green patina near the rims. A few mintmade adjustment marks surround the eagle's tail.

Ex: Pre-Long Beach Auction (Ira & Larry Goldberg, 9/2007), lot

1393.
From The Merrill Collection. NGC ID# 24E7, PCGS# 39254
Base PCGS# 39252

4512 1795 2 Leaves, O-115, T-10, R.5, VG8 PCGS. The snow-white portrait contrasts with a deep golden-brown, violet-red, and bluegreen obverse field. The reverse has a chestnut-tan border and a cream-white center. Unobtrusive adjustment marks are noted above the eagle, but post-strike abrasions are unimportant. Ex: 71st Anniversary Sale (Stack's, 10/2006), lot 2749.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39231 Base PCGS# 6052

4513 1795 2 Leaves, O-116, T-11, R.4, VG8 PCGS. A stone-gray and almond-gold Flowing Hair half. Most of the legends are bold, though the tops of a few letters in UNITED and AMERICA have faded, and the upper right stars show weakness. The surfaces are faintly hairlined but free from noticeable marks.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39232 Base PCGS# 6052

1795 O-120 Half Dollar, VF20 Two Leaves, Condition Census Example

4514 1795 2 Leaves, O-120, T-4, High R.6, VF20 PCGS. Tompkins Die Stage 1/1. Star 1 pierces the first hair curl and star 2 is point-to-point with the second hair curl, identifying the obverse. Overton-120 has the only reverse that features a 9x8 berry pattern with three berries on the inside of the wreath below the eagle's right (facing) wing and one on the outside. Deep gray toning covers surfaces devoid of mentionable marks. The details are well-outlined. One of the finest examples of this rare variety.

Ex: William Waste Collection (Heritage, 11/2005), lot 2521; New York Connoisseur's Collection (American Numismatic Rarities, 3/2006), lot 726; Baltimore Auction (Bowers and Merena, 11/2006), lot 3198; Brooklyn Sale (Stack's, 3/2007), lot 764; Long Beach Signature (Heritage, 9/2008), lot 2010; purchased from Harry Laibstain Rare Coins (12/2009).

From The Merrill Collection. NGC ID# 24E7, PCGS# 39237 Base PCGS# 6052

4515 1795 2 Leaves, O-125, T-13, R.4, Fine 12 NGC. Ex: Brown. Powder-blue, golden-brown, and gunmetal-gray toning encompass this unblemished and attractive Flowing Hair half dollar. Minor adjustment marks are relegated to the field near the first two stars. Housed in a prior generation holder.

From The Lona Linda Collection, Part II. NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052

1795 O-126a Half Dollar, Fine 15 Small Head Subtype

4516 1795 2 Leaves, Small Head, O-126a, T-22, High R.4, Fine 15 PCGS. Tompkins Die Stage 1/1. The die crack through the E in UNITED is faint but apparent under magnification. From the scarce Small Head subtype, this Flowing Hair half is blanketed in deep cream-gray and chestnut toning. Close examination under a loupe reveals fewer than the customary number of small marks. Ex: Baltimore Signature (Heritage, 3/2009), lot 1911.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39248 Base PCGS# 6054

1795 O-127, T-23 Half Dollar, Good 4 Two Leaves, Small Head, 27-28 Examples Known

1249.

4517 1795 2 Leaves, Small Head, O-127, T-23, High R.6, Good 4 PCGS. Tompkins Die Stage 1/2. Lightly clashed between the back of the eagle's neck and the left wing. Steve Tompkins was able to locate merely 27 examples of this rare die marriage, featuring the curious Small Head design. The obverse borders are largely worn away, save for the date. Surprisingly good detail remains on the reverse. Silvery-gray with glints of gold and gunmetal. This coin is included in the Pictorial Census and Pedigrees for the T-23 variety in Early United States Half Dollars, Volume 1 (2015).

Ex: Los Angeles ANA Auction (Bowers and Merena, 8/2009), lot

From The Merrill Collection. NGC ID# 24E7, PCGS# 39249 Base PCGS# 6054

4518 1795 2 Leaves, Small Head, O-127, T-23, High R.6 — Holed — PCGS Genuine. VG Details. A rare die marriage with fewer than 30 examples known. Holed below the E in LIBERTY, and the tops of UNITED and AMER are worn into the rim. The remainder of the legends are bold. Deep steel-gray fields contrast with stone-white high points.

From The Loma Linda Collection, Part II.

1795 Small Head Half Dollar, VG8 O-127a, T-23, Shattered Obverse

4519 1795 2 Leaves, Small Head, O-127a, T-23, High R.6, VG8 PCGS. Tompkins Die Stage 3/2. Three radial die breaks readily confirm the attribution. With only 27 or 28 O-127 and O-127a representatives known, this is a rare die marriage in any state or grade. Only star 7 is missing. The remainder of the obverse and the entire reverse show clear outlines and strong legends. Steel-gray patina deepens somewhat around the borders. Pictured in Steve Tompkins' Census for the variety.

From The Merrill Collection. NGC ID# 37TS, PCGS# 39250 Base PCGS# 6054

4520 1795 2 Leaves, Small Head, O-128, T-18, High R.5, VG8 PCGS. Cream-gray fields and centers cede to cobalt-blue and lavender margins. A vertical thin line extends from the eagle's base to a leaf pair directly above, and the reverse border exhibits a few small oval marks, but the surfaces are otherwise exemplary. Certified in a green label holder.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39251 Base PCGS# 6054

1795 Small Head Half Dollar, Fine 12 O-128, T-18, Two Leaves

4521 1795 2 Leaves, Small Head, O-128, T-18, High R.5, Fine 12 PCGS. Tompkins Die Stage 1/2, with a light crack through RICA to the ribbon. Writes Tompkins: "This marriage always comes weakly struck and is a conditional rarity, as there are currently no known examples graded above VF+." This Fine 12 example qualifies for the Condition Census. The surfaces are pleasingly toned and well-detailed for the grade. Adjustment marks occur on the portrait, and a few pinscratches appear in the field below star 9.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39251 Base PCGS# 6054

4522 1795 2 Leaves, Second S Over D, O-129, T-7, R.5, Fine 12 PCGS. Tompkins Die State 1/6. The absent-minded die engraver entered the legend as STATED, confusing it with UNITED, before noticing the error and overpunching the errant D. A cream-gray and straw-gold example with minor hairlines but no relevant abrasions. This appears to be the Rarity-7 O-129a with a vertical die crack through the eagle's head, but evaluation is subjective due to the Fine grade.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39259 Base PCGS# 6052

4523 1795 2 Leaves, O-130, T-8, Low R.5, VG8 PCGS. The sole die marriage with a 7x10 berry arrangement on the wreath. A pearlgray piece with fully readable legends, though LIBERTY and the upper stars are somewhat faint. The only consequential mark is an unobtrusive line through the E in AMERICA.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39242 Base PCGS# 6052

4524 1795 2 Leaves, O-131, T-9, High R.4, VG10 NGC. Tompkins Die State 1/3. The O-131 (T-9) variety is somewhat scarcer than other 1795 die marriages, struck from the third use of the obverse die (now lapped) and from a single-use reverse die employed only on O-131. This is a smoothly worn light-gray example with decent rims and only a scattering of hair-thin lines across both sides. Well-defined for the assigned grade.

Ex: December Dallas Auction (Heritage, 12/1986), lot 501; Hamilton Collection, Part IV (Heritage, 10/2016), lot 4117.

From The Merrill Collection. NGC ID# 24E7, PCGS# 39243 Base PCGS# 6052

4525 1801 O-102, T-1, High R.4, VG8 PCGS. The rarer of the two die marriages for this low mintage date, attributable by the *absence* of large die lumps on the reverse periphery. The lavender-gray and gunmetal-blue surfaces appear lightly granular. Marks are limited to a slight rim knock above the first A in AMERICA.

From The Merrill Collection. NGC ID# 24ED, PCGS# 39268 Base PCGS# 6064

4526 1802 O-101, T-1, R.3, Fine 15 NGC. The sole die marriage for this better Draped Bust date. A minimally abraded if minutely granular example with pearl-white fields and devices. The margins exhibit forest-green and golden-brown toning.

Ex: Papio Collection (Heritage, 1/2014), lot 4340, which realized \$2,467.50.

From The Bayside Collection. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065 4527 1802 O-101, T-1, R.3 — Cleaned — PCGS Genuine. VF Details. Only a single die marriage for this better Draped Bust date. The present piece has had an encounter with baking soda but is nicely defined and lacks mentionable marks. The curls and wings retain traces of luster though PLURIBUS exhibits wear consistent with the VF level.

From The Property of a Lady.

1802 O-101 Half Dollar, VF35 Antique Patina, Low-Mintage Semikey

4528 1802 O-101, T-1, R.3, VF35 PCGS. Tompkins Die Stage 1/1. One set of dies accomplished the entire mintage of 29,890 half dollars in 1802 (three deliveries, one in January and two in December). The low production contributes to its popularity, and few examples are known in high grades. Attractive antique patina includes shades of light gold, violet-gray, and steel. Excellent design detail remains for the grade. Small marks are peppered over the obverse.

From The Merrill Collection. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

4529 1803 Large 3, Small Reverse Stars, O-101, T-1, R.3, XF45 NGC. Short die cracks are visible at the tops of L, IB, and ERT in LIBERTY. The reverse has minor die rust in various locations. A stone-gray half dollar with even definition and glimmers of luster from the design crevices. No marks are consequential.

Ex: FUN Signature (Heritage, 1/2011), lot 3543; Long Beach Signature (Heritage, 6/2011), lot 3603; Long Beach Signature (Heritage, 2/2012), lot 3570.

From The Bayside Collection. NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

1803 Half Dollar, O-101, AU50 Large 3, Small Reverse Stars

4530 1803 Large 3, Small Reverse Stars, O-101, T-1, R.3, AU50 PCGS. Tompkins Die Stage 2/3. This Large 3, Small Reverse Stars variety features the closest arrowhead under the left foot of the N in UNITED. Both sides are lightly toned in golden patina around the borders that cedes to steel-gray hues elsewhere. Toning is fairly well-blended across the reverse. The obverse stars are flat, but the curls show good detail, as do the feathers and shield lines. Clashed on each side

From The Merrill Collection. NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

4531 1803 Large 3, Small Reverse Stars, O-102a, T-2, High R.3, VF35 PCGS. Tompkins Die State 3/4. The rarest die marriage of the year. A predominantly dove-gray example with moderate wear and a substantial degree of remaining design detail. A thin mark on Liberty's jaw provides the only mentionable contact.

Ex: Los Ángeles Signature (Heritage, 8/2009), lot 1545. NGC ID# 24EF, PCGS# 39272 Base PCGS# 6066

4532 1803 Large 3, Large Reverse Stars, O-103, T-3, R.3, XF40 PCGS. Overton-103 commands its own *Guide Book* listing, as the sole 1803 variety that pairs a Large 3 obverse with a Large Stars reverse. Rich gunmetal-gray and walnut-brown toning embraces moderately circulated but minimally marked surfaces. NGC ID# 24EF, PCGS# 39273 Base PCGS# 6066

1803 Draped Bust Half Dollar, XF40 Colorful O-104, Small 3 Variant

4533 1803 Small 3, Large Reverse Stars, O-104, T-4, R.3, XF40 PCGS. Tompkins Die State 3/2. Metal flow into the shoulder of Liberty on the obverse results in the eagle's head lacking definition on even high-grade examples of Overton-104 (T-4). As the only Small 3, Large Reverse Stars variety, the issue is in strong demand by specialists and type collectors. This attractive XF example displays traces of mint luster that remain in protected areas, with multicolor shades of blue, violet, forest green, and reddish-gold adding substantial eye appeal. Sharp definition remains for the assigned grade. Population (Small 3 variety): 22 in 40, 26 finer (1/18). From The Property of a Lady. NGC ID# 24EF, PCGS# 39274 Base PCGS# 6067

1803 Half Dollar, Appealing XF40 O-104, Small 3, Large Reverse Stars

4534 1803 Small 3, Large Reverse Stars, O-104, T-4, R.3, XF40 PCGS. CAC. Tompkins Die Stage 3/2. Clashed shield lines appear at Liberty's ear, and a retained cud forms at STATES. O-104 is the only variety with a Small 3 in the date. The central devices are relatively strong for the grade, taking an expected amount of blending into account. Most appealing is the rich patina that includes olive-gold, violet-gray, and steel-blue hues. Population: 18 in 40, 21 finer. CAC: 5 in 40, 10 finer (1/18).

From The Merrill Collection. NGC ID# 24EF, PCGS# 39274 Base PCGS# 6067

- 4535 1805/4 O-101, T-4, R.3, Fine 15 PCGS. The deep silver-gray and stone-white surfaces are pleasing for the Choice Fine level, despite a minor rim ding near the left (facing) wingtip. Three die pairs are known for the 1805/4 overdate, yet it remains scarce in all grades. From The Merrill Collection. NGC ID# 24EH, PCGS# 39290 Base PCGS# 6070
- 4536 1805/4 O-103, T-11, High R.5, Fine 12 PCGS. This is an overdate variety that is plain to the unaided eye, showing most of the underlying 4 still discernible. Wear is slightly uneven on this piece, leaving the upper obverse border weak, although moderate detail remains in Liberty's hair curls. Silvery interiors cede to deep russet and blue-green border toning.

From The Lona Linda Collection, Part II. NGC ID# 3749, PCGS# 39293 Base PCGS# 6070

4537 1805/4 O-103a, T-11, High R.5, PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen that has been cleaned. A dramatic die state of a rare Overton variety. A triangular retained break affects the first two stars, and a second displaced field break ascends from Liberty's nose. This silver-gray example is sharp for the Fine level but both sides are hairlined. From The Merrill Collection.

4538 1805 O-107, T-7, R.5, VF35 PCGS. Pockets of caramel-gold luster persist on this Choice VF Draped Bust half. The highpoints and open fields are toned gunmetal-gray. Abrasions are limited to a hair-thin mark beneath the eye. A challenging Overton variety. Ex: FUN Signature (Heritage, 1/2010), lot 3420, which realized \$1,725.

From The Merrill Collection. NGC ID# 24EG, PCGS# 39280 Base PCGS# 6069

- 4539 1805 O-107, T-7, R.5, VF35 PCGS. The present coin is just outside the Condition Census for the very scarce to rare Overton-107. The variety is identified by tilted AT letters in STATES. This example exhibits deep gunmetal-gray toning and shows incompleteness of strike on the stars above the eagle. Void of noticeable marks. NGC ID# 24EG, PCGS# 39280 Base PCGS# 6069
- 4540 1805 O-108, T-9, High R.4, XF40 PCGS. A very scarce Overton marriage. The deeply patinated forest-green and gunmetal-gray surfaces are well defined and occasionally minutely granular. No marks are remotely consequential. NGC ID# 24EG, PCGS# 39281 Base PCGS# 6069
- 4541 1805 O-108, T-9, High R.4, XF40 PCGS. Ex: Meyer Collection. From the legendary complete Bust half die variety collection of Charlton E. Meyer. A dove-gray and straw-gold example with stone-white high points. Smooth save for two small roundish marks on the base of Liberty's neck and on the field near her forehead. From The Merrill Collection. NGC ID# 24EG, PCGS# 39281 Base PCGS# 6069
- 4542 1805 O-112, T-2, R.2, VF35 PCGS. A cream-gray Draped Bust type coin that shows pockets of luster within the curls and wings. Close inspection reveals moderate obverse field marks above star 1 and below the chin, but these are consistent with the grade. From The Bayside Collection. NGC ID# 24EG, PCGS# 39286 Base PCGS# 6069

1805 O-112, T-2 Half Dollar, AU50 Cobalt-Blue Rim Toning

4543 1805 O-112, T-2, R.2, AU50 NGC. Tompkins Die Stage 1/1. Star 1 and the 5 in the date are close to the curl and bust. The furthest arrowhead is over the right upright of the N in UNITED. This is the most often seen variety for the 1805 half dollar, but it is also a condition rarity. The Tompkins Condition Census is (63, 58, 55, 53, 50). This piece qualifies at the lower end. Cobalt-blue rim toning merges with central cream-gray patina. Well-defined and lightly clashed with a die crack from S1 to the clouds and S2. NGC ID# 24EG, PCGS# 39286 Base PCGS# 6069

1805 O-113a Half Dollar, AU50 Unknown in Mint State, Census Quality

4544 1805 O-113a, T-1, High R.4, AU50 PCGS. Tompkins Die Stage 1/2. O-113 does not exist even though it is included in the fifth edition of Overton. The difference between O-113 and 113a is listed as 12 arrows on the reverse of 113 and 13 arrows on the reverse of 113a. One would expect die wear or die polishing would remove arrows, not add them. This intermediate die state shows a light crack through the tops of MERI. Deep steel toning includes splashes of gold over the high points. Considerable luster remains on both sides of this piece.

Ex: Robert Zornes (4/2000); Westmoreland County Collection / FUN Signature (Heritage, 1/2008), lot 1363; ANA National Money Show Auction (Bowers and Merena, 3/2009), lot 666.

From The Merrill Collection. NGC ID# 24EG, PCGS# 39288 Base PCGS# 6069

4545 1806/5 O-101, T-6, R.3, XF45 PCGS. A richly detailed example whose unmarked surfaces and ample remaining luster confirm the Choice XF designation. A distinctive variety due to the 06/05 date and the repunched T in UNITED. The second T in STATES is also recut.

Ex: Entlich, White Oak, Gross, and St. Andre Collections (Stack's, 3/2009), lot 3886.

From The Merrill Collection. NGC ID# 24EK, PCGS# 39296 Base PCGS# 6077

4546 1806/5 O-104a, T-1, R.5, VF30 PCGS. Tompkins Die State 3/3. Intermediate between O-104 and O-104a with a cud above the left upright of the U in UNITED. On later strikings, the cud extends over the U to engulf portions of the N, as seen on lot 8255 of our recent January 2018 FUN Signature. A pleasing representative with dusky caramel-gold and powder-blue patina.

From The Merrill Collection. NGC ID# 37BR, PCGS# 39302 Base PCGS# 6077

4547 1806 Knob 6, Large Stars, O-105, T-5, R.2, XF40 PCGS. Arguably O-105a, since a crack passes through all left-side stars. Golden-brown, steel-gray, lavender, and aquamarine toning graces both sides. Relevant marks are limited to the field near the shoulder curl.

Ex: West Palm Beach Signature (Heritage, 7/2009), lot 574.

From The Merrill Collection. NGC ID# 24EJ, PCGS# 39304
Base PCGS# 6075

1806 Small Stars Half Dollar, AU50 Scarce O-106, Knob 6 Die Variety

4548 1806 Knob 6, Small Stars, O-106, T-4, R.4, AU50 PCGS Secure. Tompkins Die Stage 2/1. Six berries on the olive branch instead of the usual five, and the 8 in the date is recut. An elusive die marriage: Steve Tompkins' Condition Census stops at the AU55 level, placing this piece just outside the top pieces known. Bright luster fills the borders and the recessed areas. The major devices are crisply struck, although the sixth cloud is incompletely brought up. This dove-gray example with apricot-orange accents has no distracting abrasions.

Ex: Baltimore Signature (Heritage, 3/2009), lot 1920.

From The Merrill Collection. NGC ID# 24EJ, PCGS# 39306 Base PCGS# 6075

- 4549 1806 Pointed 6, No Stem, O-109, T-15, R.1, VF35 PCGS. A Pointed 6 variety with no olive branch stem through the eagle's claw. This early die state does not show a radial crack from star 12 toward Liberty's neck. Wear is even and central detail is sharp on this Choice VF example. The interiors display champagne-tinted battleship-gray coloration with gold, russet, and aquamarine border toning. Eye appeal is excellent. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073
- 4550 1806 Pointed 6, No Stem, O-109, T-15, R.1, XF40 PCGS. A charming silver-gray representative of the popular No Stem variety. Both sides are free from detractions, and every letter in E PLURIBUS UNUM is clear. The usual die state with a double "collar" clash mark near Liberty's throat.

From The Bayside Collection. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

1806 O-109 Half Dollar, AU53 Pointed 6, No Stem

4551 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU53 PCGS. Tompkins Die Stage 5/3. A faint curving crack extends from the hair ribbon to the E in LIBERTY. The crack through star 12 seen in the latest state is just beginning to form. O-106 is a plentiful die marriage that can be found in most grades. This pieces exhibits light friction over the devices but is attractive with pale gray-gold patina. Slightly incomplete strike.

From The Merrill Collection. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

1806 Bust Half Dollar, XF40 6 Over Inverted 6, O-112

4552 1806 6 Over Inverted 6, O-112, T-12, R.4, XF40 PCGS. CAC. Tompkins Die State 2/1 with a prominent straight crack on the right obverse field to star 11. Rich tobacco-brown, cobalt-blue, and dove-gray toning enriches this well-defined representative. Luster glimmers from design recesses, and apparent marks are limited to a few hair-thin field lines near the left-side obverse stars.

From The Property of a Lady. NGC ID# CZEY, PCGS# 408871 Base PCGS# 6078

4553 1806 Pointed 6, Stem, O-116, T-20, R.3, XF40 NGC. Deep lavender, powder-blue, forest-green, and golden-brown shades encompass this lightly abraded and original early half dollar. All letters in E PLURIBUS UNUM are clear, though the forehead curls and other high points show wear.

From The Sea Cliff Collection. NGC ID# 24EJ, PCGS# 39319 Base PCGS# 6071

1806 Pointed 6, Stem, O-116, T-20, R.3, XF45 NGC. A lovely slate-gray piece that displays a consistent strike and an unblemished reverse. Smooth aside from a pair of light thin marks beneath the ribbon. For O-116, the T in LIBERTY is widely repunched, and a die crack connects the tops of UNITED.

Ex: Palm Beach Signature (Heritage, 3/2006), lot 855; Long Beach Signature (Heritage, 6/2012), lot 3762, which realized \$1,725

From The Bayside Collection. NGC ID# 24EJ, PCGS# 39319 Base PCGS# 6071

1806 O-123, T-23 Half Dollar, AU50 A Rare Pointed 6, With Stem Die Marriage

4555 1806 Pointed 6, Stem, O-123, T-23, Low R.5, AU50 PCGS. Tompkins Die Stage 1/2. The 1 and 6 are attached to the curl and bust. A die crack travels through TED to STAT. The central reverse, namely the eagle's head, always comes incompletely struck. The wings and tailfeathers, stars and hair curls are otherwise boldly defined with minimal friction. Mostly light silver-gray surfaces display occasional golden tones, and the fields maintain a trace of reflectivity. A rare Pointed 6 With Stem die marriage. Ex: Alpine Numismatics (1/2009).

From The Merrill Collection. NGC ID# 24EJ, PCGS# 39329 Base PCGS# 6071

1806 E Over A in STATES, O-124, T-22, R.6, PCGS Genuine. In our opinion, this coin has the details of a VG specimen that has been scratched. A rare Guide Book variety coveted in all grades. Cream-white high points contrast with gunmetal-gray fields. The peripheral legends are bold and the obverse stars are distinct. Ex: Stu Keen Collection (Scotsman, 7/2008), lot 519.

From The Merrill Collection.

4557 1806 E Over A in STATES, O-124, T-22, R.6, PCGS Genuine. The PCGS number ending in .95 suggests Scratched as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen that has been scratched. The E Over A Guide Book variety is represented by a single rare Overton marriage, and is desirable in all grades. The present microgranular stone-gray example has a thin field mark above the hair ribbon and another on the field near the profile. A squarish flan flaw is above star 7. From The Merrill Collection.

1806 E Over A in STATES, O-124, T-22, R.6, VG8 PCGS. The present auction provides an unusual opportunity to select among examples of this rare Guide Book variety. The blundered E in STATES is noticeable with the unaided eye. This is an attractive example with lightly toned fields and motifs. The borders display deep blue-green and autumn-brown toning. One tick noted on the outer point of star 13.

Ex: FUN Signature (Heritage, 1/2013), lot 4264, certified as NGC VG10, which realized \$2,585.

From The Merrill Collection. NGC ID# 24EJ, PCGS# 39330 Base PCGS# 6071

4559 1806 Pointed 6, Stem, O-125, T-14, R.5, VF35 PCGS. Possibly within the Condition Census for the very scarce O-125. Light caramel-gold toning overlies cream-gray surfaces. A thin line near star 13, but otherwise unmarked. Traces of luster linger within the curls.

Ex: Schaumburg Sale (Stack's, 6/2009), lot 393, which realized \$1,208.

From The Merrill Collection. NGC ID# 24EJ, PCGS# 39331 Base PCGS# 6071

1806 Half Dollar, Fine Details Very Rare Overton-126 Pointed 6, Stem

1806 Pointed 6, Stem, O-126, T-26, Low R.7 — Plugged — PCGS Genuine. Fine Details. Plugged and skillfully repaired near the BE in LIBERTY, and opposite near the eagle's tail. According to its appearance as lot 480 in Superior's 10/1989 auction of the Paul Munson Collection, this is the discovery coin for Overton-126, a very rare variety first published 4/1987 in the Bust Half Nut Club's Supplement To Early Half Dollar Die Varieties. The centers are slategray, while the borders display deeper russet shades. From The Loma Linda Collection, Part II.

1806 Pointed 6, Stem, O-127a, T-9, High R.6, AG3 PCGS. An important example with natural medium and dark gray surfaces. The variety is rated High R.6, and less than two dozen are known in all grades. This piece has smooth and problem free surfaces, a remarkable representative for the grade. Ex: Houston Signature (Heritage, 12/2009), lot 654.

From The Merrill Collection. PCGS# 39335 Base PCGS# 6071

1806 Pointed 6, Stem, O-127a, T-9, High R.6 — Repaired — PCGS Genuine. Fine Details. A radial die crack through star 6 is diagnostic for the rare Overton-127a. This untoned example is repaired on Liberty's cheek and neck, and also on the right obverse field. The left obverse field has a pair of pinscratches, and the surfaces are subdued from cleaning.

From The Loma Linda Collection, Part II.

4563 1807 Draped Bust, O-102, T-8, R.2, XF40 NGC. Generous glimpses of luster emerge from the legends, and the stone-gray surfaces are free from detractions. The eagle is well-defined, though Liberty's hair has wear corresponding to the XF level. A late die state with a majority of the dentils absent.

From The Bayside Collection. NGC ID# 24EM, PCGS# 39339 Base PCGS# 6079

4564 1807 Draped Bust, O-103, T-11, R.3, XF40 PCGS. Tompkins Die State 1/2. Pockets of luster illuminate the silver-gray surfaces. Marks are minimal, and all letters in E PLURIBUS UNUM are readable, although some are faint. A problem-free collector coin of this conditionally rare variety. NGC ID# 24EM, PCGS# 39340 Base PCGS# 6079

1807 Draped Bust Half Dollar Overton-105, AU50

- 4565 1807 Draped Bust, O-105, T-4, R.1, AU50 PCGS. Tompkins Die State 4/3. The obverse field and high points are dove-gray, but pockets of bright luster are plentiful, particularly on the reverse. Both sides are impressively devoid of contact, and the eye appeal is undeniable. Overton-105 is readily attributed by the die flaw on the reverse border near 1 o'clock. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079
- 4566 1807 Draped Bust, O-108, T-1, R.3, XF40 PCGS. CAC. Iridescent golden-brown, jade-green, and cream-gray toning embraces this satiny Draped Bust half dollar. The fields appear unabraded, with contact confined to the upper right portion of the shield. The strike is incomplete at the centers, but actual wear is less than implied by the third-party grade.

From The Property of a Lady. NGC ID# 24EM, PCGS# 39348 Base PCGS# 6079

4567 1807 Draped Bust, O-109a, T-2, R.3, XF40 NGC. Tompkins Die State 4+/2. Intermediate between O-109a and O-109'b', with a cud between outer points of star 4. Star 2 is without a cud. Goldenbrown and steel-gray toning encompasses unmarked surfaces. Luster beckons from protected areas, but the centers are softly impressed. Certified in a former generation holder.

From The jwb1040 Collection. NGC ID# 24EM, PCGS# 39350 Base PCGS# 6079

- 4568 1807 Draped Bust, O-110a, T-3, R.2, XF40 PCGS. A number of spindly die cracks across both peripheries confirm the late die state. A lovely Draped Bust type coin with unmarked surfaces and plentiful pockets of luster. Two small, narrow areas of granularity are noted near the U in UNITED and the second S in STATES. NGC ID# 24EM, PCGS# 39352 Base PCGS# 6079
- 4569 1807 Draped Bust, O-110a, T-3, R.2, XF40 NGC. Stone-gray in the centers with wisps of sea-green and sun-gold at the margins. Glimmers of luster brighten the margins, and marks are absent save for a slight reverse rim knock at 6:30.

Ex: New York Signature (Heritage, 3/2012), lot 3396, which realized \$1 380

From The Bayside Collection. NGC ID# 24EM, PCGS# 39352 Base PCGS# 6079

BUST HALF DOLLARS

4570 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, XF40 PCGS. Deep gunmetal-gray and olive-green toning blankets this first-year Capped Bust half dollar. The curls exhibit wear commensurate with the grade. Marks are minimal aside from a curved line within the upper left portion of the shield. Ex: Sheridan Downey, 8/2007.

From The Merrill Collection. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

1807 Capped Bust Half, Choice AU 50 Over 20, Large Stars, O-112

4571 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU55 PCGS. CAC. Attractive autumn-gold toning illuminates the borders of this lightly circulated first-year Capped Bust half dollar. The cheek displays a few faint curved lines, but the surfaces are minimally marked overall. Overton-112 receives its own *Guide Book* listing as the 50 Over 20 variety, since O-111, which shares the same reverse, is the so-called "Bearded Goddess." NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

1807 Capped Bust Half Dollar, Choice AU 50 Over 20, O-112

4572 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU55 PCGS. CAC. Golden-brown and ocean-blue toning adorns the reverse margin, while the obverse is comprehensively toned in gunmetal-blue and cream-gray patina. A slender strike-through (as-made) reaches the S in PLURIBUS, but actual marks are minor and hard to locate.

Ex: FUN Signature (Heritage, 1/2009), lot 2794; Baltimore Signature (Heritage, 3/2009), lot 1934. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

- 4573 1807 Capped Bust, Large Stars, O-114, R.3, VF35 PCGS. Die lumps below the 7 in the date are the pickup point for the scarce Overton-114. This die marriage has its own *Guide Book* listing, as the sole 1807 Capped Bust, Large Stars variety without the 50/20 engraving blunder. This dove-gray half dollar displays moderate wear but is essentially unabraded. NGC ID# 24EN, PCGS# 39361 Base PCGS# 6088
- 4574 1807 Capped Bust, Large Stars, O-114, R.3, XF40 PCGS. Although this die marriage receives its own *Guide Book* listing for its large stars, the pick-up point for the variety is a cluster of die lumps directly below the upright of the 7 in the date. The present aquamarine and stone-gray example is generally free from marks, and although Liberty's curls exhibit wear, much plumage detail remains.

From The Merrill Collection. NGC ID# 24EN, PCGS# 39361 Base PCGS# 6088

- 4575 1807 Capped Bust, Large Stars, O-114, R.3, XF45 NGC. The usual early die state without heavy peripheral cracks on each side. This Choice XF first-year Bust Left half dollar displays natural lavender-gray patina and bold detail. Hints of luster remain in the protected portions of the fields. This is an evenly struck and attractive type coin. NGC ID# 24EN, PCGS# 39361 Base PCGS# 6088
- 4576 1808/7 O-101, R.1, AU50 PCGS. The sole die pairing of the 1808/7 overdate. Light butter-gold toning visits this briefly circulated and relatively unabraded representative. Both sides show cracks and clashes, but the bust-to-star-3 crack seen on most examples is absent here.

From The Merrill Collection. NGC ID# 24ER, PCGS# 39378 Base PCGS# 6091

4577 1808/7 O-101, R.1, AU50 PCGS. Light wheat-gold toning accompanies this unblemished and overdated half dollar. The motifs exhibit high point wear, but luster brightens peripheral elements. The late die state of the *Guide Book* variety, with many cracks and clashes on both sides.

Ex: Mail Bid Sale #36 (Sheridan Downey, 8/2012), lot 2. From The Merrill Collection. NGC ID# 24ER, PCGS# 39378 Base PCGS# 6091

- 4578 1808 O-103, R.1, AU55 PCGS. The AM in AMERICA are joined at the bases on this plentiful type-coin variety. The Choice AU detail are well-defined, and some satiny luster remains on each side. Steel-gray and mahogany-brown toning on each side complements lightly marked surfaces. NGC ID# 24EP, PCGS# 39364 Base PCGS# 6090
- 4579 1809 Normal Edge, O-103, R.1, AU58 PCGS. CAC. A die line above the inner point of star 5 is a pick-up point for O-103, though the obverse die is shared with O-104 and O-105. This goldenbrown and gunmetal-gray near-Mint half dollar shows a faded thin mark on the cheek but is otherwise exemplary.

 Ex: College Collection (Heritage, 1/2015), lot 4837, which realized

From The Merrill Collection. NGC ID# 24ES, PCGS# 39392 Base PCGS# 6092

4580 1809 Normal Edge, O-106, R.3, AU58 PCGS. CAC. The repunched N in ONE is the giveaway for Overton-106. Dovegray and golden-brown toning encompasses this semiprooflike Borderline Uncirculated example. Marks are limited to vertical field lines beneath the N in UNUM. Liberty's curls show only a trace of wear. NGC ID# 24ES, PCGS# 39395 Base PCGS# 6092

1809 Half Dollar, Lovely Choice AU O-109, III Edge

- 4581 1809 III Edge, O-109, R.3, AU55 NGC. CAC. Ex: Logan. An early die state without the breaks that later appear through AMERICA and the arrowheads. Excellent eye appeal reflects the lavender-gray patina covering much of this Choice AU half dollar, yielding to tan-gold color over minimally worn high points. Partial luster is more vibrant on the obverse. Both sides are smooth and well-struck without distracting imperfections. NGC ID# 24ES, PCGS# 39386 Base PCGS# 6094
- 4582 1811 Large 8, O-104a, R.1, AU58 PCGS. The late die state with several lengthy and interesting obverse die cracks. Both sides exhibit deep lavender-red, battleship-gray, and forest-green patina. The curls near the ear show a trace of wear, but luster fills the borders and motifs, and no marks remotely merit mention. NGC ID# 24EU, PCGS# 39426 Base PCGS# 6096

- 4583 1811 Small 8, O-105a, R.2, AU55 PCGS. A descending die crack through the top of STATES confirms the late die state of Overton-105. This Small 8 coin is well-detailed and retains partial luster in the fields. Light clash marks are visible in the fields, and both sides display a hint of light champagne toning. NGC ID# 24EU, PCGS# 39428 Base PCGS# 6097
- 4584 1811 Small 8, O-108, R.2, MS62 NGC. The tine from the right (facing) wingtip identifies the dies as Overton-108. This steel-gray and powder-blue example displays vibrant luster, and is smooth save for a single thin field line near the N in UNITED. Ex: Americana Sale (Stack's-Bowers, 1/2013), lot 12401, which realized \$2,291.25.

From The Bayside Collection. NGC ID# 24EU, PCGS# 39431 Base PCGS# 6097

4585 1811 Small 8, O-108, R.2, MS62 PCGS. This example shows heavy clash marks and substantial die fatigue on both sides, but the late die state crack through UNITED on the reverse has not yet formed. The surfaces exhibit vibrant luster, shining through a veil of light golden toning. Stars 5 through 7 are weakly defined, but the strike is otherwise sharp.

Ex: FUN Signature (Heritage, 1/2015), lot 4845. NGC ID# 24EU,

Ex: FUN Signature (Heritage, 1/2015), lot 4845. NGC ID# 24EU, PCGS# 39431 Base PCGS# 6097

1811 O-108a Half Dollar, MS62 Small 8, Lustrous and Lightly Toned

4586 1811 Small 8, O-108a, R.2, MS62 PCGS. Light to medium aquamarine and rose-gold toning swathes this lustrous and crisply struck example. Unabraded save for unobtrusive marks on the cheek near the ear. A late die state with clashed fields and peripheral elements drawn toward the rim. A die crack runs through UNITED S. Certified in a first generation holder. From the Merrill Collection. NGC ID# 8Z63, PCGS# 39432 Base PCGS# 6097

1811 Half Dollar, Original AU53 Small 8, O-112a

4587 1811 Small 8, O-112a, R.5, AU53 PCGS. CAC. A die crack extends from the curls below and to the right of Liberty's hair curls through star 9. This is a late die state with an additional crack through D STATES. Strongly detailed golden-gray centers merge with shades of cobalt-blue and violet patina around the borders, generating fantastic original aesthetic appeal.

Ex: 74th Anniversary Sale (Stack's, 11/2009), lot 1375.

From The Merrill Collection. NGC ID# 9BNV, PCGS# 39439 Base PCGS# 6097

1812/1 O-102a Half, AU55 Small 8, Sharp and Lustrous

4588 1812/1 Small 8, O-102a, R.2, AU55 PCGS. CAC. The 8 is small but the 2 in the date is definitely more interesting. It looks huge and ungainly in comparison to the other digits, awkwardly hiding an underdigit 1 that remains visible at the left edge of the numeral. This is the late die state O-102a, with blurry die cracks coursing through the obverse, joined by die clashing. The outer elements (stars and legends) are drawn to the edges, where nearly all of the dentils are missing on both sides. Still, the surfaces are Choice and frosted with much mint luster remaining. Golden-gray toning displays rose highlights. Population: 23 in 55, 47 finer (1/18).

From The Property of a Lady. NGC ID# 24EY, PCGS# 39444 Base PCGS# 6101

1812/1 O-102a Half, AU58 Small 8, Sharp and Lustrous

4589 1812/1 Small 8, O-102a, R.2, AU58 PCGS. CAC. The late die state of this marriage shows a fine crack through the date. The Small 8 1812/1 overdate half dollar is a popular variety, and the present piece is an attractive example with only a trace of wear. The surfaces are frosty and lustrous with light gold toning on the obverse. The reverse is brilliant — essentially untoned, with nearly full luster. A CAC-endorsed example of the Small 8 overdate. Population: 19 in 58 (1 in 58+), 23 finer. CAC: 7 in 58, 8 finer (1/18).

From The Merrill Collection. NGC ID# 24EY, PCGS# 39444 Base PCGS# 6101

4590 1812 Large 8, O-104a, R.1, AU55 PCGS. CAC. A heavy horizontal die line extends through the upper part of the left (facing) wing on the reverse of this plentiful variety. A later die state, the reverse is cracked through TED STATES, but the obverse crack of the latest state (now O-104b) is not present. This pleasing piece has pale gray surfaces with light gold toning over considerable satin luster. NGC ID# 24EW, PCGS# 39448 Base PCGS# 6100

1812 Large 8 Half Dollar, MS64 Beautifully Toned O-104a Example

4591 1812 Large 8, O-104a, R.1, MS64 PCGS. This highly lustrous near-Gem displays beautiful old-time toning. The ocean-blue border exhibits tinges of lavender as it transitions to orange-gold in the centers. Some grayish overtones appear on the high points of the devices. There are no distracting abrasions. The reverse is rotated nearly 90 degrees clockwise.

From The Bayside Collection. NGC ID# 24EW, PCGS# 39448 Base PCGS# 6100

1812 Large 8, O-107 Half Dollar, AU58 Still-Lustrous, Pleasingly Toned Surfaces

4592 1812 Large 8, O-107, R.1, AU58 PCGS. An early die state without any hint of the usually encountered "mound" die break near the left wing. This lustrous half dollar displays autumn-gold, blue-green, lavender, and stone-gray toning. Unmarked and attractive surfaces display incompleteness on the right-side stars. Struck from rotated dies.

Ex: ANA Signature (Heritage, 8/2014), lot 4403.

From The Merrill Collection. NGC ID# 24EW, PCGS# 39452 Base PCGS# 6100

4593 1812 Large 8, O-107, R.1, MS62 NGC. Light wheat-gold and silver-gray toning visits this lustrous and lightly abraded half dollar. The strike is bold except on a few right-side stars. The prime die state without the usually encountered die lump or mound over the left (facing) wing.

From The Bayside Collection. NGC ID# 24EW, PCGS# 39452 Base PCGS# 6100

4594 1812 Large 8, O-108a, R.2 — Struck 5% Off-Center — Fine 12 PCGS. Nicely off-center toward 10:30. The wear is uneven due to the partial absence of a protective rim. The upper reverse is sharpest, and the upper left obverse is weakest. The stone-gray surfaces are free from detractions.

From The Merrill Collection.

4595 1813 O-105, R.1, AU55 PCGS. A brilliant, unabraded, and partly lustrous Choice AU half dollar. Though a late die state with many sets of clashes, a crack near UNITED, and peripheral elements drawn toward the edge, no crack through AMERICA is present, and we cannot call it O-105a. NGC ID# 24EZ, PCGS# 39463 Base PCGS# 6103

4596 1813 O-107a, R.1, AU55 PCGS. Gunmetal-gray toning embraces this lightly circulated but unblemished representative. The eagle's head is lightly brought up but other details are bold. The die crack across the lower reverse is usual for the die marriage, and identifies the later Overton variety.

Ex: King's Collection of Capped Bust Halves (Bowers and Merena, 3/2009), lot 992.

From The Merrill Collection. NGC ID# 24EZ, PCGS# 39468 Base PCGS# 6103

4597 1813 O-107a, R.1, AU58 PCGS. Rich caramel-gold and steel-blue toning accompanies this exceptionally unabraded Borderline Uncirculated half dollar. An earlier die state than usual, without a crack between 50 C and the arrowheads, although cracks surround most of the reverse periphery and the fields are prominently clashed. NGC ID# 24EZ, PCGS# 39468 Base PCGS# 6103

1813 O-108 Half Dollar, AU58 Vibrant Mint Luster, Golden Border Toning

4598 1813 O-108, R.3, AU58 PCGS. A centering dot within the left part of the fifth horizontal crossbar confirms the O-108 reverse. The slightest bit of friction on the cheek and on the curl behind the Y in LIBERTY prevents a full Uncirculated assessment. Mint luster remains vibrant on each side. The centers display minimal toning, while the borders exhibit lovely golden accents.

From The Merrill Collection. NGC ID# 24EZ, PCGS# 39469 Base PCGS# 6103

4599 1813 O-110, R.1, AU55 PCGS. Golden-brown borders frame cream-gray fields and motifs. A kidney-shaped planchet flaw is noted on Liberty's jaw, but the surfaces are virtually void of contact. The obverse exhibits multiple sets of bold clash marks. Certified in an old green label holder.

From The Merrill Collection. NGC ID# 24EZ, PCGS# 39472 Base PCGS# 6103

1814/3 Half Dollar, AU53 O-101a, Guide Book Variety

4600 1814/3 O-101a, R.2, AU53 PCGS. The late die state with a crack through the lower part of UNITED and into STATES. Light golden-gray color accents this still-lustrous overdated half with deeper yellow and violet hues noted close to the rims. A strong example of this popular *Guide Book* variety.

Ex: Houston Signature (Heritage, 12/2009), lot 667

From The Merrill Collection. NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

1814/3 Half Dollar, Near-Mint O-101a, Conditionally Rare

- 4601 1814/3 O-101a, R.2, AU58 PCGS. CAC. Only a single die pair struck the 1814/3, a popular *Guide Book* variety. This partly lustrous near-Mint example displays rich cobalt-blue and sea-green toning. Free from abrasions, though the surfaces exhibit prominent die cracks and clash marks characteristic of the late die state. Rare in the present quality. CAC: 4 in 58, 6 finer (1/18). NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106
- 4602 1814 O-104a, R.2, AU53 PCGS. This late state of Overton-104 shows a heavy die crack along the upper-right reverse border. On the obverse, thin die cracks connect Liberty's nose to star 3. This About Uncirculated coin displays original russet toning and has hints of field luster. The upper-left obverse stars are slightly weak, but the central devices are boldly struck. Little high-point wear is present. NGC ID# 24F3, PCGS# 39479 Base PCGS# 6105
- 4603 1815/2 O-101, R.2, PCGS Genuine. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has altered surfaces. Liberty's neck and chest shows signs of smoothing, as does the adjacent obverse field. Nonetheless, a fairly sharp example of the stopper to a date collection of Capped Bust halves. From The jwb1040 Collection.
- 4604 1815/2 O-101, R.2 Surfaces Smoothed PCGS Genuine. XF Details. Iridescent lemon-gold, lavender-red, and blue-green toning accompanies this key-date half dollar. The surfaces are somewhat bright and unnaturally prooflike, and close study reveals patches of hairlines. The field near the eagle's head shows signs of subtle smoothing. From The Property of a Lady.
- 4605 1817/3 O-101, R.3, XF40 PCGS. Although both sides show clash marks, this is the early die state without a crack through the 5 in 50 C. This overdated half dollar exhibits prooflike luster throughout the margins. The obverse field displays deep cobalt-blue and plum-red patina. The borders show powder-blue and straw-gold shades. Unblemished and impressive.

From The Property of a Lady. NGC ID# 24F7, PCGS# 39511 Base PCGS# 6111

1817/3 O-101 Half Dollar, AU50 Deep Multicolor Patina

4606 1817/3 O-101, R.3, AU50 PCGS. A popular *Guide Book* overdate. A trace of friction appears over sharply struck motifs, including fully raised stars. Fully patinated autumn-brown, cobaltblue, and lavender. A distinctive spot of gunmetal toning on the field near the cap will identify this coin in future auction appearances. Certified in a green label holder.

Ex: Hamilton Collection (Heritage, 8/2016), lot 4557.

From The Merrill Collection. NGC ID# 24F7, PCGS# 39511 Base PCGS# 6111

1817/3 Half Dollar, AU53 O-101a, Sharply Struck

4607 1817/3 O-101a, R.2, AU53 PCGS. This later die state is seen slightly more often than the earlier state without a crack through the top of 50. The underdigit 3 is plainly visible. Each side displays attractive, natural patina. The reverse is more gold than gray and retains surprisingly vibrant luster. The devices exhibit a needle-sharp impression, save for the wingtips. Friction is limited to the cheek and bust.

From The Merrill Collection. NGC ID# 24F7, PCGS# 39512 Base PCGS# 6111

4608 1817 181.7, O-103, R.2, XF45 PCGS. The popular "Punctuated Date" Guide Book variety with a die dot between the 17. Goldenbrown fields and gunmetal high points contribute to the eye appeal of this clashed and inoffensively abraded representative.
From The Merrill Collection. NGC ID# 24F6, PCGS# 39510 Base PCGS# 6110

4609 1817 Single Leaf Below Wing, O-106a, R.4, AU50 PCGS. The Single Leaf variety is one of the few lapped die listings in the *Guide Book*, along with the No D 1922 cent and the various partial leg Buffalo nickels. The Single Leaf is a scarce late die state of the more available Overton-106. The die marriage is also interesting for its prominent "comet" die break from Liberty's cap. An attractive wheat-gold, stone-gray, and sea-green example.

From The Merrill Collection. NGC ID# 24F6, PCGS# 39516 Base PCGS# 6109

4610 1817 O-110a, R.2, AU58 PCGS Secure. Ex: Link. A die scratch from the fletchings above the left (facing) claw is the pick-up point for Overton-110a. This splendid representative exhibits substantial cartwheel sheen and is devoid of apparent abrasions. The fields exhibit lightly blended wheat-gold and stone-gray shades, while the margins are apple-green.

Ex: Dr. Charles Link; Regency Auction XVI (Legend, 2/2016), lot 223.

From The Merrill Collection. NGC ID# 24F6, PCGS# 39503 Base PCGS# 6109 4611 1818/7 Large 8, O-101, R.1, AU53 PCGS. The top of the underdigit 7 is obvious as two "horns" protruding above the second 8. The upright of the 7 is visible as a straight line within the lower loop. This lightly abraded and pleasing half dollar is brilliant save for a hint of rose-gold toning along the right borders.

From The Property of a Lady. NGC ID# 24FA, PCGS# 39540 Base PCGS# 6115

4612 1818/7 Large 8, O-101, R.1, AU55 PCGS. The 7 underdigit is obvious. Cream-gray and almond-gold with significant luster about the stars, legends, and motifs. Smooth overall with one thin faded vertical mark on the neck.

Ex: Boston ANA Signature (Heritage, 8/2010), lot 4870. From The jwb1040 Collection. NGC ID# 24FA, PCGS# 39540 Base PCGS# 6115

4613 1818 O-107, R.1, AU58 PCGS. Lemon-gold toning adorns the margins of this otherwise brilliant Bust half dollar. Marks are essentially absent, though a few trivial flan imperfections accompany the portrait. Luster illuminates design elements. Ex: Allgood Collection (Heritage, 1/2011), lot 10715. From The Merrill Collection. NGC ID# 24F9, PCGS# 39523 Base PCGS# 6113

1818 O-111 Half Dollar, MS63 Vibrant Mint Luster

4614 1818 O-111, R.1, MS63 NGC. A short die line protruding from the top of Liberty's cap identifies this available variety. This goldentoned MS63 example displays satiny mint luster, and the evenly struck design elements show sharp definition. Only light handling marks limit the grade, and the eye appeal is pleasing.

From The Bayside Collection. NGC ID# 24F9, PCGS# 39528 Base PCGS# 6113

1818 Half Dollar, XF40 Very Scarce Overton-115

4615 1818 O-115, R.5, XF40 PCGS. The stone-gray surfaces show moderate wear and lack any mentionable marks. Most examples of this very scarce marriage are Overton-115a with a jagged die crack near star 7 and Liberty's eye and forecurl. The present piece is an early die state that shows the eventually bisecting crack only between the shoulder curl and the rim at 5 o'clock. O-115a also has a lengthy, curving crack up from the bust tip that is absent here, though the light diagonal crack above the first 18 is appear.

From The Loma Linda Collection, Part II. PCGS# 39534 Base PCGS# 6113

4616 1819/8 Small 9, O-101, R.1, AU58 PCGS Secure. 30th Anniversary Green Label Holder. Splashes of forest-green toning dominate the fields, but the motifs are stone-white. A lightly abraded representative that boasts substantial luster and attractive eye appeal. An early die state without reverse cracks.

From The Merrill Collection. NGC ID# 24FC, PCGS# 39555

Base PCGS# 6118

4617 1819/8 Large 9, O-103a, R.4, AU50 PCGS. Lengthy reverse die cracks confirm this Overton subvariety. A decidedly better die marriage, relative to the fairly common O-102, O-104, and O-105 Large 9 overdates. Cream-gray centers are framed by golden-brown and power-blue borders. Lightly circulated but free from any noticeable marks.

From The Lona Linda Collection, Part II. NGC ID# 24FC, PCGS# 39558 Base PCGS# 6119

4618 1820/19 Square Base 2, O-101, R.2, AU50 PCGS. Bright luster surrounds the stars and fills the legends of this lightly circulated and minimally abraded representative. The sole die pair for the Square Base 2 overdate, and thus requisite for a complete collection by *Guide Book* variety.

From The Merrill Collection. NGC ID# 24FE, PCGS# 39572 Base PCGS# 6125

4619 1820/19 Curl Base 2, O-102, R.1, AU50 PCGS. Overton-102 is the sole Curl Base 2 1820 overdate, and thus has attained its own Guide Book entry. The overdate is very prominent. This example has untoned fields and devices, though the borders offer autumn-brown, plum-red, and ocean-blue toning. Marks are trivial except for a nick near star 10. Housed in a green label holder. Ex: Guilford Collection (J.J. Teaparty, 12/2016).

From The Merrill Collection. NGC ID# 24FE, PCGS# 39574 Base PCGS# 6126

1820/19 Curl Base 2 Half Dollar, O-102, AU58 Two-Digit Overdate, Strong Eye Appeal

- 4620 1820/19 Curl Base 2, O-102, R.1, AU58 PCGS. As the only overdated 1820 variety with a Curl Base 2, the O-102 is easy to identify. Its two-digit overdate is blatant and of unending appeal to Bust half enthusiasts. This frosted and lustrous example is nearly full Mint State, with a few areas of rub on the otherwise problemfree surfaces. The outer devices are pinpoint sharp, while slight blending of the central high points contributes to the assigned grade. Slate-gray accents add a dramatic counterpoint to the starksilver centers. NGC ID# 24FE, PCGS# 39574 Base PCGS# 6126
- 4621 1820 No Serifs on E's, O-107, R.5, Fine 15 PCGS. The rare Overton-107 has its own *Guide Book* listing as the sole die marriage with defective A and E letter punches in the reverse peripheral legend. The present gunmetal-gray Choice Fine half dollar has exemplary surfaces save for a few minor hair-thin field marks above the eagle's head.

From The Merrill Collection. NGC ID# 24FD, PCGS# 39571 Base PCGS# 6124

1820 O-107 Half Dollar, VF25 Scarce No Serifs on E's Variety

4622 1820 No Serifs on E's, O-107, R.5, VF25 PCGS. The E's lack serifs and the A's are missing their right feet, distinguishing O-107 from O-106, which shares the same obverse with a square-based, curl-topped 2. This piece obviously saw a fair amount of circulation — the devices are well-worn - but each side is smooth with violet-gray patina that deepens around the borders. Abundant feather detail remains.

From The Merrill Collection. NGC ID# 24FD, PCGS# 39571 Base PCGS# 6124

- 4623 1821 O-101a, R.1, AU55 PCGS. CAC. A thin die crack runs through the top of UNITED STATES on Overton-101a. This Choice AU example displays sharp detail and partial field luster. Both sides have attractive, uniform olive-gray patina and smooth surfaces. NGC ID# 8YFF, PCGS# 39576 Base PCGS# 6128
- 4624 1821 O-101a, R.1, AU58 PCGS. Iridescent jade-green, golden-brown, plum-red, and dove-gray toning encompasses this partly lustrous and minimally marked near-Mint half dollar. Although outside of the Condition Census, the present piece will please the veteran collector. NGC ID# 8YFF, PCGS# 39576 Base PCGS# 6128
- 4625 1821 O-103a, R.4, AU58 PCGS. CAC. The A and E punches used for the reverse legend of the O-103 reverse die were defective, showing broken lower serifs. O-103a is distinguished from its early die state counterpart by an arcing die crack that connects the 21 in the date, the lower hair curls, and the back of Liberty's cap. Much luster remains in the fields of this piece amid dappled russet and gold toning. The strike is sharp and little wear is present. NGC ID# 24FF, PCGS# 39579 Base PCGS# 6128
- **4626 1821 O-104a, R.2, AU58 PCGS.** Short die lines at the base of Liberty's neck identify O-104, while a die crack above STATES confirms the late die state variety. This near-Mint 1821 half dollar is sharp on the stars and central devices, showing luminous satin fields and warm golden-gray and peach toning. The surfaces are attractive free of bothersome abrasions.

Ex: Denver ANA Signature (Heritage, 8/2017), lot 4976.

From The Merrill Collection. NGC ID# 24FF, PCGS# 39581 Base PCGS# 6128

4627 1821 O-105, R.1, AU58 NGC. CAC. This is the early die state without the die crack through TAT in STATES. This Choice AU example is richly toned in gold and gray with much underlying luster. The originality is unmistakable. NGC ID# 24FF, PCGS# 39582 Base PCGS# 6128

1822/1 O-102 Half Dollar, AU53 Boldly Struck and Nicely Toned

4628 1822/1 O-102, High R.4, AU53 PCGS. Raised dots on the upper-inside points of star 12 are diagnostic of this scarce die marriage. Demand for this variety is always strong because of its inclusion in the Guide Book. Ice-blue rim toning progresses toward peach-gold and violet-gray centers, delivering top-quality eye appeal. The devices are razor-sharp with remarkably little evidence of friction. One of the finest examples to appear at auction in recent years. Ex: Purchased from Teletrade (11/2009).

From The Merrill Collection. NGC ID# 24FH, PCGS# 39605 Base PCGS# 6130

4629 1822 O-104, R.3, AU58 PCGS. CAC. A charming half dollar that boasts golden-brown fields and forest-green borders. The fields are smooth, and Liberty's face shows only a couple of minuscule ticks. Stack's cataloged the present coin twice as "Very Choice Brilliant Uncirculated."

Ex: 65th Anniversary Sale (Stack's 10/2000), lot 928; Queller Family Collection (Stack's, 10/2002), lot 195; Keith Davignon; Mail Bid Sale #39 (Sheridan Downey, 8/2014), lot 97.

From The Merrill Collection. NGC ID# 24FG, PCGS# 39589 Base PCGS# 6129

1822 Half Dollar, O-104, MS64 Excellent Surface Quality for the Grade

4630 1822 O-104, R.3, MS64 NGC. The N in UNITED is positioned slightly higher than the U and I on this variety. As a date, the 1822 half dollar is scarce in MS64 and rare finer. This piece displays sharp detail and glistening, unabraded surfaces. Attractive gunmetal-blue toning on each side yields occasional olive and gold accents. Eye appeal is excellent for the grade. Census: 52 in 64 (2 in 64+, 1 in 64 ★), 11 finer (12/17).

From The Bayside Collection. NGC ID# 24FG, PCGS# 39589 Base PCGS# 6129

- 4631 1822 O-106a, R.3, AU58 PCGS. CAC. Comprehensive bluegreen, golden-brown, and plum-red toning encompasses this momentarily circulated half dollar. The surfaces are smooth and the eye appeal is substantial. Nicer than many pieces certified as Mint State. NGC ID# 24FG, PCGS# 39592 Base PCGS# 6129
- 4632 1823 O-105, R.1, MS61 NGC. A center dot within the upper left portion of the shield attributes this coruscating and well struck half dollar. Medium to deep walnut-brown and lavender toning drapes both sides. Impressively devoid of marks. Housed in a circa-2000 holder. NGC ID# 24FJ, PCGS# 39608 Base PCGS# 6131

- 4633 1823 O-112, R.1, MS62 NGC. Exquisite peach-gold and oceanblue patina endows the borders of this lustrous and lovely half dollar. Liberty's profile is nicely strike doubled, and the only reportable imperfection is a Mint-made flan flaw near the obverse center. Ex: Philadelphia ANA (Stack's Bowers, 8/2012), lot 9052, which realized \$1,586.25.
 - From The Bayside Collection. NGC ID# 24FJ, PCGS# 39618 Base PCGS# 6131
- 4634 1823 O-112, R.1, MS62 PCGS. Silver-gray toning embraces this unblemished and coruscating representative. An early die state without clash marks from the wing near the profile. Liberty's profile is strike doubled.

Ex: Allgood Collection (Heritage, 1/2011), lot 3681; Eagle One Collection, Part II (Heritage, 7/2016), lot 3552.

From The Merrill Collection. NGC ID# 24FJ, PCGS# 39618 Base PCGS# 6131

- 4635 1824/1 O-101a, R.2, AU58 PCGS. Peripheral reverse die cracks identify the late state of the Overton-101 variety. This near-Mint example displays satiny luster with just a trace of high-point friction on the devices. Light golden interiors cede to amber and ocean-blue border toning.
 - From The Jamestown Collection, Part II. NGC ID# 24FK, PCGS# 39641 Base PCGS# 6139
- 4636 1825 O-110, R.2, MS62 PCGS. Dove-gray high points, autumnbrown fields, and blue-green borders confirm the originality of this satiny and minimally marked Bust half dollar. One small spot is southeast of the 5 in the date.
 - From The Merrill Collection. NGC ID# 24FL, PCGS# 39657 Base PCGS# 6142
- 4637 1825 O-116, R.3, MS63 NGC. A tine from the left edge of the scroll is the pick-up point for attributing Overton-116. Lustrous and unabraded with a full strike except on the upper-left obverse stars. An exceptional example of this moderately scarce variety. Ex: Central States Signature (Heritage, 4/2012), lot 4422, which realized \$1,840.
 - From The Bayside Collection. NGC ID# 24FL, PCGS# 39663 Base PCGS# 6142
- 4638 1826 O-117a, R.2, MS62 NGC. The later die state with a die crack across the lower right reverse periphery. This satiny example features dusky olive-gray toning, and the strike is bold aside from the stars. Surprisingly free from abrasions. Ex: Houston Signature (Heritage, 12/2009), lot 682.
 - From The jwb1040 Collection. NGC ID# 49FX, PCGS# 39690 Base PCGS# 6143
- 4639 1826 O-118a, R.1, MS60 PCGS. The die crack through the tops of STATES and ERICA identifies the Overton subvariety. A nearly unmarked silver-gray example with an even strike and a minutely granular appearance. Luster fills the borders and devices. Certified in an old green label holder. NGC ID# 24FM, PCGS# 39692 Base PCGS# 6143
- 4640 1827 Square Base 2, O-109, Low R.4, MS62 PCGS. CAC. Splendid sea-green and caramel-gold toning adorns this minimally marked and attractive Bust half dollar. The strike is good despite flatness on a majority of stars. A scarcer Overton variety distinguished by a vertical trail of die dots below Liberty's earlobe. From The Bayside Collection. NGC ID# 24FN, PCGS# 39702 Base PCGS# 6144
- 4641 1827 Square Base 2, O-115, R.2, MS61 NGC. A lustrous and refreshingly unabraded Capped Bust half. Close to brilliant, though the borders offer wheat-gold and sea-green tints. The dies were out of parallel, which causes softness of impression on the eagle's claws and upper left stars. NGC ID# 24FN, PCGS# 39710 Base PCGS# 6144
- 4642 1827 Square Base 2, O-120a, R.3, MS62 PCGS. Attractive peach-gold, forest-green, and magenta toning fills the borders of this coruscating Bust half dollar. Marks are inoffensive for the designated grade. The 1827 is famous for its large number of die marriages, but the present variety is more distinctive than most, courtesy of the many bold die lines beneath the bust tip. NGC ID# 24FN, PCGS# 39718 Base PCGS# 6144

- 4643 1827 Square Base 2, O-124a, High R.5, XF40 PCGS. The late die state of the equally rare O-124, identified by the absence of obverse milling. The stars are drawn to the edge, consistent with a worn-out obverse die. This walnut-brown and gunmetal-gray representative has unmarked surfaces and pleasing sharpness.
 From The Merrill Collection. NGC ID# 24FN, PCGS# 39723 Base PCGS# 6144
- 4644 1828 Curl Base 2, No Knob, O-105, R.5, XF40 PCGS. A challenging Overton variety. In UNITED, the U is repunched and the T is low. Three marriages share this reverse, but among those, only O-105 has a No Knob obverse. Sea-green and olive-brown toning encompasses moderately marked and faintly hairlined surfaces. From The Merrill Collection. NGC ID# 24FR, PCGS# 39758 Base PCGS# 6148
- 4645 1828 Curl Base 2, Knob, O-107a, R.7 Cleaning PCGS Genuine. XF Details. Overton-107 is readily collectible, but its late die state counterpart, O-107a, is a great rarity. The present piece exhibits both a descending die crack through the date and a radial crack through the final 8 in the date into Liberty's drapery. The pearl-white surfaces are hairlined and glossy but lack noticeable marks. Ex: Charlton Meyer; David Kahn (3/2013). From The Merrill Collection.

1828 Half Dollar, Very Good Struck 5% Off Center O-116, Square Base 2, Small 8s

4646 1828 Square Base 2, Small 8s, Large Letters, O-116, R.2 — Struck 5% Off Center — VG8 NGC. Struck several degrees off center toward 1:30. Portions of right-side elements, such as the stars and letters, are off the flan. The right-side dentils are absent. This lavender-gray and caramel-gold Bust half dollar is occasionally microgranular but free from any detracting marks.

Ex: Chris Pilliod, 9/1996; Russell J. Logan Collection (Bowers and Merena, 11/2002), lot 2568; Hamilton Collection, Part II (Heritage, 9/2016), lot 4053.

From The Merrill Collection.

- 4647 1829 Small Letters, O-105, R.1, MS62 PCGS. CAC. A delightful representative that exhibits unblemished semiprooflike fields and light wheat-gold toning. The strike is sharp aside from occasional peripheral elements. The uppermost arrow shaft is recut, diagnostic for the early die state of Overton-105.
 - From The Bayside Collection. NGC ID# 8YZY, PCGS# 39784 Base PCGS# 6154
- 4648 1829 Small Letters, O-115, R.1, MS63 PCGS. Overton-115 is identified by a recut lowest arrowhead. Light wheat-gold toning adorns this lustrous and unmarked Capped Bust type coin. The strike is crisp save for the upper left stars and the eagle's claws. The eye appeal is exceptional for the MS63 level. NGC ID# 24FS, PCGS# 39800 Base PCGS# 6154

1830 Half Dollar, MS63 Overton-101, Small 0

4649 1830 Small O, O-101, R.1, MS63 PCGS. CAC. The A in STATES is recut and partially filled, diagnostic for Overton-101. A splendidly toned example that has sea-green, straw-gold, russet-brown, and steel-gray shades throughout both sides. The fields are uncommonly smooth, and the cheek shows only unobtrusive marks. A quality addition to an early silver type set.

From The Property of a Lady. NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

1830 Small 0 Half Dollar, MS64 Overton-101

4650 1830 Small O, O-101, R.1, MS64 NGC. The A in STATES is lightly recut and partially filled on this variety. The present coin shows minor softness on the left shield corner but is sharp throughout the stars and the eagle's talons. Satin luster yields wisps of golden toning and has only minor abrasions. A pleasing Small O type coin. From The Bayside Collection. NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

1830 Half Dollar, Lustrous MS64 Small 0, O-103

4651 1830 Small 0, O-103, R.1, MS64 PCGS. The star points are round, and the upright of the 5 and the first A in AMERICA are recut. Smooth surfaces are minimally toned, mostly brilliant, with blushes of complimentary gold color. Two pedigree-identifying toning spots appear before Liberty's eye. Strongly defined on the portrait and eagle. An attractive Capped Bust half dollar. From The Bayside Collection. NGC ID# 24FU, PCGS# 39812

From The Bayside Collection. NGC ID# 24FU, PCGS# 39812 Base PCGS# 6156

the sole 1830 Large Letters, Small 0, O-114, R.5, VG10 PCGS. As the sole 1830 Large Letters die marriage, the rare Overton-114 is key to a *Guide Book* variety set of Bust half dollars. This is a circulated but problem-free example that contrasts stone-white high points with silver-gray fields.

From The Merrill Collection. NGC ID# 24FU, PCGS# 39836 Base PCGS# 39835

1830 O-114 Half Dollar, XF40 Large Letters, Small 0

4653 1830 Large Letters, Small 0, O-114, R.5, XF40 PCGS. Overton-114 is one of the scarcest die varieties of the 1830 Capped Bust half dollar. A distinctive feature is the Large Letters reverse, which shows the D in UNITED and the first S in STATES closely spaced. This lightly circulated example is well-detailed and satiny, showing pewter-gray interiors with deeper olive-green border patina.

From The Merrill Collection. NGC ID# 24FU, PCGS# 39836 Base PCGS# 39835

- 4654 1830 Small 0, O-117, R.2, MS62 PCGS. Powder-blue patina encompasses this lustrous and unblemished Capped Bust half dollar. The high points show slight blending, but the strike is otherwise bold. A late die state with dentils absent near 12 o'clock on the obverse and 6 o'clock on the reverse. NGC ID# 24FU, PCGS# 39828 Base PCGS# 6156
- 4655 1830 Large 0, O-121, R.3, MS62 NGC. The borders display colorful shades of rose-red and powder-blue. The centers are stonegray. The satiny surfaces lack distracting abrasions. Several of the stars are incompletely brought up, but the remainder of the strike is bold.

From The Bayside Collection. NGC ID# 24FU, PCGS# 39832 Base PCGS# 6157

4656 1830 Large 0, O-121, R.3, MS63 PCGS. O-121, R.3. This is the scarcest Large 0 variety. Liberty's mouth is noticeably open. The left stars are flatly struck, as usually seen, but the central details are bold. Lovely mahogany-brown and lavender accents add to the aesthetic appeal of this lustrous specimen.

Ex: Dallas Signature (Heritage, 10/2009), lot 658, which realized \$2,185

From The Bayside Collection. NGC ID# 24FU, PCGS# 39832 Base PCGS# 6157

4657 1830 Large 0, O-122, R.1, MS62 NGC. Dappled orange-gold and powder-blue patina graces this coruscating Capped Bust type coin. The right-side stars are soft, but most design elements are well-impressed. Minor marks on the left obverse field preclude an even finer grade.

Ex: Baltimore Auction (Stack's Bowers, 6/2012), lot 2679, which realized \$1,116.25.

From The Bayside Collection. NGC ID# 24FU, PCGS# 39833 Base PCGS# 6157

1830 O-123 Half Dollar, MS64 Crisply Struck, Extensive Toning

4658 1830 Large 0, O-123, R.1, MS64 NGC. CAC. Ex: "Col." E.H.R. Green, Eric P. Newman Collection. A die crack from the bottom of star 6 to the top of the L in LIBERTY is characteristic of the Overton pairing, one of four that possess a Large 0 in the date. This crisply struck example exhibits satin sheen and nearly comprehensive cobalt-blue and tan-brown toning. Each side has small areas of lighter stone-gray coloring. The surfaces are uniformly smooth. Liberty's nose is strike doubled.

Ex: "Colonel" E.H.R. Green; Eric P. Newman Collection Part II (Heritage, 11/2013), lot 33648; New York Signature (Heritage, 10/2015), lot 4538. NGC ID# 24FU, PCGS# 39834 Base PCGS# 6157

- 4659 1831 O-105, R.3, MS62 PCGS. Prominent die lines below the drapery at the lower left obverse and characteristic of this obverse die, and multiple vertical shield lines extending into the horizontal lines confirm the attribution of this die marriage. This piece has satiny silver luster with delicate champagne toning on the obverse and light gold toning on the reverse. NGC ID# 24FV, PCGS# 39841 Base PCGS# 6159
- 4660 1831 O-110, R.2, MS63 NGC. Medium sun-gold toning dominates this lustrous example, although the high points exhibit steel-blue. The strike is sharp in the centers but peripheral elements show softness. There are no noteworthy marks.

Ex: Long Beach Signature (Heritage, 5/2012), lot 3805, which realized \$1,495

From The Bayside Collection. NGC ID# 24FV, PCGS# 39846 Base PCGS# 6159

4661 1831 O-118, R.3, MS62 PCGS. A satiny olive-green and gunmetal-gray example. Lustrous and refreshingly devoid of marks. Only stars 5 and 6 lack a sharp impression. The relatively scarce O-118 is often attributed by a cluster of parallel die lines in front of Liberty's bust truncation. NGC ID# 24FV, PCGS# 39855 Base PCGS# 6159

1831 O-119 Half Dollar, MS64 Lustrous and Appealing

4662 1831 O-119, R.3, MS64 NGC. Dr. Glenn Peterson attributes O-119 by an "inverted comma" engraver line from the right edge of the shield. Early die state coins also show die lines between the bust tip and the dentils, but they are lapped off on this later-state example. A wisp of rose and olive toning graces otherwise brilliant near-Gem surfaces. Booming luster and smooth surfaces ensure the eye appeal. The major devices are well struck, though the stars are lightly impressed.

Ex: Philadelphia Signature (Heritage, 8/2012), lot 3415.

From The Bayside Collection. NGC ID# 24FV, PCGS# 39856 Base PCGS# 6159

- 4663 1832 Small Letters, O-108, R.3, MS62 PCGS. Frosty silver luster appears on both sides of this light gray Capped Bust half dollar that exhibits hints of champagne toning and a few darker toning spots on the obverse. The reverse also has wispy champagne toning. A pleasing piece that exhibits trivial, grade-consistent marks. NGC ID# 24FW, PCGS# 39866 Base PCGS# 6160
- 4664 1832 Small Letters, O-110, R.1, MS63 PCGS. Medium silver-gray and tan-gold toning graces lustrous and minimally abraded surfaces. The strike is bold except on the UR in PLURIBUS. The tiny "spike" from the top of Liberty's cap is characteristic of Overton-110. From The Bayside Collection. NGC ID# 24FW, PCGS# 39868 Base PCGS# 6160

1832 Half Dollar, MS63 O-113, Small Letters

- 4665 1832 Small Letters, O-113, R.2, MS63 PCGS. CAC. The malformed arrowheads are the pick-up point for Overton-113. A lustrous battleship-gray half dollar with a few small peripheral areas of deeper charcoal toning. The fields are uncommonly free from contact. A later die state with the stars drawn toward the edge. From The Bayside Collection. NGC ID# 24FW, PCGS# 39871 Base PCGS# 6160
- 4666 1832 Small Letters, O-114, High R.4, AU55 PCGS. Both O-113 and O-115 are common, but O-114, made from the obverse die of the former and the reverse die of the latter, is very scarce. Lustrous and lightly toned with smooth fields and a few hair-thin lines on Liberty's face. A late obverse die state with all stars drawn toward the edge and an "orange peel" texture near the cap and bust tip. From The Loma Linda Collection, Part II. NGC ID# 24FW, PCGS# 39873 Base PCGS# 6160

1832 Bust Half Dollar, O-118, MS-63 Lovely Original Toning

4667 1832 Small Letters, O-118, R.1, MS63 PCGS. CAC. One of three "Laced Lips" varieties for the 1832 date, this Overton-118 shows a straight die line joining the lower lip to the chin. The upper-left shield corner appears doubled, the result of a Mint engraver's handwork that reshaped that small area of the die. Steel-blue accents complement golden-gray toning with soft mint luster emerging from less-intense areas of the natural, old-time patina. A sharp strike exist throughout this original, Select Uncirculated example. From The Property of a Lady. NGC ID# 24FW, PCGS# 39877 Base PCGS# 6160

1832 Small Letters Half, MS64 O-122, CAC-Endorsed

- 4668 1832 Small Letters, O-122, R.1, MS64 PCGS. CAC. The Overton-122 variety always has an up-and-down strike, somewhat weak at the margins and scroll, while sharp at the drapery and eagle. This smooth and lustrous example displays blue, ivory, and reddishgold toning over essentially unmarked, frosted surfaces. A tiny tine from the top-right shield corner and a rounded nub off the lowerright serif of the first T in STATES are diagnostic of the reverse, while the obverse shows the 3 in the date tipped noticeably left. This coin is tied for third in the Condition Census for the variety according to the Parsley reference and Stephen Herrman's latest update (1/18). NGC ID# 24FW, PCGS# 39883 Base PCGS# 6160
- 4669 1833 O-107, R.3, MS62 PCGS. Die lines in the lower-right recesses of the shield are weak on this late-die state coin, although still visible under magnification. This champagne-toned Mint State type coin displays surprisingly few major abrasions for the grade. Minor strike weakness appears on the left-hand stars and the eagle's left (facing) wing. NGC ID# 24FX, PCGS# 39895 Base PCGS# 6163
- 4670 1833 O-113, R.2, MS62 PCGS. Attractive ocean-blue and rose-gold toning endows this coruscating and colorful half dollar. Infrequent small marks are scattered, but only those on the jaw and chin merit mention.
 Ex: FUN Signature (Heritage, 1/2006), lot 2686; Central States Signature (Heritage, 4/2008), lot 1082, which realized \$1,265.
 From The Bayside Collection. NGC ID# 24FX, PCGS# 39902
 Base PCGS# 6163
- 4671 1833 O-115, High R.5, VF30 PCGS. The second-rarest die marriage of the date, Overton-115 is identified by the unusual crude shape of the flag of the 5 in 50 C. This midgrade stone-gray example has generally pleasing surfaces, though we note minor field marks east of the date and beneath the right scroll end. From The Merrill Collection. NGC ID# 4ECW, PCGS# 39904 Base PCGS# 6163

1834 O-102 Half Dollar, MS64 Large Date, Large Letters

4672 1834 Large Date, Large Letters, O-102, R.1, MS64 NGC. Minor repunching on the date is the pick-up point for Overton-102. This is a magnificent Choice Capped Bust type coin that boasts sweeping luster, exemplary surfaces, and consistent blended gunmetal-blue and straw-gold toning. The eye appeal surpasses the numerical grade, and a premium will be required to possess this prize. From The Bayside Collection. NGC ID# 24FY, PCGS# 39906 Base PCGS# 6164

1834 Half Dollar, MS64 O-102, Large Date, Large Letters

4673 1834 Large Date, Large Letters, O-102, R.1, MS64 PCGS. CAC. A beautiful Capped Bust type coin. Sun-gold borders cede to pearl-gray fields and devices. Uncommonly free from contact, and vibrant cartwheel luster contributes further to the eye appeal. The strike is crisp except on two right-side stars and the curls above the ear. For all Large Date, Large Letters varieties, CAC: 13 in 64, 8 finer (1/18). From The Property of a Lady. NGC ID# 24FY, PCGS# 39906 Base PCGS# 6164

4674 1834 Large Date, Small Letters, O-105, R.1, MS63 PCGS. A splendid Select silver type coin. Dusky autumn-gold toning graces the obverse. The reverse is minimally toned. Lustrous and virtually unabraded with exceptional eye appeal. Nicely struck despite blending on a few left-side stars.

From The Bayside Collection. NGC ID# 24FY, PCGS# 39909 Base PCGS# 6165

1834 O-105 Half Dollar, MS64 Large Date, Small Letters

4675 1834 Large Date, Small Letters, O-105, R.1, MS64 NGC. The 4 in the date and ATES are recut. A die line appears between (STATE) S O(F). The originality of this near-Gem half dollar is undeniable. Light gold dominates with added glints of blue and violet. The right-side stars are strong, as are the lower curls, while the left (facing) wing is incomplete. Shimmering mint luster radiates from each side. A pedigree-identifying milling mark occurs above 34. From The Bayside Collection. NGC ID# 24FY, PCGS# 39909 Base PCGS# 6165

- 4676 1834 Large Date, Small Letters, O-107, R.1, MS63 NGC. Satin luster traverses this essentially unabraded Bust half dollar. Most of the coin is pearl-gray, but a minutely granular area with deeper toning is noted on the lower and left portions of the reverse. A curved line within the M in AMERICA is an identifier for this frequently encountered Overton die marriage. NGC ID# 24FY, PCGS# 39911 Base PCGS# 6165
- 4677 1834 Small Date, Small Letters, O-110, R.3, MS62 PCGS. An unabraded pearl-gray and straw-gold half dollar. The luster is good, and the strike shows minor inexactness. Overton-110 is readily attributed by its lengthy and elliptical reverse die crack. From The Merrill Collection. NGC ID# 24FY, PCGS# 39914 Base PCGS# 6166
- 4678 1834 Small Date, Small Letters, O-116, R.1, MS62 NGC. Light to medium caramel-gold and steel-gray toning graces this satiny and unblemished example. Occasional peripheral elements are incompletely brought up, but the major devices are well struck.

 From The jwb1040 Collection. NGC ID# 24FY, PCGS# 39921 Base PCGS# 6166

4679 1834 Small Date, Small Letters, O-117, R.2, MS62 PCGS. Light to medium butter-gold toning graces this highly lustrous representative. No marks are remotely relevant, though a small spot is noted on the field below the eagle's beak. Triple-clashed beneath the right (facing) wing, but neither side shows cracks.

From The Merrill Collection. NGC ID# 24FY PCGS# 3992

From The Merrill Collection. NGC ID# 24FY, PCGS# 39922 Base PCGS# 6166

1834 O-119 Half Dollar, MS64 Small Date, Small Letters

1834 Small Date, Small Letters, O-119, R.4, MS64 PCGS. For competitive Capped Bust half dollar variety collectors, this near-Gem O-119 representative is tied for finest for the die marriage, according to Stephen Herrman's semi-annual publication. The strike exhibits incompleteness on the curls and left wing feathers but is otherwise well-detailed. Smooth surfaces are awash in soft mint luster and feature daubs of golden-russet and gunmetal patina. An appealing example.

From The Bayside Collection. NGC ID# 24FY, PCGS# 39924 Base PCGS# 6166

- 4681 1835 O-101, R.1, MS62 NGC. Medium honey-gold, lilac, and navy-blue patina graces the obverse. Deep walnut-brown, forest-green, and lavender toning blankets the reverse. The strike lacks precision on star 7 and Liberty's forehead. A satiny example with few marks and good eye appeal. NGC ID# 24FZ, PCGS# 39927 Base PCGS# 6168
- 4682 1836 Lettered Edge, O-108a, R.2, MS62 NGC. The popular blundered date *Guide Book* variety. This exceptionally nice representative displays dove-gray, sea-green, and golden-brown toning about the borders, more prominently on the reverse. The centers are stone-white with gunmetal high points.

From The Bayside Collection. NGC ID# 4EWC, PCGS# 39957 Base PCGS# 6169

1836 Half Dollar, MS64 O-112, Lettered Edge Condition Census Quality

4683 1836 Lettered Edge, O-112, R.1, MS64 PCGS. Splashes of caramel-gold and blue-green toning endow this lustrous and well-preserved near-Gem. The strike is good except on the LUR in PLURIBUS. Among the finest survivors of this die marriage. A diagonal die line between the lowest two arrowheads is the pickup point for Overton-112, per the handy attribution guide by Dr. Glenn Peterson. NGC ID# 24G2, PCGS# 39959 Base PCGS# 6169

1836 O-115 Half Dollar, MS64 Lettered Edge, Pleasing Surfaces

4684 1836 Lettered Edge, O-115, R.3, MS64 PCGS. A steeply rising die line within the eagle's shield is the pick-up point for the moderately scarce Overton-115. This Choice representative offers medium chestnut-gold and dove-gray toning. A lens reveals only trivial imperfections. A late die state without any obverse dentilation. Early die state pieces exist with bold dentils, such as lot 4997 in our August 2015 ANA Signature.

From The Bayside Collection. NGC ID# 24G2, PCGS# 39950 Base PCGS# 6169

4685 1836 Lettered Edge, O-122, R.2, MS62 PCGS. Chestnut-gold and aquamarine toning graces this lustrous and minimally marked Capped Bust half. The strike is incomplete on the highpoints of Liberty's curls, but the eye appeal is nonetheless impressive.

From The Merrill Collection. NGC ID# 24G2, PCGS# 39963 Base PCGS# 6169

REEDED EDGE HALF DOLLARS

1836 Reeded Edge Half, XF40 GR-1, First Steam Press Issue

4686 1836 Reeded Edge, GR-1, R.2, XF40 NGC. The reeded edge half dollar was the first issue of that denomination struck on the new Philadelphia Mint steam press. The traditional mintage figure is a mere 1,200 pieces, but the number of survivors suggest a somewhat greater production. This representative is stone-gray aside from a blush of golden patina within the shield. We note a few rim imperfections, along with several moderate marks in the upper-reverse field. NGC ID# 2U28, PCGS# 531046 Base PCGS#

1837 GR-5 Reeded Edge Half Dollar, MS63 Unclashed Reverse Die State

4687 1837 GR-5, R.1, MS63 PCGS. A very late die state of this obverse and an early stage of the reverse, without clashing visible between the eagle's right (facing) talons and body. The distinctive obverse die crack from the rim at the bust tip now extends through star 8 to the rim. As usual, the reverse is rotated about 30 degrees counterclockwise. This Select example is satiny and well-detailed save for weakness on the eagle's head and neck, which is typical of the variety. The interiors are tinted champagne-gold, while the borders exhibit powder-blue. NGC ID# 24G4, PCGS# 531051 Base PCGS# 6176

4688 1837 GR-13, R.1, MS62 PCGS. The "Lines thru ED" variety. A sharply struck cream-gray and straw-gold half dollar with freckles of lavender and blue-green along the borders. The satiny surfaces display only minor marks. PCGS# 531059 Base PCGS# 6176

4689 1837 GR-15, R.3, MS62 NGC. Only a hint of golden patina accompanies this second-year type coin. Dynamic cartwheel luster and generally unabraded surfaces confirm the quality. The strike is incomplete on the left-side borders, and the reverse exhibits mintmade roller marks near 6:30 and 11:30.

From The jwb1040 Collection. PCGS# 531061 Base PCGS# 6176

4690 1838 GR-13, R.1, MS60 PCGS. Autumn-brown and sea-green toning invigorates the peripheries. Sharply struck and lustrous with a few small deep russet spots. A die crack through UNITED STATES OF helps attribute the variety. Housed in an old green label holder.

Ex: Hamilton Collection (Heritage, 8/2016), lot 4721, which realized \$1,149.15.

From The Merrill Collection. NGC ID# 24G5, PCGS# 531094 Base PCGS# 6177

4691 1838 GR-15, R.3, MS62 PCGS. This is mid-to-late die stage of the GR-15 die marriage, with a pie-shaped retained cud at the junction of two die cracks above the cap near star 7. Struck from lapped dies, other diagnostics of the variety are difficult to discern, but enough are visible to confirm the die marriage. Medium iridescent toning provides substantial eye appeal across both sides of this interesting and attractive 1838 Reeded Edge half.

From The Property of a Lady. NGC ID# 24G5, PCGS# 531096 Base PCGS# 6177

1838 GR-15 Half Dollar, MS63 Smooth and Lustrous, Attractively Toned

- 4692 1838 GR-15, R.3, MS63 PCGS. CAC. Dappled chestnut-brown and lilac toning allows ample areas of bright silver luster to shine through the natural patina of this GR-15 example. Struck from a mid-to-late die stage, the coin has a prominent crescent die crack that runs across the top of the cap. Two diagnostic die lines on the reverse shield are well-hidden by the toning, but appear under strong light at the proper viewing angle. Dot-like lumps on the bust and drapery add confirmation to the attribution. This original and appealing Reeded Edge half rightfully displays CAC endorsement. Population (all varieties): 70 in 63, 73 finer. CAC: 14 in 63, 26 finer (1/18). NGC ID# 24G5, PCGS# 531096 Base PCGS# 6177
- **4693 1838 GR-16, R.4, MS62 PCGS.** The base of the second 8 is clearly repunched, as are the left-side stars. Housed in a green label holder, the present example ranks among the finest known for the scarce *Cherrypickers*'-worthy variety. Lightly toned and satiny with minor marks on the central obverse.

From The Merrill Collection. PCGS# 531097 Base PCGS# 6177

- 4694 1839-O GR-1, R.1, VF30 PCGS. The late die state with advanced cracks on both sides. The deep gunmetal-gray surfaces show moderate high point wear but show only inconsequential contact. The sole collectible New Orleans issue of the Draped Bust design. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181
- 4695 1839-O GR-1, R.1, VF30 PCGS. This midgrade half dollar is mostly pearl-gray but does show peripheral tan-brown and navyblue toning on the reverse. Repunching on the mintmark is no longer apparent on this late die state example, which features several prominent cracks on both sides.

From The Bayside Collection. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

4696 1839-O GR-1, R.1, VF30 PCGS. The late die state with many advanced cracks. The cloudy stone-gray surfaces are without any consequential abrasions. Considerable hair and plumage detail remains on this midgrade New Orleans type coin.

Ex: Los Angeles ANA Auction (Bowers and Merena, 8/2009), lot

From The Merrill Collection. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

- 4697 1839-O GR-1, R.1, XF40 ANACS. A late die state with biplanar cracks through ERICA. Cream-gray, wheat-gold, ocean-blue, and lavender toning drapes unmarked and appealing surfaces. The curls and wings display moderate wear. Housed in a small-sized holder. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181
- 4698 1839-O GR-1, R.1, XF45 NGC. Numerous bold die cracks confirm the usual late die state of this popular New Orleans type variety. A predominantly pearl-white representative with peripheral tan-brown and forest-green toning. The reverse field is slightly bright above the eagle's shoulders.

From The Sea Cliff Collection. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

4699 1839-O GR-1, R.1, PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. A hairlined but well-defined and relatively unabraded New Orleans type coin. The borders have retoned in attractive golden-brown shades.

- 4700 1839-O GR-1, R.1 Cleaned PCGS Genuine. AU Details. The mintmark is repunched south, and both sides display advanced die cracks, all as usual for the only collectible New Orleans Capped Bust issue. This stone-white example is over-dipped, but the borders offer golden-brown toning, and there are no relevant abrasions. From The Property of a Lady.
- 4701 1839-O GR-1, R.1, AU50 PCGS. The cracked late die state usual for GR-1. The mintmark is clearly repunched south. Rich creamgray toning blankets this lightly worn example. Unblemished aside from a faded field mark behind the ribbon end.
 From The Merrill Collection. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181
- 4702 1839-O GR-1, R.1, AU50 PCGS. A lightly toned New Orleans half dollar with hints of dove-gray on the high points and glimpses of golden-brown near the borders. Depressions are noted above the D and L in DOL. The mintmark is repunched southwest, usual for the '39-O. Both sides exhibit lengthy peripheral cracks. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

SEATED HALF DOLLARS

4703 1839 No Drapery, WB-101, Die Pair 1, R.3, XF45 PCGS. Coveted by collectors and important for type, the first-year No Drapery Seated halves are scarce in circulated grades and very scarce when Uncirculated. This Choice XF example is an ideal collector-grade representative, with gun-barrel blue and olive-gold toning surrounding brief silver centers. A few light lines are hidden in the toning, but exceptionally sharp definition remains on the devices. Ex: Houston Signature (Heritage, 12/2015), lot 4389.

From The Merrill Collection. NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

1839 No Drapery Seated Half Dollar, AU53 Scarce Design Subtype

- 4704 1839 No Drapery, WB-101, Die Pair 2, R.3, AU53 NGC. This one-year No Drapery type is highly sought-after in all grades but only infrequently encountered in pleasing condition. This AU representative offers sharp design elements and uniform olive-gray and dusky lavender toning. Hints of luster remain in the reverse fields. NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230
- 4705 1839 With Drapery, WB-102, Die Pair 7, R.3, MS61 NGC. A hint of golden toning precludes full brilliance, but this first-year Seated half offers satiny, unblemished surfaces. Portions of the eagle are incompletely impressed. Concentric lathe lines on the drapery over Liberty's legs provide the pick-up point for the Bill Bugert die pair. From The Bayside Collection. NGC ID# 24GL, PCGS# 572001 Base PCGS# 6232
- 4706 1839 With Drapery, WB-102, Die Pair 7, R.3, MS62 PCGS. Light butter-gold toning visits this lustrous and well-struck first-year Seated half. The fields exhibit the anticipated number of minor abrasions. Scarce in Mint State, and encapsulated in a green label holder.

From The Merrill Collection. NGC ID# 24GL, PCGS# 572001 Base PCGS# 6232 4707 1840-(O) Medium Letters, WB-101, Die Pair 4, R.3, AU50 PCGS. The New Orleans mintmark moved from the obverse to the reverse in 1840. An 1840 obverse was paired with a reverse from 1839, thus the coin has no mintmark, despite its Louisiana origin. Medium Letters and specific die cracks on the reverse confirm the variety. Well defined and minimally abraded with forest-green borders and lavender-gray centers.

From The Merrill Collection. NGC ID# 24GP, PCGS# 572003

Base PCGS# 6233

1841 Half Dollar, MS63 Semiprooflike Fields WB-102, Repunched Date

4708 1841 Repunched Date, WB-102, Die Pair 1, R.3, MS63 PCGS. The 18 in the date are doubled at their bases on this obverse die. On the reverse, the vertical shield lines extend below the shield border. This Select Uncirculated example has semiprooflike fields and sharp design elements. Blue and gold border toning surrounds champagne-tinted interiors. Minimal abrasions are present. Population: 7 in 63, 9 finer (12/17).

From The Bayside Collection. NGC ID# 24GR, PCGS# 572008 Base PCGS# 6236

4709 1841-O Large O, WB-101, Die Pair 11, R.3, MS62 PCGS. Many interesting reverse die cracks lock down the attribution. Sharply struck and satiny with peripheral apple-green, lilac, and wheat-gold toning. Free from any noticeable abrasions. The 1841-O is available in VF but rare in Uncirculated condition.

From The Property of a Lady. NGC ID# 24GS, PCGS# 572009 Base PCGS# 6237

4710 1842 Small Date, Large Letters, WB-101, Die Pair 6, R.3, MS62 PCGS. Lightly toned and lustrous with a good strike and no more than the expected number of unimportant field marks. An unlisted late die state with a crack through the base of the date. The reverse is practically riddled with die cracks, a delight for the specialist. From The Property of a Lady. NGC ID# 24GT, PCGS# 572011 Base PCGS# 6240

1842 Small Date Half Dollar, MS63 Reverse of 1842 Rarely Seen in Mint State

4711 1842 Small Date, Large Letters, WB-101, Die Pair 6, R.3, MS63 PCGS. The 1842 Small Date Seated half is a favorite issue among collectors and is significantly scarcer than its Medium Date counterpart. Wiley and Bugert list two Small Date obverse dies and six reverse dies comprising seven different marriages; this piece represents the more often seen WB-101 marriage, but it remains elusive in all grades, and any Small Date half in Mint State is a major rarity. This lovely, satiny 1842 half dollar is mostly untoned in the centers with gradually deepening golden-rose and blue patina around the margins. The surfaces are sharply struck throughout and show light, grade-consistent abrasions.

Ex: FUN Signature (Heritage, 1/2007), lot 4460; Houston Signature (Heritage, 11/2007), lot 60647; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98644.

From The Bayside Collection. NGC ID# 24GT, PCGS# 572011 Base PCGS# 6240

4712 1842 Medium Date, Large Letters, WB-104, Die Pair 10, R.3, MS63 PCGS. Numerous interesting die cracks allow for ready attribution. A lustrous and virtually brilliant Select half dollar. Only star 8 lacks a precise strike. Delicate obverse hairlines are all that deny a finer grade.

From The Property of a Lady. NGC ID# 24GU, PCGS# 572013 Base PCGS# 6239

1842-O Small Date Half, WB-101, XF45 Deep Original Patina, Reverse of 1839

4713 1842-O Small Date, Small Letters, WB-101, Die Pair 2, R.5, XF45 PCGS. The Small Date, Small Letters half dollar is a rare variety by any standard and one of the top rarities of the entire New Orleans Seated coinage series. Just 203,000 pieces were struck and remarkably few pieces survive in XF or finer grades. This example shows a few small marks plus a pair of small, rectangular planchet defects — one below the knee, and the other above. Rich, gunmetal-gray toning covers both sides of this Choice XF example, with sharp definition remaining on the stars, Liberty's hair strands, and the eagle's neck feathers. Population: 6 in 45, 8 finer (1/18). From The Merrill Collection. NGC ID# 24GV, PCGS# 572015 Base PCGS# 6238

1843-O WB-101 Seated Half, MS63+ Scarce Variety, Strong Luster

- 4714 1843-O WB-101, Die Pair 8, R.5, MS63+ PCGS Secure. A very late die stage of this scarce New Orleans variety. Both the obverse and reverse display numerous die cracks, while the obverse die is heavily rusted. Central die failure causes lack of definition below the left (facing) wing and eagle's leg, as well as in Liberty's gown above the shield. Dappled gray, lavender, and gold toning augments strong silver luster on both sides, with sharpness on the motifs that is not affected by die deterioration. This is the sole PCGS Plusgraded example for the grade level, regardless of variety. Population (all varieties): 18 in 63 (1 in 63+), 5 finer (1/18). NGC ID# 24GY, PCGS# 572023 Base PCGS# 6244
- 4715 1844-O WB-101, Die Pair 5, R.2, MS62 Prooflike NGC. Several distinctive peripheral die cracks allow quick attribution of the die marriage. This stone-white New Orleans half has reflective fields and surprisingly few abrasions. The strike is intricate, though Liberty's foot support is mostly lapped away. PCGS# 572030 Base PCGS# 6246
- 4716 1844-O Doubled Date, FS-301, WB-103, Die Pair 22, R.4, VF30 PCGS Secure. 30th Anniversary Green Label Holder. The "cover variety" of the classic 1993 Wiley-Bugert reference. The dramatic misplaced and repunched date brings an enormous premium over the regular '44-O, and ensures a separate *Guide Book* listing. This is a smooth steel-gray midgrade example that shows all letters in LIBERTY sharp. Protected areas of the eagle display charcoal toning.

From The Merrill Collection. NGC ID# 24H2, PCGS# 145817 Base PCGS# 6247

- 4717 1845-O Repunched Date, WB-109, Die Pair 4, R.4, MS63 PCGS. CAC. Richly dappled apple-green, cherry-red, and golden-brown toning encompasses this fully struck example. Smooth except for delicate marks on the upper reverse field. An early die state of the "Footless I" variety that shows a point in place of the left foot of the 1 in the date. The horizontal die lines on the central reverse are reminiscent of those seen on the 1844-O silver dollar. From The Property of a Lady. PCGS# 572040 Base PCGS# 6249
- 4718 1846 Tall Date, WB-106, Die Pair Unlisted, MS62 PCGS. The obverse toning displays attractive, dappled shades of slate-blue and reddish-tan augmented by iridescent rainbow shades around the raised elements. The reverse is more lightly toned in pleasing lilac-gold hues with faintly iridescent borders. Noticeably prooflike fields surround frosted devices of this Tall Date example. A few light field marks account for the MS62 grade.

We are unable to match the obverse die to any of those listed in the comprehensive 2016 Bugert reference, nor can we locate a similar die pairing in our archives. Bill Bugert viewed the images of the coin, and commented:

"This coin may be an early die state of one of the known dies, but I don't think so without closer scrutiny (i.e. stereomicroscope). To sum it up, I am unsure which die marriage this is and I am leaning towards a new die marriage."

The present unexpected and interesting 1846 Tall Date variant will undoubtedly grab the attention of Seated half specialists and variety collectors.

From The Property of a Lady. PCGS# 572045 Base PCGS# 6252

1846 Seated Half, MS63 WB-106, Tall Date Variant

- 4719 1846 Tall Date, WB-106, Die Pair 15, R.3, MS63 PCGS. A moderately available variety, but seldom seen in Select or finer Mint State conditions. The current example displays satiny luster with just a touch of lavender-gray color across smooth and attractive surfaces. The strike is sharp across minimally marked motifs, while the fields show just a few light abrasions. This Tall Date variety is identified by a short tine to the upper left of the serif on 1, recutting on the crosslet 4 at the outer vertical serif, and a distinctive pattern of die cracks on the obverse and reverse. Population: 10 in 63 (1 in 63+), 7 finer (1/18). PCGS# 572045 Base PCGS# 6252
- 4720 1846-O Tall Date, WB-106, Die Pair 27, R.4, AU50 PCGS. Lovely sea-green, canary-gold, and golden-brown toning overlies pearl-gray surfaces. A lightly circulated example that has a minimally marked appearance. For the 1846-O, the Tall Date is significantly scarcer than the Medium Date. Population: 2 in 50, 8 finer (1/18). From The Property of a Lady. NGC ID# 24H9, PCGS# 572053 Base PCGS# 6256
- 4721 1847 WB-101, Die Pair 11, R.3, MS63 PCGS. A bold striking with satiny luster and glimpses of chestnut-gold obverse peripheral toning. Despite a mintage of more than one million pieces, Mint State survivors are legitimately scarce. Population: 13 in 63, 15 finer (12/17).

Ex: Central States Signature (Heritage, 5/2004), lot 7403, which realized \$1,150.

From The Bayside Collection. NGC ID# 24HA, PCGS# 572054 Base PCGS# 6257

- 4722 1847/6 WB-102, FS-301, Die Pair 9, R.5, Good 4 PCGS. Remnants of an underdate 1 46 are visible in the field, southwest of the primary date on this rare and popular variety. All legends are clear except LIBERTY. Stars 5 to 9 are well outlined, while other stars are missing their outer point, faint, or absent altogether. From The Merrill Collection. NGC ID# 24HA, PCGS# 147889 Base PCGS# 6258
- 4723 1848-O WB-101, Die Pair 12, R.3, AU58 PCGS. CAC. Lustrous, untoned, and unmarked with a good strike except on the upper obverse elements. The 1848-O is much scarcer in Mint State than its mintage might suggest, and even near-Mint examples are elusive. Housed in a green label holder.
 From The Merrill Collection. NGC ID# 24HD, PCGS# 572065

Base PCGS# 6261

4724 1848-O WB-101, Die Pair 26, R.4, MS61 PCGS. CAC. Apricot-gold and powder-blue patina graces this lightly toned and satiny New Orleans No Motto type coin. A tick below star 7 merits only passing mention. Despite its high mintage, the 1848-O is rare in Mint State.

From The Property of a Lady. NGC ID# 24HD, PCGS# 572065 Base PCGS# 6261

4725 1848-O WB-101, Die Pair 5, R.3, MS62 NGC. Caramel-gold toning adorns this lustrous and nearly unmarked New Orleans half dollar. The strike shows minor incompleteness, but the eye appeal surpasses the numerical grade. Despite a generous mintage, the 1848-O is very scarce in Mint State.

Ex: Americana Sale (Stack's Bowers, 1/2012), lot 8660, which realized \$1,236.25.

From The Bayside Collection. NGC ID# 24HD, PCGS# 572065 Base PCGS# 6261

1849 Half Dollar, MS64 Collectible Gold Rush Era Issue

- 4726 1849 WB-104, Die Pair 11, R.3, MS64 PCGS. This was the final year of significant half dollar production at the Philadelphia Mint during the early Gold Rush period. Design detail is nearly full on each side. Lustrous, silvery surfaces offer blushes of golden patina within many of the device recesses. A die crack joins the bases of the date digits. The only obvious marks appear on Liberty's left arm and in the field above the eagle's head. Population (all varieties): 28 in 64 (2 in 64+), 2 finer (1/18).
 - From The Bayside Collection. NGC ID# 24HE, PCGS# 572069 Base PCGS# 6262
- 4727 1849 Repunched Date, WB-103, Die Pair 9, R.3, MS62 PCGS. The 1 in the date is broadly repunched north, and less-obvious doubling also exists on the 849. One other 1849 variety shows a dramatically doubled date (the rare WB-102), yet the current coin is scarce and desirable in its own right. Silver luster beams brightly across the sharply struck surfaces, with almond-gold accents over the pearlescent-gray fields and devices. Population (all 1849 varieties): 11 in 62, 42 finer (12/17).
 - Ex: Houston Signature (Heritage, 12/2015), lot 4396. PCGS# 572070 Base PCGS# 6262
- 4728 1850 WB-102, Die Pair 2, R.3, MS60 PCGS. A semiprooflike half dollar with light golden-brown and sea-green toning in protected areas. Minor hairlines determine the grade. WB-102 is the Repunched 0 variety, but this example is a middle die state without visible repunching. Housed in a green label holder.

 From The Merrill Collection. NGC ID# 24HG, PCGS# 572075
- 4729 1851 WB-101, Die Pair 7, R.5. AU53 PCGS. A lightly circulated better date half dollar with minor field hairlines and peripheral sea-green toning. A small rim cud beneath the L in HALF provides a key identifier for Die Pair 7, along with a series of delicate obverse die cracks. Certified in a green label holder. From The Merrill Collection. NGC ID# 24HJ, PCGS# 572078 Base PCGS# 6266

1851 Seated Half Dollar, MS62 WB-101, Scarce Early 1850s Issue

Base PCGS# 6264

4730 1851 WB-101, Die Pair 6, R.4, MS62 PCGS. Scarcer than its 200,750-piece mintage would suggest, the 1851 has become a favorite issue for collectors over the past 20 years. The California Gold Rush upset the ratio of silver-to-gold into disarray, with half dollars soon exceeding their face value. Many pieces were hoarded and melted. This survivor is crisply struck for the issue, with full details on the eagle's claws and Liberty's hair tresses. Frosted creamwhite surfaces show unbroken mint luster that glows from smooth, minimally marked surfaces. NGC ID# 24HJ, PCGS# 572078 Base PCGS# 6266

- 4731 1851 Repunched Date, WB-103, Die Pair 2, R.4, XF45 PCGS. CAC. Deep blue-green toning consumes the obverse. The reverse is mostly stone-gray but shows rose-red and navy-blue at the borders. The 1851 is a low mintage date, and many pieces were undoubtedly melted by speculators, since the bullion value exceeded face upon issue.
 - From The Merrill Collection. NGC ID# 24HJ, PCGS# 572080 Base PCGS# 6266
- 4732 1851 Repunched Date, WB-103, Die Pair 3, R.4 Cleaned PCGS Genuine. AU Details. The 1851 is rarer than its mintage of 200,750 pieces might suggest. Many pieces may have been melted by speculators, since bullion value exceeded face. This pearl-white example has been dipped, but is relatively unabraded and retains substantial luster. The repunching is minor, noticeable as a chip above the flag of the second 1 in the date. From The Property of a Lady.
- 4733 1851-O WB-101, Die Pair 4, R.3, MS61 PCGS. A splendid prooflike example. The strike is intricate, the fields show few detractions, and the light chestnut-gold toning contributes further to the eye appeal. Certified in a green label holder. From The Merrill Collection. NGC ID# 24HK, PCGS# 572082 Base PCGS# 6267

1851-O Half Dollar, Scarce MS64 Original Speckled Toning Ex: Eliasberg

4734 1851-O WB-101, Die Pair 4, R.3, MS64 PCGS. CAC. Ex: Eliasberg. A splendid example of this scarce New Orleans issue, with speckled blue-gray obverse toning and much underlying mint brilliance evident. The reverse displays shimmering mint luster with dappled blue and russet shades around the periphery. Sharply struck throughout and problem-free, the coin is semireflective in the fields and fully struck. Housed in a previous generation green label holder with CAC endorsement. Population: 8 in 64, 5 finer. CAC: 2 in 64, 5 finer (1/18).

Ex: Nicholas Petry Collection (S.H. and H. Chapman, 5/10/1893); J.M. Clapp; John H. Clapp; Clapp Estate, (1942), to Louis E. Eliasberg, Sr.; Eliasberg II (Bowers and Merena, 4/97), lot 1952, which sold for \$4,400; October Long Beach Signature Sale (Heritage, 10/2001), lot 6967; Baltimore Signature (Heritage, 7/2003), lot 7560. NGC ID# 24HK, PCGS# 572082 Base PCGS# 6267

1852 Half Dollar, MS62 Low Mintage, Rare in Mint State

4735 1852 WB-101, Die Pair 1, R.4, MS62 PCGS. The rising price of silver relative to gold during the early 1850s meant that these coins did not circulate. Only 77,130 half dollars were struck in 1852, probably intended for export to Canada or Latin America. Mint State examples are rare. Strike detail is virtually complete, save for a bit of softness on stars 7 and 8. Smooth surfaces are lightly toned with frosty luster beneath the patina. Population: 11 in 62, 33 finer (1/18).

From The Merrill Collection. NGC ID# 24HL, PCGS# 572083 Base PCGS# 6268

1852 Half Dollar, MS63 Conditionally Rare, Ex: Green / Newman

4736 1852 WB-101, Die Pair 2, R.4, MS63 NGC. Ex: "Col." E.H.R. Green / Newman. Its low mintage of 77,130 pieces makes the 1852 Seated Liberty half dollar a scarce issue in any grade, and examples in MS63 condition are rare. This sharply detailed Select specimen displays vibrant, frosty mint luster with hints of limegreen and bluish-gray toning. Census: 8 in 63, 12 finer (12/17). Ex: Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33719; ANA Signature (Heritage, 8/2014), lot 4442. From The Bayside Collection. NGC ID# 24HL, PCGS# 572083 Base PCGS# 6268

4737 1852-O WB-101, Die Pair 2, R.4, XF45 PCGS. Deep dove-gray toning blankets this unblemished, well-defined, and better date New Orleans half dollar. A die line below the right (facing) wing confirms the die pairing. Population: 20 in 45, 36 finer (1/18). Ex: FUN Signature (Heritage, 7/2010), lot 3705. From The Merrill Collection. NGC ID# 24HM, PCGS# 572084 Base PCGS# 6269

4738 1854 Arrows, WB-101, MS63 PCGS. CAC. A desirable example of this conditionally challenging two-year type coin. Lustrous and fully struck with smooth surfaces and light chestnut-gold toning. The eye appeal is superior for the Select level. CAC: 5 in 63, 8 finer (1/18).
From The Property of a Lady. NGC ID# 24JL, PCGS# 572087 Base PCGS# 6279

4739 1855 Arrows, WB-101, MS63 PCGS. This satiny Select half dollar is close to brilliant, but has a hint of rose-gold and limegreen along the lower obverse periphery. Careful evaluation reveals myriad die polish lines but surprisingly few marks. The strike is generally sharp, though the left (facing) claw and upper fletching show incompleteness.

From The Property of a Lady. NGC ID# 64Y6, PCGS# 572089 Base PCGS# 6281 4740 1855/54 Arrows, WB-102, FS-301, AU58 PCGS. CAC. Light to medium butter-gold patina graces this unblemished and coruscating Borderline Uncirculated example. The strike is good save for blending on the left (facing) claw. A popular *Guide Book* and *Cherrypickers*' variety.

From The Merrill Collection. NGC ID# 24JN, PCGS# 413720 Base PCGS# 6282

4741 1855-O Arrows, WB-101, Die Pair 5, R.3, MS63 NGC. A solidly struck and pleasing Select survivor from this popular Arrows type issue, this piece is primarily silver-gray with elements of greengold and tan near the rims. Minimally marked for the grade. Ex: Long Beach Signature (Heritage, 5/2008), lot 668; New York Signature (Heritage, 11/2013), lot 4026.

From The Bayside Collection. NGC ID# 24JP, PCGS# 572090 Base PCGS# 6283

4742 1855-O Arrows, WB-101, Die Pair 4, R.3, MS63 PCGS. A satiny straw-gold antebellum half dollar. No marks are of interest, though the strike shows slight softness on the fletchings and left (facing) claw. A delicate radial crack through star 4 helps attribute the die marriage. Encapsulated in an old green label holder. From The Merrill Collection. NGC ID# 24JP, PCGS# 572090 Base PCGS# 6283

4743 1855-O Arrows, WB-101, Die Pair 15, R.3, MS63 PCGS. CAC. Golden-brown, ocean-blue, and plum-red patina invigorates this prooflike Select New Orleans type coin. The strike is intricate, and the glassy fields show only inconsequential contact. Coined for just two years, the Arrows, No Motto, No Rays subtype is seldom seen with such impressive eye appeal. NGC ID# 24JP, PCGS# 572090 Base PCGS# 6283

4744 1855-S Arrows, WB-101, Die Pair 1, R.5 — Cleaned — PCGS Genuine. XF Details. Bill Bugert writes, "proof half dollars were struck from these dies ... the no drapery characteristic resulted from the special die preparation for proof strikes." The 1855-S is the first San Francisco half dollar issue, and the sole Arrows, No Motto issue from that facility. The 129,950-piece mintage had a high attrition rate. This predominantly cream-gray representative is overly dipped but well-defined and only moderately abraded. From The Property of a Lady.

4745 1856/1856-O WB-102, FS-301, Die Pair 9, R.2, MS63 PCGS. The date was initially entered with an upward slant, then corrected. Repunching is obvious above the 56 and below the 1. A thoroughly lustrous representative with a sharp strike and a single slender mark near the AM in AMERICA. A hint of granularity noted near the right-side stars.

From The Property of a Lady. NGC ID# 24HP, PCGS# 413722 Base PCGS# 6288

4746 1856/1856-O WB-102, FS-301, MS64 PCGS Secure. 30th Anniversary Green Label Holder. The 1 of the date is repunched north, the 8 slightly southeast, and the 56 boldly southeast. One of the most dramatic recut dates in the Seated half series, which is renowned for misplaced dates and sundry repunchings. A lustrous near-Gem example that has light straw-gold toning and smooth surfaces.

Ex: New York Signature (Heritage, 10/2015), lot 4561.

From The Merrill Collection. NGC ID# 24HP, PCGS# 413722

Base PCGS# 6288

4747 1856-S WB-101, Die Pair 1, R.4, AU53 PCGS. A well-struck example from the early years of the San Francisco Mint. Goldenrusset toning is faint on the obverse and more apparent on the reverse, though the coin is primarily brilliant. Ample luster remains, and no marks are of any import.

From The Property of a Lady. PCGS# 572098 Base PCGS# 6289

4748 1857 WB-101 MS64 NGC. From a substantial mintage of nearly 2 million pieces, the 1857 Seated Liberty half dollar is an available type coin in lower grades, but the issue is definitely rare at the MS64 grade level. This well-detailed Choice example exhibits just a touch of the usual softness on the eagle's wings and claw, with interesting clash marks in the obverse field. The lightly marked surfaces radiate vibrant mint luster. Census: 23 in 64, 13 finer (12/17).

From The Bayside Collection. PCGS# 572099 Base PCGS# 6290

4749 1859-O Misplaced Date, WB-103, Die Pair 6, R.4, MS64 NGC. CAC. Medium olive-gray toning confirms the originality of this lustrous and undisturbed Choice New Orleans half. A few stars are indistinct, but the devices are sharply struck. The base of a date digit emerges from Liberty's rock above the 9. Undoubtedly among the finest known examples of this scarce misplaced date variety, especially with a CAC seal. Census: 13 in 64, 15 finer. CAC: 3 in 64, 10 finer (12/17).

Ex: Long Beach Signature (Heritage, 2/2012), lot 3647, which realized \$1,955.

From The Bayside Collection. PCGS# 572132 Base PCGS# 6297

1859-S Half Dollar, Frosted MS63 Much Better Date in Mint State

- 4750 1859-S Large S, WB-101, Die Pair 4, R.3, MS63 PCGS. CAC. The Large S mintmark is high and close to the stem, but positioned a bit further left than other reverse dies that are seen more frequently. Diagnostic die lines on both the obverse and reverse confirm the variety. This is a mostly brilliant and frosted coin with a trace of light-gold toning along the left and upper obverse edge, as well as faint lilac hues on the reverse. Abrasions are few for the Select Uncirculated level. The strike is pinpoint sharp. Population (all varieties): 8 in 63, 26 finer. CAC: 2 in 63, 8 finer (1/18).

 From The Property of a Lady. NGC ID# 24J2, PCGS# 524237 Base PCGS# 6298
- 4751 1860-O to 1861-O 50C Half Dollar "Three Authorities" S.S. Republic Set Shipwreck Effect NGC. Unc. The coins are individually holdered by NGC, including: 1860-O WB-105, Die Pair 9, R.3, Repunched Mintmark United States issue; 1861-O WB-101, Die Pair 8, R.2 Louisiana issue; 1861-O WB-103 obverse/WB-104 reverse, Die Pair 14, R.4, Die Crack Bisected Date / Speared Olive Bud Confederate States issue. Comes in wooden presentation case with outer box and certificate of authenticity. (Total: 3 coins)
- 4752 1861 WB-101 MS64 ★ NGC. Rich autumn-brown and sea-green toning enriches the borders, while the centers remain brilliant. The toning pattern is similar to that seen on many old-time, albumstored collections. The strike is intricate, and marks are few and incidental. A high-mintage issue, but in demand due to its Civil War date. NGC ID# 24J7, PCGS# 572144 Base PCGS# 6302

1861 Half Dollar, MS65 Popular No Motto Date

4753 1861 WB-101 MS65 PCGS. A beautiful No Motto half with untoned centers and dusky autumn-gold, cobalt-blue, and lilac-red margins. The strike is complete, and the lustrous fields and devices are free from obtrusive marks. This Civil War date is available in AU55 through MS64, but Gems are difficult to locate. Population: 25 in 65 (1 in 65+), 20 finer (1/18).

Ex: Long Beach Signature (Heritage, 9/2008), lot 2209. NGC ID#

Ex: Long Beach Signature (Heritage, 9/2008), lot 2209. NGC ID# 24J7, PCGS# 572144 Base PCGS# 6302

4754 1861-O CSA Obverse, WB-102, FS-401, Die Pair 11, R.3, VF25 PCGS Secure. 30th Anniversary Green Label Holder. A vertical die crack from Liberty's nose to the rim confirms that the obverse die was shared with the famous Confederate half dollar. All letters in LIBERTY are apparent and most are bold, though the E is faint. The predominantly deep walnut-brown surfaces display charcoal-gray toning in protected areas. One minor rim knock noted at 9:30.

From The Merrill Collection. NGC ID# 24J8, PCGS# 390906 Base PCGS# 39968

1861-O Half Dollar, VF35 Confederate Obverse, FS-401 Late Die State

4755 1861-O CSA Obverse, WB-102, Die Pair 11, R.3, FS-401, VF35 PCGS. A popular variety with the vertical die crack above Liberty's nose. The same crack (from the same obverse die) appears on the four known original Confederate half dollars. The present coin is an *important late die state* with a diagonal crack through the left corner of Liberty's rock to the 1 in the date, plus die chipping on the prominent die cracks, which confirm that the coin was struck after the four original Confederate halves. Luster emerges from the legends, drapery, and eagle, but Liberty's high points exhibit moderate wear. The subdued stone-gray surfaces are surprisingly devoid of abrasions.

From The Bayside Collection. NGC ID# 24J8, PCGS# 390906 Base PCGS# 39968 4756 1861-O CSA Obverse, WB-102, Die Pair 11, R.3, FS-401, VF35 PCGS. While seven die pairs were used to strike 1861-O half dollars by the Confederacy, many collectors prefer those struck from Die Pair 11, which represents the first use of the obverse die that was later used to strike the four original Confederate half dollars with the famous CSA reverse (Die Pair 12). This piece shows an early die stage with the diagnostic crack from the rim right of star 7 to the bridge of Liberty's nose, yet late-state die cracks at the date area and Liberty's foot are not visible. Pleasing old-silver color complements golden-gray accents around the raised devices, with only minor marks and a few delicate lines consistent with the Choice VF grade.

From The Bayside Collection. NGC ID# 24J8, PCGS# 390906 Base PCGS# 39968

1861-O Half Dollar, XF40 C.S.A. Die-Cracked Obverse, FS-401

- 4757 1861-O CSA Obverse, WB-102, FS-401, Die Pair 11, R.3, XF40 PCGS. CAC. Walnut-brown and blue-green toning blankets this moderately marked half dollar. The vertical die crack up from Liberty's nose is identical to that seen on the four genuine Confederate half dollars, since that issue and Die Pair 11 share the same obverse die. FS-401 has long been in demand from Seated specialists, as an affordable substitute for the non-collectible C.S.A. halves. NGC ID# 24J8, PCGS# 390906 Base PCGS# 39968
- 4758 1861-S Large S, WB-101, Die Pair 9, R.2, AU58 PCGS. Prominent die cracks across the lower obverse identify the die pairing. This half dollar is chiefly pearl-gray but the left reverse border displays forest-green. A few faded thin marks are noted on the right obverse field, while the remainder of the coin is essentially unabraded.

From The Property of a Lady. NGC ID# 24J5, PCGS# 572149 Base PCGS# 6306

4759 1862-S Large S, WB-101, Die Pair 1, R.3, MS63 PCGS. Type I Reverse. Dusky gunmetal-gray and golden-brown toning embraces this satiny and nicely struck half dollar. A narrow lamination (as issued) extends from the NI in UNITED to the nearby wing. Population: 12 in 63, 15 finer (12/17).

From The Bayside Collection. PCGS# 572153 Base PCGS# 6308

4760 1863-S Small Broken S, WB-102, Die Pair 4, R.3, MS62 PCGS. A hint of honey-gold toning accompanies this lustrous, well-struck, and unmarked half dollar. Impressive for the designated grade. Struck from moderately rotated dies. Population: 19 in 62, 35 finer (1/18).

From The Bayside Collection. PCGS# 572157 Base PCGS# 6310

- 4761 1865 WB-101 MS62 PCGS. A brilliant and precisely struck Civil War representative. The fields are double clashed but show only trivial abrasions for the MS62 level. Cartwheel luster abounds, and the eye appeal is impressive. Population: 6 in 62, 39 finer (1/18). From The Property of a Lady. NGC ID# 24JF, PCGS# 572164 Base PCGS# 6313
- 4762 1865-S Small Thin S, WB-102, Die Pair 3, R.3, AU58 PCGS. A scarce S-mint half dollar, seldom seen other than the cleaned pieces from the Guatemala Hoard. Sharply defined in the centers with a rich overlay of olive-gold toning on each side. An unlisted late die state with a cud west of the H in HALF. Housed in an old green label holder.

Ex: Santa Clara Signature (Heritage, 11/2002), lot 7345.

From the Ohio Collection. NGC ID# CVXJ, PCGS# 572168 Base PCGS# 6314

4763 1866-S No Motto, Small Thin S, WB-101, Die Pair 1, R.5 in early die state, VF35 NGC. No clash marks are visible in the reverse shield recesses on this piece, identifying the rarely seen early die state of the variety. The die crack along the top of UNITED STATES is from an earlier marriage in 1865. Only 60,000 No Motto half dollars were struck at San Francisco in 1866, all from this one die pair, and survivors are scarce and highly soughtafter. This Choice VF example displays original olive-gray patina and mostly smooth surfaces; a vertical linear mark below star 8 is the only mentionable abrasion. Census: 6 in 35, 22 finer (12/17). NGC ID# 5V4T, PCGS# 572170 Base PCGS# 6315

4764 1867 WB-101 MS63 PCGS. An attractive Select specimen from a business-strike mintage of 469,300 pieces, this coin exhibits sharply detailed design elements and well-preserved surfaces, with satiny mint luster and a few hints of sea-green and lavender-gray toning. Population: 11 in 63, 19 finer (1/18).

From The Bayside Collection. PCGS# 572177 Base PCGS# 6321

1867-S/S Half Dollar, MS63 Booming Luster, Smooth Fields

4765 1867-S/S WB-103, Die Pair 4, R.3, MS63 PCGS. The mintmark is lightly repunched. Vibrant luster and a sharp strike combines with exemplary surfaces to provide superior eye appeal. Glimpses of golden-brown and jade-green toning further confirm this coin's originality. The 1867-S has a generous mintage but few pieces were saved in mint condition. For all 1867-S die varieties, Population: 10 in 63, 4 finer (1/18).

From The Bayside Collection. PCGS# 572181 Base PCGS# 6322

4766 1869 WB-101 MS62 PCGS. Light sun-gold toning is noted near the date, but this coruscating half dollar is otherwise brilliant. Well struck and uncommonly free from contact. Clash marks from the wings near Liberty's knee may be of interest to the specialist. Ex: Long Beach Signature (Heritage, 6/2015), lot 7734. From The Merrill Collection.

4767 1869 WB-101 MS63 PCGS. Sharply struck throughout, with a pale lavender and golden-orange patina. Scattered light abrasions on each side limit the grade. Population: 16 in 63, 20 finer (12/17). Ex: New York Signature (Heritage, 7/2004), lot 6510; Long Beach Signature (Heritage, 9/2004), lot 6662; New York Signature (Heritage, 10/2014), lot 3541.

From The Bayside Collection. NGC ID# 6463, PCGS# 572185 Base PCGS# 6325

4768 1869-S WB-101, Die Pair 2, R.3, MS61 PCGS. Light almondgold and pearl-gray toning visits this satiny and unblemished San Francisco half dollar. The strike is sharp except on star 8. Although available in well-worn grades, the 1869-S is rare in Mint State. From The Property of a Lady. NGC ID# 24JY, PCGS# 572187 Base PCGS# 6326

1869-S Half Dollar, MS63 Conditionally Rare

4769 1869-S WB-101, Die Pair 1, R.4, MS63 PCGS Secure. The mintmark is a trifle further left under the stem than it is on the other two 1869-S varieties. This Select coin displays satiny mint luster and warm golden toning with only a few minor abrasions. Several stars, Liberty's temple, and the eagle's left (facing) talons exhibit softness of strike. Uncirculated examples of this San Francisco issue are rarely offered in any grade. Population: 5 in 63, 12 finer (12/17). From The Bayside Collection. NGC ID# 24JY, PCGS# 572187 Base PCGS# 6326

1870-S Half Dollar, MS62 A Scarce Issue in Mint State

4770 1870-S Very Small S, WB-101, Die Pair 4, R.3, MS62 PCGS. Mintmark position, date placement, and the presence of a few tiny die lumps identify this variety. The present coin is Uncirculated — a rare find for the 1870-S half dollar. Satiny mint luster displays light golden toning and has minimal abrasions. Moderate strike weakness on each side reveals a few Mint-made roller marks on the central devices that were not fully struck out of the planchet. Population: 8 in 62, 12 finer (12/17).

From The Bayside Collection. NGC ID# 6467, PCGS# 572191 Base PCGS# 6329

4771 1871 WB-101 MS63 PCGS. CAC. This sharply struck half dollar has a satiny obverse and a semiprooflike reverse. Lightly toned overall, with a few narrow russet streaks near Liberty's raised elbow, and a small field spot west of star 11. Housed in a green label holder. Ex: Chicago ANA Signature (Heritage, 8/2014), lot 7778, which realized \$1,057.50.

From The Merrill Collection. NGC ID# 6469, PCGS# 572193 Base PCGS# 6330

4772 1871 Repunched Date, WB-103, MS64 PCGS. Well-defined with powerful, swirling luster and whispers of frostiness at the high points. Generally silver-blue surfaces show glints of gold and green in the obverse fields. This variety shows repunching above the base of the 1, and a short die line is visible on the reverse between the left upright of the M in AMERICA and the dentils. Population: 18 in 64, 8 finer (1/18).

Ex: Houston Signature (Heritage, 12/2008), lot 736. NGC ID# 646A, PCGS# 572195 Base PCGS# 6330

4773 1871-CC WB-101, Die Pair 6, R.4, Fine 15 PCGS. A stone-gray example of this early and scarce Carson City issue. The E in LIBERTY is worn, but the other letters are readable. IN GOD WE TRUST is present though a few letters are faint. The right obverse field is lightly hairlined. Encased in an old green label holder. From The Merrill Collection. NGC ID# 646D, PCGS# 572196 Base PCGS# 6331

4774 1872 WB-101 MS64 NGC. Dusky lilac, peach, and blue-green toning encompasses this sharply struck and satiny Choice Seated half dollar. Refreshingly free from marks. The strike is crisp except on the left (facing) ankle. Census: 9 in 64 (1 in 64+, 1 in 64★), 4 finer (1/18). NGC ID# 24K7, PCGS# 572201 Base PCGS# 6333

1872-CC Half Dollar, XF45 Elusive Carson City Issue, WB-101

4775 1872-CC WB-101, Die Pair 4, R.5, XF45 PCGS. Brief areas of tan-gold toning along the obverse margin add eye appeal to this otherwise stone-gray example. While the mintage of 257,000 pieces was moderate by Carson City standards, the issue is quite scarce in the context of the entire series and elusive in all grades. This example has some light hair-thin lines in the fields but no major marks. We note an interesting small, Mint-related oval depression along Liberty's gown hem just above the rock support. The strike is strong with good definition for the Choice XF level. Population (all varieties): 22 in 45, 32 finer (1/18).

From The Property of a Lady. NGC ID# 64EJ, PCGS# 572203 Base PCGS# 6334

1872-CC Seated Half Dollar, AU53 WB-101, Better Carson City Date

4776 1872-CC WB-101, Die Pair 2, R.4, AU53 PCGS. Soft mint luster remains beneath the light and pleasingly mottled silver-gray toning of this scarce Carson City issue. Just 257,000 pieces were minted, most of which were largely ignored by early collectors and lost to attrition. A Large CC mintmark — the letters close together and sloping slightly downward — indicates a transitional reverse that was also used in 1870 and 1871. Few marks or abrasions disturb the substantial appeal of this boldly struck half. Housed in a green label holder. Population: 6 in 53, 19 finer (1/18). Ex: FUN Signature (Heritage, 1/2015), lot 4952.

From The Merrill Collection. NGC ID# 64EJ, PCGS# 572203 Base PCGS# 6334

4777 1873-CC No Arrows, Small CC, WB-101, Die Pair 2, R.5, VF25 NGC. An attractive example of the scarcer of the two 1873-CC half dollar types. The devices are well defined for the grade, particularly on the reverse, while each side displays original gunmetal-gray patina. Close examination reveals a narrow field mark near star 13.

Ex: Long Beach Signature (Heritage, 6/2014), lot 3947, which realized \$1,997.50. NGC ID# 24KC, PCGS# 572214 Base PCGS# 6338

4778 1873 Large Arrows, WB-106, MS63 PCGS. The With Arrows 1873 Seated Liberty half dollar is an extremely popular type issue, from a mintage of 1.8 million pieces. The Arrows at the date signify a weight change in the subsidiary U.S. silver coinage that was instituted part way through the year in 1873. This impressive Select specimen offers well-detailed design elements, with just a trace of softness on some star centers. The lightly marked, lustrous surfaces show a few highlights of lavender and pale gold toning. Population: 36 in 63, 60 finer (12/17).

From The Bayside Collection. NGC ID# 24L7, PCGS# 572211 Base PCGS# 6343

4779 1873-CC Arrows VF30 PCGS. CAC. WB-Unlisted, Die Pair 7, R.4. Large CC. The lightly repunched date variety was unlisted in the original Wiley-Bugert reference. This attractive 1873-CC half dollar shows uniform olive-gray patina and smooth surfaces. Light wear is consistent with the grade. The eye appeal is excellent for the grade and issue.

Ex: Long Beach Signature (Heritage, 5/2009), lot 7855. NGC ID# 24L8, PCGS# 6344 Base PCGS# 6344

4780 1874 Large Arrows, WB-102, MS62 PCGS. Large Arrows. A number of scattered luster grazes limit the grade of this frosty, largely untoned example, but no obtrusive abrasions are present. The design elements are sharply rendered. This issue is seldom seen in finer Mint State grades.

Ex: Long Beach Signature (Heritage, 1/2015), lot 3865.

From The Merrill Collection. NGC ID# 24LA, PCGS# 572219 Base PCGS# 6346

- 4781 1874-CC Arrows, WB-101, Die Pair 3, R.4, VG10 PCGS. Carson City type collectors know that the Arrows 1873-CC half dollar is collectible. But the other Arrows issue from the Old West facility, the 1874-CC, is rare in all grades. This dove-gray representative displays four letters in LIBERTY and shows partial shield definition. Infrequent minor marks are of little import. NGC ID# 24LB, PCGS# 572221 Base PCGS# 6347
- 4782 1874-CC Arrows, WB-101, Die Pair 3, R.4, VG10 PCGS. The L and Y in LIBERTY are clear on this challenging With Arrows Carson City issue, with a few other letters partially visible. Goldengray surfaces show deep gray accents in the recessed areas coupled with smooth wear. The rims, dentils, and feather details on the wings are all above-average for the assigned grade. Ex: New York Signature (Heritage, 10/2015), lot 4565. From The Merrill Collection. NGC ID# 24LB, PCGS# 572221 Base PCGS# 6347
- 4783 1876 Large Over Small Date, WB-106, FS-301, VF30 PCGS. Formerly FS-007.4. Type One Reverse with an open bud. Cherrypickers' states FS-301 is "considered very rare." The upper curve of a small 8 is nestled within the upper loop of the 8. Stonewhite high points contrast with deeper gunmetal fields. A minor rim nick is below the 18 in the date. Ex: FUN Signature (Heritage, 1/2016), lot 8166, which realized

- \$1,057.50. From The Merrill Collection. NGC ID# AVRP, PCGS# 408482 Base PCGS# 6352
- 4784 1876-CC Small CC, WB-101, Die Pair 4, R.4, AU55 Prooflike NGC. The die pair is questionable, since the prooflike early die stage tends to obfuscate some of the die markers. It is a Small CC variety with the date and mintmark positions similar to Die Pair 4, although it is possible the die marriage is unlisted in the current Bugert reference. This Choice About Uncirculated example is one one of the rare Carson City Prooflike representatives of the date. It is entirely brilliant throughout both sides, with small scattered abrasions and a sharp strike. Census: 1 in 55 Prooflike, 3 finer (1/18). NGC ID# 645M, PCGS# 572238 Base PCGS# 6353
- 4785 1876-CC Medium CC, WB-102, Die Pair 15, R.3, AU58+ PCGS. CAC. The serifs of the mintmark are repunched. A number of delicate die cracks also aid the attribution. This precisely struck Borderline Uncirculated Carson City type coin is bathed in medium to deep golden-brown and aquamarine patina. Satiny and unmarked with exceptional eye appeal. NGC ID# 645S, PCGS# 572239 Base PCGS# 6353

4786 1876-S Open Bud, Very Small S, WB-102, MS64 PCGS. The die pair is unlisted in the Wiley-Bugert San Francisco reference, but is a mate of obverse die 24 and reverse die BB, the latter noteworthy for its nicely repunched mintmark. The present example is a splendid Centennial-year type coin. Autumn-brown and sea-green borders surround stone-gray centers. Well struck and unmarked with a satiny obverse and a lustrous reverse.

From The Property of a Lady. NGC ID# 24KJ, PCGS# 572242 Base PCGS# 6354

- 4787 1877-CC Closed Bud, Medium CC, WB-103, Die Pair 14, R.4, MS63 PCGS. Ex: Dick Osburn Collection. The mintage of more than 1.4 million pieces makes the 1877-CC the most-available Carson City half dollar and a prime target for CC type collectors. Struck from the sole use of both the obverse and reverse dies, this example shows diagnostic die lumps around the final A in AMERICA a key die line in the ribbon's recessed area at left of the obverse shield. Attractive, translucent gold and blue toning enhance semireflective fields that contrast with frosted, sharply struck motifs. Population (all varieties): 53 in 63, 91 finer (1/18). NGC ID# 24KL, PCGS# 572250 Base PCGS# 6356
- 4788 1877-S Open Bud, Very Small S, WB-102, Die Pair 12, R.3, MS64 NGC. CAC. Attractive sea-green and caramel-gold toning competes for territory across this sharply struck Choice Seated type coin. A few unobtrusive field grazes are noted near star 13. Certified in a pre-hologram holder. PCGS# 572253 Base PCGS#
- 4789 1877-S Closed Bud, Very Small S, WB-104, Die Pair 34, R.3, MS64 PCGS. CAC. The olive leaves and the eagle's tailfeathers are weakened by die lapping on this variety. On the obverse, die cracks connect the base of the rock to the dentils on each side. This near-Gem example is sharp and lustrous with original golden toning. A russet spot is seen in the crook of Liberty's right (facing) arm, suitable for pedigree purposes. The CAC endorsement is a seldom seen bonus at this grade level. NGC ID# 24KM, PCGS# 572255 Base PCGS# 6357
- 4790 1878-CC WB-101, Die Pair 1, R.4, VG10 PCGS. CAC. Mintages of 1878-CC half dollars abruptly ended with the advent of the Morgan dollar. The production was only 62,000 pieces, and most survivors are well circulated or exhibit problems such as corrosion or cleaning. This stone-gray example offers even wear and minimally marked surfaces.

From The Merrill Collection. NGC ID# 24KP, PCGS# 572257 Base PCGS# 6359

4791 1880 Closed Bud, WB-102, MS63 PCGS. Ceaseless silver dollar production led to a commercial mintage of only 8,400 half dollars in 1880. This well struck and semiprooflike example displays dappled wheat-gold and powder-blue patina. The reverse is well preserved, and the obverse field exhibits only minor contact. From The Merrill Collection. NGC ID# 24KT, PCGS# 572262

Base PCGS# 6362

4792 1881 Closed Bud, WB-102, AU55 PCGS. CAC. A beautiful Choice AU example, this Seated half has pleasing light gray surfaces with peripheral iridescence over considerable satin luster. Slight grazing is noted at stars 5 through 7, but otherwise the surfaces are outstanding.

Ex: FUN Signature (Heritage, 7/2011), lot 3668; Long Beach Signature (Heritage, 6/2015), lot 7761.

From The Merrill Collection. NGC ID# 24KU, PCGS# 572264 Base PCGS# 6363

4793 1881 Closed Bud, WB-102, MS63 PCGS. A flashy and crisply struck Select example that shows only a whisper of butter-gold toning. Marks are limited to the field above the AL in HALF. Only 10,000 pieces were produced.

Ex: Long Beach Signature (Heritage, 9/2005), lot 3257; Houston Money Show Signature (Heritage, 12/2015), lot 4418.

From The Merrill Collection. NGC ID# 24KU, PCGS# 572264 Base PCGS# 6363

4794 1882 WB-101 MS64 PCGS. A semiprooflike near-Gem, this attractive piece is a wonderful survivor from a small mintage of just 4,400 business strikes. Draped in dusky canary-gold, lilac-red, powder-blue, and lime-green shades. Population: 30 in 64 (4 in 64+), 18 finer (1/18).

Ex: Chicago Signature (Heritage, 8/2011), lot 4010, which realized \$1,610.

From The Merrill Collection. PCGS# 572265 Base PCGS# 6364

4795 1883 WB-101 MS63 PCGS. CAC. Brilliant and lustrous. Pristine aside from delicate field hairlines. The strike is crisp save for incompleteness on Liberty's hair and the nearby stars. A scant 8,000 pieces were struck. Housed in a green label holder.

From The Merrill Collection. PCGS# 572267 Base PCGS# 6365

1883 Half Dollar, MS64 Complete Impression

4796 1883 WB-101 MS64 NGC. CAC. Production of circulationstrike half dollars was merely to satisfy collectors and to prevent speculation in proofs. In all, 8,000 business strikes were minted plus 1,039 specimens. This frosty near-Gem features an absolutely complete impression and clean silver surfaces. A blush of color appears at the lower obverse below the date. Census: 23 in 64 (2 in 64★), 19 finer. CAC: 4 in 64, 12 finer (12/17).

From The Bayside Collection. PCGS# 572267 Base PCGS# 6365

4797 1884 Repunched Date, WB-102, MS62 PCGS. Golden-gray toning visits this semiprooflike and lightly abraded representative. Due to ongoing large-scale silver dollar coinage, just 4,400 business half dollars were issued in 1884. Certified in a green label holder. Ex: Atlanta ANA Signature (Heritage, 2/2014), lot 3530; Long Beach Signature (Heritage, 9/2016), lot 4109.

From The Merrill Collection. NGC ID# 24KX, PCGS# 572269 Base PCGS# 6366

1884 Seated Liberty Half, MS64 Rich Peripheral Patina

4798 1884 Repunched Date, WB-102, MS64 PCGS. Vibrant bands of golden-brown and blue-green toning accompany both borders. The fields and motifs remain brilliant. Well-struck and lustrous with pleasing preservation. The base of the 4 shows trivial repunching. From a meager mintage of 4,400 pieces, although approximately 200 examples were saved upon issue by numismatists. Population: 32 in 64, 46 finer (1/18). NGC ID# 24KX, PCGS# 572269 Base PCGS# 6366

1886 WB-101 MS62 PCGS. Prooflike fields are visible beneath light gold toning with sharp design features and attractive cameo contrast. This low-mintage issue is seldom seen in higher Mint State grades.

Ex: Chicago Signature (Heritage, 8/2011), lot 4014; Long Beach Signature (Heritage, 6/2015), lot 4557.

From The Merrill Collection. PCGS# 572271 Base PCGS# 6368

- 4800 1886 WB-101 MS63 PCGS. CAC. A prooflike example with brilliant fields and frosty devices. The borders display autumnbrown and aquamarine patina. The strike is good, although Liberty's hair and nearby stars lack a complete impression. Only 5,000 commercial pieces were issued.
 - From The Property of a Lady. PCGS# 572271 Base PCGS# 6368
- 1887 WB-101 MS62 PCGS. Peach-gold toning endows the borders of this semiprooflike half dollar. The strike is good although shy of complete. The grade is determined by a minor patch of hairlines near Liberty's foot. From a meager mintage of 5,000 pieces. Encapsulated in a green label holder. From The Merrill Collection. NGC ID# 24L2, PCGS# 572272

Base PCGS# 6369

4802 1888 WB-101 MS64 PCGS. CAC. Glimpses of russet-brown toning visit the lower margins of this lustrous and low mintage near-Gem. Only trivial contact is present, though a tornado-shaped strike-through (as coined) affects the first T in STATES. From The Property of a Lady. NGC ID# 24L3, PCGS# 572273 Base PCGS# 6370

4803 1889 WB-101 MS64 PCGS. Light to medium butter-gold toning graces this smooth and coruscating Choice half dollar. The strike is good and the eye appeal is substantial. One of just 12,000 pieces struck. Certified in a green label holder. From The Merrill Collection. PCGS# 572274 Base PCGS# 6371

4804 1890 WB-101 MS63 PCGS. CAC. Although lightly toned overall, this low mintage half dollar displays wheat-gold and applegreen at the margins. A nice strike and exceptionally smooth surfaces ensure the quality. Another low mintage date with just 12,000 business pieces coined. CAC: 3 in 63, 16 finer (1/18). From The Property of a Lady. NGC ID# 24L5, PCGS# 572275 Base PCGS# 6372

PROOF SEATED HALF DOLLARS

- 4805 1858 PR63 PCGS. From the first year of the Mint's commercial proof set offerings, the 1858 proof Seated Liberty half dollar has an estimated mintage of 300 pieces. This attractive Select specimen is sharply detailed in most areas, with a touch of softness on some star centers. Many parallel die striations are visible in the lightly marked reflective fields. Population: 26 in 63, 35 finer (12/17). From The Bayside Collection. NGC ID# 27TH, PCGS# 6412
- 4806 1858 PR63 PCGS. CAC. Every fine detail is brought up by the dies on this Select proof, and both sides exhibit subtle field-motif contrast. A blush of warm golden toning overall deepens at the borders, creating an attractive halo effect around each side. The CAC green label is rarely awarded an 1858 proof half dollar. CAC: 1 in 63, 4 finer (1/18). NGC ID# 27TH, PCGS# 6412
- 4807 1859 PR62 Cameo PCGS. Relatively few mid-19th century proof silver coins have any degree of contrast as seen on this attractive Cameo proof. Only 20% of PCGS certified proofs are designated Cameo (one coin is Deep Cameo). This brilliant example has untoned silver surfaces with sharp devices that contrast nicely against the mirrored fields. Population: 9 in 62 Cameo, 26 finer (1/18). From The Sea Cliff Collection. NGC ID# 27TJ, PCGS# 86413
- 4808 1859 PR63 Cameo PCGS. CAC. The sharply defined devices of this Select Cameo proof exhibit delicate gold toning, while the fully mirrored fields are pale lavender and light blue. A small area of fingerprint toning is evident on each side. Population: 12 in 63 (1 in 63+) Cameo, 14 finer. CAC: 4 in 63, 6 finer (1/18). From The Property of a Lady. NGC ID# 27TJ, PCGS# 86413

1859 Half Dollar, PR64 Cameo High-End With CAC Approval

- 4809 1859 PR64 Cameo NGC. CAC. WB-101. Type One Reverse, with LF in HALF closely spaced. The Mint began its public proof offerings in 1858 and distributed them free of charge through 1859, when 800 pieces were minted. Contrasted silver surfaces are minimally toned, and the devices are expectedly razor-sharp. Close inspection reveals a few wispy lines and small ticks of no importance. Obviously high-end for the grade. Census: 3 in 64 Cameo, 13 finer. CAC: 4 in 64, 2 finer (12/17).

 From The Bayside Collection. NGC ID# 27TJ, PCGS# 86413
- 4810 1860 PR64 PCGS. Type Two Reverse. The 1860 proof Seated Liberty half dollar is more elusive than its *Guide Book* mintage of 1,000 pieces would suggest. It is likely many examples went unsold and were melted for recoinage after the end of the year. This sharply detailed Select specimen offers well-preserved surfaces, with reflective fields and subtle hints of pale gold toning. Population: 40 in 64, 26 finer (12/17).
 From The Bayside Collection. NGC ID# 27TK, PCGS# 6414

4811 1861 PR63 PCGS. Brilliant silver surfaces exhibit sharp design

- 4811 1861 PR63 PCGS. Brilliant silver surfaces exhibit sharp design features and considerable field-to-device contrast. A thin crescent of iridescent toning follows the obverse border from 6 to 10 o'clock. This undesignated Select proof is a borderline cameo example. From The Property of a Lady. NGC ID# 27TL, PCGS# 6415
- 4812 1862 PR63 PCGS. This razor-sharp Select proof displays modest cameo contrast and warm golden toning. Both peripheries showcase a thin, unbroken ribbon of rainbow toning that beautifully frames the devices. An outstanding coin for the grade.
 From The Bayside Collection. NGC ID# 27TN, PCGS# 6416
- 4813 1862 PR63 PCGS. CAC. A pleasing Select proof, this Civil War issue had a mintage of 550 examples in this format. Delicate lavender toning visits the brilliant obverse while the reverse has dusky gold toning. Considerable contrast is evident beneath the toning on this undesignated proof.

 From The Property of a Lady. NGC ID# 27TN, PCGS# 6416

4814 1863 PR62 PCGS. From a small wartime mintage of 460 pieces, this attractive PR62 specimen exhibits sharply detailed design elements and deeply reflective fields, with a few minor hairlines and contact marks. Peripheral accents of emerald-green and violet

toning enhance the strong eye appeal. From The Bayside Collection. NGC ID# 27TP, PCGS# 6417

4815 1863 PR63 NGC. CAC. Electric-blue and olive-green toning consumes the reverse. The obverse is also fully patinated, but in less vibrant lavender, aquamarine, and straw-gold shades. The obverse field exhibits faint hairlines. Encapsulated in a former generation holder. CAC: 2 in 63, 9 finer (1/18). NGC ID# 27TP, PCGS# 6417

1863 Half Dollar, PR65 Lovely Border Toning

- 4816 1863 PR65 NGC. Cobalt-blue and lavender toning clings to the margins of this Gem proof, leaving the centers silvery with soft champagne hues. The design elements are sharply impressed and display a degree of contrast with the mirrored fields. Carefully preserved with excellent eye appeal. Census: 15 in 65, 16 finer (including Cameos and a single Ultra Cameo) (1/18). Ex: Long Beach Signature (Heritage, 2/2012), lot 3665; Long Beach Signature (Heritage, 6/2013), lot 3497; PNG Invitational Signature (Heritage, 2/2015), lot 3118. NGC ID# 27TP, PCGS# 6417
- 4817 1864 PR64 PCGS. WB-101. A boldly struck near-Gem with seemingly full definition aside from the eagle's left (facing) ankle. Lightly toned, the devices and legends exhibit mild cameo contrast with the nicely preserved fields. A mere 470 proofs were struck, and perhaps only half of that mintage has survived unimpaired. Population: 57 in 64, 24 finer (12/17).

 Ex: FUN Signature (Heritage, 1/2004), lot 6554.

From The Bayside Collection. NGC ID# 27TR, PCGS# 6418

- 4818 1864 PR63 Cameo PCGS. Only 470 proof Seated Liberty half dollars were struck in 1864 and relatively few survivors show enough field/device contrast to merit a Cameo designation. This attractive Select example displays sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields. Subtle hints of greenish-gold toning visit the lightly marked surfaces. Population: 12 in 63 Cameo, 25 finer (12/17).

 From The Bayside Collection. NGC ID# 27TR, PCGS# 86418
- 4819 1865 PR63+ Cameo PCGS. With a small proof mintage of 500 pieces, the 1865 Seated Liberty half dollar is the last collectible issue of the No Motto design type. This Plus-graded Select specimen offers sharply detailed design elements and reflective fields that contrast boldly with the frosty devices. Population: 13 in 63 (2 in 63+) Cameo, 47 finer (12/17).

From The Bayside Collection. NGC ID# 27TS, PCGS# 86419

4820 1866 Motto PR64 PCGS. First year of issue of the With Motto design modification for widespread distribution, although some patterns with earlier dates share this reverse design. An intricately impressed Choice proof with flashy fields and medium powder-blue patina. Ex: Pittsburgh Signature (Heritage, 8/2004), lot 6254; Pre-Long Beach Auction (Ira & Larry Goldberg, 2/2012), lot 2503, which realized

From The Bayside Collection. NGC ID# 27TZ, PCGS# 6424

1866 Seated Half, PR64 Cameo First Year of the With Motto Reverse

4821 1866 Motto PR64 Cameo PCGS. The first year of half dollar coinage incorporating the motto IN GOD WE TRUST saw the production of 725 proofs. With only one No Motto proof known, this issue is essential for date sets and ideal for type collections. The present example is sharp and distinctly cameo-contrasted between the frosty design elements and the brightly reflective fields. A few wisps of light gold and lavender toning grace both sides. A few lines in the right obverse field are all that limit the grade. Population: 14 in 64 (2 in 64+) Cameo, 12 finer (including Deep Cameos) (12/17). Ex: Central States Signature (Heritage, 4/2012), lot 4497.

From The Bayside Collection. NGC ID# 27TZ, PCGS# 86424

4822 1867 PR64 Cameo PCGS. The Philadelphia Mint produced 625 proofs in 1867, and the majority of those pieces survive today. This Choice Cameo proof has hints of peripheral gold toning on its otherwise brilliant and untoned silver surfaces. A lovely example with considerable contrast. Population: 14 in 64 (1 in 64+) Cameo, 18 finer (1/18).

From The Property of a Lady. NGC ID# 27U2, PCGS# 86425

1868 Seated Half Dollar, PR65 Only 600 Proofs Minted

4823 1868 PR65 NGC. WB-101. The 1868 proof half dollar is a better date with a mintage of only 600 pieces. At the Gem proof level the issue is decidedly rare. The present coin exhibits full strike details and brilliant mirrored fields. Overall visual appeal is exceptional. Census: 25 in 65, 9 finer (12/17).

Ex: Summer FUN Signature (Heritage, 7/2010), lot 3731. From The Bayside Collection. NGC ID# 27U3, PCGS# 6426

4824 1869 PR63 NGC. Vivid rings of cobalt-blue and greenish-gray toning surround the mostly brilliant centers of this attractive Select proof. The design elements are sharply detailed throughout and the deeply mirrored fields show only minor signs of contact. Census: 35 in 63, 80 finer (1/18).

From The Bayside Collection. NGC ID# 27U4, PCGS# 6427

4825 1869 PR63 NGC. CAC. A Select proof, from a mintage of 600 pieces, this coin exhibits sharply detailed design elements and lightly marked reflective fields, with light-to-medium intensity emerald-green toning at the peripheries. Census: 35 in 63, 80 finer. CAC: 1 in 63, 16 finer (1/18).

From The Bayside Collection. NGC ID# 27U4, PCGS# 6427

4826 1869 PR64 PCGS. A thin overlay of gold toning extends in from the right obverse border, with a squared-corner as if something rested on top of this coin for many years. The balance of the obverse and all of the reverse exhibit brilliant silver with light contrast. From The Property of a Lady. NGC ID# 27U4, PCGS# 6427

4827 1869 PR65 NGC. WB-101. From a limited mintage of 600 pieces, the 1869 proof Seated Liberty half dollar is a rare issue at the PR65 grade level. This attractive Gem displays sharply detailed design elements and well-preserved reflective fields throughout. Census: 16 in 65, 16 finer (12/17).

From The Bayside Collection. NGC ID# 27U4, PCGS# 6427

1869 Seated Half, PR64 Cameo Peripheral Toning Around Brilliant Centers

4828 1869 PR64 Cameo PCGS. The Mint manufactured 600 proof half dollars in 1869, the same total as the preceding year. Highgrade circulation strikes are rarely offered, so many collectors opt to target an attractive proof instead. This PR64 Cameo example would be perfect for an advanced date set. Both sides maintain brilliant centers surrounded by rings of violet, cobalt-blue, and golden-orange patina. Blatant contrast exists between the frosted motifs and glassy fields. Population: 8 in 64 Cameo, 10 finer (1/18). NGC ID# 27U4, PCGS# 86427

4829 1870 PR63 NGC. Razor-sharp definition is evident on all the design elements of this delightful Select proof and the lightly marked surfaces include deeply reflective fields, with a few hints of emerald-green toning at the peripheries. Census: 30 in 63, 54 finer (1/18). From The Bayside Collection. NGC ID# 27U5, PCGS# 6428

4830 1871 PR64 PCGS. CAC. This brilliant Choice proof exhibits untoned silver surfaces and excellent field-to-device contrast, although it lacks a deserved Cameo designation on the holder. The devices are boldly rendered, and the eye appeal is exceptional. Population: 31 in 64, 21 finer. CAC: 5 in 64, 11 finer (1/18). From The Bayside Collection. NGC ID# 27U6, PCGS# 6429

4831 1871 PR65 ANACS. The peach-gold patina is faint near the centers but progressively deepens toward the rims. This prominently mirrored Gem has a razor-sharp strike and a proof mintage of just 960 pieces. Certified in a small-sized holder. NGC ID# 27U6, PCGS# 6429

4832 1871 PR63 Cameo PCGS. Proof mintages were generally somewhat higher in the 1870s than in the previous decade, and the Philadelphia Mint coined 960 proof half dollars in 1871. Gold toning is isolated to the rims on this lovely Select Cameo proof that has brilliant and untoned silver surfaces. Excellent field-to-device contrast results in a Cameo designation. Population: 5 in 63 Cameo, 17 finer (1/18).

From The Property of a Lady. NGC ID# 27U6, PCGS# 86429

1871 Half Dollar, PR65 Cameo Excellent Contrast

- 4833 1871 PR65 Cameo NGC. This Gem proof is sharply struck and well-contrasted, showing no contact marks and only a few faint lines in the fields. The interiors are brilliant, but the borders show warm golden toning that attractively frames the devices. Cameo 1871 proof half dollars are rare in all grades, and NGC has seen only two Ultra Cameos. Census: 2 in 65 Cameo, 7 finer (including one Ultra Cameo) (1/18). NGC ID# 27U6, PCGS# 86429
- 4834 1872 PR64 PCGS. CAC. With a proof mintage of 950 coins, survivors of the 1872 Philadelphia coinage are plentiful, so careful selection of quality is important. This Choice proof example has deeply mirrored fields, sharply defined devices, delicate peripheral gold toning, and considerable field-to-device contrast. An outstanding piece for the grade. Population: 43 in 64, 21 finer. CAC: 6 in 64, 7 finer (1/18).

 From The Property of a Lady. NGC ID# 27U7, PCGS# 6430
- 4835 1872 PR63 Cameo NGC. Cameo examples of the 1872 proof half dollar are scarce regardless of numeric grade. This Select representative displays modest contrast and brilliant surfaces. The eagle's left (facing) foot is weak, but the remainder of the design is sharp. Scattered hairlines in the fields define the grade. Census: 7 in 63 Cameo, 19 finer (12/17). NGC ID# 27U7, PCGS# 86430
- 4836 1873 No Arrows, Closed 3 PR64 Cameo PCGS. An exquisite Choice Cameo proof, this 1873 No Arrows half dollar was struck early in the year. Both sides have brilliant centers within a frame of peripheral gold and iridescent toning. Exceptional contrast is evident on each side. The devices are boldly defined. Population: 16 in 64 Cameo, 10 finer (1/18).

 From The Property of a Lady. NGC ID# 27U8, PCGS# 86431
- 4837 1873 Arrows PR62 Cameo PCGS. Congress authorized a weight change for silver coinage in 1873, a slight increase of the standards, signified by the addition of arrows left and right of the date, as had been done 20 years earlier when the weight was slightly decreased. This brilliant Cameo proof exhibits exhibits sharp design motifs and excellent contrast on untoned silver surfaces. Population: 10 in 62 Cameo, 32 finer (1/18).

 From The Sea Cliff Collection. NGC ID# 27UU, PCGS# 86434
- 4838 1873 Arrows PR63 Cameo NGC. Large Arrowheads. Light to medium chestnut-gold toning visits the margins but the fields and devices are close to brilliant. Fully struck and flashy with consistent frost over the motifs. Careful rotation beneath a lens reveals faint field hairlines. A very scarce proof type with significant cameo contrast. Census: 7 in 63 Cameo (1 in 63★), 18 finer (12/17). Ex: Long Beach Signature (Heritage, 2/2012), lot 3672.

 From The Bayside Collection. NGC ID# 27UU, PCGS# 86434
- **4839 1874 Arrows PR62 PCGS.** A pleasing proof, this Arrows issue has fully mirrored fields and sharp design features that are visible through delicate gold and iridescent toning. **From The Property of a Lady.** NGC ID# 27UV, PCGS# 6435
- 4840 1875 PR64 NGC. An attractive Choice proof, this piece exhibits light contrast and is a borderline Cameo proof, although undesignated. Both sides are brilliant within a frame of peripheral gold toning. Census: 41 in 64 (1 in 64★), 37 finer (1/18). From The Bayside Collection. NGC ID# 27U9, PCGS# 6436

1875 Half Dollar, PR66 Boldly Struck and Lightly Toned

- 4841 1875 PR66 PCGS. Both sides of this Premium Gem exhibit delicate cameo contrast with deeply mirrored fields and satiny devices. The design motifs are bold. The surfaces exhibit wispy champagne toning with light gold and vibrant blue toning at the borders. Proofs are rarely offered this fine, and PCGS lists only a single Cameo in this grade. Population: 11 in 66, 4 finer (including one Cameo) (1/18).
 - Ex: New York Signature (Heritage, 12/2011), lot 3642; Central States Signature (Heritage, 4/2013), lot 2257; PNG Invitational Signature (Heritage, 2/2015), lot 3123. NGC ID# 27U9, PCGS# 6436
- 4842 1875 PR64 Cameo PCGS. WB-101. This impressive near-Gem displays razor-sharp definition on all design elements, with rich mint frost that contrasts boldly with the deeply reflective fields. Only 700 proof Seated Liberty half dollars were struck in 1875. Population: 6 in 64 Cameo, 2 finer (12/17).

 Ex: New York Signature (Heritage, 12/2011), lot 3643.
 - From The Bayside Collection. NGC ID# 27U9, PCGS# 86436
- **4843 1876 PR64 PCGS. CAC.** This deeply mirrored Choice Mint State specimen has been carefully preserved and exhibits no distracting marks. A hint of red toning on the rims adds a little color to the mostly brilliant surfaces. Population: 39 in 64, 21 finer. CAC: 9 in 64, 6 finer (1/18).

 Ex: Boston Signature (Heritage, 8/2010), lot 5015.
 - From The Bayside Collection. NGC ID# 27UA, PCGS# 6437
- 4844 1877 PR63 PCGS. A flashy, deeply mirrored proof from this popular 19th century year. Brilliant centers are surrounded by tan peripheries. The main deterrents to a higher grade are located in the right obverse field. Housed in a green label holder.

 Ex: Houston Signature (Heritage, 12/2009), lot 753. NGC ID# 27UC, PCGS# 6438
- 4845 1877 PR63 Cameo PCGS. A lovely Select Cameo proof, this 1877 survives from a smallish mintage of 510 coins. Both sides are brilliant and untoned, save for delicate peripheral gold toning on each side. Sharp devices contrast nicely with the mirrored fields. Population: 9 in 63 (1 in 63+) Cameo, 21 finer (1/18). From The Property of a Lady. NGC ID# 6LUM, PCGS# 86438
- 4846 1878 PR63 Cameo PCGS. Faint hairlines are reflected in the deeply mirrored fields of this lovely Cameo proof. Both sides are brilliant and untoned with intricate design definition. Population: 15 in 63 Cameo, 31 finer (1/18).
 From The Bayside Collection. NGC ID# 27UD, PCGS# 86439
- 4847 1879 PR63 PCGS. Ex: Dick Osburn Collection. Open Bud (Type One Reverse). While the 1879 circulation strike mintage of 4,800 pieces seemed a mere pittance, the proof mintage of 1,100 pieces was generous. Collectors and dealers of the day were keenly aware of the mintages, and many coins of both formats were saved in high grades. This Select proof displays pale-gold toning across smooth, mirrored fields with sharply struck devices. A few areas of deepbrown toning suggest the surfaces are original. Housed in a previous generation green label holder. NGC ID# 27UE, PCGS# 6440
- 4848 1879 PR64 PCGS. CAC. The dusky golden-brown fields and devices are framed by blue-green, olive-gold, and violet-red borders. Type One reverse with an open bud above the H in HALF. The business issue has a closed bud. Certified in a first-generation holder. CAC: 7 in 64, 18 finer (1/18). NGC ID# 27UE, PCGS# 6440

1879 Half Dollar, PR66 Rich Blue and Olive-Gold Patina

- 4849 1879 PR66 PCGS. CAC. The year 1879 saw a dramatic reduction in the production of circulation-strike half dollars, resulting in a new relationship between the availability of regular-issue coins versus proofs (1,100 pieces). These specimens are seen more often in high grades and often take the place of business strikes in collectors' sets. Layers of rich blue and golden-olive patina drape smooth, glassy surfaces. Design definition is expectedly full. Population: 17 in 66, 3 finer. CAC: 6 in 66, 3 finer (1/18). NGC ID# 27UE, PCGS# 6440
- 4850 PR63 PCGS. Ex: Dick Osburn Collection. Closed Bud (Type Two Reverse). Enough 1880 proofs were preserved by dealers and speculators from a mintage of 1,355 pieces to assure collectors an adequate number of Select or finer examples. This lightly toned representative shows a faint mantle of golden-gray patina. Some delicate lines are visible with a loupe over smoothly mirrored fields. The strike is needle-sharp throughout the frosted, silver-white motifs. NGC ID# 27UF, PCGS# 6441
- 4851 1880 PR63 Cameo PCGS. CAC. Light golden overtones turn deep at the rims. A pleasingly contrasted example with light hairlines through the fields but no singular distractions. Population: 26 in 63 (1 in 63+) Cameo, 67 finer. CAC: 3 in 63, 29 finer (1/18). Ex: FUN Signature (Heritage, 1/2012), lot 3628. From The Bayside Collection. NGC ID# 27UF, PCGS# 86441
 - From The Baysiae Collection. NGC 1D# 270F, FCGS# 60441
- 4852 1880 PR64 Cameo NGC. WB-101. Closed Bud. Pale silver interiors yield to gold, orange, and eventually violet at the margins. A well-contrasted specimen with strong obverse detail, though the eagle's head and neck are curiously flat. Census: 27 in 64 Cameo, 38 finer (12/17).
 - Ex: Central States Signature (Heritage, 4/2012), lot 4529. **From The Bayside Collection.** NGC ID# 27UF, PCGS# 86441
- 4853 1880 PR64 Cameo PCGS. This fully brilliant cameo proof has exceptional eye appeal. The fields are very deeply mirrored with only an occasional hairline. The devices are boldly defined and highly lustrous. Population: 26 in 64 (1 in 64+) Cameo, 41 finer (1/18). Ex: Pittsburgh Signature (heritage, 8/2004), lot 6528. From The Bayside Collection. NGC ID# 27UF, PCGS# 86441
- 4854 1881 PR63 Cameo NGC. Ex: Dick Osburn Collection. Open Bud (Type One Reverse). The mirrored fields and frosted devices display stark silver surfaces, with enough contrast to merit the NGC Cameo designation. Philadelphia proof mintage dropped to just 975 pieces struck in 1881, a large decline from the overenthusiastic production of proofs in 1880, when the Trade dollar proof-only issue fueled widespread speculation among dealers. A few light field lines determine the Select proof grade of this sharply struck, brilliant proof. NGC ID# 27UG, PCGS# 86442
- 4855 1882 Misplaced Date, WB-102 PR64 Cameo PCGS. Ex: Dick Osburn Collection. Closed Bud (Type Two Reverse). This is a vibrant, near-Gem contrasted proof, with vivid porthole toning that displays lavender and electric-blue shades at the borders around lively amber-gold centers. 1882 proofs are always in demand at the Choice level or finer, in part because of the unusual Misplaced Date feature that clearly shows two errant 8s in the denticles. This stunning, contrasted proof adds well-mirrored fields and starkly contrasted, sharply struck motifs to the list of positive attributes. The eye appeal is excellent. PCGS# 525784 Base PCGS# 86443

4856 1885 PR64 Cameo PCGS. Ex: Dick Osburn Collection. A honeygold obverse center is framed by apple-green and sun-gold shades for outstanding eye appeal. The reverse displays peach and powderblue margins, yet it is only a bit less intensely toned. The 1885 is a lower mintage proof date (just 930 pieces struck) while the Mint concentrated on its ongoing heavy coinage of silver dollars. This near-Gem Cameo proof is richly toned, brightly mirrored, and splendid in all regards. Population: 22 in 64 (1 in 64+) Cameo, 52 finer; 0 in Deep Cameo, 3 finer (1/18). NGC ID# 27UL, PCGS# 86446

1886 Seated Half, PR65 Cameo Splendid Frosted Motifs

- 1886 PR65 Cameo PCGS. The figure of Liberty is fully struck, richly frosted, and pristine while the eagle is razor-sharp. Both central motifs stand out against brilliant, silver-mirrored fields that harbor a faint tinge of light-gold patina. There are no distracting marks or delicate lines of individual mention a true Cameo Gem, suitable for a fine collection of splendid proofs. Just 886 pieces were struck, and few survive any finer. Population: 11 in 65 (2 in 65+) Cameo, 8 finer; 1 in Deep Cameo, 2 finer (1/18).

 From The Sea Cliff Collection. NGC ID# 27UM, PCGS# 86447
- 4858 1887 PR64 NGC. Ex: Dick Osburn Collection. Just 710 proofs were struck in 1887 to complement a circulation strike of 5,000 pieces. This Choice proof is richly toned in umber-purple and cobalt-blue shades, with wheat-gold undertones peeking through around the raised elements. A wonderfully original example, razorsharp with glassy mirrors lurking beneath the abundant toning. Census: 41 in 64, 42 finer (1/18). NGC ID# 27UN, PCGS# 6448
- 4859 1888 PR63 PCGS. WB-101. This impressive Select proof Seated Liberty half dollar exhibits sharply detailed design elements and deeply reflective fields throughout. The lightly marked surfaces show delicate hints of greenish-gold toning. From a proof mintage of 832 pieces. Population: 49 in 63, 88 finer (12/17).

 From The Bayside Collection. NGC ID# 27UP, PCGS# 6449
- 4860 1888 PR63 PCGS. WB-101. From a limited proof mintage of 832 pieces, this attractive Select specimen exhibits sharply detailed design elements and deeply reflective fields that show a few minor contact marks and hairlines, but none worthy of individual mention. Population: 49 in 63, 88 finer (12/17). From The Bayside Collection. NGC ID# 27UP, PCGS# 6449
- 4861 1888 PR63 PCGS. CAC. Peach-gold patina is prominent, though the peripheries display blushes of violet-red and navy-blue. This flashy specimen has a good strike and a well-preserved reverse. The right obverse field displays minor hairlines.
 Ex: Irl E. Baker Collection (Stack's, 9/1964), lot 1002.
 From The Property of a Lady. NGC ID# 27UP, PCGS# 6449
- 4862 1889 PR63+ PCGS. WB-101. Attractive shades of lavender, cerulean-blue, and emerald-green toning enhance the outstanding eye appeal of this Plus-graded Select proof. The design elements are sharply detailed and the deeply reflective fields show only minor signs of contact. From a small proof mintage of 711 pieces.

 From The Bayside Collection. NGC ID# 27UR, PCGS# 6450

BARBER HALF DOLLARS

4863 1892 MS64+ PCGS. The first year of issue for the Barber coinage series, the 1892 is often chosen for type collections, and is an integral component of a complete set. This sharply struck Choice Mint State example has rich lavender and gold toning on the obverse, with hints of lavender and blue at the reverse border. From The Property of a Lady. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

1892-O Micro O Half Dollar, Good 4 Necessary for a Complete Barber Half Set

4864 1892-O Micro O, FS-501, Good 4 PCGS. The Micro O variety was created when an O mintmark punch for quarters was used in place of the regular, larger mintmark intended for use on half dollar dies (*Cherrypickers' Guide*, 2012). The PCGS website estimates that fewer than 100 pieces are known. PCGS and NGC have graded 82 examples in all grades, and our Auction Archives show most appearances of the variety occurring since about the year 2000.

This Good 4 offering displays mostly deep-gray fields that highlight light silver-gray devices. Relatively strong definition shows on the obverse, including Liberty's ear and jawline, and the date, stars, and legend. Also, the rim is complete (except for the dentils). The reverse shield and wings show minor detail, but the rim is worn into the tops of the letters UNITED STATES OF, and AMERICA is nearly worn away. Most letters in HALF DOLLAR are quite strong despite, and nearly all of the Micro O mintmark shows. This variety is essential for the completion of a Barber half collection. Housed in a green label holder. Population: 11 in 4, 30 finer (1/18).

Ex: Long Beach Signature (Heritage, 6/2014), lot 4545.

From The Merrill Collection. NGC ID# 24LH, PCGS# 391216

Base PCGS# 6463

4865 1892-S AU58 PCGS. A trace of high-point wear is barely detectable on this lovely near-Mint half dollar. Both sides have iridescent toning splashes on the obverse and mostly untoned silver luster on the reverse.

From The Property of a Lady. NGC ID# 24LJ, PCGS# 6464

- 4866 1892-S MS64 PCGS. A scarce issue in the Barber half dollar series, the 1892-S was not saved at the time of issue, and those that do appear in today's marketplace are apt to be well circulated. This Choice Mint State example has a sharp strike and frosty luster. The obverse has dappled gold toning and the reverse is brilliant. Population: 34 in 64 (1 in 64+), 20 finer (1/18). NGC ID# 24LJ, PCGS# 6464
- 4867 1893-O MS64 PCGS. An impressive Choice Mint State New Orleans half dollar, this 1893-O features an excellent strike that shows weakness only at the right facing claw on the reverse. Both sides are highly lustrous with intermingled gold, violet, and seagreen toning on the obverse, and a brilliant, untoned reverse. Population: 49 in 64 (1 in 64+), 9 finer (1/18).

 From The Property of a Lady. NGC ID# 24LL, PCGS# 6466
- 4868 1893-S XF45 PCGS. The 1893-S Barber half dollar claims a small mintage of 740,000 pieces. This Choice XF example shows some light wear on the well-detailed design elements, but LIBERTY remains bold and the lavender-gray surfaces are lightly abraded. NGC ID# 24LM, PCGS# 6467

4869 1893-S AU58 PCGS. CAC. Careful examination under a loupe is required to see the trace of rub that prevents a full Mint State grade to this lovely half dollar. Both sides are mostly brilliant and highly lustrous with satin surfaces. Splashes of gold and iridescent toning appear on the obverse. Population: 25 in 58 (1 in 58+), 61 finer. CAC: 5 in 58, 13 finer (1/18).

From The Property of a Lady. NGC ID# 24LM, PCGS# 6467

1893-S Barber Half Dollar, MS63 Low-Mintage San Francisco Issue

1893-S MS63 PCGS. The 1893-S is one of the better-struck branch mint issues from the 1890s, and this Select Uncirculated example is no exception. The central tailfeather is sharp and the wing junction is crisp, lacking definition only at the very top of the adjacent shield corner. The eagle's right talon and arrow fletchings show minor rounding. The obverse displays a dramatic swath of blue and peachgold toning encircling the lower two-thirds of the coin, while ivory-gold patina embraces the balance. The reverse is brilliant and frosted with a thin band of gold at the rims. Both sides radiate bold mint luster. Population: 22 in 63 (1 in 63+), 29 finer (1/18). From The Property of a Lady. NGC ID# 24LM, PCGS# 6467

4871 1895-O MS63 NGC. This Select Mint State New Orleans Mint Barber half dollar exhibits brilliant silver surfaces and a bold strike. The fields are lightly mirrored behind the lustrous devices, imparting light field-to-device contrast. Census: 10 in 63, 32 finer (1/18). NGC ID# 24LT, PCGS# 6472

1895-S Half Dollar, MS64 Semiprooflike Fields

4872 1895-S MS64 PCGS. A little more than 1.1 million half dollars were struck at San Francisco in 1895, so it is incredible that Choice Mint State survivors are scarce and Gems are rare. The Barber half dollar was a workhorse of the economy from the 1890s to well-beyond the end of the series in 1916. The artistically uninspiring design failed to generate contemporary enthusiasm among numismatists, and high-grade Uncirculated survivors of any date for the most part exist merely by chance. This near-Gem 1895-S displays a full strike and semiprooflike fields. Small daubs of seagreen and amber toning appear in the margins, leaving the interiors brilliant. Population: 37 in 64, 17 finer (1/18).

From The Property of a Lady. NGC ID# 24LU, PCGS# 6473

1896-O Half Dollar, AU58 Challenging New Orleans Issue

4873 1896-O AU58 PCGS. Nearly full mint luster remains across the silver surfaces of this frosted near-Mint 1896-O. A dusting of reddishgold toning visits the upper obverse and lower reverse to enhance the otherwise brilliant coin. We note a few tiny pinpricks on the portrait, yet the strike is sharper than expected for this challenging New Orleans date. Only the eagle's leg and the arrow fletchings show weakness of strike. Population: 6 in 58, 25 finer (1/18). From The Property of a Lady. NGC ID# 24LW, PCGS# 6475

1896-O Half Dollar, AU58 Original Border Toning

4874 1896-O AU58 PCGS. CAC. The 1896-O is a better date, a rarity in Uncirculated condition and seldom offered in AU grades. This CAC-approved near-Mint representative displays lustrous fields and well-struck design elements with a hint of high-point friction and mild chatter on Liberty's cheek. The interiors are brilliant, while both sides display vivid amber-gold, violet, and ocean-blue border rings. Population: 6 in 58, 25 finer. CAC: 1 in 58, 9 finer (1/18). From The Property of a Lady. NGC ID# 24LW, PCGS# 6475

1896-S Half Dollar, MS64 Better Date in the Series

4875 1896-S MS64 PCGS. Like the 1896-S Barber quarter, this half dollar issue is a better date in the series, though not to the same extent. Examples are rare but obtainable in near-Gem condition. Soft mint luster radiates beneath shades of deep steel-gray patina. Nearly fully struck except for the tip of the right shield corner. A small planchet flake is seen in front of the forecurl. Population: 27 in 64 (2 in 64+), 16 finer (1/18). NGC ID# 24LX, PCGS# 6476

4876 1897-O — Cleaned — PCGS Genuine. Unc. Details. A better date in all grades, the 1897-O is surprisingly rare in AU or better grades. The present example has satiny surfaces. The centers are brilliant and the borders are golden-brown and apple-green. The strike is incomplete on select portions of the eagle. Void of detectable marks.

From The Property of a Lady.

4877 1897-S — Cleaned — PCGS Genuine. Unc. Details. An inoffensively hairlined example of this decidedly better San Francisco issue. Autumn-gold and blue-green borders encompass brilliant fields and motifs. The strike is intricate and the fields are prooflike.

From The Property of a Lady.

1897-S Barber Half, MS63 Reflective Fields

4878 1897-S MS63 PCGS. A collectible Select example of the 1897-S half dollar, with finer pieces being scarce and out of the budget of many collectors. There is a small reed mark on Liberty's cheek, but the brilliant, satiny surfaces are otherwise free of major distractions. Some strike weakness on the right shield corner is typical of the issue. The hallmark of this coin is semiprooflike fields. Population: 10 in 63, 63 finer (1/18). NGC ID# 24M2, PCGS# 6479

4879 1898-O MS62 NGC. The 1898-O Barber half is scarce in all Mint State grades. This MS62 piece has contact marks on the cheek but is otherwise free of distractions. Deep russet-olive and gray toning blankets satiny luster on each side. Census: 7 in 62, 25 finer (1/18). NGC ID# 24M4, PCGS# 6481

1898-S Half Dollar, MS63 A Better Date in High Grade

4880 1898-S MS63 PCGS. The 1898-S is scarce in all Mint State grades. This Select example displays mostly brilliant satin luster with daubs of russet and aquamarine toning at the margins. Minor strike softness on eagle's right (facing) shoulder is normal for the issue and less prominent than on some 1898-S halves that we have seen. Population: 10 in 63, 30 finer (1/18).

From The Property of a Lady. NGC ID# 24M5, PCGS# 6482

1898-S Half Dollar, MS64 Few Coins Saved in High Grades

4881 1898-S MS64 PCGS. Most of the 2.3 million Barber half dollars struck at the San Francisco Mint in 1898 were put into circulation. Perhaps a roll or two were saved, but there were few contemporary collectors interested in mintmarked coins at that time. Strike definition is excellent on the obverse. The right shield-wing juncture and talon are incomplete. Well-preserved, softly frosted surfaces are draped in golden patina. Population: 14 in 64, 16 finer (1/18). NGC ID# 24M5, PCGS# 6482

1899-O Barber Half Dollar, MS64 Shimmering Satin Luster

4882 1899-O MS64 PCGS. As with most Barber half dollars, the 1899-O is conditionally rare in Gem condition, and in the current MS64 grade examples are elusive. This piece displays shimmering satin luster and a hint of light golden toning. A few subtle daubs of russet also appear on the obverse. The usual strike softness is visible on the eagle's right (facing) talons and wing junction, although that area is better-struck than on many New Orleans half dollars of the 1890s. Population: 30 in 64 (3 in 64+), 20 finer (1/18).

From The Property of a Lady. NGC ID# 24M7, PCGS# 6484

4883 1900 MS65 PCGS. This Philadelphia issue is moderately plentiful through MS64, but Gems are scarce and anything finer is genuinely rare. The present coin displays a sharp strike and blatantly original, frosty mint luster with no obvious abrasions. Beautiful old-time toning yields radiant multicolor hues around the margins with champagne-gray interiors. Population: 34 in 65 (4 in 65+), 15 finer (12/17).

From The Jamestown Collection, Part II. NGC ID# 24M9, PCGS# 6486

1900-O Half Dollar, MS63 Attractive Luster, Scarce This Fine

4884 1900-O MS63 PCGS. The 1900-O Barber half dollar circulated extensively and is available today in well-worn grades. The availability begins to decline in the VF and XF grade levels, and this date is genuinely rare in problem-free Mint State. The present coin displays frosty, shimmering mint luster and is virtually brilliant across both sides. The fields are clean, but a loupe reveals slide marks on Liberty's cheek, probably from an old coin album. The centers are deficiently struck, likely accounting for the grade from PCGS. Population: 12 in 63 (1 in 63+), 26 finer (1/18). From The Property of a Lady. NGC ID# 24MA, PCGS# 6487

4885 1900-S MS62 PCGS. Both sides of this pleasing Mint State piece are highly lustrous with the slightest trace of peripheral gold toning on otherwise brilliant and untoned silver surfaces. Population: 9 in 62 (1 in 62+), 55 finer (1/18).

From The Property of a Lady. NGC ID# 57PC, PCGS# 6488

4886 1901 MS65 PCGS. This debut 20th century half dollar issue is rare in Gem condition and uncollectible for most enthusiasts in higher grades. This MS65 coin displays a bold strike and original, frosty mint luster. Golden-gray interiors cede to vivid multicolor border hues, which have a pastel appearance on the reverse. Population: 13 in 65, 7 finer (12/17).

From The Jamestown Collection, Part II. NGC ID# 24MC, PCGS# 6489

1901-O Half Dollar, MS62 Elusive in Mint State

4887 1901-O MS62 PCGS. This conditionally scarce Mint State 1901-O Barber half dollar displays well-struck obverse details but is predictably weak on the right side of the eagle's body. A hint of champagne toning warms both sides. As the grade suggests, scattered abrasions are readily apparent, but none are individually significant. Population: 10 in 62, 31 finer (1/18).

From The Property of a Lady. NGC ID# 24MD, PCGS# 6490

4888 1903 MS63 PCGS. The 1903 Barber half dollar is a scarce issue in high grade. This pleasing Select specimen offers well-detailed design elements and lightly marked surfaces, under vivid shades of slate-gray, sea-green, and lavender-gray toning, with deeper color on the obverse. Satiny mint luster shines through the patina. Population: 17 in 63, 49 finer (1/18).

From The Jamestown Collection, Part II. NGC ID# 24MJ, PCGS# 6495

4889 1903 MS64 PCGS. CAC. The motifs are well-defined with softness limited to the last few obverse stars and right shield-wing juncture. Antique golden-gray and steel-blue patina covers much of this Choice Uncirculated Barber half dollar. Population: 36 in 64 (1 in 64+), 13 finer. CAC: 8 in 64, 7 finer (1/18). NGC ID# 24MJ, PCGS# 6495

1904 Half Dollar, MS65 Surprisingly Rare in Gem Condition

4890 1904 MS65 PCGS. The 1904 is a sleeper Philadelphia date in high Mint State conditions, and it is possible for a full year to pass without offering a single MS65 example to cross the block in one of our auctions. This sharp Gem example displays partially prooflike fields that shimmer with iridescent colors including pale champagne-gold, lavender, and rose hues. A full strike encompasses the eagle's right shield/wing junction as well as the leg, talons, and arrows. Population: 17 in 65 (2 in 65+), 7 finer (1/18). NGC ID# 5EPG, PCGS# 6498

4891 1904-S VF20 PCGS. CAC. A pleasing medium gray example with natural surfaces that show minimal marks. LIBERTY on the headband is complete, and the eagle has considerable detail. An important opportunity to acquire this elusive issue in a seldom-encountered grade. NGC ID# 24MP, PCGS# 6500

1904-S Barber Half Dollar, XF40 Attractively Toned Key

4892 1904-8 XF40 PCGS. Gray-rose patina yields the faintest of steel-blue accents on this attractively and originally toned Barber half dollar from one of the key issues in the series. Barely more than a half million examples were struck, and survivors are generally found in heavily circulated condition, between Fine 15 and VF20. This strong example is clearly well above-average. NGC ID# 24MP, PCGS# 6500

4893 1904-S — Cleaned — PCGS Genuine. AU Details. Just a trace of actual wear shows on the strongly impressed design elements, and the lightly abraded surfaces retain much original mint luster on the reverse, despite the noted cleaning. A few hints of lavendergray and pale gold toning are evident. The 1904-S is a better date in high grade.

4894 1905-8 MS62 PCGS. CAC. Pale gray and peripheral gold toning appear on both sides of this pleasing example. The fields are mildly prooflike, contrasting nicely with the lustrous devices. Population: 8 in 62, 42 finer. CAC: 1 in 62, 5 finer (1/18).

From The Property of a Lady. NGC ID# 24MT, PCGS# 6503

1906-S Half Dollar, Frosty MS64 CAC-Approved Condition Rarity

4895 1906-S MS64 PCGS. CAC. A remarkably well-struck and well-preserved near-Gem example, showing frosty luster and a faint tinge of champagne color overall. There is a pleasant lack of bothersome abrasions and eye appeal is generous. The 1906-S is moderately scarce in this grade and rare with the CAC green label. Finer coins are seldom offered. Population: 44 in 64 (2 in 64+), 21 finer. CAC: 7 in 64, 12 finer (1/18).

From The Property of a Lady. NGC ID# 24MX, PCGS# 6507

4896 1907-D MS65 PCGS. The 1907-D is generally a common date, although Gem examples are conditionally scarce. This piece is satiny and brilliant, showing only a few faint grazes on Liberty's cheek. The strike is sharp on the shield and eagle's talons, and no weakness occurs on the obverse stars. Population: 23 in 65, 16 finer (1/18). NGC ID# 24MZ, PCGS# 6509

1907-O Half Dollar, Frosty MS65+ Late Reverse Die State

4897 1907-O MS65+ PCGS. CAC. A conditionally rare Gem example of this otherwise plentiful New Orleans issue, showing lovely original luster and a frosty cartwheel effect. Light golden interiors cede to vivid orange-gold, olive, russet, and aquamarine border toning, and few abrasions are visible under a loupe. Struck with an excessively eroded reverse die, with heavy metal flowlines in the margins on that side and die buckling on the eagle's right (facing) wing. Clash marks are also apparent. Population: 16 in 65 (3 in 65+), 9 finer. CAC: 5 in 65, 11 finer (1/18).

From The Property of a Lady. NGC ID# 24N2, PCGS# 6510

1907-S Barber Half Dollar, MS62 Vivid Peripheral Toning

4898 1907-S MS62 PCGS. The 1907-S Barber half dollar claims a mintage of 1.2 million pieces, but the issue is rare in MS62 condition. This attractive MS62 specimen is sharply detailed in most areas, but just a touch of the usual softness shows on the shield point. The brilliant centers are surrounded by vivid rings of sea-green and lavender toning and the lustrous surfaces show the minimum number of minor contact marks for the grade. Population: 14 in 62, 38 finer (1/18).

From The Property of a Lady. NGC ID# 24N3, PCGS# 6511

4899 1908 MS64 PCGS. While the 1908 is a plentiful issue, few have earned high grades from the certification services. This near-Gem has frosty silver luster and brilliant, untoned surfaces. Trivial lines on Liberty's cheek prevent a higher grade. Population: 62 in 64 (1 in 64+), 25 finer (1/18).

From The Property of a Lady. NGC ID# 24N4, PCGS# 6512

- 4900 1908-S MS62 PCGS. The brilliant and mostly untoned silver surfaces exhibit satin luster with peripheral gold, violet, and blue toning, primarily on the obverse. An attractive representative that has a low Mint State population. Population: 7 in 62, 50 finer (1/18). From The Property of a Lady. NGC ID# 24N7, PCGS# 6515
- 4901 1909 MS65 PCGS. Delicate gold and iridescent toning visits the satiny and highly lustrous surfaces of this Gem Barber half dollar. The 1909 is a plentiful date from a mintage of more than 2 million coins. Population: 62 in 65 (1 in 65+), 16 finer (1/18). NGC ID# 24N8, PCGS# 6516
- 4902 1909-S MS63 PCGS. A few trivial hairlines on Liberty's cheek limit the grade of this piece that has the eye appeal of a much higher grade. Both sides are brilliant and highly lustrous with delicate peripheral lilac toning on the obverse. A few dark toning splashes are evident on the reverse. Population: 18 in 63 (1 in 63+), 51 finer (1/18). From The Property of a Lady. NGC ID# 24NA, PCGS# 6518 Base PCGS# 6518
- 4903 1910-S MS62 PCGS. Trivial slide marks are noted on Liberty's cheek, limiting the grade to MS62. The eye appeal suggests a higher grade. This piece has wisps of blue and lavender toning at the lower obverse. Population: 14 in 62, 63 finer (1/18). From The Property of a Lady. NGC ID# 24NC, PCGS# 6520
- 4904 1911-D MS65 PCGS. This amazing Denver Mint Barber half dollar is an important entry for its condition rarity. Both sides are frosty and highly lustrous with sharp design motifs. Light peripheral gold and iridescent toning. Population: 27 in 65 (1 in 65+), 14 finer (1/18). From The Property of a Lady. NGC ID# 24NE, PCGS# 6522
- 4905 1912-D MS64 PCGS. CAC. An attractive Choice Mint State Denver Mint half dollar, this example has brilliant silver luster and frosty mint surfaces beneath pleasing light gold and iridescent toning on both sides. CAC: 23 in 64, 31 finer (1/18). From The Property of a Lady. NGC ID# 24NH, PCGS# 6525
- 4906 1912-S MS63 PCGS. This Select Mint State Barber half dollar has brilliant silver surfaces with subliminal champagne toning. The strike exhibits typical weakness at the junction of the wing and the right shield border.

From The Property of a Lady. NGC ID# 24NJ, PCGS# 6526

1913 Barber Half Dollar, MS64 Rarely Seen Finer

4907 1913 MS64 PCGS. From a small mintage of 188,000 pieces, this impressive Choice Barber half dollar is sharply detailed in most areas, but just a touch of the typical softness is evident on the shield point and adjacent wing. The well-preserved surfaces radiate vibrant mint luster throughout, with a few highlights of sea-green and lavender toning. Population: 33 in 64, 21 finer (1/18). From The Property of a Lady. NGC ID# 24NK, PCGS# 6527

4908 1913-D MS64 PCGS. CAC. A fully lustrous Choice Mint State example, this 1913-D Barber half dollar exhibits natural light gray surfaces and dappled gold toning. Sharply struck and attractive. Population: 60 in 64 (2 in 64+), 22 finer. CAC: 18 in 64, 7 finer (1/18).

From The Merrill Collection. NGC ID# 24NL, PCGS# 6528

- 4909 1913-S MS64+ PCGS. CAC. An unusual year in the Barber half dollar series, as production at all three mints was well under 1 million coins. The highest mintage was 604,000 coins at San Francisco. The only other similar year was 1914, but no coins were minted that year in Denver. This Choice Mint State piece has faint champagne toning on satiny and lustrous silver surfaces. Population: 31 in 64 (1 in 64+), 21 finer. CAC: 3 in 64, 8 finer (1/18). From The Property of a Lady. NGC ID# 24NM, PCGS# 6529
- 4910 1914-S MS64 PCGS. CAC. A scarce date for Barber collectors, as Philadelphia produced a mere 124,230 half dollars, and San Francisco contributed 992,000 impressions. This Choice Mint State piece exhibits bold design definition with faint iridescent splashes. Population: 39 in 64, 37 finer. CAC: 5 in 64, 19 finer (1/18). From The Property of a Lady. NGC ID# 24NP, PCGS# 6531
- 1915-D MS65 PCGS. A lovely Gem from the final year of issue for the series, this Denver Mint representative has a bold strike with splendid ivory surfaces and traces of gold toning. Population: 66 in 65 (1 in 65+), 24 finer (1/18).

From The Property of a Lady. NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLARS

- 4912 1892 PR64 PCGS. The eagle's right (facing) shoulder is weak, but the strike is otherwise sharp on this Choice proof first-year Barber half dollar. Much of each side is brilliant or nearly so, although the margins show splashes of blue, gold, and russet toning. Some fielddevice contrast is apparent on each side. NGC ID# 24NU, PCGS#
- 4913 1893 PR65 PCGS. CAC. A blush of light blue border toning graces the top of IN GOD WE TRUST, while the remainder of each side has warm golden coloration. This Gem proof has modest cameo contrast, not designated on the green label holder in which it resides. Eye appeal is pleasing despite some strike weakness at the eagle's right (facing) shoulder. CAC: 5 in 65, 12 finer (1/18). NGC ID# 24NV, PCGS# 6540

1894 Half Dollar, PR66 Cameo Attractive Original Toning

4914 1894 PR66 Cameo PCGS. This Premium Gem proof is sharply struck and modestly contrasted. The obverse shows light golden interior toning with blue, lavender, and olive around the borders. A brilliant center and olive-gold margins characterize the reverse. The 1894 proof half dollar is scarce in this grade and seldom offered finer. Population: 21 in 66 (3 in 66+) Cameo, 7 finer (1/18). NGC ID# 24NW, PCGS# 86541

1897 Barber Half Dollar, PR67 Vivid, Multicolor Toning

- 4915 1897 PR67 PCGS. The 1897 proof is scarce in Superb Gem condition. This toned example displays yellow-gold and sea-green hues over both sides, and impressively sharp design elements deliver subtle cameo contrast even through the rich patina. No imperfections are observed. There are a number of Cameos and Deep Cameos in this and finer numeric grades. Non-Cameos are rare this fine. Population: 10 in 67, 3 finer (8/17). NGC ID# 24NZ, PCGS# 6544
- 4916 1899 PR64 PCGS. This Choice proof is fully struck and free of bothersome contact marks. Both sides show deep gold, olive, and lavender toning that fails to fully subdue the reflectivity in the fields. NGC ID# 6C4V, PCGS# 6546
- 4917 1900 PR64 NGC. This wonderful Choice proof exhibits a bold strike, frosty and lustrous design motifs, and rich gold, blue, and iridescent toning. An outstanding turn-of-the-century example for the connoisseur.
 - From The Sea Cliff Collection. NGC ID# 24P4, PCGS# 6547
- 4918 1902 PR64 Cameo PCGS. Fully and deeply mirrored fields provide an excellent background for the satiny silver devices of this sharply defined Choice Cameo proof. Hints of violet toning add to the eye appeal. Cameo proofs from the first decade of the 20th century are rarely encountered. Population: 9 in 64 Cameo, 21 finer (1/18). NGC ID# 24P6, PCGS# 86549
- 4919 1903 PR63 PCGS. CAC. A thin crescent of blue and violet toning is evident at the bottom of the obverse on this Select proof that has brilliant and untoned silver surfaces and a bold strike. From The Property of a Lady. NGC ID# 24P7, PCGS# 6550
- **4920 1904 PR63 PCGS.** A lovely Select proof from a mintage of only 670 examples, this 1904 Barber half dollar has spectacular gold and iridescent toning over its brilliant proof surfaces with boldly detailed and satiny devices.
 - From The Property of a Lady. NGC ID# 24P8, PCGS# 6551

4921 1905 PR65 PCGS. Although undesignated, this Gem proof exhibits obvious field-to-device contrast. The brilliant silver surfaces have traces of peripheral gold and violet toning. A highly appealing example. Population: 44 in 65, 47 finer (1/18).

From The Property of a Lady. NGC ID# 24P9, PCGS# 6552

1909 Barber Half Dollar, PR67 Colorful Patina

- 4922 1909 PR67 PCGS. Rich multicolor toning limits contrast on this Superb Gem proof. Shades include violet, gold, blue, and green. Sharpness of strike is as expected: complete throughout, including the right shield/wing juncture. As mentioned previously, the toning serves to obscure contrast, but it also has the added benefit of concealing what few marks stand in the way of an even higher grade. Population: 13 in 67 (1 in 67+), 8 finer in this category (1/18). NGC ID# 24PD, PCGS# 6556
- 4923 1909 PR63 Cameo PCGS. This impressive Select example exhibits razor-sharp definition on all design elements, and the frosty devices contrast boldly with the deeply mirrored, brilliant fields. As-made die polishing lines are visible on Liberty's cheek and neck. Population: 4 in 63 (1 in 63+) Cameo, 56 finer (12/17). Ex: Long Beach Signature (Heritage, 6/2014), lot 4048; FUN Signature (Heritage, 1/2015), lot 5094. NGC ID# 24PD, PCGS# 86556
- 4924 1909 PR63 Cameo PCGS. Excellent contrast is observed on this Select Cameo proof that exhibits mirrored fields around satin devices, all beneath splashes of blue and iridescent toning. Population: 4 in 63 (1 in 63+) Cameo, 56 finer (1/18). NGC ID# 24PD, PCGS# 86556

1909 Half Dollar, PR65 Cameo Concentric Multicolor Toning

4925 1909 PR65 Cameo PCGS. CAC. Eye-appealing concentric rings of multicolor toning define the obverse. The same colors are intermixed across the reverse with shades that include orange, violet, blue, and green. The centers remain brilliant, enhancing contrast between the motifs and reflective fields that surround them. From a mintage of 650 specimens. NGC ID# 24PD, PCGS# 86556

1910 Barber Half Dollar, PR66 Low-Mintage Proof Issue

- 4926 1910 PR66 PCGS. From a modest mintage of 551 pieces, this impressive Premium Gem exhibits sharply detailed design elements throughout and the impeccably preserved surfaces show deeply mirrored fields, under dappled shades of sea-green and violet toning. Eye appeal is outstanding. Population: 17 in 66, 16 finer (1/18). NGC ID# 26A4, PCGS# 6557
- 4927 1911 PR64 PCGS. Only 543 proof Barber half dollars were struck in 1911. This impressive Choice specimen exhibits razor-sharp definition on all design elements and the lightly marked surfaces include deeply reflective fields. Both sides are blanketed in vivid shades of steel-blue, greenish-gold, and cerulean-blue toning, with terrific eye appeal. Population: 61 in 64, 55 finer (1/18). NGC ID# 24PF, PCGS# 6558

WALKING LIBERTY HALF DOLLARS

- 4928 1916-D MS65 PCGS. The three mints combined to strike 2.1 million half dollars featuring Adolph A. Weinman's new design that was introduced in 1916. Nearly half the production, just over 1 million coins, was emitted from the Denver Mint. This Gem features soft champagne and blue toning over frosty silver luster. From The Property of a Lady. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567
- 4929 1916-S AU55 PCGS. A Choice AU half dollar, from the first year of the Walking Liberty design, this coin exhibits only light wear on the well-detailed design elements and the still-lustrous surfaces show subtle hints of pale gold and lavender toning.
 From The Douglas Knight Collection, Part II. NGC ID# 24PN, PCGS# 6568
- 4930 1916-S AU58 PCGS. Only a trace of wear shows on the strongly impressed design elements of this attractive, near-Mint Walking Liberty half dollar, with lightly abraded surfaces that retain much original mint luster. From a small, first-year mintage of 508,000 pieces.

From The Douglas Knight Collection, Part II. NGC ID# 24PN, PCGS# 6568

4931 1916-S MS62 PCGS. Medium wheat-gold toning confirms the originality of this lustrous and surprisingly unabraded representative. The strike shows expected blending on portions of the motifs. Certified in a green label holder. NGC ID# 24PN, PCGS# 6568

1916-S Walking Liberty Half, MS64+ Low-Mintage, Early Series Issue

- 4932 1916-S MS64+ PCGS. CAC. Despite a small mintage of 508,000 pieces, the 1916-S Walking Liberty half dollar can be located in MS64 condition with a little patience, but the issue becomes scarce in finer grades. This well-detailed Plus-graded Choice specimen exhibits a better-than-average strike and lightly marked, lustrous surfaces, with a few highlights of pale gold toning. From The Property of a Lady. NGC ID# 24PN, PCGS# 6568
- 4933 1917-D Obverse MS63 PCGS. In 1916, and continuing into early 1917, the Walking Liberty half dollars struck at Denver and San Francisco had their mintmarks below the motto on the obverse. The mintmarks were quickly moved to the reverse part way through the second year of production for this design. A pleasing Select Mint State example, this half dollar has light gold toning over frosty mint luster. NGC ID# 24PR, PCGS# 6570

1917-D Walking Liberty Half, MS64 Popular Obverse Mintmark Variant

- 4934 1917-D Obverse MS64 PCGS. CAC. This impressive Choice example was struck early in the year, before the mintmark was moved to the reverse. The 1917-D Obverse Walking Liberty half dollar claims a small mintage of 765,400 pieces, and the issue is very scarce in grades above the MS64 level. This well-detailed specimen offers lightly marked, lustrous surfaces with outstanding eye appeal. From The Property of a Lady. NGC ID# 24PR, PCGS# 6570
- 4935 1917-D Reverse MS63 PCGS. The first branch mint Walking Liberty half dollars had the mintmark on the obverse that was soon relocated to the reverse is 1917. This fully lustrous Select Mint State example has a typical strike with brilliant and frosty silver surfaces. NGC ID# 24PS, PCGS# 6571

1917-D Walking Liberty Half, MS64 Underrated Reverse Mintmark Variant

- 4936 1917-D Reverse MS64 PCGS. The mintmark was moved to the reverse on the Walking Liberty half dollar partway through the year in 1917 and the 1917-D is an underrated issue in high grade, because few examples were saved by contemporary collectors. This attractive Choice example offers a bold strike, with some definite separation between Liberty's thumb and fingers on the wreath hand. The well-preserved, lustrous surfaces show hints of sea-green and lavender toning. PCGS has graded 55 numerically finer examples (1/18). From The Property of a Lady. NGC ID# 24PS, PCGS# 6571
- 4937 1917-S Reverse MS62 NGC. Dusky gray and dappled gold toning appears on the satiny surfaces of this brilliant 1917-S Reverse Mintmark Walking Liberty half dollar. NGC ID# 24PU, PCGS# 6573
- 4938 1918-D MS63 PCGS. A splash of gold toning appears at the left side of the obverse on this Select Mint State half dollar that features brilliant silver luster and above average design definition for this early Walking Liberty issue. NGC ID# 24PW, PCGS# 6575
- 4939 1918-S MS63 PCGS. This Select 1918-S Walker is well-struck on Liberty's head and branch hand, and shows warm golden toning with deep russet accents in the recesses. Scattered light abrasions account for the grade but do not detract on account of the deep patina. NGC ID# 24PX, PCGS# 6576
- 4940 1919-D XF45 PCGS. An impressive Choice XF example of this key issue that hides in the shadow of the 1921-S Walking Liberty half dollar. Pleasing and natural light silver-gray surfaces exhibit hints of gold toning that is virtually undetectable on the reverse. NGC ID# 24PZ, PCGS# 6578

1927-S Half Dollar, MS64 Golden-Tan Accents

4941 1927-S MS64 PCGS. This attractive Select specimen shows some of the typical incompleteness on the wreath hand and eagle's leg, but the peripheral design elements are sharp. Lightly marked surfaces radiate softly frosted mint luster under delicate hints of golden-tan toning. A challenging issue in the series without entries from the Philadelphia or Denver mints in 1927. NGC ID# 24RA, PCGS# 6587

1928-S Walking Liberty Half, MS63 Lightly Marked and Lustrous

4942 1928-S MS63 PCGS. From a mintage of 1.9 million pieces, the 1928-S Walking Liberty half dollar is a leading strike rarity in the series. This impressive Select example offers well-detailed design elements, with a touch of the typical softness on Liberty's head and wreath hand, and the eagle's trailing leg on the reverse. The lightly marked surfaces are mostly brilliant, with vibrant mint luster and a few hints of beige toning.

From The Property of a Lady. NGC ID# 24RB, PCGS# 6588

1928-S Half Dollar, MS64 Sole Issue for the Year

- 4943 1928-S MS64 PCGS. Examples of the 1928-S half dollar, the sole emission for this year, are highly prized in Uncirculated condition. Rightfully so, this is a popular semikey with a low mintage of 1.9 million coins, most of which entered into circulation. The head and date are bold. Incompleteness is limited to the upper skirt lines and branch hand. Specks of olive-gold and gunmetal patina complement frosty, minimally toned surfaces. Seldom seen finer. NGC ID# 24RB, PCGS# 6588
- 4944 1929-D MS64 PCGS. CAC. Wispy rose toning graces the surfaces of this adequately struck Walking Liberty half dollar. Coinage was intermittent throughout the 1920, with examples struck at all three mintage in 1920 and 1921, at San Francisco only in 1923, 1927, and 1928, and at Denver and San Francisco in 1929. This example represents the Denver emission and presents excellent eye appeal. From The Property of a Lady. NGC ID# 24RC, PCGS# 6589
- 4945 1933-S MS64 PCGS. The only Walking Liberty half dollar issue for the year is always subject to strong date pressure. Merely 1.7 million coins were struck. This near-Gem presents pinpoint detail on Liberty's head, branch hand, and skirt lines. Blushes of light seagreen and pale gold toning complement mostly silver-gray surfaces. NGC ID# 24RE, PCGS# 6591
- 4946 1933-S MS65 PCGS. With a mintage of 1.7 million pieces, the 1933-S Walking Liberty half dollar becomes scarce in grades above the MS65 level. This attractive Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces, under low-intensity shades of pale gold toning. Overall eye appeal is outstanding. From The Property of a Lady. NGC ID# 24RE, PCGS# 6591
- 4947 1933-S MS65 PCGS. The final year of the early Walking Liberty half dollar series is represented here by an exquisite Gem that has brilliant and frosty luster with nearly full design definition. NGC ID# 24RE, PCGS# 6591

- 4948 1934 MS67 ★ NGC. Iridescent lime-green, lilac-red, and lemongold toning endows both sides of this virtually pristine Superb Gem. Liberty's head shows minor softness, but the strike is generally sharp. The NGC Census shows only six pieces with a Star designation in all grades, including the finest two at the MS67 level (12/17). NGC ID# 24RF, PCGS# 6592
- 4949 1934 MS67 PCGS. CAC. A delightful Superb Gem Walking Liberty half dollar, with sharply detailed design elements that show distinct separation between Liberty's thumb and fingers on the wreath hand. The impeccably preserved surfaces radiate satiny mint luster, under pleasing shades of golden-brown and lavender toning. PCGS has graded eight numerically finer examples (1/18). NGC ID# 24RF, PCGS# 6592
- 4950 1934-S MS64 PCGS. CAC. This richly toned near-Gem has extraordinary eye appeal that is created from fully brilliant mint luster and outstanding gold and iridescent toning. A few scattered marks are noted in the fields of this sharply struck half dollar. From The Property of a Lady. NGC ID# 24RH, PCGS# 6594
- 4951 1934-S MS65 PCGS. CAC. A highly lustrous Gem, this half dollar exhibits attractive dappled gold toning on both sides, with deeper golden-brown accents, all over frosty mint surfaces. An above average strike completes the picture of this eye appealing example. NGC ID# 24RH, PCGS# 6594

1935 Half Dollar, MS67 Just One Coin Numerically Finer at PCGS

- 4952 1935 MS67 PCGS. CAC. A dazzling Superb Gem, CAC-endorsed, with better head details than usually seen, and a remarkably sharp, well-defined eagle. Pink and lemon-yellow highlights add eye appeal to faintly iridescent, frosted surfaces that emit waves of silver luster. Marks are limited to a few tiny ticks. Population: 61 in 67 (5 in 67+), 1 finer. CAC: 34 in 67, 1 finer (1/18). NGC ID# 24RJ, PCGS# 6595
- 4953 1935-D MS65 PCGS. Compared to some other Walking Liberty half dollar issues of the decade, the 1935-D has a rather low population in top grades. This fully original ivory Gem exhibits frosty mint luster and traces of peripheral gold along the borders. From The Property of a Lady. NGC ID# 24RK, PCGS# 6596
- 4954 1935-D MS65 PCGS. CAC. A coruscating Gem that displays original gunmetal-gray and olive-green toning with hints of ruby-red along the left-side borders. Delicate contact on the right obverse field precludes a finer grade. Encapsulated in an old green label holder. NGC ID# 24RK, PCGS# 6596
- 4955 1935-D MS66 PCGS. Brilliant and flashy frosted surfaces lack any evidence of toning and are free from any distracting marks. As usually seen, this Gem 1935-D is a trifle weak through the head, branch hand, and leg, as well as at the eagle's leg. All other elements are sharply rendered and the eye appeal is terrific. NGC ID# 24RK, PCGS# 6596
- 4956 1935-D MS66 PCGS. A lovely Premium Gem, this 1935-D Walking Liberty half dollar is tied for the finest that PCGS has certified (1/18). Both sides exhibit brilliant luster and frosty surfaces with an average strike. Splashes of gold patina at the obverse border accompanies the delicate champagne toning. NGC ID# 24RK, PCGS# 6596

4957 1935-S MS65 PCGS. CAC. A wonderful Gem of this conditionally elusive issue, exhibiting an average strike but above average eye appeal. The surfaces are natural ivory with wispy gold toning along the obverse border.

From The Property of a Lady. NGC ID# 24RL, PCGS# 6597

1935-S Walking Liberty Half, MS66 Conditionally Rare Great Depression Issue

4958 1935-S MS66 PCGS. 30th Anniversary Green Label Holder. Light golden-brown borders cede to cream-gray fields and motifs. The lustrous surfaces show only wispy contact. Liberty's head is sharp, though the branch hand and central skirt lines are incomplete. An original and splendid example of this conditionally elusive issue. NGC ID# 24RL, PCGS# 6597

1935-S Half Dollar, MS66 Exceptionally Clean and Attractive

- 4959 1935-S MS66 PCGS. CAC. A semicircle of golden color along the left obverse border and a few splashes of tan patina around the left and lower reverse rim are the only indications of color throughout this otherwise bright and frosty S-mint half dollar. Characteristically soft over the centers, but exceptionally clean and attractive. PCGS reports merely three finer submissions (1/18). NGC ID# 24RL, PCGS# 6597
- 4960 1938-D MS66 PCGS. CAC. This is a frosty, boldly struck Premium Gem example of a key Denver issue, showing virtually no abrasions and exhibiting partial thumb separation on Liberty's branch hand. A hint of light champagne toning graces each side. Housed in a first generation holder with CAC approval. NGC ID# 24RV, PCGS# 6605
- 4961 1938-D MS66 PCGS. CAC. Only nine issues in the Walking Liberty half dollar series had sub-million coin productions. At 491,600 coins, the 1938-D had the third lowest mintage in the entire series behind the 1921 and 1921-D. This Premium Gem has stunning lilac and gold toning with strong design definition and excellent aesthetic appeal. PCGS has only certified 46 finer (1/18). NGC ID# 24RV, PCGS# 6605
- 4962 1938-D MS66+ PCGS. CAC. The key to the late date series of Walking Liberty half dollars, the Denver Mint accomplished a limited output of only 491,600 half dollars of this design in 1938. Examples are in strong demand in all grades. This Premium Gem is an exquisite representative exhibiting wisps of gold toning on its brilliant and frosty silver surfaces. NGC ID# 24RV, PCGS# 6605

- 4963 1939-S MS67 NGC. CAC. The 1939-S Walking Liberty half dollar is occasionally available in MS67, although NGC and PCGS have each seen only a single numerically finer coin (1/18). This CAC-endorsed Registry Set candidate displays partial thumb separation on Liberty's branch hand and excellent sharpness elsewhere. The luster is frosty and attractive, showing a hint of champagne-tinted iridescence. NGC ID# 24RY, PCGS# 6608
- 4964 1939-S MS67 PCGS. CAC. An absolutely stunning Superb Gem, and seldom seen so fine, this example has brilliant and frosty silver mint luster and pristine, untoned surfaces. PCGS has only certified one finer example (1/18). NGC ID# 24RY, PCGS# 6608

1944-D Half Dollar, MS67+ Just One Coin Finer at PCGS

- 4965 1944-D MS67+ PCGS. CAC. Liberty's head and gown are boldly defined on his spectacular Superb Gem half dollar. Partial separation occurs between the thumb and fingers on the branch hand. Satin mint luster glimmers over pristine surfaces that show pale golden accents. Quality, both technical and aesthetic, is virtually unsurpassed. There is only one finer coin at PCGS, and none are finer at CAC (1/18). NGC ID# 24SD, PCGS# 6622 Base PCGS# 6622
- 4966 1944-S MS66+ PCGS. CAC. A whisper of gold toning adorns this lustrous and carefully preserved World War II Walker. The branch hand is softly brought up, but Liberty's head is sharp. Despite a generous mintage, the 1944-S is very rare any finer. NGC ID# 24SE, PCGS# 6623 Base PCGS# 6623
- 4967 1946 Doubled Die Reverse, FS-801, MS65 PCGS. FS-801 is the only Walking Liberty die variety listed in the standard Guide Book. Dramatic doubling is noted on the eagle's wings, the sapling, and E PLURIBUS UNUM. The present piece is a late die state example, but the doubling is nonetheless obvious. Lustrous and unabraded with a splash of plum-red and apple-green patina across the central obverse. NGC ID# 24SJ, PCGS# 145152 Base PCGS# 6632

PROOF WALKING LIBERTY HALF DOLLAR

4968 1936 PR64 PCGS. CAC. This sharp first-year proof Walking Liberty half dollar displays untoned surfaces and deeply reflective fields. The obverse boasts appreciable cameo contrast — a rare sight on this type — although the reverse is more uniformly brilliant. Eye appeal is generous. NGC ID# 27V4, PCGS# 6636

FRANKLIN HALF DOLLARS

- 4969 1949-D MS66 Full Bell Lines PCGS. Attractive shades of golden-brown and lavender toning blanket the well-preserved surfaces of this delightful Premium Gem, with vibrant mint luster underneath. The design elements are sharply detailed and show Full Bell Lines definition. Population: 86 in 66 (9 in 66+) Full Bell Lines, 0 finer (1/18). NGC ID# 5HWE, PCGS# 86654
- 4970 1954-S MS67 NGC. The obverse of this Superb Gem Franklin half dollar has thick gold, green, and iridescent toning that covers the obverse. The reverse is highly lustrous, brilliant, and untoned. Census: 11 in 67 (3 in 67★, 1 in 67+★), 0 finer (1/18). NGC ID# 24TB, PCGS# 6669

1961 Franklin Half Dollar, MS66 Rare Full Bell Lines Example

4971 1961 MS66 Full Bell Lines PCGS. CAC. From a mintage of 8.2 million pieces, the 1961 Franklin half dollar was generally not a well-struck issue and examples in MS66 condition, with Full Bell Lines, are seldom encountered. This sharply detailed Premium Gem does show complete definition on the bell lines, and the well-preserved, lustrous surfaces are blanketed in attractive shades of golden-tan and lavender toning. Population: 16 in 66 (2 in 66+) Full Bell Lines, 0 finer. CAC: 3 in 66, 0 finer (1/18). NGC ID# 24TN, PCGS# 86680

1961-D Half Dollar, MS66 Full Bell Lines Destined for a Top Registry Set

4972 1961-D MS66 Full Bell Lines PCGS. Full Bell Lines examples of the 1961-D half dollar usually are found in near-Gem condition and very scarcely in MS65. Premium Gems of this quality are very rare. Satiny luster emanates from smooth surfaces lightly toned in pale gold patina. Magnification reveals a few trivial marks on the portrait and a couple of reeding marks on the bell. Population: 30 in 66 (1 in 66+) Full Bell Lines, 0 finer (1/18). NGC ID# 24TP, PCGS# 86681

1961-D Half Dollar, MS66 Full Bell Lines Attractive Sunset Patina

4973 1961-D MS66 Full Bell Lines PCGS. Crimson, copper-orange, and gold tones adhere to the border areas, lightening toward the brilliant interiors. Satin mint luster glimmers over fully struck motifs. The portrait and Liberty Bell display a handful of minuscule ticks. Ideal Registry Set coin. Population: 30 in 66 (1 in 66+) Full Bell Lines, 0 finer (1/18). NGC ID# 24TP, PCGS# 86681

4974 1963 MS65 Full Bell Lines PCGS. Soft grayish-brown color adheres to the obverse of this lustrous Franklin. The design elements are well-struck overall, in addition to the Full Bell Lines. A few marks and grazes are noted at the bottom of the bell, as well as die chips. Scarce in Gem and very rare any finer, where PCGS has graded a mere five pieces better than MS65 (1/18). NGC ID# 24TT, PCGS# 86684

PROOF FRANKLIN HALF DOLLARS

4975 1950 PR67 PCGS. The first-year proof Franklin half dollar has a low mintage relative to its successors, and high-grade specimens are surprisingly scarce. This Superb Gem is mostly white but shows golden-brown toning near the rims. Certified in a green label holder. NGC ID# 27VA, PCGS# 6691

1951 Franklin Half, PR67 Cameo Low-Mintage Early Proof Issue

4976 1951 PR67 Cameo PCGS. CAC. From a small mintage of 57,500 pieces, the 1951 proof Franklin half dollar is especially elusive in high grade with cameo surfaces. This impressive Superb Gem offers sharply detailed design elements throughout, with deeply reflective fields that contrast boldly with the frosty devices. The surfaces are impeccably preserved and virtually untoned. Population: 28 in 67 (1 in 67+) Cameo, 0 finer. CAC: 12 in 67, 1 finer (1/18). NGC ID# 27VB, PCGS# 86692

1952 Franklin Half Dollar, PR67+ Dramatic Cameo Example

4977 1952 PR67+ Cameo PCGS. CAC. Mintage of proof Franklin half dollars increased in 1952, to 81,980 pieces. The coins were well-produced, but inadequate packaging continued to cause problems with hairlines and toning in later years. This remarkable Plusgraded Superb Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. The virtually flawless surfaces show a few subtle hints of pale gold toning. Population: 80 in 67 (5 in 67+) Cameo, 5 finer. CAC: 52 in 67, 6 finer (1/18). NGC ID# 27VC, PCGS# 86693

1953 Franklin Half Dollar, PR68 Extraordinary Cameo Example

4978 1953 PR68 Cameo PCGS. CAC. Cameo contrast is not common on 1953 proof Franklin half dollars, as many coins were struck from slightly worn dies. This stunning PR68 example exhibits sharply detailed design elements, with a rich coat of mint frost that creates intense cameo contrast with the deeply mirrored fields. The brilliant surfaces are impeccably preserved and eye appeal is outstanding. Population: 25 in 68 Cameo, 0 finer. CAC: 23 in 68, 0 finer (1/18). NGC ID# 6L9P, PCGS# 86694

1953 Half Dollar, PR68 Cameo Brilliant and Reflective

4979 1953 PR68 Cameo PCGS. CAC. Like its predecessors, the 1953 Franklin half dollar is exceedingly rare with Deep Cameo surfaces, so collectors looking for a high-grade example often opt for a Cameo example instead. This brilliant Superb Gem is at once reflective and frosty, with glassy mirrors surrounding brilliant motifs. Die lines on the portrait are typical. Population: 25 in 68 Cameo, 0 finer in this category. CAC: 23 in 68, 0 finer (1/18). NGC ID# 6L9P, PCGS# 86694

4980 1954 PR67 Deep Cameo PCGS. CAC. Both sides of this Superb Gem Deep Cameo proof exhibits deeply mirrored fields that frame the highly lustrous devices. This beauty is brilliant and untoned with exceptional eye appeal. Population: 49 in 67 (2 in 67+) Deep Cameo, 16 finer. CAC: 18 in 67, 8 finer (1/18). NGC ID# 27VE, PCGS# 96695

PROOF KENNEDY HALF DOLLAR

4981 1964 PR69 Ultra Cameo NGC. This is among the finest Ultra Cameo proof 1964 Kennedy half dollars known and is among the finest coins of any contrast level at NGC; PCGS lists a small number of PR70 non-Cameos (12/17). This piece is fully struck and brilliant, showing virtually flawless preservation. The level of contrast is remarkable. NGC ID# 24WF, PCGS# 96800

End of Session Three

SESSION FOUR

EARLY DOLLARS

4982 1795 Flowing Hair, Two Leaves, B-4, BB-14, R.4 — Graffiti — ANACS. VF Details, Net Fine 15. A scarcer Bolender variety. The graffiti consists of a cursive initial B and a few thin marks on the left obverse. We note a small attempted puncture at the E in LIBERTY and a slight edge knock near the 7 in the date. Mintmade laminations are noted on the right obverse and the right (facing) wingtip. In a small-sized holder. NGC ID# 24WZ, PCGS# 39981 Base PCGS# 6853

1795 B-2, BB-20 Silver Dollar, VG8 Two Leaves Reverse

4983 1795 Flowing Hair, Two Leaves, B-2, BB-20, R.3, VG8 PCGS. The usual die state with the obverse die lapped. This is a slightly scarcer variety among 1795 Flowing Hair silver dollars, from an obverse die that was also used for the unique BB-19 (B-19) die marriage. A short diagonal bar inside star 4 identifies the obverse. The reverse die was shared with this variety, the common BB-21 (B-1), and the scarce BB-24 (B-13). Light gray surfaces exhibit trivial marks with traces of toning along part of the obverse border.

From The Property of a Lady. NGC ID# 24WZ, PCGS# 39985 Base PCGS# 6853

4984 1795 Flowing Hair, Two Leaves, B-2, BB-20, R.3 — Repaired, Cleaned — ANACS. VF Details, Net VG10. The fields have been smoothed, most apparent southeast of Liberty's chin and above the eagle's tail. Both sides exhibit parallel hairlines. The eagle's wings exhibit horizontal adjustment marks, as coined. A scarcer Flowing Hair marriage. In a small-sized holder. NGC ID# 24WZ, PCGS# 39985 Base PCGS# 6853

4985 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2 — Rim Repaired — PCGS Genuine. Fine Details. A fairly small rim ding over the E in UNITED has been smoothed. Gunmetal-blue and mahogany-brown toning blankets this lightly abraded and highly collectible Flowing Hair type coin.

1795 B-5, BB-27 Silver Dollar, VF Details Three Leaves Reverse

4986 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Cleaned — PCGS Genuine. VF Details. The diagonal bar near the top curl immediately identifies this plentiful and popular variety that is a great candidate for the date or type collector. This piece has light silver surfaces with minor cleaning lines. Traces of luster are still evident in the protected areas.

From The Property of a Lady.

4987 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VG10 PCGS. CAC. Bowers Die State I. CAC has awarded a green seal to only a single VG10 1795 Off Center Draped Bust dollar, the present lot. It is a problem-free cream-gray example with bold legends and partial plumage detail on the eagle's wings.

From The Bayside Collection. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

4988 1795 Draped Bust, Off-Center, B-14, BB-51, R.2 — Cleaned — PCGS Genuine. Fine Details. Bowers Die State II. Two sets of clash marks are visible on the upper reverse from the drapery. Wear is even, leaving moderate detail in Liberty's hair and the eagle's wings. Much of each side displays bright golden-gray patina with extensive hairlines that suggest cleaning. Nonetheless, the cleaning is old, as portions of the outer peripheries have retoned with deep multicolor hues.

From The Property of a Lady.

1796 B-4, BB-61 Dollar, VF Details Small Date, Large Letters

4989 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Cleaned — PCGS Genuine. VF Details. Die State I, the usual die state, with the forecurl composed of three arcs, attached at the top. Lightly cleaned, but without the usual noticeable cleaning lines, this piece has light silver-gray surfaces with slight toning along the right obverse border.

From The Property of a Lady.

4990 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2 — Tooled, Repaired, Cleaned — ANACS. VF Details, Net VG10. Bowers Die State III. The dipped stone-white surfaces lack marks save for a slight rim bump above the second T in STATES. Liberty's neck has been smoothed. In a small-sized holder. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1797 B-3, BB-71 Dollar, VF Details 10x6 Stars Obverse

4991 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2 — Cleaned — PCGS Genuine. VF Details. Unlisted die cracks appear right of the final 7 and through the 97; however, the reverse crack of Die State IV, the latest die state recorded in the Bowers book, is not evident on this intriguing example. Both sides are light gray from cleaning, with peripheral iridescence confined to the border around part of the obverse.

From The Property of a Lady.

1797 Silver Dollar, VF Details 9x7 Stars, B-2, BB-72, Small Letters Reverse

4992 1797 9x7 Stars, Small Letters, B-2, BB-72, R.4 — Repaired — PCGS Genuine. VF Details. The usual die state from a perfect obverse and lapped reverse. The bright silver obverse shows evidence of cleaning, while the reverse has a patch of heavy scratches below the wreath. At one time, this scarce variety was thought to be a major rarity.

From The Property of a Lady.

1797 B-1, BB-73 Dollar, VF35 9x7 Stars, Large Letters

- 4993 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, VF35 PCGS. Bowers Die State II. Deep golden-brown and forest-green toning blankets this impressive Small Eagle dollar. The central reverse and lower reverse periphery display a few unobtrusive adjustment marks, but post-strike contact is minimal, and the devices exhibit considerable detail despite moderate high-point wear. Encapsulated in a first-generation holder. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863
- 4994 1798 Large Eagle, Knob 9, 5 Vertical Lines, 10 Arrows, B-6, BB-96, R.3 Cleaned PCGS Genuine. VF Details. Bowers Die State V. A caramel-gold and cream-white example with a broad blush of lavender and steel-gray across the central reverse. No marks are of any interest, but the surfaces are subdued by an inoffensive cleaning.

From The Property of a Lady.

- 4995 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3 Corroded, Rim Filed, Cleaned ANACS. XF40 Details. Bowers Die State II, lapped at cloud 3 on the reverse. This piece has granular surfaces with bright steel-gray patina, consistent with the surface alterations noted by ANACS. Several left-hand stars are weak, but the strike is otherwise sharp and even, and the detail on the devices is outstanding. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018
- 4996 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3 Streak Removed PCGS Genuine. XF Details. Bowers Die State III, lapped on both sides, visible at cloud 3 on the reverse and the lower hair curls on the obverse. The surfaces are bright slate-gray and moderately abraded, with the faint shadow of an old grease streak stretching across the obverse from star 4 to star 12. No adjustment marks are evident, and the sharp design elements exhibit little wear.

From The Property of a Lady.

4997 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, VF25 PCGS. Bowers Die State II. A chiefly stone-gray Heraldic Eagle type coin with glimpses of golden-brown and cobalt-blue near the rims. The high points display the expected degree of wear, but no abrasions are apparent.

From The Bayside Collection. NGC ID# 24X6, PCGS# 40030 Base PCGS# 40018

4998 1798 Large Eagle, Pointed 9, Close Date, B-26, BB-114, R.5 — Scratch — PCGS Genuine. VF Details. Bowers Die State V, with many die cracks on the reverse. This piece is sharply detailed for the VF grade level and has attractive battleship-gray surfaces. The reverse is slightly out of alignment toward 3 o'clock, with unusually broad dentils on the opposite border. There is a singular scratch that prevents a numeric grade on this piece, but numerous shallow, unobtrusive scratches in the left obverse field are apparent at certain angles.

From The Property of a Lady.

1798 B-30, BB-116 Silver Dollar, XF40 Middle Die State

4999 1798 Large Eagle, Pointed 9, Close Date, B-30, BB-116, R.4, XF40 PCGS. Die State IV, an intermediate die state with advanced obverse and reverse die cracks. The BB-116 silver dollar is a scarce 1798 variety that is typically found in the Fine and Very Fine grades. Examples such as this XF40 are rarely encountered. The light gray surfaces of this example display areas of deeper gray toning. Minor handling marks are evident on each side.

From The Property of a Lady. NGC ID# 24X6, PCGS# 40033 Base PCGS# 40018

- 5000 1798 Large Eagle, Pointed 9, Close Date, B-9, BB-121, R.4, VF20 NGC. Bowers Die State II. The deep gunmetal-gray surfaces are smooth aside from a hair thin line near Liberty's ear toward the B in LIBERTY. Most of E PLURIBUS is present, though UNUM is worn. Among the Close Date varieties, B-9 is scarcer than B-27 and B-28. NGC ID# 24X6, PCGS# 40038 Base PCGS# 40018
- 5001 1798 Large Eagle, Pointed 9, Close Date, B-9, BB-121, R.4 Cleaned PCGS Genuine. VF Details. Bowers Die State II. Struck a few degrees off center toward 12 o'clock, unusual for the series, although only dentil width is affected. The stone-gray surfaces display hairlines but lack any distracting abrasions. The eagle's head and neck are lightly brought up.
- 5002 1798 Large Eagle, Pointed 9, B-14, BB-122, R.3, VF25 NGC. Bowers Die State V. A fairly late die state with crumbling apparent near the L in LIBERTY. The dusky gunmetal-gray surfaces are only lightly abraded for the grade, though a few minor marks accompany the right obverse field.

Ex: William Luebke Collection (Heritage, 1/2007), lot 4993, which realized \$2,242.50.

From The Bayside Collection. NGC ID# 24X6, PCGS# 40039 Base PCGS# 40018

5003 1799/8 15 Stars Reverse, B-3, BB-141, R.3, VF25 PCGS. Bowers Die State IV, numerous reverse die cracks. This is a sharply detailed VF example, showing complete border dentils and bright steel-gray surfaces. No adjustment marks or other distractions appear on this appealing 15 Stars Reverse type coin.

From The Property of a Lady. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

- 5004 1799 7x6 Stars, B-5, BB-157, R.2 Cleaned, Stained ANACS. XF Details, Net VF30. Bowers Die State III. Blushes of deep gunmetal toning accompany AMERICA and portions of LIBERTY and the obverse border. Glimmers of luster emerge from the mildly glossy surfaces. Marks are trivial save for a hair-thin vertical line on the cheek. In a small-sized holder. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878
- 5005 1799 8x5 Stars, B-23, BB-159, R.3 Tooled PCGS Genuine. VF Details. Bowers Die State II, cracked at the BE in LIBERTY but not yet clashed above the date. The coin is well-detailed and displays golden-gray patina with pleasing eye appeal. Under a loupe, hairlines are visible in the obverse fields, and a patch of small scratches above the date prevents a numeric grade. From The Property of a Lady.

1799 Dollar, AU Sharpness 7x6 Stars, B-12, BB-160

- 5006 1799 7x6 Stars, B-12, BB-160, R.3 Tooled PCGS Genuine. AU Details. Bowers Die State I. Brilliant aside from a blush of tan-gold toning near the profile. This Heraldic Eagle dollar has only a trace of wear, apparent mostly on the extremities of the eagle's wings. The surfaces are moderately bright, and the obverse field shows signs of smoothing near Liberty's chin and shoulder curl.
- 5007 1799 7x6 Stars, B-11, BB-161, R.3, VF25 PCGS. The late, unlisted "Bowers Die State IV" with a pelican-style die break below the eagle's beak. A problem-free lavender-gray representative, ideal for the early silver type collector. The reverse is misaligned slightly toward 3 o'clock.

From The Bayside Collection. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

1799 Draped Bust Dollar, Choice VF B-11, BB-161, 7x6 Stars

5008 1799 7x6 Stars, B-11, BB-161, R.3, VF35 NGC. CAC. Bowers Die State III. LI slightly low; no berries in branch. B-11 and B-12 are the two No Berries varieties. The reverse die was actually used to produce four different die marriages, with the die lapped between uses, causing the berries to weaken on late states of B-16 and all examples of B-23, then disappear entirely on the B-11 and B-12 die combinations. Both sides have pleasing pewter-gray color, with the obverse accented by peripheral sea-green, russet, and steel toning. The obverse displays a few unimportant marks.

Ex: William Luebke Collection (Heritage, 1/2007), lot 5010, which realized \$2,760.

From The Bayside Collection. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

- 5009 1799 7x6 Stars, B-10, BB-163, R.2 Cleaned ANACS. XF Details, Net VF30. Bowers Die State III. Both sides are mildly glossy from a wipe, but no marks are noticeable and the wings exhibit luster. The cheek and shoulder show wear, though all letters in E PLURIBUS UNUM are sharp. In a small-sized holder. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878
- 5010 1799 7x6 Stars, B-17, BB-164, R.2 Cleaned PCGS Genuine. VF Details. Uniform deep steel-gray toning encompasses this glossy Heraldic Eagle type coin. All letters in E PLURIBUS UNUM are at least partially present. Marks are relatively few, though we note two rim knocks below the 1 and 99 in the date.
- 5011 1799 7x6 Stars, B-17, BB-164, R.2, VF20 NGC. Bowers Die State V. Iridescent sea-green, autumn-brown, and dove-gray toning envelops both sides. This Heraldic Eagle type coin is nicely defined for the designated grade, and consequential contact is limited to a few thin field lines near Liberty's mouth.

From The Sea Cliff Collection. NGC ID# 24X7, PCGS# 40055 Base PCGS# 6878

5012 1799 7x6 Stars, B-8, BB-165, R.3, VF25 NGC. Bowers Die State II, cracked through the LIB of LIBERTY but not the Y. Gunmetal-blue and chestnut-gold toning encompass this impressive Heraldic Eagle dollar. A lens reveals unobtrusive marks on the cheek and the obverse field near star 4.

Ex: New York Signature (Heritage, 12/2011), lot 3702, which realized \$1,955.

From The Bayside Collection. NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

5013 1799 7x6 Stars, B-8, BB-165, R.3 — Cleaned — PCGS Genuine. XF Details. Bowers Die State I, without die cracks through LIBERTY. The obverse is in an early die state on this sharply detailed and evenly struck 7x6 Stars dollar. A few vertical adjustment marks are visible on Liberty's neck but none are seen at the borders. This coin is bright from an old cleaning but has hints of olive toning at the obverse borders.

From The Property of a Lady.

1799 B-14, BB-167 Dollar, XF40 7x6 Stars, Lightly Toned

- 5014 1799 7x6 Stars, B-14, BB-167, R.3, XF40 ANACS. Bowers Die State II. Splashes of tan-gold toning visit peripheral portions of this moderately circulated early silver dollar. The left obverse field is slightly bright, and we note a few faded marks on Liberty's chest. A roundish strike-through above the eagle's head is of mint origin. NGC ID# 24X7, PCGS# 40058 Base PCGS# 6878
- 5015 1800 B-16, BB-187, R.2, Fine 12 NGC. Bowers Die State V. The arc-shaped die crack near the chin identifies the Bolender variety. The battleship-gray surfaces show only minor marks. About half the letters in E PLURIBUS UNUM are partly present. Incorrectly attributed as BB-186 by NGC. NGC ID# 24X9, PCGS# 40073 Base PCGS# 6887

1800 B-8, BB-188 Dollar, VF25 Smooth, Appealing Surfaces

- 5016 1800 B-8, BB-188, R.4, VF25 PCGS. Die State III. There is a small die lump inside the lower part of the R in LIBERTY, and only three star points touch clouds on this variety. The reverse is cracked through AMER to the border over the right side of the R, with the metal slightly elevated at this spot. This is a later intermediate die state. BB-188 is a moderately scarce variety, particularly in high grade. This collectible midgrade example displays light gray surfaces with considerable champagne toning highlights. Minor surface marks are visible on each side but none individually distract. Ex: Lano Balulescu (5/2003); FUN Signature (Heritage, 1/2007), lot 5026; Long Beach Signature (Heritage, 2/2010), lot 1268. From The Bayside Collection. NGC ID# 24X9, PCGS# 40074 Base PCGS# 6887
- 5017 1800 B-8, BB-188, R.4 Cleaned PCGS Genuine. XF Details. Bowers Die State II, cracked through the MER in AMERICA. The surfaces are smooth and faintly luminous in the protected regions, showing golden-gray toning and no adjustment marks. A slight dullness to the fields suggests an old, light cleaning. The strike is sharp and even, although a die bulge on the central reverse weakens the vertical shield lines.
- 5018 1800 Wide Date, Low 8, B-10, BB-190, R.3 Cleaned PCGS Genuine. VF Details. Bowers Die State VI, with multiple reverse die cracks. A sliver of blue-green and amber toning graces the left obverse periphery, while the remainder of the coin is bright silvery-grade from an old cleaning. This well-detailed Wide Date coin retains small hints of luster in the protected portions of the peripheries.

 From The Property of a Lady.
- 5019 1800 AMERICAI, B-11, BB-191, R.4, Fine 15 PCGS. Rarer of the two AMERICAI die marriages, B-11 also shares the Wide Date, Low 8 obverse with B-10. Thus, one can obtain two *Guide Book* varieties with the purchase of the present lot. This Choice Fine example exhibits even wear across inoffensively abraded lavender-brown surfaces. One minor rim knock before the U in UNITED. NGC ID# 24X9, PCGS# 40081 Base PCGS# 86888
- 5020 1800 Dotted Date, B-14, BB-194, R.3 Cleaned PCGS Genuine. XF Details. Bowers Die State IV, with extensive die cracks on both sides. This is the so-called "Dotted Date" variety, showing large die dots around the first 0. The example offered here has a sharp, even strike and exhibits little wear. No adjustment marks are seen. Lightly cleaned in the past, both sides have since retoned russet-gold.
 - From The Property of a Lady.
- 5021 1801 B-2, BB-212, R.3 Damage PCGS Genuine. Fine Details. Bowers Die State II. Tiny circular impressions are noted below the ER in LIBERTY, after the F in OF, and before the first S in STATES. Otherwise, this is a suitable collector coin that displays deep aquamarine and lavender-gray toning. A lens reveals a few small marks near Liberty's ear.
- 5022 1801 B-2, BB-212, R.3 Cleaned PCGS Genuine. VF Details. Bowers Die State II, clashed. No adjustment marks are seen on this piece, and moderate detail remains on the devices. Bright silvery surfaces show hairlines from an old cleaning but have no other distractions. A pleasing example of the Heraldic Eagle type. From The Property of a Lady.

1801 Silver Dollar, Choice VF B-2, BB-212

5023 1801 B-2, BB-212, R.3, VF35 ANACS. Bowers Die State I. The scarce early die state without any clash marks. This dove-gray example is nicely defined and evenly struck. Close examination reveals a few minor rim imperfections, along with a cluster of faded marks beneath the L in LIBERTY. All four 1801 Bolender business varieties are scarce, while the novodel proof (B-5) is a formidable rarity. NGC ID# 24XA, PCGS# 40084 Base PCGS# 6893

1801 B-3, BB-213 Dollar, VF25 Middle Die State

- 5024 1801 B-3, BB-213, R.3, VF25 PCGS. Bowers Die State II. Battleship-gray interiors cede to olive, gold, and rose border hues on this midgrade 1801 Draped Bust type coin. The strike is even and sharp, and wear is minimal across the devices. No major abrasions are observed. This die state shows clash marks above the eagle on the reverse, although a later state is also clashed at STATES OF. From The Bayside Collection. NGC ID# 24XA, PCGS# 40085 Base PCGS# 6893
- 5025 1802/1 Wide Date, B-3, BB-234, R.3 Cleaned PCGS Genuine. VF Details. Bowers Die State II, with a die lump in the field below star 8. A later die state shows clash marks above the date, although these are not present on the current coin. This is a popular overdate variety, and the present example is well-detailed for the VF level with no adjustment marks. Both sides display a hint of light champagne toning with sea-green at the left obverse rim. Scattered abrasions and hairlines appear under a loupe. From The Property of a Lady.

1802/1 B-3, BB-234 Dollar, VF35 Wide Overdate

5026 1802/1 Wide Date, B-3, BB-234, R.3, VF35 PCGS. Die State II with a small die chip in the field between star 8 and the forehead. Four different overdated obverse dies with a 2 punched over a 1 were used to create five overdate varieties. This lovely early dollar has rich iridescent toning over still slightly lustrous surfaces. Scattered marks are typical on early dollars at this grade.

From The Property of a Lady. NGC ID# 24XC, PCGS# 40094 Base PCGS# 6899

5027 1802 Narrow Date, B-6, BB-241, R.1 — Surfaces Smoothed — PCGS Genuine. XF Details. Bowers Die State III. The caramelgold and powder-blue surfaces are hairlined but show no obvious signs of repair. Liberty's cheek and shoulder exhibit minor wear, but most design definition is present. Noticeable marks are confined to a tick in the field above the eagle's beak.

1802 Narrow Date Dollar, XF45 B-6, BB-241, Well-Defined

5028 1802 Narrow Date, B-6, BB-241, R.1, XF45 ANACS. Bowers Die State III. The usually encountered lapped die state with incomplete detail on Liberty's shoulder curls. This is an imposing stone-gray and almond-gold Heraldic Eagle type coin that shows surprisingly few abrasions. We note only a slight rim knock between the RI in AMERICA. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

5029 1803 Small 3, B-4, BB-254, R.3, Fine 15 PCGS. Unusual for the Draped Bust type, this Choice Fine representative displays rich fire-red and jade-green toning across the obverse field. The portrait is stone-gray, and the reverse exhibits powder-blue, gunmetal, and rose-gold shades. Smooth save for a slight edge bump at 5:30 on the reverse.

From The Bayside Collection. NGC ID# 24XD, PCGS# 40099 Base PCGS# 6900

1803 Small 3 Dollar, VF30 B-4, BB-254, Choice Surfaces

5030 1803 Small 3, B-4, BB-254, R.3, VF30 PCGS. A Small 3 variety with star 1 near Liberty's hair curl. This battleship-gray example displays even wear over well-defined relief elements. Smooth surfaces are devoid of bothersome abrasions. There are no adjustment marks, and hints of luster remain tucked close to the stars and peripheral legends. A high-end coin for the VF grade level. From The Bayside Collection. NGC ID# 24XD, PCGS# 40099 Base PCGS# 6900

5031 1803 Large 3, B-6, BB-255, R.2 — Edge Damaged — ANACS. VF Details, Net Fine 15. Bowers Die State II. The edge is not visible within the small-sized holder, but the only hint of a rim disruption is above the second T in STATES. A cream-gray representative with peripheral charcoal toning. The surfaces are free from consequential contact. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

SEATED DOLLARS

- 5032 1840 AU50 NGC. OC-1, R.1. Ex: Osburn-Cushing Reference Collection. Die State b/b. Plate coin for the 1840 Obverse 1 die in the new Osburn-Cushing reference book. This is a brilliant example of the first-year Seated dollar issue. Moderate wear and scattered small marks define the About Uncirculated grade. Bold, unmarked rims surround both sides. Census: 15 in 50, 156 finer (1/18). NGC ID# 24YA, PCGS# 6926
- 5033 1840 AU55 ANACS. OC-3, R.3. Autumn-brown and jade-green toning embraces this first-year Choice AU Seated dollar. The strike is good and the surfaces retain substantial satin luster. The only remotely reportable mark is a minor rim ding near the L in DOL. In a small-sized holder. NGC ID# 24YA, PCGS# 6926
- 5034 1841 AU58 PCGS. OC-4, R.1. One of four die pairings known for circulation-strike 1841 Seated dollars. This coin is sharp and almost Mint State, showing a brush of friction over satiny devices and semireflective fields. Both sides display olive-gray and gold toning that masks a few light abrasions. NGC ID# 24YB, PCGS# 6927

1841 Seated Liberty Dollar, MS61 Second Year of Issue, Scarce So Fine

5035 1841 MS61 NGC. OC-2, R.1. Early dates in the Seated dollar series, such as the 1840 (especially) and 1841, are seldom seen in Uncirculated grades. This mostly brilliant example shows a distinct ring of golden color around the peripheries. Numerous light abrasions are scattered over each side, though none are especially large or obvious. Incompletely defined with a repunched 4. Census: 17 in 61, 29 finer (12/17).

Ex: FUN Signature (Heritage, 1/2012), lot 3799.

From The Bayside Collection. NGC ID# 24YB, PCGS# 6927

5036 1842 MS61 NGC. OC-3, R.2. Medium autumn-gold, sea-green, and steel-gray toning accompanies this moderately marked and nicely struck silver dollar. Uncirculated examples from early in the series are infrequently encountered.

From The Bayside Collection. NGC ID# 24YC, PCGS# 6928

5037 1842 MS61 NGC. OC-2, R.1. Ex: Osburn-Cushing Reference Collection. Die State b/a. Plate coin for the 1842 Obverse 2 die in the new Osburn-Cushing reference book. Deeply toned in graygold with splashes of orange on the reverse, this Mint State piece is an important entry in the early Seated dollar series, with satin luster visible beneath the toning. Census: 22 in 61 (1 in 61+), 60 finer (1/18). NGC ID# 24YC, PCGS# 6928

1842 Seated Dollar, MS62

5038 1842 MS62 PCGS. OC-3, R.2. Osburn-Cushing Die State b/a. A sharply struck pearl-gray No Motto silver dollar. Bright luster fills the borders, and although the fields display the expected number of unobtrusive marks, none merit individual discussion. Population: 24 in 62, 45 finer (1/18).

Ex: FUN Signature (Heritage, 1/2006), lot 4357; Dallas Signature (Heritage, 10/2006), lot 2272, which realized \$2,185. NGC ID# 24YC, PCGS# 6928

5039 1844 AU55 NGC. OC-1, R.2. A Top 30 Variety. The sole business marriage of the date, OC-1 is the doubled die obverse "quad stripes" variety. The reverse shows myriad die lines near the center. The borders show light lemon-gold toning, and the rims exhibit a few minor knocks. In a circa-2000 holder. NGC ID# 24YE, PCGS# 6930

1844 Seated Liberty Dollar, MS60 Toned Prooflike Surfaces

- 5040 1844 MS60 PCGS. OC-1, R.2. Designated a Top 30 Variety by Dick Osburn and Brian Cushing. From a modest mintage of 20,000 pieces, the 1844 Seated Liberty dollar is a rare issue in all Mint State grades. A single die pair was used to strike all the business-strike coins. The obverse die shows some doubling on the shield stripes and the remnants of a misplaced 18 can be seen in the gown. The reverse exhibits a number of cross-hatched die lines in the field between the eagle's neck and wing on the left. This well-detailed Mint State example displays lightly marked prooflike surfaces, under dappled shades of golden-tan, lavender-gray, and amber toning. Housed in a green label holder. Population: 1 in 60, 30 finer (1/18). NGC ID# 24YE, PCGS# 6930
- 5041 1845 AU55 ANACS. OC-1, R.2. Osburn-Cushing Die State a/a. Splashes of golden-brown and sea-green patina embrace this lightly circulated example. A scratch on the right obverse field is inconspicuous due to the rich toning. A scant 24,500 pieces were issued. Certified in a small-sized holder. NGC ID# 24YF, PCGS# 6931
- 5042 1845 AU55 PCGS. CAC. OC-1, R.2. Osburn-Cushing Die State c/a. A better date due to a low mintage of 24,500 pieces. Splendid peach-gold, powder-blue, lime-green, and violet-red toning endows this lightly abraded example. The strike shows the usual incompleteness on Liberty's hair and the eagle's ankle. Population: 37 in 55, 43 finer. CAC: 14 in 55, 8 finer (1/18). From The Property of a Lady. NGC ID# 24YF, PCGS# 6931
- 5043 1846 AU58 PCGS. OC-1, R.1. Osburn-Cushing Die State c/c. An untoned Borderline Uncirculated representative that shows light wear on Liberty's hair and cheek. No marks are remotely of notice, and luster fills the margins and motifs. Ex: Dallas Signature (Heritage, 10/2006), lot 2276, which realized \$1,322.50. NGC ID# 24YH, PCGS# 6932
- 5044 1846 MS61 PCGS. OC-1, R.1. Light straw-gold patina visits this inoffensively abraded No Motto silver dollar. The strike shows incompleteness on the eagle's left (facing) claw. Prominent reverse die cracks confirm the Osburn-Cushing variety. Ex: Long Beach Signature (Heritage, 6/2007), lot 1343; Philadelphia Signature (Heritage, 8/2012), lot 3523, which realized \$2,585. From The Bayside Collection. NGC ID# 24YH, PCGS# 6932
- 5045 1846 MS61 NGC. OC-1, R.1. Ocean-blue and autumn-brown toning adorns the peripheries of this otherwise brilliant Mint State silver dollar. The fields display a few thin marks. Die cracks descend from the rim above the D in UNITED and the first A in AMERICA, sufficient to confirm status as OC-1.

 From The Bayside Collection. NGC ID# 24YH, PCGS# 6932
- 5046 1846-O AU53 NGC. OC-1, R.2. The 1846-O is the first silver dollar struck at the New Orleans Mint, and coinage of this denomination would not occur again at that facility until 1850. Only 59,000 pieces were struck in 1846, all from a single die pair. This AU example displays deep gunmetal-gray toning and satiny surfaces. Liberty's head and several adjacent stars are weakly defined. NGC ID# 26GG, PCGS# 6933
- 5047 1847 AU58 NGC. OC-3, R.3. Osburn-Cushing Die State a/a. A lightly toned almond-gold representative. The obverse field exhibits unimportant contact. Luster accompanies the margins and motifs. In a circa-2000 holder. NGC ID# 24YJ, PCGS# 6934

5048 1847 MS61 NGC. OC-4, R.4. Pastel straw-gold toning adorns this unworn and lightly abraded silver dollar. The strike is crisp except on the right-side stars. Osburn and Cushing write, "[we] have a report of an example that displays a reverse rim cud. If confirmed we will update this description." The present lot shows a cud on the reverse at 6:30.

Ex: Jules Reiver Collection (Heritage, 1/2006), lot 21533, which realized \$2,070.

From The Bayside Collection. NGC ID# 24YJ, PCGS# 6934

1847 Seated Dollar, Satiny MS62 No Motto Type Coin

5049 1847 MS62 NGC. OC-2, R.1. This is the latter die state with the reverse lightly lapped. The 1847 Seated Liberty dollar claims a substantial mintage of 140,750 pieces, but Uncirculated examples are more difficult to locate than the production total suggests. This impressive MS62 coin exhibits sharp central devices, with just a touch of softness on some of the peripheral stars. The pleasing surfaces display hints of champagne-gold, amber, and lavender toning. Census: 26 in 62 (1 in 62+), 32 finer (12/17).

Ex: Philadelphia Signature (Heritage, 8/2012), lot 3524; Houston Signature (Heritage, 11/2012), lot 3831.

From The Bayside Collection. NGC ID# 24YJ, PCGS# 6934

1847 Silver Dollar, MS63 Appealing Mint Luster

5050 1847 MS63 PCGS. OC-2, R.1. Several die lines in the far left reverse shield recess identify this variety, seen here in the lapped die state. Sharply struck on the central devices, this silvery Select example shows just a touch of softness on some of the stars. The surfaces are brilliant and only lightly marked. A few toning spots are evident, the largest over N in ONE. Finer No Motto Seated dollars are scarce. Population: 29 in 63 (2 in 63+), 15 finer (12/17). Ex: FUN Signature (Heritage, 1/2012), lot 3809.

From The Bayside Collection. NGC ID# 24YJ, PCGS# 6934

5051 1848 AU50 ANACS. OC-1, R.2. Osburn-Cushing Die State a/a. Only 15,000 silver dollars were struck in 1848, and lightly circulated survivors are very scarce. This stone-gray representative displays scattered small marks and has a typical strike. In a small-sized holder. NGC ID# 24YK, PCGS# 6935

1848 Seated Liberty Dollar, AU53 Partially Prooflike Fields

5052 1848 AU53 PCGS. OC-1, R.2. Only 15,000 business-strike Seated Liberty dollars were struck at the Philadelphia Mint in 1848, using a single pair of dies. The issue is scarce, but not rare, in today's market, but it has been underrated in the past, outside of series specialists. This attractive AU53 specimen shows just a trace of wear on the well-detailed design elements, and some strong die lines are evident in the recesses of the shield stripes on the reverse. The surfaces are lightly abraded, with partially prooflike fields. Population: 23 in 53, 75 finer (1/18).

From The Property of a Lady. NGC ID# 24YK, PCGS# 6935

- 5053 1849 AU53 PCGS. OC-2, R.2. This variety is known for having a 5-10 degree counterclockwise die rotation on the reverse, seen on the present example. The coin is sharply detailed and satiny, showing bright silver-white surfaces with light field chatter.

 From The Property of a Lady. NGC ID# 24YL, PCGS# 6936
- 5054 1849 AU58 PCGS. OC-1, R.1. The availability of the 1849 Seated dollar suggests most coins were placed into domestic circulation rather than exported. This strongly struck, partly reflective near-Mint dollar barely saw commercial use. Friction is practically undetectable. Specks of toning appear around the borders. NGC ID# 24YL, PCGS# 6936
- 5055 1849 AU58 PCGS. OC-2, R.2. Splashes of rich peach-gold and apple-green patina embrace the recesses of this nicely struck and partly lustrous silver dollar. Unimportant marks are distributed. The dies are slightly rotated, diagnostic for OC-2. Ex: Denver Signature (Heritage, 8/2006), lot 8553, which realized \$1,092.50. NGC ID# 24YL, PCGS# 6936

1850 Silver Dollar, AU55 Low-Mintage Issue

5056 1850 AU55 PCGS. OC-1, R.3. The Philadelphia Mint coined a mere 7,500 silver dollars in 1850, the first of several low-mintage issues through much of the decade. This Choice AU example has a tinge of violet toning along the left obverse border, while the balance of the obverse and all of the reverse are untoned light silver. Scattered marks are evident on both sides, but are undistracting. This piece is finer than the average certified piece that grades just over AU50.

From The Property of a Lady. NGC ID# 24YM, PCGS# 6937

1850 Seated Dollar, Near-Mint Only 400 Estimated Survivors

5057 1850 AU58 NGC. OC-1, Low R.3. Repunched 0, A Top 30 Variety. This delightful Seated dollar has reflective fields and a minimal number of the usually seen marks. The obverse displays intermingled gold and blue toning, while the reverse is lighter and minimally toned. Hair detail and the top of the left facing wing are each a trifle weak, but all other design elements are sharp. The specialist will recognize the importance of this opportunity. Ex: Dallas Signature (Heritage, 10/2009), lot 844.

From The Bayside Collection. NGC ID# 24YM, PCGS# 6937

- 5058 1850-O XF40 PCGS. OC-1, R.2. Osburn-Cushing Die State a/a. The second New Orleans silver dollar issue has a mintage of just 40,000 pieces. The dove-gray and almond-gold surfaces show abrasions consistent with the XF grade. Luster fills the legends and outlines the stars. Housed in a green label holder. NGC ID# 24YN, PCGS# 6938
- 5059 1850-O XF45 NGC. OC-1, R.2. A Choice XF example of the scarcest and lowest mintage New Orleans issue. Pearl-gray overall with occasional hints of tan toning. The sole mentionable mark appears near Liberty's left (facing) shoulder. Ex: Donald E. Bently Collection (Heritage, 3/2014), lot 30091, which realized \$1,586.25.

From The Bayside Collection. NGC ID# 24YN, PCGS# 6938

- 5060 1853 AU55 NGC. OC-1, R.2. Ex: Osburn-Cushing Reference Collection. Die State b/b. Plate coin for the 1853 "Chin Whiskers" die marriage OC-1 in the new Osburn-Cushing reference book, Die State b/b. A Top 30 variety. This Choice Uncirculated example displays olive-gray toning with glints of golden luster. Richly toned fields show only minuscule marks, while the strike is sharp throughout the motifs. Census (all varieties combined): 15 in 55, 105 finer (1/18). NGC ID# 24YS, PCGS# 6941
- 5061 1853 Cleaned PCGS Genuine. Unc. Details. OC-1, R.2. A Top 30 Variety. Osburn-Cushing Die State d/a. The "Chin Whiskers" variety, common to all commercial strikes of the date. The 1853 has a mintage of just 46,110 pieces, and this unabraded and satiny representative would rank highly among the survivors, were it not for the delicate parallel hairlines across both sides. From The Property of a Lady.

1855 Seated Dollar, MS60 Conditionally Elusive

5062 1855 MS60 ANACS. OC-1, High R.3. An important issue among No Motto Seated Liberty dollars, the 1855 had a mintage of only 26,000 coins, and few survive in any grade. Splashes of blue and gold toning appear on the ivory surfaces of this sharply struck example. The advanced collector should consider this opportunity carefully as only a small number of Mint State 1855 dollars exist. NGC ID# 24YU, PCGS# 6943

1856 Seated Dollar, AU58 Scarce in All Grades

5063 1856 AU58 ANACS. OC-1, R.5. Ex: Osburn-Cushing Reference Collection. Die State a/c. Struck from dies used only for circulation strikes, a single die pair exists for the entire 63,500-piece mintage. This is the plate coin from the new Osburn-Cushing reference book, where it is a Top 30 Variety with repunching on the 6 in the date. The repunching is especially visible on the present coin, struck from an early obverse die state. Attractive gold toning with auburn-brown accents covers both sides of this semireflective and sharply struck near-Mint example. Only a few marks are visible anywhere on the still-lustrous, attractive surfaces. NGC ID# 24YV, PCGS# 6944

5064 1856 — Streak Removed — PCGS Genuine. Unc. Details. OC-1, R.2. The 1856 silver dollar has a mintage of just 63,500 pieces, only a tiny fraction of the half dollar production that year. The present lime-green and apricot-gold example shows few marks aside from unobtrusive contact on the upper reverse field. A streak of struck-in grease on Liberty's waist has been diminished through chemical means.

From The Property of a Lady.

- 5065 1859-O MS60 NGC. OC-1, R.1. Osburn-Cushing d/e. A nearly brilliant New Orleans representative that boasts sweeping luster and exhibits fewer than the anticipated number of field abrasions. A couple of sealed bags of Uncirculated '59-O and '60-O silver dollars were reportedly issued by the U.S. Treasury circa-1962. Ex: Dallas Signature (Heritage, 3/2013), lot 3724; Long Beach Signature (Heritage, 9/2015), lot 4582, which realized \$1,645. NGC ID# 24YY, PCGS# 6947
- 5066 1859-O MS61 PCGS. OC-2, R.1. The fields are moderately abraded for the issue, which is usually seen with extensive bagmarks. Liberty's hair and a few stars are lightly impressed, but the eagle is well-struck. Brilliant aside from a tiny spot centered above the date. From The Bayside Collection. NGC ID# 24YY, PCGS# 6947

5067 1859-O MS61 PCGS. OC-1, R.1. The '59-O and '60-O are the usually encountered No Motto issues in Uncirculated grades. The present brilliant example offers vibrant cartwheel luster and the expected number of minor field abrasions. The claws are well-struck, although Liberty's hair is incomplete.

From The Bayside Collection. NGC ÎD# 24YY, PCGS# 6947

5068 1859-O MS62 PCGS. OC-1, R.1. Osburn-Cushing Die State d/e. A lustrous and crisply struck New Orleans type coin. Traces of honey-gold toning visit both sides. Field marks are present, but much less severe than often seen for the issue.

From The Bayside Collection. NGC ID# 24YY, PCGS# 6947

5069 1859-O MS62 PCGS. OC-3, R.2. A whisper of gold toning visits this otherwise brilliant New Orleans silver type coin. Boldly struck and lustrous with a moderately abraded obverse and a minimally marked reverse.

From The Bayside Collection. NGC ID# 24YY, PCGS# 6947

1859-S Dollar, AU50 Low-Mintage, Popular Branch Mint Issue

5070 1859-S AU50 NGC. OC-1, R.2. Ex: Osburn-Cushing Reference Collection. Die State b/c. Plate coin for the 1859-S OC-1 variety in the new Osburn-Cushing reference book. The first San Francisco silver dollar issue had a low mintage of 20,000 pieces from two die marriages. Historically, it was believed most of the mintage went to the Orient, but that scenario may not be accurate. Surviving examples are surprisingly available, mostly in the VF to AU grade range. The few Mint State specimens are primarily in the lower levels. Golden-gray surfaces of this AU example display hints of light reddish-tan, along with considerable luster in the recessed areas. Both sides show nicely defined motifs and reveal no significant marks. Census: 10 in 50, 71 finer (1/18). NGC ID# 24YZ, PCGS# 6948

1859-S Dollar, Unc Details Important Type Issue

5071 1859-S — Cleaned — PCGS Genuine. Unc Details. OC-1, R.2. The 1859-S Seated Liberty silver dollar is the only issue of the No Motto type from the San Francisco Mint, and it is a must for the San Francisco type collector or the Seated dollar specialist. Hairlines are visible in the reflective fields of this important dollar that exhibits light gold toning.

From The Property of a Lady.

5072 1860-O MS61 PCGS. OC-2, R.1. This is a sharp Mint State No Motto type coin, showing prooflike fields and light, scattered abrasions. Light golden toning overall exhibits occasional glimpses of russet and plum, with a few faint remnants of a print that attest to the originality of the surfaces.

From The Jamestown Collection, Part II. NGC ID# 24Z3, PCGS# 6950

5073 1860-O MS61 PCGS. OC-2, R.1. Dazzling cartwheel luster traverses this sharply struck No Motto type coin. Faint gold toning visits typically abraded surfaces. Likely among the '60-O Seated dollars distributed at face value by the Treasury during the early 1960s.

From The Bayside Collection. NGC ID# 24Z3, PCGS# 6950

5074 1860-O MS61 NGC. OC-7, R.2. A lightly toned and well struck Southern silver dollar that exhibits fewer than the expected number of field abrasions. Luster is vibrant throughout design elements but diminishes somewhat across the open fields. From The Bayside Collection. NGC ID# 24Z3, PCGS# 6950

5075 1860-O MS61 PCGS. OC-2, R.1. This popular O-mint issue, the last in the Seated dollars, was released from Treasury holdings more than a century after production. Cartwheel luster is present, but it is slightly muted by a peppering of marks on each side. This piece is strictly Mint State, with silver surfaces showing just a hint of color. A die crack on the reverse joins TED STATES OF AM. Ex: FUN Signature (Heritage, 1/2011), lot 3981, which realized \$2,300.

From The Bayside Collection. NGC ID# 24Z3, PCGS# 6950

5076 1860-O MS61 PCGS. OC-4, Low R.3. The 1860-O is one of the most plentiful No Motto issues in Mint State, ideal for type representation. This lower-grade Uncirculated coin displays a sharp strike and frosty luster with delicate champagne toning. Hairlines appear under a loupe, preventing a finer grade. NGC ID# 24Z3, PCGS# 6950

5077 1860-O MS61 PCGS. CAC. OC-2, R.1. A brilliant New Orleans silver dollar that has vibrant luster and a well-struck eagle. The fields display marks, but to a lesser extent than often encountered for the issue. Only a small percentage of MS61 examples have been confirmed by CAC.

From The Bayside Collection. NGC ID# 24Z3, PCGS# 6950

5078 1860-O MS62 NGC. OC-2, R.1. Sweeping luster and practically brilliant surfaces greet the viewer of this New Orleans No Motto dollar. The obverse field shows distributed small marks, but the reverse is surprisingly smooth. A minor obverse rim bump is noted at 3 o'clock.

From The Bayside Collection. NGC ID# 24Z3, PCGS# 6950

5079 1860-O MS62 PCGS. OC-2, R.1. This blazing, frost-white Mint State type coin displays a radiant cartwheel effect and only light, scattered abrasions. The right-hand stars are incompletely struck, but the design is otherwise well brought up. Easily one of the most eye-appealing 1860-O dollars that we have seen in this grade. From The Property of a Lady. NGC ID# 24Z3, PCGS# 6950

5080 1860-O MS62 PCGS. OC-1, R.1. Vibrant cartwheel sheen, a good strike, and medium lemon-gold patina create significant eye appeal. The reverse is only lightly abraded, while the obverse displays the expected number of minor abrasions, concentrated on the right field.

Ex: New York Signature (Heritage, 3/2012), lot 3548; Houston Signature (Heritage, 11/2012), lot 3841, which realized \$2,115. NGC ID# 24Z3, PCGS# 6950

5081 1860-O MS62 PCGS. CAC. OC-2, R.1. Lustrous and lightly toned with a good strike and fewer than the typical number of field marks for the issue. A curved die line on the drapery above the waist identifies OC-2, one of the varieties believed released in quantity during the early-1960s run on silver dollars.
From The Bayside Collection. NGC ID# 24Z3, PCGS# 6950

5082 1861 — Harshly Cleaned — PCGS Genuine. AU Details. OC-2, High R.3. The surfaces are extensively hairlined and show muted luster from a vigorous cleaning, although sharp detail remains. Bright silvery-gray coloration characterizes each side. A benefit of the cleaning is that any distracting abrasions have been effaced. A popular date in high grade.

5083 1865 XF40 PCGS. OC-4, High R.4. A Top 30 Variety. Osburn-Cushing Die State a/d. The "bar 6" variety with a die line or "bar" through the knob of the 6 in the date. Deep gunmetal-gray and golden-brown toning blankets this lightly abraded and moderately circulated representative. NGC ID# 24Z8, PCGS# 6955

- 5084 1866 Motto AU53 PCGS. OC-1, R.2. Ex: Osburn-Cushing Reference Collection. Die State a/b. The sharply detailed design elements of this richly toned Seated dollar show just a trace of wear on the high points, and the smooth surfaces are patinated in shades of gray, blue-steel, and violet. We note some light lines and minor marks beneath the toning. The strike is quite sharp despite the expected high-point wear. NGC ID# 24Z9, PCGS# 6959
- 5085 1868 AU55 PCGS. OC-4, High R.3. Ex: Osburn-Cushing Reference Collection. Die State a/c. Called a proof by PCGS and labeled as such on the previous generation blue label holder, but this is a circulation strike with prooflike surfaces. The mostly brilliant fields exhibit just a smidgen of patina about the borders. A couple of larger marks are seen near the top of the reverse. Boldly detailed, and essentially problem free for the Choice About Uncirculated grade level. This is the plate coin for 1868 Reverse B in the new Osburn-Cushing reference book.
- 5086 1868 AU58 NGC. OC-4, High R.3. Bright luster beckons from the borders and devices of this lower mintage Motto silver dollar. The borders display medium autumn-brown toning. The right obverse field exhibits unobtrusive marks. Census: 14 in 58, 17 finer (1/18). NGC ID# 24ZB, PCGS# 6961
- 5087 1869 Misplaced Date and Repunched Date, FS-301, AU55 PCGS. CAC. OC-2, R.2. Ex: Osburn-Cushing Reference Collection. Die State a/c. The base of 1 in the date is repunched with a secondary 1 visible beneath the primary digit along the bottom edge. The top curve of a misplaced 6 rises above the dentils below the primary 6. This CAC-endorsed example is almost fully prooflike beneath a translucent cloak of golden-gray patina. Mint luster glows beneath the toning. A glass reveals only widely separated minor marks over the smooth fields and sharply struck devices. PCGS# 416930 Base PCGS# 6962
- 5088 1870-CC Environmental Damage PCGS Genuine. XF Details. OC-7, R.5. Osburn-Cushing Die State a/a. A speckling of olive-brown toning scatters across steel-gray surfaces of this popular Carson City issue. The environmental factors include some fine granularity and minor porosity, but no overt damage. The motifs are sharply defined for the XF level. Many surviving 1870-CC dollars are impaired in one way or another. This is a pleasing example despite the "not gradable" assignment by PCGS.

1870-CC OC-7 Dollar, XF40 Scarce Carson City Type Coin

5089 1870-CC XF40 NGC. OC-7, R.5. The first-year Carson City dollar is less rare than its meager mintage suggests, but demand for examples is always substantial. This gunmetal-gray and goldenbrown representative has glossy surfaces. Mentionable marks are limited to parallel lines above Liberty's shield, and a moderate obverse edge knock at 2:30. NGC ID# 24ZE, PCGS# 6964

1871 Dollar, Appealing MS63

- 5090 1871 MS63 NGC. OC-7, R.2. Seateddollarvarieties.com lists 14 circulation-strike die pairs for the 1871 and acknowledges others may exist. This coin represents the OC-7 variety, with a hard-to-see die lump right of the Y in LIBERTY and a die line in the fold of the ribbon under the second T in TRUST. The obverse shows a thickly frosted portrait surrounded by watery fields and a ring of blue, gold, and violet border toning. The reverse displays a few blushes of golden color but is primarily brilliant. Softness is limited to Liberty's head. A linear depression travels through the left wing. From The Bayside Collection. NGC ID# 5DNV, PCGS# 6966
- 5091 1872 MS61 NGC. OC-4, R.2. Light gold patina is limited to the border near AMERICA, but this well-struck With Motto Seated dollar is otherwise brilliant. Field marks are fewer than anticipated for the grade, and luster illuminates the margins and motifs.
 From The Bayside Collection. NGC ID# 24ZI, PCGS# 6968

1872 Silver Dollar, MS62 Brilliant and Lustrous

- 5092 1872 MS62 PCGS. OC-1, R.3. Osburn-Cushing Die State a/c. A lustrous and untoned With Motto Seated type coin. Marks are few overall, though we note thin diagonal lines west of the 1 in the date, and east of Liberty's foot. OC-1 is a relatively scarce variety that reuses one of the reverse dies used to coin 1871 silver dollars. NGC ID# 24ZJ, PCGS# 6968
- 5093 1872 MS62 PCGS. OC-3, R.1. An important variety, showing the base of a misplaced 1 in the rock above the primary 1 and the bases of two misplaced 2s in the rock above the primary. On the reverse, IN GOD WE TRUST is lightly die doubled. This Mint State coin displays a hint of golden toning over satiny devices and semiprooflike obverse fields. The reverse fields are satiny. Liberty's head and most of the stars show strike weakness. NGC ID# 24ZJ, PCGS# 6968
- 5094 1872-S XF45 PCGS. OC-1, Low R.3. Only a single die pair is known for the very scarce 1872-S. Only 9,000 pieces were struck, and problem-free survivors are desirable. The deeply patinated forest-green and wheat-gold surfaces appear somewhat prooflike. Marks are trivial save for a few hairlines beneath WE. From The Bayside Collection. NGC ID# 24ZL, PCGS# 6970
- 5095 1872-S Cleaned PCGS Genuine. AU Details. OC-1, Low R.3. The 1872-S is a better date, coming from a mintage of only 9,000 pieces. This is the only collectible With Motto issue from the San Francisco Mint. This piece is bright and satiny from being cleaned but is sharply detailed and shows no major abrasions. From The Property of a Lady.

PROOF SEATED DOLLARS

1859 Seated Dollar, PR62 Second Year of Public Proof Offerings

5096 1859 PR62 PCGS. OC-P1, R.3. Osburn and Cushing list a single die pair used to coin proof Seated dollars in 1859, acknowledging the possible existence of a second reverse based on the diagnostics of the Reiver specimen. In all, 800 proofs were struck and distributed at face value. Gunmetal-blue and steel-gray patina covers each side of this semireflective offering. A couple of planchet flakes occur at the lower-right obverse, and ticks are seen throughout the fields. From The Bayside Collection. NGC ID# 252D, PCGS# 7002

1859 Seated Liberty Dollar, PR63 Brilliant, Lightly Marked Surfaces

5097 1859 PR63 PCGS. OC-P1, R.3. A nominal proof mintage of 800 Seated Liberty dollars was accomplished in 1859, using a single pair of dies. This was the only use of the obverse die, but the reverse was used again to strike proofs until 1858. This sharply detailed Select proof exhibits lightly marked brilliant surfaces, with deeply reflective fields. Population: 41 in 63, 63 finer (1/18).

From The Property of a Lady. NGC ID# 252D, PCGS# 7002

1863 Seated Dollar, PR63 Scarce Date, Only 460 Pieces Struck

5098 1863 PR63 PCGS. OC-P1, High R.4. A fully struck, lightly toned, and flashy example with noticeable white-on-black contrast, though PCGS has demurred on a Cameo designation. The tiny proof production of 460 pieces failed to sell out, and an unknown quantity were melted. Osburn and Cushing estimate 210 survivors, 90 as OC-P1 and 120 as OC-P2.

From The Bayside Collection. NGC ID# 23BS, PCGS# 7006

1864 Seated Dollar, PR62 Modest Contrast

5099 1864 PR62 PCGS. OC-P4, High R.5. This is one of the less often seen of the four proof die pairs known for 1864 Seated Liberty dollars. The example offered here is brilliant and deeply mirrored, showing frost-white devices that produce modest cameo contrast, which PCGS deems not quite sufficient for a Cameo designation. The strike is sharp, and unobtrusive field marks limit the grade. From The Bayside Collection. NGC ID# 252], PCGS# 7007

1864 Seated Liberty Dollar, PR62 Attractive Multicolor Toning

5100 1864 PR62 PCGS. OC-P1, High R.4. Only 470 proof Seated Liberty dollars were struck in 1864, using three different obverse dies and two different reverse that were both carried over from the previous year's proof production. This coin represents the most common proof variety, OC-P1, with an estimated surviving population of about 100 pieces. The design elements are sharply detailed and the lightly marked surfaces show highlights of cobalt-blue, lavender, and emerald-green toning. From The Property of a Lady. NGC ID# 252J, PCGS# 7007

1865 Seated Dollar, Untoned PR63 Noticeable Cameo Effect

5101 1865 PR63 PCGS. OC-P2, R.3. It is believed that all 500 proof silver dollars minted this year were distributed with the silver proof sets. A fair number of specimens still exist in various levels of preservation (about 325 pieces). This PR63 example is essentially brilliant, and the design elements are boldly defined. Light roller marks are noted in the vicinity of the eagle's right (left facing) wing. This attractive proof displays a noticeable cameo effect of which no mention is made on the insert.

Ex: FUN Signature (Heritage, 1/2007), lot 5223; New York Signature (Heritage, 12/2011), lot 3738.

From The Bayside Collection. NGC ID# 252K, PCGS# 7008

5102 1866 Motto PR58 PCGS. OC-P2, R.3. Ex: Osburn-Cushing Reference Collection. Die State a/a. Struck from one of three proof die marriages, this coin is misattributed as a circulation strike by PCGS. It is the plate coin for 1866 Obverse P2 in the new Osburn-Cushing reference book. Importantly, the reverse die is transitional, used to strike proofs for five years beginning in 1866 and ending in 1870. The present coin is a briefly circulated proof with resplendent multicolor toning and remnants of mirrored surfaces around the devices. Lavender, blue, and orange-gold shades occupy most of the attractive surfaces, which retain traces of rainbow iridescence.

1866 With Motto Seated Dollar, PR62 Sharp and Appealing for the Grade

5103 1866 Motto PR62 PCGS. OC-P2, R.3. This proof reverse has a shallow die line through the bottom of GOD and was paired with two different obverses for proof coinage in 1866. Osburn-Cushing-P2 is usually available for a price. The 1866 With Motto proof as a date is popular as a first-year type coin of this design. The present example displays full definition and a blush of light champagne toning. Modest cameo contrast is apparent on the reverse. From The Bayside Collection. NGC ID# 5GDV, PCGS# 7014

5104 1866 Motto PR63 PCGS. CAC. OC-P2, R.3. The 1866 proof Seated dollar is a popular type coin as the first of the With Motto issues. This CAC-approved Select example displays a full strike and a hint of cameo contrast. Light champagne toning blankets each side, with subtle blue-green visible on the extreme outer periphery. From The Property of a Lady. NGC ID# 5GDV, PCGS# 7014

1867 Seated Liberty Dollar, PR63 From a Mintage of 625 Pieces

5105 1867 PR63 PCGS. OC-P1, R.3. A limited mintage of just 625 proof Seated Liberty dollars was achieved in 1867, using a single pair of dies. This was the only use of the obverse die, but the reverse was used to strike proofs every year from 1866-1870. This charming Select proof exhibits sharply detailed design elements and deeply mirrored fields throughout. The lightly marked surfaces show highlights of lavender and golden-brown toning. Population: 75 in 63, 80 finer (1/18).

From The Property of a Lady. NGC ID# 252N, PCGS# 7015

- 5106 1868 PR55 NGC. OC-P1, R.4. Ex: Osburn-Cushing Reference Collection. Die State a/a. Called a circulation strike on the previous generation NGC holder, this coin is a briefly circulated proof as confirmed by both the obverse and reverse dies. A ghostlike imprint of the tops of 18 on the rim are the rarely seen occurrence of a misplaced date on a proof, diagnostic of this proof variety. The reverse die is a reuse of the 1866 proof reverse, used to strike proofs through 1870. OC-P1 is a Top 30 Variety in the new Osburn-Cushing reference book. Lovely golden-gray surfaces show reddishgold accents only light abrasions from brief circulation, while the strong proof strike and remnants of the formerly mirrored surfaces remain. NGC ID# 252P, PCGS# 7016
- 5107 1868 PR61 PCGS. OC-P2, High R.3. The date is repunched, noticeably on the 1 and 8. A crisply struck specimen with light to medium pearl-gray and tan-gold toning. Patient inspection beneath a lens reveals only minor field imperfections. From a meager proof mintage of 600 pieces.

From The Bayside Collection. NGC ID# 252P, PCGS# 7016

5108 1868 PR61 PCGS. OC-P1, R.4. This proof obverse shows the top of a misplaced 18 on the flat part of the rim below the primary date. Offered here is a deeply mirrored and sharply struck example with gold and blue-gray toning. Grade-limiting hairlines are only visible beneath a loupe.

From The Property of a Lady. NGC ID# 252P, PCGS# 7016

5109 1868 PR62 PCGS. OC-P1, R.4. A loupe reveals the tops of a misplaced 18 on the flat part of the rim below the 18 of the date. The reverse is common to both proof 1868 dollar varieties, showing a die line through the bottom of GOD. This coin is deeply mirrored in the fields with satiny devices. Both sides are brilliant, and gradelimiting hairlines are unobtrusive to the naked eye. NGC ID# 252P, PCGS# 7016

5110 1869 PR61 PCGS. FS-301, OC-P4, R.4. A Top 30 Variety. The obverse die was later used for business strikes (OC-2). Both a repunched date and a misplaced date, with the base of the 1 repunched and the top of a date digit protruding from the dentils near the 6. Although undesignated as Cameo, the motifs are icy and the fields are glassy. The margins exhibit hints of golden-brown patina. From The Bayside Collection. NGC ID# 252R, PCGS# 7017

1869 Seated Liberty Dollar, PR63 600 Pieces Struck

5111 1869 PR63 PCGS. OC-P2, R.4. A small mintage of 600 proof Seated Liberty dollars was accomplished in 1869, using three obverse and two reverse dies. This attractive Select specimen offers sharply detailed design elements in most areas, with just a touch of softness on the eagle's left (facing) wing and leg. The lightly marked surfaces are enhanced by shades of powder-blue, lavender-gray, greenish-gold, and violet toning, with reflective fields underneath. Population: 52 in 63 (1 in 63+), 80 finer (1/18).

From The Sea Cliff Collection. NGC ID# 252R, PCGS# 7017

1869 Seated Liberty Dollar, PR63 Rare Cameo Specimen

- 5112 1869 PR63 Cameo PCGS. OC-P3, R.4. A small mintage of 600 proof Seated Liberty dollars was accomplished in 1869, with four proof die varieties known for the date. This coin represents the OC-P3 variety, with some light doubling evident on the motto. The design elements are sharply detailed and the deeply mirrored fields contrast noticeably with the lightly frosted devices. Hints of greenish-gold and lavender toning enhance the outstanding eye appeal. Population: 16 in 63 (2 in 63+) Cameo, 28 finer (1/18). From The Property of a Lady. NGC ID# 252R, PCGS# 87017
- 5113 1870 PR61 PCGS. OC-P2, High R.4. The coin is sharp on the obverse with minor reverse weakness on the eagle's left (facing) leg and wing crest. Light golden border toning cedes to brilliant interiors, and both sides have a hint of cameo contrast. Extensive hairlines define the grade.

From The Property of a Lady. NGC ID# 252S, PCGS# 7018

- 5114 1871 PR60 PCGS. OC-P1, R.2. Light butter-gold toning accompanies this well-struck and nicely mirrored representative. Rotation beneath a light reveals delicate hairlines, but the eye appeal is nonetheless pleasing. Proofs are much scarcer than the associated business strike issue, the first of the series with a mintage above 1 million pieces. NGC ID# 252T, PCGS# 7019
- 5115 1871 PR61 PCGS. OC-P1, R.2. A flashy and fully struck specimen that shows only a hint of golden toning. White-on-black contrast is evident, although the coin is undesignated as Cameo by PCGS. The fields exhibit minor hairlines consistent with the grade. From The Bayside Collection. NGC ID# 252T, PCGS# 7019

1871 Seated Liberty Dollar, PR63 Sharply Detailed and Nicely Toned

5116 1871 PR63 PCGS. OC-P1, R.2. A fairly generous proof mintage of 960 pieces was accomplished at the Philadelphia Mint in 1871, using two obverse and one reverse die. This coin represents the OC-P1 die variety, easily identified by two small dots that appear in the fourth recessed shield stripe. This attractive PR63 example offers sharply detailed design elements and lightly marked reflective fields, under shades of sea-green and lavender-gray toning. Population: 62 in 63, 70 finer (1/18).

From The Property of a Lady. NGC ID# 252T, PCGS# 7019

1871 Silver Dollar, PR63 Cameo A CAC-Endorsed Collector Coin

5117 1871 PR63 Cameo NGC. CAC. OC-P1, R.2. The cameo contrast is immediately apparent on each side of this CAC-endorsed Select proof. The strike is sharp, and a hint of light golden toning adds warmth to the surfaces. Faint hairlines in the fields are all that limit the grade. Cameo examples of the 1871 proof Seated dollar are scarce, and Ultra Cameos are rare. Few CAC-endorsed examples of either category are known. Census: 14 in 63 Cameo, 12 finer. CAC: 3 in 63, 25 finer (12/17).

From The Bayside Collection. NGC ID# 252T, PCGS# 87019

5118 1872 PR61 PCGS. OC-P1, R.2. This brilliant and prominently mirrored specimen displays significant cameo contrast, although the coin is undesignated as such by PCGS. Careful rotation reveals delicate field hairlines. UNITED STATES and IN GOD WE TRUST are die doubled, as seen on all proof 1872 silver dollars. From The Bayside Collection. NGC ID# 252U, PCGS# 7020

1872 Seated Liberty Dollar, PR63 Reflective, Lightly Toned Fields

5119 1872 PR63 PCGS. OC-P1, R.2. The Philadelphia Mint struck a fairly generous mintage of 950 proof Seated Liberty dollars in 1872, using a single pair of dies. This attractive Select proof exhibits sharply detailed design elements throughout, with some light doubling on the motto and some die lines around the eagle's talon and lower branch. The fields are deeply reflective and the surfaces are lightly marked, with highlights of lavender and pale gold toning. The field/device contrast is noticeable, but undesignated. From The Property of a Lady. NGC ID# 252U, PCGS# 7020

1872 Silver Dollar, PR62 Cameo

5120 1872 PR62 Cameo PCGS. Both sides of this Cameo proof Seated Liberty silver dollar exhibit brilliant, untoned silver surfaces with a trace of gold toning on the rims outside the denticles. Faint grade-limiting hairlines are evident in the obverse and reverse fields. Population: 5 in 62 Cameo, 38 finer (1/18). NGC ID# 252U, PCGS# 87020

1873 Seated Dollar, PR62 Cameo Final Year of This Popular Type

5121 1873 PR62 Cameo PCGS. CAC. OC-P1, R.3. An impressive Cameo proof, this piece represents the transitional year that marked the end of the Seated Liberty silver dollars and the beginning of the Trade dollars. Both types are known in proof, with 600 specimens of this variant made. This piece has bright silver centers with peripheral gold and heather toning on the obverse and light gold on the reverse. Patina does not inhibit the field-device contrast. CAC: 1 in 62, 14 finer (12/17).

Ex: ANA National Money Show Signature (Heritage, 3/2011), lot 4535; FUN Signature (Heritage, 1/2014), lot 4937.

From The Bayside Collection. NGC ID# 252V, PCGS# 87021

TRADE DOLLARS

- 5122 1873-S AU58 NGC. CAC. The 1873-S is a better date in Uncirculated condition and scarce even in the upper AU grade levels. This CAC-approved near-Mint coin displays deep russet-gold and lavender-gray toning with some luster in the protected regions. Eye appeal is pleasing for the grade. NGC ID# 252Y, PCGS# 7033
- 5123 1874-CC Chop Mark MS62 PCGS Secure. This Carson City Trade dollar clearly "circulated" to a certain extent among Oriental trade merchants, although there is no wear on the devices, and original satin luster displays delicate lavender-gold toning. There are three chop marks on the obverse on Liberty's torso, above the 4 in the date, and on star 9; the reverse shows an additional chop mark on the eagle's left (facing) wing and another on the right (facing) leg. There is a small dig in the field just left of star 10 on the obverse, and the reverse shows a pitted area immediately opposite the star 9 chop mark from the obverse. NGC ID# 2532, PCGS# 87035 Base PCGS# 7035
- 5124 1875-CC Type One Reverse MS60 NGC. Period after FINE. A stone-white Carson City Trade dollar with a good strike and no individually consequential abrasions. Luster beckons from the legends and devices. OF AMERICA is strike doubled. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038

1875-CC Trade Dollar, MS61+ Type One Reverse

5125 1875-CC Type One Reverse MS61+ NGC. Period after FINE. Freckles of forest-green and golden-brown toning visit this lustrous and inoffensively abraded Carson City type coin. Undeniably attractive for the conservatively assessed grade. A "Narwhal" variety with a lengthy, bold die line from the eagle's beak through the second U in UNUM.

From The Bayside Collection. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038 5126 1875-S Type One Reverse MS62 PCGS. CAC. Large S. This Uncirculated Trade dollar offers strong mint luster and shows only minor inexactness of strike on Liberty's hair and the eagle's right (facing) claw. The lightly toned fields display distributed small marks. Very scarce with a CAC seal.

From The Bayside Collection. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

5127 1876 Type One Obverse, Type Two Reverse, MS63 NGC. Period after FINE. A brilliant and thoroughly lustrous type coin. Nicely struck, and the obverse is well-preserved. The reverse field exhibits wispy marks. STATES is strike doubled. From The Bayside Collection. NGC ID# 2539, PCGS# 40111 Base PCGS# 7041

1876-CC Trade Dollar, AU58 Doubled Die Reverse, FS-801

- 5128 1876-CC Doubled Die Reverse AU58 NGC. FS-801. Type One Obverse and Reverse as always for this variety. Prominent die doubling is evident at the lower reverse, especially on the branch that is widely doubled. Slight doubling is also noted below the eagle's beak, the right (facing) wing tip, and in the letters below the eagle. The letters in the motto are also doubled. This near-Mint example exhibits slight field-to-device contrast with faint champagne toning. A lovely example of this popular and elusive variety. Census: 6 in 58, 9 finer (1/18). NGC ID# 253A, PCGS# 97042 Base PCGS# 7042
- 5129 1877-S MS63 NGC. Large S. Lustrous and brilliant with a good strike and a smattering of unimportant obverse field marks. PLURIBUS UNUM and AMERICA are minutely die doubled toward the rim, but of greater interest is the ghostly doubling (to the east) of the eagle's right (facing) wing near its crest.

 From The Bayside Collection. NGC ID# 253E, PCGS# 7046
- 5130 1877-S MS64 PCGS. Large S, as usual. The 1877-S is an available date, ideal for type purposes. Nonetheless, coins grading finer than the present MS64 example are conditionally scarce. This piece displays a sharp obverse with minor weakness on the eagle's right (facing) talon. Satiny, silvery surfaces have hints of golden border toning. NGC ID# 253E, PCGS# 7046
- 5131 1877-S MS64 PCGS. Large S. The 1877-S Trade dollar enjoyed the largest mintage of the series, at more than 9.5 million pieces, but the great majority of the coins were sent to China and lost to numismatists in this country. The present coin is a scarce Choice Mint State example, with mottled gold and lavender toning. Strong mint luster remains beneath the patina. Only 44 coins have been certified in higher numeric grades at PCGS (12/17). Ex: FUN Signature (Heritage, 1/2011), lot 4030. NGC ID# 253E, PCGS# 7046
- 5132 1877-S MS64 NGC. Large S. A brilliant near-Gem that boasts strong mint luster and a bold strike. Tiny field marks are scattered but do not distract. An unlisted doubled die obverse variety, apparent on the right edge of the banner bearing LIBERTY.

 From The Bayside Collection. NGC ID# 253E, PCGS# 7046
- 5133 1878-S MS64 NGC. This Choice first-year type coin is sharp throughout the relief design elements and displays satiny luster in the fields. A combination of gold and russet hues blanket each side, attesting to the originality of the surfaces and masking a few light abrasions that prevent Gem classification. Finer coins are scarce. NGC ID# 253G, PCGS# 7048

PROOF TRADE DOLLARS

5134 1873 PR63 PCGS. The eagle's right (facing) talons are slightly weak, but the strike on this Select proof 1873 Trade dollar is otherwise sharp. The reflective fields display deep gunmetal-blue and olive-gray toning that masks any minor, grade-limiting surface imperfections. NGC ID# 27YJ, PCGS# 7053

1874 Trade Dollar, Toned PR63 Pleasing for the Grade

- 5135 1874 PR63 PCGS. Period after FINE. Glimmering fields attest to the proof status of this Select 1874 Trade dollar despite moderate strike weakness on the eagle's right (facing) leg and talons and Liberty's torso. The stars and Liberty's head are sharper. Deep, mottled toning in shades of olive, gold, russet, and aquamarine blanket each side, masking any minor contact marks that limit the grade. NGC ID# 27YK, PCGS# 7054
- 5136 1875 PR62 NGC. Type Two Reverse. Powder-blue patina visits this well-struck specimen. Field hairlines are delicate, and fewer than anticipated for the PR62 level. UNITED is minutely die doubled. Only 700 proofs were issued. NGC ID# 27YL, PCGS# 7055
- 5137 1875 PR63 PCGS. Type Two Reverse. Lavishly patinated dusky rose-red, forest-green, and golden-brown. A well struck Select specimen. Contact is confined to a tick on the obverse rim at 7 o'clock. UNITED exhibits minor die doubling. NGC ID# 27YL, PCGS# 7055

1875 Trade Dollar, PR64 Cameo Type Two Reverse

- 5138 1875 PR64 Cameo PCGS. Type Two Reverse without a berry beneath the right (facing) claw. A charming Choice Cameo proof. Nearly brilliant, though protected areas display light wheat-gold toning. The strike is crisp aside from blending on Liberty's curls and diadem. A mere 700 proofs were produced. NGC ID# 27YL, PCGS# 87055
- 5139 1876 PR61 NGC. Type One Obverse and Reverse. No period after FINE. A rare subtype combination for proofs of this date, which is nearly always encountered with a Type Two Reverse. This Centennial-year specimen displays honey-gold toning near the rims. The strike is good except on the eagle's right (facing) leg. A shallow strike-through is near the first A in AMERICA.

 From The Bayside Collection. NGC ID# 27YM, PCGS# 7056

- 5140 1876 PR62 PCGS. Type Two Obverse and Reverse. Period after FINE. A rare hub combination for 1876 proofs, which usually have a Type One Obverse. This satiny specimen is well-struck except on Liberty's hair. The olive-gold surfaces display minuscule marks on the field near the knees.
 - Ex: Los Angeles Signature (Heritage, 9/2010), lot 4007, which realized \$2,300. NGC ID# 27YM, PCGS# 7056
- 5141 1878 PR62 Cameo NGC. The Philadelphia Mint began production of Morgan dollars in 1878, marking the beginning of the end for the Trade dollar series. From 1878 to 1883, the Pennsylvania coinage facility only minted proof Trade dollars in small quantities. Today, those coins are highly collectible and an important part of late 19th century numismatic history. This impressive Cameo proof is mostly brilliant with hints of peripheral gold toning and exceptional contrast between the fields and devices. Ex: FUN Signature (Heritage, 1/2013), lot 4634.
 - From The Bayside Collection. NGC ID# 27YP, PCGS# 87058
- 5142 1879 PR58 PCGS. A brush of high-point friction on the devices and scattered marks and hairlines in the fields suggest that this proof 1879 Trade dollar circulated very briefly or was carried as a pocket piece for a short time. Light golden toning on each side helps to set off the devices from the mirrored fields. NGC ID# 27YR, PCGS# 7059

1879 Trade Dollar PR64 Popular Proof-Only Date

5143 1879 PR64 NGC. Vivid shades of cobalt-blue and greenish-gold toning blanket the well-preserved surfaces of this attractive Choice proof Trade dollar. The design elements are sharply detailed throughout and the fields are deeply mirrored under the patina. From a proof-only mintage of 1,541 pieces. NGC ID# 27YR, PCGS# 7059

1879 Trade Dollar, PR64 Deeply Toned

- 5144 1879 PR64 PCGS. Upon introduction of the Morgan silver dollar under the Bland-Allison Act in 1878, the Philadelphia Mint continued production of Trade dollars in small quantities as proofonly issues. These proof-only Trade dollars continued through 1885. This Choice proof example has deep lilac and blue toning that masks the underlying mirrored surfaces while retaining good eye appeal. NGC ID# 27YR, PCGS# 7059
- 5145 1880 PR61 PCGS. This deeply mirrored proof type coin is razor-sharp and cast in a faint tan-gold hue. Hairlines in the fields limit the grade but are not distracting to the unaided eye. The frequently sharp strikes and good contrast of the 1880 proof Trade dollar makes this issue ideal for collectors seeking a single coin of this design. From The Sea Cliff Collection. NGC ID# 27YS, PCGS# 7060

1880 Trade Dollar, PR64 Beautiful Coloration

5146 1880 PR64 NGC. From a generous proof-only mintage of 1,987 pieces, this impressive Choice example exhibits well-detailed design elements that show just a touch of the typical softness on Liberty's head and some star centers. Vivid shades of lavender-gray, cerulean-blue, and greenish-gray toning blanket the well-preserved surfaces, with deeply mirrored fields underneath. NGC ID# 27YS, PCGS# 7060

1880 Trade Dollar, PR63 Cameo An Exemplary Coin for the Grade

5147 1880 PR63 Cameo NGC. CAC. The depth of mirroring in the fields and the remarkable cameo contrast make minor gradelimiting marks nothing more than an afterthought on this CACendorsed proof Trade dollar. Every detail is sharp, and a hint of rose-gold border toning surrounds essentially brilliant interiors. Eye appeal is outstanding. Few CAC-approved Cameos are known. From The Bayside Collection. NGC ID# 27YS, PCGS# 87060

1880 Trade Dollar, PR63 Cameo Exceptionally Appealing for the Grade

5148 1880 PR63 Cameo NGC. CAC. This CAC-approved Cameo is indeed high-end for the PR63 grade level, showing strong contrast and relatively clean surfaces (a few faint field lines are visible with a loupe). Warm golden border toning surrounds brilliant interiors, and the design elements are fully struck. Easily one of the most eyeappealing proof Trade dollars that we have seen in this grade. NGC ID# 27YS, PCGS# 87060

MORGAN DOLLARS

- 5149 1878 8TF Spiked Eye, VAM-3, MS65 PCGS. CAC. A thoroughly lustrous Gem. A die flaw below the eyelid in front of the eye identifies VAM-3. Brilliant aside from a glimpse of gold patina. Sharply struck and splendidly preserved. As nice as can be obtained for the die variety. Population: 8 in 65, 0 finer (1/18). NGC ID# 2YR3, PCGS# 133786 Base PCGS# 7072
- 5150 1878 8TF Denticle Chip, VAM-4, MS65+ NGC. An obverse die chip at 1:30 is the pick-up point for the conditionally rare VAM-4 variety. The date, UNITED, and ONE are die doubled. Lustrous and well preserved with a trace of peripheral lemon-gold patina. NGC and PCGS have certified a combined 216 examples (as of 1/18) with the present lot as the *single finest graded*. Census: 6 in 65 (1 in 65+), 0 finer (1/18). NGC ID# 253H, PCGS# 133787 Base PCGS# 7072
- 5151 1878 8TF VAM-14.8, Spiked Eye, MS62 NGC. Per VAMworld. com, "The 1878-P VAM-14.8 is one of the ultra rare 8TF coins. VAM-14.8 was [initially] struck as a proof and the dies were reused as a business strike. Because of [its] rarity, the business strike typically sells for higher premiums than the proof." A sharply struck and flashy example with peripheral golden patina and a smattering of minor field marks. NGC ID# 253H, PCGS# 133803 Base PCGS# 7072

1878 8TF Morgan Dollar, MS64 Deep Mirror Prooflike VAM-14.8 Spiked Eye

- 5152 1878 8TF MS64 Deep Mirror Prooflike PCGS. VAM 14.8, Spiked Eye. This spectacular first-year Morgan dollar was struck with the old eight tailfeathers reverse, used early in the year. In fact, this particular set of dies was used first to strike proofs, before being switched to business-strike production. This coin shows the frosty design elements and deeply reflective fields expected of a proof issue, so it may have been one of the first business strikes produced, before the dies suffered any significant wear. The surfaces are lightly marked, with subtle hints of pink patina. Liberty's eye shows the diagnostic "spike" that identifies the VAM-14.8 variety. NGC ID# 253H, PCGS# 40162 Base PCGS# 97073
- 5153 1878 8TF Doubled Eyelid, VAM-14.13 Partial Collar Strike XF40 PCGS. VAMworld.com describes VAM-14.13 as "one of the terribly rare 8 tailfeather varieties." The best-known pick-up point is the die lump below the eyelid in front of the eye, but a die scratch near a cotton leaf below the ball of the cap provides another identifier. The reverse is easy to identify, but it shared with three obverses. The other two varieties (VAM-14.9 and VAM-14.16) are also both very rare. This is a gunmetal-gray example with delicate reverse hairlines and a moderate mark on the cheek. Technically a mint error (the collar die was only partially engaged, thus reeding is partial) but of greater interest to collectors as an example of a rare 8TF marriage. NGC ID# 569N, PCGS# 133808 Base PCGS# 7072

1878 8TF Morgan Dollar, MS62 Prooflike VAM-14.16, Wild Lips Variety

- 5154 1878 8TF Wild Lips, VAM-14.16, Hot 50, MS62 Prooflike PCGS. A Hot 50 Variety. Liberty's profile is die doubled, similar to (though less dramatic than) the famous VAM-4 "Hot Lips" 1888-O dollar. VAMworld.com calls VAM-14.16 "ultra rare," and the present lot ranks among the finest examples of the variety. The mirrored surfaces are untoned, well struck, and moderately abraded. Population: 4 in 62 (2 in 62+) Prooflike, 1 finer (1/18). NGC ID# 253H, PCGS# 40177 Base PCGS# 7073
- 5155 1878 7/8TF 7/4 Strong, VAM-37, MS65 PCGS. CAC. Medium to deep apricot-gold dominates the obverse but is confined to the periphery on the reverse. The upper obverse margin offers a glimpse of aquamarine. This CAC-approved Gem is sharply struck, including on the hair over Liberty's ear and the eagle's breast feathers. Lustrous, pleasing surfaces add to the eye appeal. At least four of the underfeathers are visible, hence the "Strong" designation. Ex: Long Beach Signature (Heritage, 6/2013), lot 4940; Long Beach Signature (Heritage, 9/2014), lot 4647. NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078
- 5156 1878 7/8TF VAM-40, 7/5 Strong, MS65 PCGS. The lower tips of five tailfeathers are visible along the bottom of the primary seven. A short die line off the tip of a lower olive leaf and an arrow-shaped die line beneath the C in AMERICA identify this variety. The present coin is sharp and softly frosted with brilliant surfaces. No major abrasions are seen. NGC ID# 253H, PCGS# 134037 Base PCGS# 7078
- 5157 1878 7TF Reverse of 1879 MS65 NGC. Vibrant, frosty mint luster shows only inconsequential abrasions on this Gem first-year Reverse of '79 type coin. The obverse displays warm orange-gold toning across the center with vivid violet and blue around the border. The reverse is brilliant with amber-orange and gold border toning. Eye appeal is generous. Finer examples of this 1878 subtype are rarely offered. NGC ID# 253L, PCGS# 7076
- 5158 1878 7TF Reverse of 1879 MS65 PCGS. Frosty silver-gray luster shows irregular splashes of sun-orange, amber, and sea-green toning over well-preserved surfaces. The strike is bold on the obverse but weak on the eagle's breast and legs. The originality of the surfaces is unmistakable. NGC ID# 253L, PCGS# 7076
- 5159 1878 7TF Reverse of 1879 MS65+ PCGS. This frosty, high-end Gem Reverse of 1879 Morgan is free of all but a few minor grazes in the left obverse field that limit the grade. The dies are heavily clashed, with an almost complete profile of Liberty visible on the reverse. Finer examples of this issue are scarce. NGC ID# 253L, PCGS# 7076

1878 Morgan Dollar, MS65 Prooflike 7TF, Reverse of 1879

- 5160 1878 7TF Reverse of 1879 MS65 Prooflike PCGS. Both sides of this prooflike Gem exhibit brilliant and untoned silver surfaces with nearly full design definition. Trivial grade-consistent marks are reflected in the mirrored fields, and a few minuscule marks are evident on the devices. Population: 7 in 65 Prooflike, 7 finer including Deep Mirror Prooflike pieces (1/18). NGC ID# 253L, PCGS# 7077
- 5161 1878-CC MS65 PCGS. Frosty luster is untoned on this blazing Gem, illuminating sharp design elements and well-preserved surfaces. Only some light grazes in the left obverse field limit the grade. The 1878-CC is popular as the first Morgan dollar struck at the Carson City Mint, although it has a sister coin the 1878-CC Trade dollar, which is the final issue of that denomination from the same mint. NGC ID# 253M, PCGS# 7080
- 5162 1878-CC MS65 PCGS. This sharp, frosty Gem displays original olive-gold, sun-orange, and lavender-gray toning over each side. Under a loupe, Liberty's cheek is found to be clean, and the fields show only a few truly insignificant marks. A high-end coin for the grade. NGC ID# 253M, PCGS# 7080
- 5163 1878-CC MS65 PCGS. VAM-2A. This variety exhibits a prominent die chip on Liberty's nostril. The present example is sharp and frosty, showing delicate champagne toning on each side. The obverse is especially lustrous, while the reverse fields take on a semiprooflike appearance. A few faint grazes on the devices prevent a finer grade but hardly detract. NGC ID# 253M, PCGS# 7080
- 5164 1878-CC MS65 NGC. This first-year Carson City Morgan dollar is frosty on the devices and flashy in the fields. Gold-orange bands wrap around the margins of an otherwise untoned Gem. Ex: Long Beach Signature (Heritage, 9/2012), lot 4088. NGC ID# 253M, PCGS# 7080
- 5165 1878-CC MS65+ PCGS. CAC. An important branch mint issue from the first year of the Morgan design, this Plus-graded Gem exhibits razor-sharp definition on all design elements and the well-preserved, brilliant surfaces radiate vibrant mint luster throughout. NGC ID# 253M, PCGS# 7080

1878-CC Morgan Dollar, MS66 VAM-2A, Die Chip on Nostril

5166 1878-CC MS66 NGC. VAM-2A. Discovered by Leonard Hinckley in February 1974, this R.5 variety has LIBERTY doubled and a prominent die chip on the nostril. Mostly brilliant and fully frosted surfaces display glints of thin gold patina around parts of the obverse rim. That side is virtually unmarked, while the reverse shows light chatter above the eagle. Well-struck over the ear. The 1878-CC is very rare any finer.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 253M, PCGS# 7080

1878-CC Morgan Dollar, MS66 Seldom Encountered Any Finer

- 5167 1878-CC MS66 PCGS. A first-year Morgan dollar from the famous Carson City Mint, this delightful Premium Gem exhibits sharply detailed, frosty design elements and virtually pristine brilliant surfaces, with vibrant mint luster on both sides. The 1878-CC claims a mintage of 2.2 million pieces, but the issue is very rare in grades above the MS66 level. PCGS has graded six numerically finer examples (1/18). NGC ID# 253M, PCGS# 7080
- 5168 1879 MS66 PCGS. The creamy surfaces of this delightful Premium Gem are well-preserved and lustrous with delicate hints of lavender-gray toning. The design elements are well-detailed, with just a hint of blending on the hair above the ear. PCGS has graded five numerically finer examples (1/18). NGC ID# 253S, PCGS# 7084
- 5169 1879 MS66 NGC. A well-struck example of this early Philadelphia Morgan, showing frosty mint luster with a golden peripheral ring around brilliant interiors. Liberty's cheek is nearly flawless. The 1879 is available in this grade but rare finer. Census: 80 in 66 (4 in 66+, 3 in 66 ★), 6 finer (1/18).
 From The XSupers Set of Margas NGC Perioty #1. NGC.
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 253S, PCGS# 7084
- 5170 1879 MS66+ PCGS. This early Philadelphia Morgan is elusive in MS66, and PCGS lists only five finer representatives (1/18). This Plus-graded Premium Gem displays frosty, untoned luster and boldly rendered design elements. A pair of minor marks on the eagle's breast are the only mentionable abrasions. NGC ID# 253S, PCGS# 7084

1879-CC Dollar, AU55 Pleasing Collector-Grade Example

5171 1879-CC AU55 NGC. Softness of detail and roller marks over the ear and breast feathers suggest an incomplete impression, but blending from circulation is minimal. Abundant luster shines from the recesses of this untoned Choice AU dollar. Both sides are relatively clean. From a mintage of 756,000 coins, the 1879-CC poses the greatest challenge among Carson City issues after the 1889-CC. NGC ID# 253U. PCGS# 7086

1879-CC Dollar, AU55 Challenging Carson City Issue

- 5172 1879-CC AU55 PCGS Secure. Only 4,123 1879-CC dollars were distributed by the Treasury during the early 1960s. It is possible the issue was the subject of mass melting in 1918. Regardless, this is the second scarcest CC issue in the series, following in the footsteps of the 1889-CC. This Normal Mintmark variant is bright with remaining luster and faint golden tones around the obverse rims. Wispy marks and a trace of blending are in-line with the grade. NGC ID# 253U, PCGS# 7086
- 5173 1879-CC Cleaned PCGS Genuine. Unc. Details. VAM-4. The '79-CC ranks among the most coveted Carson City Morgan dollar issues, though trailing the 1889-CC. This sharply struck straw-gold and pearl-gray example displays delicate hairlines but is minimally bagmarked.
- 5174 1879-CC Stained NGC Details. Unc. Dusky tan coloration blankets each side of this unworn 1879-CC Morgan, although slight field reflectivity is visible when tilted beneath a light. The strike is bold, and the only mentionable abrasion is a horizontal mark on the eagle's breast.

1879-CC Silver Dollar, MS63 Semiprooflike Surfaces

- 5175 1879-CC MS63 PCGS. A semiprooflike representative of this semikey Carson City issue. Lightly toned and nicely struck with unabraded fields and a few wispy grazes on the portrait. One of the many inconsistencies of the Morgan series is that the '79-CC is much rarer than the '80-CC in Mint State, despite a considerably higher mintage. Encapsulated in an old green label holder. NGC ID# 253U, PCGS# 7086
- 5176 1879-CC Capped Die, VAM-3A, AU53 PCGS. A Top 100 Variety. Myriad tiny die chips surround the mintmark. The Guide Book variety was first identified as an effaced Large Over Small CC by Leroy Van Allen in 1965. A partly lustrous and lightly marked example with medium wheat-gold and cream-gray toning. Certified in a green label holder. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-S Morgan Dollar, MS65 Scarce Second Reverse Variant

- 5177 1879-S Reverse of 1878 MS65 NGC. A Top 100 Variety. The 1879-S Third Reverse is plentiful through MS68, but the Second Reverse (Reverse of 1878) variant is exceedingly scarce in Gem condition. Finer coins are very rare. Each side is well-struck, though roller marks remain on the cheek and above the ear. Completely brilliant with frosty cartwheel mint luster.
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 253W, PCGS# 7094

1879-S Morgan Dollar, MS65 Scarcer Reverse of 1878

- 5178 1879-S Reverse of 1878 MS65 PCGS. From a large mintage of 9.1 million pieces, the 1879-S Morgan dollar is usually seen with the reverse of 1879. This delightful Gem displays well-preserved, lustrous surfaces and sharply detailed design elements, with the parallel top arrow fletching that identifies the much scarcer Reverse of 1878. Examples with the Reverse of 1878 are surprisingly scarce in MS65 condition, and finer coins are extremely rare. Population: 61 in 65, 1 finer (1/18). NGC ID# 253W, PCGS# 7094
- 5179 1879-S Reverse of 1878, VAM-9, MS64 PCGS. A Top 100 Variety. Sea-green and lilac toning consumes the obverse. The reverse is nearly brilliant. Lustrous and crisply struck. Contact is trivial save for a slender vertical field mark above Liberty's nose. NGC ID# 253W, PCGS# 133858 Base PCGS# 7094

1879-S VAM-9 Dollar, MS65 Reverse of 1878

5180 1879-S Reverse of 1878, VAM-9, MS65 PCGS. A Top 100 Variety. This sharply struck Reverse of 1878 coin displays brilliant, radiant cartwheel luster. A few light grazes on Liberty's cheek limit the grade but are not overly distracting. The eye appeal is excellent. Finer Reverse of 1878 examples are extremely rare. Population: 65 in 65, 2 finer (1/18). NGC ID# 253W, PCGS# 133858 Base PCGS# 7094

1879-S Dollar, MS68 Early San Francisco Type Coin

- 5181 1879-S MS68 NGC. From a mintage of 9.1 million coins, the 1879-S is a widely available early issue in the Morgan dollar series that is collectible even in this extraordinary state of preservation. This Superb Gem offers a full strike and bright, frosty surfaces with blushes of golden patina along the upper obverse border. None graded finer (12/17).
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 253X, PCGS# 7092

1879-S Dollar, MS68 **Essentially Flawless**

5182 1879-S MS68 NGC. A full strike and complete mint brilliance are hallmarks of his ideal type coin and Registry Set candidate from the second year of issue in the Morgan dollar series. The surfaces are thickly frosted and essentially flawless. Neither NGC nor PCGS have seen a finer coin in MS69 (1/18). NGC ID# 253X, PCGS# 7092

1879-S Morgan Dollar, MS68 Registry Set Essential

- 5183 1879-S MS68 PCGS. The 1879-S Morgan dollar claims a large mintage of 9.1 million pieces and the issue is obtainable all the way up to the MS68 grade level, but no coins have been certified in higher numeric grades at either of the leading grading services (1/18). This magnificent MS68 example is sharply detailed throughout, with virtually pristine brilliant surfaces and vibrant mint luster on both sides. NGC ID# 253X, PCGS# 7092
- surfaces on this Premium Gem 1880 Morgan dollar. The prime focal areas are exceptionally well-preserved, complementing the sharpness of the strike. Examples are scarce in this grade and Prooflike coins are rarely encountered so fine. Census: 42 in 66 (1 in 66+), 9 Prooflike and Deep Prooflike coins finer (1/18).

5184 1880 MS66 NGC. Intense, frosty mint luster rolls across pristine

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 253Y, PCGS# 7096

1880/79-CC Dollar, MS66 Reverse of 1878, VAM-4

- 5185 1880/79-CC Reverse of 1878, VAM-4, MS66 NGC. A Top 100 Variety. The final two date digits are punched over a previous 79. The top arrow feather on the reverse is parallel to the others. This is one of the most challenging of the various 1880-CC dollar varieties. A strong strike is evident throughout this brilliant, frosty Premium Gem. Light chatter appears in the upper reverse field, otherwise the surface preservation is top-notch. From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108
- 1880-CC 8 Over High 7, VAM-5, MS66 PCGS. A Top 100 Variety, showing a strong 8/7 overdate. This Reverse of 1879 issue is elusive in high grade. The present coin displays brilliant, frosty mint luster and sharp design elements. A few light scuffs on Liberty's cheek prevent a finer grade. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102
- 5187 1880-CC 8 Over Low 7, VAM-6, MS65 Prooflike PCGS. A Top 100 Variety. An obvious 7 is visible in remnants within the loops of the second 8 in the date; it is set fairly low in comparison to the primary numerals, earning this variety the moniker "8 Over Low 7." The present coin is prooflike and brilliant, showing cameo contrast and only a few minor abrasions. A sharp strike completes the eye appeal. NGC ID# 35BH, PCGS# 41135 Base PCGS# 7105
- 5188 1880-CC 8 Over Low 7, VAM-6, MS65 Prooflike PCGS. A Top 100 Variety. The underdigit 7 is punched low relative to the primary 8. All-brilliant surfaces allow for the full appreciation of Prooflike contrast on each side. The completely defined motifs are thickly frosted and set against clean, reflective fields. Population: 29 in 65 Prooflike, 5 finer (1/18). NGC ID# 35BH, PCGS# 41135 Base PCGS# 7105
- 5189 1880-CC MS66 PCGS. VAM-3A. Light straw-gold toning visits this lustrous and exceptionally unabraded Carson City dollar. The centers lack a full impression, but the remainder of the strike is crisp. VAM-3A is the clashed die state of VAM-3, which shows die rust in the vicinity of the mintmark. NGC ID# 2542, PCGS# 7100
- 5190 1880-O MS64 PCGS. Micro O. Dynamic cartwheel luster, a brilliant appearance, and a solid strike combine to proclaim the charms of this New Orleans near-Gem. Delicate contact on the cheek precludes the assignment of the seldom-awarded MS65 grade. NGC ID# 2543, PCGS# 7114
- 5191 1880-O MS64 NGC. Micro O. A trace of gold toning visits the centers of this lustrous and sharply struck New Orleans silver dollar. Impressively unabraded for the MS64 level, showing only faint luster grazes on the cheek and in the fields when viewed at certain angles beneath a loupe. NGC lists only 25 finer non-Prooflike coins; a number of Prooflike and Deep Prooflike pieces are listed in MS64, and one MS65 Prooflike piece is finer (1/18). Ex: FUN Signature (Heritage, 1/2013), lot 6075. NGC ID# 2543, PCGS# 7114
- 5192 1880-O MS64 PCGS. Micro O. The reverse border displays glimpses of autumn-brown toning, but this lustrous New Orleans near-Gem is principally cream-gray. Both sides are well preserved, and the strike shows only moderate central inexactness. NGC ID# 2543, PCGS# 7114

- 5193 1880-O MS64 NGC. Micro O. Satiny mint luster is a hallmark of this piece, despite dusky olive-gold toning on each side. A loupe reveals a few light marks on Liberty's cheek that define the grade. The 1880-O is available in this grade but rare finer. NGC ID# 2543, PCGS# 7114
- 5194 1880-O MS64+ NGC. Micro O. The ideal grade for the 1880-O dollar is MS64+, since Gems trade at a five-figure level. This lustrous and essentially brilliant example has exemplary preservation but shows moderate incompleteness of strike in the centers. NGC ID# 2543, PCGS# 7114

1880-O Morgan Dollar, MS64+ Elusive Issue in Finer Grades

- 5195 1880-O MS64+ PCGS. CAC. The 1880-O Morgan dollar is easily located in MS64 condition, but the issue is very scarce in any finer grade. This Plus-graded Choice specimen exhibits a remarkably sharp strike for a New Orleans Mint issue, and the well-preserved, brilliant surfaces radiate vibrant mint luster on both sides. PCGS has graded 45 numerically finer examples (1/18). NGC ID# 2543, PCGS# 7114
- 5196 1880-O 80/79 Crossbar, VAM-4, MS63 Prooflike PCGS. CAC. A Top 100 Variety. This important overdate variety has a micro O mintmark. The coin offered here is brilliant and well-struck, showing light abrasions on Liberty's cheek that limit the grade. Reflectivity in the fields produces subtle cameo contrast on each side. NGC ID# 356H, PCGS# 41287 Base PCGS# 7117
- 5197 1880/79-O VAM-5, 8 Over 7 Crossbar, MS64 NGC. A Top 100 Variety. Oval O. VAM-5 is scarcer than VAM-4, the Micro O variant of the Crossbar overdate. Neither the VAM nor the variety is designated on the NGC insert, but close study promptly confirms all characteristics. Nicely struck and lustrous with comprehensive golden-brown, blue-green, and lilac-lavender toning. NGC ID# 2543, PCGS# 133881 Base PCGS# 7114

1880/79-O VAM-5 Morgan Dollar Brilliant MS64 Prooflike

- 5198 1880/79-O VAM-5, Crossbar, MS64 Prooflike PCGS. A Top 100 Variety. An important VAM overdate, showing a prominent remnant of a 7 in the upper loop of the second 8. This Prooflike near-Gem is brilliant and vibrantly lustrous with modest cameo contrast. Some faint luster grazes on Liberty's cheek limit the grade, but the coin shows no major abrasions. PCGS# 41292 Base PCGS# 7115
- 5199 1880-S MS67+ PCGS. CAC. 30th Anniversary Green Label Holder. This magnificent Morgan dollar is a high-end Superb Gem, with sharply detailed design elements and impeccably preserved surfaces that show some prooflike reflectivity on the reverse. Eye appeal is tremendous. NGC ID# 2544, PCGS# 7118

5200 1880-S MS67+ PCGS. CAC. Medium S. A spectacular Morgan dollar type coin. Well-struck and highly lustrous with smooth, brilliant surfaces. Pristine aside from faint grazes on Liberty's face. Ex: Dallas Signature (Heritage, 3/2013), lot 7959, which realized \$1,880. NGC ID# 2544, PCGS# 7118

1880-S Silver Dollar, MS68 Outstanding Morgan Type Coin

- 5201 1880-S MS68 NGC. Large S. The 1880-S and 1881-S have a reputation of the best-produced issues in the Morgan dollar series, and high-grade examples are ideal for type purposes. The present example is sharply struck and features booming cartwheel luster and exceptional unmarked surfaces. NGC ID# 2544, PCGS# 7118
- 5202 1880/79-S Medium S, VAM-8, MS66 Deep Mirror Prooflike NGC. A Top 100 Variety. Cameo contrast is evident between the luminous motifs and the mirrored fields. A precisely struck and splendidly smooth Premium Gem.

 Ex: Dr. Charles Nelson Collection (Heritage, 9/2012), lot 4112; Long Beach Signature (Heritage, 2/2013), lot 4356. NGC ID# 2544, PCGS# 41502 Base PCGS# 97121
- 5203 1880/9-S VAM-11, Medium S, MS67 PCGS. A Hot 50 Variety. Die striations in the 0 in the date identify this popular *Guide Book* variety. Frosty luster cascades over untoned and practically pristine surfaces. The design motifs are nicely struck. Population: 75 in 67 (8 in 67+), 3 finer (1/18).

 Ex: FUN Signature (Heritage, 7/2014), lot 4162, which realized \$1,645. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122
- 5204 1881 MS66 NGC. Unlike the San Francisco issue of this year, the 1881 Morgan dollar is scarce in MS66 and a genuine rarity finer. The present example displays frosty original mint luster on both sides, with vast multicolor toning on the obverse alone; the reverse is brilliant. Under a loupe, some minor weakness is seen on the hair above Liberty's ear, as usual. Census: 56 in 66 (1 in 66+, 2 in 66 ★), 4 finer (including one in MS66 Prooflike) (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2546, PCGS# 7124

1881 Morgan Dollar, MS66+

5205 1881 MS66+ PCGS. CAC. Bright silver luster overall with only a few small areas of gray and an arc of gold-orange color along the upper-left obverse. Sharply detailed in the centers with great all-around eye appeal befitting this P-mint Morgan dollar's Premium Gem and Plus status.

Ex: Long Beach Signature (Heritage, 6/2011), lot 3936. NGC ID# 2546, PCGS# 7124

5206 1881-CC MS66 PCGS. VAM-2. A delightful Carson City silver dollar. Strong cartwheel luster sweeps well-preserved and sharply struck surfaces. Only a whisper of tan toning is present. VAM-2 is attributed by die filling within the upper loops of the 8s in the date.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2549, PCGS# 7126

5207 1881-CC MS66 PCGS. CAC. Nicely preserved surfaces display pleasing luster and good field-device contrast. Sharp definition is noted on the hair over Liberty's ear and on the eagle's breast. A hint of golden-tan color occurs on the central devices. Finer 1881-CC dollars are scarce in comparison to the demand for this popular Carson City issue.

Ex: FUN Signature (Heritage, 1/2007), lot 6950. NGC ID# 2549, PCGS# 7126

- 5208 1881-CC MS66+ PCGS. CAC. VAM-2. This variety shows a band of small die chips through the upper loop of the second 8 in the date, and a needlelike die line in the recess below the olive branch stem on the reverse. The present example is well-struck and brilliant with blazing frost-white luster. A light graze near the back of Liberty's jaw appears to be all that keeps this piece from a full MS67 designation. NGC ID# 2549, PCGS# 7126
- 5209 1881-CC MS66+ PCGS. CAC. A Plus-graded Premium Gem example of this popular branch mint issue, with well-detailed design elements and well-preserved brilliant surfaces that radiate vibrant mint luster throughout. Overall eye appeal is terrific. NGC ID# 2549, PCGS# 7126

1881-CC Dollar, Superb Gem Outstanding Carson City Type Coin

5210 1881-CC MS67 PCGS. VAM-2. Brilliant save for a blush of tangold toning near Liberty's ear. A lustrous and fully struck Superb Gem dollar. The obverse field is essentially immaculate, and even the cheek shows only inconsequential contact. The '81-CC has the second-lowest mintage of any Carson City Morgan issue. NGC ID# 2549, PCGS# 7126

1881-CC Dollar, MS67 Lightly Toned and Lustrous

5211 1881-CC MS67 NGC. VAM-2. A beautiful high-grade Carson City dollar. A hint of silver-gray toning visits lustrous and virtually pristine surfaces. The strike is exemplary, as is the eye appeal. An excellent candidate for an advanced silver type set. VAM-2 shows die fill within the second 8 in the date, reminiscent of the VAM-6 8 Over 7 Low 1880-CC. NGC ID# 2549, PCGS# 7126

5212 1881-CC MS64+ Deep Mirror Prooflike PCGS. CAC. A combination of radiant cartwheel luster and deep prooflike mirroring adorn the fields of this silver-white Carson City Morgan dollar. The strike is sharp, and only a few light grazes in the left obverse field prevent full Gem classification. Cameo contrast is apparent on each side. NGC ID# 2547, PCGS# 97127

1881-CC VAM-2 Dollar MS65+ Deep Mirror Prooflike

5213 1881-CC MS65+ Deep Mirror Prooflike PCGS. VAM-2. Icy motifs and glassy fields ensure the eye appeal of this low-mintage Carson City Gem. The strike is sharp, and the fields and cheek show far fewer marks than is usual for the issue. Although the '81-CC appeared in GSA auctions in quantity, demand for examples long ago exceeded the supply. NGC ID# 2547, PCGS# 97127

1881-S Dollar, MS66 Neon Obverse Toning

5214 1881-S MS66 PCGS. CAC. This lot should draw significant attention from toning enthusiasts. The obverse is entirely patinated in vibrant neon hues that include magenta, ice-blue, mint-green, and purple. The reverse features an arc of rainbow color along the left border but is otherwise brilliant. Exquisitely preserved surfaces are typical of the 1881-S. A well-struck Premium Gem with phenomenal eye appeal. NGC ID# 2549, PCGS# 7130

1881-S Dollar, MS68 Originally Toned and Near-Pristine

5215 1881-S MS68 NGC. Cobalt-blue, violet, and gold hues blend throughout the obverse and around the reverse border, leaving the interiors brilliant on the reverse of this Superb Gem. A full strike and nearly pristine surfaces are additional attributes. The 1881-S (12.7 million coins) is ideal for type purposes. Housed in a former generation holder. One coin has been graded higher at NGC (1/17)

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2549, PCGS# 7130

1881-S Dollar, Brightly Frosted MS68

- 5216 1881-S MS68 NGC. There is almost no better issue to represent the Morgan dollar type in high grades than the 1881-S (12.7 million coins struck). Full strike detail and exceptionally clean surfaces are the norm rather than the exception, and this piece is clearly outstanding in terms of its preservation and appeal. An arc of rose-violet color at the lower-right obverse border complements this brightly frosted Superb Gem. A single coin is graded higher at NGC (1/18). NGC ID# 2549, PCGS# 7130
- 5217 1881-S MS66 Deep Mirror Prooflike ANACS. VAM-3. Autumn-brown and forest-green toning graces the margins of this lustrous and sharply struck silver dollar. Close to pristine aside from minor contact near the arrowheads. A magnificent Morgan type coin. Housed in a small-sized holder. NGC ID# 2549, PCGS# 97131

1882-CC Dollar, Brilliant MS67 Prohibitively Rare Any Finer

5218 1882-CC MS67 NGC. Collectors continue to benefit from the widespread release of 605,029 1882-CC dollars during the GSA sales of the 1970s. While the issue is plentiful through MS66, its availability drops significantly at this level. NGC has yet to examine a finer example, and there is only one MS68 coin graded higher at PCGS (1/18). Brilliant with a small spot under the eye and a tick on the upper cheek. There are practically no other flaws. NGC ID# 254S, PCGS# 7134

1882-CC Morgan Dollar, MS67 Registry-Grade Example

- 5219 1882-CC MS67 PCGs. The 1882-CC Morgan dollar was a well-produced issue and more than half the reported mintage of 1.1 million pieces was held in government storage until the GSA sales of the 1970s, making the issue easily available in most grades today. The 1882-CC is definitely scarce in MS67 condition, however, and finer coins are virtually unobtainable. This sharply detailed Superb Gem is impeccably preserved, with vibrant mint luster and extraordinary eye appeal. Population: 88 in 67 (3 in 67+), 1 finer (1/18). NGC ID# 254S, PCGS# 7134
- 5220 1882-CC MS65 Deep Mirror Prooflike PCGS. The fields of this Gem Carson City Morgan are deeply mirrored, and the frosty design elements show only minor strike softness at the centers. The obverse has attractive orange-gold, lavender, and sea-green toning, while the reverse is brilliant. Only a few light abrasions are seen. NGC ID# 254B, PCGS# 97135
- 5221 1882-CC MS65+ Deep Mirror Prooflike PCGS. This piece is sharp and brilliant, showing appreciable cameo contrast on both sides and yet featuring a vibrant cartwheel effect. A few light, scattered marks on the obverse deny a full Premium Gem designation from PCGS. Higher-grade Deep Mirror Prooflike examples of the 1882-CC dollar are scarce. NGC ID# 254B, PCGS# 97135
- 5222 1882-O MS65 PCGS. The 1882-O is available through MS65 but becomes genuinely scarce one point finer, where many collectors will find it to be out of reach. This Gem displays satiny luster and champagne-tinted surfaces. Gold and blue border toning decorate the peripheries. As usual for New Orleans issues of this period, slight strike weakness is seen on the eagle's breast and the hair above Liberty's ear.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254C, PCGS# 7136

1882-O Silver Dollar, MS66 Toned Reverse

5223 1882-O MS66 PCGS. Although the 1882-O is a plentiful date in the Morgan dollar series, it is conditionally elusive, with more than 1,000 PCGS certified as MS65, and less than 100 in MS66 and higher grades. This piece has a satiny silver obverse that exhibits fully brilliant luster. The reverse has rich olive and blue toning with a sliver of gold. Population: 72 in 66 (4 in 66+), 6 finer (1/18). NGC ID# 254C, PCGS# 7136

- 5224 1882-O/S Strong, VAM-3, MS64 PCGS. CAC. A Top 100 Variety. VAM-3, VAM-4, and VAM-5 are the 1882-O/S varieties. VAM-5 shows only a partial middle curve of the undermintmark, while the other two varieties show more of the S. VAM-3 is scarcer than VAM-4. The present lustrous near-Gem has sea-green borders that frame apricot-gold fields and devices.

 Ex: Dallas ANA Signature (Heritage, 10/2012), lot 4782. NGC ID# 254D, PCGS# 133889 Base PCGS# 7138
- 5225 1882-S MS67+ PCGS. CAC. A beautiful, blazing Superb Gem that shows the radiant, frosty luster for which the 1882-S Morgan dollar is well-known. This high-end type coin is sharply struck and mostly untoned save for a hint of gold along the extreme outer right obverse rim. Liberty's cheek and the fields are virtually pristine. NGC ID# 254F, PCGS# 7140

1882-S Dollar, MS68 Unknown in Better Condition

5226 1882-S MS68 NGC. Marks are nearly indistinguishable on this impressive, untoned 1882-S dollar. The fields are pristine, and a single thin mark appears on Liberty's chin. The motifs are razorsharp, including the hair strands and the eagle's breast. This San Francisco issue is one of the few from this period that remains available through MS68 condition, although no finer coins are known (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254F, PCGS# 7140

1882-S Morgan Dollar, MS68 None Graded Higher

- 5227 1882-S MS68 NGC. It is believed that as many as 1 million 1882-S dollars survive in Uncirculated condition. The issue is readily available all the way through MS67. The population declines at this unsurpassed level, where the 1882-S becomes very scarce. The present Superb Gem offers clean, untoned surfaces with fully detailed motifs. None graded higher. NGC ID# 254F, PCGS# 7140
- 5228 1883 MS67 PCGS. A stunning Superb Gem representative of this popular Philadelphia issue, with sharply detailed design elements and impeccably preserved brilliant surfaces that radiate vibrant mint luster on both sides. PCGS has graded four numerically finer examples (12/17). NGC ID# 254G, PCGS# 7142
- 5229 1883 MS67 PCGS. A pristine cheek is one small part of the outstanding preservation on this Superb Gem 1883 Morgan dollar. Sharp central devices complement frosty, untoned mint luster, and the eye appeal is outstanding. PCGS has seen only four numerically finer submissions (1/18). NGC ID# 254G, PCGS# 7142

- 5230 1883 MS67 PCGS. The finest Prooflike coins at PCGS are Premium Gems. This MS67 non-Prooflike piece will appeal to Registry Set collectors, as only four finer coins are listed at that service (1/18). Other than a touch of softness on the hair above Liberty's ear, the coin coin is well-struck and displays frosty, untoned mint luster. Liberty's cheek is flawless aside from a tiny tick by the lips. NGC ID# 254G, PCGS# 7142
- 5231 1883 MS67 NGC. Liberty's cheek is essentially pristine, and the faint presence of a graze in the field near the chin is all that prevents a Plus designation. This 1883 Morgan dollar is well-struck and frosty, showing only a hint of toning around the outer periphery where there is a light golden glow.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254G, PCGS# 7142

- 5232 1883 MS67 ★ NGC. NGC has awarded the Star designation to only three 1883 Morgan dollars in MS67, and they list five MS68 coins finer (1/18). This piece is frosty, virtually perfect, and displays well-struck design elements. Luminous multicolor toning on the obverse leans toward the pastel range of intensity, while the reverse is brilliant. NGC ID# 254G, PCGS# 7142
- 5233 1883 MS66 Prooflike PCGS. Among the finest Prooflike pieces certified, this Premium Gem 1883 Morgan dollar displays brilliant surfaces and modest cameo contrast. The strike is sharp, and Liberty's cheek is free of almost all abrasions. Population: 12 in 66 (2 in 66+) Prooflike, 0 finer; 15 in 66 (2 in 66+) Deep Mirror Prooflike, 0 finer (1/18). NGC ID# 254G, PCGS# 7143

1883-CC Silver Dollar, MS67 Only Five Numerically Finer

5234 1883-CC MS67 PCGS. Although it is not identified as such, this Superb Gem is most likely from the GSA distribution that took place nearly five decades ago. This example has a bold strike with frosty and highly lustrous silver surfaces that show no toning on either side. PCGS has certified only five numerically finer examples (1/18). NGC ID# 254J, PCGS# 7144

1883-CC Silver Dollar, MS67 VAM-5A, Clashed Letter N

5235 1883-CC MS67 PCGS. VAM-5A. A fully struck and highly lustrous Carson City Superb Gem. Both sides are exceptionally free from contact. An interesting VAM variety with a "faint partial incuse of n of In from reverse next to Liberty head neck and faint partial incuse t of Trust from reverse showing in right hair vee of lower hair edge," per VAMworld.com. NGC ID# 254J, PCGS# 7144

1883-CC Morgan Dollar, MS67 VAM-5A, Clashed Letters

- 5236 1883-CC MS67 PCGS. VAM-5A. Dynamic luster, a crisp strike, and uncommonly clean surfaces proclaim the quality of this Carson City Superb Gem. Toning is confined to a few faint tan freckles above the N in ONE. Courtesy of the GSA hoard, the 1883-CC will never be rare, but only a small number of examples have attained numerically superior grades. NGC ID# 254J, PCGS# 7144
- 5237 1883-CC MS66 Deep Mirror Prooflike PCGS. VAM-5. Ex: Naples II. A Naples, Florida collector assembled two high-grade sets of Morgan dollars that were dispersed circa-2000. The Naples II pieces had prooflike surfaces. This well-struck and brilliant Carson City example has mirrored fields and minimal evidence of contact. From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254H, PCGS# 97145
- 5238 1883-O MS67 NGC. NGC has not certified any Prooflike or Deep Prooflike pieces in MS67, and non-Prooflike coins are scarce this fine. The present example displays radiant cartwheel luster with a hint of champagne tinting. The strike is remarkably sharp for the issue, and the surfaces are virtually perfect. Census: 43 in 67 (1 in 67+, 3 in 67 ★), 0 finer (1/18).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254], PCGS# 7146

5239 1883-S MS62 NGC. The 1883-S is a famous semikey in Uncirculated condition, although it is not quite as scarce as the 1884-S in that condition, even though the two are often considered a pair. This is a pleasing lower-end Mint State example with well-struck design elements and satiny cartwheel luster. Scattered abrasions and a hint of light golden toning cover each side. NGC ID# 254K, PCGS# 7148

1883-S Dollar, Lightly Toned MS64

- 5240 1883-S MS64 NGC. Examples of the 1883-S Morgan dollar can be found through MS64, but finer representatives of this semikey are exceedingly rare in Gem condition and are out of reach for most collectors at that level. Glints of golden-russet and violet patina around the borders attest to the originality of this well-detailed near-Gem. Frosty with minimal field marks for the grade. From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254K, PCGS# 7148
- 5241 1884 Doubled Ear, VAM-5, MS65 PCGS. A Hot 50 Variety. Liberty's ear is die doubled on this variety, and a loupe reveals repunching on the 18 in the date. This Gem VAM-5 Morgan dollar displays well-struck devices and frosty, untoned luster. A few faint grazes on Liberty's cheek prevent a finer grade but are not detracting. NGC ID# 254L, PCGS# 133992 Base PCGS# 7150

5242 1884-CC MS66+ PCGS. CAC. VAM-4B. A beautiful highgrade Carson City type coin. A trace of gold toning precludes full brilliance. Booming luster, a good strike, and unabraded fields ensure lofty eye appeal. The late die state of the "Spiked Date" and "Pinned Wing Gouge" VAM, identified by a die break on the upper left serif of the E in AMERICA. NGC ID# 8BBF, PCGS# 7152

1884-CC Dollar, MS67 VAM-4A, 'Pinned Wing Gouge'

5243 1884-CC MS67 PCGS. VAM-4A. An outstanding Carson City type coin. Brilliant and thoroughly lustrous with a complete strike and exemplary preservation. Although collectible in the present grade, the 1884-CC is a rare and costly acquisition any finer. VAM-4A is the "Pinned Wing Gouge" variety, named after a mint-made die line through the joint of the right (facing) wing. NGC ID# 8BBF, PCGS# 7152

1884-CC Morgan Dollar, MS67 Perennial Carson City Favorite

- 5244 1884-CC MS67 PCGS. From a mintage of 1.1 million pieces, the 1884-CC Morgan dollar is a perennial favorite with collectors ever since the GSA sales of the 1970s. The 1884-CC was well-represented in those offerings, and new collectors responded with enthusiasm when the hoard of high grade specimens was released from government holdings. The issue is readily available in most Uncirculated grades, but it does become scarce in MS67 condition. This sharply detailed Superb Gem exhibits impeccably preserved brilliant surfaces, with vibrant mint luster throughout. PCGS has graded three numerically finer examples (1/18). NGC ID# 8BBF, PCGS# 7152
- 5245 1884-CC MS65 Deep Mirror Prooflike PCGS. CAC. VAM-3. A flashy and virtually brilliant Carson City Gem. The strike is good, the cheek is smooth, and the obverse field is uncommonly clean. The reverse displays minor contact near WE and the arrowheads. NGC ID# 254M, PCGS# 97153
- 5246 1884-O MS67 NGC. Other than slight strike weakness on the hair above Liberty's ear and the eagle's breast, this Superb Gem 1884-O dollar is nearly flawless, showing unabraded, frosty surfaces and rich luster. Hints of delicate champagne toning grace each side, most readily seen at the outer peripheries.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254N, PCGS# 7154

5247 1884-O MS67 PCGS. Luminous, softly frosted luster shows essentially no abrasions as it cartwheels around the champagnetinted surfaces of this high-end 1884-O Morgan dollar. Deeper golden toning is seen around the peripheries. Although not rare in MS67, the 1884-O is prohibitively rare finer than this, with only one MS68 non-Prooflike and one MS68 Deep Mirror Prooflike certified numerically finer at PCGS (1/18). NGC ID# 254N, PCGS# 7154

- 5248 1884-S AU58 NGC. Only the faintest trace of high-point friction is discernible on this original, champagne-tinted 1884-S Morgan dollar. Sharp design elements and lustrous fields add to the eye appeal. The 1884-S is a better date in Mint State and is heavily collected in the finest possible circulation condition as represented by the present coin. NGC ID# 254P, PCGS# 7156
- 5249 1884-S AU58 PCGS. This near-Mint 1884-S dollar displays a hint of champagne toning with satiny luster in the fields. A few light abrasions accompany slight high-point friction on the devices. The 1884-S is a better date in Uncirculated condition and is heavily collected at the more economical AU58 level. From JC's Dollars. NGC ID# 254P, PCGS# 7156
- 5250 1884-S AU58 PCGS. Light golden toning warms the lustrous fields of this near-Mint example, while a brush of friction across the high points of the devices is all that prevents a Mint State designation. No major abrasions are seen, although some slide marks are apparent on the cheek under a loupe. NGC ID# 254P, PCGS# 7156

1884-S Morgan Dollar, AU58+ On the Cusp of a Mint State Assessment

- 5251 1884-S AU58+ PCGS. On the cusp of a Mint State assessment, this AU58+ dollar presents a terrific opportunity considering the relative unavailability of the 1884-S in Uncirculated condition. Friction is practically unseen and abundant frosty mint luster remains. There are several reeding marks on the eagle's breast. Mostly silver surfaces display a hint of golden color. NGC ID# 254P, PCGS# 7156
- 5252 1884-S AU58 PCGS. CAC. The scarcity of the 1884-S in Mint State drives strong demand for high-end AU pieces, particularly those with ample luster and CAC-approval, as seen here. Bold design elements exhibit only a trace of high-point friction, and the fields are vibrantly lustrous. Light chatter on Liberty's cheek does not distract, and no toning is present. NGC ID# 254P, PCGS# 7156
- 5253 1885 MS67 NGC. A small mark near Liberty's mouth on the cheek is all that prevents consideration of a Plus designation for this piece, as the surfaces are otherwise almost flawless and yield vibrant cartwheel luster. This Superb Gem 1885 dollar is well-struck and free of mentionable toning.
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254R, PCGS# 7158
- 5254 1885 MS67 Prooflike NGC. Semiprooflike fields are a common sight on Superb Gem Morgan dollars, although on this piece they are fully prooflike and designated as such. The coin is brilliant and has modest cameo contrast. Sharp, frosty design elements and deeply reflective fields show only the most insignificant grazes. Prooflike 1885 Morgans are extremely rare this fine. Census: 6 in 67 (1 in 67 ★) Prooflike, 0 finer; 5 in 67 Deep Prooflike, 0 finer (12/17). NGC ID# BYWR, PCGS# 7159
- 5255 1885-CC MS65+ PCGS. CAC. A sharp, frosty Gem with untoned surfaces and minimal abrasions. A hint of reflectivity is revealed in the fields when tilted beneath a light. The combination of a Plus designation and the CAC green label make this coin among the best pieces available in MS65. NGC ID# 254S, PCGS# 7160

- 5256 1885-CC MS66 PCGS. VAM-3. Arcs of golden-brown, firered, and apple-green adorn the upper-right of the obverse on this lustrous Carson City Premium Gem. The rest of the coin is brilliant, and shows the bold strike and paucity of contact associated with the MS66 level. NGC ID# 254S, PCGS# 7160
- 5257 1885-CC MS66 NGC. VAM-2A. Booming luster, a solid strike, and smooth, brilliant surfaces proclaim the quality of this low-mintage Carson City dollar. Scarcer than VAM-3, VAM-2A is noteworthy for a clashed N from IN in front of Liberty's neck. NGC ID# 254S, PCGS# 7160
- 5258 1885-CC MS66 PCGS. VAM-3. The Carson City Mint closed soon after Grover Cleveland was inaugurated as president. Cleveland's action was responsible for the low mintage of the 1885-CC, but thanks to the GSA holdings, high-grade examples are collectible today. The present lustrous and lightly toned example has a smooth reverse and minor obverse grazes. NGC ID# 254S, PCGS# 7160
- 5259 1885-CC MS64 Deep Mirror Prooflike PCGS. VAM-2. Dazzling field reflectivity ensures the eye appeal of this nicely struck and carefully preserved Carson City dollar. Light golden-brown toning visits the margins, but the majority of the coin is brilliant. NGC ID# 254S, PCGS# 97161
- 5260 1885-CC MS65 Deep Mirror Prooflike PCGS. VAM-3. Impressive field reflectivity and ice-white devices ensure exceptional eye appeal. The strike is sharp, and the surfaces are uncommonly free from abrasions. The lowest mintage Carson City Morgan issue. NGC ID# 254S, PCGS# 97161
- 5261 1885-CC Doubled Dash, VAM-4, MS66+ PCGS. CAC. A Hot 50 Variety. Although undesignated as such on the holder, this is the popular and scarce variety with a large dash below the second 8 in the date. A brilliant, crisply struck, and thoroughly lustrous highgrade example of the low mintage Carson City issue. NGC ID# 254S, PCGS# 133999 Base PCGS# 7160
- 5262 1885-O MS67 PCGS. CAC. VAM-2. The top of the 5 is repunched. A brilliant Superb Gem with bright mint luster and a sharp strike. Nearly pristine aside from a tick on the reverse rim at 5 o'clock. Practically unobtainable any finer.

 Ex: Orlando Signature (Heritage, 7/2013), lot 4263, which realized \$1,997.50. NGC ID# 254T, PCGS# 7162
- 5263 1885-O MS65 Deep Mirror Prooflike PCGS. CAC. Both sides of this Gem Deep Mirror Prooflike Morgan dollar exhibit excellent field-to-device contrast between the mirrored fields and satiny devices. The surfaces are brilliant and untoned with a fresh appearance. PCGS has only certified 55 finer Deep Mirror Prooflike examples (1/18). NGC ID# 254T, PCGS# 97163

1885-O Dollar, MS66 Deep Mirror Prooflike Thickly Frosted Motifs, Glassy Fields

5264 1885-O MS66 Deep Mirror Prooflike PCGS. Liberty's portrait is entirely blanketed in a thick layer of white mint frost, standing out boldly against the surrounding mirrors. A similar effect characterizes the reverse. Not only is the eye appeal outstanding, but so too is surface preservation. Marks are entirely minor in nature. A captivating Premium Gem from the New Orleans Mint. Population: 54 in 66 (2 in 66+) Deep Mirror Prooflike, 1 finer (1/18). NGC ID# 254T, PCGS# 97163

- 5265 1885-S MS65 PCGS. The 1885-S Morgan dollar is a better date in high grade. This Gem is frosty and brilliant, showing a vibrant cartwheel effect and sharp central devices. A few light field grazes prevent an even finer grade but are not bothersome. NGC ID# 254U, PCGS# 7164
- 5266 1885-S MS65 PCGS. From a mintage of 1.4 million pieces, the 1885-S Morgan dollar is a very scarce issue in grades above the MS65 level. This impressive Gem exhibits well-detailed design elements and well-preserved surfaces with vibrant mint luster on both sides. PCGS has graded 51 numerically finer examples (1/18). NGC ID# 254U, PCGS# 7164

1885-S Morgan Dollar, MS66 Among the Finest Collectible Examples

- 5267 1885-S MS66 PCGS. Ex: M.J.O. Only 1.4 million Morgan dollars were struck at the San Francisco Mint in 1885. Uncirculated examples are plentiful through MS64, with the population declining markedly in MS65. The issue is rare in this grade. Each side is almost entirely brilliant. A few accents of golden color appear on the reverse. This well-struck Premium Gem displays thick mint frost and a couple of trivial grazes but nothing more. Population: 49 in 66 (2 in 66+), 2 finer (12/17).
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254U, PCGS# 7164
- 5268 1886 MS67+ PCGS. CAC. This brilliant Mint State Morgan dollar has mostly untoned silver surfaces and excellent design sharpness. Small tinges of orange-gold toning appear at the outer peripheries on each side. PCGS has graded only nine finer non-Prooflike coins, plus three Prooflike MS67s (1/18).

 Ex: Summer FUN Signature (Heritage, 7/2014), lot 4199. NGC ID# 254V, PCGS# 7166
- 5269 1886-O MS62 PCGS. Despite the large mintage of more than 10 million pieces, the 1886-O Morgan dollar is a challenging branch mint issue in high grade. This attractive MS62 specimen exhibits well-detailed design elements and vibrant mint luster throughout. The brilliant surfaces are lightly marked, outside of a few ticks on Liberty's cheek and jaw. NGC ID# 254W, PCGS# 7168
- 5270 1886-O MS62 PCGS. This may be one of the most appealing 1886-O Morgans that we have seen in this grade, showing satin luster and remarkably few prominent abrasions. Other than a small tick mark below Liberty's eye, there are only a few light luster grazes on each side.
 - From JC's Dollars. NGC ID# 254W, PCGS# 7168
- 5271 1886-O MS62 PCGS. CAC. The 1886-O is a slightly better date in high grade, and CAC-approved Mint State coins are relatively scarce. This piece is frosty and lustrous, showing only slight champagne-tinting. Light surface grazes on the obverse limit the grade, but none are significantly distracting. NGC ID# 254W, PCGS# 7168
- 5272 1886-O MS63 PCGS. A well-struck, lustrous example of this popular date, from a mintage of more than 10.7 million pieces. Even though produced in staggering numbers, the 1886-O Morgan is difficult to locate and quite expensive in high grades. An attractive MS63 example makes a good balance of quality and value. On this piece, a scattering of minor abrasions on the obverse explains the grade. The coin is otherwise brilliant and satiny with a decent strike.
 - Ex: Houston Signature (Heritage, 12/2010), lot 3927; Central States Signature (Heritage, 4/2011), lot 5721. NGC ID# 254W, PCGS# 7168

- 5273 1886-O MS63 PCGS. A satiny Select Mint State example of this better New Orleans issue, showing grade-appropriate abrasions and slight central strike weakness. The interiors are essentially brilliant, but the borders show gold, blue, and violet toning. The 1886-O is much scarcer in high grade than its mintage of more than 10.7 million coins would suggest. NGC ID# 254W, PCGS# 7168
- 5274 1886-S MS65 PCGS. VAM-1A. The "Lines in 6" VAM. The 1886-S is a low mintage issue and becomes costly as a Gem. The present brilliant and lustrous piece offers virtually pristine fields and shows only wispy marks on the portrait. NGC ID# 254X, PCGS# 7170
- 5275 1886-S/S VAM-2 MS64 PCGS. A Top 100 Variety. The repunched mintmark feature is undesignated on the PCGS insert, but readily evident once examined with a loupe. This brilliant and lustrous near-Gem is minimally marked for the designated grade. NGC ID# 254X, PCGS# 133906 Base PCGS# 7170
- 5276 1887/6 VAM-2 MS65 PCGS. CAC. A Top 100 Variety. The curve of the base of a 6 bookends the bottom of the 7 in the date. Brilliant save for a narrow band of sea-green and russet-brown above the portrait. A lustrous and smooth Gem. Certified in a green label holder.
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2552, PCGS# 133908 Base PCGS# 7174
- 5277 1887 MS67 PCGS. Frosty and untoned with swirling cartwheel luster, this piece approaches perfection save for a few of the most minute luster grazes. The only singular imperfection is a bit of central strike softness, as often seen on this issue. PCGS and NGC combined list only four non-Prooflike coins finer; PCGS has seen five Prooflike pieces in MS67 (1/18).

 Ex: Denver Signature (Heritage, 8/2006), lot 2961. NGC ID# 27Y3, PCGS# 7172
- 5278 No Lot.
- 5279 1887/6-O VAM-3 MS63 PCGS. A Top 100 Variety. The luster on this untoned VAM-3 Morgan is incredibly frosty for a product of the New Orleans Mint, and eye appeal is excellent for the grade. A linear mark on Liberty's nose is the only singular abrasion. As usual, the central high points are slightly weak. VAM-3 is identified by the lower curve of a 6 branching off of the right base of the 7 in the date. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178
- 5280 1887/6-O VAM-3 MS63 PCGS. A Top 100 Variety. Softly frosted luster is untoned on this Select Mint State example, and abrasions are at a minimum. The central devices are weakly struck on the high points as usual. VAM-3 shows the lower loop of a 6 branching off of the base of the 7 in the date. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178
- 5281 1887-O MS65 PCGS. Officials at the Louisiana branch mint accomplished a production of 11.5 million Morgan dollars in 1887, exceeding all previous totals. Today, the 1887-O is elusive in Gem condition. As usual, the centers of this piece are incompletely brought-up. Mint luster is satiny over bright, minimally marked surfaces with golden peripheral accents. Only 14 finer submissions at PCGS (1/18). NGC ID# 2547, PCGS# 7176
- 5282 1887-O MS64 Deep Mirror Prooflike PCGS. True to expectations for a Deep Mirror Prooflike Morgan, this near-Gem 1887-O displays appreciable cameo contrast on each side. The surfaces are entirely brilliant save for hints of light golden toning at the extreme outer peripheries. There is a single, shallow graze on the center of Liberty's cheek but not other imperfections that would prevent a Gem designation. NGC ID# 2552, PCGS# 97177
- 5283 1887-S MS65 PCGS. The 1887-S is available in this grade, but PCGS has certified only 34 finer non-Prooflike coins and two Deep Mirror Prooflike pieces in MS65 (1/18). This frosty Gem is brilliant aside from modest lavender toning at the borders. The reverse is pristine, and only a few faint grazes on Liberty's cheek prevent an MS66 designation. NGC ID# 2554, PCGS# 7180

- 5284 1887-S MS65 PCGS. Although the 1887-S Morgan is plentiful in MS65, finer coins are rare. PCGS lists 34 finer non-Prooflike pieces and two Gem Deep Mirror Prooflike coins (1/18). This champagne-gray example is well-struck and frosty with only a few light abrasions visible under a loupe, none out of line for the grade. NGC ID# 2554, PCGS# 7180
- 5285 1888 MS66+ PCGS. CAC. This high-end Premium Gem is vibrantly lustrous and brilliant, showing a bold strike and remarkably clean surfaces. Some faint chatter on Liberty's jaw appears to have been in the planchet pre-strike and was not fully effaced by the dies a common occurrence on Morgan dollars. The 1888 is available in Premium Gem condition but elusive any finer. NGC ID# 26KF, PCGS# 7182
- 5286 1888 MS66+ PCGS. CAC. Concentric bands of powder-blue, ruby-red, jade-green, and sun-gold endow the lower left reverse. The remainder of this Morgan silver dollar is brilliant. Lustrous and well preserved. Slight strike weakness is seen on the central devices. NGC ID# 26KF, PCGS# 7182

1888 Dollar, Untoned MS67 Only One Coin Graded Higher

5287 1888 MS67 NGC. This Philadelphia issue is available by the tens of thousands though MS66 condition, in part a reflection of its enormous mintage of 19.1 million coins. Superb Gems are very scarce, however, and only a single coin is graded finer. The clean surfaces are devoid of color, and each side is softly frosted and well-struck. Census: 92 in 67 (2 in 67+, 3 in 67 ★), 1 finer (12/17). From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 26KF, PCGS# 7182

1888 Dollar, Clean MS67 Even Finer Than the Grade Suggests

5288 MS67 NGC. The smooth, extraordinarily preserved surfaces of this Superb Gem dollar appear even finer than the MS67 grade requires. If not for the faintest hint of softness, an higher grade might be in order. Mint luster is thick and frosty, cartwheeling over each untoned side. Void of singular flaws. Census: 92 in 67 (2 in 67+, 3 in 67★), 1 finer (1/18). NGC ID# 26KF, PCGS# 7182

1888 Dollar, MS67 Unsurpassed at PCGS

- 5289 1888 MS67 PCGS. Ice-blue patina covers the upper obverse, while peach-gold and violet hues adorn much of the remaining surface area on that side. The reverse remains wholly untoned. Consistent from one side to the other is strong strike definition, uninhibited mint luster, and unsurpassed preservation. The 1888 is surprisingly rare in high grades considering its substantial production. Population: 48 in 67, 0 finer (1/18). NGC ID# 26KF, PCGS# 7182
- 5290 1888-O MS66 PCGS. This impressive Premium Gem exhibits well-detailed design elements and virtually pristine brilliant surfaces, with vibrant mint luster on both sides. No numerically finer coins have been certified at PCGS (12/17). NGC ID# 2556, PCGS# 7184
- 5291 1888-O MS66 NGC. A beautifully preserved, brilliant Premium Gem with vibrant frost-white luster. Sharp design elements add to the appeal. Although the 1888-O Morgan dollar is only moderately scarce in this grade, it is prohibitively rare any finer. Census: 46 in 66 (2 in 66+, 1 in 66 ★), 9 finer (including Prooflike and Deep Prooflike pieces in MS66) (1/18).
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2556, PCGS# 7184
- 5292 1888-O MS66 PCGS. Despite a mintage of more than 12 million pieces, the 1888-O Morgan dollar is only moderately available in MS66, and it is almost uncollectible finer. This piece is among the finest non-Prooflike coins at PCGS (1/18). The surfaces are softly frosted and brilliant. Slight strike weakness is seen on the central high points. NGC ID# 2556, PCGS# 7184
- 5293 1888-O MS66 PCGS. Splashes of sea-green, amber, and violet toning appear on the obverse, while the reverse shows more traditional champagne-tinted interiors with blue and gold border toning. Moderate strike weakness appears at the centers, as usual for New Orleans issues in this series. The 1888-O is plentiful in Premium Gem condition, but no finer non-Prooflike coins are reported at PCGS (1/18). NGC ID# 2556, PCGS# 7184
- 5294 1889-CC VF30 PCGS. This pewter-gray 1889-CC Morgan dollar displays even wear and uniform coloration. The surfaces are relatively smooth, and strong detail remains on the central devices. Plentiful in this grade and ideal for most date collecting purposes. NGC ID# 2559, PCGS# 7190
- 5295 1889-CC XF40 NGC. A pleasing, problem-free collector-grade example of this key Carson City issue, showing uniform pewter-gray patina and lightly worn, well-detailed design elements. The 1889-CC is the scarcest of the Carson City Morgans overall, and high-end circulated pieces are in constant demand. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, XF45 Stone-Gray With Hints of Luster

5296 1889-CC XF45 PCGS Secure. The 1889-CC Morgan dollar is usually found in circulated condition because coins from this issue met one of two fates: Either they were released into the channel of commerce at or near the time of striking, or they were melted. This piece circulated briefly but has been well-cared for. Each side is stone-gray with good detail. Hints of luster and few blatant flaws further the appeal. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Choice XF Untoned Key, High Attrition Rate

5297 1889-CC XF45 PCGS Secure. Untoned silver-gray surfaces show light high-point friction but no major abrasions on this bright Choice XF Morgan dollar. This a nice collector-grade example of this famous Carson City key, far finer than most certified survivors, while avoiding the pricey Mint State grade levels.

Ex: Long Beach Signature (Heritage, 6/2015), lot 4896. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, XF45+ Excellent Detail for the Grade

5298 1889-CC XF45+ PCGS. The 1889-CC holds the distinction of being not only a key date in the Morgan dollar series, but of being one of the most well-known and sought-after issues in all of American numismatics. Both sides are light silver with merging over the highest points, namely the middle curls and breast feathers. Marks are thin and superficial. The only larger abrasion occurs below Liberty's eye. On the absolute edge of an AU assessment. NGC ID# 2559, PCGS# 7190

1889-S Dollar, MS66 Just One Finer Coin at NGC

5299 1889-S MS66 NGC. Rarely are 1889-S dollars found in such superior condition, though large numbers of lower-quality pieces are available from the Redfield Hoard. This coin has bright, frosted mint luster and is fully struck throughout. The brilliant centers are surrounded by a rim of warm blue and violet toning. A Premium Gem example and very scarce as such. Census: 31 in 66 (1 in 66★), 0 finer (12/17).

Ex: New York Signature (Heritage, 7/2002), lot 6955; Long Beach Signature (Heritage, 2/2003), lot 7469.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255B, PCGS# 7194

- 5300 1890-CC MS64 NGC. A satiny, mostly brilliant near-Gem with hints of golden border toning that add warmth to each side. The strike is surprisingly sharp for the issue, and only a few light cheek grazes are discernible. Higher-grade representatives will be elusive and costly. NGC ID# 255D, PCGS# 7198
- 5301 1890-CC MS64 NGC. VAM-5. A brilliant and lustrous Choice Carson City dollar. The fields are smooth, and the portrait displays wispy grazes. The mintmark is nicely repunched. An intermediate die state with many delicate cracks, but they are less advanced than on VAM-5A. NGC ID# 255D, PCGS# 7198
- 5302 1890-CC MS65 PCGs. This Gem Carson City Morgan dollar is 10 grade points higher than the average example and enjoys crisp strike characteristics throughout. Both sides exhibit splashes of ice-blue, peach-gold, and crimson patina intermixed with areas of cream-gray that are more prevalent on the reverse. NGC ID# 255D, PCGS# 7198
- 5303 1890-CC MS65 NGC. The interiors are brilliant, surrounded by golden peripheral toning that quickly dissipates. A hint of reflectivity characterizes the fields. Although the hair above Liberty's ear is not fully defined, the strike on this coin is above-average for the issue. Finer examples are seldom offered. From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255D, PCGS# 7198
- 5304 1890-CC MS63 Deep Mirror Prooflike PCGS. VAM-3. Icy motifs and impressive field reflectivity command considerable eye appeal. The strike is good, and the fields and devices display only minor imperfections relative to the conservatively assessed third-party grade. NGC ID# 45YV, PCGS# 97199
- 5305 1890-CC Tail Bar, VAM-4, MS62 NGC. A Top 100 Variety. A large vertical die gouge connects the fletchings to the wreath on the reverse. Softly lustrous golden-gray surfaces reveal a hint of incompleteness over the centers, but the impression is otherwise crisp. Each side is lightly marked. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

1890-CC Morgan Dollar, VAM-4, MS62 Deep Mirror Prooflike Example

- 5306 1890-CC Tailbar, VAM-4, MS62 Deep Mirror Prooflike PCGS. CAC. A Top 100 Variety. This remarkable MS62 specimen exhibits sharply detailed design elements and deeply reflective prooflike fields that show the expected number of minor contact marks for the grade. A massive die gouge extends from the eagle's tailfeathers on the left to the wreath below, identifying the popular VAM-4 Tail Bar variety. Population: 4 in 62 Deep Mirror Prooflike, 17 finer. CAC: 4 in 62, 13 finer (1/18). NGC ID# 255D, PCGS# 43339 Base PCGS# 987199
- 5307 1890-S MS66 PCGS. The 1890-S is moderately available in this grade, although PCGS lists only eight finer non-Prooflike coins and four Prooflike Premium Gems (1/18). This piece is frosty and brilliant, showing vibrant cartwheel luster and well-defined motifs. Eye appeal is pleasing.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255F, PCGS# 7202

- 5308 1890-S MS66 PCGS. This brilliant, radiantly lustrous Premium Gem showcases tremendous "pop," producing a quick cartwheel effect with the slightest rotation under a light. Almost no visible abrasions are present, and the centers show good definition. Finer coins at PCGS include eight non-Prooflike MS67s and three Prooflike MS66s (1/18). NGC ID# 255F, PCGS# 7202
- 5309 1891 MS65 NGC. A frosty, brilliant Gem with bold design elements and no distracting abrasions. The 1891 Morgan is usually available in this grade with some searching, but finer coins are extremely rare. NGC lists seven Premium Gems finer, including three non-Prooflike pieces, three Prooflike, and one Deep Prooflike (1/18). From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255G, PCGS# 7204
- 5310 1891 MS65 PCGS. PCGS lists only four coins arguably finer than the present Gem: two MS66, an MS67, and an MS65 Deep Mirror Prooflike (1/18). This frosty coin is brilliant and shows only a few light marks on Liberty's cheek. Slight strike weakness is visible on the eagle's breast and the hair above Liberty's ear. NGC ID# 255G, PCGS# 7204

1891-CC Morgan Dollar, MS65+ Challenging Issue in High Grade

5311 1891-CC MS65+ PCGS. The 1891-CC Morgan dollar claims a fairly generous mintage for a Carson City issue, at more than 1.6 million pieces. However, the issue was not well-represented in the GSA sales of the 1970s, making it a more challenging date than the larger than average production total would suggest. This Plusgraded Gem example is sharply detailed and well-preserved, with vibrant mint luster throughout. PCGS has graded 38 numerically finer examples (1/18). NGC ID# 255H, PCGS# 7206

1891-CC Dollar, MS65 Prooflike Strongly Detailed and Reflective

5312 1891-CC MS65 Prooflike NGC. A couple of hints of dusky, pale gold patina faintly accent overwhelmingly brilliant surfaces. Strongly detailed devices produce partial contrast against reflective, glassy fields. Preservation is excellent for this challenging Carson City representative. Among the finest at NGC. Census: 4 in 65 Prooflike, 0 finer (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255H, PCGS# 7207

- 5313 1891-CC Spitting Eagle, VAM-3, MS64 PCGS. CAC. A Top 100 Variety. The so-called "Spitting Eagle" variety, shows a small die lump in front of the eagle's beak. The first C in the mintmark is also repunched. This piece is frosty and untoned with minimal abrasions. Well-struck design elements complete the appeal. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206
- 5314 1891-CC Spitting Eagle, VAM-3, MS64+ PCGS. CAC. A Top 100 Variety. A die lump in the field near the eagle's beak gives the impression that the bird is "spitting." This Plus-graded, CAC-endorsed near-Gem displays frosty, brilliant luster and well-defined central devices. A few faint grazes in the left obverse field are all that prevent a full Gem grade. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

1891-O Dollar, MS65 Nearly Uncollectible Finer

5315 1891-O MS65 NGC. New Orleans Mint luster is typically satiny, but this attractive Gem is far more frosted. The interiors maintain their brilliance, while a ring of blue, violet, and crimson patina encircles the peripheries. Although strike detail is typically incomplete, the fields are beautifully preserved. Lovely eye appeal for this conditionally challenging issue. Census: 69 in 65 (2 in 65★), 2 finer (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255J, PCGS# 7208

1891-S Morgan Dollar, MS66 Very Rare Any Finer

- 5316 1891-S MS66 PCGS. From a mintage of nearly 5.3 million pieces, the 1891-S Morgan dollar can be located in grades up to the MS65 level with a little patience, but MS66 examples are very scarce. This attractive Premium Gem exhibits sharp definition on all design elements and the virtually pristine, lustrous surfaces radiate vibrant mint luster on both sides. PCGS has graded eight numerically finer examples (1/18). NGC ID# 255K, PCGS# 7210
- 5317 1892 MS65 NGC. The strike is a touch soft at the centers, although this piece is still every bit a Gem, showing smooth, frosty luster. A hint of champagne toning graces each side. In this grade, the 1892 Morgan is usually available with some searching, while finer pieces are rare. NGC lists one MS66 coin finer, plus eight Gem Prooflike pieces and one MS65 Deep Prooflike coin (1/18). From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255L, PCGS# 7212
- 5318 1892 MS65 PCGS. Blazing luster and untoned surfaces give this Gem 1892 Morgan superb eye appeal, complemented by semiprooflike fields and a mostly clean cheek. The centers show the usual strike softness. PCGS lists seven numerically finer non-Prooflike pieces, plus four Prooflike and six Deep Mirror Prooflike coins in this same grade (1/18). NGC ID# 255L, PCGS# 7212
- 5319 1892-CC MS61 PCGS. An attractive Mint State example of this better-date Carson City issue, with well-detailed design elements and creamy lustrous surfaces that show the minimum number of minor ticks and contact marks for the grade. NGC ID# 255M, PCGS# 7214
- 5320 1892-CC MS62 PCGS. The 1892-CC Morgan dollar is always popular with collectors because of its charismatic CC mintmark. This impressive MS62 specimen exhibits well-detailed design elements and lightly marked lustrous surfaces with a few subtle hints of golden-tan toning. NGC ID# 255M, PCGS# 7214
- 5321 1892-CC MS62 PCGS. VAM-4B. The mintmark is lightly repunched and the dies are multiply clashed. Most Carson City collectors will have greater interest in the blazing cartwheel luster and the nearly pristine fields. The centers are lightly brought up, and the portrait displays moderate grazes. NGC ID# 255M, PCGS# 7214
- 5322 1892-CC MS63 NGC. VAM-8. A glimpse of butter-gold toning denies full brilliance, but this lustrous and surprisingly unabraded better-date Carson City dollar exhibits exceptional eye appeal for its designated third-party grade.
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255M, PCGS# 7214
- 5323 1892-CC MS63 PCGS. A few scattered abrasions contribute to the grade, but this Select 1892-CC dollar remains visually pleasing, showing satin luster and brilliant surfaces. The central high points are sharper than usual for this issue. NGC ID# 255M, PCGS# 7214
- 5324 1892-CC MS63 ANACS. VAM-8A. Lustrous and nicely struck with peripheral autumn-brown and navy-blue toning. Designated as VAM-1 on the small-sized holder, but this is VAM-8A with a die break in the 2 in the date, and a double-clashed N from IN in front of Liberty's neck. VAMworld.com shows only single-clashed photos for the variety, and perhaps a VAM-8B will eventually exist to record the present later die state. NGC ID# 255M, PCGS# 7214

5325 1892-CC MS63+ PCGS. CAC. The 1892-CC is a slightly better date among Carson City Morgans in high grade. This Plusdesignated, CAC-approved Select example remains within reach of the average collector but is decidedly high-end for the grade. The coin is brilliant and frosty with a cartwheel effect. The usual strike weakness is seen on the hair above Liberty's ear. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS65 Bright and Frosty

- 5326 1892-CC MS65 PCGS. Strike detail is nearly complete on this Gem Carson City dollar, appearing as fresh and bright as the day it was struck. The only exception is a hint of softness on the eagle's talons. Both sides are untoned and thickly frosted with few marks. The cheek is especially clean. Housed in an old green label holder. PCGS reports 35 finer submissions (12/17).
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255M, PCGS# 7214
- 5327 1892-O MS64+ PCGS. CAC. This frosty, brilliant 1892-O dollar displays remarkably clean surfaces and might have received a full Gem grade were the centers better struck. The area of Liberty's ear and the eagle's breast and legs are weak, as is often seen on this New Orleans issue. The 1892-O is available in MS64 but somewhat elusive finer. NGC ID# 255N, PCGS# 7216

1892-O Dollar, MS65 Vibrant Satin Mint Luster

- 5328 1892-O MS65 NGC. The MS62 to MS64 range is typical for Uncirculated 1892-O dollars. Gems are much scarcer, and anything finer is extremely rare. This piece is well-struck for a New Orleans coin. Each side exhibits a vibrant satin sheen over brilliant surfaces with few distracting marks or grazes. NGC has seen merely six finer submissions (12/17).
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255N, PCGS# 7216

1892-O Dollar, Untoned Gem A Major Rarity in Better Condition

- 5329 1892-O MS65 PCGS. Unlike Morgan dollars struck at the West Coast branch mint in 1892, these New Orleans coins can be found and reasonably acquired in grades through MS65. Thereafter, the certified populations drop precipitously. The decline from MS65 to MS66 or better is nearly 98% at PCGS. There are only five Premium Gems finer than this at that service, plus a single top-graded MS67 representative (1/18). This Gem boast minimally marked, untoned surfaces with flaws limited to minuscule ticks. Definition is characteristically soft over the centermost areas. NGC ID# 255N, PCGS# 7216
- 5330 1892-S AU53 ANACS. A lightly circulated specimen of this popular Morgan dollar issue, with minimal abrasions for the grade. This well-detailed AU53 example retains traces of original mint luster, and pleasing high lights of lavender toning. NGC ID# 255P, PCGS# 7218
- 5331 1892-S AU53 NGC. From a smallish mintage of 1.2 million pieces, the 1892-S Morgan dollar is not too difficult to locate in circulated grades, but it is one of the most challenging issues of the series in Mint State. This AU53 example shows just a trace of wear on the well-detailed design elements and the lightly abraded surfaces are blanketed in pleasing shades of lavender toning. NGC ID# 255P, PCGS# 7218
- 5332 1892-S AU53 NGC. CAC. The 1892-S is among the rarest Morgan dollar issues in Mint State, and it is also highly challenging in AU. The pearl-gray and almond-gold surfaces lack distracting abrasions, and luster dominates the borders, plumage, and hair curls. Ex: Long Beach Signature (Heritage, 6/2010), lot 1152. NGC ID# 255P, PCGS# 7218

1892-S Morgan Dollar, AU55 Much Finer Than the Typical Example

5333 1892-S AU55 PCGS. Traces of original luster remain near the borders. The central areas display slightly incomplete definition and a hint of blending from minor circulation. Each side is muted silver-gray with fewer heavy abrasions than might be expected. The only singular mark on this conditionally rare San Francisco dollar appears on the neck truncation. NGC ID# 255P, PCGS# 7218

1892-S Dollar, Choice AU A Better Date in High Grade

- 5334 1892-S AU55 ANACS. Small daubs of russet toning appear around the borders on this Choice AU 1892-S Morgan dollar, with complementary hints of original luster. The eagle's breast and the hair above Liberty's ear absorb the brunt of the wear, which is trivial at the AU55 level. Scattered light contact marks accompany the grade. The 1892-S is a conditionally scarce date, rarely offered in Mint State and heavily collected in the upper AU levels. NGC ID# 255P, PCGS# 7218
- 5335 1893 MS63 PCGS. Only 389,000 business strike Morgan dollars were struck at the Philadelphia Mint in 1893, making the issue a semikey date in the series. This well-detailed Select specimen exhibits lightly marked, lustrous surfaces, with highlights of seagreen toning at the rims. NGC ID# 255R, PCGS# 7220
- 5336 1893 MS63 PCGS. The 1893 Morgan dollar claims a low mintage of 389,000 pieces. This attractive Select example displays well-detailed design elements and lightly marked surfaces with vibrant mint luster on both sides. Overall eye appeal is outstanding. NGC ID# 255R, PCGS# 7220
- 5337 1893 MS63+ PCGS. Scattered light contact marks account for the grade on this 1893 Morgan dollar, although the frosty luster is original, and as a result the eye appeal is superior to that of most Select examples of this date that we have seen. The hair above Liberty's ear is only slightly weak. NGC ID# 255R, PCGS# 7220
- 5338 1893 MS63+ NGC. The Plus designation sets this piece apart from most of its peers. The surfaces are frosty and mostly brilliant save for a blush of rose-gold at the upper-right and lower-left borders. Grade-limiting abrasions are in the form of scattered, shallow grazes that do not detract. NGC ID# 255R, PCGS# 7220

1893 Dollar, MS61 Prooflike Extremely Rare With Contrast

- 5339 1893 MS61 Prooflike PCGS. The 1893 is a challenging issue in any state, but it is extremely rare in mint condition with recognized Prooflike surfaces. Mostly untoned interiors accent the contrast between the reflective fields and sharp, lightly frosted motifs. Splashes of golden color appear peripherally. Both sides are moderately abraded. Population: 1 in 61 Prooflike, 3 finer (1/18). NGC ID# 255R, PCGS# 7221
- 5340 1893-CC XF40 PCGS. The protected regions of the reverse fields show semiprooflike mirroring on this XF 1893-CC Morgan dollar. The coin is bright and untoned with moderate surface chatter. The final-year Carson City dollar is elusive in the upper circulated grades. NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, VAM-2 Uncirculated Details

5341 1893-CC — Altered Surfaces — PCGS Genuine. Unc. Details. VAM-2. Lustrous and brilliant with an above-average strike for the issue. Faintly hairlined, but nonetheless pleasing. A very late die state, lapped to remove many of the clash marks evident on VAM-2A. This die marriage struck the '93-CC proofs and is thus likely the final production of Carson City dollars.

From The XSurgeon Set of Morgans NGC Registry #1.

- 5342 1893-O AU58 NGC. Just a trace of wear is evident on the high points of the well-detailed design elements and this attractive near-Mint specimen displays lightly abraded surfaces with highlights of sea-green and lavender toning. Much original mint luster remains intact. From a low mintage of 300,000 pieces. NGC ID# 255T, PCGS# 7224
- 5343 1893-O AU58 PCGS. This challenging New Orleans issue comes from a mintage of only 300,000 coins. The piece offered here displays brilliant satin luster and only a faint trace of high-point friction on the eagle's breast and the hair above Liberty's ear. A few small marks are seen on each side. NGC ID# 255T, PCGS# 7224

1893-O Morgan Dollar, MS61 Low-Mintage Issue

5344 1893-O MS61 NGC. The years 1893 and 1895 share a characteristic of Morgan dollar production that did not occur at any other time. Production at the four mints operating in 1893, and at the three mints operating in 1895, was less than 1 million coins each. New Orleans coins just 300,000 silver dollars in 1893. This Mint State survivor has frosty silver luster with a trace of amber toning. The strike is average while the eye appeal is above average. NGC ID# 255T, PCGS# 7224

1893-O Dollar, Untoned MS61 Challenging in Mint Condition

5345 1893-O MS61 NGC. An average certified assessment barely higher than XF40 means this Uncirculated 1893-O dollar is 20 points finer than the typical example. Untoned, satiny surfaces display minor grazes and light field chatter. The highest points of the design lack complete definition. A couple of dark specks and clash marks occur on each side. This is a challenging issue to locate in mint condition. NGC ID# 255T. PCGS# 7224

1893-O Morgan Dollar, Satiny MS62 Better New Orleans Issue

- 5346 1893-O MS62 PCGS. A brilliant New Orleans dollar from the year of the famous Panic. All 1893 issues saw depressed mintages as a result. Specifically, 300,000 1893-O dollars were struck and they are exceedingly scarce in higher grades. The only spot of color is a darker speck within the top curls. Satin mint luster washes over this elusive Mint State representative. NGC ID# 255T, PCGS#
- 5347 1893-S AG3 PCGS. For the collector assembling a circulated set of Morgan dollars, this About Good 1893-S is an outstanding example of the key San Francisco issue. Both sides show the rims blending into the border legends, but the central devices are fully outlined, and the date and mintmark are clear. The hallmark, however, is the blatantly original two-toned gray surfaces that produce a circulation cameo effect. Incredibly appealing and problem-free for the AG grade level. NGC ID# 255U, PCGS# 7226
- 5348 1893-S Good 4 PCGS. VAM-1. The date is bold and the mintmark is unmistakable on this collectible key-date Morgan dollar. The cream-white and charcoal-gray surfaces are well-worn, but LIBERTY is sharp and there are no distractions. NGC ID# 255U, PCGS# 7226
- 5349 1893-S Good 4 PCGS Secure. VAM-1. A cream-gray representative of the lowest mintage regular issue. Surprisingly free from marks, all legends are bold, including the date and mintmark. Dentilation is apparent except between 9 o'clock and 10:30 on the obverse. NGC ID# 255U, PCGS# 7226
- 5350 1893-S Improperly Cleaned NGC Details. VG. VAM-1. A stone-gray and tan-gold example of the famous Morgan dollar rarity. All legends are bold, and the eagle's wings display partial plumage detail. No marks are of singular notice. Somewhat cloudy from a mild cleaning, but nonetheless collectible.

5351 1893-S — Rim Damage — PCGS Genuine. Fine Details. An old rim bump at 10 o'clock relative to the obverse occurred early in this coin's existence, as the dentils on both sides of the coin in this region show more advanced wear than the remainder of the borders. A short stretch of file marks is also visible at 8 o'clock on the obverse rim, only visible with a loupe. This evenly worn 1893-S dollar is otherwise pleasing and displays uniform tan-gray patina.

1893-S Dollar, Fine 12 Well-Circulated, Pleasing Patina

- 5352 1893-S Fine 12 PCGS. The raised motifs are battleship-gray, surrounded by deep shades of gunmetal-blue and olive patina. This important San Francisco dollar clearly saw extensive use in circulation before being set aside, its rarity eventually recognized by an astute collector. Today, specialists within this series and without can immediately identify the 1893-S as the lowest-mintage key date among Morgan dollars (100,000 pieces). NGC ID# 255U, PCGS# 7226
- 5353 1894 AU55 PCGS. CAC. A truly outstanding About Uncirculated example, this CAC-endorsed 1894 dollar displays sharp detail on the devices and original multicolor toning in the margins. The interiors are warm golden in color, and some prooflike reflectivity remains in the protected portions of the fields. A standout coin among AU-level pieces. NGC ID# 255V, PCGS# 7228
- 5354 1894 AU58 PCGS. Substantial field luster remains on this near-Mint 1894 Morgan dollar. The coin is brilliant and shows only slight high-point friction, with the minor weakness on the eagle's breast and the hair above Liberty's ear, due to strike rather than wear. The 1894 is a better date and is a key among Philadelphia issues. NGC ID# 255V, PCGS# 7228

1894 Dollar, Bright MS62 Bold Impression, Second Lowest Mintage

5355 1894 MS62 ANACS. A faint ring of golden color encircles what are otherwise wholly untoned surfaces. Bright and lustrous, each side exhibits fewer marks than one would imagine for the grade. The only flaw is a grouping of ticks on Liberty's cheek. Definition is exceedingly strong with full detail on the hair strands above the ear, on the eagle's breast, and on the talons. Encapsulated in a small-sized holder. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS62 Lowest-Mintage Philadelphia Issue

5356 1894 MS62 NGC. Minimal field marks give this MS62 dollar the look of a higher-graded representative. Ticks on the cheek and breast, and a couple of relatively inconspicuous scrapes inside the right side of the wreath limit the assessment. Each side is brightly untoned with softly frosted mint luster. A mintage of 110,000 coins stands as the lowest among Philadelphia Morgan dollars. NGC ID# 255V, PCGS# 7228

1894 Morgan Dollar, MS62 Key Philadelphia Circulation Strike

- 5357 1894 MS62 PCGS. CAC. Although the 1895, a proof-only issue, is called the King of Morgan dollars, it is the 1894 that is important to a complete set of circulation strike dollars from the Philadelphia Mint. Although 110,000 examples were minted, and relatively few survive in Mint State grades. This lustrous example is brilliant with white-silver surfaces that exhibit a solitary splash of gold toning at the upper right obverse border. NGC ID# 255V, PCGS# 7228
- 5358 1894-O MS61 PCGS. Daubs of amber-gold toning appear around the margins of this Mint State 1894-O dollar. The devices are wellstruck and satiny, and the fields are deeply reflective and nearly worthy of a Prooflike designation. A few notable abrasions are seen, located on Liberty's cheek, the eagle's breast, and the field next to the eagle's right (facing) wing; none of these are out of line for the grade. NGC ID# 255W, PCGS# 7230
- 5359 1894-O MS62 PCGS. The 1894-O Morgan dollar was not a well-produced issue and high-quality examples are quite elusive. This attractive MS62 specimen shows a typical strike for the issue, with a touch of the usual softness on the hair above the ear. The lustrous surfaces are lightly marked and show a few traces of golden-tan toning. NGC ID# 255W, PCGS# 7230
- 5360 1894-S MS63 PCGS. Dazzling luster sweeps this lightly abraded better-date silver dollar. The centers exhibit moderate roller marks, as made. Hints of tan patina preclude full brilliance. Housed in a green label holder. NGC ID# 255X, PCGS# 7232
- 5361 1894-S MS64 PCGS. This is a well-struck example with vibrant, softly frosted mint luster. Dusky pink-champagne toning appears over each side, and only a few minor abrasions are seen under a loupe. The 1894-S is available in this grade but challenging to locate finer. NGC ID# 255X, PCGS# 7232
- 5362 1895-O AU55 NGC. An attractive Choice AU specimen of this low-mintage branch mint issue, with just a touch of wear on the well-detailed design elements and lightly abraded surfaces that retain considerable amounts of original mint luster. NGC ID# 255Y, PCGS# 7236

- 5363 1895-O AU55 NGC. Remnants of luster appear in the fields when this Choice AU 1895-O Morgan dollar is rotated beneath a light. Light champagne toning graces each side, and no distracting abrasions are seen. Only light high-point wear is apparent, as much of the weakness above Liberty's ear is due instead to strike. NGC ID# 255Y, PCGS# 7236
- 5364 1895-O AU55 NGC. Luster remains in the protected regions of the fields despite light high-point friction on the devices. This Choice AU 1895-O Morgan dollar is untoned and shows only light surface chatter. The 1895-O is a semikey in all grades, coming from a mintage of only 450,000 coins. NGC ID# 255Y, PCGS# 7236

1895-O Dollar, Near-Mint Scarcest New Orleans Issue

5365 1895-O AU58 NGC. Though the mintage for the 1895-O is 50% higher than the 1893-O, the former is the New Orleans key to the Morgan series. This lustrous and nicely struck near-Mint example displays splashes of golden-brown and navy-blue toning. Certified in a former generation holder.

Ex: Santa Člara Bullet Sale (Heritage, 11/2001), lot 1365, which realized \$1,667.50. NGC ID# 255Y, PCGS# 7236

1895-O Silver Dollar, AU58

- 5366 1895-O AU58 PCGS. Brilliant surfaces retain almost full luster on this satiny near-Mint coin. There is slight strike weakness on the eagle's breast and the hair above Liberty's ear, and little actual wear is present. A few light abrasions on the cheek accompany the grade. The 1895-O is the key date of the New Orleans Morgan dollar series.
- 5367 1895-S Reverse Damage NGC Details. Unc. A thin horizontal mark near the I in UNITED corresponds to the NGC designation. The portrait displays unobtrusive contact on the tip of the nose and below the mouth. Nonetheless, this low-mintage and better-date silver dollar displays vibrant cartwheel luster, along with attractive peripheral rose-red and jade-green toning.
- 5368 1896 MS67 PCGS. This Superb Gem 1896 dollar would serve well as a type coin, showing virtually pristine surfaces and frosty, radiant luster. Most of each side is brilliant, save for a yellow-gold peripheral halo. The design elements are bold. PCGS lists only two finer non-Prooflike coins (1/18). NGC ID# 2562, PCGS# 7240
- 5369 1896 MS67 PCGS. This plentiful Philadelphia issue is rarely offered finer than MS67, with only two such non-Prooflike pieces listed at PCGS. That service also reports a single MS67 coin in the Prooflike category and another in the Deep Mirror Prooflike category, both with none finer (1/18). This Superb Gem is frosty and well-preserved, showing a bold strike. The obverse has seagreen and russet-gold toning, while the reverse is mostly brilliant with a multicolor crescent along the upper-right margin. NGC ID# 2562, PCGS# 7240

- 5370 1896 MS67 NGC. CAC. This radiant Superb Gem is among a minority of high-end 1896 dollars that have been awarded a CAC green label. Frosty, brilliant, and well-struck, the coin displays outstanding quality and eye appeal, even for the lofty MS67 grade. Finer examples of this largely plentiful issue are conditionally rare. Census: 75 in 67 (1 in 67+, 7 in 67 ★, 1 in 67+★), 6 finer. CAC: 71 in 67, 2 finer (1/18).

 From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2562, PCGS# 7240
- 5371 1896-O MS61 PCGS. This satiny Mint State example of a better New Orleans issue is brilliant, showing grade-appropriate abrasions but no major distractions. As usual for O-mint Morgans of the 1890s, this piece is weakly struck on the eagle's breast and the hair above Liberty's ear. NGC ID# 27ZU, PCGS# 7242
- 5372 1896-O MS61 NGC. Despite an adequate mintage of 4.9 million pieces, the 1896-O Morgan dollar is a challenging issue in high grade. This well-detailed Mint State example displays lustrous, creamy surfaces that show the minimum number of minor contact marks for the grade. NGC ID# 27ZU, PCGS# 7242
- 5373 1896-S MS62 NGC. Booming luster and light butter-gold toning attest to the originality of this pleasing better-date dollar. The centers show minor incompleteness. The reverse is well preserved, and the obverse displays only moderate marks. Certified in a circa-2000 holder. NGC ID# 2564, PCGS# 7244
- 5374 1897-O MS61 NGC. A tinge of rose-gold toning appears on both sides of this Mint State 1897-O Morgan dollar. The centers are remarkably sharp for a New Orleans issue of this period, and abrasions are unobtrusive for the grade. The 1897-O is regarded as a better date in Uncirculated condition, despite a mintage in excess of 4 million coins. NGC ID# 2565, PCGS# 7248
- 5375 1897-O MS61 PCGS. An impressive Mint State representative of this underrated issue, with well-detailed design elements that show just a touch of the usual softness on the hair above the ear and lustrous surfaces that show the minimum number of minor contact marks for the grade. NGC ID# 2565, PCGS# 7248
- 5376 1897-O MS61 PCGS. CAC. CAC-approved examples of this slightly better New Orleans issue are genuinely scarce in Mint State, making the current coin a notable example of the issue despite a numeric grade of only MS61. Light abrasions are mostly limited to Liberty's cheek, and dusky pearl-gray toning does a good job of masking them. Luster is original.

 From The Property of a Lady. NGC ID# 2565, PCGS# 7248
- 5377 1897-O MS62 PCGS. A blush of warm champagne toning appears on each side of this low-end Mint State piece, which shows scattered but light abrasions. The strike is above average, and eye appeal is thus pleasing for the grade. The 1897-O becomes increasingly difficult to acquire in finer grades. NGC ID# 2565, PCGS# 7248
- 5378 1897-S MS66 PCGS. CAC. This delightful Premium Gem exhibits razor-sharp definition on all design elements and the well-preserved surfaces radiate vibrant mint luster throughout. A few hints of sea-green and lavender toning add to the outstanding eye appeal. PCGS has graded 30 numerically finer examples (12/17). NGC ID# 2567, PCGS# 7250

1897-S Morgan Dollar, MS67 **Extremely Rare Any Finer**

- 5379 1897-S MS67 PCGS. The 1897-S Morgan Dollar claims a mintage of 5.8 million pieces, but the issue is rare at the MS67 grade level, and finer coins are virtually unobtainable. This delightful Superb Gem is sharply detailed in almost all areas, with just the slightest trace of blending on the hair strands above Liberty's ear. The lustrous, impeccably preserved surfaces show highlights of sea-green and violet toning. Population: 28 in 67, 2 finer (1/18). NGC ID# 2567, PCGS# 7250
- 5380 1897-S MS65 Deep Mirror Prooflike NGC. VAM-4. Prolific VAM discoverer Leonard Hinckley is credited with the February 1974 reporting of the present repunched date variety. The 1 is recut beneath the flag, and the 7 is punched north, which suggests the initial date placement slanted upward. A flashy Gem with a good strike and peripheral golden-brown and forest-green toning. NGC ID# 2567, PCGS# 97251
- 5381 1898-O MS67 Prooflike NGC. In lower Mint State grades, the 1898-O is among the more plentiful dates in the entire Morgan dollar series. The release of countless examples by the Treasury Department in the 1960s included numerous Prooflike coins. Unfortunately, most of these were abraded enough to grade no finer MS65. Today, the Prooflike 1898-O Morgan is rare as a Superb Gem. The pristine features on both sides of this coin include a silky-smooth cheek on Liberty's portrait. The strike is razor-sharp throughout, and the otherwise untoned surfaces reveal whispers of faint golden color at the borders. The essence of condition rarity in a Morgan dollar. Census: 5 in 67 Prooflike, 0 finer (1/18). Ex: FUN Signature (Heritage, 1/2003), lot 8188. From The XSurgeon Set of Morgans NGC Registry #1. NGC

ID# 2569, PCGS# 7255

- 5382 1898-S MS65 PCGS. This brilliant Gem displays semiprooflike fields and well-struck devices. At certain angles, the preservation looks too good for the MS65 level, although close study under a loupe reveals a few luster grazes on the cheek that prevent an MS66 designation. The 1898-S is available in this grade but elusive finer. NGC ID# 256A, PCGS# 7256
- 5383 1899 MS66 PCGS. A delightful Premium Gem representative of this low-mintage issue, with sharply detailed design elements and vibrant mint luster throughout. Well-preserved, creamy surfaces add to the outstanding eye appeal. PCGS has graded 23 numerically finer examples (1/18). NGC ID# 256C, PCGS# 7258
- 5384 1899 MS66 PCGS. From a small mintage of 330,000 pieces, the 1899 Morgan dollar is seldom encountered in grades above MS66. This sharply detailed Premium Gem offers well-preserved, lustrous surfaces, with hints of violet and sea-green toning at the peripheries. PCGS has graded 23 numerically finer examples (1/18). NGC ID# 256C, PCGS# 7258
- 5385 1899 MS66 PCGS. A frosty, untoned Premium Gem with a vibrant cartwheel effect and a relatively clean cheek on Liberty. The centers are boldly struck. The 1899 Morgan dollar is a popular issue in all grades due to a small mintage 330,000 coins, although it is only truly rare at the Superb Gem level. This piece is high-end but readily collectible. NGC ID# 256C, PCGS# 7258

1899 Dollar, MS66 Prooflike Well-Struck and Reflective

- 5386 1899 MS66 Prooflike PCGS. Deeply reflective fields explain the Prooflike designation for this Premium Gem dollar from a small reported mintage of 330,000 coins. The accuracy of that production is doubtful, however. Each side is brilliant and well-struck with a slight cartwheel effect. We note a couple of marks on the cheek and chin. Population: 11 in 66 Prooflike, 0 finer (12/17). From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256B, PCGS# 7259
- 5387 1899-O MS67 NGC. Other than a pair of Deep Prooflike coins in the same grade, this Superb Gem 1899-O Morgan dollar is among the finest reported by NGC, and it is moderately elusive as such (1/18). A faint graze behind Liberty's eye is the only imperfection of note on the frosty, brilliant surfaces. Well-struck design elements add to the visual appeal.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256C, PCGS# 7260

5388 1899-S MS65+ PCGS. Wisps of champagne toning warm the frosty surfaces of this high-end Gem 1899-S Morgan dollar. MS65 coins are relatively plentiful, but this San Francisco issue is scarce any finer. This piece shows a well-preserved cheek and bold design elements. From JC's Dollars. NGC ID# 256D, PCGS# 7262

1899-S Dollar, VAM-7, MS66 Doubled Date, Top 100 Variety

5389 1899-S Doubled Date, VAM-7, MS66 NGC. A Top 100 Variety. The crossbar of the 1 is doubled, and shadows of underlying 9s appear beneath the primary digits. Examples of the 1899-S are moderately scarce in mint condition, though they are generally accessible for a price up to MS65. This grade level is where the date becomes truly difficult to locate. The surfaces of this brilliant, frosted Premium Gem display few serious marks, as expected. A hint of softness occurs over the date and extreme central devices. From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256D, PCGS# 133952 Base PCGS# 7262

1900 Morgan Dollar, MS67 Unseen Any Finer

5390 1900 MS67 NGC. The most frequently awarded grade for 1900 Morgan dollar is MS64, but even Gems and Premium Gems are readily accessible. The same cannot be said for comparable Superb Gem quality coins. This is a radiant, all-brilliant example with smooth, exquisitely preserved surfaces. Well-struck with softness at the lower obverse. The new C-4 hub always shows indistinctness on the breast feathers. Census: 48 in 67 (2 in 67+), 0 finer (12/17). From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256F, PCGS# 7264

1900-O Dollar, MS67 Among the Finest at Both Services

5391 1900-O MS67 NGC. Both sides of this impeccably preserved example are nearly fully struck and display a uniform, satiny vibrancy that carries over from fields to devices. The search for a finer 1900-O Morgan dollar will prove futile. Census: 77 in 67 (2 in 67+, 2 in 67★), 0 finer (12/17).

Ex: Long Beach Signature (Heritage, 9/2002), lot 7602; Long Beach

Signature (Heritage, 2/2003), for 7548.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256F, PCGS# 7266

- 5392 1900-O MS67 NGC. Ex: Lincoln Highway Hoard. The 1900-O is a scarce date in Superb Gem condition. NGC lists two Prooflike MS67s but no other coins finer than the present non-Prooflike Superb Gem (1/18). Each side showcases frosty, luminous luster with no toning and clean surfaces. There is a touch of strike softness on the hair above Liberty's ear, but the definition is generally sharp for the issue. Census: 78 in 67 (2 in 67+, 2 in 67 ★), 0 finer (1/18). NGC ID# 256F, PCGS# 7266
- 5393 1900-O/CC VAM-7 AU58 PCGS. A Top 100 Variety. VAMworld. com recognizes 11 varieties of 1900-O/CC dollars, five of which are die states of the primary six die pairs. The three rarest varieties are regarded as VAM-7, VAM-7A, and VAM-9, though perhaps not in that order. Die lines near the ribbon loops and the B in LIBERTY are key to the attribution of VAM-7. This is an untoned and lightly abraded example with substantial cartwheel luster. NGC ID# 256G, PCGS# 133958 Base PCGS# 7268
- 5394 1900-O/CC VAM-11 MS65 PCGS. A Top 100 Variety. Vibrant cartwheel sheen and brilliant, smooth surfaces proclaim the quality of this beautiful overmintmarked silver dollar. An early die state without any reverse cracks. Certified in an old green label holder. From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

- 5395 1900-O/CC VAM-11 MS65 PCGS. A Top 100 Variety. The familiar rising die crack above the final obverse star confirms the die marriage. Nicely struck and lustrous with a nearly brilliant reverse. The obverse exhibits rich lavender, forest-green, and chestnut-gold toning. The cheek exhibits unobtrusive contact. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268
- 5396 1900-O Doubled Die Obverse, VAM-15, MS64 Deep Mirror Prooflike NGC. A Top 100 Variety, with the stars to the right of the date boldly die doubled. The 1900-O Morgan is a plentiful date overall, but it is scarce in Deep Mirror Prooflike, regardless of grade. This Choice example displays sharp motifs and modest cameo contrast. Rose-gold toning around the peripheries leaves the interiors brilliant. An eye-appealing coin with no major abrasions. NGC ID# 256F, PCGS# 44417 Base PCGS# 97267
- 5397 1900-S MS66 NGC. This essentially brilliant Premium Gem yields radiant cartwheel luster and exceptionally well-preserved surfaces. Some faint roller marks on Liberty's jaw are mint-made. A touch of weakness on the hair above Liberty's ear is not unusual for this issue, despite the reputation of the San Francisco Mint for producing sharp strikes.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256H, PCGS# 7270

- 5398 1901 AU58 PCGS. CAC. The 1901 Morgan dollar is an elusive issue in high grade. Just a touch of wear shows on the well-detailed design elements of this impressive near-Mint specimen, and the lightly abraded surfaces retain much of their original mint luster. NGC ID# 256J, PCGS# 7272
- 5399 1901-S MS65 PCGS. This impressive Gem Morgan dollar exhibits a touch of the typical softness on the hair above Liberty's ear but is well-preserved and appealing. Shades of lavender-gray and russet-gold toning visit the margins. Higher-grade 1901-S dollars are seldom offered. NGC ID# 256L, PCGS# 7276

1902 Morgan Dollar, MS67 Conditionally Rare at This Level

5400 1902 MS67 NGC. The 1902 transitions from moderately scarce in Gem/Premium Gem condition to rare in MS67. Normally, survivors are heavily bagmarked from years of rough handling in storage. The devices are exceedingly sharp, including the eagle's talons. Brilliant surfaces lack major flaws and showcase radiant mint luster. Census: 20 in 67 (1 in 67+, 1 in 67★), 0 finer (12/17).

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256M, PCGS# 7278

- 5401 1903 MS67 NGC. This Superb Gem is brilliant, well-preserved, and particularly satiny. The 1903 Morgan dollar is scarce in this grade and prohibitively rare any finer. NGC has not certified a Prooflike coin finer than MS66, and only two non-Prooflike pieces are reported numerically finer than the present (1/18).
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256R, PCGS# 7284
- 5402 1903 MS67 NGC. This late-date P-mint dollar is seldom seen in such a superior state of preservation. The surfaces on this piece show sparkling mint luster and are generally brilliant with no mentionable color visible on either side. Fully struck in all areas with razor-sharp definition over the ear of Liberty and on the eagle's breast. NGC lists only two MS68 coins finer (1/18). Ex: New York Signature (Heritage, 7/2004), lot 7344. NGC ID# 256R, PCGS# 7284

1903-O Dollar, MS67 Among the Finest Certified

- 5403 1903-O MS67 NGC. A former series rarity, collectors benefited from the release of thousands of Mint State 1903-O dollars in October 1962. Today, the issue is very scarce but obtainable as high as MS67. Finer coins have not been seen by the leading grading services. Bright, satiny interiors blend with a ring of peripheral gold coloration. Clean surfaces house well-detailed motifs. Only the strands above Liberty's ear are incomplete. Census: 52 in 67 (2 in 67+), 0 finer (12/17).
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256S, PCGS# 7286
- 5404 1903-S AU53 NGC. Autumn-brown and gunmetal toning enrich this partially lustrous scarce date silver dollar. The surfaces are generally unabraded, although thorough inspection reveals moderate marks on the eagle's neck.

 Ex: Long Beach Signature (Heritage, 9/2010), lot 4730. NGC ID# 256T, PCGS# 7288
- 5405 1903-S Micro S, VAM-2, Top 100, XF45 PCGS. A Top 100 Variety. It is believed that a mintmark punch intended for a Barber quarter was erroneously employed, creating a widely sought-after variety that is very difficult to locate in XF or better condition. This bright steel-gray offering presents solid definition for the grade. NGC ID# 256T, PCGS# 133967 Base PCGS# 7306
- 5406 1904 MS65 NGC. The 1904 Morgan dollar is a better date in all grades but is collectible in MS65. Finer examples are rare, as NGC has seen only a dozen such non-Prooflike pieces; no Prooflike coins are listed finer than MS64 at that service (1/18). This example is well-struck and satiny with brilliant, well-preserved surfaces.

 From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256U, PCGS# 7290
- 5407 1904 MS65 PCGS. A hint of champagne toning graces satiny luster on this Gem 1904 dollar, and the surfaces are free of bothersome abrasions. The centers are well-struck. This Philadelphia issue is moderately plentiful in MS65 but elusive finer. NGC ID# 256U, PCGS# 7290
- 5408 1904-O MS67 NGC. While commonly encountered in lower grades, the 1904-O is very scarce in MS67 condition, and finer coins are virtually unobtainable. Sharply struck with sparkling white mint luster, there are no obvious abrasions on either side of this immaculate Superb Gem.
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256V, PCGS# 7292

1904-S Dollar, MS62 Strong Central Detail

- 5409 1904-S MS62 PCGS. Subdued, softly frosted mint luster is typical among 1904-S dollars and seen on this brilliant MS62 representative. Lightly impressed central devices are also characteristic, but the portrait and eagle are strongly defined here. There are many small marks on Liberty's cheek that undoubtedly contribute to the grade. No large quantities of the 1904-S were dispersed during the early 1960s.
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256W, PCGS# 7294
- 5410 1921-D MS66+ PCGS. This brilliant, high-end Premium Gem displays mainly frosted luster but with a couple of mirrored areas in the reverse field above the eagle. The wreath is well-struck, but the eagle's breast and the hair above Liberty's ear exhibit slight softness. A small mark on Liberty's nose is the only notable imperfection. PCGS lists only 12 finer representatives, including one Prooflike Premium Gem (1/18). NGC ID# 256Y, PCGS# 7298
- 5411 1921-D TRU_T Variety, VAM-1A2, MS64+ PCGS. A Top 100 Variety. The S in TRUST has a ghostly incused appearance, as struck from a filled die. The variety was first reported in 1968 by Hal Justice, but popularized in the 21st century by Michael Fey's VAM Keys reference. Lustrous and virtually brilliant with unabraded fields. Population: 18 in 64 (3 in 64+), 7 finer (1/18). NGC ID# 256Y, PCGS# 133970 Base PCGS# 7298
- 5412 1921-S MS65+ PCGS. Excellent luster and brilliant surfaces provide this high-end Gem with tremendous visual appeal. The strike is above average at the wreath for this issue, with the typical incompleteness at the centers present. A tiny spot of color appears on the reverse to the left of the eagle.

 Ex: Central States Signature (Heritage, 4/2013), lot 5023. NGC ID# 256Z, PCGS# 7300
- 5413 1921-S MS66 NGC. A delightful Premium Gem example of this conditionally challenging issue. The surfaces are brilliant throughout with bright cartwheel luster. There are virtually no abrasions present and the only area of striking weakness is on the right side of the wreath on the reverse. Census: 65 in 66 (3 in 66+, 3 in 66★), 1 finer (1/18).
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

1878 Morgan Dollar, PR63 8TF Variety

5414 1878 8TF PR63 PCGS. Only 500 proofs of the eight tailfeathers design were struck early in 1878, the first year of the Morgan dollar design. This impressive Select specimen exhibits razor-sharp definition on all design elements and the fields are deeply mirrored throughout. The lightly marked surfaces show subtle highlights of sea-green toning. Population: 34 in 63, 53 finer (1/18).

From The Property of a Lady. NGC ID# 2572, PCGS# 7311

1881 Morgan Dollar, PR64 Rare Cameo Example

5415 1881 PR64 Cameo PCGS. The 1881 proof Morgan dollar claims a generous mintage of 984 pieces. This attractive Choice example exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the richly frosted devices. A few subtle hints of pale gold toning add to the outstanding eye appeal. Population: 30 in 64 (1 in 64+) Cameo, 23 finer (1/18). From The Property of a Lady. NGC ID# 27Z5, PCGS# 87316

1882 Morgan Dollar, PR63 Cameo

5416 1882 PR63 Cameo PCGS. Contemporary collectors had a choice between Morgan dollars and Trade dollars from 1878 through 1883. Some collectors certainly acquired both. Mintage figures fail to tell us the preference of collectors in 1882, as 1,097 proof Trade dollars were minted, compared to 1,100 proof Morgan dollars. This lovely Cameo proof has the eye appeal of a higher grade, with faint hairlines on Liberty's cheek. Delicate gold toning is limited to the borders of this otherwise brilliant piece.

From The Sea Cliff Collection. NGC ID# 27Z6, PCGS# 87317

1884 Morgan Dollar, PR64 Vivid, Multicolor Toning

5417 1884 PR64 PCGS. Vivid shades of sea-green, burnt-orange, and lavender-gray toning blanket the well-preserved surfaces of this impressive Choice proof, with sharply detailed design elements and deeply reflective fields underneath. Overall eye appeal is quite strong. From a proof mintage of 875 pieces. Population: 53 in 64, 38 finer (1/18).

From The Property of a Lady. NGC ID# 27ZB, PCGS# 7319

1886 Silver Dollar, PR64

5418 1886 PR64 NGC. CAC. Most collectors sought proof examples in the 19th century, and proof mintage figures provide a window to the ebb and flow of numismatic activity from the 1860s to the end of the century. The proof mintage in 1886 was 886 coins that ranks 18th of 27 issues from 1878 to 1904. A hint of contrast is hidden beneath the lovely rose and blue toning over both sides of this Choice proof representative. NGC ID# 27ZF, PCGS# 7321

1887 Dollar, PR64 Mintage of 710 Proofs

5419 1887 PR64 PCGS. The obverse of this Choice proof is deeply mirrored and mostly brilliant with delicate peripheral gold patina. The reverse is almost entirely toned in intermingled dusky gold and pale blue hues. This 1887 Morgan dollar derives from a mintage of 710 proofs.

Ex: Chicago Signature (Heritage, 8/2011), lot 4840. NGC ID# 27ZG, PCGS# 7322

1891 Morgan Dollar, PR63 Only 650 Examples Struck

5420 1891 PR63 PCGS. A small mintage of 650 proof Morgan dollars was accomplished at the Philadelphia Mint in 1891, making the coins scarce to rare in all grades today. This impressive Select proof exhibits well-detailed design elements and deeply reflective fields, under shades of lavender-gray and greenish-gold toning. Population: 38 in 63, 92 finer (1/18).

From The Property of a Lady. NGC ID# 27ZL, PCGS# 7326

1892 Morgan Dollar, PR63 First Year of Barber Proof Sets

5421 1892 PR63 PCGS. CAC. The Barber design was introduced on U.S. subsidiary silver coins in 1892 and the Mint anticipated strong demand for proof sets including examples of the new design. Accordingly, a generous mintage of 1,245 proof Morgan dollars was struck to accommodate the amplified collector demand. This well-detailed Select specimen offers lightly marked surfaces, including deeply reflective fields, with a few hints of golden-tan and lavender toning.

From The Property of a Lady. NGC ID# 27ZM, PCGS# 7327

1892 Morgan Dollar, PR64 Lightly Contrasted

5422 1892 PR64 PCGS. The devices contrast slightly with the mirrored fields of this attractive Choice proof that has a slightly deficient strike with merged hair over Liberty's ear. This piece is mostly brilliant with hints of gold toning and attractive peripheral gunmetal-blue on each side. NGC ID# 27ZM, PCGS# 7327

5423 1896 PR61 Cameo ANACS. A fully struck specimen with frosty devices and glassy fields. The borders display tobacco-brown and navy-blue toning. The fields are faintly hairlined, and a couple of thin marks are noted west of the bust tip. Housed in a small-sized holder. NGC ID# 27ZT, PCGS# 87331

- 5424 1897 PR58 NGC. Just a trace of wear shows on the well-detailed design elements of this interesting PR58 specimen, from a small proof mintage of 731 pieces, and the deeply reflective fields exhibit a few minor ticks and abrasions. NGC ID# 27ZV, PCGS# 7332
- 5425 1904 PR62 PCGS. This is a pleasing lower-grade proof, featuring stronger visual appeal than expected for the PR62 level. Delicate russet-gold toning tints the mirrored fields and satiny devices, and the strike is full. Faint hairlines are only visible with a loupe. From The Sea Cliff Collection. NGC ID# 2824, PCGS# 7339

1904 Silver Dollar, PR64 Dappled Multicolor Patina

5426 1904 PR64 NGC. Iridescent ocean-blue, apple-green, and lavender toning adorns this sharply struck and flashy near-Gem. Rotation beneath a light reveals only a few stray field hairlines below the chin. Only 650 pieces were struck for the final year of regular Morgan dollar proof production. NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

- 5427 1921 MS65 NGC. This frosty Gem is exceptionally clean, showing warm golden toning and no abrasions. The central strike is typically weak, although the High Relief nature of the 1921 Peace dollar design is fully appreciable. NGC ID# 2U4E, PCGS# 7356
- 5428 1921 MS65 PCGS. Tinges of lavender, amber, and russet appear throughout the olive-green and gold toning on this Gem High Relief Peace dollar. The usual weakness is seen at the centers, but no major abrasions are present. This first-year issue is widely admired by numismatists today but caused endless striking difficulties at the time of issue due to the high relief. NGC ID# 2U4E, PCGS# 7356

1921 Peace Dollar, MS65+ Impressive High Relief Issue

- 5429 1921 MS65+ PCGS. CAC. The strike is typical with weak definition at the central obverse and reverse. However, the exceptional luster and pristine surfaces trump the strike on this lovely Gem. Both sides are brilliant and untoned with a high degree of aesthetic appeal. Only 42 of the nearly 1,500 PCGS certified MS65 examples have earned the Plus designation (1/18). NGC ID# 2U4E, PCGS# 7356
- 5430 1921 Matte Proof Dies, VAM-1F, MS65 PCGS. Although struck for commercial purposes, the present coin is from the same die pair that previously struck matte proofs. This lustrous and lightly toned Gem has a smooth cheek and a few delicate field marks near the profile. Ex: Bob Bisanz U.S. Type Set (Heritage, 1/2001), lot 7680, which realized \$1,725. PCGS# 518799 Base PCGS# 7356

- 5431 1921 Line Through L, VAM-3, MS64 PCGS. Gold CAC. A Top 50 Variety. The popular variety with a ray over (instead of under) the first L in DOLLAR. A lustrous example with pastel powder-blue and straw-gold toning. Remarkably smooth for this single-year high-relief subtype. Gold CAC: 1 in 64, 0 finer (1/18). NGC ID# 2U4E, PCGS# 133734 Base PCGS# 7356
- 5432 1922-D MS66 PCGS. CAC. This generally plentiful issue is very scarce in Premium Gem condition, and there are only three finer representatives at PCGS (1/18). Pale charcoal-gray patina appears over bright, satiny surfaces that are marvelously preserved. The right obverse is slightly soft, but the overall strike is strong. NGC ID# 257D, PCGS# 7358
- 5433 1923-D MS65 PCGS. CAC. Despite the high mintage of the '23-D, CAC Gems are surprisingly elusive. This lustrous and brilliant silver dollar offers exemplary surfaces, with Liberty's cheek particularly clean. Encapsulated in a green label holder. CAC: 73 in 65, 28 finer (12/17).

 Ex: Long Beach Signature (Heritage, 1/2004), lot 8286, which realized \$776.25. NGC ID# 257G, PCGS# 7361
- 5434 1924-S MS64+ PCGS. CAC. A brilliant, softly frosted near-Gem, showing a bold strike and only a few small abrasions. The 1924-S is relatively plentiful in this grade, but finer coins are scarce. The CAC green label and Plus designation make this piece among the most important MS64 examples of the date known. NGC ID# 257K, PCGS# 7364
- 5435 1925 MS67 NGC. The 1925 is one of the few Peace dollar issues that is available in Superb Gem condition. Nonetheless, these pieces are highly sought-after for type purposes. The present coin displays beautiful, frost-white luster and sharp design elements. The surfaces are virtually pristine. NGC and PCGS each report a single finer representative (1/18). NGC ID# 257L, PCGS# 7365
- 5436 1926 MS66 PCGS. The 1926 Peace dollar is only marginally scarce in MS66, but no numerically finer coins are reported by PCGS (1/18). This Premium Gem displays sharp motifs and satiny, golden-toned mint luster. A faint graze on Liberty's cheek is all that prevents an even finer grade. NGC ID# 257N, PCGS# 7367
- 5437 1926-S MS65+ PCGS. CAC. A hint of champagne toning appears on each side of this fully lustrous and highly attractive Gem Peace dollar. The central obverse and reverse details are a trifle weak as usual, but the overall eye appeal is exceptional. PCGS has only certified 93 finer examples of this issue (1/18). NGC ID# 257R, PCGS# 7369
- 5438 1927 MS65 PCGS. Gem examples of the 1927 Peace dollar are usually available, although PCGS lists just 16 finer coins (1/18). This collectible MS65 representative displays golden-toned satin mint luster and well-struck devices. A loupe reveals only a few microscopic imperfections. NGC ID# 257S, PCGS# 7370
- 5439 1927 MS65 PCGS. CAC. Powder-blue and olive-green toning encompasses lustrous and splendidly smooth surfaces. Sharply struck and impressive. Certified in a green label holder. CAC: 64 in 65, 4 finer (1/18). NGC ID# 257S, PCGS# 7370
- 5440 1927 MS65 PCGS. CAC. The designer's monogram and the TR in TRVST are die doubled. Possibly VAM-2 or VAM-3, but diagnostics are lacking to nail down the variety. This low mintage Gem is brilliant with potent luster and a good strike. Impressively free from marks. NGC ID# 257S, PCGS# 7370
- 5441 1927-D MS64 PCGS. CAC. This frosty near-Gem displays champagne-tinged luster with daubs of russet and olive-gold around the margins. The strike is sharp, and the surfaces are devoid of major abrasions. Although the 1927-D is relatively plentiful in this grade, CAC-approved coins are elusive. NGC ID# 257T, PCGS# 7371
- 5442 1927-D MS64 PCGS. CAC. This near-Gem 1927-D silver dollar displays remarkably frosty luster with no toning. The strike is sharp, and the only grade-limiting abrasions are a few light luster grazes on Liberty's cheek. CAC-approved coins in this grade are infrequently offered. NGC ID# 257T, PCGS# 7371

- 5443 1927-S MS64+ PCGS. CAC. The 1927-S is famous for its mintage of less than 1 million coins (866,000 pieces), and it is a scarce date in Gem condition. Here offered is a collectible but high-end near-Gem, endorsed by CAC as being among the better-known coins for the grade level. Luster is brilliant and satiny with a vibrant cartwheel effect. NGC ID# 26J6, PCGS# 7372
- 5444 1928 MS64+ PCGS. CAC. The Plus designation and CAC green label together give this key-date Peace dollar tremendous appeal. Frosty, luminous mint luster yields hints of champagne toning and shows minimal abrasions. Well-struck design elements complete the aesthetic merits. NGC ID# 257V, PCGS# 7373
- 5445 1928-S MS64+ PCGS. CAC. The designer's initials and the first T in TRVST are nicely die doubled, as seen on several VAM varieties of the conditionally rare '28-S. A lustrous near-Gem with light golden patina, a good strike, and pleasing preservation. NGC ID# 257W, PCGS# 7374
- 5446 1934 MS66 NGC. A faint blush of light golden toning graces the frosty, vibrant mint luster of this Premium Gem 1934 Peace dollar. The strike is sharp, and neither side shows distracting abrasions. Under a loupe, a couple of faint grazes on Liberty's cheek appear to be all that limit the grade. Census: 40 in 66 (1 in 66+★), 5 finer (1/18). NGC ID# 257Y, PCGS# 7375

1934-S Peace Dollar, MS62 Important Key Issue

- 5447 1934-S MS62 NGC. Several Peace dollars are condition rarities, but the 1921, 1928, and 1934-S are three issues that are considered key dates across all grade ranges. This pleasing Mint State piece has brilliant silver luster and frosty, untoned surfaces with excellent eye appeal. A few wispy lines and marks prevent a higher grade. NGC ID# 257Z, PCGS# 7377
- 5448 1935 MS66 PCGS. Although the 1935 Peace dollar is moderately available in MS66, this grade is the finest achieved at PCGS (1/18), making coins such as the present highly desirable among Registry Set collectors. Brilliant, satiny surfaces show sharp design elements and no bothersome abrasions. Eye appeal is outstanding. NGC ID# 2582, PCGS# 7378
- 5449 1935-S MS65 PCGS. CAC. Three rays below ONE. Splashes of peach-gold and olive-green toning cross a majority of the obverse. The reverse is primarily brilliant but does display russet freckles near ONE and DOLLAR. A popular West Coast issue. NGC ID# 2583, PCGS# 7379

COMMEMORATIVE SILVER

- 5450 1893 Isabella Quarter MS65 PCGS. An attractive Gem representative of the first commemorative silver quarter, with sharply detailed design elements and well-preserved surfaces that show much prooflike reflectivity in the fields. Subtle hints of bluish-gray toning visit the fields on both sides.

 From The Douglas Knight Collection, Part II. NGC ID# BYJ9, PCGS# 9220
- 5451 1893 Isabella Quarter MS65 NGC. The otherwise pearl-white surfaces reveal delicate golden accents around the peripheries. The strike is razor-sharp throughout, and there are few distractions of any significance. A pleasing Isabella type coin.

 Ex: FUN Signature (Heritage, 1/2003), lot 9495; Houston Signature (Heritage, 12/2009), lot 1190; Central States Signature (Heritage, 4-5/2010), lot 1450. NGC ID# BYJ9, PCGS# 9220

5452 1893 Isabella Quarter MS65 PCGS. This luminous Gem type coin displays sharp motifs and unabraded surfaces. Original olive, amber-gold, and russet toning embraces softly frosted fields and devices, promoting excellent visual merit. The distribution of the Isabella quarter amounted to only 24,214 coins, and Gem survivors are in high demand today. NGC ID# BYJ9, PCGS# 9220

1893 Isabella Quarter, MS65 Prooflike Concentrically Toned

- 5453 1893 Isabella Quarter MS65 Prooflike NGC. Carefully preserved from their release at the 1893 World's Columbian Exposition, Isabella commemorative quarters are usually obtainable in higher Mint State grades, though Prooflike examples are truly scarce, and are not currently differentiated by PCGS. This example displays deeply mirrored fields with concentric rings of violet, blue, green-gold, and amber on the obverse, and blended blue and champagne-green over the reverse. The strike is razor-sharp, and the surfaces reveal only a few insignificant imperfections. A visually exceptional representative.
 - Ex: Central States Signature (Heritage, 4/2014), lot 5886. NGC ID# BYJ9, PCGS# 89220
- 5454 1900 Lafayette Dollar MS63 PCGS. DuVall 1-B. Light buttergold toning deepens near the rims of this lustrous and well-struck silver dollar. The obverse is surprisingly void of contact, and the reverse shows only minor grazes on the upper-right field and the hindquarters of the horse. NGC ID# BYKW, PCGS# 9222
- 5455 1900 Lafayette Dollar MS63 PCGS. DuVall 1-B. A honey-gold silver dollar that has both booming luster and a full strike. Marks are minimal, limited to infrequent minute ticks on the portraits and on the upper right reverse field.

 Ex: Central States Signature (Heritage, 5/2010), lot 1454, which realized \$1,725. NGC ID# BYKW, PCGS# 9222
- 5456 1900 Lafayette Dollar MS63 NGC. DuVall 1-B. Exceptionally nice for its given third-party grade, this lustrous and untoned Lafayette dollar shows only trivial signs of contact, along with a small, slender flan imperfection on Washington's jaw. NGC ID# BYKW, PCGS# 9222
- 5457 1900 Lafayette Dollar MS63 PCGS. CAC. DuVall 1-B. The A in DOLLAR is low and leans left. The final leaf terminates between 19 in the date. Gunmetal-blue patina within the peripheral recesses and antique olive-gold hues elsewhere paint this original Lafayette dollar. Each side reveals a crisp strike and exemplary surfaces for the Select grade. Always a popular issue in the classic commemorative series. NGC ID# BYKW, PCGS# 9222
- 5458 1900 Lafayette Dollar MS63 PCGS. CAC. DuVall 2-C. Vibrant, satiny mint luster displays delicate golden toning on each side of this sharp Lafayette type coin. Small, deeper amber-gold accents appear around the outer periphery beneath a loupe. Grade-limiting abrasions are small and unobtrusive.
 - From The Property of a Lady. NGC ID# BYKW, PCGS# 9222
- 5459 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B. Frank DuVall identified five varieties of Lafayette dollars including two common varieties, two scarce varieties, and one very rare variety. DuVall 1-B is one of the common varieties, an ideal candidate for the non-specialist collector. This Choice Mint State piece has hints of gold toning on the obverse, with frosty mint luster throughout. NGC ID# BYKW, PCGS# 9222

- 5460 1921 Alabama 2x2 MS65+ PCGS. CAC. Champagne and russet toning grace the softly frosted surfaces of this high-end Gem, an Alabama type coin that has few superiors in finer grades. The CAC green label is only occasionally seen even at this grade level. NGC ID# BYEZ, PCGS# 9225
- 5461 1921 Alabama 2x2 MS66 PCGS. CAC. The 22nd state, Alabama, was admitted as a stare on December 14, 1819, and this 1921-dated issue marked the 1919 centennial of statehood. The obverse features conjoined busts of Alabama's first governor, William Wyatt Bibb, and the 36th governor, Thomas Kilby, who was in office at the time of the centennial and when the coins were issued. This Premium Gem has brilliant and satiny silver luster with lovely gold and iridescent toning. PCGS has only certified eight finer examples (1/18). NGC ID# BYEZ, PCGS# 9225

1921 Alabama Half Dollar, MS66 2x2 Variant

5462 1921 Alabama 2x2 MS66 PCGS. CAC. The incuse 2x2 in the right obverse field provided refers to Alabama as the 22nd state, and provided a second variety, giving the promoters an opportunity to sell additional examples to collectors. This Premium Gem is destined for an advanced commemorative collection, exhibiting attractive champagne toning over frosty luster, with hints of lavender on the obverse figures. PCGS has only certified eight numerically finer examples (1/18). NGC ID# BYEZ, PCGS# 9225

1937 Antietam Half Dollar, MS68 Blended Gold and Blue Hues

5463 1937 Antietam MS68 NGC. Distribution of Antietam half dollars amounted to 18,028 pieces. About three dozen examples survive in this incredible state of preservation. This Superb Gem blends pale gold and pastel-blue hues over near-flawless surfaces, though much of the central obverse remains brilliant. Eye appeal is terrific. Census: 20 in 68 (6 in 68★), 2 finer (1/18). NGC ID# BYF4, PCGS# 9229

1938 Arkansas Half, MS67 Tied for the Finest Certified

- 5464 1938 Arkansas MS67 PCGS. Arkansas celebrated its centennial of statehood in 1936, but the commemorative series began with an issue in 1935, and continued through 1939. Examples were coined at all three Mints, and the total distribution for all 15 issues was well under 100,000 coins. This Superb Gem has splashes of violet toning on its frosty silver surfaces with pale green on the reverse. Population: 16 in 67 (2 in 67+), 0 finer (1/18). NGC ID# BYFE, PCGS# 9245
- 5465 1935/34-D Boone MS67+ NGC. CAC. This dual-date issue is scarce in MS67 and rare finer. The CAC-approved coin offered here will make an ideal Registry Set consideration, also being Plus-graded by NGC. The strike is sharp, and the bone-white surfaces have frosty, unblemished mint luster. A superb coin in every respect. Census: 56 in 67 (4 in 67+, 4 in 67 ★, 1 in 67+★), 7 finer. CAC: 18 in 67, 1 finer (1/18). NGC ID# BYFU, PCGS# 9763
- 5466 1935/34-8 Boone MS67 NGC. This San Francisco issue is relatively scarce in Premium Gem condition, and the present Superb Gem is decidedly rare. Satiny luster yields warm champagne toning on each side, while the central devices are sharply defined. Under a loupe, the surfaces appear virtually flawless. Only a handful of finer pieces are known. Census: 20 in 67 (1 in 67+, 1 in 67 ★), 6 finer (1/18). NGC ID# BYFW, PCGS# 9264
- 5467 1938 Boone MS67 PCGS. American frontiersman Daniel Boone was born on November 2, 1734, and this commemorative issue marks the 200th anniversary of his birth. He was and is considered one of America's first folk heroes. The Boone half dollars were first issued in 1934, and concluded in 1938. An example of the latter, this Superb Gem has satiny silver luster and wisps of iridescent toning. Population: 42 in 67 (5 in 67+), 1 finer (1/18). NGC ID# BYG6, PCGS# 9274
- 5468 1938-S Boone MS67 PCGS. This spectacular Superb Gem is well-detailed and well-preserved, with lustrous surfaces that display highlights of sea-green toning in selected areas. Eye appeal is outstanding. Population: 47 in 67 (3 in 67+), 3 finer (12/17). NGC ID# BYG8, PCGS# 9276

1936 Cincinnati Half Dollar, MS67 Tied for the Finest Certified

- 5469 1936 Cincinnati MS67 PCGS. Stephen Foster (1826-1864) was identified as "America's Troubadour" on the obverse of this commemorative half dollar that proclaims Cincinnati as the "Music Center of America," and bears the dates 1886 and 1936. Foster worked as a bookkeeper for his brother in Cincinnati in the late 1840s, apparently living there for about four years. This Superb Gem exhibits the typical soft, frosty mint luster of the Cincinnati issue, accented with faint champagne toning on each side. Population: 35 in 67 (2 in 67+), 0 finer (1/18). NGC ID# BYCJ, PCGS# 9283
- 5470 1936-D Cincinnati MS67 PCGS. Just 5,000 Cincinnati commemorative half dollars were coined at each of the three operating mints in 1936, and examples are elusive in high grades. This Superb Gem has pale gold toning over satin luster on both sides, within a frame of peripheral iridescent toning. Population: 57 in 67 (12 in 67+), 2 finer (1/18). NGC ID# BYCK, PCGS# 9284

1936-S Columbia Half, MS68 Tied for the Finest Certified

5471 1936-S Columbia MS68 NGC. The combined NGC and PCGS population data shows just 18 examples of this issue have achieved the MS68 grade, nine at each service (1/18). This amazing Superb Gem exhibits light gold at the centers, with concentric rainbow rings toward the borders. The underlying luster is brilliant and satiny. An extraordinary example for the connoisseur. NGC ID# BYGE, PCGS# 9293

1892 Columbian Half Dollar, MS67 Lightly Repunched Date

5472 1892 Columbian MS67 NGC. The 9 in the date is lightly repunched east, similar to FS-303 but from a different reverse die since the date position differs. A thoroughly lustrous Superb Gem that boasts attractive peripheral golden-brown and apple-green patina. Sharply struck and splendidly preserved. Census: 50 in 67 (1 in 67+, 11 in 67★, 3 in 67+★), 1 finer (1/18). NGC ID# BYGF, PCGS# 9296

1936 Gettysburg Half Dollar, MS67 Golden-Gray and Russet Patina

- 5473 1936 Gettysburg MS67 NGC. CAC. This 1936 Gettysburg commemorative half dollar is particularly well-struck. Satiny silver surfaces display golden-gray toning punctuated by daubs of deeprusset patina. Remarkably few signs of contact appear on this well-preserved Superb Gem. NGC reports three finer examples. CAC: 45 in 67, 1 finer (1/18). NGC ID# BYGM, PCGS# 9305
- 5474 1922 Grant No Star MS66+ PCGS. Two versions of the Grant half dollar and the Grant gold dollar are identified as the Star and the No Star varieties, and this Premium Gem represents the latter. A splendid Premium Gem, this example has a hint of champagne toning on its lustrous and frosty silver surfaces with bold design definition. NGC ID# BYGP, PCGS# 9306
- 5475 1922 Grant With Star MS62 NGC. From a small distribution of 4,256 pieces, this attractive MS62 example displays especially vibrant mint luster and well-detailed design elements throughout. No large or distracting flaws are evident and the surfaces are untoned on both sides. NGC ID# BYPP, PCGS# 9307
- 5476 1922 Grant With Star MS64 PCGS. A satiny, untoned Choice example with good detail and preservation. Struck from clashed dies that were heavily repolished to efface the clash marks crisscrossing die lines and the ghosts of clashing remain in the fields and recesses as evidence. NGC ID# BYPP, PCGS# 9307
- 5477 1928 Hawaiian Cleaned PCGS Genuine. AU Details. The unchallenged key to a fifty-piece classic silver commemorative type set, the Hawaiian half dollar provides an obstacle for many collectors, but becomes more accessible if lightly cleaned. This satiny and brilliant example is delicately hairlined but has minimal marks and only a trace of wear.

From The E.B. Strickland Collection, Part II.

- 5478 1928 Hawaiian Cleaned PCGS Genuine. Unc. Details. Most desirable among the classic silver commemorative types, the Hawaiian is costly to secure in unimpaired Mint State, but lightly cleaned examples are collectible. The present lightly toned piece has good cartwheel luster and has attractive eye appeal despite inoffensive hairlines.
 - From The Jamestown Collection, Part II.
- 5479 1928 Hawaiian Scratch PCGS Genuine. Unc Details. Satiny luster yields delicate champagne and rose-gold hues on this well-struck Hawaiian half dollar. A thin, vertical scratch on the obverse from the R in DOLLAR to the E in STATES prevents a numeric grade, although no other significant abrasions are observed.
- 5480 1928 Hawaiian Polished PCGS Genuine. Unc Details. This key commemorative half is somewhat bright from a mild wipe, but cartwheel luster is apparent, and the untoned surfaces are void of noticeable contact.
 - From The E.B. Strickland Collection, Part II.
- 5481 1928 Hawaiian Cleaned PCGS Genuine. Unc Details. Although 10,000 Hawaiian half dollars were distributed, many went to the Bank of Hawaii, and were sold more than half a century after their production. Although this piece shows cleaning lines and a slightly glossy appearance, it is a highly attractive representative that should prove affordable. This piece is from an old-time collection that predated the Bank of Hawaii dispersal. From The Property of a Lady.
- 5482 1928 Hawaiian Improperly Cleaned NGC Details. Unc. Most coveted among the 50 classic commemorative types, the Hawaiian half dollar is nonetheless affordable in lightly impaired condition. The present brilliant, well-struck, and coruscating representative has been unobtrusively dipped but will satisfy many collectors.
- 5483 1928 Hawaiian MS62 NGC. A deep layer of speckled brownishgreen patina covers the obverse. The reverse is largely untoned and cream-gray, with a bit of mottled coloration near the borders. A well-struck and distraction-free representative of this popular, key commemorative issue. NGC ID# BYGR, PCGS# 9309
- 5484 1928 Hawaiian MS64 PCGS. A satiny, well-detailed example of this key classic commemorative, showing a hint of champagne toning and only a few light contact marks. The distribution of this issue consisted of only 10,008 coins, including eight assay pieces and 50 sandblast proofs. NGC ID# BYGR, PCGS# 9309

1928 Hawaiian Half Dollar, MS65 Key Silver Commemorative

- 5485 1928 Hawaiian MS65 PCGS. From a small distribution of 9,958 pieces, the 1928 Hawaiian half dollars were largely distributed to non-numismatic owners in the islands. As a result, comparatively few examples were saved in pristine condition, and the issue is very scarce above the MS65 grade level. This attractive Gem offers sharply detailed design elements and well-preserved, lustrous surfaces that show a few hints of pale gold toning.
 - From The Property of a Lady. NGC ID# BYGR, PCGS# 9309
- 5486 1935 Hudson MS66 PCGS. This satiny Gem Hudson Sesquicentennial half dollar is lightly toned champagne across the interiors with deeper gold at the outer peripheries. Although lightly struck on the finer central details, the coin is unabraded and appealing. PCGS lists only 23 finer representatives (1/18). NGC ID# BYGS, PCGS# 9312

- 5487 1935 Hudson MS66+ PCGS. A Plus-graded Premium Gem example of this popular silver commemorative, with well-detailed design elements and virtually flawless surfaces that show a few hints of sea-green toning at the peripheries. PCGS has graded 23 numerically finer examples (12/17). NGC ID# BYGS, PCGS# 9312
- 5488 1935 Hudson MS66 PCGS. CAC. A hint of light golden toning graces the frosty surfaces of this CAC-endorsed Premium Gem. Under a loupe, no distracting abrasions are seen, although we note minor softness on some of the design high points. PCGS lists only 23 higher-grade representatives (1/18). NGC ID# BYGS, PCGS# 9317
- 5489 1924 Huguenot MS67 PCGS. Ancestors of the cataloger were among the early settlers of New Netherlands that is commemorated on this issue that marks the arrival of the Huguenots and Walloons in North America. This lovely Superb Gem has frosty ivory surfaces and a bold strike with attractive peripheral iridescence. Population: 76 in 67 (15 in 67+), 3 finer (1/18). NGC ID# BYGT, PCGS# 9314
- 5490 1918 Lincoln MS67 PCGS. CAC. An exceptional Illinois Centennial half, this Superb Gem representative exhibits fully struck design elements amid beautifully preserved, frosty surfaces. Pale pastel shades of champagne and lavender-blue grace each side, with a deeper sun-gold and amber crescent seen along the upper obverse border. PCGS has seen only three numerically finer representatives (1/18).

 Ex: Central States Signature (Heritage, 4/2015), lot 6679. NGC ID#

BYGU, PCGS# 9320

- 5491 1934 Maryland MS67 PCGS. CAC. A conditionally scarce Maryland half dollar, among the finest at PCGS and CAC. The strike is well-executed, and each side offers original, frosty luster with rich multicolor toning that embeds itself in the fields, leaving the relief elements golden-gray. Population: 79 in 67 (9 in 67+), 0 finer. CAC: 47 in 67, 0 finer (1/18).

 Ex: Long Beach Signature (Heritage, 9/2007), lot 2129; FUN Signature (Heritage, 1/2015), lot 12046. NGC ID# BYGZ, PCGS#
- 5492 1934 Maryland MS67 PCGS. CAC. The interiors are silver-gray, while russet and amber-gold toning surrounds the borders. This satiny Superb Gem is lustrous and free of distracting abrasions. Examples are scarce this fine and unknown finer at PCGS. Population: 79 in 67 (9 in 67+), 0 finer. CAC: 47 in 67, 0 finer (1/18). NGC ID# BYGZ, PCGS# 9328
- 5493 1921 Missouri MS65 NGC. The Missouri Centennial half dollar variety without the 2★4 notation in the field is available in MS65 but scarce finer. This piece displays a sharp strike and champagnetinted satin luster. A few small abrasions are not out of line for the grade. NGC reports 41 numerically finer representatives (1/18). NGC ID# BYH2, PCGS# 9330
- 5494 1921 Missouri MS65+ NGC. The toning on this high-end Gem is remarkable. Both sides show warm orange-gold interiors surrounded by vivid violet, ocean-blue, and turquoise border hues. The strike is sharp, and the patina is underscored by frosty, well-preserved mint luster. NGC ID# BYH2, PCGS# 9330

1921 Missouri Half Dollar, MS66 Rarely Found Finer

- 5495 1921 Missouri MS66 NGC. This Premium Gem represents the "Plain" version of the Missouri half dollar, without the 2★4 notation in the obverse field that created a second variety for collectors. A lovely example, this half dollar is sharply defined with frosty luster beneath vibrant gold toning. Census: 39 in 66 (1 in 66+), 2 finer (1/18). NGC ID# BYH2, PCGS# 9330
- 5496 1923-S Monroe MS66 PCGS. A 1923 motion picture exposition in California prompted the film industry to promote this issue that commemorates the Monroe Doctrine of 1823, an event that occurred a quarter century before the California Gold Rush. Struck in shallow relief, examples are rarely seen in top grades. This highly lustrous Premium Gem has lovely gold and blue toning on its champagne surfaces. PCGS has only certified seven finer examples (1/18). NGC ID# BYH4, PCGS# 9333
- 5497 1934-D Oregon MS67 PCGS. CAC. The obverse is die tripled, identical to that seen on the FS-801 1933-D Oregon. Apparently, both issues shared the same working obverse hub, where the tripling presumably originated. This lustrous Superb Gem is mostly cream-gray but shows autumn-gold accents. NGC ID# BYHA, PCGS# 9344

1936-S Oregon Half Dollar, MS68 Essentially Mark-Free

- 5498 1936-S Oregon MS68 NGC. We encourage interested parties to examine this piece carefully. The closer one looks, the more one is impressed by the immaculate preservation. There are no marks worth mentioning. Mint luster is satiny rather than frosty, and each side exhibits a thin veil of dusky olive-gold patina. Additional hues appear in the form of speckled multicolor toning around the upper reverse border. Census: 18 in 68 (2 in 68★), 0 finer (1/18). NGC ID# BYHC, PCGS# 9346
- 5499 1915-S Panama-Pacific MS66 NGC. An amazing example with satin luster that is mostly brilliant-white, framed by a trace of champagne toning near the borders on each side. The design elements are well-detailed and the surfaces are nearly perfect with only the slightest imperfections. NGC has graded 63 numerically finer examples (12/17). NGC ID# BYHP, PCGS# 9357
- 5500 1915-S/S Panama-Pacific, FS-502, MS65+ PCGS. The mintmark is lightly repunched north. A coruscating golden-brown, applegreen, and steel-gray Gem. A lens reveals unabraded fields and only minor contact near Liberty's waist. A scarcer type than its mintage suggests. NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357

- 5501 1915-S/S Panama-Pacific, FS-502, MS66 PCGS. The mintmark is lightly, but widely, repunched due north. Lustrous and well-struck with smooth fields and medium honey-gold toning. The obverse rim displays hints of navy-blue patina.

 Ex: FUN Signature (Heritage, 1/2010), lot 3241, which realized \$2,300. NGC ID# BYHP, PCGS# 511601 Base PCGS# 9357
- 5502 1921 Pilgrim MS66+ PCGS. CAC. From a distribution of 20,053 pieces, this Plus-graded Premium Gem offers sharply detailed devices and well-preserved lustrous surfaces, with highlights of lavender and emerald-green toning. PCGS has graded 51 numerically finer examples (12/17). NGC ID# BYHS, PCGS# 9360
- 5503 1921 Pilgrim MS67 PCGS. This is a boldly rendered and vividly lustrous Superb Gem representative of the Pilgrim Tercentenary half dollar, conditionally rare as such. Beautifully preserved surfaces yield warm champagne toning overall, with deeper olive, russet, and amber overtones also evident in the peripheries and lightly speckled over the central reverse. Population: 50 in 67 (6 in 67+), 1 finer (1/18). NGC ID# BYHS, PCGS# 9360
- 5504 1936 Rhode Island MS66 Prooflike NGC. CAC. Ex: Bagne Collection. This is certainly an appealing Rhode Island commemorative. The fields are brightly reflective, and there is no contrast between fields and devices, much the same as regular-issue proofs stuck in the early years of the 20th century. Brilliant centers are surrounded by dusky russet hues at the margins. The surfaces are essentially mark-free, as one would expect from the MS66 designation. NGC has certified 10 other Prooflike P-mint Rhode Island halves in this lofty grade and none are finer (1/18). Ex: Houston Signature (Heritage, 12/2009), lot 1275; Dallas Signature (Heritage, 11/2017), lot 17644. NGC ID# BYHT, PCGS# 89363
- 5505 1926 Sesquicentennial MS65 PCGS. Commemorating the 150th anniversary of American independence, the Sesquicentennial coins had a substantial distribution of 141,120 coins. However, the dies had shallow relief and the coins suffered from a lack of detail. This example has an atypical strong strike with brilliant silver luster and delicate peripheral gold toning on the obverse. PCGS has only certified 11 finer examples (1/18). NGC ID# BYJ4, PCGS# 9374
- 5506 1935 Spanish Trail MS65 PCGS. Pearl-gray overall with gold tones toward the margins and occasional blue-violet accents. Light grazes scattered in the obverse fields and a scrape to the left of the yucca account for the grade. The 1935 Spanish Trail half dollar claims a small distribution of 10,008 pieces. NGC ID# BYJ5, PCGS# 9376
- 5507 1935 Spanish Trail MS66 PCGS. This Premium Gem Spanish Trail commemorative shimmers with nearly pristine, satiny mint luster. Sharp design elements are another hallmark of the eye appeal, accented by delicate champagne toning with a few russet border hues. Higher-grade examples of this issue are elusive. NGC ID# BYJ5, PCGS# 9376
- 5508 1935 Spanish Trail MS66 PCGS. A well-struck, satiny example in a high-quality grade that can still be acquired without breaking the bank. Each side has a hint of light champagne color and is vibrantly lustrous. As usual, El Paso, Texas, has a touch of strike softness. From The Jamestown Collection, Part II. NGC ID# BYJ5, PCGS# 9376
- 5509 1935 Spanish Trail MS66 PCGS. Warm golden toning yields hints of lavender on this Premium Gem, and neither side has a notable abrasion. El Paso, Texas, exhibits trivial softness, but the central strike is bold. A pleasing, high-end example of this popular commemorative.
 - From The Jamestown Collection, Part II. NGC ID# BYJ5, PCGS# 9376
- 5510 1935 Spanish Trail MS66 PCGS. A hint of light golden color graces satiny, unabraded surfaces on this Premium Gem Spanish Trail half dollar. El Paso, Texas, shows the only discernible strike weakness, as usual for the issue. This classic commemorative is conditionally challenging in finer grades.
 - From The Property of a Lady. NGC ID# BYJ5, PCGS# 9376

- 5511 1935 Spanish Trail MS66 NGC. The Old Spanish Trail is remembered as a trade route that connected Santa Fe, New Mexico and Los Angeles, California. However, the commemorative coin marks the 400th anniversary of the route that Cabeza de Vaca followed through the gulf states during his 1535 expedition. This lovely Premium Gem has brilliant and satiny silver luster and a trace of pale gold toning. NGC ID# BYJ5, PCGS# 9376
- 5512 1935 Spanish Trail MS66 PCGS. CAC. A blush of delicate champagne toning warms the satiny surfaces of this high-end Spanish Trail half dollar. The strike is impressively sharp, and the CAC green label confirms the outstanding surface quality. Finer pieces will be elusive, and the present coin will satisfy most collectors. NGC ID# BYJ5, PCGS# 9376

1937-S Texas Half Dollar, MS68 A Condition Rarity

- 5513 1937-S Texas MS68 NGC. The net distribution of 1937-S Texas half dollars was just 6,637 coins, and few of those survive as fine as this piece. Both sides exhibit frosty silver luster, essentially untoned, with traces of gold along the obverse border. This pristine example is one of the finest that survive. Census: 8 in 68, 0 finer (1/18). NGC ID# BYJK, PCGS# 9392
- 5514 1925 Vancouver MS66+ PCGS. Lavender-gray and olive-gold are the chief colors on this high-end Fort Vancouver half dollar, although peach, orange, and forest-green hues also appear at the reverse borders. The coin is well-struck and free of bothersome abrasions, producing strong visual appeal. Higher-grade representatives of this centennial-celebration commemorative are scarce. NGC ID# BYJP, PCGS# 9399

1927 Vermont Half Dollar, MS67 Battle of Bennington Commemorative

- 5515 1927 Vermont MS67 PCGS. A profile of Ira Allen, identified as the founder of Vermont, appears on the obverse of this commemorative half dollar. The reverse depicts a catamount, sometimes also known as a cougar, puma, or mountain lion. Known as the Vermont half dollar, this issue commemorated the Battle of Bennington that actually took place in New York. This Superb Gem has vibrant gold toning over frosty silver luster. The surfaces are pristine and the overall aesthetic appeal is excellent. Population: 57 in 67 (3 in 67+), 1 finer (1/18). NGC ID# BYJR, PCGS# 9401
- 5516 1949-D Booker T. Washington MS67 PCGS. CAC. The three mints issued 6,004 Booker T. Washington half dollars each in 1949, and surviving examples are elusive. This Superb Gem is tied for the finest certified, exhibiting pale champagne toning over pristine silver surfaces that display frosty mint luster. Population: 41 in 67 (3 in 67+), 0 finer. CAC: 29 in 67, 0 finer (1/18). NGC ID# BYK4, PCGS# 9417

- 5517 1951 Booker T. Washington MS67 PCGS. This magnificent Superb Gem exhibits sharply detailed design elements throughout and the virtually flawless surfaces display vivid highlights of greenish-gold and magenta toning. Especially vibrant mint luster adds to the terrific eye appeal. Population: 24 in 67 (4 in 67+), 0 finer (12/17). NGC ID# BYK9, PCGS# 9424
- 5518 1951 Booker T. Washington MS67 NGC. CAC. This issue had the third highest distribution of the six-year Booker T. Washington series with a total of 210,082 coins. An impressive Superb Gem, this sharply defined piece has dappled gold toning on its brilliant and fully lustrous silver surfaces. Census: 14 in 67 (1 in 67+, 1 in 67★), 1 finer. CAC: 17 in 67, 0 finer (1/18). NGC ID# BYK9, PCGS# 9424
- 5519 1951-D Booker T. Washington MS67+ NGC. CAC. The 1951-D Booker T. Washington half dollar comes from a low distribution of just 7,004 pieces (including assay coins). The lustrous surfaces of this high-end Superb Gem are covered with soft grayish-tan patina and exhibit well-struck devices. Impeccable preservation heightens the coin's eye appeal, affirming the CAC sticker. None are finer at either service. Census: 45 in 67 (6 in 67+, 1 in 67★), 0 finer. CAC: 39 in 67, 0 finer (1/18). NGC ID# BYKA, PCGS# 9425

1936 Wisconsin Half, MS68 Tied for the Finest at PCGS

5520 1936 Wisconsin MS68 PCGS. CAC. Issued for the centennial of the Wisconsin territory, the design was the collaboration of University of Wisconsin student David Parsons, and New York artist Benjamin Hawkins. Various sources disagree regarding the identity of the obverse and reverse. This Superb Gem features brilliant and frosty silver luster beneath lovely gold and iridescent toning with pristine surfaces. Population: 39 in 68 (7 in 68+), 0 finer. CAC: 21 in 68, 0 finer (1/18). NGC ID# BYKU, PCGS# 9447

COMMEMORATIVE GOLD

- 5521 1903 Louisiana Purchase, Jefferson Gold Dollar MS66 PCGS. This sharp Premium Gem displays lovely, frosty luster and unabraded surfaces. A small coppery toning spot appears above the final A in LOUISIANA, but the coin is otherwise uniformly yellow-gold. Pieces grading finer are infrequently offered. From The Property of a Lady. NGC ID# BYLD, PCGS# 7443
- 5522 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 PCGS. Two gold dollar varieties, the Jefferson portrait and the McKinley portrait, were issued for the 1904 St. Louis World's Fair, known as the Louisiana Purchase Exposition. This Superb Gem is tied for the finest that PCGS has graded (1/18), exhibiting brilliant and satiny yellow-gold luster on pristine surfaces with a bold strike. NGC ID# BYLD, PCGS# 7443
- 5523 1905 Lewis and Clark Gold Dollar MS64+ NGC. A Plus-graded Choice example, from a small distribution of 10,000 pieces, this sharply detailed specimen exhibits well-preserved orange-gold surfaces, with vibrant mint luster and a few hints of rose. Eye appeal is outstanding. NGC ID# BYLG, PCGS# 7448
- 5524 1915-S Panama-Pacific Gold Dollar MS66 PCGS. Part of the extensive commemorative series issued in conjunction with the 1915 Panama-Pacific Exposition that was held in San Francisco, this Premium Gem gold dollar has brilliant light yellow luster and frosty surfaces with excellent eye appeal. PCGS has certified only 72 finer examples (1/18). NGC ID# BYLH, PCGS# 7449

- 5525 1915-S Panama-Pacific Gold Dollar MS66 NGC. The 1915-S Panama-Pacific gold dollar is easily located in MS66 condition, but the issue becomes scarce in finer grades. This delightful Premium Gem is well-detailed and impeccably preserved, with lustrous orange-gold surfaces.
 - From The Bayside Collection. NGC ID# BYLH, PCGS# 7449
- 5526 1915-S Panama-Pacific Quarter Eagle MS62 PCGS. The 1915-S Panama-Pacific quarter eagle claims a small distribution of 6,749 pieces. This attractive MS62 specimen displays vivid, wellpreserved orange-gold surfaces with vibrant mint luster and welldetailed devices., NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle, MS63 Paltry Distribution of 6,749 Coins

5527 1915-S Panama-Pacific Quarter Eagle MS63 PCGS. CAC. There are only two quarter eagle issues in the classic commemorative series. This is the first, and it claims a much smaller distribution than the later 1926 Sesquicentennial two and a half. Only 6,749 pieces were sold. This lovely Pan-Pac souvenir boasts pleasing peach-gold color and frosty mint luster. Each side exhibits fewer marks than expected, the only apparent one on Columbia's head. NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle, MS65 Well-Preserved Lustrous Surfaces

- 5528 1915-S Panama-Pacific Quarter Eagle MS65 PCGS. CAC. From a small distribution of 6,749 pieces, the 1915-S Pan-Pac quarter eagle was part of the five-coin commemorative program issued to celebrate the opening of the Panama Canal. This impressive Gem displays well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster on both sides.

 From The Property of a Lady. NGC ID# BYLP, PCGS# 7450
- 5529 1916 McKinley Gold Dollar MS66 PCGS. Delicate lilac hues are intermingled with the frosty orange-gold luster of this Premium Gem McKinley gold dollar. The strike is sharp, and no distractions are observed. The McKinley Memorial gold dollar was issued with dates 1916 and 1917. The 1916 is more plentiful by a small margin, suitable for type purposes. NGC ID# BYLK, PCGS# 7454
- 5530 1922 Grant Gold Dollar, No Star, MS64 PCGS. The 1922 Grant No Star commemorative quarter eagle claims a small distribution of 5,000 pieces. This attractive Choice example displays well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster on both sides. NGC ID# BYLN, PCGS# 7458

- 5531 1922 Grant Gold Dollar, No Star, MS64 PCGS. This near-Gem displays bright straw-gold luster and shows no distracting marks. Slight strike weakness is visible on the high point of Grant's hair and on the left side of the cabin. At PCGS, the No Star variety is slightly scarcer, both overall and in high grade, despite an identical distribution of 5,016 coins for each issue.
 - From The Property of a Lady. NGC ID# BYLN, PCGS# 7458
- 5532 1922 Grant Gold Dollar, With Star, MS64 PCGS. A frosty, attractive near-Gem With Star coin that shows a bold strike and luminous yellow-gold surfaces. A finer grade would have been achieved were it not for a few tiny marks below the MER in AMERICA. NGC ID# BYPS, PCGS# 7459
- 5533 1922 Grant Gold Dollar, With Star, MS64 NGC. This attractive Choice Mint State Grant gold dollar with its incuse star in the obverse field exhibits well-detailed design elements and satiny mint luster throughout. The pleasing orange-gold surfaces are well-preserved, with a few hints of lilac..
 - From The Bayside Collection. NGC ID# BYPS, PCGS# 7459
- 5534 1922 Grant Gold Dollar, With Star, MS65 PCGS. The popular With Star variant of this distinctive gold commemorative issue, from a small distribution of 5,016 pieces. This coin offers well-detailed design elements and lustrous orange-gold surfaces with a few hints of lilac. NGC ID# BYPS, PCGS# 7459

MODERN ISSUE

5535 1994-P P.O.W. Silver Dollar PR70 PCGS. The 1994-P P.O.W. commemorative dollar is surprisingly scarce in the ultimate grade of PR70. This technically perfect specimen exhibits fully struck, frosty design elements that contrast profoundly with the deeply reflective fields.

From The Digiovanni de Abruzzi Collection. NGC ID# 28SP, PCGS# 9691

MODERN BULLION COINS

- 5536 1989 Quarter-Ounce Gold Eagle MS70 NGC. The two grading services, NGC and PCGS, have combined to certify 228 perfect MS70 examples of this quarter-ounce gold issue. That is one perfect example for every 358 pieces that were minted. This beauty has rich lemon-yellow luster and bold design details. NGC ID# 26M5, PCGS# 9830
- 5537 1993 Quarter-Ounce Gold Eagle MS70 NGC. From a mintage of 71,864 bullion strikes, just 216 examples have been identified at NGC and PCGS as perfect pieces that have earned the MS70 grade (1/18). This pristine quarter-ounce gold piece has brilliant yellow-gold luster and exquisite design definition. NGC ID# 26M9, PCGS# 9870
- 5538 1994 Silver Eagle MS70 NGC. The price of an ounce of silver fluctuated between \$4.64 and \$5.75 in 1994, and the Philadelphia Mint produced 4.2 million bullion strike one ounce silver Eagles that year, the first issue with a mintage below 5 million pieces. From 1986 until today, only the 1996 had a lower mintage. This perfect silver Eagle is the ultimate example for the connoisseur who will appreciate its quality and beauty. The surfaces are brilliant and the design motifs are bold. NGC ID# 26JL, PCGS# 9876
- 5539 1995-W Silver Eagle PR68 Deep Cameo PCGS. This is the rarity among silver American Eagle bullion coins from a mintage of only 30,125 examples that were coined in 1995. A stunning Superb Gem Deep Cameo proof, this piece has amazing black-and-white contrast on both sides. NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle, PR69 Deep Cameo Key Proof Issue

5540 1995-W Silver Eagle PR69 Deep Cameo PCGS. A beautiful, brilliant white-on-black Deep Cameo example of this key proof Silver Eagle issue, of which only 30,125 pieces were distributed. The strike is sharp and preservation is similarly almost flawless. Considerable time can be consumed studying this piece for a flaw that prevents a PR70 Deep Cameo designation — it is as near to perfect as imaginable. NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle, PR69 Deep Cameo Only 30,125 Examples Struck

5541 1995-W Silver Eagle PR69 Deep Cameo PCGS. From a series-low mintage of 30,125 pieces, the 1995-W proof Silver Eagle is the acknowledged key to the Silver Eagle series. This spectacular PR69 example displays sharply detailed, richly frosted design elements that contrast dramatically with the deeply mirrored fields to produce a startling cameo effect. The virtually pristine brilliant surfaces add to the terrific eye appeal. NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle, PR69 Deep Cameo Low-Mintage Key

5542 1995-W Silver Eagle PR69 Deep Cameo PCGS. The 1995-W proof Silver Eagle was only issued with the Tenth Anniversary sets, which carried a prohibitively high purchase price of \$999. As a result, only 30,125 examples were sold and the issue is the key to the series today. This impressive PR69 examples exhibits deeply mirrored fields that contrast profoundly with the sharply detailed, frosty design elements. The brilliant surfaces are one tick away from technical perfection. NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle PR69 Ultra Cameo

5543 1995-W Silver Eagle PR69 Ultra Cameo NGC. Virtual perfect is offered in this lot that features a Superb Gem Ultra Cameo proof displaying glittering proof surfaces with brilliant devices and deeply mirrored fields. High grade is the norm for these carefully produced modern bullion coins, and this example just misses the ultimate PR70 grade level. NGC ID# CFWX, PCGS# 9887

1997 Silver Eagle, MS70 Perfect for an Advanced Registry Set

- 5544 1997 Silver Eagle MS70 PCGS. Registry collecting has made the Silver Eagle the single most popular series in modern American numismatics. Flawless MS70 representatives are challenging to locate and command strong premiums from dedicated specialists. This is a technically perfect, fully struck example and a prized rarity as such. NGC ID# 26JT, PCGS# 9912
- 5545 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS69 PCGS. Two sources provide different estimates for the number of quarter-ounce gold pieces that were struck from these unfinished proof dies. An estimate of approximately 6,000 examples is recorded in Edmund Moy's book on the gold and platinum Eagles, while the *Guide Book* estimates 10,000 pieces. This satiny and fully brilliant light yellow example is fully struck with exquisite surfaces. NGC ID# 26MG, PCGS# 99942
- 5546 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS69 PCGS. The existence of these coins from unfinished proof dies has been attributed to the enormous number of various sized gold Eagles produced that year. Die production at Philadelphia was taxed, and one proof die sent to West Point remained unpolished, creating these coins from unfinished dies. This pristine and virtually perfect example has fully lustrous light yellow-gold surfaces with bold design motifs. NGC ID# 26MG, PCGS# 99942
- 5547 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS69 PCGS. These unusual pieces were coined from dies intended for proofs, but without the polished surfaces that created the deeply mirrored fields on the finished coins. Their status is known as proofs were struck at West Point and bullion strikes were minted at Philadelphia. This nearly perfect example has bold design motifs and satiny yellow-gold luster. NGC ID# 26MG, PCGS# 99942
- 5548 2001 Silver Eagle, Mercanti Signature, MS70 PCGS. PCGS has certified only 89 examples of the 2001 Silver Eagle in perfect MS70 condition. Coins in Mercanti Signature holders account for just 16 of them (1/18). This piece has especially attractive luster not thickly frosted but much more luminous than the satin luster seen on many early-date Silver Eagles. The strike is sharp and neither side shows abrasions. PCGS# 530882 Base PCGS# 9954

- 5549 2002 Silver Eagle, Mercanti Signature, MS70 PCGS. PCGS has certified nearly 250 2002 Silver Eagles as MS70, although just 43 of them are housed in Mercanti Signature holders (1/18). This piece is sharp and beautifully preserved, showing frosty, shimmering mint luster. PCGS# 530883 Base PCGS# 9959
- 5550 2006-W One-Ounce Gold Eagle, 20th Anniversary, Reverse Proof, PR70 PCGS. The reverse finish proof one-ounce gold and silver American Eagles were produced only in 2006 for the 20th anniversary of the American Eagle program. This perfect yellow-gold example has lustrous and frosty fields with mirrored devices. NGC ID# CNCZ, PCGS# 89994
- 2006-W One-Ounce Gold Eagle, 20th Anniversary, Reverse Proof, PR70 PCGS. Among the distinctive issues for 2006 was the reverse proof one-ounce gold pieces with unpolished or frosted fields, and mirrored devices. This is one of 550 perfect PR70 examples that PCGS has certified (1/18). Brilliant yellow-gold surfaces host fully defined devices. NGC ID# CNCZ, PCGS#89994
- 5552 2006-W One-Ounce Gold Eagle, 20th Anniversary, Reverse Proof, PR70 PCGS. The remarkable and highly popular reverse finish proof gold and silver Eagles were only struck for one year, 2006, and examples are in strong demand, especially if they are perfect proofs such as this brilliant yellow-gold example. NGC ID# CNCZ, PCGS# 89994
- 5553 2006-W One-Ounce Gold Eagle, 20th Anniversary, Reverse Proof, PR70 PCGS. Only 10,000 of these reverse finish proof American Eagle gold coins were minted, with the recorded mintage of 9,996 coins accounting for four returned pieces. The supply was far below demand for these pieces, and prices immediately advanced. This lovely example is fully brilliant and beautiful. NGC ID# CNCZ, PCGS# 89994
- 5554 2006-W One-Ounce Gold Eagle, 20th Anniversary, Reverse Proof, PR70 PCGS. The reverse proof gold Eagle is distinctive, and ranks as the sixth greatest modern U.S. coins, according to a survey of authors Scott Schechter and Jeff Garrett. A perfect proof example, this piece has highly lustrous mint frost in the fields, surrounding brilliant devices. NGC ID# CNCZ, PCGS# 89994
- 5555 2008-W Silver Eagle, Reverse of 2007, FS-901, Burnished, Mercanti Signature, SP70 PCGS. There are numerous Signature holder combinations for the Burnished 2008-W Reverse of 2007 Silver Eagle. The Mercanti Signature holders are divided into three types: Mint Engraver Series, First Strike, and the regular Signature holder. The last is offered here, and PCGS reports only 105 examples in MS70 (1/18). This piece is frosty and pristine with sharp motifs and no toning. PCGS# 546155 Base PCGS# 396411
- 5556 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. A flawless butter-gold representative of this popular high relief bullion issue. The strike is razor-sharp, and the concave fields are immaculate. Included with the lot is the U.S. Mint presentation case, box, booklet, and certificate of authenticity. NGC ID# 26S4, PCGS# 506602
- 5557 2012-W One-Ounce Gold Eagle, First Strike, Burnished, MS70 PCGS. The West Point Mint struck only 6,118 Burnished one-ounce Gold Eagles in 2012. A number of pieces are known in perfect condition, but First Strike coins are highly sought-after among Registry Set collectors. This piece displays full detail and satiny golden luster. A small peach-colored spot appears below the PL in PLURIBUS, although it is faint. NGC ID# BNLT, PCGS# 514712 Base PCGS# 514673

COINS OF HAWAII

1847 Hawaii Cent, MS64 Brown Medcalf 2CC-2, Glossy and Needle-Sharp

- 5558 1847 Hawaii Cent MS64 Brown NGC. CAC. M. 2CC-2. Crosslet 4, 15 berries, 7x8. The most commonly seen variety among 1847 Hawaiian cents, which were commissioned by King Kamehameha III and struck by a Massachusetts firm. The legend was bungled, however, and no additional coins were manufactured. This glossy reddish-brown near-Gem displays a needle-sharp strike on each side. Void of singular mentionable marks. Census: 21 in 64 (1 in 64+) Brown, 1 finer. CAC: 18 in 64, 0 finer (1/18). NGC ID# 2C52, PCGS# 10965
- 5559 1847 Hawaii Cent MS63 Red and Brown PCGS. M. 2CC-2. Crosslet 4, 7x8 berries. A lovely olive-green and mahogany-red example. Void of marks, though we note an egg-shaped area of gray toning near the H in HAPA. Encapsulated in an old green label holder. Listed on page 424 of the 2018 Guide Book. NGC ID# 2C52, PCGS# 10966
- 5560 1883 Hawaii Ten Cents MS63 PCGS. A lovely Select Mint State example that was struck on a standard dime planchet at the San Francisco Mint on behalf of the Kingdom of Hawaii. Once Hawaii became a U.S. territory, the coins lost their legal tender status and many were melted, explaining their rarity today. This piece has a sharp strike and frosty mint luster with splashes of attractive gold toning. NGC ID# 2C54, PCGS# 10979
- 5561 1883 Hawaii Ten Cents MS64 PCGS. Struck at the San Francisco Mint on standard coinage planchets for the four denominations, the Hawaiian coinage was only produced in 1883. This lovely Choice Mint State piece has brilliant and frosty silver luster under champagne and iridescent toning. Population: 44 in 64 (1 in 64+), 38 finer (1/18). NGC ID# 2C54, PCGS# 10979

1883 Hawaii Ten Cents, MS65 Struck at San Francisco

5562 1883 Hawaii Ten Cents MS65 PCGS. CAC. Coins for the Kingdom of Hawaii were struck at the San Francisco Mint in 1883, on planchets intended for the same denominations in the Federal series. This lovely Gem exhibits brilliant and frosty silver luster with delicate peripheral gold and blue toning. Population: 22 in 65, 16 finer. CAC: 7 in 65, 12 finer (1/18). NGC ID# 2C54, PCGS# 10079

- 5563 1883 Hawaii Quarter MS66 PCGS. CAC. Frost-white, lustrous surfaces deliver a strong degree of "pop" on this CAC-approved Premium Gem. The coin's eye appeal is further enhanced by the sharp design elements. A couple of minute marks on the king's cheek are not bothersome and only appear beneath a loupe. PCGS lists 20 Superb Gems finer (1/18).

 Ex: Dallas Signature (Heritage, 12/2004), lot 8013. NGC ID# 2C58, PCGS# 10987
- 5564 1883 Hawaii Half Dollar MS62 PCGS. CAC. King Kalakaua I (1836-1891) appears on the obverse of the 1883 Hawaiian coinage. He reigned from 1874 until his death in 1891. The King's features are sharply defined on this pleasing Mint State representative that exhibits lustrous surfaces beneath gray and gold patina. NGC ID# 2C5B, PCGS# 10991
- 5565 1883 Hawaii Half Dollar MS63 PCGS. The 1883 Hawaii half dollar, struck at the San Francisco Mint for the island kingdom prior to it becoming a U.S. Territory, is generally available in Mint State, and pieces in MS63 and MS64 are popular for a series collection. This piece displays a good strike and satiny light golden luster. Only a few insignificant abrasions are observed under a loupe. From The Jamestown Collection, Part II. NGC ID# 2C5B, PCGS# 10991
- 5566 1883 Hawaii Half Dollar MS63 NGC. An attractive Mint State example of the 1883 Hawaiian half dollar, struck at the San Francisco mint. The satiny surfaces are free of any detracting abrasions, showcasing just the barest tint of light golden toning. Fully struck and attractive. Census: 43 in 63, 43 finer (1/18). NGC ID# 2C5B, PCGS# 10991
- 5567 1883 Hawaii Half Dollar MS64 PCGS. While the quarter dollar is the most often encountered Hawaiian silver coin due to hoarding, the half dollar had the highest mintage with a production of 700,000 coins. This Choice Mint State representative exhibits highly lustrous silver surfaces and light gold toning. Population: 74 in 64 (5 in 64+), 17 finer (1/18). NGC ID# 2C5B, PCGS# 10991
- 5568 1883 Hawaii Dollar AU58 PCGS. This is a sharp, brilliant near-Mint example of the 1883 Hawaii silver dollar, struck at the San Francisco Mint from dies designed by Charles Barber. A few light abrasions are present, but the most significant aspect of this coin's appearance is the semiprooflike mirroring in the fields, particularly on the reverse. NGC ID# 2TGD. PCGS# 10995

'1884' Hawaii Half Dollar, MS63 Uncertified Gould-Bressett-83, Overstrike

"1884" Kingdom of Hawaii Half Dollar Overstrike MS63 Uncertified. Gould-Bressett 83. 30.5 mm. 15.6 grams. More than 20 percent heavier than the standard weight of 12.5 grams for half dollars. Die rust on the portrait of Kalakaua and elsewhere. Struck over a coin or medal of larger size and weight, with faint outlines of the host item detected under magnification. This piece was sold with another similar piece in 2005 that was overstruck on a Columbian Expo half dollar. Probably of similar origin, and at that time it was speculated that both originated from King Farouk's massive holdings. Rich gray and blue toning covers most of each side with bright traces of original silver around the devices. Ex: Long Beach Signature (Heritage, 2/2005), lot 10786, where it realized \$2,990.

1880 Wailuku Plantation One Real Token Choice XF, Medcalf 2TE-6

5570 1880 Wailuku Plantation Token, 1 Real, XF45 PCGS. M. 2TE-6. Struck for the sugar plantation by a blacksmith, and likely used for payments to workers when Spanish-American silver was scarce. One real was equivalent to an eighth of a dollar. An evenly struck example with medium brown fields and mahogany high points. Listed on page 425 of the 2018 *Guide Book*. Population: 5 in 45, 10 finer (1/18). NGC ID# 2UBN, PCGS# 600512

1882 Haiku Plantation Token One Rial, Medcalf TE-15, MS63 Brown

5571 1882 Haiku Plantation One Rial Token MS63 Brown NGC. M. TE-15. The Haiku sugar cane plantation was located on Maui. Their tokens were superior in both design and quality to other Hawaiian plantation tokens of the era, which were mostly crude blacksmith productions. The denomination, equivalent to an eighth of a dollar, is spelled phonetically. This mahogany-brown and stone-gray example exhibits satin luster and lacks any mentionable marks. Listed on page 425 of the 2018 Guide Book. Census: 3 in 63 Brown, 2 finer (1/18). NGC ID# 2UBZ, PCGS# 600518

PHILIPPINES

5572 1903 Philippines 50 Centavos PR67 PCGS. The 1903 Fifty Centavos piece is relatively plentiful overall among proof Philippines issues, although Superb Gem examples are conditionally rare. Only a single Cameo is reported by PCGS, grading PR66 (1/18). This non-Cameo is sharp and reflective, showing virtually perfect surfaces. Splashes of aquamarine, amber, olive, and blue toning cover much of each side. NGC ID# 2C9R, PCGS# 90367

GSA DOLLARS

5573 1880/79-CC Reverse of 1878, VAM-4, GSA, MS65+ NGC. A Top 100 Variety. The popular variety that pairs a prominently overdated obverse with an obsolete Second Reverse. This well struck and lustrous Gem is brilliant save for a narrow bands of cherry-red, sea-green, and butter-gold toning along the lower reverse margin. A GSA box and certificate are included. NGC ID# AP7P, PCGS# 518922 Base PCGS# 407108

1880-CC GSA Dollar 8 Over Low 7, VAM-6 MS65 Prooflike

- 5574 1880-CC 8 Over Low 7, VAM-6, GSA, MS65 Prooflike NGC. A Top 100 Variety. The crossbar, downstroke, stem, and ears of the underdigit 7 are readily apparent. A flashy and minimally toned Gem. The fields are smooth, and the cheek shows only delicate grazes. The centers lack a full impression, usual for the '80-CC. A GSA box accompanies the lot. NGC ID# 2542, PCGS# 518858 Base PCGS# 7105
- 5575 1881-CC GSA MS66 NGC. VAM-2. Light butter-gold patina visits the reverse, while the obverse remains brilliant. A sharply struck Carson City silver dollar that boasts uncommonly unmarked surfaces.
 - From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 2547, PCGS# 518863 Base PCGS# 7126
- 5576 1882-S GSA MS66 NGC. The distribution of silver dollars through the General Services Administration in the 1970s is best remembered for vast quantities of Carson City silver dollars that became available to collectors for the first time since they were minted. Less well remembered were the small number of dollars from other mints, such as this Premium Gem 1882-S Morgan dollar that is housed in the distinctive GSA hard plastic holder. This brilliant example has sharp details, satin luster, and wispy champagne toning on the obverse. NGC ID# 254F, PCOS# 407140 Base PCGS# 7140
- 5577 1883-CC GSA MS66+ Prooflike NGC. VAM-3. A high-grade Carson City type coin with flashy fields and exceptionally smooth surfaces. The strike is good, though the centers show minor blending. A GSA box and certificate accompany the lot. Census: 2 in 66+ Prooflike, 1 in 66+★ Prooflike, 1 finer (1/18). NGC ID# 254H, PCGS# 518870 Base PCGS# 7145
- 5578 1883-CC GSA MS65 Deep Mirror Prooflike NGC. VAM-5B. Dazzling depth of field reflectivity ensures the eye appeal of this nicely struck Carson City Gem. The obverse field appears unabraded, and the cheek displays only light contact.
 From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254H, PCGS# 518871 Base PCGS# 97145
- 5579 1884-CC GSA MS66+ NGC. A gorgeous example from the GSA hoard dispersed in the early 1970s, this Premium Gem has satiny surfaces with brilliant silver luster and extremely faint gold toning. NGC ID# 254L, PCGS# 518872 Base PCGS# 7152
- 5580 1884-CC GSA MS65 Prooflike NGC. VAM-2. Close to brilliant, though a blush of silver-gray toning is noted near the IT in UNITED. Marks are relegated to the field below the second U in PLURIBUS. A GSA dollar with flashy fields and bold strike. From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254M, PCGS# 518873 Base PCGS# 7153
- 5581 1884-CC GSA MS65+ Deep Mirror Prooflike NGC. An incredible Deep Mirror Prooflike Gem, this 1884-CC Morgan dollar is fully brilliant and untoned with highly lustrous silver surfaces and exceptional aesthetic appeal. Deep Mirror Prooflike Census: 69 in 65 (2 in 65+, 1 in 65★), 11 finer (1/18). NGC ID# 254M, PCGS# 518874 Base PCGS# 97153

- 5582 1885-CC GSA MS65+ NGC. VAM-2. Blushes of light autumngold toning adorn the lower obverse and upper reverse margins. A lustrous and low-mintage Carson City Gem with minor inexactness of impression in the centers. A GSA box and certificate accompany the lot. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160
- 5583 1891-CC GSA Uncertified. This scarcer date Carson City dollar has Uncirculated details, but the reverse exhibits patches of hairlines near the tailfeathers and IN GOD WE TRUST. Brilliant and lustrous with minor field marks near the chin. The strike is incomplete on the hair above the ear. A GSA box and certificate accompany the lot.
- 5584 1891-CC GSA MS62 NGC. A lustrous and practically brilliant example of this scarcer Carson City issue. The centers display minor incompleteness, and the left obverse displays contact consistent with the MS62 level.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 255H, PCGS# 518881 Base PCGS# 7206

5585 1891-CC Spitting Eagle, VAM-3, GSA, MS62 NGC. A Top 100 Variety. VAM-3, identified by a die lump beneath the eagle's beak, is perhaps seen on a majority of '91-CC GSA dollars. The present lustrous and brilliant example has a good strike and attractive surfaces. A GSA box is included with the lot. PCGS# 544108 Base PCGS# 518881

REDFIELD DOLLARS

5586 1883-S MS62 NGC. Ex: Redfield Collection. Paramount International Coin Corporation handled a substantial portion of the LaVere Redfield Collection in the late 1970s. They had special red plastic holders prepared for marketing, and the present 1883-S dollar remains in one of those holders, now with NGC's grading label affixed to the back. This piece is fully brilliant and highly attractive with bright silver surfaces, grade-consistent marks, and attractive peripheral iridescence.

From The XSurgeon Set of Morgans NGC Registry #1. NGC ID# 254K, PCGS# 7148

1896-S Silver Dollar, MS62 Ex: LaVere Redfield

- 5587 1896-S Morgan Dollar MS65 Paramount (MS62 NGC). Ex: Redfield Collection. Encapsulated in a circa-1982 red Paramount holder. A highly lustrous silver dollar. The borders display blushes of peach-gold, powder-blue, and lilac-red patina. The fields are brilliant and well-preserved. The cheek displays moderate grazes. A much better date. NGC ID# 2564, PCGS# 7244
- 5588 1921 Peace Dollar MS65 Paramount (MS64+ NGC). Housed in a red Paramount holder without a Redfield pedigree. Pastel buttergold and ice-blue toning graces this lustrous and well-preserved near-Gem. The centers show moderate blending, usual for the issue. NGC ID# 2U4E, PCGS# 7356

CERTIFIED MODERN PROOF SETS

5589 1936 Five-Piece Proof Set PR64 to PR66 PCGS. Separately encapsulated in holders with consecutive certification numbers.

Cent Type Two — Brilliant Finish PR64 Red. A peach-gold Choice cent with moderate flecks on the left obverse field.

Nickel Type Two — Brilliant Finish PR66. A splendid ice-blue and straw-gold Premium Gem.

Dime PR64. Freckles of apple-green and tan-gold adorn the obverse field.

Quarter PR65. Lightly dappled russet and navy-blue toning visits both sides

Half dollar PR65. Mostly white save for faint gunmetal-gray patina across the right obverse field.(Total: 5 coins)

5590 1936 Five-Piece Proof Set PR62 to PR64 PCGS. The coins are separately housed in holders bearing consecutive certification numbers. The set includes:

Cent — Type Two, Brilliant Finish — PR64 Red. A lovely orange-gold Choice proof. Well struck with minimal carbon.

Nickel — Type Two, Brilliant Finish — PR64. Nicely struck and glossy with only a few pinpoint flecks.

Dime PR62. Brilliant and bold with a delicate vertical hairlines on the left obverse.

Quarter PR64. Only a hint of golden toning across glossy and undisturbed surfaces.

Half dollar PR64. A nearly untoned specimen that boasts an intricate strike.(Total: 5 coins)

1936 Proof Set, PR65-PR66 Lightly Toned and Individually Holdered

5591 1936 Five-Piece Proof Set, PR65-PR66 PCGS. The coins are individually holdered, including:

Cent — **Brilliant Finish** — **PR65 Red.** The coin is fully struck and deeply reflective, showing light copper-gold coloration with no distracting marks. An elusive issue in finer grades.

Nickel — Satin Finish — PR66. CAC. A fully struck Satin Finish proof, showing dusky olive-gold toning and exceptional surface preservation. This is the more plentiful of the two 1936 proof nickel types in high grade.

Dime PR66. CAC. Flecks of russet appear at the borders, and a hint of golden toning warms the interiors on this high-end first-year proof Mercury dime. This is the most elusive Mercury dime proof issue in high grade.

Quarter PR65. This Gem proof is deeply mirrored and fully struck, showing warm golden toning and no distracting contact marks.

Half Dollar PR66. CAC. The largest coin in the set is fully struck and beautifully preserved. Light golden toning with russet border flecks is strikingly similar to that seen on the dime is this set. (Total: 5 coins)

5592 1937 Five-Piece Proof Set, PR64-PR67 NGC. Ex: Highland Collection. The coins are housed in individual holders with consecutive certification numbers. Included are:

Cent PR64 Red and Brown. CAC. A sharp, glimmering copperorange near-Gem that displays only a faint hint of amber toning, showing what many collectors would consider to be full red surfaces.

Nickel PR67. The highest-graded coin in this set, the Buffalo nickel is sharp and virtually flawless, showing rainbow border toning and light blue interiors.

Dime PR66. CAC. This deeply mirrored Premium Gem proof is nearly brilliant but shows a faint dusting of tan-gold color in select areas. The sharpness and eye appeal are outstanding.

Quarter PR65. The devices are satiny and the fields show deep mirroring. Neither side exhibits significant toning, although the purist will notice a faint champagne tint.

Half Dollar PR65. The champagne-tinted surfaces, deep mirrors, and excellent preservation are virtually identical to the quarter dollar. The obverse has some barely perceptible cameo contrast. (Total: 5 coins)

5593 1937 Five-Piece Proof Set, PR65-PR66 PCGS. The set is housed in individual holders bearing consecutive certification numbers. The set includes:

Cent PR65 Red and Brown. Deeply reflective and void of carbon, lime and russet streaks.

Nickel PR66. Lilac and aquamarine patina adorn carbon-free, reflective surfaces on this fully struck final-year Buffalo nickel proof.

Dime PR66. This piece displays a full strike, with silver-gray and chestnut toning that will appeal to collectors looking for an old-time appearance.

Quarter PR66. Medium pearl-gray and olive coloration does not impede reflective fields on this sharp Premium Gem proof.

Half Dollar PR66. Delicate apple-green and lavender hues appear throughout this piece, while a full strike and exceptional preservation complete the eye appeal.

From The Jamestown Collection, Part II. (Total: 5 coins)

5594 1937 Five-Piece Proof Set PR63 to PR65 PCGS. Housed in separate holders bearing certification numbers from the same grading submission. The set includes:

Cent PR63 Red. Predominantly orange-red, though lime-green also abounds.

Nickel PR65. Well struck and lightly toned. Perfect aside from a tiny spot below the Indian's chin.

Dime PR65. A virtually brilliant specimen that boasts a bold strike and exemplary surfaces.

Quarter PR63. A stone-white example with minor hairlines on the left obverse.

Half dollar PR64. The snowy, glassy fields appear void of carbon and hairlines. (Total: 5 coins)

5595 1937 Five-Piece Proof Set, PR65-PR66 PCGS. The coins are individually housed in pale blue label holders. Included are:

Cent PR65 Red. This Gem proof displays deep copper-orange coloration with tinges of deeper cherry red at the borders. A lone spot is visible on the C in CENT.

Nickel PR65. Sharp and satiny on the devices with deep mirroring in the fields. This Gem proof Buffalo nickel displays mainly champagnegold toning, but faint hints of lilac are visible under a loupe.

Dime PR66. This golden-toned Premium Gem proof displays full design definition and surfaces that appear flawless to the untrained eye.

Quarter PR66. Brilliant, deeply reflective surfaces complement a sharp strike and outstanding preservation.

Half Dollar PR65. The largest coin in this set is deeply mirrored in the fields and displays a hint of cameo contrast on the obverse. Liberty's branch hand is a trifle soft.

From The Merrill Collection. (Total: 5 coins)

5596 Five-Piece 1937 Proof Set PR64 to PR66 PCGS. The coins are individually certified in holders from the same grading submission. The set includes:

Cent PR66 Red. A magnificent orange-red Premium Gem.

Nickel PR65. Beautiful iridescent honey-gold, apple-green, and lavender-red toning adorns the margins.

Dime PR66. Stone-white, well struck, and immaculate.

Quarter PR66. Brilliant and pristine with minute obverse planchet imperfections apparent when viewed beneath a loupe.

Half dollar PR64. Light straw-gold patina visits sharply struck surfaces. Pleasing for the assigned grade. (Total: 5 coins)

1936 Five-Piece Proof Set PR64 to PR66, Lightly Toned

5597 1936 Five-Piece Proof Set, PR64 to PR66 PCGS. The coins are separately housed in holders bearing consecutive certification numbers. The set includes:

Cent — Type Two, Brilliant Finish — PR64 Red. CAC. A beautiful orange-gold Choice cent with a couple of trivial flecks on each side.

Nickel — Type Two, Brilliant Finish — PR66. Pastel butter-gold toning is comprehensive across undisturbed surfaces. The strike is full except on the hair above the ear. One minute speck on the field near the mouth.

Dime PR64. CAC. Intricately impressed and satiny with light silver-gray toning across the margins. A lovely representative of the first proof date of the Mercury type.

Quarter PR65. Close to brilliant, though close examination reveals delicate straw-gold and powder-blue shades. Fully struck and unabraded with one pinpoint fleck on the portrait beneath the jaw.

Half Dollar PR65. Light and attractive caramel-gold and ice-blue patina endows glassy fields and sharply struck devices. A small spot on the sun but otherwise exemplary. The rarest date of the seven-year proof type.

From The Property of a Lady. (Total: 5 coins)

ERRORS

1943-S Cent on a Dime Planchet XF40, Off-Metal Error

5598 1943-S Lincoln Cent — Struck on a Dime Planchet — XF40 NGC. 2.4 gm. While a 1943-S cent on a bronze planchet is unaffordable for most collectors, the issue is presently available on a Type One silver dime planchet at a much more reasonable cost. This untoned off-metal error shows a soft strike across the borders, the high points of the portrait, the O in ONE, and the AME in AMERICA. The surfaces display faint hairlines but lack mentionable marks.

1959 Cent, MS62 Brown Double Struck, Rotated in Collar

1959 Lincoln Cent — Double Struck, Rotated in Collar — MS62 Brown NGC. The first strike was normal, but the coin failed to eject from the dies. Instead, it rotated about 135 degrees counter-clockwise, and was struck a second time, without an intervening planchet. Another possibility is that a newly struck 1959 cent ended up among cent planchets and was fed between dies a second time. The chocolate-brown surfaces are unmarked and show ample remnants of the initial strike. The obverse border has a concave appearance.

1998 Lincoln Cents, MS66 Red Two Planchet Bonded Pair

5600 1998 Lincoln Cents — Two Planchet Bonded Pair — MS66 Red NGC. 5.0 gm. A cent was struck normally but failed to eject. It was struck a second time, widely off center, at 1 o'clock widely off center. For that second strike, a new planchet was fed between the dies, and the strike fused the two cents together. No collar was present for the second strike, which caused a steep obverse rim and displacement of the zinc interior on the coin fed in for that strike.

1961 Franklin Half, AU Details Struck on a Silver Quarter Planchet

5601 1961 Franklin Half Dollar — Struck on a Silver Quarter Planchet, Edge Damaged — PCGS Genuine. AU Details. A satiny wrong-planchet error with unmarked fields and devices. Light tan-gold and silver-gray toning. The edge is plain, and shows tooling near 9 o'clock. The centering favors Franklin, the Liberty Bell, and the eagle, which are complete or virtually so. The date and E PLURIBUS UNUM are also fully intact, but UNITED STATES OF and IN GOD WE are entirely absent, while TRUST, LIBERTY, AMERICA, and HALF DOLLAR are partial.

Kennedy Half Dollar, MS66 Struck on a Five Cent Planchet Denver Mint, No Date

5602 Undated Denver Mint Kennedy Half Dollar — Struck on a Five Cent Planchet — MS66 NGC. 5 gm. A lustrous and pristine silver-gray wrong-planchet error. The Denver mintmark is present near the bust tip, but all peripheral legends are absent, including the date, denomination, country name, and LIBERTY. The eagle and its heraldic complements are complete, as is the portrait aside from the top of Kennedy's hair. The surfaces exhibit an "orange peel" texture due to long-in-use dies.

U.S. MINT MEDALS

5603 1836 First Steam Coinage, Mar. 23 Over Feb. 22, Julian-MT-21, MS64 Brown NGC. Julian-MT-21. Bronzed copper, 28 mm. From the original dies for MT-21, confirmed by the obverse rim die break below the cap and recutting on MAR. 23. A fully struck specimen with predominantly apple-green surfaces, though glimpses of orange-gold remain in design crevices.

From The Jamestown Collection, Part II.

5604 1836 First Steam Coinage, Mar. 23, SP65 Brown PCGS. Julian MT-21. From the original dies, with a narrow rim cud on the obverse between 6 and 7 o'clock, and evidence of the underdigit 2 near the 3 in 23. A beautiful chocolate-brown Gem with powder-blue undertones. Well-struck and undisturbed.

5605 1836 First Steam Coinage, Mar. 23 Over Feb. 22, MS66 Brown NGC. Julian-MT-21. Bronzed copper, 28 mm. The original obverse die with a rim cud between 6 and 7 o'clock. Also the original reverse die for MT-21, which shows repunching near the A and 3 in MAR. 23. A pristine chocolate-brown medal with sea-green undertones. From The Jamestown Collection, Part II.

- 5606 1836 First Steam Coinage, Mar. 23 Over Feb. 22, MS64 Red and Brown NGC. Julian-MT-21. Bronzed copper, 28 mm. The original dies for MT-21. The obverse is close to full Red, and the reverse is about 50% Red. Fully struck and void of marks. Carbon is minimal. The reverse is lightly strike doubled. From The Jamestown Collection, Part II.
- 5607 1976 Gold Bicentennial Medal PR67 Ultra Cameo NGC. Swoger-521C. 34 mm. 40.36 gm. A pristine .900 fine gold U.S. Mint medal, struck to commemorate the nation's bicentennial. The obverse and reverse were designed by Chief Engraver Frank Gasparro and staff engraver Edgar Zell Steever, respectively. This variety of the medal had a distribution of 5,383 pieces.

SO-CALLED DOLLARS

5608 1900 Lesher Dollar, A.B. Bumstead with No., Type One, AU55 ANACS. Zerbe-2, HK-788, R.3. No. 101. Likely the lowest serial number to be found on a Bumstead Lesher dollar, and possibly the first stamped for the Colorado grocer. This cream-gray example is slightly glossy but lacks consequential marks and shows little evidence of high-point wear. Listed on page 419 of the 2018 Guide Book. NGC ID# 2F6D, PCGS# 19001

1900 Lesher Dollar, Near-Mint HK-788, A.B. Bumstead First Reverse, Serial No. 564

5609 1900 Lesher Dollar, A.B. Bumstead, Type One, AU58 NGC. Zerbe-2, HK-788, R.5. Serial No. 564. Grocer A.B. Bumstead was the best customer for Lesher's "referendum souvenir" scheme. Joseph Lesher sought to boost the value of silver and "open idle mines," per the November 13, 1900 issue of the Victor Daily Record. This is a lightly circulated example with gummetal-blue and chestnut-brown patina. Mentionable marks are confined to a nick on a reverse corner at 6:30. Listed on page 419 of the 2018 Guide Book. NGC ID# 2F6D, PCGS# 19001

1901 Lesher Dollar, MS63 Boyd Park, HK-796 Rare Denver Merchant

5610 1901 Lesher Dollar, Boyd Park, MS63 NGC. Zerbe-10, HK-796, R.6. Serial No. 532. Boyd Park's jewelry store was located at 16th and Curtis in Denver. Approximately 150 pieces were issued for the merchant, and a much smaller number have survived. The present example is semiprooflike and sharply struck with exceptional eye appeal. Nearly unobtainable any finer; NGC lists one each in MS63 and MS64, and PCGS shows one in MS63 and an HK-796a in MS64. Listed on page 419 of the 2018 Guide Book. NGC ID# 26BW, PCGS# 19012

End of Session Four

SESSION FIVE

PATTERNS

1850 Cap and Rays Three Cent in Silver Judd-125, PR64

5611 1850 Three Cent Silver, Judd-125, Pollock-147, R.4, PR64 PCGS. Similar in design to the famous Judd-67 gold dollar pattern from 1836; however, the date has been moved to the obverse below the cap, and the denomination within the palm frond is expressed with a large Roman numeral III. Struck in silver with a plain edge. Just a slight hint of toning is seen over each side with significant underlying mint brilliance in evidence. Nicely mirrored for an early proof strike.

From The Jamestown Collection, Part II. NGC ID# 298G, PCGS# 11536

1850 Three Cent Silver, Struck in Silver Judd-125, Toned PR64

5612 1850 Three Cent Silver, Judd-125, Pollock-147, R.4, PR64 PCGS. CAC. Ex: Benson. A Liberty cap dominates the obverse, surrounded by rays; obviously inspired by the Mexican Cap and Rays design. LIBERTY is near the base of the cap; the date 1850 appears below. On the reverse, UNITED STATES OF AMERICA frames a circular palm branch that encloses the Roman numeral III. Struck in silver with a plain edge. Franklin Peale is credited with adapting James Longacre's designs. Subdued gray-lilac and rose toning covers each side with significant underlying reflectivity in the fields. Ex: Hollinbeck Stamp and Coin Co. (12/8/1945), lot 1334; Benson Collection, Part III (Goldberg Auctions, 2/2003), lot 1784. NGC ID# 298G, PCGS# 11536

1854 Cent in Bronze Judd-161 Original, PR64 Brown

5613 1854 One Cent, Judd-161 Original, Pollock-187, R.4 PR64 Brown PCGS. CAC. 92.28 grains. The design is similar to that of contemporary large cents except the diameter is close to a quarter dollar, there are no stars on the obverse, and the wreath is proportionately smaller. Struck in bronze with a plain edge. Deep brown patina covers each side, but when closely examined occasional thin streaks of original mint red can be seen. Problemfree overall, just a bit of softness of strike is noted on the reverse wreath. NGC ID# 29A6, PCGS# 11663

1854 Cent Pattern, Judd-161 Original PR63 Red and Brown

5614 1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR63 Red and Brown NGC. CAC. The diameter is about midway between the large and small cent. The designs are similar to the contemporary large cent but smaller in scale, and there are no obverse stars. The wreath is undersized relative to the legends. Struck in bronze with a plain edge. A fully struck specimen with a lilac-red obverse and an apricot-gold reverse. The left foot of the 1 is repunched, and the fields display bold clash marks. NGC ID# 29A6, PCGS# 11664

1854 Flying Eagle Cent in Copper Judd-163, PR62 Red and Brown

5615 1854 Flying Eagle Cent, Judd-163, Pollock-189, High R.6, PR62 Red and Brown NGC. CAC. This large cent-sized pattern features a flying eagle similar to that found on pattern 1838 half dollars. The reverse is similar to the contemporary large cent reverse, but the wreath and ONE CENT are undersized. Three minor design variations are known of this pattern, differing in the number of leaves on the reverse wreath below the E in STATES. This is the first variation with two leaves below the E. Others are known with three and four leaves. Struck in copper with a plain edge. The lettering on each side serves to protect much of the original red luster, the remainder of each side is medium brown. Softly struck in the centers. The grade is probably derived from light carbon spotting. NGC ID# 32RH, PCGS# 11675

1858 Flying Eagle Cent in Copper-Nickel Judd-206, PR62 Cameo

5616 1858 Flying Eagle Cent, Judd-206, Pollock-242, R.5, PR62 Cameo PCGS. The obverse displays a hook-necked eagle flying left with the legend UNITED STATES OF AMERICA above and the date below. The reverse is the same used to coin regular issue 1858 Flying Eagle cents. Struck in copper-nickel with a plain edge. The copper-nickel alloy is apparent from the overall brightness of the coin. The pumpkin-gold fields display extraordinary depth of mirrored reflectivity, which gives the frosted devices sharp, two-toned contrast. Each side exhibits minor carbon, but the overall appearance is much finer than the stated grade.

 \dot{Ex} : Bob Simpson Collection (Heritage, 8/2010), lot 5652, which realized \$4,312.50. PCGS# 389467 Base PCGS# 11877

1863 Two Cent Pattern in Copper or Bronze Judd-312, PR65 Brown

5617 1863 Two Cents, Judd-312, Pollock-377, R.4, PR65 Brown PCGS. CAC. The obverse is similar to the regular issue obverse of 1864, with GOD OUR TRUST on the ribbon above the shield. The reverse shows the denomination 2 CENTS sharply curved in a wreath with the legend UNITED STATES OF AMERICA around. Struck in bronze or copper with a plain edge. According to George Eckfeldt's journal these pieces were struck in late 1863. They have been found on planchets of various weights, ranging from 76 grains to 101 grains. Each side is deep chocolate-brown, but significant mirroring can still be seen in the fields. Ex: Ira S. Reed Auction (4/27/1945), lot 412, where it brought \$7.50;

Ex: Ira S. Reed Auction (4/27/1945), lot 412, where it brought \$7.50; Benson Collection, Part III (Goldberg Auctions, 2/2003), lot 1797. NGC ID# 29ER, PCGS# 60467

1864 Indian Cent With 10% Tin Alloy Judd-356, Pollock-426, MS65

5618 1864 Indian Cent, Judd-356, Pollock-426, Snow-PT1b, Low R.6, MS65 NGC. The Mint experimented with several different coinage alloys in 1864, and used the regular working dies for the cent denomination to strike the patterns. This specific piece was struck with the dies used to coin Snow-3 bronze No L business cents, but in an alloy of 90% copper and 10% tin. The 64 in the date are repunched. The portrait exhibits extensive die rust despite die lapping. The coin is unabraded and displays only trivial carbon. NGC ID# 29GN, PCGS# 60526

1864 Cent in Copper or Bronze, Thick Planchet Judd-356A, PR64 Brown

5619 1864 One Cent, Judd-356A, Pollock-427, Low R.6, PR64 Brown PCGS. Struck from regular-issue plain edge No L dies, but in copper or bronze on a thick planchet. Plain edge. Only a dozen or so examples are known and most lack any trace of original red. There is just the slight remnant of subdued mint red on the obverse. Perhaps more importantly, there is no trace of the usual yellowishtan color one normally associates with copper-nickel. Otherwise, the surfaces are deep blue-green. Fully struck in all areas.

From The Property of a Lady. NGĆ ID# 29GK, PCGS# 60525

1868 Cent, Struck in Nickel Judd-608, Pollock Variety 2, PR66 Ex: Harry W. Bass, Jr.

5620 1868 Cent, Judd-608, Pollock-673, R.4, PR66 PCGS. Ex: Bass Collection. Eagle Eye Photo Seal, card included. The design closely resembles the contemporary three cent nickel, but only a single pillar represents the denomination within the wreath, and the ribbon ends are more prominent. Struck in nickel with a plain edge. Struck from Bass Variety I and Pollock Variety 2, with the 1 in the date centered over a dentil. A sharply struck specimen bathed in light and consistent wheat-gold patina.

Ex: J.M. Wade; 1971 ANA Sale (Stack's, 8/1971), lot 311; Harry Bass, Jr.; Bass I (Bowers and Merena, 5/1999), lot 1014; Western Hills Collection (Heritage, 6/2005), lot 7404; Central States Signature (Heritage, 4/2008), lot 3158, which realized \$2,070. NGC ID#

29MZ, PCGS# 60820

1868 Cent, Struck in Nickel Judd-608, Brightly Reflective PR66

5621 1868 Cent, Judd-608, Pollock-673, R.4, PR66 PCGS. CAC. The design closely resembles the contemporary three cent nickel, but only a single pillar represents the denomination within the wreath, and the ribbon ends are more prominent. Struck in nickel with a plain edge. These pieces were issued in sets along with the five cent pieces (Judd-633 and 634). Two obverse variants are known of this pattern (although Harry Bass found a third variety). This piece is the Centered Date variety, as confirmed not only by the position of the digits in the date but also by the Y in LIBERTY which is located further from the top of the coronet than the High Date variant (which nearly touches). This is a glittering, deeply reflective example with a faint trace of patina on each side. NGC ID# 29MZ, PCGS# 60820

1869 Three Cent Nickel, PR62 Judd-676, No Ribs on Columns

1869 Three Cent Nickel, Judd-676, Pollock-753, R.4, PR62 PCGS. Similar to the contemporary three cent nickel, except the denomination pillars are smooth, and the wreath is smaller and distant from the dentils. The Pollock variant with a long lower left ribbon end. Struck in nickel with a plain edge. A satiny and unmarked cream-gray specimen. Pleasing for the grade despite one tiny spot concealed in Liberty's upper hair. NGC ID# 29PV, PCGS# 60901

1869 Standard Silver Ten Cent, Struck in Silver Judd-702, Peripherally Toned PR65+ Cameo

5623 1869 Standard Silver Ten Cents, Judd-702, Pollock-781, R.5, PR65+ Cameo PCGS. CAC. Standard Silver design with a diadem in Liberty's hair on the obverse. The reverse has an oak and laurel wreath with STANDARD SILVER above and the date below with 10 CENTS in the center. Struck in silver with a reeded edge. A sharply struck and prominently mirrored specimen. The right borders offer ocean-blue, straw-gold, and violet-red patina. The finer of two pieces certified as Cameo at PCGS, and the sole CAC example as Cameo (1/18). NGC ID# 29RF, PCGS# 524483 Base PCGS# 60927

1870 Half Dime in Copper Judd-817, PR64 Brown

5624 1870 Half Dime, Judd-817, Pollock-906, High R.6, PR64 Brown PCGS. The William Barber half dime pattern obverse, which, although somewhat ungainly (Liberty appears to have only one leg, and the Liberty pole springs up vertically with nothing holding it up), nonetheless displays considerable artistic merit. The reverse is the standard half dime die. Struck in copper with a reeded edge. About a dozen are known of these pieces, which were sold in complete sets. The surfaces are bright with variegated brown, reddish-brown, and lilac toning. NGC ID# 29UU, PCGS# 61061

1870 William Barber Half Dime in Copper Judd-817, PR64 Red and Brown

5625 1870 Half Dime, Judd-817, Pollock-906, R.6, PR64 Red and Brown PCGS. A seated figure of Liberty faces left with a globe. An unsupported liberty pole appears to impale her left (facing) arm. The reverse is the same design used to coin regular issue 1870 half dimes. Struck in copper with a reeded edge. About a dozen examples are known in copper and with a reeded edge. Silver and aluminum pieces were also struck with both a plain and reeded edge. Significant portions of original copper is seen across each side and is especially noticeable when the fields are flashed beneath a light. Sharply struck.

From The Jamestown Collection, Part II. NGC ID# 29UU, PCGS# 71061

1870 Standard Silver Quarter, Struck in Silver Judd-894, PR66

5626 1870 Standard Silver Quarter Dollar, Judd-894, Pollock-1001, R.5, PR66 PCGS. CAC. Standard Silver design with a bust of Liberty facing right on the obverse. Liberty wears a ribbon inscribed LIBERTY, the legend UNITED STATES OF AMERICA is at the periphery, the motto IN GOD WE TRUST is on a scroll below. The reverse depicts the denomination 25 CENTS and the date 1870 within a wreath of corn and cotton. The word STANDARD is at the top. Struck in silver with a reeded edge. A fully struck Premium Gem bathed in aquamarine and lilac shades, though the central reverse field is stone-white with peach-gold accents. Certified in an old green label holder. CAC: 1 in 66, 0 finer (1/18). NGC ID# 29X2, PCGS# 61138

1870 Standard Silver Quarter Judd-896, PR63 Red and Brown Unknown in Full Red

5627 1870 Standard Silver Quarter Dollar, Judd-896, Pollock-1003, Low R.7, PR63 Red and Brown PCGS. The Liberty Head obverse, with no star on the tiara. IN GOD WE TRUST is on a scroll below the portrait. On the reverse an open agricultural wreath encloses 25 CENTS, date 1870 below. STANDARD is at the upper rim. Struck in copper with a reeded edge. Judd-896 is a great rarity with Red and Brown designation, with a combined two pieces at NGC and PCGS. None are certified as Red (1/18). The present orange-gold specimen approaches full Red, although portions of the wreath exhibit apple-green high points. A freckle of toning above the G in GOD, but otherwise outstanding for the designated grade. PCGS# 71140

1759-Dated Martha Washington Dollar, MS66 Struck Circa-1999 to Test Sacagawea Alloy

5628 1759 (1999) Martha Washington Dollar, Judd-2185, Pollock-Unlisted, MS66 NGC. The Martha Washington design, previously used to test clad coinage circa 1965, was revived in 1999 to test "golden" alloys for the pending Sacagawea dollar. Struck in manganese-brass-coated copper-clad metal with a plain edge. Lustrous and sharply struck. The lime-green and lemon-gold surfaces show only a tick on Washington's jaw.

from The Julian Kaufman Collection. NGC ID# 2ANM, PCGS# 511836

GOLD DOLLARS

- 5629 1849 No L, D-1, Normal Stars, MS63 PCGS. A fully struck and coruscating apricot-gold representative of the briefly coined Open Wreath, No L subtype. Only a single obverse die lacked Longacre's initial, and the variety can be identified at first glance by the two widely repunched stars below Liberty. NGC ID# 25B7, PCGS# 521670 Base PCGS# 7501
- 5630 1849 Closed Wreath, D-5, Close Stars, MS64+ PCGS. Dannreuther-5 shows heavy numerals in the date. This high-end Choice example is sharply struck and vibrantly lustrous with frosty yellow-gold surfaces. A few faint field marks on the obverse are all that prevent Gem classification. NGC ID# 25BA, PCGS# 521672 Base PCGS# 7503

1849-C Gold Dollar, AU53 Peripheral Peach Patina

- 5631 1849-C Closed Wreath AU53 PCGS. Variety 1. Rich peach toning adorns the borders of this briefly circulated first-year Charlotte gold dollar. The open fields and high points are olive-green. Both sides are refreshingly unabraded, and the definition is sharp except on the curls near the ear. The mintage was just 11,634 pieces, which includes the undoubtedly tiny production of the 1849-C Open Wreath. NGC ID# 25BC, PCGS# 7505
- 5632 1850-C XF45 PCGS. Variety 1. Like other Charlotte gold dollar issues, the 1850-C is a low mintage rarity. Only 6,966 pieces were issued, and survivors are insufficient to meet demand from Southern specialists. This moderately worn example retains its original apricot-gold surfaces, and shows only a minor thin field mark near the nose. NGC ID# 25BG, PCGS# 7510

1851 Gold Dollar, Razor-Sharp MS66 Spectacular Type Coin

- 5633 1851 MS66 PCGS. The 1851 ranks among the most plentiful issues in the entire gold dollar series, but Premium Gems are conditionally rare. This spectacular razor-sharp dollar presents semireflective yellow-gold surfaces and a light dusting of frost over the relief elements. Only the date and denomination display a hint of softness. Practically unmarked. Population: 35 in 66 (3 in 66+), 11 finer (1/18). NGC ID# 25BK, PCGS# 7513
- 5634 1851-O MS63 NGC. CAC. Gold dollars were coined at New Orleans from 1849 through 1853, and again in 1855. The most plentiful of those six issues is the 1851-O, an ideal candidate for a New Orleans type set. This Select Mint State piece has an above average strike with brilliant yellow luster. CAC: 14 in 63, 16 finer (1/18). NGC ID# 25BN, PCGS# 7516

1853 Gold Dollar, Exquisite MS66

- 5635 1853 MS66 PCGS. Like the 1851 and 1852, this is a popular issue appropriate for type representation because of its 4 million-coin mintage and high survival rate. Premium Gems are scarce but obtainable. Finer coins are exceedingly rare. This is a lemon-gold example that radiates glowing mint luster from impeccable, fully detailed surfaces. Few marks even for this outstanding grade. PCGS reports 12 finer submissions (1/18). NGC ID# 25BU, PCGS# 7521
- 5636 1853-C AU55 NGC. Variety 1. A lovely butter-gold and seagreen Charlotte Mint dollar. Free from remotely relevant marks, and luster outlines design elements. The centers are lightly brought up, as usual for this low-mintage branch issue. NGC ID# 25BV, PCGS# 7522

1853-D Gold Dollar, Choice AU Low-Mintage Dahlonega Issue

- 5637 1853-D AU55 NGC. Variety 5-G. A lovely Choice AU buttergold Dahlonega dollar. From a meager mintage of 6,583 pieces, the present coin shows only light wear on the curls near the ear, hairbun, and shoulder. Abrasions are absent, though clash marks (as made) are noted west of the date and surrounding the point of the coronet. NGC ID# 25BW, PCGS# 7523
- 5638 1854 Type Two MS62 PCGS. The Type Two Indian Princess Head design was introduced in 1854 but short-lived. High-grade examples are widely sought-after, and this is one of only two readily collectible issues. Lightly clashed yellow-gold surfaces show a hint of softness on the upper curls, but the motifs are otherwise strong. Lustrous and minimally marked. NGC ID# 25C3, PCGS# 7531
- 5639 1855 Type Two MS61 NGC. The 1855 is one of the more plentiful Type Two gold dollars, ideal for type collections. This lowend Uncirculated coin is surprisingly well-struck with weakness only on the 8 in the date. Original honey-gold luster is satiny and shows no major abrasions despite the grade. NGC ID# 25C4, PCGS# 7532
- 5640 1856-S/S FS-501 AU53 NGC. The mintmark is lightly but widely repunched northeast. The '56-S is the only Type Two San Francisco issue, struck at a time when the other branch mints had transitioned to the Type Three design. The present briefly circulated tan-gold example has noticeable pockets of luster, and is free from any detrimental abrasions. NGC ID# 25C8, PCGS# 145703 Base PCGS# 7536

1856 Gold Dollar, MS66 Slanted 5, Just Four Coins Finer

- 5641 1856 Slanted 5 MS66 PCGS. CAC. Slanted 5 representatives are more commonly found than the scarce Upright 5 variant. Naturally, even the more available variety is decidedly rare in this high grade. Near-pristine surfaces are thickly frosted and display light peachgold coloration. This is the first year of the Type Three design that would continue through the end of the series in 1889. Population: 11 in 66 (3 in 66+), 4 finer. CAC: 6 in 66, 1 finer (1/18). NGC ID# 25CB, PCGS# 7540
- 5642 1859-S AU55 NGC. The San Francisco Mint struck only 15,000 gold dollars in 1859. About Uncirculated survivors are scarce and Mint State pieces are rare. This Choice AU coin displays bold detail and satiny honey-gold surfaces with minimal abrasions. Census: 27 in 55, 56 finer (12/17). NGC ID# 25CP, PCGS# 7554
- 5643 1861 MS64 PCGS. CAC. Struck from clashed dies, as usual, this CAC-approved near-Gem is well-detailed and frosty with attractive yellow-gold color. Only faint wisps of surface contact in the fields limit the grade. The 1861 gold dollar is available in MS64 but elusive finer. NGC ID# 25CU, PCGS# 7558
- 5644 1862 MS65 PCGS. A frosty Gem with shimmering wheat-gold luster and well-struck design elements. A few faint field marks are visible under a loupe, but the eye appeal is generally outstanding. The 1862 is an available date overall, although pieces grading finer than the present coin are scarce. NGC ID# 25CW, PCGS# 7560
- 5645 1881 MS62 Deep Prooflike NGC. The 1881 gold dollar is always in demand because of its low mintage of 7,600 pieces. This impressive MS62 example offers sharply detailed design elements and deeply reflective fields throughout. The pleasing yellow-gold surfaces are lightly marked for the grade. Census: 1 in 62 Deep Prooflike, 5 finer (1/18). NGC ID# 25DK, PCGS# 77582
- 5646 1882 MS65+ NGC. CAC. Only 5,000 gold dollars were struck in 1882, all at the Philadelphia Mint, but enough Mint State coins were set aside at the time of issue that this date is relatively available today. This is a high-end Gem example endorsed by CAC. Semiprooflike fields complement sharp, satiny devices, and only a few tiny surface grazes limit the grade. The coloration is deep orange-gold in the centers, lightening to yellow-gold at the borders. NGC ID# 25DL, PCGS# 7583
- 5647 1888 MS66 NGC. CAC. The strike on this CAC-approved Premium Gem is impressively sharp, with no die lapping or clash marks evident. Under magnification, a few wispy peripheral die cracks are visible on the reverse outside of the wreath. CAC coins are scarce in MS66 and finer grades. CAC: 24 in 66, 26 finer (12/17). NGC ID# 25DT, PCGS# 7589
- 5648 1888 MS66 PCGS. CAC. Late-date gold dollars are always popular, pairing low mintages with high survival rates to make them fairly accessible. Scintillating orange-gold surfaces present a noticeable lack of marks. Device detail is bold, especially on the reverse. Eminently appealing, hence the CAC endorsement. NGC ID# 25DT, PCGS# 7589
- 5649 1889 MS66 PCGS. Apple-green and orange-gold shades intermingle throughout this lustrous and intricately struck Premium Gem. A loupe reveals only delicate grazes. As is the case with all business strike final-year gold dollars, the lower portion of the wreath is die doubled south. NGC ID# 25DU, PCGS# 7590

5650 1889 MS66+ PCGS. CAC. This high-end Premium Gem displays shimmering wheat-gold luster with hints of peach and lilac. The strike is bold, and there are no distracting abrasions. Representing the final year of issue for the gold dollar series, this CAC-endorsed coin is an ideal type representative. NGC ID# 25DU, PCGS# 7590

1889 Gold Dollar, MS67+ Scintillating Mint Frost

5651 1889 MS67+ PCGS. CAC. High-grade final-year gold dollars are always in-demand. This immaculate Superb Gem approaches the finest known examples, of which there are 10 at PCGS (1/18). Each side offers full strike detail and scintillating mint frost over warm yellow-gold surfaces. An excellent coin to represent the type. NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

- 5652 1834 AU53 PCGS. Breen-6140, Variety 4, R.3. Variety 4 is easily attributed by a missing diagonal on the M in AMERICA. Stars 2 and 11 are clearly repunched. This caramel-gold first-year Classic two-and-a-half has a consistent strike and luminous, lightly marked surfaces. NGC ID# 25FS, PCGS# 7692
- 5653 1834 AU55 NGC. Breen-6138, Variety 1, R.1. The Small Head, first of the Classic Head varieties. Design recesses display rich and original peach patina, while the open fields and high points are lighter green-gold. Marks are few and inconsequential. NGC ID# 25FS, PCGS# 7692
- 5654 1834 AU58 NGC. Breen-6140, Variety 4, R.3. Several stars are repunched, especially star 2. The right diagonal is absent on the M in AMERICA. A solidly struck Borderline Uncirculated example with pockets of luster throughout the devices and borders. The butter-gold surfaces are without any mentionable marks. NGC ID# 25FS, PCGS# 7692
- 5655 1834 AU58 NGC. Breen-6140, Variety 2, R.3. A well-struck and partly lustrous first-year Classic two and a half. The straw-gold surfaces are practically unabraded but display small strike-throughs on the upper reverse field. The "Wide AM" variety, named after the gap between those two letters in AMERICA. The reverse die was later used on 1835 Variety 6, 1836 Variety 9, and 1836 Variety 12. NGC ID# 25FS, PCGS# 7692
- 5656 1834 Improperly Cleaned NGC Details. Unc. Breen-6134, Variety 1, R.1. Small Head. This unworn Classic Head type coin displays sharp central definition, where this type is usually weak to some degree. Although cleaned in the past, this piece remains visually pleasing with medium yellow-gold patina and light surface chatter. NGC ID# 25FS, PCGS# 7692
- 5657 1835 AU55 PCGS. Breen-6141, Variety 6, R.2. Wide AM. The I in LIBERTY is repunched. This partially lustrous Choice AU Classic Head type coin displays sharp peripheral details with slight softness on the central hair curls and shield. The surfaces are moderately abraded but the reverse fields are semiprooflike and appealing. NGC ID# 25FT, PCGS# 7693

- 5658 1836 Script 8 AU58 PCGS. Breen-6143, Variety 13, R.4. Significantly scarcer than the usual Variety 11, the present die marriage is interesting for its double berry on the olive branch. The T in UNITED is entered much higher than nearby letters. This near-Mint lemon-gold representative is smooth besides a few moderate marks near the chin.

 Ex: San Francisco Signature (Heritage, 3/2014), lot 10538, which realized \$2,350. NGC ID# 25FU, PCGS# 7694
- 5659 1836 Script 8 AU58 NGC. Breen-6143, Variety 11, R.2. A lovely type representative that boasts original apricot-gold color and relatively few abrasions. The centers exhibit moderate incompleteness, but the remainder of the strike is sharp. A radial die crack through star 6 is characteristic of Variety 11. NGC ID# 25FU, PCGS# 7694
- 5660 1836 Block 8 AU58 NGC. Breen-6144, Variety 15, R.2. A lovely orange-gold representative. The strike is good despite blending on the curls characteristic of the variety. Free from any noticeable abrasions. An impressive Borderline Uncirculated Classic type coin. NGC ID# 25FU, PCGS# 97694
- 5661 1839-O Altered Surfaces PCGS Genuine. AU Details. Breen-6153, Variety 28, R.4. The Low Date, Close Fraction variety. The Close Fraction is scarcer than its Wide Fraction counterpart. The first New Orleans quarter eagle issue, the sole O-mint Classic issue of the series, and very scarce due to a mintage of just 17,781 pieces. This olive-gold example exhibits ample bright luster, but the fields and high points have a microgranular appearance.

LIBERTY QUARTER EAGLES

- 5662 1843-C Large Date, Plain 4 Scratch PCGS Genuine. XF Details. Variety 1. No scratches are apparent to the unaided eye, but a lens shows patches of hairlines near the chin and above the eagle. A green-gold example of this scarce Charlotte issue. The strike is good for the facility despite blending on the eagle's legs.
- 5663 1843-C Small Date, Crosslet 4 Tooled PCGS Genuine. AU Details. Variety 1. Cracked left of the date. Regarded as the rarest Charlotte quarter eagle issue, the 1843-C Small Date has a reported mintage of just 2,988 pieces and an estimated survival of fewer than 100 coins in all grades. This well-defined and moderately hairlined olive-gold example shows coarse tooling near the denomination, fletchings, and left (facing) wing but is more appealing on the obverse.
- 5664 1843-D Small D XF45 PCGS. Variety 4-H. Sharply defined for its Choice XF grade, this inoffensively abraded Dahlonega quarter eagle displays rich golden-russet toning in design recesses, a "look" associated with original surfaces. This larger-mintage Dahlonega quarter eagle would be ideal for a type candidate. From The Bayside Collection. NGC ID# 25GP, PCGS# 7730
- 5665 1845-D Scratches NGC Details. AU. Variety 6-J. The reverse shows some prominent scratches in the field above the eagle, while the reverse exhibits hairlines under magnification. Detail is sharp with little wear present. This yellow-gold 1845-D quarter eagle is a still-pleasing date representative of this popular Dahlonega issue. NGC ID# 25GX, PCGS# 7738

1847-C Quarter Eagle, AU55 Pleasing Olive-Gold Coin

5666 1847-C AU55 NGC. Variety 1. Only 23,226 quarter eagles were struck in Charlotte in 1847 — an amount that, while small, still places it among the most plentiful of the 1840s. This Choice AU coin maintains partial luster and is finer than the average certified example, which is apt to be four or five grade points lower. The obverse shows a few ticks under a loupe, more so than the reverse. Coloration is a pleasing olive-gold.

Ex: Long Beach Signature (Heritage, 5-6/2012), lot 4787. From The Bayside Collection. NGC ID# 25H6, PCGS# 7745

1847-D Two and a Half, AU55 Low-Mintage Dahlonega Issue

5667 1847-D AU55 NGC. Variety 9-N. Only 15,784 quarter eagles were coined at Dahlonega in 1847, and survivors are scarce in all grades. This olive-green representative has an unblemished appearance, and retains glimpses of dirt in the recesses of the design, a look favored by specialists of the series. The strike is above average for the distant branch facility.

From The Bayside Collection. NGC ID# 25H7, PCGS# 7746

1849-C Two and a Half Only 10,220 Coins Struck, Choice XF

5668 1849-C XF45 PCGS. Variety 1. A single set of dies was responsible for the production of 10,220 quarter eagles at the Charlotte Mint in 1849. Gold Rush deposits only began to influence quarter eagle output in 1850, so all three issues from this year have small totals, but the 1849-C has the lowest one of all. The coin is well-defined for an XF survivor, especially one from this facility. A warm orange-gold hue provides color. Lightly abraded. NGC ID# 7HRT, PCGS# 7753

1851-C Two and a Half, Choice AU Challenging Charlotte Issue

5669 1851-C AU55 NGC. Variety 1. A lightly circulated Choice AU example with minimal wear and only trivial marks. The straw-gold surfaces are mildly luminous. The lower-obverse field shows mintmade strike-throughs, as often encountered on this low-mintage issue. A rare Charlotte quarter eagle that is highly desirable at this grade level. Census: 17 in 55, 33 finer (1/18).

Ex: Cincinnati Central States (Heritage, 5/2009), lot 3626, which realized \$2,990. NGC ID# 25HM, PCGS# 7760

1851-D Quarter Eagle, AU55 Very Scarce in All Grades

5670 1851-D AU55 NGC. Variety 15-N. From a mintage of 11,264 coins, the lowest production of any 1851 quarter eagle, it is believed that perhaps 100 to 125 representatives of this very scarce issue are extant. The star centers are fully delineated, and dentilation is complete. Lightly worn central motifs are characteristically soft. Each side exhibits bright straw-gold color. Hints of luster remain. From The Bayside Collection. NGC ID# 25HN, PCGS# 7761

1851-O Two and a Half, MS61 Very Scarce in Mint State

5671 1851-O MS61 NGC. Variety 1. The date was initially entered too far left and with a downward slant. Traces of the initial date impression are evident southwest of the digits. Although the mintage was much lower than its Philadelphia counterpart, the 1851-O is available by New Orleans standards, and the present lightly marked peach-gold example is a worthy representative of the facility. Census: 21 in 61, 15 finer (1/18). NGC ID# 25HP, PCGS# 7762

5672 1852 MS64 NGC. This attractive Choice Liberty quarter eagle exhibits sharply detailed design elements and well-preserved peachgold surfaces, with vibrant satiny mint luster throughout. Census: 59 in 64 (1 in 64+, 1 in 64★), 7 finer (1/18).

From The Douglas Knight Collection, Part II. NGC ID# 25HR, PCGS# 7763

- 5673 1856-C Cleaned PCGS Genuine. XF Details. Variety 1. The 1856-C quarter eagle is a better date among Charlotte issues, coming from a mintage of 7,913 pieces with a surviving population estimated between 95 and 125 coins (Doug Winter, 2008). The surfaces of this piece are unnaturally bright due to a thorough cleaning, but no major abrasions are seen. The central devices are weakly struck, as normal for the issue.
- 5674 1858-C Reverse Graffiti NGC Details. AU. Variety 1. A proud former owner engraved a fancy letter M in the upper reverse field, below the E in STATES. Otherwise, this rare Charlotte Mint quarter eagle is an appealing example with attractive caramel-gold surfaces.

From The Douglas Knight Collection, Part II.

- 5675 1859 New Reverse, Type Two, MS60 NGC. The arrowheads are narrow and separated on the Type Two reverse, among other, less obvious differences. This variety is scarce in Mint State. Only light abrasions are seen on the present piece, and the design elements are sharp. Original straw-gold luster illuminates the fields. NGC ID# 25JĹ, PCGS# 7788
- 5676 1859-S AU53 PCGS. The 1859-S Liberty quarter eagle claims a small mintage of 15,200 pieces and high-grade specimens are seldom encountered today. This attractive AU53 example shows some light wear on the well-detailed design elements and the pleasing orange-gold surfaces are lustrous and lightly abraded. Population: 7 in 53, 35 finer (1/18). NGC ID# 25JN, PCGS# 7790

1860 Two and a Half, MS63 **CAC-Approved New Reverse**

- 5677 1860 New Reverse, Type Two, MS63 PCGS. CAC. Softly frosted luster on this Select example displays original yellow and wheat-gold hues with light, scattered abrasions as the grade allows. The strike is impressively sharp, boosting the eye appeal. The New Reverse is the more plentiful of the two 1860 quarter eagle types, although Mint State examples are conditionally elusive, and CACapproved coins in this condition are extremely rare. From The Bayside Collection. NGC ID# 25JS, PCGS# 7791
- 5678 1860-C Graffiti PCGS Genuine. XF Details. Variety 1. A yellow-gold representative of this final Charlotte Mint quarter eagle issue. An X is pinscratched on the upper reverse field, above the eagle's right (facing) shoulder. The reverse field also exhibits a number of strike-throughs, as coined. The obverse field near the profile appears tooled.

1860-C Quarter Eagle, AU50 Final North Carolina Issue

5679 1860-C AU50 PCGS. Variety 1. This minimally abraded strawgold example has glimmers of luster and the usual soft impression in the centers. Several shallow strike-throughs in the fields are present, typical for this rare date. The final Charlotte Mint quarter eagle issue, which had a meager mintage of 7,469 pieces. Ex: Summer FUN Signature (Heritage, 7/2009), lot 1324; Central States Signature (Heritage, 4/2012), lot 6388

From The Bayside Collection. NGC ID# 25JT, PCGS# 7792

1861 New Reverse, Type Two, MS64+ PCGS. The 1861 Liberty quarter eagle with the New Reverse (smaller arrowheads) is easier to locate than its Old Reverse counterpart. This Plusgraded Choice specimen exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 25JX, PCGS# 7794

1862 Quarter Eagle, MS61 Scarce in All Grades

- 5681 1862 MS61 PCGS. From the year specie payments were halted, the 1862 quarter eagle is rare in high grades. Any mint condition example is a prize. Incompleteness is limited to the central hair strands and left leg feathers on this otherwise well-struck coin. Light orange-gold surfaces display moderate abrasions. Population: 11 in 61, 29 finer (1/18). NGC ID# 25JZ, PCGS# 7796
- 5682 1866-S AU53 NGC. From a small mintage of 38,900 pieces, the 1866-S Liberty quarter eagle is an elusive issue in high grade. This lightly worn example exhibits minimally abraded orange-gold surfaces. Census: 22 in 53, 62 finer (1/18). NGC ID# 25K8, PCGS#
- 5683 1878 MS64+ PCGS. CAC. The eagle's left (facing) leg is slightly soft, but this high-end near-Gem is otherwise well-struck. Luminous, softly frosted luster adorns each side, and Liberty's cheek is attractively free of major abrasions. Available in this grade, the 1878 quarter eagle becomes scarce at the Gem level. NGC ID# 25KY, PCGS# 7828
- 5684 1878-S MS63 PCGS. The 1878-S Liberty quarter eagle is very scarce in MS63 condition, and finer coins are rare. This attractive Select specimen is well-detailed and lightly marked, with lustrous yellow and rose-gold surfaces. Population: 44 in 63, 22 finer (12/17). NGC ID# 25KZ, PCGS# 7829
- 5685 1878-S MS63 PCGS. CAC. An attractive Select specimen of this popular issue, with razor-sharp definition on all design elements and pleasing orange-gold surfaces that are lightly marked for the grade. Vibrant mint luster adds to the outstanding eye appeal. Population: 44 in 63, 22 finer. CAC: 10 in 63, 8 finer (1/18). NGC ID# 25KZ, PCGS# 7829

- 5686 1879 MS64+ PCGS. Gold production was relatively high at the Philadelphia Mint in 1879, though quarter eagles were struck to a lesser extent than the higher denominations (88,960 pieces). This high-end lemon-gold representative displays a full strike and coruscating mint luster. Lovely eye appeal. NGC ID# 25L2, PCGS# 7830
- 5687 1881 Filed Rims PCGS Genuine. AU Details. The 1881 has a tiny commercial mintage of 640 pieces, and survivors are desirable in all grades. The present apricot-gold example has a hairlined obverse and displays subtle rim filing between 5 and 7 o'clock. The reverse appears both original and attractive.
- 5688 1893 MS65 PCGS. CAC. Frosty wheat-gold luster is original, and this Gem 1893 quarter eagle is also sharply struck and free of bothersome surface faults. Only 30,000 examples were struck. Although low-grade Uncirculated pieces are plentiful, Gems are scarce, and finer pieces are borderline rare. Population: 52 in 65, 36 finer. CAC: 12 in 65, 14 finer (1/18). NGC ID# 25LH, PCGS# 7845

1899 Quarter Eagle, MS66+ Radiant, Mark-Free Type Coin

- 5689 1899 MS66+ PCGS. CAC. The Mint struck 27,200 quarter eagles in 1899. This 19th century issue is popular for type purposes. Radiant yellow-gold surfaces glimmer with frosty mint luster and show faint coppery hues above Liberty's head. The motifs are completely brought-up. We can find no marks that merit attention. Population: 31 in 66 (6 in 66+), 9 finer. CAC: 12 in 66, 4 finer (1/18). NGC ID# 25LP, PCGS# 7851
- 5690 1900 MS65 PCGS. CAC. A Gem example of the 1900 quarter eagle with frosty luster and bold motifs. This scarce issue had a mintage of 67,000 coins and falls at the tail end of a decades-long run of low-mintage quarter eagles. A little imagination reveals a hint of green on the brilliant yellow-gold surfaces.

 Ex: Houston Signature (Heritage, 12/2013), lot 4920. NGC ID# 25LR, PCGS# 7852
- 5691 1904 MS62 Prooflike NGC. NGC has graded barely more than 4,700 1904 quarter eagles, but only 22 feature Prooflike contrast. Both sides showcase profoundly reflective fields and deep orange-gold color. A hint of frost appears over razor-sharp design elements. Wispy lines are unimportant. Census: 7 in 62 (1 in 62+) Prooflike, 8 finer (1/18). NGC ID# 25LV, PCGS# 77856
- 5692 1905 MS66 PCGS. The 1905 Liberty quarter eagle is a popular type issue, from a mintage of 217,800 pieces. This delightful Premium Gem exhibits sharply detailed design elements and virtually flawless orange-gold surfaces with vibrant mint luster on both sides. NGC ID# 267S, PCGS# 7857
- 5693 1906 MS66+ PCGS. A sharp, frosty Liberty Head type coin with wheat-gold cartwheel luster and no distracting abrasions. The surface quality is just a breath away from a Superb Gem designation. The 1906 is plentiful in this grade but conditionally elusive finer. NGC ID# 7JW8, PCGS# 7858

INDIAN QUARTER EAGLES

1908 Indian Quarter Eagle, MS65+ First of the Design

- 5694 1908 MS65+ PCGS. CAC. Bela Lyon Pratt's unique sunken Indian Head design was introduced to mixed reviews in 1908, appearing on quarter eagles and half eagles. Sometimes incorrectly called an incuse design, the actual motif is in raised relief, but sunken below the level of the surrounding field. This Gem is an exquisite representative of that design, featuring brilliant and frosty yellow-gold luster with pristine surfaces. NGC ID# 288Y, PCGS# 7939
- 5695 1909 MS64 PCGS. The 1909 Indian quarter eagle claims a substantial mintage of 441,700 pieces, making it an available issue and a popular type coin. This sharply detailed Choice example offers well-preserved orange-gold surfaces with vibrant mint luster and terrific eye appeal. NGC ID# 288Z, PCGS# 7940
- 5696 1909 MS64 PCGS. In the context of the series, the 1909 Indian quarter eagle is a better date in high grade. This attractive Choice specimen offers sharp definition on all design elements and the lustrous orange-gold surfaces are free of significant imperfections. NGC ID# 288Z, PCGS# 7940
- 5697 1909 MS64+ NGC. A Plus-graded Choice example of this popular Indian quarter eagle, with sharply detailed design elements and lustrous orange-gold surfaces that show only a few minor contact marks on both sides. Overall eye appeal is outstanding. NGC ID# 288Z, PCGS# 7940
- 5698 1911-D Strong D Cleaned PCGS Genuine. XF Details. Champion of the Indian two-and-a-half series, the 1911-D is known for its low mintage and scarcity. The present piece is slightly glossy from a cleaning but shows only slight wear on the Indian's cheek and the eagle's shoulder.
- 5699 1911-D Improperly Cleaned NGC Details. AU. The sun-gold example is somewhat bright from a wipe, but marks are surprisingly few. The Indian's cheek shows slight wear. Key to the collectible Indian quarter eagle series, the low mintage 1911-D is pursued in all grades. NGC ID# 7KR7, PCGS# 7943
- 5700 1911-D Strong D Cleaned PCGS Genuine. AU Details. The caramel-gold surfaces are somewhat bright, but lack abrasions and show scant evidence of circulation. Long regarded as the key to its series, the 1911-D has less than one-fourth the mintage of the 1914, its closest competitor.

1911-D Quarter Eagle, AU55 Strong D Mintmark

5701 1911-D AU55 PCGS. Strong D. The 1911-D takes the top spot among all dates in the series. Not only does it claim the lowest production for any issue, but it is also difficult to find with a boldly defined mintmark, as on the present coin. A touch of friction over the portrait and eagle's shoulder is minimal. Overall, the impression is strong. Yellow-gold surfaces show few distractions of note. NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half Dollar Reddish-Gold AU55

5702 1911-D AU55 NGC. This well-detailed Denver key date displays deep reddish-gold color and suggestions of original satin mint luster. Minor wispy abrasions appear on each side, but marks are largely inconsequential. Most importantly, the mintmark is clear. With only 55,680 coins minted, the 1911-D has long held and will continue to hold its position as the unchallenged key to the series. NGC ID# 7KR7, PCGS# 7943

1911-D Strong D Quarter Eagle, Choice AU Beautiful Lavender Accents

5703 1911-D AU55 PCGS. Strong D. Lavender accents over orange-gold surfaces are perhaps this key date's greatest asset. The resulting eye appeal is terrific. Minor rub explains the Choice AU grade, but design detail remains strong on the headdress and eagle's feathers. The mintmark is bold. An identifying pinscratch appears in the field above the Indian's head. NGC ID# 7KR7, PCGS# 7943

5704 1914 MS63 PCGS. An impressive Select specimen of this popular issue, from a mintage of 240,000 pieces. This coin offers vivid orange-gold surfaces, with vibrant mint luster and only minor signs of contact. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 7KRA, PCGS# 7946

- 5705 1914 MS63 PCGS. The 1914 Indian quarter eagle is a better date in the series. This attractive Select example exhibits sharply detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster and excellent eye appeal. NGC ID# 7KRA, PCGS# 7946
- 5706 1914-D MS64 PCGS. CAC. A thin die crack runs through the mintmark on this CAC-endorsed Choice example. Frosty yellow-gold luster shows only a few light field grazes and illuminates sharp design elements. Just one grade point finer, the 1914-D quarter eagle is a major series condition rarity. PCGS has certified only 52 coins above the current level, including possible resubmissions (1/18). NGC ID# 2899, PCGS# 7947
- 5707 1926 MS65 NGC. The population declines dramatically in higher grades, but the 1926 is collectible through Gem condition. Rich orange-gold color and softly frosted mint luster blend over well-preserved surfaces. The headdress and eagle are boldly struck. NGC reports 23 finer submissions (1/18). NGC ID# 7KRE, PCGS# 7950
- 5708 1927 MS65 PCGS. With a mintage of 388,000 pieces, the 1927 Indian quarter eagle can be located in MS65 condition with a little patience, but finer coins are conditionally rare. This sharply detailed Gem exhibits well-preserved orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. PCGS has graded 22 numerically finer examples (1/18). NGC ID# BUTL, PCGS# 7951

THREE DOLLAR GOLD PIECES

5709 1854 — Altered Surfaces — PCGS Genuine. Unc Details. The surfaces are buffed to an almost mark-free, satiny sheen that prevents a numeric grade but is not all that unappealing in reality — the look is similar to burnished gold eagles of the modern era. The strike is razor-sharp, and there are no distracting abrasions or signs of wear. Suitable as a first-year type coin.

1854-O Gold Three Dollar, Choice XF Reflective Fields, Lapped Die State

- 5710 1854-O XF45 PCGS. Variety 2. There is only one die pair known for the 1854-O three dollar gold piece, from which 24,000 coins were struck. However, two distinctive die states are known and are designated Variety 1 and Variety 2. This later state shows heavy die lapping on both sides. The coin offered here is well-struck and straw-gold in color with hints of field reflectivity persisting despite light wear. Housed in a green label holder and high-end for the grade. NGC ID# 25M5, PCGS# 7971
- 5711 1854-O Repaired PCGS Genuine. AU Details. Variety 1. The 1854-O is the sole New Orleans issue of the series, and is much scarcer than its Philadelphia cousin. This scarce early die state shows full detail on the ribbon loops. As a former jewelry piece it has been polished, and is repaired near 3 and 9 o'clock on the reverse.
- 5712 1855-S Fine 15 NGC. An underappreciated issue, the 1855-S was produced only to the extent of 6,600 business strikes. Most of them instantly entered circulation in the hardscrabble American West of the era, which was starved for regulated and proportioned coinage. Despite extensive wear, this mustard-gold exemplar offers solid eye appeal.

Ex: Central States Signature (Heritage, 4/2006), lot 2563; FUN Signature (Heritage, 1/2008), lot 3985. NGC ID# 7K5D, PCGS# 7973

5713 1856-S AU50 PCGS. Medium S. The 1856-S — like the other San Francisco issues in the three dollar gold series — is rare in Mint State and highly collectible in AU condition. This piece displays hints of luster in the protected portions of the fields, and only light wear is seen over the high points of the design. Some light surface chatter is not distracting. NGC ID# 25M9, PCGS# 7975

1856-S Three Dollar, Unc Details Early San Francisco Issue

- 5714 1856-S Altered Surfaces PCGS Genuine. Unc Details. Medium S. A scarce wedge-shaped die break appears in the dentils at 2 o'clock on the reverse. From a mintage of 34,500 coins, the 1856-S three dollar is rare in Mint State. Unnatural copper-orange spotting on each side results in a Details assessment. Still, this early San Francisco representative is appealing with bold design elements and few obvious abrasions.
- 5715 1857-S XF45 PCGS. One of the few branch mint issues in the three dollar gold series. This Choice XF 1857-S displays medium yellow-gold surfaces and bold detail. Light handling marks and high-point wear are not obtrusive. Population: 34 in 45, 60 finer (1/18). NGC ID# 7K5H, PCGS# 7977
- 5716 1862 Tooled PCGS Genuine. AU Details. Struck during the Civil War, the 1862 has a low mintage of 5,750 pieces, and was not saved in hoards unlike certain later dates. This lightly circulated peach-gold example has a small area of tooling on the field near the bust tip, and the reverse field exhibits minor scuffs near 4 o'clock and above the RS in DOLLARS.
- 5717 1866 XF45 NGC. Greenish-gold centers are flanked by wheat-gold patina. This well-defined Choice XF specimen shows distributed minute marks that do not unduly detract. From a mintage of 4,000 pieces, the 1866 three dollar gold piece is rare in high grade. NGC ID# 25MM, PCGS# 7987
- 5718 1866 AU55 PCGS. Only 4,000 three dollar gold pieces were struck in 1866, all at Philadelphia. About Uncirculated survivors are scarce, and Mint State coins are rare. This Choice AU representative displays bold detail and original honey-gold coloration. Hints of field reflectivity remain in the most protected regions. NGC ID# 25MM, PCGS# 7987
- 5719 1869 AU58 NGC. It has been six months since we last offered an example of the 1869 three dollar gold piece a testament to the low-mintage issue's scarcity (only 2,500 coins struck). Semiprooflike yellow-gold surfaces exhibit distinct reflectivity in the fields. Friction is nearly unseen over well-detailed relief elements. NGC reports 28 finer submissions (1/18). NGC ID# 25MR, PCGS# 7990
- 5720 1870 Cleaning PCGS Genuine. AU Details. A moderately hairlined and mildly glossy representative. The green-gold surfaces display light wear and a few hair-thin marks near the date and denomination. Only 3,500 pieces were produced.
- 5721 1870 Improperly Cleaned NGC Details. AU. The 1870 has a meager mintage of 3,500 pieces, and most survivors are lightly circulated. This richly detailed and unmarked representative exhibits somewhat glossy almond-gold surfaces. The reverse shows a small spot near 12 o'clock.

5722 1871 AU53 PCGS. The 1871 three dollar gold piece claims a minuscule mintage of 1,300 pieces. Some light wear shows on the design elements of this attractive AU53 specimen, but the lightly abraded surfaces retain much original mint luster, with traces of prooflike reflectivity in sheltered areas. NGC ID# 25MU, PCGS# 7993

1872 Three Dollar, AU58 Only 2,000 Circulation Strikes Produced

- 5723 1872 AU58 PCGS. The 1872 three dollar has a survival rate of about 10% to 15%. If that seems high, consider that these coins did not circulate and were often acquired as gifts specifically for preservation. This near-Mint example was clearly well taken care of. A trace of friction appears over well-struck devices, and the reflective fields show a number of small marks. The appeal and prooflike contrast are undeniable. NGC ID# 25MV, PCGS# 7994
- 5724 1878 AU58 PCGS. This is a lovely near-Mint example of one of the most popular type coins in the series, showing shimmering field luster with only slight friction over the central devices. The wreath bow is weakly struck, and this affects the sharpness of the upper portion of the headdress. A couple of small marks are noted to the right of the U in UNITED and left of the 3 on the reverse. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar, MS63 Perfectly Suited to Represent the Type

- 5725 1878 MS63 PCGS. A couple of minute copper-orange alloy spots complement glimmering peach-gold surfaces. Thin grazes and ticks define the grade but are, in practice, minimally detracting. Each side is well-struck, limiting softness to the wreath bow and date. This three dollar gold piece is perfectly suited to represent the type. NGC ID# 25MZ, PCGS# 8000
- 5726 1882 Repunched Date, FS-301 Reverse Scratched NGC Details. AU. The 1882 has a tiny commercial mintage of 1,500 pieces. All examples seen are FS-301, which shows the final 2 in the date lightly (but widely) repunched north. This is a sharp sungold coin with ample remaining luster and a couple of thin test marks above the S in DOLLARS.
 - From The Douglas Knight Collection, Part II.
- 5727 1888 AU55 NGC. UNITED is die doubled, as seen on all commercial strikes of the date. A briefly circulated canary-gold example with substantial semiprooflike luster and no noticeable marks. The mintage was just 5,000 pieces, though much of the production was contemporaneously saved. NGC ID# 25NB, PCGS# 8010

1888 Three Dollar, MS63 Lovely Low-Mintage Type Coin

5728 1888 MS63 NGC. A coruscating peach-gold representative. Both sides are refreshingly clean without detrimental abrasions. UNITED is strongly die doubled, as seen on all examples of this low-mintage (5,000 pieces) business issue. Like several other late dates in the series, the 1888 was set aside in quantity by numismatists. Nonetheless, those coins remain in demand from both type collectors and series specialists. NGC ID# 25NB, PCGS# 8010

EARLY HALF EAGLES

1802/1 BD-2 Five Dollar, VG10

5729 1802/1 BD-2, High R.4, VG10 PCGS. CAC. Bass-Dannreuther Die State c/c with a cud over the F in OF. Rich peach-gold toning deepens near the borders of this circulated Heraldic Eagle five. The wings and portrait exhibit substantial wear, but the date and other peripheral legends are bold, and there are no mentionable marks. Presently the only VG10 1802/1 half eagle with a CAC seal (1/18).

From The Bayside Collection. PCGS# 519885 Base PCGS# 8083

1803/2 Half Eagle, BD-1, VF35 Good Remaining Detail, Elusive Overdate

5730 1803/2 BD-1, R.4, VF35 NGC. Bass-Dannreuther Die State a/b, without a crack through the O in OF. The T in LIBERTY is broken, and the arrowhead is centered below the N in UNITED on BD-1. This reverse was left over from the previous year. About 150 to 200 examples of this die marriage are known, roughly the same as BD-3 and BD-4 (BD-2 is much rarer). Bright yellow-gold surfaces have a slight greenish cast. Strong detail remains, with the overdate readily apparent. Expected blending takes place over the high points and ticks are peppered throughout.

From The Bayside Collection. NGC ID# 25NY, PCGS# 504948 Base PCGS# 8084

1808 Half Eagle, BD-4, VF20 Attractive Yellow-Gold Surfaces

5731 1808 Wide 5D, BD-4, High R.3, VF20 PCGS. Bass-Dannreuther Die State c/"b," an unlisted late die state with heavy clash marks through STATES. BD-4 shows the denomination 5 D widely spaced, with the A in STATES centered over the U in PLURIBUS. The BD-4 is the most available of the four 1808 varieties (two of them 1808/7 overdates). This example displays just moderate wear and contact marks consistent with the grade on still-attractive yellow-gold surfaces. At the lower end of certified examples, the coin will appeal to collectors who normally find early gold issues to be out of reach.

Ex: Houston Signature (Heritage, 12/2013), lot 4991.

From The Bayside Collection. NGC ID# 25PA, PCGS# 507605 Base PCGS# 8102

1811 Half Eagle, AU Details BD-2, Small 5

5732 1811 Small 5, BD-2, R.3 — Altered Surfaces — PCGS Genuine. AU Details. Bass-Dannreuther Die State d/a. A well-struck early half eagle that retains substantial luster. The butter-gold surfaces are attractive, but the fields show occasional signs of subtle smoothing. John Reich's Draped Bust Left type was coined each year between 1807 and 1812, and all six dates are collectible, albeit costly.

CLASSIC HALF EAGLES

5733 1834 Plain 4 AU55 PCGS. Breen-6501, McCloskey 3-B, R.1. First Head. An originally toned green-gold type representative that has hints of lilac near the margins. There are no consequential marks, and luster emerges from some of the design recesses. The coloration is unique and appealing to the collector who appreciates an old-time look.

Ex: FUN Signature (Heritage, 1/2010), lot 3932. NGC ID# 25RR, PCGS# 8171

- 5734 1834 Plain 4 AU55 NGC. Breen-6501, McCloskey 1-A, R.3. An olive-gold Choice AU half eagle. Liberty's forehead and the crest of the wings display slight wear, but consequential marks are confined to a nick above the eagle's right (facing) claw. NGC ID# 25RR, PCGS# 8171
- 5735 1834 Plain 4 AU55 NGC. Breen-6501, McCloskey 1-A, R.3. First Head. Pockets of bright luster surround the design elements of this moderately marked and briefly circulated pumpkin-gold Classic half eagle. Breen identified First Head and Second Head subtypes for the date, but the differences are subtle. NGC ID# 25RR, PCGS# 8171

1834 Classic Five Dollar, MS61 Plain 4, McCloskey 3-A

- 5736 1834 Plain 4 MS61 NGC. Breen-6501, McCloskey 3-A, R.3. The usual late die state with a radial crack at 5 o'clock and a "Scarface" vertical die crack on the portrait. The reverse is distinguished by a repunched base on the D in UNITED. An original apricot-gold example that boasts a sharp strike and unblemished surfaces. Luster fills the margins and motifs. NGC ID# 25RR, PCGS# 8171
- 5737 1836 AU50 PCGS. Breen-6509, McCloskey 4-C, R.3. Second Head, Large Date. This is a well-detailed Classic Head type coin, showing bright yellow-gold surfaces with minor chatter. Wear is minimal. The 1836 is among the more plentiful issues of this type, ideal for collectors seeking a single example of the design, which was produced from 1834 through 1838 at the Philadelphia Mint. NGC ID# 25RY, PCGS# 8174
- 5738 1838 AU53 NGC. Breen-6514, McCloskey 1-A, R.2. Large Arrows, Small 5. The D in the denomination is left under the tip of the stem. Bright yellow-gold surfaces present typical strike detail and glints of original luster hidden within the recesses. There are numerous marks over each side, most of them wispy and superficial. NGC ID# 25S4, PCGS# 8176
- 5739 1838-C Improperly Cleaned NGC Details. VF. Breen-6517, Variety 1, R.4. The "Normal 5" variety, without repunching on the denomination. The yellow-gold surfaces are moderately bright, but less abraded than anticipated aside from a diagonal line above the eagle's head. The first Charlotte five dollar issue has a mintage of only 17,179 pieces.
- 5740 1838-C Graffiti PCGS Genuine. VF Details. An "X" test mark on the field above the eagle's head corresponds to the PCGS designation. A luminous wheat-gold first-year Charlotte Mint half eagle. Tiny marks are scattered throughout, but none merit singular mention.
- 5741 1838-D Tooled PCGS Genuine. VF Details. Only one die pair is known for the introductory Dahlonega five dollar issue. This slightly luminous green-gold example displays even wear and several hair-thin marks on the upper right reverse field.

LIBERTY HALF EAGLES

- 5742 1841-C VF30 NGC. CAC. Variety 1. CAC is selective when it comes to bestowing their green seal on Charlotte Mint gold. In all grades, CAC has recognized only 21 1841-C fives, including the present midgrade example. The green-gold surfaces display even wear and are void of relevant contact.
 - From The Bayside Collection. NGC ID# 25SP, PCGS# 8203
- 5743 1842 Small Letters XF45 NGC. The 1842 half is a scarce date in all grades and is especially underrated in the higher circulated levels. Of the two major varieties, the Small Letters Reverse is the more plentiful, but only by a small margin. This Choice XF example displays outstanding original straw-gold color with hints of peripheral luster. Light wear on the design elements leaves enough sharpness to attest to the bold strike that this coin possesses. NGC ID# 25ST, PCGS# 8207

1842-O Half Eagle, AU Details Rare New Orleans Issue

5744 1842-O — Altered Surfaces — PCGS Genuine. AU Details. Variety 1. The 1842-O has a tiny mintage of 16,400 pieces and is rare in all grades. This sun-gold representative shows little if any circulation wear, but the surfaces are slightly bright, and the fields exhibit myriad minute marks. The strike is sharp at the peripheries, although the arrow fletchings and neck feathers are incompletely impressed.

1843-D Five Dollar, AU53 Rare Small D Mintmark

5745 1843-D Small D AU53 NGC. Variety 9-F. The feathertip points to the middle of the Small D mintmark. According to Doug Winter: "This is by far the rarer of the two varieties of this year and it should sell for a significant premium due to its rarity and importance." Reddish-gold surfaces display good detail and an expected number of moderate abrasions. The borders and peripheral elements are particularly bold.

From The Bayside Collection. NGC ID# 25T4, PCGS# 98215

1845-D Five Dollar, AU50 Appealing Surfaces and Sharp Devices

5746 1845-D AU50 PCGS. Variety 14-H, the rarer of two known 1845-D half eagle varieties, showing the date high and well-centered under the bust. The reverse is common between the two die marriages. This AU coin displays appealing orange-gold patina and bold detail with mild surface chatter. A few tick marks below Liberty's chin in the field are worthy of individual mention. The 1845-D is among the more plentiful Dahlonega half eagles, ideal for collectors seeking a single piece from this mint.

From The Bayside Collection. NGC ID# 25TC, PCGS# 8224

5747 1846-D/D VF35 PCGS. Variety 17-J. An attractive apricotgold Choice VF Dahlonega five. The mintmark is widely and boldly repunched north-northeast, the high-date variant of the popular *Guide Book* variety. Only lightly abraded. The strike is indistinct on Liberty's curls, as usually seen on coins from this remote branch facility.

From The Bayside Collection. NGC ID# 25TH, PCGS# 8229

5748 1847 MS62 PCGS. A scarce Mint State No Motto half eagle, showing bright yellow-gold luster and satiny surfaces. Light surface chatter accounts for the grade, and some strike softness is seen on the eagle's neck and left (facing) leg. Population: 47 in 62, 28 finer (1/18). NGC ID# 25TL, PCGS# 8231

1847-C Half Eagle, Choice XF Exceptional Original Coloration

5749 1847-C XF45 NGC. CAC. Variety 1. This is an exemplary Charlotte half eagle, showing deep, original "crust" with copperyorange and olive-gold coloration. Light wear leaves the well-struck devices boldly defined. An old diagonal mark on Liberty's neck is the only singular abrasion. The 1847-C is moderately available in the context of Charlotte fives, although Doug Winter notes: "Locating an 1847-C half eagle with pleasing natural color has become especially challenging and such coins are now quite rare." From The Bayside Collection. NGC ID# 25TN, PCGS# 8233

1848 Five Dollar, MS62 Rare in Mint State

5750 1848 MS62 PCGS. Half eagles were stuck to the extent of 260,775 pieces in 1848, one of the larger productions of the period, although that total was much smaller than the previous year's output. When found, the issue is apt to grade between AU50 and AU53. Mint State coins are rare. This bright yellow-gold example displays strong definition on the relief elements. Wispy lines and scattered abrasions limit the grade. Population: 8 in 62, 7 finer (12/17). NGC ID# 42A7, PCGS# 8236

1849-C Half Eagle, XF40 Original Surfaces, CAC Seal

- 5751 1849-C XF40 PCGS. CAC. Variety 2. The scarcer of the two die marriages, identified by parallel die lines in the field behind Liberty's upper neck. A charming green-gold example that retains traces of dirt in design recesses; the original appearance desired by many series specialists. No marks are consequential. The CAC seal is highly elusive on Charlotte Mint gold coins. CAC: 5 in 40, 25 finer (1/18). NGC ID# C5XD, PCGS# 8241
- 5752 1849-D Cleaned PCGS Genuine. AU Details. Variety 25-S. A mildly bright but nonetheless attractive Dahlonega type coin. Glimmers of orange-gold luster accompany the legends, and abrasions are relatively few. The strike is above average for the remote Southern facility.
- 5753 1851-C VF30 PCGS. Variety 1. The usual die pair for this scarce Charlotte issue, though a second and very rare variety (with the mintmark over the V in FIVE) is known. The straw-gold surfaces are minimally abraded and mildly granular.

 Etc. Schember Comment States Signature (Horitoge, 4/2012), let 6506.

Ex: Schaumburg Central States Signature (Heritage, 4/2012), lot 6596, which realized \$1,610.

From The Bayside Collection. NGC ID# 25U6, PCGS# 8247

1852-C Half Eagle, Choice AU

5754 1852-C AU55 PCGS. Variety 1. Charlotte half eagles are known for indifferent strikes, but the present example shows only moderate blending on the eagle's neck plumage and the curls near the ear. The yellow-gold surfaces exhibit fewer than the expected quantity of marks, and luster accompanies design recesses. Population: 16 in 55, 38 finer (1/18). NGC ID# 25UB, PCGS# 8251

1853-D Five Dollar, AU53 Original Dahlonega Type Coin

5755 1853-D AU53 NGC. Variety 34-Y. Luster flickers from the legends of this original sea-green and apricot-gold Dahlonega half eagle. A subtle cigar-shaped strike-through (as coined) is on the field beneath the hairbun, but the surfaces are minimally abraded aside from a small obverse edge nick at 8:30.

From The Bayside Collection. NGC ID# 25UF, PCGS# 8255

1854-C Five Dollar, AU50 Among the Scarcest Charlotte Half Eagles

5756 1854-C AU50 PCGS. Variety 2. Doug Winter calls this one of the scarcest Charlotte half eagles, as well as an underrated issue in the series. He estimates roughly 30 of the 160 or so coins extant survive in AU condition with only a handful finer. The outer elements are bold, but the centers are characteristically soft. The C mintmark is shallow, as made. Lightly clashed with a curling pinscratch from the talons. Population: 10 in 50, 32 finer (1/18). NGC ID# 25UH, PCGS# 8257

5757 1854-O AU55 NGC. CAC. Variety 1. From a mintage issue of just 46,000 pieces, the 1854-O is a scarce antebellum New Orleans issue. This CAC-approved example displays ample sungold luster. The orange-gold fields lack mentionable marks. CAC: 2 in 55, 7 finer (1/18).

Ex: John Stimson, Sr. Collection, Part Two (Heritage, 2/2008), lot 2525; Pittsburgh Signature (Heritage, 10/2011), lot 4919, which realized \$1,955. NGC ID# 25UM, PCGS# 8259

1855-D Half Eagle, XF40 Medium D, Choice Surfaces

5758 1855-D Medium D XF40 PCGS. Variety 38-CC. Doug Winter estimates that fewer than 150 1855-D half eagles are known in all grades, including both major varieties. This piece represents the Medium D variety, which is somewhat scarcer than its Large D counterpart. The surfaces display original orange-gold coloration and are remarkably smooth with hints of luminance around the protected peripheries. Most of the weakness on the central devices is due to strike and not wear. Population: 1 in 40, 10 finer (12/17). From The Bayside Collection. NGC ID# 25US, PCGS# 98263

1857 Half Eagle, MS62 Underappreciated No Motto Issue

5759 1857 MS62 PCGS. No Motto Philadelphia half eagles from the late 1850s are generally underappreciated. All examples are scarce, and Uncirculated coins are rarely found. This MS62 five dollar gold piece is fully struck. Its medium yellow-gold surfaces showcase radiant mint luster and minimal field chatter. Wispy lines near stars 5 and 6 are the only marks of note. Population: 17 in 62, 17 finer (1/18). NGC ID# 25V2, PCGS# 8271

5760 1857-C XF40 NGC. Variety 1. A yellow-gold Charlotte half eagle that shows the expected degree of wear on Liberty's hair. The wings show ample definition, and no marks are of significance. From a small mintage of 31,360 pieces.

From The Bayside Collection. NGC ID# 25V3, PCGS# 8272

5761 1857-D VF35 PCGS. Variety 42-HH. A scant production of 17,046 pieces ensures the rarity of the 1857-D. The present unmarked lemon-gold Choice VF example shows inexactness of impression on portions of the motifs, but glimpses of luster abound within the legends.

Ex: Central States Signature (Heritage, 4/2012), lot 6607, which realized \$2,012.50.

From The Bayside Collection. NGC ID# 25V4, PCGS# 8273

1859-C Half Eagle, Choice XF Smooth, Appealing Surfaces

5762 1859-C XF45 PCGS. CAC. Variety 2. The 1859-C half eagle is famous among Charlotte issues for having a "fuzzy" eagle due to an improperly annealed die. Although two varieties are known for this issue, both employ the defective reverse. This Choice XF example displays medium olive-gold coloration and fairly clean surfaces. The obverse is sharp. CAC-approved examples of this issue are rare in any grade.

From The Bayside Collection. NGC ID# 25VC, PCGS# 8281

1859-C Half Eagle, AU50 Minimally Abraded

5763 1859-C AU50 PCGS. Variety 1. This Charlotte half eagle issue of middle availability becomes very scarce in AU50 and rare in the upper About Uncirculated grade levels. As always, detail is much stronger on the obverse than the reverse, where a strike-through is seen from the second S in STATES to the eagle's head. Abrasions are fairly minor over olive-gold surfaces, save for a rim nick above star 8. From a mintage of 31,847 coins. NGC ID# 25VC, PCGS# 8281

1859-C Five Dollar, Appealing AU50

5764 1859-C AU50 NGC. Variety 2. A moderately scarce About Uncirculated example of this popular Charlotte issue, showing good sharpness on the obverse and straw-gold coloration overall. The reverse eagle is indistinctly detailed due to an improperly annealed die. A linear planchet depression (mint made) connects the eagle's head to the right base of the final S in STATES. The surfaces are free of major abrasions.

From The Bayside Collection. NGC ID# 25VC, PCGS# 8281

1860-D Half Eagle, Choice XF Medium D Mintmark

5765 1860-D Medium D XF45 NGC. Variety 46-GG. A moderately circulated sun-gold representative. Free from consequential contact, most of the eagle's plumage is present, though Liberty's hair shows wear. Despite a small mintage of 14,635 pieces, three die marriages are known, including one Medium D and two Large D varieties. From The Bayside Collection. NGC ID# 25VH, PCGS# 8286

5766 1860-D Large D VF20 PCGS. Variety 46-EE. Any 1860-D half eagle is desirable, due to a low mintage of 14,635 pieces. But a supermajority of survivors have a Medium D mintmark. The Large D is an overlooked rarity within the Federal gold series. Two positional varieties are known, with Variety 46-EE showing the mintmark slightly left relative to Variety 46-FF. This unblemished caramel-gold example displays retained laminations near the hairbun and neck curls. Encased in an old green label holder. NGC ID# 25VH, PCGS# 98286

1872-S Five Dollar Liberty, AU55 Very Rare Issue in Finer Grades

5767 1872-S AU55 PCGS. The 1872-S Liberty half eagle claims a modest mintage of 36,400 pieces, and the issue is a challenge to locate in all grades today. This attractive Choice AU specimen exhibits just a touch of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain significant amounts of original mint luster. Population: 11 in 55, 2 finer (1/18). NGC ID# 25WH, PCGS# 8327

1873 Open 3 Half Eagle, MS63 Strongly Detailed, Few Survive This Fine

5768 1873 Open 3 MS63 PCGS. Akers once wrote: "Overall, the 1873 Open 3 is slightly more rare than the 1873 Closed 3 and both are very underrated." Few coins of either variety exist this fine. Liberty's partly frosted portrait stands out against moderately reflective fields. Design detail is bold throughout lustrous yellowgold surfaces. Light marks are peppered in the fields. Population: 14 in 63 (1 in 63+), 10 finer (1/18). NGC ID# 25WK, PCGS# 8328

1878-S Half Eagle, MS63 Underrated in Select or Finer Mint State

- 5769 1878-S MS63 NGC. This high-luster, pale-gold 1878-S half eagle is a notable condition rarity in Select Uncirculated condition. PCGS and NGC each report just a single MS65 example and a handful of near-Gem coins, followed by only a few MS63 representatives. Present coin is sharply struck and frosty with only minor field chatter and no individually prominent marks. Census: 7 in 63, 4 finer (1/18). NGC ID# 25X6, PCGS# 8347
- 5770 1879-CC VF25 NGC. Variety 1-A. A much better Carson City issue with a tiny production of 17,281 pieces. This attractive representative exhibits rich peach-gold patina and relatively few abrasions. The devices display expected wear, but most of the stars are sharp. NGC ID# 25X8, PCGS# 8349
- 5771 1880-CC XF45 NGC. Variety 1-A. Plentiful pockets of luster illuminate the margins. Marks are limited to a horizontal line below Liberty's eye. A straw-gold Carson City type coin. Three die marriages constitute the mintage of 51,017 pieces, but a majority of survivors are Variety 1-A. NGC ID# 25XB, PCGS# 8352
- 5772 1882-CC XF45 NGC. Variety 1-A. Luster illuminates border elements, but wear is apparent on the fletchings, the eagle's neck, and Liberty's curls. The pumpkin-gold surfaces are unblemished. The Choice XF grade is ideal for the intermediate collector, since this Carson City issue is a costly acquisition in better AU grades. From The Douglas Knight Collection, Part II. NGC ID# 25XH, PCGS# 8359
- 5773 1882-CC XF45 NGC. Variety 1-A. Orange and green-gold toning accompanies this Choice XF Carson City five. Smooth aside from moderate contact on the cheek near the mouth. The strike shows incompleteness on the curls, fletchings, and neck plumage, usual for the issue. NGC ID# 25XH, PCGS# 8359
- 5774 1889 MS61 PCGS. The 1889 Liberty half eagle is conditionally scarce in Mint State, and most such pieces are moderately abraded. Such is the case with this MS61 coin, as expected for the grade, although the only individually mentionable abrasion is a small mark below Liberty's chin; the surfaces are otherwise orange-gold and lustrous with mild chatter. The design elements are bold. NGC ID# 25XZ, PCGS# 8374
- 5775 1890-CC AU58 NGC. Variety 1-A. Only one die pair is known from the low emission of 53,800 pieces. A lovely orange-gold near-Mint Carson City example. Small marks are apparent but do not deny the eye appeal. Bright luster accompanies the peripheries. NGC ID# C5XF, PCGS# 8376
- 5776 1891-CC AU58 PCGS. Variety 1-A. Many observers would regard the present coin as Mint State, although the experienced eye can detect slight wear on the eagle's neck feathers. The strike is sharp and the borders teem with luster. Minor granularity is noted on the field above FIVE. NGC ID# 25Y5, PCGS# 8378
- 5777 1891-CC MS61 PCGS. Variety 2-A. A well-struck Carson City type coin. The honey-gold surfaces are peppered with individually small abrasions. Variety 2-A is slightly scarcer than Variety 1-A, and is attributed by minor repunching above the second 1 in the date. NGC ID# 25Y5, PCGS# 8378

1891-CC Half Eagle, MS62 Minimally Marked Surfaces

- 5778 1891-CC MS62 NGC. Variety 1-A. A radiant honey-gold Carson City type coin. The luster is good, and the strike is sharp. Small marks are scattered, but are less detracting than is customary for the MS62 level. The '91-CC five is the most prevalent gold issue from the Western facility, but examples are perennially in demand. NGC ID# 25Y5, PCGS# 8378
- 5779 1892 MS65 PCGS. The 1892 half eagle becomes a condition rarity at this esteemed grade level. Both sides present appealing honey-gold surfaces awash in soft mint frost. Crisp definition on the stars, curls, hair bun, and feathers. Population: 34 in 65 (3 in 65+), 22 finer (1/18). NGC ID# C5XG, PCGS# 8379
- 5780 1892-CC AU55 PCGS. Variety 1-A. A collectible Carson City issue, especially popular in the upper AU grades. This Choice AU representative displays bright yellow-gold surfaces with mild field chatter. Some satiny luster remains, and the devices are boldly detailed despite slight high-point friction. NGC ID# 25Y7, PCGS# 8380
- 5781 1892-CC MS61 NGC. Variety 1-A. A charming butter-gold example. There are no noticeable marks, and the strike is consistent throughout. Among the four Carson City issues from the 1890s, the 1892-CC is scarcest in better Mint State grades. NGC ID# 25Y7, PCGS# 8380
- 5782 1893-CC AU58 PCGS. Variety 2-A. A pleasing final-year near-Mint Carson City five. The pumpkin-orange surfaces are nicely struck and impressively unabraded. Three die pairs are confirmed from the low mintage of 60,000 pieces. Variety 2-A is slightly scarcer than Variety 1-A, and both are seen much more often than the rare Variety 1-B. Variety 2-A is identified by delicate die cracks through the left-side stars. NGC ID# 25YB, PCGS# 8384
- 5783 1893-CC AU58 NGC. Variety 1-A. A well-struck orange-gold and lime-green Borderline Uncirculated example from the final year of Carson City coinage. Neither side shows noticeable marks, and luster fills all but the open fields. NGC ID# 25YB, PCGS# 8384
- 5784 1895 MS62 Prooflike NGC. CAC. Thousands of 1895 half eagles exist in MS61 and MS62, but fewer than two dozen display the overt contrast seen here. Orange-gold surfaces show deeply reflective fields surrounding pinpoint-sharp central design elements. The stars are trivially soft. Eye appeal is terrific despite scattered abrasions. Census: 8 in 62 Prooflike, 3 finer (1/18). NGC ID# 25YH, PCGS# 78390

1896 Half Eagle, MS64+ Overlooked Condition Rarity

- 5785 1896 MS64+ PCGS. CAC. The 1896 is often overlooked despite its low mintage of 58,960 coins and its meager high-grade survival rate. Soft mint luster and peach-gold color appear over minimally abraded surfaces. The devices are well-struck for the issue. Population: 27 in 64 (3 in 64+), 4 finer (1/18). NGC ID# 25YK, PCGS# 8392
- 5786 1900-S MS64+ PCGS. Only the Philadelphia and San Francisco Mints struck half eagles in 1900, and the latter issue is by far the scarcer in high grade. This Plus-graded coin is visually outstanding, showing frosted straw-gold luster and sharp motifs with only a small mark near Liberty's nose being worthy of note. PCGS lists 13 finer representatives (1/18). NGC ID# 25YV, PCGS# 8401

1901 Liberty Half Eagle, MS66 Condition Rarity in Finer Grades

- 5787 1901 MS66 NGC. The 1901 Liberty half eagle claims a large mintage of 615,900 pieces, but the issue becomes quite elusive at the MS66 grade level. This attractive Premium Gem exhibits well-detailed design elements, with just a touch of softness on some star centers. The impeccably preserved orange-gold surfaces radiate vibrant mint luster, with terrific eye appeal. Census: 27 in 66 (2 in 66+), 9 finer (1/18). NGC ID# 25YW, PCGS# 8402
- 5788 1904 MS61 Prooflike NGC. Prooflike half eagles from the early 20th century are underappreciated for their rarity. Only six Prooflike 1904 five dollar gold pieces are certified at NGC. This deep orange-gold example with reflective mirrors presents a strong impression. Census: 1 in 61 Prooflike, 4 finer (1/18). NGC ID# 25Z4, PCGS# 78409
- 5789 1905 MS65 PCGS. This Gem is much finer than the average example, featuring carefully preserved yellow-gold surfaces and a needle-sharp impression. Mint luster is frosty and eye-catching. Scarce so fine and rarely offered in better condition. Population: 54 in 65 (4 in 65+), 21 finer (1/18). NGC ID# 25Z6, PCGS# 8411
- 5790 1908 MS65+ PCGS. This was the final year of the long-running Coronet design. Collectors often target well-preserved examples for type purposes. Devices are strongly impressed over softly frosted, medium yellow-gold surfaces. A few microscopic ticks barely limit the grade. Scarce any finer. NGC ID# 25ZE, PCGS# 8418

INDIAN HALF EAGLES

- 5791 1908-D MS64 PCGS. The 1908-D Indian half eagle is available in MS64, but PCGS has seen only a dozen numerically finer examples (1/18). This near-Gem displays a sharp strike and frosty, original orange-gold mint luster with tiny hints of lilac. A few light field marks determine the grade. NGC ID# 93KW, PCGS# 8511
- 5792 1909 MS64 PCGS. The 1909 Indian half eagle claims a large mintage of 627,138 pieces, but the issue becomes very scarce in grades above the MS64 level. This attractive Choice specimen offers well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. NGC ID# 28DH, PCGS# 8513
- 5793 1909-D MS64 PCGS. A sharp, satiny example of this popular type coin issue, showing a few light field abrasions as expected for the grade and type, none of which are individually bothersome. The 1909-D comes from a mintage more than 3.4 million pieces, by far the highest production total in the Indian half eagle series and one of only two issues to surpass the seven-figure mark. NGC ID# 28DJ, PCGS# 8514
- 5794 1909-D MS64 NGC. From a substantial mintage of 3.4 million pieces, the 1909-D Indian half eagle is an available issue in MS64 condition, but it becomes scarce in finer grades. This well-detailed Choice example displays well-preserved orange-gold surfaces with vibrant mint luster throughout. NGC has graded 88 numerically finer examples (1/18). NGC ID# 28DJ, PCGS# 8514
- 5795 1909-D MS64+ PCGS. The high-mintage 1909-D Indian half eagle makes the date an outstanding candidate for a type collection. This near-Gem example has satiny straw-gold luster with excellent eye appeal. Only a few unobtrusive field marks on the reverse prevent full Gem classification. NGC ID# 28DJ, PCGS# 8514
- 5796 1910 MS64 NGC. Available in MS64, the 1910 Indian half eagle becomes rare finer. This near-Gem is well-struck and satiny with original straw-gold luster. A few light field marks are not distracting. NGC lists just 37 higher-grade examples of this date (1/18). NGC ID# 28DK, PCGS# 8517
- 5797 1910 MS64 NGC. The upper left-hand stars on the obverse a trifle weak, but the strike is otherwise pleasing on this Choice 1910 half eagle. Satiny straw-gold luster shows minimal abrasions. NGC has seen only 37 finer submissions (1/18). NGC ID# 28DK, PCGS# 8517

1911-D Half Eagle, Near-Mint Undeniably Original

- 5798 1911-D AU58 NGC. There is no denying the originality of this near-Mint semikey five dollar gold piece from a mintage of 72,500 coins. Reddish-gold surface retain luster within the sunken areas. The exposed regions house moderate abrasions, and a small planchet flaw occurs above the eagle's wing. The mintmark is clear, and the other motifs are strong despite a hint of cabinet friction. NGC ID# 28DR, PCGS# 8521
- 5799 1911-S MS62+ PCGS. CAC. A Mint State example of this betterdate Indian half eagle, showing natural honey-gold coloration and grade-appropriate abrasions. The CAC endorsement is a seldom seen attribute on this date in Uncirculated condition. Although unworn, this piece is weakly struck on the lower headdress feathers and the eagle's shoulder. NGC ID# 25ZM, PCGS# 8522

1915 Half Eagle, MS64+ Rare in Finer Numerical Grades

5800 1915 MS64+ PCGS. CAC. Although the 1915 Indian Head half eagle is available without difficulty in MS64, PCGS has only certified 63 numerically finer examples of this issue (1/18). This near-Gem carries the PCGS Plus designation, and exhibits splendid surfaces that show only a few trivial marks. Both sides are frosty and highly lustrous with brilliant yellow surfaces. NGC ID# 28DX, PCGS# 8530

LIBERTY EAGLES

1839/8 Ten Dollar, XF40 Type of 1838, Large Letters

5801 1839/8 Large Letters XF40 NGC. The central detail on this Large Letters 1839 eagle is uncommonly sharp for the XF grade level, although some strike weakness on the border stars causes them to be weak by comparison. An abrasion between stars 8 and 9 near the rim is the only mentionable imperfection. Hints of luster remain in the protected regions of the fields, and this yellow-gold type coin is overall quite attractive.

From The Admiral Collection. NGC ID# 54XF, PCGS# 8576

5802 1840 AU55 PCGS. A well-struck honey-gold Choice AU example. Unobtrusive abrasions emerge upon close inspection. An underappreciated early Philadelphia issue. Population: 8 in 55, 10 finer (12/17).

Ex: Pre-Long Beach Sale (Ira & Larry Goldberg, 1/2015), lot 2013, which realized \$1,998.

From The Bayside Collection. NGC ID# 262G, PCGS# 8581

1840 Ten Dollar, Choice AU Better Philadelphia Issue

5803 1840 AU55 PCGS. CAC. A well-struck orange-gold Choice AU example. The hair over the ear shows a trace of wear, but the fields display a pleasing quotient of luster, and no marks are detrimental. A brief and minor streak of struck-in grease is near star 5. Exceptional quality for this early, scarce, and conditionally rare Philadelphia eagle. Certified in an old green label holder. CAC: 2 in 55, 3 finer (1/18).

From The Admiral Collection. NGC ID# 262G, PCGS# 8581

1842 Large Date Ten, AU58 Outstanding for the Grade

5804 1842 Large Date AU58 PCGS. Overall, the Large Date 1842 eagle is slightly more plentiful than its Small Date counterpart, but both variants are rare in high grade. This near-Mint example displays mainly scattered surface chatter rather than obvious wear, with luster remaining in the fields. The central devices are sharp, and only a few border stars show weakness. Housed in a green label holder. Population: 4 in 58, 6 finer (1/18).

From The Admiral Collection. NGC ID# 262M, PCGS# 8584

5805 1842-O VF35 PCGS. Variety-2. A single pair of dies for the 1842-O eagles were sent from Philadelphia to New Orleans in October of that year, although there may have been an earlier unrecorded die shipment as three varieties are known. The total production was a mere 27,400 coins. This example, housed in a green-label PCGS holder, exhibits a distinctive mustard-yellow appearance with matte-like surfaces.

From The Admiral Collection. NGC ID# 262N, PCGS# 8587

5806 1843 XF40 PCGS. Breen-6861, Triple-Punched Date. The bases of all four date digits show slight tripling. The 1843 is a scarce Philadelphia issue that is usually seen in the VF to XF grade range. This piece is housed in an old green-label PCGS holder and exhibits scattered marks on its still lustrous yellow-gold surfaces. From The Admiral Collection. NGC ID# 262P, PCGS# 8588

5807 1843 AU50 PCGS. Breen-6861, Triple-Punched Date. Strong doubling is seen at the bases of each digit in the date on this important, conditionally elusive variety. Housed in an old greenlabel PCGS holder with reflective, nearly prooflike yellow-gold surfaces that show minor, grade-consistent marks on each side. Population: 22 in 50, 14 finer (1/18).

From The Admiral Collection. NGC ID# 262P, PCGS# 8588

5808 1844-O AU53 PCGS. Variety 1. A pleasing sun-gold New Orleans ten with far fewer marks than typically seen, although the upper reverse field exhibits moderate contact. Certified in an old green label holder. Population: 30 in 53, 28 finer (1/18). From The Admiral Collection. NGC ID# 554G, PCGS# 8591

1845 Liberty Eagle, Choice AU Reflective Fields, High-End PCGS Coin Housed in an Old Green Label Holder

5809 1845 AU55 PCGS. The 1845 Liberty eagle is scarce in all grades but is genuinely rare in the upper AU levels, with PCGS-graded coins being in the distinct minority so fine. Mint State coins are extremely rare and unknown finer than MS62. This Choice AU coin displays sharp stars and central devices with semiprooflike reflectivity in the fields where the light surface chatter does not hinder it. Little high-point friction is discernible. Housed in an old green label holder. Population: 8 in 55, 3 finer (1/18).
From The Admiral Collection. NGC ID# 262U, PCGS# 8592

5810 1845-O Repunched Date VF30 PCGS. Variety 3. The 4 in the date is drastically repunched, and this variety has sometimes been called the "Large over Small Date." We know of at least six different die varieties for the 47,500 eagles struck in New Orleans during 1845, and other varieties may be awaiting discovery. Five new die pairs were sent to New Orleans, and left-over reverse dies from 1844 may have been employed for coinage as well. This piece, housed in an old green-label PCGS holder, exhibits traces of luster with subdued rose toning splashes on its light yellow surfaces.

From The Admiral Collection. NGC ID# 262V, PCGS# 88593 Base PCGS# 8593

1845-O Ten Dollar, AU50 Repunched Date

5811 1845-O Repunched Date AU50 PCGS. Variety 1. The date is repunched north, readily apparent below the 8 and beneath the left corner of the crossbar of the 4. Variety 1 is the most prevalent among the six confirmed die marriages from the New Orleans mintage of 47,500 pieces. This is a nicely struck green-gold eagle. The surfaces exhibit myriad minor abrasions, but none are of singular significance. Encapsulated in a green label holder. From The Admiral Collection. NGC ID# 262V, PCGS# 88593 Base PCGS# 8593

5812 1846-O XF45 NGC. Variety 3. This is the rare early die state that shows the mintmark repunched at the top. Sharp detail appears throughout the devices of this Choice XF example, and the surfaces offer pleasing yellow-gold coloration. Light surface chatter is as usual for the issue. Higher-grade examples of this date are scarce. NGC ID# 554J, PCGS# 8595

1846-O Liberty Eagle, AU53 Green Label Holder

5813 1846-O AU53 PCGS. Variety 3. The 1846-O ten is scarce in AU condition and extremely rare in Mint State. This collectible AU53 coin displays little high-point wear and has hints of reflectivity in the protected portions of the fields. Moderate surface chatter on each side contributes to the grade, although there are no singular abrasions of note. A pleasing yellow-gold example of this conditionally elusive New Orleans issue. Encapsulated in a green label holder. Population: 12 in 53, 18 finer (1/18).

From The Admiral Collection. NGC ID# 554J, PCGS# 8595

5814 1846/5-O XF45 PCGS. Variety 4. The overdate status of the 1846/5-O has long been challenged, but it is listed by the *Guide Book*, NGC, and PCGS, the latter as an 1846/'5'-O. Variety 3 is nonetheless common, but Variety 4, with the mintmark over the gap between the N and D, is a little-known rarity. A luminous yellow-gold eagle without mentionable marks. Housed in a green label holder.

From The Admiral Collection. NGC ID# 262Y, PCGS# 8596 Base PCGS# 8595

5815 1847 AU58 NGC. CAC. Rounded Bun subtype. No shield ring. An apricot-gold near-Mint Liberty type coin. Lightly abraded and only mildly luminous. The war with Mexico was likely one reason for the increased mintages of eagles in 1847.

Ex: Donald E. Bently Collection (Heritage, 2/2014), lot 5353, which realized \$1,250.20. NGC ID# 262Z, PCGS# 8597

1847 Ten Dollar, Lustrous MS61 Elusive in Mint State Grades

5816 1847 MS61 NGC. Bulging Bun subtype. With more than 860,000 pieces struck, the 1847 Liberty eagle is plentiful overall. Mint State coins, while conditionally scarce in all grades, are an ideal choice for type collectors of No Motto gold coinage. This MS61 coin displays a sharp strike and vibrant yellow-gold mint luster. Scattered abrasions account for the grade, although the Mint State status of the coin is unquestioned. Census: 34 in 61 (1 in 61+, 1 in 61 ★), 15 finer (1/18).

From The Admiral Collection. NGC ID# 262Z, PCGS# 8597

5817 1847-O AU58 PCGS. Breen-6881, Variety 4. With a mintmark above the EN in TEN, the '47-O is the most prevalent No Motto New Orleans issue. But the present piece has the mintmark between the N and D, and is rare as such. In addition, the base of the 1 is nicely repunched. A well struck and inoffensively abraded near-Mint example. Housed in a green label holder.

From The Admiral Collection. NGC ID# 2632, PCGS# 8598

1848-O Ten Dollar, XF45 Smooth, Attractive Surfaces

5818 1848-O XF45 PCGS. Variety 1. This Choice XF example of the 1848-O eagle is in an ideal collecting grade for date set purposes. Original surfaces show orange-gold patina and relatively smooth fields, with strong detail remaining on the devices. Most of the border stars show weakness, largely from strike rather than wear. Eye appeal is pleasing. Housed in a green label holder.

From The Admiral Collection. NGC ID# 2634, PCGS# 8600

1848-O Ten Dollar, AU50 Original Orange-Gold Surfaces

5819 1848-O AU50 PCGS. Variety 1. There are a few hints of luster in the protected portions of the fields, although this About Uncirculated 1848-O eagle is otherwise lightly worn with original orange-gold patina and light surface chatter. The design elements remain well-detailed. This issue is moderately available in circulated condition, but AU coins are scarce with the eye appeal of the present example. Housed in a green label holder.

From The Admiral Collection. NGC ID# 2634, PCGS# 8600

1849 Liberty Eagle, MS61 Semiprooflike Fields

5820 1849 MS61 NGC. CAC. The 1849 is an available date overall, although, as with most No Motto issues, it is conditionally scarce in Mint State. This CAC-approved example is quite appealing for the MS61 grade level, showing semiprooflike fields and only minimal abrasions. Several border stars are weakly struck, but the central devices are sharp. Census: 15 in 61 (1 in 61+), 22 finer. CAC: 2 in 61, 7 finer (1/18).

From The Admiral Collection. NGC ID# 2635, PCGS# 8601

5821 1852 AU58 NGC. CAC. Although die varieties of this issue have not been closely studied, two variants have a close 52 and a wide 52. This example appears to be the former variety. Wisps of green and rose overtones grade the brilliant lemon-yellow surfaces of this splendid near-Mint example that has nearly full luster and an adequate strike. Census: 120 in 58, 38 finer. In a prior generation holder. CAC: 9 in 58, 11 finer (1/18).

From The Admiral Collection. NGC ID# 263C, PCGS# 8608

1853 Liberty Ten, MS61 In an Old NGC Holder

1853 MS61 NGC. Original satin luster illuminates moderately abraded surfaces on this Mint State 1853 ten dollar gold piece, although eye appeal is pleasing for the grade level. The central devices are sharp, while the border stars are incompletely struck as is characteristic of many No Motto issues. A small verdigris spot is seen on the eagle's beak. The 1853 is available in circulated grades but scarce in Mint State. Housed in a prior generation holder. Census: 22 in 61 (2 in 61+), 9 finer (1/18).

From The Admiral Collection. NGC ID# C82G, PCGS# 8610

5823 1853/'2' FS-301 XF45 NGC. The lower curve of the underdigit 2 is apparent within the lower loop of the 3, and there is even a tiny spike from the lower corner of the 2 left of the lower ball of the 3. Luster is plentiful for the grade, but this No Motto example has a mark on the shield and another below Liberty's chin.

Ex: Long Beach Signature (Heritage, 2/2008), lot 2621. NGC ID# C82G, PCGS# 8611

5824 1853/'2' FS-301 AU50 PCGS. Opinions vary regarding this overdate as the angle of the extra artifact in the lower loop of the 3 does not appear to match the angle of the 2 in the 1852 logotype. Regardless, this is a popular collectable variety that has its own entry in the *Guide Book*. Housed in a green-label PCGS holder, this example has rich yellow surfaces that exhibit considerable satin luster. Population: 12 in 50, 37 finer (1/18).

From The Admiral Collection. NGC ID# C82G, PCGS# 8611

1853-O Eagle, Semiprooflike AU55 Old Green Label Holder

5825 1853-O AU55 PCGS. Variety 3. The 1853-O ten is scarce in the upper AU grades and genuinely rare at the Mint State level. This Choice About Uncirculated example is well-struck and shows only a brush of high-point friction. Semiprooflike fields are free of major abrasions, and the overall eye appeal is outstanding for the grade. Housed in an old green label holder. Population: 17 in 55, 17 finer (1/18).

From The Admiral Collection. NGC ID# 263F, PCGS# 8612

5826 1854 AU55 PCGS. Although AU grades are available from time-to-time due to repatriated coins from overseas, VF and XF coins were those most likely encountered in older collections. This Choice AU example is housed in an old green-label PCGS holder and displays frosty luster on its lovely orange-gold surfaces. Delicate blue overtones enhance the eye appeal. Population: 17 in 55, 28 finer (1/18).

From The Admiral Collection. NGC ID# 263G, PCGS# 8613

5827 1854-O Large Date AU55 PCGS. Variety 2. The mintmark is positioned low, a scarcer variety among Large Date examples, of which possibly 100 to 125 pieces survive. Orange-gold surfaces are partly lustrous and impressively smooth. Definition is unsurprisingly soft for a New Orleans ten dollar. Housed in a green label holder. Population: 15 in 55, 20 finer (1/18). From The Admiral Collection. NGC ID# 263J, PCGS# 98614

5828 1854-S AU53 PCGS. This attractive AU53 example shows just a trace of wear on the coronet and hair above the eye, but the pleasing orange-gold surfaces are lightly abraded and retain traces of original mint luster in sheltered areas. Population: 43 in 53, 64 finer (12/17). NGC ID# 263K, PCGS# 8615

5829 1854-S Misplaced Date, FS-301, AU50 PCGS. The base of a stray 1 is visible near the border below the space between the 1 and 8 in the date on this dramatic variety. Housed in an old green-label PCGS holder, this pleasing AU example has nearly full luster on its brilliant light yellow surfaces.

From The Admiral Collection. NGC ID# 384M, PCGS# 145725 Base PCGS# 8615

1855-O Eagle, Choice XF Rare CAC-Endorsed Representative

5830 1855-O XF45 NGC. CAC. Variety 2. The New Orleans Mint struck only 18,000 gold eagles in 1855, and survivors are scarce in all grades. Mint State coins are prohibitively rare. Only six coins in all grades have been award CAC green labels, one of which is the present XF45 coin, encapsulated in a prior generation holder. Hints of luster remain in the protected peripheral areas, while the coin overall exhibits original orange-gold coloration. Light high-point wear leaves strong detail on the devices. Census: 29 in 45, 59 finer. CAC: 4 in 45, 1 finer (1/18).

From The Admiral Collection. NGC ID# 263M, PCGS# 8617

5831 1856-S AU53 PCGS. The Medium S mintmark is positioned left of the feather tip on this example. An exquisite AU53 example housed in a green-label PCGS holder, this piece has minuscule marks expected for the grade. Light yellow-gold surfaces exhibit splashes of violet patina with considerable luster. Population: 31 in 53, 50 finer (1/18).

From The Admiral Collection. NGC ID# 263S, PCGS# 8621

- 5832 1857 AU50 PCGS. A small mintage of 16,606 coins were struck throughout the year, mostly in the second half of 1857. Housed in an old green-label PCGS holder and elusive in AU or finer grades. This piece has subdued yellow-gold surfaces, retaining considerable mint luster in the protected areas. Population: 23 in 50, 29 finer (1/18). From The Admiral Collection. NGC ID# 55GV, PCGS# 8622
- 5833 1857 AU50 NGC. A lovely example of this low-mintage issue, this piece exhibits some strike weakness, but has considerable luster with reflective fields and minimal marks for the grade. AU and better examples of this Philadelphia Mint eagle are elusive. In a prior generation holder. Census: 17 in 50, 67 finer (1/18). From The Admiral Collection. NGC ID# 55GV, PCGS# 8622

5834 1857-S AU50 PCGS. With possibly as few as 100 survivors extant from a mintage of 26,000 coins, the 1857-S is, like many of its contemporaries, underappreciated. Detail is good throughout semireflective olive-gold surfaces that are expectedly abraded. Housed in an old green label holder. Population: 15 in 50, 23 finer (1/18).

From The Admiral Collection. NGC ID# 263V, PCGS# 8624

1860 No Motto Ten, AU58 Conditionally Elusive

5835 1860 AU58 PCGS. Rounded Bun subtype. A mere 15,055 circulation-strike eagles were produced at the Philadelphia Mint in 1860, and current estimates suggest a 1% survival rate of about 150 pieces in all grades. Probably no more than 20 of those are finer than the present near-Mint example. This piece has light yellow surfaces with nearly full luster and trivial, grade-consistent marks. It is sharply struck and offers excellent eye appeal. Population: 12 in 58, 10 finer (1/18). NGC ID# 2644, PCGS# 8631

1860 Ten Dollar, Near-Mint CAC Seal, Old Green Holder

5836 1860 AU58 PCGS. CAC. Rounded bun subtype. The 1860 is a much better No Motto date that has a mintage of only 15,055 pieces. Examples that approach Mint State are seldom encountered. This pumpkin-gold representative offers substantial flashy luster, though the fields are peppered with small marks. The strike is bold except on the uppermost stars. Certified in an old green label holder. Population: 12 in 58, 10 finer. CAC: 1 in 58, 2 finer (1/18).

From The Admiral Collection. NGC ID# 2644, PCGS# 8631

1861 Ten Dollar, Near-Mint Popular Type Coin

5837 1861 AU58 PCGS. CAC. Bulging Bun subtype. In 1861, mintages of eagles at Philadelphia reached their highest level between 1856 and 1878. Nonetheless, the issue is scarce at the near-Mint level. This example exhibits original peach-gold patina and displays moderate field marks near the eagle's beak. Population: 46 in 58 (1 in 58+), 43 finer. CAC: 15 in 58, 9 finer (1/18). NGC ID# 2647, PCGS# 8633

1866 Ten Dollar, Choice XF Fewer Than 90 Pieces Believed Known

5838 1866 XF45 PCGS. In 1866, coming out of the Civil War during which circulating gold coinage was heavily hoarded, there was little commercial need for new eagle production. The Philadelphia Mint struck only 3,750 pieces, all of the With Motto design type. Perhaps only 75 to 90 examples survive in all grades today. This Choice XF coin displays sharp detail and partially lustrous fields with original honey-gold patina. Light surface abrasions accompany the grade. Housed in a green label holder. Population: 11 in 45. 22 finer (1/18).

From The Admiral Collection. NGC ID# 264J, PCGS# 8649

5839 1868 XF45 NGC. Throughout the reconstruction era following the Civil War, gold coinage production was small, and few coins circulated except along the Pacific coast. The mintage in 1868 was 10,630 coins, and few survive in Mint State grades. Even AU examples are scarce. This Choice XF representative has trivial marks on its honey-gold surfaces with hints of mirroring in the protected areas. In a former generation holder.

From The Admiral Collection. NGC ID# 264N, PCGS# 8653

1868-S Eagle, AU53 Unknown in Mint State

5840 1868-S AU53 PCGS. Like all ten dollar San Francisco issues from the 1860s, the 1868-S is an underappreciated rarity in all grades. Fewer pieces have been certified than, for example, the 1921 double eagle. None have been certified as Mint State by either leading service. The present sun-gold example has substantial luster and the anticipated number of small abrasions. Housed in a green label holder. Population: 11 in 53, 10 finer (1/18).

From The Admiral Collection. NGC ID# 264P, PCGS# 8654

5841 1873-S VF20 NGC. Coming from a mintage of only 12,000 pieces, the 1873-S Liberty eagle is scarce in all grades and extremely rare in Mint State. It is believed that fewer than 100 coins survive overall. This midgrade example displays even wear and smooth orange-gold surfaces. A problem-free collector coin. Census: 8 in 20, 69 finer (1/18). NGC ID# 53M7, PCGS# 8668

1873-S Liberty Eagle, XF45 Elusive, Low-Mintage Issue

5842 1873-S XF45 NGC. CAC. Only 12,000 Liberty eagles were struck in 1873 at the San Francisco Mint, making the issue scarce-to-rare in all grades today. This attractive Choice XF specimen shows some light wear on the design elements, but most interior detail remains intact. The orange-gold surfaces are lightly abraded and appealing. Census: 17 in 45, 37 finer. CAC: 4 in 45, 3 finer (1/18). From The Admiral Collection. NGC ID# 53M7, PCGS# 8668

1874-S Eagle, Choice XF None Known in Mint State

5843 1874-S XF45 PCGS. CAC. Although San Francisco struck more than 1.2 million twenties in 1874, the ten dollar mintage from the facility was only 10,000 pieces. Few if any were saved by collectors until decades later. Rich peach-red toning embraces well-defined and typically abraded surfaces. Certified in a green label holder. Population: 22 in 45, 24 finer. CAC: 4 in 45, 4 finer (1/18). From The Admiral Collection. NGC ID# 2659, PCGS# 8671

1877-S Ten Dollar, Choice AU Appealing Original Surfaces

5844 1877-S AU55 NGC. The San Francisco Mint struck only 17,000 eagles in 1877. Circulated coins are often available but are scarce in the upper AU levels. In Mint State, only a handful of bagmarked pieces are known. This Choice AU representative displays original orange-gold patina with olive accents. The design elements are sharp, and each side has light surface chatter as normal for this grade level. Census: 33 in 55, 12 finer (1/18).

From The Admiral Collection. NGC ID# 265H, PCGS# 8679

5845 1879-S MS61 PCGS. Gold CAC. The usual high mintmark placement. A Gold CAC label adorns the old green-label PCGS holder of this impressive San Francisco Mint ten that exhibits a nearly full strike and frosty orange-gold luster. Minuscule marks include a small mark hidden in Liberty's hair. Although the 1879-S is readily available in lower grades, this issue is elusive in the Mint State grade range. Population: 38 in 61, 33 finer. Gold CAC: 1 in 61, 0 finer (1/18).

From The Admiral Collection. NGC ID# 265R, PCGS# 8686

1880 Liberty Head Ten, MS64 Conditionally Rare

5846 1880 MS64 PCGS. Most Uncirculated examples of the 1880 ten dollar gold piece grade no finer than MS63. This Choice example is conditionally rare, and PCGS and NGC combined report just three higher-grade representatives (1/18). The strike is razor-sharp, and the frosty surfaces yield lovely orange-gold coloration with no distracting abrasions. Housed in a green label holder. Population: 23 in 64 (4 in 64+), 1 finer (1/18). From The Admiral Collection. NGC ID# 265S, PCGS# 8687

5847 1880-CC — Improperly Cleaned — NGC Details. AU. Variety 1-B. Although faintly hairlined, this better date Carson City ten nonetheless displays attractive apple-green and pumpkin-gold surfaces. The strike is good, as is the eye appeal. A mere 11,190 pieces were issued.

1880-CC Eagle, Sharp AU53 Original, Semiprooflike Luster

5848 1880-CC AU53 PCGS. CAC. Variety 1-B. This piece is in the late die state, where a bold die line crosses the tops of the EN in TEN. The coin is sharply detailed and displays only slight highpoint friction with areas of semiprooflike reflectivity in the fields. Original honey-gold coloration adds to the eye appeal. The 1880-CC eagle is scarce in AU condition and decidedly rare in Mint State. Housed in an old green label holder. Population: 21 in 53, 43 finer. CAC: 4 in 53, 17 finer (1/18).

From The Admiral Collection. NGC ID# 265T, PCGS# 8688

5849 1881 MS64 PCGS. There were only 10 issues in the Liberty eagle series that had mintages exceeding 1 million coins, and those are the ideal candidates for a type collection. With a coinage of more than 3.8 million coins, the 1881 had the highest mintage of the series. However, most surviving examples are at the low end of the Mint State range, with an average certified grade of only MS60. This Choice Mint State piece, housed in a green-label PCGS holder, exhibits faint blue overtones on its frosty and highly lustrous orange gold surfaces. Population: 37 in 64 (4 in 64+), 1 finer (1/18). From The Admiral Collection. NGC ID# 265W, PCGS# 8691

1881-CC Ten Dollar, AU55 Challenging Carson City Issue

5850 1881-CC AU55 NGC. Variety 1-A. A lovely apricot-gold example of this better Carson City issue. Relatively few were saved from the mintage of 24,015 pieces, and representatives with original toning and lightly marked surfaces are always in demand. Only a single die pair struck the entire issue, identified by a date entered left and low, and a mintmark tilted heavily to the right. NGC ID# 265X, PCGS# 8692

1881-O Ten Dollar, AU53 Sharp and Prooflike

5851 1881-O AU53 PCGS. Variety 1. An early die state example with no die crack at the base of STATES. This coin is impressively sharp for the AU53 grade level and shows deeply prooflike fields with original honey-gold color. Some light surface chatter does not distract. This New Orleans issue comes from a mintage of only 8,350 pieces and is scarce in AU condition. Mint State coins are rare. Housed in an old green label holder. Population: 17 in 53, 37 finer (1/18).

From The Admiral Collection. NGC ID# 265Y, PCGS# 8693

5852 1881-S MS63 PCGS. The Liberty eagle specialist would be wise to consider this Select Mint State piece that is tied for the finest that PCGS has issued. In grades below MS63, this issue is often chosen for type collections. This lovely piece has frosty orange-gold luster with traces of blue toning. A highly attractive example with minimal, trivial marks. Population: 60 in 63 (2 in 63+), 0 finer (1/18). From The Admiral Collection. NGC ID# 265Z, PCGS# 8694

5853 1882-S MS62 PCGS. CAC. This atypical 1882-S eagle is housed in a green-label PCGS holder and exhibits exceptional, unmarked surfaces far finer than usually encountered for the grade. Delicate rose overtones appear on the brilliant and frosty yellow-gold surfaces. CAC: 4 in 62, 1 finer (1/18).

From The Admiral Collection. NGC ID# 55GK, PCGS# 8698

1883-CC Liberty Eagle, Sharp AU53 Beautiful Prooflike Example

5854 1883-CC AU53 PCGS. Variety 1-B. This Carson City issue is a rarity in Mint State and scarce in AU grades. Nonetheless, enough AU coins are known that collectors can cherrypick a high-end example. This coin, although graded AU53, is visually superior to most coins we have seen in this grade. Light friction on the cheek and in the fields is the only noticeable wear, and most of the fields are prooflike. Original orange-gold coloration adorns each side, and no distracting abrasions are present. Housed in a green label holder. Population: 16 in 53, 37 finer (1/18).

From The Admiral Collection. NGC ID# 2667, PCGS# 8700

5855 1883-S MS61 PCGS. The San Francisco Mint averaged more than 470,000 eagles per year from 1880 through 1889, and that average included just 38,000 examples that were coined in 1883. This attractive Mint State example, housed in a green-label PCGS holder, has a good strike and frosty luster with minimal, gradeconsistent marks. Population: 25 in 61, 25 finer (1/18). From The Admiral Collection. NGC ID# 2669, PCGS# 8702

5856 1884 MS62 PCGS. Like many other dates from the 1880s, the 1884 had a modest mintage of 76,800 coins, with few survivors in higher Mint State grades. Housed in a green-label PCGS holder, this piece has outstanding surfaces for the grade, with brilliant and frosty yellow surfaces. Population: 49 in 62, 31 finer (1/18). From The Admiral Collection. NGC ID# 554S, PCGS# 8703

1886-S Eagle, MS64+ Tied for Finest

5857 1886-S MS64+ NGC. Early S-mint Coronet eagles are either extremely rare and/or unknown in high grades. The 1886-S is a later, more collectible issue, though finer Gems are virtually unseen. Indeed, this crisp example ranks among the finest at NGC. Luminous orange-gold surfaces and radiant mint frost are hallmarks. There are few marks for the Choice assessment. Census: 17 in 64 (3 in 64+), 0 finer (1/18). NGC ID# 554Y, PCGS# 8709

1886-S Ten Dollar, MS64+ High-End Condition Rarity

5858 1886-S MS64+ PCGS. CAC. A mintage of 826,000 coins helps explain the availability of the 1886-S eagle in most grades, but examples become conditionally rare at the Choice grade level. Faint rose accents and thickly frosted mint luster appear over medium yellow-gold surfaces. The devices display a full impression. Minimal ticks for the grade, as suggested by the Plus designation and CAC approval sticker. Population: 46 in 64 (8 in 64+), 4 finer. CAC: 8 in 64, 2 finer (1/18). NGC ID# 554Y, PCGS# 8709

1887-S Ten Dollar, MS64 A Condition Rarity

5859 1887-S MS64 NGC. The issue is plentiful in circulated grades but becomes scarce in Mint State. The Smithsonian collection includes an XF example, while Harry Bass owned an MS63 coin. This MS64 representative is a conditional rarity, and only one piece is certified finer by both NGC and PCGS combined (1/18). Pinpoint-sharp design features, orange-gold color, and frosty luster further enhance the desirability of this San Francisco ten. Census: 11 in 64, 1 finer (1/18). NGC ID# 5552, PCGS# 8711

5860 1889 AU58 PCGS. An important entry in the With Motto Liberty eagle series, the 1889 had a mintage of just 4,440 circulation strikes. This near-Mint representative, housed in an old green-label PCGS holder, exhibits delicate blue overtones on its satiny and lustrous orange-gold surfaces. Population: 21 in 58, 51 finer (1/18). From The Admiral Collection. NGC ID# 266N, PCGS# 8715

5861 1891-CC MS61 PCGS. Variety 1-A. A thoroughly lustrous sun-gold representative that displays no more than the expected number of distributed minor abrasions. A full strike adds to the appeal. A good candidate for the Carson City type collector. NGC ID# 266U, PCGS# 8720

1891-CC Eagle, MS62 Variety 1-A

5862 1891-CC MS62 PCGS. Variety 1-A. The second C in the mintmark is directly below the feathertip on this reverse die and on no others. That sole feature is diagnostic for distinguishing Variety 1-A from the other four varieties known for the 1891-CC eagles. This was the only year that the Carson City Mint produced (slightly) more than 100,000 eagles. The collector who seeks a single Carson City example for a type collection would do well to consider the 1891-CC. This attractive Mint State piece has minimal marks on its brilliant and frosty light yellow surfaces. PCGS has certified only 88 finer examples (1/18). NGC ID# 266U, PCGS# 8720

1891-CC Eagle, MS60 Prooflike Rare With Reflective Fields

5863 1891-CC MS60 Prooflike NGC. Variety 1-A. The 1891-CC is the most prevalent Carson City ten dollar issue, but it is surprisingly rare with reflective surfaces. As of (1/18), NGC has designated only 13 pieces as Prooflike. The present canary-gold example displays a number of field marks consistent with the grade, but considerable flashy luster greets the viewer upon rotation beneath a light. NGC ID# 266U, PCGS# 78720

5864 1892 MS64 PCGS. CAC. An impressive representative of a common Liberty eagle in uncommon preservation. A Choice Mint State example is housed in a green-label PCGS holder and exhibits delicate blue and rose overtones on its brilliant yellow-gold surfaces with frosty luster and trivial marks. Population: 23 in 64 (1 in 64+), 6 finer. CAC: 3 in 64, 1 finer (1/18).
From The Admiral Collection. NGC ID# 266V, PCGS# 8721

5865 1892-O MS61 NGC. CAC. Variety 1. A single die pair is known for the mintage of 28,688 eagles in New Orleans in 1892. Minimal marks are noted on the brilliant and frosty light yellow-gold surfaces of this rather low mintage yet plentiful New Orleans eagle. An attractive, eye appealing example despite the low numerical grade. In a former generation holder. CAC: 15 in 61, 31 finer (1/18). From The Admiral Collection. NGC ID# 266X, PCGS# 8723

5866 1892-O MS62 PCGS. Variety 1. An early die state without cracks. This is the highest grade for which the 1892-O eagle is available. Anything finer becomes prohibitively rare. Detail is crisp, and lustrous surfaces offer rich shades of honey-gold color. Small scattered ticks. PCGS reports eight finer submissions (1/18). NGC ID# 266X, PCGS# 8723

5867 1892-O MS62 PCGS. Variety 1. A sharply struck caramel-gold New Orleans Motto ten. Small marks are distributed, usual for the issue. The low mintage 1892-O is found in AU55 through MS62 grades, but becomes very rare any finer. Certified in a green label holder. NGC ID# 266X, PCGS# 8723

5868 1892-S MS63 PCGS. This Select Mint State example housed in a green-label PCGS holder is highly lustrous with trivial marks consistent with the grade. Enough survive that the specialist can locate an example at this grade level without difficulty. However, finer pieces are virtually unobtainable. Population: 81 in 63 (5 in 63+), 4 finer (1/18).

From The Admiral Collection. NGC ID# 266Y, PCGS# 8724

5869 1892-S MS63 NGC. CAC. The availability of this San Francisco issue declines at the MS63 level, and finer pieces are extremely rare. This is tied for the finest 1892-S Liberty eagle endorsed by CAC, a distinction that makes it part of an elite group of high-end coins in the Select grade level. Sharp design elements complement frosty surfaces and original wheat-gold color. Light surface grazes on Liberty's cheek and in the field define the grade. Census: 27 in 63, 1 finer. CAC: 5 in 63, 0 finer (12/17). NGC ID# 266Y, PCGS# 8724

5870 1893 MS64 PCGS. CAC. The Admiral Collection was formed over the past three decades, or perhaps longer, and a large number of the coins remain in old grading service holders such as this piece in a green-label PCGS holder. There are many pieces in this collection, such as this Choice Mint State 1893 eagle, that appear deserving of a higher grade, or at least a Plus designation. Nearly mark-free, this impressive piece has a bold strike and brilliant, highly lustrous mint frost. CAC: 31 in 64, 4 finer (1/18). From The Admiral Collection. NGC ID# 266Z, PCGS# 8725

1893 MS63 Prooflike NGC. The sun-gold fields are reflective and display only minor marks. The portrait is well struck and has only moderate contact. An unusually flashy Liberty eagle. Census: 28 in 63 (1 in 63+ Prooflike, 3 in 63★), 2 finer (1/18). Ex: Long Beach Signature (Heritage, 6/2010), lot 1760. From The Admiral Collection. NGC ID# 266Z, PCGS# 78725

5872 1893-O MS62 PCGS. CAC. Variety 1. The only known dies for 17,000 eagles minted in New Orleans in 1893. Scattered marks on the brilliant and satiny yellow-gold surfaces are grade-consistent. This piece is at the highest readily available grade level for the issue. PCGS has certified only 13 finer. CAC: 14 in 62, 0 finer (1/18). From The Admiral Collection. NGC ID# 2673, PCGS# 8727

5873 1893-S MS63 PCGS. The two major grading services have seen just seven finer examples of the 1893-S eagle (1/18). This piece, housed in a green-label PCGS holder, exhibits trivial marks that suggest a high grade. Both sides have rich, satiny orange-gold luster and bold design definition. Population: 72 in 63 (1 in 63+), 4 finer (1/18). From The Admiral Collection. NGC ID# 2674, PCGS# 8728

5874 1894-O MS61 PCGS. Gold CAC. Variety 2. This lovely Liberty ten is housed in an old green-label PCGS holder and boasts a Gold CAC label attesting to its exceptional quality and eye appeal for the grade. While the surfaces have trivial, grade-limiting marks, the strike is exquisite, especially for a New Orleans issue, and the fields are fully mirrored around the lustrous devices, creating outstanding field-to-device contrast.

From The Admiral Collection. NGC ID# 2676, PCGS# 8730

1894-S Eagle, Mint State Better West Coast Issue

5875 1894-S MS60 NGC. The 1894-S has a mintage of only 25,000 pieces, compared with a double eagle production that exceeded a million coins. Most '94-S tens are in circulated grades, and none are known above MS62. An orange-gold and lime-green example with a good strike and a smattering of individually minor abrasions. Certified in a circa-2000 holder. Census: 5 in 60, 14 finer (1/18). From The Admiral Collection. NGC ID# 2677, PCGS# 8731

- 5876 1895 MS61 Prooflike NGC. The 1895 eagle is infrequently located with a prooflike format. Indeed, of the more than 11,000 ten dollar pieces graded by NGC, a mere 23 examples are given this designation. Deep reddish-gold patination covers both sides of this sharply struck MS61 Prooflike coin. Scattered contact marks limit the grade. Census:11 in 61 Prooflike, 9 finer Prooflike (1/18). NGC ID# 2678, PCGS# 78732
- 5877 1895-S MS60 PCGS. CAC. The 1895-S had a mintage of only 49,000 coins, and Mint State examples are rarely encountered. Housed in a green-label PCGS holder, this example slight field reflectivity with lustrous, minimally marked yellow-gold surfaces. A splendid and extremely important example, one of only two Mint State pieces with CAC labels. Population: 4 in 60, 14 finer. CAC: 1 in 60, 1 finer (1/18).

From The Admiral Collection. NGC ID# 267A, PCGS# 8734

5878 1896 MS63 PCGS. CAC. Strong design definition and vibrant luster are hallmarks of this Select Uncirculated eagle, but the stand-out feature is its exceptional preservation for the assigned grade. Certified in a green label holder. There are 13 submissions graded higher at PCGS. CAC: 19 in 63, 3 finer (1/18).

From The Admiral Collection. NGC ID# 267B, PCGS# 8735

1896-S Liberty Eagle, MS62 Rare With CAC Seal

- 5879 1896-S MS62 NGC. CAC. The 1896-S is scarce in all grades, although XF-AU examples can be found at modest premiums above melt. Nice Uncirculated pieces are surprisingly rare. The present coin has peach-gold fields and motifs. The margins are apple-green. Sharply struck and lustrous with minor hairlines. The reverse is lightly strike doubled. Encapsulated in a circa-2000 holder. Census: 11 in 62 (1 in 62+), 3 finer. CAC: 2 in 62, 1 finer (1/18). From The Admiral Collection. NGC ID# 267C, PCGS# 8736
- 5880 1897 MS64 NGC. Considered a common date, the 1897 is infrequently encountered in higher grades, with only 29 finer NGC certified pieces (1/18). This Choice Mint State example has frosty yellow-gold luster and exquisite surfaces for the grade. An important opportunity.

From The Admiral Collection. NGC ID# 26CH, PCGS# 8737

- 5881 1899 MS64+ PCGS. CAC. A Plus-graded Choice example of this turn-of-the-century issue, with sharply detailed design elements and lustrous orange-gold surfaces that show only minor signs of contact. Eye appeal is outstanding. PCGS has graded 66 numerically finer examples (1/18). NGC ID# 267J, PCGS# 8742
- 5882 1899 MS65 NGC. A lustrous and nicely struck orange-gold and apple-green Liberty type coin. Minor field grazes emerge beneath a lens, but these fail to challenge status as a Gem. Housed in a circa-2000 holder.

From The Admiral Collection. NGC ID# 267J, PCGS# 8742

5883 1899-O MS61 PCGS. CAC. Variety-1. There are four minor die varieties known for the 1899-O eagles, utilized for a production of 37,047 coins. Typical examples grade in the MS60 to MS62 range, with finer MS63 examples rarely encountered. This original example is housed in a green-label PCGS holder and exhibits faint green and rose overtones on its brilliant and lustrous yellow-gold surfaces. CAC: 2 in 61, 24 finer (1/18).

From The Admiral Collection. NGC ID# 267K, PCGS# 8743

1900 Ten Dollar, Lustrous MS65

5884 1900 MS65 NGC. Attractive medium-gold surfaces are sharply struck and lustrous throughout both sides of this Gem ten. Abrasions are limited to a few light abrasions and luster grazes. Population reports from both NGC and PCGS confirm examples of the 1900 eagle are quite scarce, and finer pieces remain virtually unavailable. Census: 65 in 65 (3 in 65+), 4 finer (1/18). NGC ID# 7LD2, PCGS# 8745

5885 1901-O MS61 NGC. Variety 3. The mintmark is much closer to the claw than the feather. This New Orleans type coin offers original green-gold surfaces. The strike is bold, and marks are minimal for the third-party grade. Certain to command a premium. NGC ID# 267R, PCGS# 8748

1901-O Eagle, Frosty MS63 Rarely Encountered Finer

5886 1901-O MS63 PCGS. CAC. Variety 1. The availability of this New Orleans issue begins to decline in MS63 and the date becomes rare in MS64. CAC-approved coins are rare in MS63 and extremely rare finer. This piece displays a sharp strike and frosty wheat-gold luster with only light field grazes to limit the grade. A small russet fleck near the eagle's beak will serve as a pedigree marker. CAC-approved in a green label holder. Population: 81 in 63 (3 in 63+), 22 finer. CAC: 16 in 63, 6 finer (1/18).
From The Admiral Collection. NGC ID# 267R, PCGS# 8748

1901-O Eagle, MS63 Variety 2, Bright Mint Luster

5887 1901-O MS63 PCGS. CAC. Variety 2. A curved die line through the top right serif of the Y in LIBERTY is diagnostic for this variety, one of three known die pairs for the 1901-O eagles. The New Orleans Mint coined 72,041 Liberty tens in 1901, and the majority of survivors are in lower Mint State grades. This Select Mint State piece has minimal marks, displaying brilliant and fully lustrous yellow-gold surfaces. PCGS has only certified 22 finer examples (1/18). NGC ID# 267R, PCGS# 8748

5888 1901-S MS64+ PCGS. A Plus-graded Choice example of this popular type issue, with sharply detailed design elements throughout and well-preserved orange-gold surfaces that are awash in satiny mint luster. Eye appeal is terrific. NGC ID# 267S, PCGS# 8749

1901-S Liberty Ten, MS66 A High-End Type Coin

- 5889 1901-S MS66 NGC. The 1901-S eagle is a plentiful date, popular as a type coin. Nonetheless, it is a great condition rarity in MS67. This attractive, collectible Premium Gem is nearly that fine. Sharp design elements and frosty, vibrant mint luster complement a lack of serious abrasions. Original yellow-gold coloration adorns each side. Housed in a prior generation holder. NGC lists only 20 Superb Gems finer, PCGS just two (1/18).
 - From The Admiral Collection. NGC ID# 267S, PCGS# 8749
- 5890 1902-S MS64+ PCGS. A Plus-graded Choice example, from a mintage of 469,500 pieces, this coin offers sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster on both sides. NGC ID# 267U, PCGS# 8751
- 5891 1902-S MS64 PCGS. CAC. Broad apple-green borders encompass orange-gold centers. A well struck and highly lustrous near-Gem. A lens reveals only incidental contact. The well-made 1902-S is more often encountered in Mint State than in circulated grades, and is ideal for the type collector. Certified in a green label holder. From The Admiral Collection. NGC ID# 267U, PCGS# 8751
- 5892 1903-O MS63 PCGS. CAC. Variety-2. A lovely example housed in a green-label PCGS holder, this 1903-O eagle features a strong strike, trivial marks, and brilliant yellow-gold luster. The 1903-O is usually available in grades up to MS63, but seldom finer with only 23 higher grade PCGS examples. CAC: 23 in 63, 5 finer (1/18). From The Admiral Collection. NGC ID# 267W, PCGS# 8753
- 5893 1903-S MS64 PCGS. CAC. A plentiful issue from a mintage of 538,000 coins, this Choice Mint State piece is an excellent type collection candidate. Housed in a green-label holder with CAC approval, this piece has a bold strike, reflective fields, and excellent eye appeal. CAC: 37 in 64, 32 finer (1/18).

 From The Admiral Collection. NGC ID# 267X, PCGS# 8754
- 5894 1903-S MS64+ PCGS. CAC. This moderately available issue becomes conditionally scarce in grades finer than the present MS64+ coin. A CAC green label confirms the high quality this coin shows for its grade. Sharp design elements and frosty yellow-gold luster are devoid of obtrusive abrasions. NGC ID# 267X, PCGS# 8754
- 5895 1904 MS62 Prooflike NGC. The central design elements of this impressive MS62 example are sharply detailed but some of the stars are a little soft. The yellow-gold surfaces show a scattering of minor contact marks and the fields display prooflike reflectivity. Census: 3 in 62 Prooflike, 1 finer Prooflike (1/18). NGC ID# 267Y, PCGS# 78755
- 5896 1904-O MS62 PCGS. CAC. Variety 1. Only a single 1904-O die marriage is known, although the mintage of 108,950 pieces is highest for a New Orleans Motto issue. Nonetheless, the '04-O is seldom seen in nice Mint State, since most examples are decidedly bagmarked. This lustrous lemon-gold example has a good strike and no mentionable abrasions. CAC: 16 in 62, 15 finer (1/18). From The Admiral Collection. NGC ID# 7LHK, PCGS# 8756

- 5897 1905 MS64 PCGS. This impressive Choice specimen exhibits well-detailed design elements, with slightly subdued mint luster and pleasing orange-gold surfaces that show a few scattered, minor contact marks. PCGS has graded 32 numerically finer examples (1/18). NGC ID# 7LD3, PCGS# 8757
- 5898 1905-S MS62 PCGS. The 1905-S ranks among the most conditionally challenging issues from the final years of the series. The present sharply struck and lustrous Liberty ten offers surprisingly smooth orange-gold surfaces. Housed in a green label holder. From The Admiral Collection. NGC ID# 2683, PCGS# 8758
- 5899 1906 MS64 PCGS. CAC. The 1906 is a late but underappreciated Philadelphia issue. The mintage is about one-seventh of its 1907 successor, and high-grade examples are surprisingly scarce. This sungold and sea-green example is housed in a first-generation holder, and will require a premium bid to secure ownership. Population: 44 in 64 (2 in 64+), 12 finer. CAC: 5 in 64, 3 finer (1/18). From The Admiral Collection. NGC ID#7JHG, PCGS# 8759
- 5900 1907 MS64 NGC. Apple-green borders frame canary-gold centers. Lustrous and precisely struck with occasional minor marks. 1907 was the transitional year for the denomination, with the Gobrecht design ceding to Saint-Gaudens. Certified in a circa-2000 holder. From The Admiral Collection. NGC ID# 2688, PCGS# 8763
- 5901 1907 MS64+ NGC. Strike detail falls just shy of full on this needle-sharp Choice Uncirculated eagle. Medium yellow-gold surfaces aglow in rich, frosty mint luster exhibit a few more microscopic ticks than a full Gem assessment allows. There are tiny rim nicks above star 8 and near the E in UNITED. Ideal final-year type. NGC ID# 2688, PCGS# 8763
- 5902 1907-D MS63 PCGS. The second and final Denver issue is conditionally scarcer than its 1906-D predecessor. A lustrous lemongold representative. Well struck and attractive with the expected number of unimportant marks. Certified in a green label holder. From The Admiral Collection. NGC ID# 268A, PCGS# 8764
- 5903 1907-S MS62 PCGS. CAC. The 1907-S proves surprisingly elusive in Mint State. This is a high-end MS62 with few marks for the grade. Frosty luster glistens softly over deep honey-gold surfaces. The centers exhibit typical strike incompleteness. Population: 57 in 62 (1 in 62+), 32 finer. CAC: 4 in 62, 2 finer (1/18). From The Admiral Collection. NGC ID# 38EP, PCGS# 8765

INDIAN EAGLES

- 5904 1907 No Motto MS63 PCGS. The Indian eagle debuted in 1907, without the historic motto IN GOD WE TRUST. This well-detailed Select example displays lightly marked orange-gold surfaces with vibrant mint luster on both sides. NGC ID# 28GF, PCGS# 8852
- 5905 1907 No Motto MS63 PCGS. Demand never seems to wane for the inaugural issue in the Saint-Gaudens Indian Head ten dollar series. This Select Mint State eagle maintains clean fields and typically defined central design elements. Two marks appear under the eye and above the eagle's right leg. NGC ID# 28GF, PCGS# 8852
- 5906 1907 No Motto MS64 PCGS. The first-year 1907 No Motto eagle is available in most grade levels up to MS66, allowing collectors to target an example that best suits their requirements. This near-Gem balances clean surfaces and a good strike with relative affordability. Orange-gold and softly frosted. NGC ID# 28GF, PCGS# 8852
- 5907 No Motto MS64 NGC. A satiny, well-struck yellow-gold example of the ideal No Motto type coin in the Indian eagle series. This piece is attractive with light surface marks, none of which are out of line for the grade. This No Periods design was the final product of the Mint's efforts to fine-tune Saint-Gaudens' design, which was originally submitted in high relief. NGC ID# 28GF, PCGS# 8852

- 5908 1908 No Motto MS61 ANACS. An absence of relevant marks, combined with rich apricot toning and vibrant cartwheel sheen, confirm the quality of this two-year type coin. Nicely struck and impressive for the grade. Housed in a small-sized holder. NGC ID# 28GG, PCGS# 8853
- 5909 1908 No Motto MS62 NGC. An impressive second-year Indian eagle, with the short-lived No Motto design, this coin exhibits well-detailed design elements, with just a touch of the usual softness on the headdress feathers. The orange-gold surfaces are lustrous and lightly marked for the grade. NGC ID# 28GG, PCGS# 8853
- 5910 No Lot.
- 5911 1908 Motto MS64 PCGS. Satiny original mint luster yields strawgold and peach hues on this Choice 1908 With Motto Indian eagle. The strike is well-executed, and abrasions are at a minimum mainly light chatter on the cheek limits the grade. The 1908 With Motto ten can be acquired as fine as MS68, for a price, although the availability declines rapidly above the MS64 grade level. NGC ID# 28GJ, PCGS# 8859
- 5912 1908-S AU55 ANACS. The fields display cartwheel luster, but light wear on the forehead curls confirms a brief stint in commerce. The apricot-gold surfaces are refreshingly unabraded. Fewer than 60,000 pieces were struck. Housed in a small-sized holder. NGC ID# 28GL, PCGS# 8861
- 5913 1909 MS63 NGC. An impressive Select example of this early series issue, from a mintage of 184,700 pieces. This coin exhibits sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 28GM, PCGS# 8862
- 5914 1909-D MS61 NGC. From an early series mintage of 121,540 pieces, this attractive Mint State example exhibits well-detailed design elements and lustrous orange-gold surfaces that show the minimum number of minor contact marks for the grade. NGC ID# 28GN, PCGS# 8863
- 5915 1910 MS64 PCGS. From a mintage of 318,500 pieces, the 1910 Indian eagle becomes scarce in grades above the MS64 level. This sharply detailed Choice example offers lightly marked orange-gold surfaces with vibrant mint luster throughout. NGC ID# 28GR, PCGS# 8865
- 5916 1910-D MS64 NGC. The Denver Mint struck a substantial mintage of more than 2.3 million Indian eagles in 1910. This impressive Choice example displays sharply detailed design elements and well-preserved, lustrous orange-gold surfaces NGC ID# 28GS, PCGS# 8866
- 5917 1911 MS64 NGC. The central devices are sharp, although the border stars on this near-Gem show mild softness. Satiny orange-gold luster complements a lack of bothersome abrasions. The 1911 Indian Head ten is available in this grade but moderately elusive finer. NGC ID# 28GT, PCGS# 8868
- 5918 1911-S AU58 NGC. This well-detailed near-Mint specimen exhibits just a touch of high-point wear and the pleasing orangegold surfaces are lustrous and lightly abraded on both sides. From a mintage of just 51,000 pieces. NGC ID# 28GV, PCGS# 8870
- 5919 1912-S MS61 ANACS. The 1912-S is a slightly better date in Uncirculated condition. This piece displays a bold strike, satiny surfaces, and original honey-gold coloration. Scattered light abrasions and some scuffs on Liberty's cheek determine the grade. NGC ID# 269G, PCGS# 8872
- 5920 1913 MS64 NGC. This is a sharp, well-preserved example with satiny straw-gold luster and a surprising lack of noticeable abrasions. Under a loupe, some faint lines on Liberty's cheek are found to prevent Gem classification. The 1913 Indian eagle is available in this grade but elusive finer. NGC ID# 28GY, PCGS# 8873

- 5921 1913-S AU53 NGC. The 1913-S Indian eagle claims a small mintage of 66,000 pieces, and most examples either circulated widely in this country or were exported, making the issue quite challenging in high grade. This lightly worn AU53 specimen displays still-lustrous, lightly abraded orange-gold surfaces. NGC ID# 28GZ, PCGS# 8874
- 5922 1913-S AU55 ANACS. The low mintage 1913-S is usually encountered in XF and AU grades. This pumpkin-gold example is minimally abraded and displays noticeable cartwheel sheen, though the high points confirm brief circulation. In a small-size holder. NGC ID# 28GZ, PCGS# 8874
- 5923 1913-S Improperly Cleaned NGC Details. Unc. The low-mintage 1913-S is a much better date in Mint State. This attractive apricot-gold example is a bit bright from a careful wipe, but hairlines are absent and there are no reportable abrasions. Well-struck in the centers, though the 19 in the date is faint. NGC ID# 28GZ, PCGS# 8874
- 5924 1914 MS63 PCGS. This lustrous yellow-gold example shows only minor surface contact, and the cartwheel effect is most pleasing. The central devices are well-struck, although the upper obverse border stars exhibit slight incompleteness. A moderately plentiful date, here offered in a collectible grade. NGC ID# 28H2, PCGS# 8875
- 5925 1914-S MS61 ANACS. Breen-7126. Breen's "Double S" variety. The mintmark is widely repunched east, but the first impression was largely effaced. This honey-gold branch mint ten has booming luster and no distracting marks. Certified in a small-sized holder. NGC ID# 28H4, PCGS# 8877

1914-S Indian Eagle, MS62 Challenging Issue in High Grade

- 5926 1914-S MS62 NGC. The 1914-S Indian eagle claims a mintage of 218,000 pieces, but the issue is more elusive in Mint State grades than that substantial production figure would suggest. This attractive MS62 specimen offers well-detailed design elements, with just a trace of the usual softness on the eagle's shoulder. The lightly marked orange-gold surfaces are lustrous and appealing. NGC ID# 28H4, PCGS# 8877
- 5927 1915 MS64 PCGS. From a business-strike mintage of 351,000 pieces, the 1915 Indian eagle becomes scarce in grades above the MS64 level. This attractive Choice example offers well-detailed design elements and lustrous, well-preserved orange-gold surfaces. NGC ID# 28H5, PCGS# 8878
- 5928 1915-S AU50 PCGS. The honey-gold surfaces of this About Uncirculated 1915-S ten show original luster in the fields, while grade-limiting wear is mainly restricted to the high points of the eagle and Liberty portrait. The 1915-S is a semikey date in high grade, coming from a small mintage of 59,000 coins. From The Douglas Knight Collection, Part II. NGC ID# 28H6, PCGS# 8879
- 5929 1915-S AU55 ANACS. Only a faint brush of wear is discernible on this Choice AU 1915-S Indian eagle, while satiny luster remains in the fields amid bright yellow-gold patina. A few light abrasions are not bothersome. Only 59,000 gold eagles were struck in 1915 at the San Francisco Mint. NGC ID# 28H6, PCGS# 8879

1915-S Indian Eagle, AU55 Better Low-Mintage Date

- 5930 1915-8 AU55 NGC. The 1915 Indian eagle claims a low-mintage of 59,000 pieces, making it a challenging issue in high grade. This attractive Choice AU specimen exhibits well-detailed design elements, with just a touch of wear on the high points, and lightly abraded orange-gold surfaces with traces of original mint luster. NGC ID# 28H6, PCGS# 8879
- 5931 1926 MS64 PCGS. CAC. The 1926 is a plentiful date, ideal for type representative. This CAC-approved near-Gem displays a sharp strike and frosty surfaces with a few unobtrusive abrasions. The bright yellow-gold coloration is original. NGC ID# 28H9, PCGS# 8882

1926 Indian Eagle, MS65+ Very Scarce Any Finer

- 5932 1926 MS65+ PCGS. CAC. The 1926 Indian eagle enjoyed a really large mintage of more than 1 million pieces, but the issue becomes very scarce in grades above MS65. This Plus-graded Gem exhibits well-detailed design elements, with a trace of the usual softness on the eagle's shoulder, and the virtually pristine orange-gold surfaces radiate vibrant mint luster throughout. PCGS has graded 23 numerically finer examples (1/18). NGC ID# 28H9, PCGS# 8882
- 5933 1932 MS64 PCGS. The vivid orange-gold surfaces of this attractive Choice example radiate vibrant mint luster on both sides, creating outstanding eye appeal. The design elements are well-detailed and only minor signs of contact are evident.

 Ex: PNG Invitational Signature (Heritage, 2/2015), lot 4211. NGC ID# 28HB, PCGS# 8884
- 5934 1932 MS64+ PCGS Secure. A Plus-graded Choice example of this popular late-series type issue, with well-detailed design elements and well-preserved orange-gold surfaces. Vibrant mint luster adds to the outstanding overall eye appeal. NGC ID# 28HB, PCGS# 8884

1932 Ten Dollar, MS65+ Marvelous Example for the Grade

5935 1932 MS65+ NGC. Examples of the 1932 Indian Head eagle are among the most frequently seen high-grade coins in the series. The average certified representative survives in MS63, but Gems can usually be found without difficulty. This MS65+ ten dollar gold piece is a marvelous example for the grade, nearly qualifying for an even higher assessment. Radiant surfaces are smooth and strongly defined. Each side is void of detracting abrasions. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Double Eagle, AU53 First of the Denomination

- 5936 1850 AU53 NGC. The first double eagles issued for circulation were struck at Philadelphia and New Orleans in 1850. The denomination was created as a direct response to the massive quantities of gold being mined in California. This example has scattered marks, none that stand out, and exhibits a trace of luster on its greenish-gold surfaces. NGC ID# 268F, PCGS# 8902
- 5937 1851 AU50 NGC. From a second-year mintage of more than 2 million pieces, the 1851 Type One Liberty double eagle is a relatively available date and a popular choice of type collectors. This lightly worn, lightly abraded AU example retains much original mint luster and eye appeal.

From The Bayside Collection. NGC ID# 268H, PCGS# 8904

5938 1851 AU50 NGC. Just a touch of wear shows on the well-detailed design elements of this popular Type One issue, and the pleasing orange-gold surfaces are lightly abraded. Two minor rim dings are evident at 5:30 and 6:30 on the obverse.

From The Bayside Collection. NGC ID# 268H, PCGS# 8904

5939 1851 AU53 PCGS. The lightly abraded orange-gold surfaces of this early Type One double eagle retain much of their original mint luster and just a trace of wear shows on the strongly impressed design elements. Eye appeal is outstanding for this popular issue from the second year of the design.

From The Bayside Collection. NGC ID# 268H, PCGS# 8904

5940 1852 AU50 NGC. An attractive Type One double eagle from the third year of the Liberty design. Some light wear shows on the coronet and Liberty's hair, but the pleasing orange-gold surfaces are lightly abraded, with traces of original mint luster and a few hints of rose patina.

From The Bayside Collection. NGC ID# 268K, PCGS# 8906

1852 Double Eagle, Choice AU Still-Lustrous Red-Gold Surfaces

5941 1852 AU55 NGC. This early No Motto double eagle showcases red-gold coloration and a "crusty" look that sticklers for originality can appreciate. The motifs are remarkably well-detailed for the type and considering brief circulation. Both sides are aglow in remaining mint luster and lack obtrusive abrasions.

From The Bayside Collection. NGC ID# 268K, PCGS# 8906

1852 Double Eagle, AU58 Well-Preserved Type One Twenty

- 5942 1852 AU58 NGC. This is a delightful, minimally marked 1852 twenty, one of more than two million pieces struck at the Philadelphia Mint in 1852, only a few pieces less than the equally impressive mintage of the 1851 issue. Pleasing orange-gold surfaces are sharply struck, although the date was lightly impressed into the working die. Liberty's portrait is especially free of any distracting marks. NGC reports just 106 numerically finer examples (1/18). NGC ID# 268K, PCGS# 8906
- 5943 1853 XF45 PCGS Secure. The pleasing orange-gold surfaces display traces of original mint luster in the recessed areas around the well-defined design elements. Distributed light marks confirm the brief circulation of this Choice XF specimen.
 From The Bayside Collection. NGC ID# 268M, PCGS# 8908
- 5944 1853 XF45+ PCGS. A Plus-graded Choice XF specimen of this early Type One double eagle, with some light wear on the design elements and lightly abraded orange-gold surfaces that show hints of original mint luster in sheltered areas.
 From The Bayside Collection. NGC ID# 268M, PCGS# 8908

1853/'2' Twenty Dollar, Choice XF Scarce FS-301 Variety

- 5945 1853/'2' FS-301 XF45 NGC. Recutting within the lower loop of the 3 in the date is traditionally regarded as a remnant of an underdigit 2, although the variety's status as an overdate has been contested in recent years. The die lump below the R in LIBERTY provides confirmation of FS-301, which is often confused with repunched date varieties Breen-7160 and Breen-7161. This yellow-gold example has microgranular surfaces that show only one mentionable mark, a minor edge knock at 9 o'clock on the reverse. NGC ID# 268M, PCGS# 145730 Base PCGS# 8909
- 5946 1854 Small Date XF45 PCGS. A Choice XF specimen of the more available Small Date variety, this coin exhibits only light wear on the design elements and the orange-gold surfaces show the expected number of minor contact marks for the grade. Much original mint luster remains, adding to the overall eye appeal. From The Bayside Collection. NGC ID# 268R, PCGS# 8911
- 5947 1854 Small Date AU50 PCGS Secure. The 1854 Liberty double eagle with the Small Date is more available than its Large Date counterpart. This pleasing AU specimen is lightly worn and lightly abraded, with traces of original mint luster in sheltered areas. From The Bayside Collection. NGC ID# 268R, PCGS# 8911
- 5948 1855 XF40 NGC. A pleasing XF specimen of this Type One Philadelphia issue, from a reduced mintage of 364,666 pieces, this coin exhibits only light wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster.

From The Bayside Collection. NGC ID# 268V, PCGS# 8914

- 5949 1855 XF40 NGC. This pleasing Type One double eagle shows some wear on the prongs of Liberty's coronet and hair, but much interior detail remains intact. The vivid orange-gold surfaces show only minor abrasions.
 - Ex: ANA National Money Show (Heritage, 2/2014), lot 5504. From The Bayside Collection. NGC ID# 268V, PCGS# 8914
- 5950 1855-S AU50 PCGS. A lightly worn, lightly abraded AU example of this popular branch mint issue, from a substantial mintage of 879,675 pieces. The pleasing orange-gold surfaces retain traces of original mint luster and the overall presentation is quite attractive. From The Bayside Collection. NGC ID# 268X, PCGS# 8916

1856 Twenty Dollar, AU50 Scarcer Type One P-Mint Issue

5951 1856 AU50 NGC. Well-struck and lightly worn, with a smooth, problem-free appearance for the grade, and attractive, bright redgold coloration. An uncommon P-mint issue in all grades, the 1856 is generally not found above the XF-AU level and Mint State pieces are rarely offered.

Ex: Palm Beach Signature (Heritage, 3/2005), lot 7124. From The Bayside Collection. NGC ID# 268Y, PCGS# 8917

1856 Double Eagle, AU53 **Natural Coloration**

5952 1856 AU53 NGC. CAC. The 1856 "has a lower survival rate than other comparable double eagles struck during this era and it is a very rare (and still under-recognized) issue in high grades,' according to Doug Winter. This piece has natural reddish-gold coloration and remaining luster around the devices. The radial lines, hair curls, and feathers exhibit bold detail for the No Motto type. NGC ID# 268Y, PCGS# 8917

1857 Liberty Head Twenty, AU55 Challenging in Finer Condition

5953 1857 AU55 NGC. Uncirculated 1857 double eagles are scarce, heightening demand for high-end AU coins. This Choice About Uncirculated representative displays sharp detail and partially lustrous yellow-gold fields. Minor surface chatter on each side accompanies the grade but does not produce any singular distractions.

From The Bayside Collection. NGC ID# 2693, PCGS# 8920

5954 1857-S AU53 PCGS. The 1857-S Liberty double eagle has become famous in recent years because of its presence in recent shipwreck finds. The vivid orange-gold surfaces of this lightly worn, lightly abraded specimen retain traces of original mint luster. NGC ID# 2696, PCGS# 8922

1858 Liberty Double Eagle, XF45 Type One Philadelphia Issue

5955 1858 XF45 PCGS. From a mintage of 211,714 pieces, the 1858 Liberty double eagle is a scarce Type One issue in high grade. This attractive Choice XF specimen shows some wear on the prongs of the coronet, but most interior detail is still intact on the major design elements. The lightly abraded orange-gold surfaces retain a few traces of original mint luster in sheltered areas. NGC ID# 2697, PCGS# 8923

5956 1858 — Improperly Cleaned — NGC Details. AU. Cataloged in the 1969 Stack's sale as "About Uncirculated. Mint lustre about the devices." Some faint rubbing in the left obverse field earns a Cleaned designation from NGC, although the coin is visually pleasing despite. The luster described decades ago is prooflike, and both sides of this straw-gold Type One double eagle are somewhat reflective. A grease mark near star 4 serves as a pedigree marker. Ex: Public Auction Sale (Stack's, 1-2/1969), lot 361. NGC ID# 2697, PCGS# 8923

5957 1858-S XF45 NGC. An attractive Choice XF representative of this popular branch mint Type One issue, with some light wear on the design elements and pleasing orange-gold surfaces that show the expected number of minor abrasions for the grade.

From The Bayside Collection. NGC ID# 2699, PCGS# 8925

5958 1858-S AU53 NGC. Like most Type One Liberty double eagles, the 1858-S is not difficult to locate in circulated grades, but Mint State examples are elusive. This AU53 example is lightly worn and the orange-gold surfaces retain traces of original mint luster, with the expected number of minor abrasions on each side. NGC ID# 2699, PCGS# 8925

1858-S Twenty Dollar, AU55 Original and Well-Struck No Motto Coin

5959 1858-S AU55 PCGS. CAC. Perhaps 200 or 300 1858-S double eagles survive across all AU grades. The population declines by roughly 90% in mint condition, where the issue becomes very rare. This is an overtly original representative and one of the few so well-preserved that it boasts a green approval sticker from CAC. Production quality was good in 1858, as evidenced by the pinpointsharp impression on this lovely orange-gold Choice AU offering. NGC ID# 2699, PCGS# 8925

1859-S XF40 PCGS. Some light-to-moderate wear is evident on the well-detailed design elements of this pleasing Type One double eagle and the orange-gold surfaces show a few hints of original mint luster. From a mintage of 636,445 pieces.

From The Bayside Collection. NGC ID# 269C, PCGS# 8928

- 5961 1859-S Scratches NGC Details. AU. A cluster of abrasions shaped like a horn-of-plenty resides between obverse stars 4 and 5, and a moderate vertical mark is noted below Liberty's eye. Overall, the coin is less abraded than many lightly circulated double eagles. The caramel-gold surfaces retain substantial luster. NGC ID# 269C, PCGS# 8928
- 5962 1860 Improperly Cleaned NGC Details. AU. Faint hairlines on each side suggest an old cleaning, although this well-detailed Type One double eagle is yet lustrous in the protected regions of the fields. Scattered abrasions accompany the grade. A well-detailed example of this moderately available date.

 Ex: Public Auction Sale (Stack's, 2/1980), lot 161. NGC ID# 269D, PCGS# 8929

1860 No Motto Twenty, AU55 Collectible P-Mint Example

- 5963 1860 AU55 NGC. With a mintage of 577,670 coins, the 1860 is one of the more collectible No Motto issues from the Philadelphia Mint. The stars and feathers are needle-sharp, while the hair curls are characteristic for the type. Reddish-gold surfaces display few serious abrasions and are highly appealing.
 - From The Bayside Collection. NGC ID# 269D, PCGS# 8929
- 5964 1860-S AU53 PCGS. This attractive Type One double eagle shows just a touch of wear on the prongs of the coronet and high points of Liberty's hair. The pleasing orange-gold surfaces retain much original mint luster and show the expected number of minor abrasions for the grade. NGC ID# 269F, PCGS# 8931
- 5965 1861 VF35 PCGS. The original orange-gold patina of this Choice VF 1861 double eagle and the generally strong detail for the grade make it highly appealing as a type coin, which is the most prominent modern purpose of the available 1861 issue. The surfaces are surprisingly smooth. Housed in a green label holder. NGC ID# 269G, PCGS# 8932

1861 Liberty Twenty, AU58 In Demand for No Motto Type

5966 1861 AU58 NGC. The mintage of nearly 3 million double eagles in 1861 yields a surprisingly small number of near-Mint and Mint State examples for such a huge production. This still-lustrous AU58 example harbors numerous tiny bagmarks and a few minor edge nicks, but no large abrasions. The frosted, straw-gold surfaces retain their sharp strike throughout the motifs. NGC ID# 269G, PCGS# 8932

- 5967 1861 Saddle Ridge Hoard Spot Removed PCGS Genuine. AU Details. Ex: Saddle Ridge Hoard. A strike-through between the TA in STATES exhibits wispy pinscratches. The honey-gold surfaces are semiprooflike. This Civil War double eagle was once part of the Saddle Ridge Hoard, a group of U.S. gold coins (dated 1847 to 1894, and mostly double eagles) recovered from buried tin cans in 2013. Ex: Central States Signature (Heritage, 4/2015), lot 8535.
- 5968 1861-S XF45 NGC. A well-detailed Choice XF example of this Type One San Francisco issue, showing small remnants of luster in the protected regions of the fields. Moderate surface chatter on each side accompanies the grade. The surfaces display original yellow-gold coloration. NGC ID# 269K, PCGS# 8935
- 5969 1863-S XF40 PCGS. This green-gold double eagle is one of nearly 1 million coins stuck for the 1863-S. The date was considered one of the rarest S-mint issues prior to the recovery of several hundred shipwreck coins. Partly worn devices maintain luster near the protected areas. A mark extends from the mouth across the cheek. NGC ID# 269R, PCGS# 8940
- 5970 1864-S XF45 NGC. The 1864-S Liberty double eagle is a popular Type One issue from a mintage of 793,660 pieces. This impressive Choice XF specimen is shows some light, even wear on the design elements and the pleasing orange-gold surfaces retain traces of original mint luster.
 - From The Bayside Collection. NGC ID# 269T, PCGS# 8942
- 5971 1865 AU50 NGC. The 18 in the date is repunched, a variety unlisted in any reference known to the cataloger. This butter-gold Civil War double eagle has pleasing surfaces and shows only light wear on Liberty's curls.
 - Ex: Donald E. Bently Collection (Heritage, 12/2013), lot 5224, which realized \$2,597.93.
 - From The Bayside Collection. NGC ID# 269U, PCGS# 8943
- 5972 1865 AU50 NGC. An attractive AU specimen of the last Philadelphia Mint No Motto double eagle, from a smallish mintage of 351,200 pieces. This lightly worn, lightly abraded example displays still-lustrous orange-gold surfaces with considerable eye appeal. From The Bayside Collection. NGC ID# 269U, PCGS# 8943

1865-S Liberty Twenty, AU58 Type One San Francisco Issue

- 5973 1865-S AU58 PCGS. From a substantial mintage of just over 1 million pieces, the 1865-S Liberty double eagle was seldom seen in Mint State condition before recent shipwreck finds augmented the supply of high-grade specimens considerably. This impressive near-Mint example shows light wear on the well-detailed design elements and the orange-gold surfaces exhibit the expected number of minor abrasions for the grade. NGC ID# 269V, PCGS# 8944
- 5974 1867-S AU53 PCGS. Small squat S. Struck past the years of the shipwreck hoards, the 1867-S is somewhat scarce in AU grades. The present apricot-gold representative has a moderate mark below Longacre's initials but is otherwise relatively smooth. NGC ID# 26A2, PCGS# 8952

1869-S Liberty Double Eagle, AU58 Type Two Branch Mint Issue

5975 1869-S AU58 NGC. CAC. Like most Type Two Liberty double eagles, the 1869-S is a plentiful issue in lower circulated grades, but Mint State examples are quite elusive. This attractive near-Mint specimen exhibits well-detailed design elements, with just a trace of high-point wear, and lightly abraded orange-gold surfaces that retain much original mint luster. NGC has graded 80 numerically finer examples (1/18). NGC ID# 26A6, PCGS# 8956

1869-S Liberty Double Eagle, AU58 Popular Type Two Twenty

5976 1869-S AU58 NGC. CAC. The 1869-S Liberty double eagle claims a substantial mintage of 686,750 pieces, but the issue is definitely scarce in Mint State grades today. This impressive near-Mint example exhibits just a trace of actual wear on the high points of the well-detailed design elements. The lightly abraded orange-gold surfaces are still lustrous, especially on the reverse. NGC ID# 26A6, PCGS# 8956

1870 Liberty Twenty, AU58 Better Philadelphia Issue

5977 1870 AU58 NGC. From a relatively small Philadelphia Mint production of 155,185 pieces, the 1870 Liberty double eagle is a better date in high grade. This attractive near-Mint specimen shows the slightest trace of wear on the strongly impressed design elements and the lustrous orange-gold surfaces are appropriately abraded for the grade. Census: 72 in 58 (2 in 58+), 39 finer (1/18). NGC ID# 26A7, PCGS# 8957

5978 1870-S AU55 NGC. The 1870-S Liberty double eagle is a popular Type Two issue from a mintage of 982,000 pieces. This impressive Choice AU specimen is lightly worn and lightly abraded, with orange-gold surfaces that retain much original mint luster. NGC ID# 26A9, PCGS# 8959

- 5979 1871-S AU55 NGC. Micro S. Tiny marks are distributed, but this Type Two twenty is free from any singular detractions. Luster individually outlines obverse stars, and fills the legends and rays. Close to 150 years old, yet available for only a moderate premium above melt. NGC ID# 26ND, PCGS# 8962
- 5980 1871-S AU58 PCGS. Moderate luster remains in the fields of this yellow-gold coin, while slight high-point friction prevents a Mint State designation. Both sides have extensive surface chatter as is typical of AU-level Type Two San Francisco twenties. The 1871-S is scarce in Mint State but moderately available in the upper AU grades. NGC ID# 26ND, PCGS# 8962
- 5981 1871-S AU58 PCGS. Only light wear shows on the well-detailed design elements of this popular Type Two Liberty double eagle, and the lightly abraded orange-gold surfaces retain significant amounts of original mint luster. The 1871-S is a scarce issue in finer grades. NGC ID# 26ND, PCGS# 8962
- 5982 1872 AU58 PCGS. This is a spectacular near-Mint coin, showing radiant yellow-gold luster that has considerable "pop" in the fields. The strike is sharp and only light high-point friction is visible, mainly on the obverse. A linear mark in the field near Liberty's nose is the only singular abrasion, although surface chatter covers much of the obverse. NGC ID# 26AD, PCGS# 8963
- 5983 1872-S AU58 NGC. The mintmark is small and centered over the N in TWENTY. This rose-gold near-Mint example has olive overtones where slight high-point friction occurs. Scattered abrasions are as expected for the grade. The 1872-S is scarce in Mint State and sought-after in the upper AU grades. NGC ID# 26AF, PCGS# 8965
- 5984 1873 Open 3 MS62 NGC. Sharply detailed in most areas, this attractive MS62 double eagle shows just a touch of the usual softness on Liberty's hair at the top. The lustrous orange-gold surfaces are lightly marked for the grade. NGC ID# 26AL, PCGS# 8067
- 5985 1873 Open 3, Doubled Die Obverse, FS-101, MS62+ PCGS. CAC. LIBERTY is die doubled on this Open 3 variety. This piece is vibrantly lustrous with original yellow-gold surfaces and a bold strike. Scattered light abrasions limit the grade, but the eye appeal is outstanding nonetheless, earning both a Plus designation and a CAC green label. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

1874-CC Double Eagle, XF45 Original Old West Gold

- 5986 1874-CC XF45 PCGS. Variety 4-A. A well-defined orange-gold Choice XF example. Only lightly abraded, given its service in Old West commerce. At least six die varieties exist for this Carson City issue, despite a fairly low mintage of 115,085 pieces. Variety 4-A is distinguished by a lump on Liberty's neck near the large curl. NGC ID# 26AP, PCGS# 8971
- 5987 1874-CC Repaired NGC Details. AU. Variety 1-A. Both sides of this yellow-gold Carson City type coin are extensively hairlined, but no repair is readily evident. We note a minor edge knock at 3 o'clock on the reverse, but there are no other mentionable marks. NGC ID# 26AP, PCGS# 8971
- 5988 1874-S MS61 PCGS. Small squat S. A lustrous caramel-gold Liberty twenty. Customary for the issue, the strike is crisp, and both sides display a smattering of small abrasions, along with a graze on the cheekbone and a vertical field mark near the profile. NGC ID# 26AR, PCGS# 8972

1875-CC Twenty Dollar, XF45

5989 1875-CC XF45 NGC. Variety 7-A. A remarkable 16 die varieties are confirmed from the comparatively low mintage of 111,151 pieces. Presumably, mintages of Seated silver coinage continually interrupted gold production, and suitable dies were selected at random when twenty dollar pieces were needed again. The present luminous almond-gold Carson City twenty is typically abraded and exhibits considerable luster for the Choice XF level. NGC ID# 26AT, PCGS# 8974

5990 1875-S MS61 NGC. From a mintage of 1.2 million coins, this is one of the few accessible Type Two double eagle issues in Mint State. Luster remains vibrant over sun-gold surfaces. The reverse is better-struck than the obverse, and there are myriad abrasions scattered throughout. NGC ID# 26AU, PCGS# 8975

1876-CC Double Eagle, XF45 Carson City Issue

5991 1876-CC XF45 PCGS. Variety 5-A. Both sides display a greater extent of luster than is customary for the XF45 grade, and the rich orange and green-gold toning is attractive. Minor marks are distributed, but we note only a tick on the rim beneath the 6 in the date. A few traces of struck-in grease (as made) are located on the eagle's shield and left (facing) wing. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, XF45 Accessible Western Mint Issue

5992 1876-CC XF45 PCGS. Variety 5-B. The reverse is unique to this die pair, featuring the second C in the mintmark over the left side of the T. This is a collector-grade example with a uniform layer of blending over the devices. Medium yellow-gold surfaces are relatively smooth for the grade. The 1876-CC twenty dollar ranks among the more accessible issues from this popular Western facility. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU50 Variety 3-D, Wide CC Mintmark

5993 1876-CC AU50 PCGS. Variety 3-D. The Heritage numismatic staff have identified 10 varieties in various combinations of seven obverse dies and four reverse dies. This reverse die has the mintmark more widely spaced than any of the other three reverse dies, and it was used with a single obverse die. Breen assigned number 7262 in his Encyclopedia to the Wide CC variety, and noted that it is rare. This is the only occurrence of the first C directly above the center of the N in TWENTY. The second C is centered over the left edge of the adjacent T. Traces of mint luster remain in the protected areas of this honey-gold example that exhibits myriad trivial marks. NGC ID# 26AW, PCGS# 8977

5994 1876-S MS62 PCGS. This bright yellow-gold Type Two double eagle displays frosty cartwheel luster and only minor, scattered abrasions. Well-struck design elements add to the appeal, which is strong for the MS62 grade level. The 1876-S double eagle is elusive in finer condition. NGC ID# 26AX, PCGS# 8978

1877-CC Double Eagle, VF30 Popular Carson City Issue

5995 1877-CC VF30 NGC. Variety 3-A. Pockets of orange-tinged luster accompany design elements of this midgrade Carson City twenty. A loupe reveals minor marks, mostly on the reverse, but the eye appeal is attractive for the third-party grade. Following three years of mintages above 100,000 pieces, the 1877-CC has a smaller emission of 42,565 pieces. NGC ID# 26AZ, PCGS# 8983

5996 1877-S MS62 PCGS. Despite a mintage of more than 1.7 million pieces, the 1877-S Liberty double eagle is seldom encountered in grades above the MS62 level. This attractive MS62 specimen offers well-detailed design elements and lustrous apricot-gold surfaces on both sides. Some minor chatter on Liberty's cheek and the left obverse field define the grade. PCGS has graded 35 numerically finer examples (1/18). NGC ID# 254B, PCGS# 8984

5997 1878 MS61+ NGC. CAC. This is an eye-catching coin, appropriately recognized by CAC and NGC as superior for the grade. The strike is sharp throughout, and the fields are prooflike to the point of producing modest cameo contrast on the reverse. Scattered light abrasions limit the grade but are an afterthought in light of this coin's many outstanding attributes. NGC ID# 26B3, PCGS# 8985

5998 1878 MS62 PCGS. The surviving population of 1878 double eagles is generally found in MS61 to MS62 condition. Finer examples rarely come to light. Green and rose-gold hues coalesce throughout this radiant, crisply struck twenty dollar piece. Scattered abrasions are mostly superficial rather than deep and detracting. NGC ID# 26B3, PCGS# 8985

5999 1878 MS62 NGC. The 1878 Liberty double eagle is a plentiful Type Three issue in lower grades, but it becomes very scarce above the MS62 level. This impressive example exhibits sharply detailed design elements and lustrous orange-gold surfaces that show a scattering of contact marks on both sides. NGC has graded 36 finer examples (1/18). NGC ID# 26B3, PCGS# 8985

6000 1878 MS62 PCGS. Mint State examples of the 1878 double eagle are seldom offered finer than the present MS62 example. Frosty yellow-gold surfaces yield original luster and are vibrant when rotated beneath a light. Unobtrusive, scattered abrasions limit the grade. PCGS lists 56 finer submissions (1/18). NGC ID# 26B3, PCGS# 8985

1878-CC Double Eagle, XF Details Better Carson City Issue

6001 1878-CC — Improperly Cleaned — NGC Details. XF. Variety 1-A. A honey-gold representative with unobtrusive hairlines across relatively unabraded surfaces. The curls and the centers of the wings display wear consistent with the XF level. Despite a scant mintage of 13,180 pieces for the '78-CC, three die pairs are confirmed. Most examples, though, are Variety 1-A, which features a widely spaced mintmark and a bold die line on Liberty's neck.

1878-S Double Eagle, MS62 Rare in Finer Condition

6002 1878-S MS62 NGC. Any Uncirculated 1878-S double eagle is a condition rarity. This MS62 is on the cusp of joining some of the best-preserved examples. Orange-gold surfaces are abraded, but they maintain surprisingly good eye appeal thanks in part to vibrant mint frost. Strongly impressed on each side. There are only eight finer submissions at NGC (1/18). NGC ID# 338K, PCGS# 8987

6003 1879 MS61 PCGS. The 1879 double eagle is somewhat elusive in all Mint State grades but is genuinely scarce above MS61. This collector-grade Uncirculated coin displays sharp design elements and frosty yellow-gold luster. Scattered light abrasions do not overly detract. NGC ID# 26B6, PCGS# 8988

1880 Double Eagle, AU58 Wheat-Gold With Reddish Accents

6004 1880 AU58 PCGS. CAC. This AU58 1880 double eagle boasting CAC approval clearly approaches a rarely awarded Mint State assessment. Reddish accents complement the wheat-gold color that dominates both sides. Vibrant luster remains, and the strongly impressed relief elements exhibit little trace of blending. Minimally marked. CAC: 9 in 58, 1 finer (1/18). NGC ID# 26BA, PCGS# 8992

1882-CC Twenty Dollar, XF45 Popular CC-Mint Issue

6005 1882-CC XF45 NGC. Variety 1-B. Liberty's curls show moderate high point wear, but glimmers of luster are prevalent, especially on the reverse. This apricot-gold Carson City coin is refreshingly free from noticeable marks and is attractive for the designated grade. The 1882-CC was the first Carson City issue since 1879, and the mintage was less than 40,000 pieces. NGC ID# 26BF, PCGS# 8997

1882-CC Twenty Dollar, XF45 Green Label Holder

6006 1882-CC XF45 PCGS. Variety 1-B. The dusky orange-gold and olive-green surfaces are original, and lightly abraded save for a single diagonal line east of the ear. The 1882-CC has a mintage of less than 40,000 pieces, which compares favorably to the 1882-S production of 1,125,000 twenties. Housed in a green label holder. NGC ID# 26BF, PCGS# 8997

6007 1882-S MS61 PCGS. This Type Two San Francisco coin is sharply struck and lustrous with original straw-gold coloration. Moderate surface chatter limits the grade, but no individually major abrasions are noted. The 1882-S is a popular date for type purposes. NGC ID# 26BG, PCGS# 8998

1883-CC Double Eagle, Choice XF

6008 1883-CC XF45 NGC. Variety 2-A. A dusky wheat-gold Carson City type coin. The surfaces show relatively few marks aside from a couple of ticks on Liberty's chin. Luster glints from the stars, rays, and legends. The mintage of 59,962 pieces is approximately 5% of the San Francisco production that year. NGC ID# 26BH, PCGS# 8000

1883-CC Double Eagle, XF45 Smooth, Well-Preserved Surfaces

6009 1883-CC XF45 PCGS. Variety 2-A. Importations from Europe have made this low-mintage Carson City double eagle issue more accessible in recent years, but it is still subject to much greater demand than the available supply can satisfy. Hints of luster are still visible within the recesses. Attractive red and khaki-gold hues color well-detailed surfaces that show excellent preservation. There are remarkably few distracting abrasions. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty, XF45 Variety 2-A

6010 1883-CC XF45 PCGS. Variety 2-A. Doug Winter identified two varieties from two obverse dies and a single reverse die. Further study reveals that both dies are different. Since this variety matches his description for obverse 2 and reverse A, the other variety is now designated as Variety 1-B. This Choice XF example is housed in a green-label PCGS holder and exhibits splashes of rose toning on its partially lustrous yellow-gold surfaces. NGC ID# 26BH, PCGS# 8000

1884-CC Twenty Dollar Liberty, AU53 Nice Color, Luster Remains

- 6011 1884-CC AU53 PCGS. Variety 1-A. Olive-gold surfaces display attractive, orange accents with traces of deep-gray toning for the classic look of original, circulated gold. Mint luster remains in sheltered areas. The 1884-CC has a reasonably plentiful mintage of 81,139 pieces, making it one of the more-available Carson City dates from the 1880s. Marks are few and eye appeal is strong. A slight high spot in the dentils exists between stars 12 and 13. NGC ID# 26BK, PCGS# 9001
- 6012 1884-S MS62 PCGS. The 1884 was only struck in proof format and the 1884-CC is rare in Uncirculated condition, putting a considerable amount of date pressure on this S-mint issue. Wheatgold hues and frosted mint luster characterize each side. The strike is strong, and meager marks do not distract. NGC ID# 26BL, PCGS# 9002
- 6013 1885-S MS63 PCGS. The 1885-S is a slightly better date for Type Three representation, but without much of a premium in price despite few pieces graded any finer. This Select twenty displays deep rich-gold color with orange accents and gleaming mint luster. Abrasions are few for the assigned grade, and the strike is above-average. PCGS reports 40 finer examples (1/18). NGC ID# 26BP, PCGS# 9005
- 6014 1887-S MS61 PCGS. Cartwheel luster envelops this Mint State 1887-S double eagle in radiant orange-gold luminance. Sharp design elements further add appeal, and scattered abrasions are not significantly detracting. A truly high-end coin for the MS61 grade level. NGC ID# 26BS, PCGS# 9007
- 6015 1888-S MS62 NGC. The devices are fully rendered throughout this orange-gold double eagle. Surfaces awash in characteristic S-mint frost display surprisingly few major marks for the grade, though we note three reeding marks on the upper cheek and a few more in the adjacent field. NGC ID# 26BU, PCGS# 9009
- 6016 1888-S MS62 PCGS. This sharp, frosty 1888-S double eagle visually surpasses expectations for the MS62 grade level. The reverse is beautifully preserved, and the obverse shows only very faint grazes on the cheek and in the field. Yellow-gold cartwheel luster is vibrant when rotated beneath a light. NGC ID# 26BU, PCGS# 9009
- 6017 1889 MS62 PCGS. Only 44,070 Liberty double eagles were struck at the Philadelphia Mint in 1889. The issue is somewhat scarce at the MS62 grade level. This well-detailed MS62 representative offers vivid orange-gold surfaces with vibrant mint luster and scattered, minor contact marks on both sides. PCGS has graded 31 finer examples (1/18). NGC ID# 2695, PCGS# 9010

1889 Double Eagle, MS62 Natural Orange-Gold Surfaces

6018 1889 MS62 NGC. The production of double eagles at the Mint was famously slow during much of the 1880s. Output picked up in 1888, but died down again in 1889, when only 44,070 twenties were struck. Natural orange-gold surfaces radiate vibrant mint frost and showcase crisp detail. Minimally abraded for the issue with a lightly clashed reverse. There are eight finer submissions at NCG (1/18). NGC ID# 2695, PCGS# 9010

1889-CC Twenty Dollar, XF45 Choice Surfaces, Natural Toning

6019 1889-CC XF45 PCGS. Variety 1-A. The resumption of coinage at the Carson City Mint was troubled, and no significant minting operations could resume until late in 1889. The Nevada mint managed to strike only 30,945 double eagles, and the issue is moderately scarce in all grades as a result. This Choice XF example displays pleasing, original orange-gold color and light wear on the high points. Abrasions are slight, while traces of luster survive the brief time in circulation. NGC ID# 26BV, PCGS# 9011

6020 1889-S MS63 PCGS. The surfaces appear cleaner than the grade suggests, each side covered in warm golden-orange hues and lacking in singular abrasions. Strongly brought-up and aglow in shimmering, frosty mint luster. Few submissions have been awarded a higher grade. NGC ID# 26BW, PCGS# 9012

1890-CC Double Eagle, AU50 Carson City Type Coin

6021 1890-CC AU50 NGC. Variety 1-A. A charming Carson City type coin with original caramel-gold surfaces. Only lightly abraded for the denomination and grade. Luster is particularly prevalent on the reverse. The scarce early die state with full tailfeathers. PLURIBUS and TWENTY exhibit minute die doubling. NGC ID# 26BY, PCGS# 9014

1892-S Twenty Dollar, MS63 Older Holder, CAC Seal

6022 1892-S MS63 NGC. CAC. A lovely lemon-gold Liberty twenty. Booming luster, a sharp strike, and relatively few marks provide attractive eye appeal. A good value relative to the next higher grade. Very scarce with a CAC seal. Certified in a former generation holder. CAC: 28 in 63, 35 finer (1/18). NGC ID# 26C7, PCGS# 9021

6023 1893 MS63+ PCGS. CAC. Some olive tinting accompanies a few light marks on Liberty's cheek and attests to the originality of the frosty straw-gold surfaces. The fields of this Plus-graded 1893 double eagle are mostly clean, and the CAC green label recognizes superior eye appeal for the grade. Finer examples of the date are elusive. NGC ID# 26C8, PCGS# 9022

6024 1893-S MS63 PCGS. CAC. The 1893-S double eagle is available in MS63 but scarce finer. CAC-approved coins in this and finer grades are rare. Well-struck design elements complement frosty yellow-gold mint luster, and scattered abrasions are not bothersome. There are 64 finer submissions recorded at PCGS (1/18). NGC ID# 26CA, PCGS# 9024

6025 1893-S MS62 Prooflike NGC. A remarkable Type Three Liberty double eagle with deeply reflective prooflike fields, this MS62 example exhibits well-detailed design elements and pleasing canary yellow surfaces that show the expected number of contact marks for the grade. Census: 2 in 62 Prooflike, 0 finer (12/17). NGC ID# 26CA, PCGS# 79024

6026 1894 MS63 PCGS. An alloy spot on the rim adjacent to star 5 is the only interruption of luminous orange-gold color that dominates this Select Mint State Philadelphia double eagle. The hair strands, feathers, and stars on each side are fully defined. The certified population drops by approximately 90% in higher grades. NGC ID# 26CB, PCGS# 9025

6027 1894 MS64 PCGS. The Mint struck 1.3 million Liberty double eagles in 1894, but few high-quality examples were saved, making the issue a prime condition rarity above the MS64 level. This sharply detailed Choice specimen displays lustrous orange-gold surfaces with a few minor contact marks on Liberty's cheek. PCGS has graded three finer examples (1/18). NGC ID# 26CB, PCGS# 9025

6028 1894 MS64 NGC. Faint clash marks appear in front of and behind Liberty's portrait on this clean near-Gem that shows swirling mint luster. Peach-gold surfaces are bright and frosty with few serious imperfections. Merely eight finer submissions at NGC (1/18). NGC ID# 26CB, PCGS# 9025

6029 1895 MS62 PCGS. Coruscating mint frost washes over this MS62 double eagle uninhibited by any significant disturbances, though faint grazes and light chatter are noted. Each side is warm yellow-gold and well-defined. The 1895 Liberty Head twenty is most often seen in this grade. It becomes scarce in near-Gem. NGC ID# 26CD, PCGS# 9027

6030 1895 MS64 NGC. The 1895 claims a mintage of 1.1 million coins, but most of them survive in MS62 or below. This is the highest accessible grade level for the issue. Each side presents razor-sharp devices over bright yellow-gold surfaces. Cartwheel mint luster throughout. Only 10 coins finer at NGC (1/18). NGC ID# 26CD, PCGS# 9027

6031 1895-S MS63 PCGS. A Select Uncirculated example with glistening S-mint frost over radiant peach-gold surfaces. This boldly impressed double eagle is one of 1.1 million coins struck. Small abrasions are present on the cheek. The 1895-S becomes exceedingly scarce any finer. NGC ID# 26CE, PCGS# 9028

1896 Double Eagle, MS65 Among the Finest at Both Services

- 6032 1896 MS65 PCGS. Examples of the 1896 double eagle in Select Uncirculated condition or lower are plentiful and usually trade for only a modest premium. Choice representatives are scarce but still collectible. In Gem condition, this Philadelphia issue becomes a major rarity, and none are graded higher at PCGS or NGC. Impeccably preserved peach-gold surfaces shine with frosty mint luster. The devices are fully rendered. A single slender mark appears above the arrowheads. Population: 8 in 65 (1 in 65+), 0 finer (1/18). NGC ID# 26CF, PCGS# 9029
- 6033 1896 Repunched Date, FS-301, MS63 NGC. All four date digits are obviously repunched north. Breen (1988) described the variety as "very rare" but a number of examples have since surfaced. An original sun-gold representative with vibrant luster and lightly marked surfaces. Census: 33 in 63 (1 in 63★), 12 finer (1/18). NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029
- 6034 1896 Repunched Date, FS-301, MS63 NGC. All four date digits are clearly repunched north. Based on auction appearances, the variety constitutes approximately half of better-grade 1896 survivors. This sharply struck green-gold example offers vibrant cartwheel luster and fewer than the anticipated number of marks. Census: 33 in 63 (1 in 63★), 12 finer (1/18). NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029
- 6035 1896-S MS63 PCGS. The 1896-S is elusive in this grade, and it comes scarce in Choice Uncirculated condition. Frosty mint luster mixes with light yellow-gold color over well-defined surfaces. The only singular mark appears above TY in TWENTY. NGC ID# 26CG, PCGS# 9030

1896-S Double Eagle, MS64 Almost Never Seen in Higher Grades

6036 1896-S MS64 PCGS. A single finer example of this issue has appeared in one of our sales over the past 25 years, attesting to the conditional rarity of the 1896-S in high grades. This is the finest representative a collector could reasonably hope to obtain. Frosted mint luster over peach-gold surfaces delivers excellent eye appeal. Well-struck devices on each side. PCGS reports three finer submissions (1/18). NGC ID# 26CG, PCGS# 9030

6037 1897 MS62 NGC. This late-19th century double eagle appears finer than the grade suggests, the sole exception being a series of reeding marks between stars 5 and 6. The devices are boldly impressed, save for the eagle's neck feathers, and lively luster shines from pleasing orange-gold surfaces. NGC ID# 26CH, PCGS# 9031

1899-S Twenty Dollar, MS64 Strongly Struck

6038 1899-S MS64 PCGS. Most star radials are clear and the hair strands are crisply delineated on this near-Gem double eagle from the San Francisco branch mint. Detail is similarly bold on the eagle's neck feathers and wingtips. Coruscating mint frost shimmers over glowing peach-gold surfaces. Small grazes, ticks, and alloy spots are seen. PCGS reports four finer submissions (12/17). NGC ID# 26CN, PCGS# 9036

1900 Liberty Twenty, MS65 Only Two Coins Finer at PCGS

6039 1900 MS65 PCGS. The turn-of-the-century date adds to the appeal, but the 1900 is one of the first Liberty Head issues where a Gem example is not out of reach for many collectors. This vibrantly lustrous MS65 coin offers a radiant cartwheel effect over virtually unmarked, sharply struck, deep reddish-orange surfaces. PCGS lists only two MS66 pieces finer (1/18).

Ex: Houston Signature (Heritage, 11/2012), lot 5207. NGC ID# 26CP, PCGS# 9037

- 6040 1901-S MS63 PCGS. This piece is sharply struck from unlapped dies, showing satiny yellow-gold luster and light, scattered abrasions. The 1901-S double eagle is not nearly as plentiful in high grade as its ten dollar counterpart. Pieces grading finer than MS63 are scarce, and Gems are rare. NGC ID# 26CT, PCGS# 9040
- 6041 1902-S MS63 PCGS. With the 1902-P being as scarce as it is, this San Francisco issue is a much more attractive option, especially in Mint State, for date collectors on a budget. This Select specimen is brightly frosted and well-impressed. A few prominent abrasion appear on the obverse, while the reverse shows few marks whatsoever. NGC ID# 26CV, PCGS# 9042
- 6042 1902-S MS63 PCGS. This is one of two double eagle issues for the year but the only one that is collectible at this level. Finer survivors are rare. Lively mint frost swirls over this well-struck Select representative. A couple of marks on the neck and superficial field grazes limit the assessment. Attractive peach-gold color. NGC ID# 26CV, PCGS# 9042

1903 Double Eagle, MS65 Excellent Eye Appeal

6043 1903 MS65 PCGS. The 1903 double eagle had a modest mintage of just under 300,000 coins, and survivors are elusive in higher grades. For example PCGS has only certified four coins finer than this piece (1/18). Both sides have a bold strike and frosty light yellow luster with excellent eye appeal.

Ex: New York Signature (Heritage, 1/2014), lot 4890. NGC ID# 26CW, PCGS# 9043

1903 Liberty Twenty, MS65+ Rare Any Finer

- 6044 1903 MS65+ NGC. The 1903 Liberty double eagle claims a mintage of 287,200 pieces and the issue is very rare in grades above the MS65 level. This Plus-graded Gem exhibits razor-sharp definition on all design elements and the well-preserved orangegold surfaces radiate satiny mint luster on both sides. NGC has graded 12 numerically finer examples (1/18). NGC ID# 26CW, PCGS# 9043
- 6045 1903-S MS63 PCGS. Uncirculated 1903-S double eagles most often appear at auction in MS61 to MS63. Near-Gems are much scarcer. Mint luster is softly frosted, glistening over orangegold surfaces throughout this well-struck late-date twenty. An identifying mark extends from star 5 to Liberty's eye. NGC ID# 26CX, PCGS# 9044
- 6046 1904 MS64 PCGS. This Liberty double eagle type coin is remarkably nice, even for the designated grade. The lustrous limegreen and apricot-gold surfaces are well struck and display minimal contact. Housed in a first-generation holder. NGC ID# 26CY, PCGS# 9045
- 6047 1904 MS65 PCGS. Examples of the 1904 double eagle are widely available through Gem condition, serving as an ideal type representative for the Liberty Head design. Finer coins are very scarce in comparison. Each side is fully defined and awash in coruscating luster. Abrasions are nearly unseen in the fields, while a couple of minute marks appear under the eye. NGC ID# 26CY, PCGS# 9045
- 6048 1904 MS65 PCGS. The most accessible of all Liberty head double eagles survives to a great extent in MS65 but is remarkably scarce in finer grades. Soft mint luster over warm, minimally abraded orange-gold surfaces is readily appealing. Strong detail on the stars and feathers. NGC ID# 26CY, PCGS# 9045

- 6049 1904-S MS65 PCGS. The double eagles struck in Philadelphia and San Francisco in 1904 had higher mintages than any other issues in the series. For that reason, these double eagles are quintessential type coins. This Gem features a bold strike and frosty light yellow mint luster with excellent eye appeal. PCGS has only certified seven finer examples (1/18). NGC ID# 26CZ, PCGS# 9046
- 6050 1905-S MS63 PCGS. Satiny yellow-gold luster produces a vibrant cartwheel effect on this Select example, while sharp design elements add to the appeal. A small mark on Liberty's jaw is the only imperfection of note, as the surfaces otherwise show only light, scattered grazes that limit the grade. NGC ID# 26D3, PCGS# 9048
- 6051 1905-8 MS64 NGC. An attractive Choice example, with sharply detailed design elements and well-preserved greenish-gold surfaces that radiate vibrant mint luster throughout. The 1905-S Liberty double eagle is very rare in grades above the MS64 level. NGC has graded nine numerically finer examples (1/18). NGC ID# 26D3, PCGS# 9048
- 6052 1906 MS61 NGC. Fewer than 70,000 pieces were struck for this Philadelphia issue, less than 4% of the San Francisco mintage that year. This lustrous representative displays attractive apricot-gold toning. Relevant marks are relegated to the field near obverse star 2. Certified in a prior generation holder.

 Ex: Long Beach Signature (Heritage, 1/2004), lot 7572. NGC ID# 26D4, PCGS# 9049
- 6053 1906-D MS63 PCGS. The inaugural Denver Mint issue was struck to the extent of 620,250 coins but is scarce in MS63. Strike detail is strong over deep orange-gold surfaces. Satin luster is typical for the facility. A lightly abraded, numismatically significant offering. NGC ID# 26D5, PCGS# 9050
- 6054 1906-S MS63 PCGS. The Type Three Liberty Head design tends to come sharply struck more often than not, although this piece does show some weakness on the hair on the top of Liberty's head. Luster is radiant, and the yellow-gold surfaces show only minor imperfections that limit the grade. Eye appeal is pleasing. NGC ID# 26F6, PCGS# 9051
- 6055 1906-S MS63 PCGS. Examples of the 1906-S become scarce in higher grades despite a substantial mintage of 2 million coins. This sharp Select double eagle features glowing mint frost and shades of orange and yellow-gold color. Tiny ticks are the only grade-limiting marks. NGC ID# 26F6, PCGS# 9051
- 6056 1907 MS64+ PCGS. The reverse is virtually perfect, and the obverse shows only a few light marks on Liberty's cheek. Both sides display frosty, radiant yellow-gold luster and sharp design elements. The 1907 Liberty Head double eagle is available in MS64, but PCGS lists only 22 Gems finer (1/18). This Plus-graded near-Gem will appeal to the quality conscious collector. NGC ID# 26D7, PCGS# 9052

1907-D Double Eagle, MS64+ Important Denver Mint Issue

6057 1907-D MS64+ PCGS. CAC. The Denver Mint began coinage production in 1906, and struck Liberty double eagles that year and again in 1907, the last year of the Liberty double eagle series. Either issue is ideal for a type collector seeking Denver Mint coinage, and both issues are scarce in higher grades. This Choice Mint State example features a bold strike and a high degree of frosty yellow mint luster with excellent eye appeal. NGC ID# 26D8, PCGS# 9053

6058 1907-S MS63 PCGS. The 1907-S is the final San Francisco issue of the Liberty Head type. More than 2.1 million pieces were struck, but this date experienced relatively low survival in the upper Mint State levels. The present Select example displays sharp detail and frosty rose-gold luster. NGC ID# 26D9, PCGS# 9054

SAINT-GAUDENS DOUBLE EAGLES

- 6059 1907 Arabic Numerals MS64 PCGS. An always-popular firstyear type in the Saint-Gaudens series. The torch hand and Capitol columns are strong. Warm, softly frosted mint luster emanates from each side. Pleasing honey-gold color. Housed in a green label holder. NGC ID# 26F5, PCGS# 9141
- 6060 1907 Arabic Numerals MS64 PCGS. This Choice Arabic Date coin is bright yellow-gold and vibrantly lustrous, showing limited abrasions. The dies have metal flowlines in the margins, identifying an advanced die state but adding to the vibrancy of the coin's luster. NGC ID# 26F5, PCGS# 9141
- 6061 1908 No Motto MS66 PCGS. This lovely Premium Gem was struck early in 1908 before the motto IN GOD WE TRUST was added to the reverse. This issue is plentiful in all grades, and is an excellent type collection candidate. Both sides of this double eagle display brilliant and frosty yellow luster with pristine surfaces and sharp design details. NGC ID# 26F6, PCGS# 9142
- 6062 1908 No Motto, Wells Fargo Nevada, MS65 NGC. Short Rays obverse. A peach-gold Gem with booming luster and a precise strike. A tick on the left obverse field precludes an even finer grade. A high-grade hoard of this issue, pedigreed to Wells Fargo, was distributed during the late 1990s. Housed in a circa-2000 holder. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142
- 6063 1908-D No Motto MS64+ PCGS. Short Rays obverse. A peach-gold Choice Denver type coin whose sweeping luster, sharp strike, and minimally marked surfaces provide confirmation for the third-party grade. A costly acquisition any finer. NGC ID# 26F7, PCGS# 9143
- 6064 1909/8 FS-301 AU58 PCGS. This is one of the few major varieties in the series, popularly collected because of its inclusion in the *Guide Book*. A trace of friction over well-detailed motifs explains the grade. Each side remains lustrous with yellow-gold color and undistracting field marks. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

1909-D Double Eagle, MS62 One of the Lowest Regular-Issue Mintages

6065 1909-D MS62 NGC. The 1909-D maintains one of the lowest production totals among regular-issue Saint-Gaudens twenties (52,500 coins). On average, survivors grade just shy of MS60. The obverse exhibits strong torch fingers, visage, and Capitol, while the leading edges of the wings and the talons are a touch soft. Satin luster blankets warm orange-gold surfaces. A bagmark in the left obverse field is noted. NGC ID# 26FD, PCGS# 9152

1910 Double Eagle, MS64+ Seldom Offered With CAC Endorsement

- 6066 1910 MS64+ PCGS. CAC. This is a terrific alternative to a scarce and costly Gem example. Ticks and grazes are superficial, generally small and entirely undistracting on the lightly frosted yellow-gold surfaces. Well-struck throughout, including the eagle's trailing talon. Seldom offered with CAC endorsement and worth a premium bid. NGC ID# 26FF, PCGS# 9154
- 6067 1910-D MS64+ PCGS. CAC. The exposed fields show scattered marks, as expected for the near-Gem grade, but they are surprisingly shallow and undistracting. Satiny mint luster shines from light orange-gold surfaces, generating the CAC-approved eye appeal. Uniformly well-struck. NGC ID# 26FG, PCGS# 9155
- 6068 1910-D MS65 PCGS. An excellent Denver Mint type coin that exhibits complete definition on the obverse stars and Capitol building. Radiant mint luster swirls over clean peach-gold surfaces. These characteristics account for the lovely visual quality and high grade that is scarcely surpassed. NGC ID# 26FG, PCGS# 9155

1910-D Twenty Dollar, MS65+ Excellent Surface Quality

- 6069 1910-D MS65+ PCGS. CAC. The 1910-D double eagle is an extremely well-made issue overall, and this example's bold strike, radiant luster, and excellent surface quality exemplify its high production criteria. Yellow-gold surfaces show only a few stray ticks one on Liberty's breast, a couple on the lower legs that may preclude the MS66 grade, a "just-missed" coin. Ex: Central States Signature (Heritage, 4/2015), lot 6527. NGC ID# 26FG, PCGS# 9155
- 6070 1910-S MS64 PCGS. The 1910-S claims a mintage of 2.1 million coins, one of the most plentiful in the early part of the series. The issue also survives to a significant extent through MS64, declining markedly in MS65. A satiny sheen graces appealing honey-gold surfaces. Liberty's face and torch hand are strong. Lightly marked on each side. NGC ID# 26FH, PCGS# 9156
- 6071 1911-D/D FS-501 MS64 PCGS. The curve of the mintmark is clearly repunched east. A lustrous green-gold Choice Saint-Gaudens twenty. The strike is bold and the fields are well preserved. Liberty's left (facing) leg shows moderate contact. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158
- 6072 1911-S MS64+ PCGS. A few coppery alloy spots appear over scintillating wheat-gold surfaces that display top-notch preservation. Strike detail is good, and the only mentionable softness appears on the eagle's talon. The fields are remarkably clean. NGC ID# 26FL, PCGS# 9159

- 6073 1913 MS63 PCGS. CAC. This grade level bridges the gap between more available coins in MS62 and below and exceedingly scarce survivors in near-Gem condition or better. Olive-gold surfaces are aglow in softly frosted, almost satiny mint luster. Undeniably clean for the grade. NGC ID# 26FN, PCGS# 9161
- 6074 1913-D MS64 PCGS. This near-Gem is at the upper limit of what can be considered collectible for the 1913-D twenty dollar gold piece. Satiny and light-orange gold, each side displays the fewest possible marks for the grade. Good strike detail. NGC ID# 26FP, PCGS# 9162
- 6075 1913-D MS64 PCGS. This satiny near-Gem displays sharp motifs and original orange-gold luster with subtle lilac accents. Two small abrasions on and beneath Light's right (facing) arm are the only notable imperfections. The availability of the 1913-D double eagle declines significantly in finer grades. NGC ID# 26FP, PCGS# 9162
- 6076 1913-D MS64+ PCGS. This well-struck near-Gem boasts a Plus designation for quality within the grade, and with good reason. Gleaming orange-gold surfaces exhibit few major marks and certainly none worthy of individual attention. The 1913-D becomes conditionally scarce at the Gem level. NGC ID# 26FP, PCGS# 9162
- 6077 1913-S MS61 NGC. The 1913-S is a better date in all grades, coming from a mintage of only 34,000 coins. This is the second-lowest mintage in the With Motto series, trailing only the 1908-S at 22,000 pieces. This MS61 example displays a bold strike and original orange-gold coloration. Moderate abrasions define the grade. NGC ID# 26FR, PCGS# 9163
- 6078 1914-D MS65 PCGS. The 1914-D is well-known for its availability through Gem condition. However, the certified population declines precipitously in MS66. Orange-gold and lilac hues cover clean surfaces and strongly rendered relief elements. Great technical and visual quality. NGC ID# 26FT, PCGS# 9165
- 6079 1914-S MS63 NGC. This early San Francisco issue is widely regarded as an excellent date for type representation, given its high-grade availability and excellent production quality. Frosty mint luster, strong devices, and warm orange-gold color characterize each side. NGC ID# 82KA, PCGS# 9166
- 6080 1914-S MS65+ PCGS. There is a small group of issues in Saint-Gaudens' double eagle series that can be located with ease in MS65 condition; the 1914-S is among them. Surface coloration transitions from rich orange-gold to light straw-gold on this piece, while copious luster radiates throughout. The strike is uniformly well-impressed, and marks are generally concealed within the design elements. NGC ID# 82KA, PCGS# 9166
- 6081 1914-S MS65+ PCGS. Only in Premium Gem does the 1914-S double eagle begin to pose a challenge. It is exceedingly scarce at that level, almost prohibitively so. This fantastic alternative is bright yellow-gold with swirling mint luster. Well-detailed on Liberty's torch fingers and face. Clean for the Gem assessment and fully deserving of the Plus designation. NGC ID# 82KA, PCGS# 9166
- 6082 1915 MS63 PCGS. An attractive Select specimen from a smallish business-strike mintage of 152,000 pieces, this coin exhibits sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 26FV, PCGS# 9167
- 6083 1915-S MS65+ PCGS. This plentiful S-mint issue typically comes well-struck, as evidenced by the strong, high-end Gem offered here. Soft mint frost radiates over warm orange-gold surfaces that are obviously well-preserved for the grade. From a mintage of 567,500 double eagles, this early twenty is fit for type representation. NGC ID# 26FW, PCGS# 9168
- 6084 1915-S MS65+ NGC. CAC. NGC has Plus-graded only 31 1915-S double eagles, and finer pieces are moderately scarce. This CAC-endorsed coin displays bold definition and satiny straw-gold luster that is free of major abrasions. The originality is apparent even without a loupe. NGC ID# 26FW, PCGS# 9168

6085 1915-S MS65+ NGC. CAC. This high-end Gem is well-detailed and satiny with original straw-gold luster. Only a few minor abrasions appear under a loupe, mainly on the high points of Liberty's figure as usual. The 1915-S is available in this grade but moderately scarce finer. NGC ID# 26FW, PCGS# 9168

1916-S Double Eagle, MS65 Last Issue of the Decade

6086 1916-S MS65 PCGS. Gold coinage production was suspended in 1916 as the U.S. prepared to enter World War I, and that year saw production only at the San Francisco Mint, with the exception of a small number of Philadelphia Mint gold dollars. This Gem double eagle was the last Saint-Gaudens double eagle coined until 1920, and exhibits brilliant yellow surfaces with frosty luster and trivial, grade-consistent marks. Finer examples are seldom encountered. NGC ID# 34NJ, PCGS# 9169

1916-S Double Eagle, Lustrous MS65+ CAC-Endorsed Branch Mint Type

- 6087 1916-S MS65+ PCGS. CAC. Only a few tiny marks are scattered across the frosted, rich-gold surfaces of this high-end Gem 1916-S twenty. The coin displays a sharp strike on the torch and and branch hands, as well as throughout the stars and the central design elements. Those seeking a branch mint Saint can hardly do better than the 1916-S, which is almost always well-struck, lustrous, and attractive. This Plus-graded Gem is one of two dozen such coins at PCGS, and that service reports 179 pieces in finer grades (1/18). NGC ID# 34NJ, PCGS# 9169
- 6088 1920 MS63+ PCGS. CAC. This Select Mint State double eagle represents the first year of continued U.S. Mint gold production following World War I. Slightly less than a quarter-million of these large double eagles were coined in Philadelphia in 1920. This example has brilliant yellow-gold luster and frosty surfaces with minimal marks. NGC ID# 26FY, PCGS# 9170
- 6089 1922 Tripled Die Obverse MS64 NGC. VP-002. Tripling is faint on Liberty's branch, through which numerous die cracks travel on this late die state example. Mint luster radiates softly over each side. Minimally abraded yellow-gold surfaces exhibit good detail on the peripheral stars and the eagle. NGC ID# 26G3, PCGS# 9173
- 6090 1922-S MS63 PCGS. Repatriations from European and South American holdings explain the survivorship of roughly 2,100 1922-S double eagles. That is the only reason collectors today have the opportunity to acquire this former rarity. This Select example is well-struck, as usual, with softness limited to the Capitol dome. Each side is a light shade of peach-gold with frosty mint luster. NGC ID# 26G4, PCGS# 9174

1922-S Twenty Dollar, MS64 Former Rarity, Meager Survivorship

- 6091 1922-S MS64 PCGS. The 1922-S double eagle is available in MS64, but PCGS has seen only 20 submissions in all finer grades combined (1/18). This piece has an arcing die crack through LIBERTY and a thin pinscratch across the top of the Capitol building. The coin is otherwise problem-free and well-struck with warm honey-gold luster. NGC ID# 26G4, PCGS# 9174
- 6092 1923 MS64+ NGC. CAC. This CAC-approved near-Gem is very close to an MS65 designation. Only a few small, scattered marks appear under a loupe, and the luster is especially frosty and luminous with an attractive rose-gold hue. A plentiful date in MS64 but seldom offered with a Plus designation. NGC ID# 26G5, PCGS# 9175
- 6093 1923-D MS66 NGC. Repatriations in past decades have made the 1923-D the most collectible branch mint double eagle from the 1920s. It largely escape melting after the Gold Recall by remaining in international vaults. This Premium Gem must have sat undisturbed for some time, unaffected by bank-to-bank transfers. Its vibrant peach-gold surfaces are nearly free of bagmarks. A razor-sharp strike seems only fitting for a coin of this quality. Very scarce in higher grades. NGC ID# 26G6, PCGS# 9176
- 6094 1923-D MS66 PCGS. The Denver Mint produced Saint-Gaudens double eagles from 1908 through 1914, omitting 1912, and again from 1923 through 1927, and in 1931. The pre-World War I issues except for 1909 are all plentiful, and the 1923 is likewise easily encountered, but all other issues are rare. This Premium Gem has frosty and highly lustrous rose-gold surfaces with excellent design definition. PCGS has only certified 76 finer examples (1/18). NGC ID# 26G6, PCGS# 9176
- 6095 1923-D MS66 PCGS. The 1923-D Saint-Gaudens double eagle is famous for exceptional luster and eye appeal, and the present example does not disappoint. Vibrant, frosty surfaces yield lovely orange-gold and rose hues without any severe abrasions only a few light marks appear on the high points of Liberty's figure. There is a heavy die crack on the sun below IN GOD WE TRUST. NGC ID# 26G6, PCGS# 9176
- 6096 1924 MS65 NGC. A fully lustrous Gem, this 1924 double eagle is sharply struck with brilliant yellow-gold surfaces and frosty mint luster. Minimal marks are expected at this grade level. NGC ID# 26G7, PCGS# 9177
- 6097 1924 MS65+ PCGS. CAC. This high-end Gem exhibits sharply defined design elements and vivid yellow-gold surfaces, with vibrant mint luster and hints of green and red patina. The eye appeal is extraordinary, as the Plus designation and CAC green label suggest. Perfect for type purposes.

Ex: ANA Signature (Heritage, 8/2014), lot 4333; Beverly Hills Signature (Heritage, 11/2014), lot 5366; PNG Invitational Signature (Heritage, 2/2015), lot 4310. NGC ID# 26G7, PCGS# 9177

6098 1924 MS66 NGC. The 1924 Saint-Gaudens double eagle is recognized as the most plentiful issue in the series, and that makes it the ideal candidate for type collectors who seek a single example. Enough survive in MS66 and finer grades that any desired quality is obtainable. This Premium Gem is a lovely example with frosty and fully brilliant luster, minimal marks, and a strong strike. NGC ID# 26G7, PCGS# 9177

- 6099 1924 MS66 PCGS. The 1924 Saint-Gaudens double eagle claims a large mintage of 4.3 million pieces, and it was not as heavily melted as many other dates of this period, making it an available issue in high grade and a popular choice of type collectors. This delightful Premium Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster throughout. NGC ID# 26G7, PCGS# 9177
- 6100 1925 MS66 PCGS. A delightful Premium Gem, with vivid orange-gold surfaces that are well-preserved and lustrous, with outstanding eye appeal. From a mintage of 2.8 million pieces. PCGS has graded seven numerically finer examples (1/18). NGC ID# 26GA, PCGS# 9180
- 6101 1926 MS65 PCGS. An outstanding peach-gold Gem. Sharply struck and lustrous with exceptionally smooth surfaces. The 1926 is part of a short run (1922 to 1928) of prevalent Philadelphia issues, but high-quality examples are always in demand. Certified in a first-generation holder. NGC ID# 26GD, PCGS# 9183
- 6102 1926 Tripled Die Obverse, FS-101, MS64 PCGS. A collectible Cherrypickers' Guide variety with a Tripled Die Obverse that is most apparent on Saint-Gaudens' initials and the surrounding rays. Glowing orange-gold surfaces present well-struck motifs and lightly scattered ticks. Eye appeal is impressive. NGC ID# 26GD, PCGS# 145744 Base PCGS# 9183
- 6103 1926 Tripled Die Obverse, FS-101, MS65 NGC. The rays and designer's initials exhibit overt die tripling, adding to the interest of this magnificent Gem double eagle. Bright mint frost and luminous yellow-gold coloration further contribute to the appeal. A razor-sharp example. NGC ID# 26GD, PCGS# 145744 Base PCGS# 9183
- 6104 1927 MS65 PCGS. A delightful Gem representative of this popular type issue, with sharply detailed design elements in most areas (just a touch of softness shows on Liberty's foot and the rock) and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. NGC ID# 26GG, PCGS# 9186
- 6105 1927 MS66+ PCGS. We concur with PCGS that this remarkable 1927 double eagle is only one or two minor imperfections away from Superb Gem condition and is fully worthy of the MS66+ designation. Sharp motifs and frosty, vibrant surfaces show almost no discernible abrasions, with Liberty's figure and the obverse fields being particularly clean. PCGS has seen only 23 higher-grade submissions (12/17). NGC ID# 26GG, PCGS# 9186
- 6106 1928 MS65+ PCGS Secure. This orange-gold, high-end Gem shows hints of lilac throughout the vibrant, frosty surfaces. Sharp design elements and mostly clean surfaces produce outstanding visual appeal. The 1928 is the last readily available date in the Saint-Gaudens double eagle series, popular among type collectors in MS65 and better grades. NGC ID# 34VK, PCGS# 9189
- 6107 1928 MS65 NGC. CAC. A fully struck peach-gold Gem. Lustrous and beautiful with a clean reverse and only wispy grazes on the obverse field. A high mintage issue from the Roaring' Twenties, but quality examples are always in demand to represent the type. Housed in a prior generation holder.

Ex: FUN Signature (Heritage, 1/2015), lot 7838, which realized \$2,115. NGC ID# 34VK, PCGS# 9189

1928 Twenty Dollar, Glowing MS66+ Ideal Saint-Gaudens Type Coin

6108 1928 MS66+ PCGS. The 1928 is a perfect issue to represent the Saint-Gaudens type. Its widespread accessibility across virtually all Mint State grade levels reflects an enormous production of 8.8 million coins and large-scale repatriation from overseas holdings. Glowing medium yellow-gold surfaces present coruscating mint frost and a dearth of apparent flaws. The torch fingers are strong, and partial detail appears on the Capitol columns. NGC ID# 34VK, PCGS# 9189

TERRITORIAL GOLD

1849 Moffat Five Dollar, Fine 12 Kagin-4, Popular Gold Rush Coiner

6109 1849 Moffat & Co. Five Dollar Fine 12 PCGS. K-4, R.5. The portrait displays substantial wear, but most of the stars are sharp, and the eagle's wings are nicely defined. The sun-gold surfaces are refreshingly unabraded. Moffat & Co. was the most-respected West Coast private gold coiner. Housed in an old green label holder. Listed on page 395 of the 2018 Guide Book. NGC ID# ANJ5, PCGS# 10240

1849 Moffat & Co. Five, VF25 Late-State K-4a Variety

6110 1849 Moffat & Co. Five Dollar VF25 NGC. K-4a, R.4. Heavy die breaks appear around the reverse border legends. The design of this early Moffat & Co. issue is similar to that of the federal half eagle, although Liberty's coronet reads MOFFAT & CO instead of LIBERTY, and the reverse border legend reads S.M.V. CALIFORNIA GOLD instead of UNITED STATES OF AMERICA. The denomination was also formatted differently, reading FIVE DOL. instead FIVE D. as seen on the federal equivalent. This midgrade example displays even wear and original olive-gold coloration. No major distractions are present. Listed on page 395 of the 2018 Guide Book.

From The Bayside Collection. NGC ID# ANJ5, PCGS# 10240

1849 Moffat & Co. Five, K-4a, VF25 Early Gold Rush Issue

6111 1849 Moffat & Co. Five Dollar VF25 NGC. K-4a, R.4. A die crack on the reverse connects the O and L in DOL. The IVE in FIVE are all connected at their tops, and the bottom of the E has a triangular chip out of the die just below the upright. Other defects show on various other reverse letters. This piece exhibits moderate circulation wear, but there are no distracting abrasions on the greenish-gold surfaces. The reverse die is rotated about 45 degrees counterclockwise. Listed on page 395 of the 2018 Guide Book. Ex: Long Beach Signature (Heritage, 9/2006), lot 4826.

From The Bayside Collection. NGC ID# ANJ5, PCGS# 10240

1849 Moffat & Co. Five Dollar, VF25 Early State of the K-4a Variety

6112 1849 Moffat & Co. Five Dollar VF25 NGC. K-4a, R.4. This piece is in an early state of the K-4a die variety, as the crack through the denomination is beginning but not as far advanced as is seen on most K-4a examples. This piece has even wear and original orangegold coloration. Some coppery overtones appear in the protected reverse peripheries. Listed on page 395 of the 2018 Guide Book. From The Bayside Collection. NGC ID# ANJ5, PCGS# 10240

1849 Moffat Half Eagle, VF25 Scarce Kagin-4

6113 1849 Moffat & Co. Five Dollar VF25 NGC. K-4, R.5. This problem-free 1849 Moffat five dollar shows considerable eye appeal remaining despite 35 points of wear. The wheat-gold surfaces show deeper tan accents about protected areas. There is no sign of the late die state die break through the denomination at E DO, although there is a slender mark through the E, and the portrait displays faint hairlines. Listed on page 395 of the 2018 Guide Book. Ex: Donald E. Bently Collection (Heritage, 3/2014), lot 30541.

From The Bayside Collection. NGC ID# ANJ5, PCGS# 10240

1853 Assay Office Twenty Dollar 900 Thous., Kagin-18 VF Sharpness

6114 1853 Assay Office Twenty Dollar, 900 Thous. — Harshly Cleaned — NGC Details. VF. K-18, R.2. Among the final issues from the San Francisco Assay Office, Kagin-18 was struck in quantity to coin gold rush gold, the cornerstone of the West Coast economy. The present sun-gold piece is hairlined and has a small rim knock on the obverse near 6 o'clock. It is a collectible representative of the U.S. Assay Office, in operation for only three years. Listed on page 399 of the 2016 Guide Book. NGC ID# ANHD, PCGS# 10013

1860 Clark, Gruber & Co. K-2 Five Dollar Popular Colorado Issue, AU Details

6115 1860 Clark, Gruber & Co. Five Dollar — Repaired — PCGS Genuine. AU Details. K-2, R.4. The noted repair refers to areas of smoothing within the star recesses and reverse legends. It is minimally distracting and does not overly affect the appeal of this Denver, Colorado territorial gold piece. Both sides are orange-gold with a touch of softness over the portrait and eagle, as always. The peripheral design elements are strongly defined. Listed on page 409 of the 2018 Guide Book.

CALIFORNIA FRACTIONAL GOLD

- 6116 1855 Liberty Round 25 Cents, BG-226A, R.5, MS64 NGC. An exceptionally nice caramel-gold Choice Liberty quarter. Struck from lightly rusted dies, but free from any post-strike detractions. The strike is sharp except on the lower left obverse dentils. Census: 3 in 64, 0 finer (1/18). NGC ID# 2BHZ, PCGS# 10417
- 6117 1853 Octagonal Liberty, Peacock Reverse, 50 Cents, BG-302, Low R.4, AU55 PCGS. Breen-Gillio Die State IV with an obverse cud near 3 o'clock. BG-302 is popularly known as the Peacock variety, since the glory rays above the bird resemble the tail of a peacock. A distinctive variety. Rich orange-gold and sea-green toning embraces problem-free surfaces. Housed in a green label holder. Listed on page 412 of the 2018 Guide Book as "Small Eagle With Rays."

 From The Merrill Collection. NGC ID# 2BJ7, PCGS# 10422

1853 Liberty Octagonal Gold Dollar Rare BG-522 Variety, AU58 Terminal Die State

- 6118 1853 Liberty Octagonal 1 Dollar, BG-522, High R.6, AU58 PCGS. Die State III, with the obverse shattered. This is a rare Period One octagonal gold dollar made by M. Deriberpie (DERI appears on the reverse in the exergue). The coin is sharp on the reverse but moderately weak on the obverse due to the die failure. Satiny greengold luster blankets each side with little high-point friction. Housed in an old green label holder. Population: 8 in 58, 4 finer (1/18). From The Admiral Collection. NGC ID# 2BLL, PCGS# 10499
- 6119 1872 Washington Octagonal 25 Cents, Baker-503, BG-722, Musante GW-818, Low R.4, MS62 NGC. The yellow-gold surfaces of this Washington Head specimen display a slight greenish cast and the design features are for the most part evenly struck. Light handling marks define the grade. Census: 3 in 62, 23 finer (12/17).
 - Ex: Long Beach Signature (Heritage, 9/2009), lot 1995. NGC ID# 2BN4, PCGS# 10549
- 6120 1872 Washington Octagonal 25 Cents, Baker-503, BG-722, Musante GW-818, Low R.4, MS64 PCGS. The fractional gold series is dominated by Indian and Liberty heads, but a few die marriages by Frontier & Bellemere feature the first president. The second edition of Breen-Gillio calls BG-722 "one of the most popular of all small California gold pieces." Sharply struck, smooth, and flashy with sun-gold centers and rose-red borders. NGC ID# 2BN4, PCGS# 10549
- 6121 1872 Washington Octagonal 25 Cents, Baker-503, BG-722, Musante GW-818, Low R.4, MS64 PCGS. BG-722 through BG-724 are the distinctive and popular octagonal Washington quarter varieties. BG-723 and BG-724 are rare, but BG-722 is merely scarce, though always in demand. A sharply struck sea-green and honey-gold near-Gem that boasts unabraded fields. Certified in an old green label holder.
 From The Admiral Collection. NGC ID# 2BN4, PCGS# 10549
- 6122 1875 Indian Octagonal 25 Cents, BG-797, Low R.4, MS66 PCGS. A prooflike sun-gold Premium Gem. The strike is consistent and the preservation is exemplary. The reverse has a concave appearance, as delivered from the dies. Population: 5 in 66, 0 finer (1/18). NGC ID# 2BRH, PCGS# 10624

1880/70 Octagonal Quarter, BG-799H MS66 Deep Mirror Prooflike

- 6123 1880/70 Indian Octagonal 25 Cents, BG-799H, High R.6, MS66 Deep Mirror Prooflike NGC. Christoph Mohrig issue with a No CAL reverse. These were intended for sale outside of California, namely in the East or Midwest, but an interesting anecdote in the Breen-Gillio reference details a Swede returning to his home country who brought one back from California in 1890. This Deep Mirror Prooflike example is strongly detailed with watery jet-black fields. The motifs display a thick layer of frost. NGC ID# 2BRU, PCGS# 10634
- 6124 1875 Indian Round 25 Cents, BG-878, R.3, MS67 Deep Mirror Prooflike NGC. A well struck sun-gold Premium Gem with outstanding preservation and highly reflective fields. The Indian has a sleepy expression on this more available Christopher Mohrig die marriage. Census: 3 in 67 Deep Mirror Prooflike, 0 finer (1/18). NGC ID# 2BVD, PCGS# 910739 Base PCGS# 10739
- 6125 1881 Indian Round 25 Cents, BG-887, R.3, MS67 Deep Mirror Prooflike NGC. An impressive light yellow-gold example of the diminutive California fractional 25 cent gold piece, seen here with bold design definition on both sides. A lovely Superb Gem example of the popular Indian Head design. Census: 7 in 67 Deep Mirror Prooflike, 0 finer (1/18). NGC ID# 2BVN, PCGS# 910748 Base PCGS# 10748
- 6126 1868 Indian Octagonal 50 Cents, BG-960A, High R.6, MS64 PCGS. CAL. is all but effaced on this variant of the also rare BG-960, first published in the March 1884 Coin Collector's Journal. The design elements are sharply defined, save for CAL. Green-gold surfaces display smooth reflective fields. Population: 2 in 64, 3 finer (1/18).

Ex: FUN Signature (Heritage, 1/2008), lot 5211; Long Beach Signature (Heritage, 2/2009), lot 3197; FUN Signature (Heritage, 7/2011), lot 5335, which realized \$862.50.

From The Merrill Collection. NGC ID# 2BXZ, PCGS# 10829

6127 1870 Goofy Head Octagonal 1 Dollar, BG-1118, Low R.5, MS61 NGC. Walter Breen and Ronald Gillio (2003) describe the head as "lantern-jawed" and say that the four stars above it are "grotesquely repunched." That seems a bit harsh. Charming butter-yellow patina covers both sides. The borders are weak, as always, but there are no marks of any significance. Census: 5 in 61, 3 finer (12/17). Ex: Long Beach Signature (Heritage, 9/2009), lot 2004. NGC ID# 2C3K, PCGS# 10929

1872 Indian Round Dollar, MS63 BG-1207, Christopher Mohrig Issue

6128 1872 Indian Round 1 Dollar, BG-1207, R.4, MS63 PCGS. This Period Two Round dollar by Christopher Mohrig, who was arrested in 1876 for producing these and other coins, has reddish-gold surfaces and visible contrast between frosted motifs and somewhat reflective fields. The portrait and wreath are strong, with softness on the stars and DOLLAR. Housed in an old green label holder. Population: 22 in 63, 13 finer (1/18).

- 9608 1883 Hawaii Dollar AU53 NGC. NGC Census: (24/179). PCGS Population: (40/192). CDN: \$1,050 Whsle. Bid for problem-free NGC/ PCGS AU53. Mintage 46,348. NGC ID# 2TGD, PCGS# 10995

9609 1882 Haiku Plantation One Rial Token — Environmental Damage — NCS. XF Details. M. TE-15. Incorrectly attributed by NCS as Medcalf TE-6A. Listed on page 425 of the 2018 Guide Book. NGC ID# 2UBZ, PCGS# 600518

SO-CALLED DOLLAR

9610 1939 Golden Gate Exposition, Pacifica Gold Dollar, AU58 ANACS. HK-488, Shevlin-Hyder J1, R.8.

ERRORS

- 9611 1860 Cent Struck on a Defective Planchet MS64 NGC.
- 9612 1920 Nickel Struck 10% Off Center MS65 NGC.
- 9613 1936 Buffalo Nickel Broadstruck MS66 NGC.
- 9614 1891 Dime Struck 3% Off Center AU53 PCGS.
- 9615 1928 Dime Struck 20% Off Center, Improperly Cleaned — NGC Details. Unc.
- 9616 1811 Half Dollar, Large 8 Misaligned Die VF35 PCGS. From The Merrill Collection.
- 9617 1812 Half Dollar, Large 8 Double Struck Obverse — VF30 PCGS. From The Merrill Collection.
- 9618 1824 Half Dollar, O-117, R.1 —
 Double Struck, First Strike Off Center
 XF40 NGC.
 From The Merrill Collection.
- 9619 1876 Half Dollar Partial Collar Strike — AU55 PCGS. From The Merrill Collection.

CERTIFIED MODERN PROOF SETS

- 9620 Five-Piece 1938 Proof Set PR66 to PR66 PCGS. The holders display consecutive certification numbers. The set includes: Cent PR64 Red; Nickel PR66; Dime PR66; Quarter PR66; Half Dollar PR64.

 From The Property of a Lady. (Total: 5 coins)
- 9621 Five-Piece 1938 Proof Set PR64 PCGS. The coins are separately certified in old green label holders. The set includes: Cent PR64 Red; Nickel PR64; Dime PR64; Quarter PR64; Half Dollar PR64.

 From The Merrill Collection. (Total: 5 coins)

- 9622 Five-Piece 1938 Proof Set PR65 to PR66 PCGS. The coins are separately certified in old green label holders. The set includes: Cent PR65 Red; Nickel PR65; Dime PR65 CAC; Quarter PR66; Half Dollar PR65. From The Merrill Collection. (Total: 5 coins)
- 9623 Five-Piece 1939 Proof Set PR64 to PR66 PCGS. The holders exhibit consecutive certification numbers. The set includes: Cent PR64 Red; Reverse of 1938 Nickel PR66; Dime PR66; Quarter PR64; Half Dollar PR66. From The Property of a Lady. (Total: 5 coins)
- 9624 Five-Piece 1939 Proof Set PR65 to PR66 PCGS. The coins are separately certified in old green label holders. The set includes: Cent PR65 Red; Reverse of 1938 Nickel PR66; Dime PR65; Quarter PR65; Half Dollar PR65. From The Merrill Collection. (Total: 5 coins)
- 9625 Five-Piece 1939 Proof Set PR65 PCGS. The coins are separately certified in first-generation holders. The set includes: Cent PR65 Red; Reverse of 1938 Nickel PR65; Dime PR65; Quarter PR65; Half Dollar PR65. From The Merrill Collection. (Total: 5 coins)
- 9626 Five-Piece 1940 Proof Set PR64 to PR65 PCGS. The coins are separately certified in first-generation holders. The set includes: Cent PR64 Red; Reverse of 1940 Nickel PR65; Dime PR64 Gold CAC; Quarter PR64; Half Dollar PR64. From The Merrill Collection. (Total:

5 coins)

- 9627 Five-Piece 1940 Proof Set PR65 to PR66 PCGS. The coins are separately certified in green label holders. The set includes: Cent PR65 Red; Reverse of 1940 Nickel PR66; Dime PR65; Quarter PR66; Half Dollar PR65. From The Merrill Collection. (Total:
- 5 coins) 9628 Five-Piece 1941 Proof Set PR64 to PR66 PCGS. The coins are separately
- certified. The set includes: Cent PR64 Red; Nickel PR66; Dime PR64; Quarter PR64; No AW Half Dollar PR65.
 - From The Merrill Collection. (Total: 5 coins)
- 9629 Five-Piece 1941 Proof Set PR64 to PR65 PCGS. The coins are separately certified in first-generation holders. The set includes: Cent PR64 Red; Nickel PR65; Dime PR64; Quarter PR65; Half Dollar PR64. The half dollar is incorrectly given a 1942 date by PCGS. From The Merrill Collection. (Total: 5 coins)

- 9630 Five-Piece 1941 Proof Set PR65 PCGS. The coins are separately certified in first-generation holders. The set includes: Cent PR65 Red; Reverse of 1940 Nickel PR65; Dime PR65; Quarter PR65; No AW Half Dollar PR65.
 - From The Merrill Collection. (Total: 5 coins)
- Six-Piece 1942 Proof Set PR64 to **PR66 PCGS.** The coins are separately certified in green label holders. The set includes: Cent PR64 Red; Type One Nickel PR66; Type Two Nickel PR64; Dime PR65; Quarter PR64; Half Dollar PR65. From The Merrill Collection. (Total: 6 coins)
- 9632 Six-Piece 1942 Proof Set PR64 to PR66 PCGS. The coins are separately certified in green label holders. The set includes: Cent PR64 Red; Type One Nickel PR65; Type Two Nickel PR65; Dime PR66; Quarter PR65; Half Dollar PR64. From The Merrill Collection. (Total: 6 coins)
- 9633 Six-Piece 1942 Proof Set PR64 to PR65 PCGS. The coins are separately certified in first-generation holders. The set includes: Cent PR64 Red; Type One Nickel PR65; Type Two Nickel PR64; Dime PR64; Quarter PR64; Half Dollar PR64. From The Merrill Collection. (Total: 6 coins)
- 9634 Six-Piece 1942 Proof Set PR65 to PR66 PCGS. The coins are separately certified. The set includes: Cent PR65 Red; Type One Nickel PR66; Type Two Nickel PR66; Dime PR66 Gold CAC; Quarter PR66; Half Dollar PR66 CAC. From The Merrill Collection. (Total: 6 coins)
- 9635 Five-Piece 1951 Proof Set, PR65 to PR67 PCGS. Ex: Teich Family Collection. The holders display consecutive certification numbers. The set includes: Cent PR65 Red; Nickel PR66; Dime PR67; Quarter PR67; Half Dollar PR66 CAC. (Total: 5 coins)
- 9636 Five-Piece 1938 Proof Set PR64 to PR66 PCGS. The coins are individually holdered with consecutive certification numbers. The set includes: cent PR64 Red and Brown; nickel PR66; dime PR65; quarter PR66; half dollar
 - From The Jamestown Collection, Part II. (Total: 5 coins)

(Total: 5 tokens)

End of Auction

Terms and Conditions of Auction

 This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions Europe Coopératief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

- Áll bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
 Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Nineteen and one-half percent (19.5%) on Comic and Movie Poster Auction lots;
- Twenty percent (20%) on Currency, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots;
 Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$250,000, plus twenty percent (20%) of any amount between \$250,000 and \$2,500,000, plus twelve percent (12%) of any amount over \$2,500,000.

 Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium
- is \$14 per lot.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature* Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real- time telephone bidding are available to registered clients during

Bidders:

- 4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
- 5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during,
- or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction. 6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

- 8. Bids in Signature Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives
- on HA.com. Review at http://www.ha.com/c/ref/web-tips.zx#biddingTutorial.

 9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
- 10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
- 11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments

(see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$499	\$20	\$200,000 - \$499,999	\$20,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$25,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$1,999,	999 \$50,000
\$2,000 - \$4,999	\$200	\$2,000,000 - \$9,999,	999 \$100,000
\$5,000 - \$9,999	\$500	>= \$10,000,000	\$200,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature* Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

- 14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any
- online or the beginning of the extended period, if any 15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
- 16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.

 17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low
- estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.

 18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
- 19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any
- other damages or expenses pertaining to the lot. 20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
- 21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.

 22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be
- considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

- 23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the
- 24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer..
- 25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
- 26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the
- selected funding source, you agree to complete payment using your credit card on file.

 27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys
- 28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction
- 29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
- 30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account. Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

Terms and Conditions of Auction

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

- Delivery; Shipping; and Handling Charges:
 32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
- 33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item'(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

 34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges
- the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
 - a. Scope of Transit Services: Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide Secure Location to which the items will be delivered. NOTICE: Auctioneer is neither an insurance company nor a common carrier of any type.
 - b. Auctioneer's Compensation for Transit Services: Auctioneer will provide transit services to Buyer for ¾ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
 - c. Auctioneer's Limitation of Liability for Transit Services: You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. Under no circumstances is Auctioneer liable for consequential or punitive damages.
- 35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.
- 36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.
- 36C. Auctioneer shall not be liable for any loss caused by or resulting from:
 - a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles
- 37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

- WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.

 39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue
- of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
- 40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
- 41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
- 42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

- 43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance
- to these express terms of a granted remedy, shall waive any claim against Auctioneer.

 44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly

disclaims any warranty as to safety or usage of any lot sold. Dispute Resolution and Arbitration Provision:

- 45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer
- disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
- 46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
- 47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
- 48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the $time\ of\ return\ or\ conditions\ and\ restrictions\ for\ return.\ This\ Agreement\ and\ any\ Claim\ shall\ be\ determined$ and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
- 49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
- 50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
- These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

- 52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
- 53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
- 54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California: Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas: In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Terms and Conditions of Auction

Additional Terms & Conditions: COINS & CURRENCY

- COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.
- COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.
- COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.
- COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, http://www.ngccoin.com/services/writtenguarantee.asp; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, http://www.pcgs.com/guarantee.html; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.
- COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.
- COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

- liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.
- COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.
- COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.
- COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.
- COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.
- COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.
- COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.
- COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.
- COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

Notice as to an Auction in New York City

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-8-2016

MyRecommendations Online Suggestion Tool

THE LAST PIECE OF THE PUZZLE? HERITAGE HAS IT.

Our new online tool, MyRecommendations looks at your collecting history and preferences, and notifies you when a potentially desired item becomes available—even items you have never bid on before.

MyRecommendations constantly combs Heritage's upcoming auctions and in-house inventory, and updates your personalized list as auctions open and close. It's a convenient new way to stay aware of the latest opportunities to expand and improve your collection.

Find that special piece with MyRecommendations visit Heritage's US Coin pages now at HA.com/Coin.

Inquiries: 800.USCOINS (872.6467)
